CRANE: A rendering, in the A. V., of the Hebrew word *קָרַן* or *קָרַן*, which in the R. V. is more correctly translated "swallow." "Crane," however, is the proper rendering in the R. V. of the word *קָרַן*, as in Isa. xxxviii. 14 and Jer. viii. 7. The first of these texts describes the crane as a bird that chatters; while the second points out its migratory character. The bird now identified with this crane, on the authority of Tristram and Hart, is the *Grus communis*. It is met with in Palestine in large numbers during the summer; and it winters generally in northern Africa. It is said to be the largest bird now found in Palestine, often measuring four feet in length. It gathers in large flocks at common roosting-places, where the chatter and clanging of its notes may be heard, especially at night, at a long distance. The peculiar anatomy of this bird has for some years engaged the attention of zoologists.

CRANIOMETRY: The methods of measuring skulls for the purpose of determining certain topographical relations, the most important measurement of the skull being the cranial index, or the cephalic index in case the measurements are taken

on the living. This consists in the ratio of the width of the head above the ears to the length of the head from the forehead to the most distant point at the back of the head. The cephalic index is expressed by multiplying the width of the head by 100 and dividing the product by the length. Thus, supposing a head to be 153 mm. wide and 186 mm. long, then $\frac{153 \times 100}{186} = 82.26$, the cephalic index. The

broader or rounder a head is, the higher is its cephalic index, and vice versa. When the cephalic index is above 80 anthropologists term it "brachycephalic"; between 75 and 80, "mesocephalic"; and less than 75, "dolichocephalic."

There have been but few measurements of Jewish skulls, most of the measurements of Jews having been taken on the living. The following is a list of the measurements of 100 Jewish skulls taken by various anthropologists:

The 30 Crimean skulls measured by Ikoff, being those of Karaites, can not, perhaps, be considered Jewish in the strict sense of the word; and no conclusion can be drawn from the remaining 70.

Resort must be had to an analysis of the measurements of the living for the determination of the

Jewish cranial type. Appended is a table of nearly 3,000 Jewish heads, from various countries, measured during the last twenty years:

**Cephalic
Index.**

On an examination of the figures in this table a remarkable uniformity of the cephalic index of the modern Jews will be noticed. Excepting the Caucasian Jews, of whom but few have been measured, it is shown that nearly 90 per cent are between 81.5 and 83. This indicates a limited variability and differentiation. In fact, the differences are so slight (from 80 to 83) that they may be fairly assigned to the usual discrepancies between different series of measurements of a single and homogeneous race. Another remarkable fact is the striking absence of the dolichocephalic type, which is characteristic of all the other modern Semitic races and tribes, as the Arabs, Syrians, Abyssinians, etc. Among the modern Jews this ranges, as is seen in the table, from 1 per cent, in Blechman's series, to 7.3 per cent in Glück's. On the other hand, the brachycephalic type predominates, nearly all the series showing more than 60 per cent of heads having a cephalic index of over 80.

Modern anthropologists do not rely solely on averages for the purpose of ascertaining the character of a given race. The best test at present at the command of the anthropologist, of the homogeneity or variability of a race, is the seriation and coordination of the figures obtained by measurement, and the representation of them graphically in the form of a curve. In case the people investigated is a mixed

race, its component elements are shown in the curve by different culminating points. From the literature on the anthropology of the Jews 1,071 measurements of Jewish heads in various countries have been collected, and the data has been arranged in curve-form. The figures from which the appended diagram is derived were obtained from the following sources:

139 Russian Jews, measurements made by Yakowenko.	
100 " " " " " Blechman.	
100 " " " " " Weissenberg.	
67 " " " " " Stieda.	
112 Italian " " " " " Lombroso.	
53 Caucasian " " " " " Pantukhof.	
500 Jews from various countries measured by Fishberg.	

1,071

These 1,071 heads are classified as follows: dolichocephalic, 17 = 1.58 per cent; mesocephalic, 235 = 21.94 per cent; brachycephalic, 819 = 76.48 per cent.

What is most worthy of notice is the small percentage of dolichocephaly—only 1.58 per cent—and the large preponderance of brachycephaly, 76.48 per cent. The graphic representation of these 1,071 measurements is shown on the accompanying diagram. The cephalic index is marked from left to right, the percentage of persons having a given index being indicated above each index. Thus, 10.46 per cent of heads have an index of 80; 14.19 per cent, one of 82; and so on. The curve culminates at the index of 82—corresponding exactly to the average and also to the mean index. The largest percentage of people

have this cephalic index; and around them are clustered the majority of heads—those having larger indexes to the right, and those with smaller indexes to the left. At the index of 75 the line of the curve begins to ascend regularly and rapidly, until it reaches 82, when it rapidly descends. It thus forms an acute pyramid with its apex almost in the middle. "A sharp pyramid generally denotes a homogeneous people: if they were all precisely alike, a single vertical line, 100 per cent, would result" (Ripley).

The cephalic indexes from which this curve was obtained were

those of Jews in various parts of the world. Russian Jews are those observed by Yakowenko, Blechman, Weissenberg, etc.; Italian Jews (Sephardim), by Lombroso; Caucasian Jews, by Pantukhof; while those measured by Fishberg include Russian, Polish, Austrian, Hungarian, Rumanian, German, and American Jews. Some, though very few, in the last-mentioned series are of African origin. When figures taken from such diverse elements of Judaism present such a homogeneity, it can safely be concluded that the cranial type of the modern Jews shows very little if any intermixture of foreign blood. So little has this been anticipated that Lombroso, in his frequently quoted comparison of 95 Italian and 112 Jewish heads, insists upon the variability of the latter;

whereas, if he had drawn a curve, the result would have shown several apexes among the Italians and only one, and that a steep one, for the Jews at the usual index (82—), leading to an exactly opposite conclusion to that of Lombroso.

There appears no perceptible difference between the cephalic index of Jews and that of Jewesses, as

berg's measurements, 80 from Yakowenko's, and 215 from Fishberg's), the following distribution is found: dolichocephalic, 9 = 2.61 per cent; mesocephalic, 67 = 19.42 per cent; brachycephalic, 269 = 77.97 per cent. These figures agree with those cited above for men. A curve drawn from the measurements of 345 heads of Jewesses here recorded has the appearance indicated in the accompanying diagram. It will be observed that this curve is not a smooth pyramid, as is the curve of the cephalic index of Jews. It shows, in fact, a decided double apex: one pointing at an index of 81, the other at 84, which seems to indicate a greater variability and differentiation in Jewish females than in Jewish males. This is contrary to what has been observed throughout the organic world. This point, recently brought out by Fishberg ("American Anthropologist," Oct.-Dec. 1902), is of sufficient scientific interest to merit further investigation.

The absolute figures obtained by craniometry of modern European Jews show a striking uniformity unknown among other civilized races. In the accompanying table the length of the head varies from 183 mm. in Majer's and Kopernicki's, Weissenberg's, and Yakowenko's series, to 188 mm. in Blechman's—a difference of only 5 mm., which is comparatively insignificant. The same is the case

with the width of the head, which varies from 150 to 156 mm.—a difference of only 6 mm.

Of the other measurements of the head, the horizontal circumference is important enough to be mentioned here. A table giving figures on this subject is appended:

Circumference of Jewish Skulls.

As is the universal rule, the circumference of the head of the male is greater than that of the female by about 2.5 cm. (1 inch). Another point worth noting is that (wherever data are obtainable) the circumference of the head among the Jews is, as a rule, greater than that among the races with whom they dwell.

The most important problem suggested by a study of craniometrical results concerning Jews is the relation of the type head of the modern Jews to that of the ancient Hebrews and to the modern Semitic skulls. The pure Semitic skull is dolichocephalic, as may be seen from a study of the heads of modern Arabs, Abyssinians, Syrians, etc. The cephalic index of these races is from 73 to 77. As is at present accepted by nearly all anthropologists, the shape of the head is the most stable characteristic of a given race. It is little if at all influenced by climate, environment, nutrition, or sexual and social selection. The only way the type of the head may change is by intermixture with other races. If the ancient Hebrews were of the same stock as the modern non-Jewish Semites, and if the modern Jews are their descendants, then a pure dolichocephalic type of head would be expected among the Jews. As has been seen, all the results of craniometry prove that the Jews are brachycephalic, and that the dolichocephalic form is only found among them in less than two per cent of cases.

This can be explained in two ways: either the modern Jews have very little Semitic blood in their veins, as Lombroso, Luschan, and others are inclined to think, or the ancient Hebrews may have been a brachycephalic race. In order to establish this, an examination is necessary of more skulls of ancient Hebrews, which are not available at present. The only skulls of ancient Hebrews recorded are five

Ancient Jewish Skulls.

obtained by Lombroso from the catacomb of St. Calixtus in Rome, dating back to 150 c.e. Lombroso aptly remarks that these skulls are of great importance, because at the period from which they are derived (second century), there could not have been any considerable racial intermixture of the Jews with other peoples, and the cranial type

they represent should be considered pure. The cranial indexes of these skulls are 80, 76.1, 78, 83.4, and 75.1, giving an average cephalic index for the living of 80.5, which is far above the cephalic index of the non-Jewish Semites.

Of course, no positive conclusion can be drawn from only five skulls; still, the fact that among these are found two brachycephalic and only one dolichocephalic, points strongly against the opinion that the ancient Hebrews were a purely dolichocephalic race.

The twelve skulls from a Jewish cemetery in Basel, of the thirteenth and fourteenth centuries, which have been examined by Kollmann, are even more brachycephalic than those of contemporary Jews. The average cranial index of these skulls is 84.66; *i. e.*, a cephalic index of 86.66. This again shows that the brachycephalism of the modern Jews is not of recent origin.

It can therefore be stated that the modern European Jews are shown by craniometrical evidence to be a pure type, and that no evidence of appreciable racial intermixture is discoverable. The opinion that the Sephardim are dolichocephalic, while the Ashkenazim are brachycephalic, is not supported by craniometrical research on European Jews. The measurements by Jacobs, Lombroso, Livi, and Glück prove that the Sephardim are almost as brachycephalic as are the Ashkenazim, as can be seen from the accompanying table. Jacobs' measurements of the Jews in London show that the percentage of dolichocephalic is even larger among the Ashkenazim, being 28.3 per cent, as against only 17 per cent among Sephardim.

M. FI.

CREATION: The bringing into existence of the world by the act of God. Most Jewish philosophers find in **בְּרִיאָה** (Gen. i. 1) creation *ex nihilo* (יֵשׁ מֵאֵין). The etymological meaning of the verb **בְּרִיאָה**, however, is "to cut out and put into shape," and thus presupposes the use of material. This fact was recognized by Ibn Ezra and Nahmanides, for instance (commentaries on Gen. i. 1; see also Maimonides, "Moreh Nebukim," ii. 30), and constitutes one of the arguments in the discussion of the problem.

Whatever may be the nature of the traditions in Genesis (see **COSMOGONY**), and however strong may

be the presumption that they suggest the existence of an original substance which was reshaped in accordance with the Deity's purposes (see **DRAGON**; **DARKNESS**), it is clear that the Prophets and many of the Psalms accept without reservation the doctrine of creation from nothing by the will of a supermundane personal God (Ps. xxxiii. 6-9, cii. 26, cxxi. 2; Jer. x. 12; Isa. xlii. 5, xlv. 7-9): "By the word of the Lord were the heavens made; and all the host of them by the breath of his mouth." To such a degree has this found acceptance as the doctrine of the Synagogue that God has come to be designated as "He who spake and the world sprang into existence" (see **BARUK SHE-AMAR** and 'Er. 13b; Meg. 13b; Sanh. 19a, 105a; Kid. 31a; Hul. 63b, 84b; Sifre to Num. § 84; Gen. R. 34b; Ex. R. xxv.; Shab. 139a; Midrash Mishle, 10c). God is "the author of creation," **עוֹשֵׂה בְּרִאשִׁית** ("bereshit" having become the technical term for "creation"; Gen. R. xvi.; Ber. 54a, 58a; Hag. 12a, 18a; Hul. 83a; Ecclus. [Sirach] xv. 14).

The belief in God as the author of creation ranks first among the thirteen fundamentals (see **ARTICLES OF FAITH**) enumerated by Maimonides. It occurs in the **YIGDAL**, where God is called **קִדְמוֹן לְכֹל דְּבַר אִשֶּׁר נִבְרָא**, "anterior [because Himself uncreated] to all that was created"; in the **ADON 'OLAM**; and it is taught in all modern Jewish catechisms.

Nevertheless, Jewish literature (Talmudic, pseudo-epigraphic, and philosophical) shows that the difficulties involved in this assumption of a creation *ex nihilo* (יֵשׁ מֵאֵין) and in of the time, were recognized at a very early Conception. day, and that there were many among the Jews who spoke out on this subject

with perfect candor and freedom. Around the first chapter of Genesis was waged many a controversy with both fellow Jews and non-Jews. The influence of Greek ideas is clearly discernible in various Midrashic homilies on the subject—*e. g.*, those dealing with the mode of divine creation (Gen. R. i., "God looked into the Torah, and through it He created"—a Platonic idea; *ib. x.*); with the view of God as architect (*ib. i.*; Hag. 12; compare Philo, "De Opificiis Mundi," iv.); with the creative word or letter (Gen. R. i.; Midr. ha-Gadol, ed. Schechter, pp. 10 *et seq.*; Pesik. R. xxi.; Yer. Hag. ii. 77c); with the original elements (Gen. R. x.; Ex. R. xiii., xv.; Yer. Hag. ii. 77a); with the order of creation, the subject of the well-known controversy between the schools of Hillel and Shammai (compare Hag. 12a; Ta'an. 32a; Pirke R. El. xxxvi.); with the various acts of creation assigned to various days (Charles, "Book of Jubilees," 1902, pp. 11 *et seq.*); with the time consumed in creation (Ber. R. xii.); with successive creations (Pes. 54a; Gen. R. i.; Ab. R. N. xxxvii.); and, finally, with the purpose of creation (Abot vi.; Sanh. 98b; Ber. 6b, 61b; see also Bacher, "Ag. Tan." and "Ag. Pal. Amor.," Indices, *s. v.* "Weltschöpfung," etc.). The Slavonic Enoch (xxiii.-xxxv.) contains an elaborate presentation of old Jewish cosmogonic speculations, apparently under Egyptian Orphic influences (see N. Bonwetsch, "Das Slavische Henochbuch," Berlin, 1896; "The Book of the Secrets of Enoch," ed. by W. R. Morfill and R. H. Charles, Oxford, 1896).

II.
From right to left : I. Chaos ; Division of Light from Darkness ; Separation of Earth and Water ; Vegetation. II. Sun, Moon, and Stars ; Fishes and Birds ; Animals and Man ; Sabbath Rest.
STAGES OF CREATION.
(From the Sarajevo Haggadah of the fourteenth century.)

The danger lest speculation on creation might lead to Gnosticism underlies the hesitancy to leave the study of Gen. i. open to all without restriction (Sanh. 37a; Deut. R. ii.; Hag. 19b; Midr. Teh. to Ps. cxxxvi.; Midr. ha-Gadol, ed. Schechter, p. 4). That such speculation is of no consequence to the practical religiosity which Judaism means to foster is well expressed in the caution not to "inquire into what was before the world was" (Mishnah Hag. ii.; Yer. Hag. ii.). See CABALA.

The Alexandrian Jews, under the sway of Platonic and Neoplatonic ideas, conceived of creation as carried into effect through intermediate agencies, though still an act of divine will, while the relation of the agencies to the Godhead is not always clearly defined, so that it is possible to regard them almost as divine hypostases—subdeities, as it were, with independent existence and a will of their own (ALEXANDRIAN PHILOSOPHY). The divine *σοφία* ("wisdom") has a cooperative part in creation (Wisdom ix. 9). While the Palestinian (II Macc. vii. 28) insists that all was made by God "out of nothing" (*ἐξ οὐκ ὄντων*), Wisdom (xi. 17) posits a formless arch-matter (*ὕλη*), which the Creator simply brought into order.

Philo proceeds to fully develop this idea. The Mosaic account of creation is not to be accepted literally (see Drummond, "Philo Judæus," i. 293). Creation was not in time. "It is folly to suppose that the universe was made in six days, or in time at all." The expression "six days" merely indicates the most perfect arrangement ("De Allegoriis Legum," i. 2; "De Opificiis Mundi," i. 3; "Quod Deus Sit Immutabilis," i. 277). To

Views of Philo. the question whether the world had no real beginning, he gives, though inconsistent with himself, a negative answer. There was a time when the parts of the cosmos "deified by the heathen" were not; God alone was never non-existent ("Dec. Orac." ii. 190). "For the genesis of anything," he says, "many things must combine: that by which, that out of which, that through which, that on account of which" (= cause, material, instrument, purpose). God is the cause of the cosmos, while the four elements are the material ("De Cherubim," i. 161, 162). Nothing suggests that he regarded this material as other than uncreated. It was there when God arranged the new order of things. God is the demiurge ("De Eo Quod Deterius Potiori Insidiatur," i. 220; "De Plantatione Noe," i. 320; his expressions are *δημιουργός*, *κοσμοπλάστης*, *τεχνίτης*). As in other points, so on this, Philo is not rigidly consistent. There are passages again from which a belief in the creation of matter out of nothing might be assumed. He speaks of matter as corruptible, and "corruptible" is, in his theory, a correlative of "created" ("Quis Rerum Divinarum Heres Sit," i. 495).

It was not matter, but form, that God praised as good, and acknowledged thus as His creative work. Yet Philo protests that God is "not a demiurge, but a creator." What before was not, He made (*οὐ δημιουργός μόνον, ἀλλὰ καὶ κτίστης αὐτὸς ὢν*, "De Somniis," i. 632; see Siegfried, "Philo von Alexandrien," p. 232). Drummond argues, against Siegfried, that God is here styled Creator only of the

ideal, intelligible world, not of matter in the visible world (*l.c.* i. 304). In regard to Philo's Logos and the Memra of the Targum see Logos.

In the writings of the Jewish philosophers of the Middle Ages, creation is one of the problems most earnestly discussed. It belonged to the "four questions" (Maimonides, "Moreh," i. 71) which were regarded as fundamental. The alternative was be-

tween *הדרוש העולם*, Ar. *חזרת אלעאלם* ("creation"), and *קדמות העולם*, Ar. *קדם אלעאלם* ("eternity of matter"). The Arabian thinkers and schoolmen were perplexed by the same problem (Munk, "Mélanges," p. 421). They had been moved to discuss the subject

by their studies (at second hand) of Plato and Aristotle. The Greek mind could not conceive of creation out of nothing—"Ex nihilo nihil fit."

Plato's *ἰδέα* (consult his "Timæus") was eternal. Aristotle, too, maintained the eternity of matter ("De Cælo," i. 10-12; "Phys." ii. 6-9). God is the source of the order of things predestined by Himself ("De Mundo," ii.), though Maimonides and Judah ha-Levi argue for the possibility of claiming for Aristotle the contrary view ("Moreh Nebukim," ii. 15; "Cuzari," i. 65).

Is the doctrine of the eternity of matter compatible with the Jewish conception of God? On three grounds this has been negatived: (1) It limits God's omnipotence and freedom. (2) It is in conflict with the Biblical account, and denies the possibility of miracles, though the Talmudic theory of miracles would not be affected. "God, when He created the sea, imposed the condition that it should divide itself before Moses' staff" (Ab. v. 9). (3) Great men, such as Moses and the Messiah, would be utterly impossible (Albo, "Ikkarim," i. 12). The first point may be considered cogent, but the two others are not very profound.

In two ways do those of the Jewish philosophers who maintain the *creatio ex nihilo* attempt to prove their thesis: (1) by demonstrating the necessity of the Creation, and (2) by showing that it is impossible that the world was not created ("Cuzari," v. 18; "Moreh Nebukim," ii. 30). But in order to achieve this, they had first to disprove the arguments of their opponents. These were the same as those with which Mohammedan theologians (see Shahrastani, ii. 199 *et seq.*) had been confronted. Maimonides (*l.c.* ii. 14; compare also Aaron b. Elijah, "Ez Hayyim," vi., vii.) arranges them into two groups: (1) *מצד העולם* (cosmological, Schmiedl's terminology), and (2) *מצד האל ית'* (theological).

In the first group there are the arguments: (a) Motion must be eternal, without beginning. Time is an accident of motion; "timeless (*i.e.*, changeless) motion" and "motionless (*i.e.*, changeless) time" are self-contradictory conceptions; therefore, time has no beginning. (b) The prime arch-matter underlying the four elements must be eternal. "To become" implies taking on form. But primal matter, according to its own presupposition, implied in the concept "prime," has no form; hence it has never "become." (c) Decay and undoing are caused by contradictory elements. But spherical motion excludes contradictory principles, and is without beginning

and end. (d) Suppose the world had a beginning; then either its creation was necessary—that is, eternal—or its previous existence was impossible (and thus it might not be now); but if it was possible, then possibility (potentiality) presupposes a subject carrying attributes involving the possibility. This subject could not but be eternal.

In the second group there are the arguments (a) God could not have been a creator in potentia without suffering change in Himself from potentia to reality. What caused this change? (b) The world created in time presupposes some exciting cause for God's will to create. Either God did not previously will to create, or, if He did, He had not the power. The world can not be thought eternal unless we admit defects in God. (c) The world is perfect, the product of God's wisdom. God's wisdom and His essence are coincident. God being eternal, His work must also be eternal. (d) What did God do before the world was?

How did Jewish thinkers meet these positions? They followed in the paths of the Arab Motekallamin. Especially did they lay emphasis on the proof of free determination, which the Arabic logicians had developed (דְּרֵךְ הַחֵחֶד, Ar. "al-takhsis"). Admitting no "law of nature," they posited the principle of limitless possibility. Things are as they are, not because they must be so, but because a free Being outside of them wills them to be so. He might also have willed them to be otherwise. He who determines is also He who creates; that is, produces from nothing. The world is as it is because a Being determined its being, preferring its being to its non-being. Matter dependent for form upon another, even if eternal, can not exist. God is by inherent necessity. The fact that matter is as it is, shows that it was created to be as it is by the preference of the Creator.

In historical succession Saadia was the first to take up the problem, especially in his "Emunot" (i. 1-5). He argues for the creation from the irrationality of an endless limitless quantity—a favorite theme among the Motekallamin. His argumentation is extremely obscure. He enumerates thirteen theories concerning creation; among them, first, the Biblical; then that of the atomists; next the theory of emanation and dualism; finally, that in which the four elements are held to be eternal, a theory which he says had many adherents among the Jews.

Ibn Gabirol devotes a large part of his "Meqor Hayyim" to the problem. He does not rely upon Biblical texts. His creation theory is as follows: The prime substance emanated out of itself Will, or the creative Word. This Will mediates between God and the world. From the Will emanated universal matter (element) יסוד כללי, from which came all beings. His position is a sort of pantheism, not altogether Biblical.

Bahya ibn Pakuda, in "Hobot ha-Lebabot," maintains that (1) nothing is self-created; (2) there must be a highest first cause; (3) composition proves generation or creation.

Judah ha-Levi invokes the testimony of tradition in his "Cuzari" (i. 43-68; see also Maimonides' "Moreh," iii. 50; Abravanel, in his שְׂמִימֵי חֲרָשִׁים, p. 34). He pleads for the authenticity of the Mosaic

account as being corroborated by tradition; by the facts of human speech, which show the common descent of all men; by the identity of the system for counting time; etc.

Abraham bar Hiyya Albageloni is another defender of creation. His "Sefer Hegyon ha-Nefesh" tries to explain the Biblical tradition on mathematical grounds. "Yḥy" and "form" had potential existence until God called them into reality through His will in combination. But when we speak of time and the like with reference to God, we use human similes. Time is only a measurer. Therefore before the world was, there was nothing to measure and consequently no time. Yḥy = "Tohu," and form = "Bohu"; both were preexistent, as the text shows by its use of the expression "the earth had been" (הָיְתָה). "Form" = הוּא (כִּי הוּא).

Maimonides is most timid in his defense of creation. He concedes that it can not be proved. The most that can be attempted is to weaken the arguments of the opposition schools ("Moreh," i. 67, 71; see Gersonides to Gen. i.). He endeavors to disprove the eternity of the world as far as he may, and to strengthen whatever seems to favor the contrary theory ("Moreh," i. 13-30). He makes much of Aristotle's indecision concerning the point at issue. He advances "arguments that approximate demonstrations" (see MAIMONIDES, MOSES). They have contributed nothing to the solution of the perplexity.

Of his successors, Albalag, Gersonides, and Nahmanides either reject creation *ex nihilo* or seriously modify it. Hasdai Crescas (in "Or Adonai," iii. 1, 4) criticizes most severely Gersonides' assumptions that matter and God are equally absolute; while the former is void of everything, even of form, the latter is highest perfection. Why should equally absolute and necessary matter submit to the will of God? He charges Gersonides with inconsistencies in denying special providence while assuming the power of God over and in the special particulars of arch-matter. His pupil Albo regards the denial of creation *ex nihilo* as tantamount to the denial of God's perfection ("Ikkarim," i. 23).

The Karaites as a rule accept *creatio ex nihilo*. It is one of their articles of faith (see "Ez Hayyim," xii.). For the speculations of the Cabalists see CABALA. Regarding modern views see EVOLUTION.

—In the Koran and Mohammedan Literature: The Koran does not contain a descriptive and detailed account of the Creation; but it abounds in allusions to God's power as manifested therein, and in appeals to it in refutation of heretical assumptions (Polytheism; sura xvi.), or in support of certain dogmas (Resurrection; *ib.* xxii. 1-7). On the whole, these various references show that Mohammed had a general, vague, hearsay acquaintance with both the Biblical and Talmudical traditions of the Jews. "It is God," according to sura xi. 9, "that created the heavens and the earth in six days." Before

creation "His throne [compare כסא הכבוד] was upon the water" (see Gen. i. 2; suras l. 37, lvii. 4). Special emphasis is laid on the forming of the mountains, which are said to give stability to the earth (suras xxi. 22, xxxi. 9, xli. 9. lxxviii. 6). In this a reminiscence of the Biblical זרועות עולם (Deut. xxxiii. 27; compare Ps. xc. 2) is suggested, while the popular conceit of the Arabs has it that the earth, when first created, was smooth and flat, which induced the angels to ask who could stand on so tottering a frame. Thereupon God next morning threw the mountains on it (Sale, "Koran," p. 215, note g, Philadelphia ed., 1876). In the space of four days God distributed nourishment to all that asked (sura xli. 9). The earth and the heavens are said to have been originally a compact mass which God divided, while water is said to be the life-giving element (sura xxi. 9, 31). Things were created after a certain preestablished measure (sura liv. 49; the word "kadr" may also be rendered "decree"; but see Baidawi, *ad loc.*). "One word" alone brought the world into being "like the twinkling of an eye" (sura liv. 50). As Baidawi remarks, this word was "Kun" (Let there be!), though the statement is also explained to imply that God accomplished His work very easily and quickly, without manual labor or assistance (compare sura l. 37, and Talmudic בלא עמל ובלא יגיעה, Ber. R. xii.; see Baidawi, *ad loc.*). Nor did He create in sport (compare rabbinical לא לבטלה, but in truth, and for a definite term, to last until the day of final judgment (suras xli. 35, xli. 2; Baidawi, *ad loc.*). With scant consistency, however, Mohammed speaks in another passage of a creation not in six but in two days. Baidawi (sura xli. 8) interprets "days" as "turns."

Mas'udi ("Prairies d'Or," ed. Meynard and Courteille, i. 36 *et seq.*) gives in detail the following traditional order: "First water, which carried the divine throne, was created.

In Mohammedan Tradition. From this primal water God caused a vapor to arise and form the sky. Then

He dried the liquid mass, transforming it into one earth, which He split up later into seven. This earth was completed in two days—Sunday and Monday. The earth was placed on a fish that supported it [sura lxviii. 1; compare Pirke R. El. ix., and Ginzberg "Die Haggada bei den Kirchenvätern," p. 19, where it is shown that by this fish is meant the leviathan]. This fish and the earth God propped on blocks of stone, resting on the back of an angel, this again on a rock, and this finally on the wind. But the motions of the fish shook the earth mightily, so God put the mountains in place and rendered it stable. The mountains furnished food for earth's tenants. The trees were created during two days—Tuesday and Wednesday. Then God mounted up to the vaporous sky and made of it one heaven, which, in two more days—Thursday and Friday—He split up into seven. Hence the name for Friday, 'Jum'ah' (joining together), 'union' or 'assembly,' because on it the creation of the heavens was united to that of the earth. Then God filled the heavens with angels, seas, icebergs. Creation thus completed, God peopled the earth with the jinn, made of purest fire [sura lv. 14], among them being Iblis, the Devil. When about to create man (Adam), He

informed the angels of His intention to make him His vicegerent on earth. The angels made objections [as in the rabbinical legend, Gen. R. viii.]. Gabriel was sent to bring clay from the earth, but the earth refused to supply it. Michael, also sent on the same errand, was unsuccessful. Finally the angel of death went forth, vowing that he would succeed. He brought back earth of various colors, hence the various colors among men. Adam was made of the surface ["adim"] soil. Forty years a portion of such soil was hung up to become a compact mass, and then left for another period of forty years, until the clay became corrupt. To this God then gave human shape, but left it without a soul for one hundred and twenty years. Finally, after enduring many indignities at the hand of Iblis, and being an object of terror to the angels, and at last causing Iblis' banishment, Adam was endowed with divine breath, according to some gradually; and when he was entirely permeated with this divine breath, he sneezed; whereupon God taught him to say: 'Praise be to God! may thy Master have mercy on thee, O Adam!'

An altogether different account is found in the "Kitab Al-hwal al-Kiyamah," edited by Wolff ("Muhammadanische Eschatologie," Leipsic, 1872). The first object created was a tree with four thousand branches—the tree of knowledge; the second, the light of Mohammed—a pearl in the shape of a peacock, which was placed on the tree. Then God made the mirror of shame, placing it so that the peacock saw his reflected image; whereupon shame seized him and he prostrated himself five times before God. The light of Mohammed, too, blushed before God, and in consequence perspired. From the beads of perspiration taken from various parts of the body were created the angels, the upper and lower thrones of God, the tablet of revelation or of decree, the pen, Paradise and Gehenna, sun, moon, and stars, the dividing interval between heaven and earth, the Prophets, the Sages, the martyrs, the pious, the celestial and the terrestrial Ka'bah, the Temple in Jerusalem, the places for the mosques, the Moslems—men and women, the souls of the Jews, the Christians, the Magi, and, finally, the earth from east to west, and all that it contains. This apocalyptic account is comparatively late [but echoes rabbinical traditions concerning the light of the Messiah (Gen. R. i.), the כסא הכבוד, Paradise and Gehinnon (Pes. 54a); compare also Slavonic Enoch, xxv.—xxvi.—k.]. As to the theories of creation propounded in the various philosophical schools, see ARABIC PHILOSOPHY; ARISTOTLE IN JEWISH LITERATURE.

CREATION, BOOK OF. See YEZIRAH, SEFER.

CREATION, ERA OF. See ERA.

CREATURE: A loose rendering in the A. V. of: 1. "Nefesh" ("a breathing thing"; Gen. i. 20 *et seq.*, ii. 19, ix. 10 *et seq.*; Lev. xi. 46). 2. "Ber'ah" ("creation"; R. V. better, "a new thing"; Num. xvi. 30).

3. "Ḥayyot" ("heavenly animals"; Ezek. i. 5 *et seq.*, x. 15; Septuagint, ζῶον).

In Apocryphal literature "creature" is the translation of κτίσμα or κτίσις (בריאה or בריה), and denotes either creation in general (Wisdom v. 17, xix. 6; Judith ix. 12, xvi. 14; III Macc. ii. 2) or mankind (Ecclus. [Sirach] xvi. 16; Wisdom xvi. 24). In rabbinical literature "beriyot" is the regular term for fellow creatures or mankind (Abot i. 12. "Love the creatures"; *ib.* ii. 10, iii. 11; Ber. 19b, "Respect of the creatures"). Hence, also, Mark xvi. 15; Col. i. 23; Rom. viii. 19; and I Peter ii. 13 (A. V. renders, incorrectly, "every human ordinance"; see Taylor, "Sayings of the Jewish Fathers," 2d ed., pp. 21, 141).

The phrase "a new creature," in the sense of "regeneration," which occurs in II Cor. v. 17, and Gal. vi. 15, represents the rabbinical "beriyah ḥadashah." See BAPTISM.

E. G. H.

K.

CREED. See ARTICLES OF FAITH.

CREEPING THINGS: A loose expression used in the A. V. as the equivalent of רמש and שרץ. רמש ("remes" = creeping—that is, without, or with imperceptible, feet; applies to terrestrial and also to water animals. The R. V. more correctly translates it "teemeth" in Gen. ix. 2; Lev. xx. 25, and "moveth" in Lev. xi. 44; Ps. lxxix. 34; Gen. viii. 19. Generally, however, "remes" stands for "reptiles," possibly also for very small quadrupeds. In the Talmud "remes" is used as a general name for worms infesting the intestines of man or beast (Niddah 21a), for which elsewhere the words תולע (Ab. iii. 1) and רמה occur. But, according to Tos. to Niddah 23a, *s. v.* ליתרי, only the serpent was called the "creeping thing," היה הרומשת.

שרץ ("sherez," Gen. vii. 21; Lev. v. 2; xi. 10, 29; Deut. xiv. 19) applies only to animals that swarm, whether terrestrial, such as the weasel, mouse, lizard (Lev. v. 29); aquatic (Lev. xi. 10; Gen. i. 2; compare Ex. vii. 28 [A. V. viii. 3]); or even winged (Lev. xi. 20–23). The fundamental connotation of the verb and noun is undoubtedly the incalculably prolific multitudes of little animals which always appear in troops or swarms. The R. V. therefore gives the translation "breed abundantly" (Gen. viii. 17, ix. 7; compare Ex. i. 7).

In rabbinical Hebrew "sherez" is the generic term for amphibious reptiles ('Ab. Zarah 31b). The etymological implication of prolific increase is brought out in Ex. R. viii. 2; Lev. R. § 13 (the "akrab" throws 60 young). It is also the typical term for ritual and moral impurity, in the oft-recurring phrase מכל בשר בידו ("one takes the bath of purification while holding a sherez in his hand"), applied to one who would do penance without repentance (Yer. Ta'an. ii. 65d, beginning). A distinction is made between שרץ ארץ ("land insect"), ש' מים ("water reptile"), and ש' עוף ("winged insect") (Pes. 24a). Maimonides ("Yad," Ma'akalat Asurot, ii. 12 *et seq.*) says: "שרץ המים are all animals that are not fishes but live in the water, such as leeches, sea-dogs. רומש ["romes" = creepers upon the earth] are worms produced by the decomposition of other substances, helminths; while שורץ על הארץ ["those that

swarm on the earth"] are generated through copulation of the parent animals."

J. W.

CREIZENACH, MICHAEL: German educator and theologian; born in Mayence May 16, 1789; died in Frankfort-on-the-Main Aug. 5, 1842. Creizenach is one of the most typical representatives

of the era of transition, following the epoch of Mendelssohn, whose chief aim was the regeneration of Judaism by the methods of Talmudic dialecticism, which, as they imagined, would win over the Orthodox and yet achieve the necessary progress. Creizenach was educated in the traditional way, devoting his whole time to

Talmudic studies; and he was sixteen years old when he began to acquire the elements of secular knowledge. This was during the French occupation, when a liberal spirit, greeted enthusiastically by both Jews and Christians, permeated the society of the ancient center of Catholic Germany. He studied mathematics with great zeal, and wrote text-books of the science. Through his influence a Jewish school was founded in Mayence, whose principal he was, at the same time giving private instruction. He was a very popular teacher, and counted many Christians among his pupils.

In 1825 Creizenach was appointed teacher at the Philanthropin in Frankfort, where he found in I. M. Jost an enthusiastic coworker in pedagogic and reform endeavors. He held services regularly in the hall of the school, and introduced confirma-

tion exercises. His literary works were also devoted to the advocacy of Reform on the basis of rabbinical Judaism. With this object he wrote his "Shulhan 'Aruk," in which he essayed to prove that the Talmud as a whole was untenable, but that a compromise with modern ideas could be effected in the same dialectical way in which the Rabbis had harmonized the Law with the exigencies of their time. In the later parts of his work, however, he abandoned this view; advocating a return to pure Mosaism, which a year after his death was more distinctly proclaimed as the program of the Frankfort Reformverein, at the head of which was his son Theodor. In spite of his Reform tendencies, Creizenach was deeply interested in Hebrew literature, especially in Hebrew fiction, and during the last two years of his life edited with his friend Jost the Hebrew periodical "Zion."

Creizenach's works are: "Versuch über die Parallelen theorie," Mayence, 1822; "Lehrbuch der Darstellenden Geometrie," *ib.* 1822; "Geist der Pharisäischen Lehre," a monthly, *ib.* 1823-24; "Heshbon ha-Nefesh, oder Selbstprüfung des Israeliten Während der Busstage," Frankfort-on-the-Main, 1838; "Hinnuk li-Bene Mizwah, oder Stunden der Weihe für Israelitische Confirmanden," *ib.* 1841; Ibn Ezra's "Yesod Mora" (edited with a German translation), *ib.* 1840; "32 Thesen über den Talmud," *ib.* 1831; "Lehrbuch der Technischen Geometrie," *ib.* 1828; "Lehrbuch der Algebra," Stuttgart and Leipsic, 1835. His chief work, mentioned above, is "Shulhan 'Aruk, oder Encyklopädische Darstellung des Mosaischen Gesetzes," etc., in 4 vols.: (1) "Thariag, oder Inbegriff der Mosaischen Vorschriften nach Talmudischer Interpretation," *ib.* 1833; (2) "Shurat ha-Din, Anweisung zur Regulirung des Israelitisch-Religiösen Lebens," etc., *ib.* 1837; (3) "Hizzuk ha-Torah, oder die Dringlich Gewordene Befestigung der Mosaischen Lehre," etc., *ib.* 1839; (4) "Dorshe ha-Dorot, oder Entwicklungslehre des Mosaischen Ritualgesetzes," etc., *ib.* 1840.

CREIZENACH, THEODOR: German poet and historian of literature; son of Michael Creizenach; born April 17, 1818, in Mayence; died Dec. 6, 1877, at Frankfort-on-the-Main. He studied classical antiquities in Giessen, Göttingen, and Heidelberg, and then lived for several years at Paris as tutor in the house of Aaron Anselm Rothschild. Upon his return from Paris in 1842 Creizenach became teacher in the Jewish Philanthropin at Frankfort-on-the-Main, and was one of the principal founders of the Frankfort Jewish Reformverein; in 1854, however, he abandoned the faith of his fathers and embraced Christianity. Creizenach was made teacher of the Frankfort municipal high school in 1859, and appointed professor of history and literature at the Frankfort gymnasium in 1863.

In the literary world he attracted attention by such poetical productions as "Dichtungen," Frankfort, 1839; and "Gedichte," Frankfort, 1848; 2d ed., 1851. Being familiar with the personality and life of Goethe in his relations to Frankfort, he edited and

published Goethe's correspondence with Madame von Willemer, under the title "Der Briefwechsel Zwischen Goethe und Marianne von Willemer," 2d ed., Stuttgart, 1878. In conjunction with O. Jäger he took charge of the new edition of Schlosser's "Weltgeschichte," 1870 *et seq.*; and in conjunction with Otto Müller edited a weekly publication, "Das Frankfurter Museum."

CREMATION.—Biblical Data: The act of burning the dead. Cremation was not the prevailing custom among the ancient Hebrews, as it was among other contemporary nations (see J. Grimm, "Kleine Schriften," ii. 226). It was, however, not unknown to them, and was occasionally practised. The Pentateuch prescribes burning as the punishment in certain cases of unchastity (Lev. xx. 14, xxi. 9; Gen. xxxviii. 24). In Josh. vii. 15, 25, and perhaps I Kings xiii. 2, and II Kings xxiii. 20, the burning of the corpse is added to the death penalty. From this it may be concluded that the burning of the human body was looked upon with horror. In exceptional circumstances—for instance, in the case of an epidemic—cremation may have been resorted to. This at least is inferred from Amos vi. 10. From the unusual word there employed *מסרה*, held to be a dialectic variant for *משרה*, many have concluded that in Amos' time cremation was far from being repugnant to the feelings of the people, and the care that the body should be properly burned became a sacred duty, devolving upon the nearest of kin—in the passage quoted, upon the uncle or the mother's brother, who therefore was designated as the *מסרה* (see Kimhi's Com. *ad loc.*, and his *השרשים* s. v. *מסרה*).

However, the evidence in support of this contention is very weak. *מסרה* probably meaning the maternal uncle without reference to an assumed obligation to direct the process of incinerating the bodies of his kinsfolk. Amos vi. 10 does not necessarily imply that the "bones of the dead" about to be removed from the house were burned. In a Karaite document by Jepheth ben Ali (Felsenthal, in Kohut Memorial Volume, pp. 133 *et seq.*), *מסרה* occurs as "maternal uncle." Ibn Ezra, *ad loc.*, quotes Ibn Kuraish as authority for the meaning "maternal uncle," saying that it is unsupported; Abu al-Walid, in "Kitab al-Uṣul," ed. Neubauer, p. 494, mentions this meaning. The passage in Jer. xxxiv. 5 has nothing to do with cremation. A. V. renders it "so shall they burn odors for thee," a rendering accepted by Graf ("Der Prophet Jeremias," Leipsic, 1862) and Giesebrecht ("Der Prophet Jeremias," in "Kurz. Hand-Comment. zum A. T." Göttingen, 1894). Nor can I Sam. xxxi. 12 be interpreted to imply that the corpses of kings were cremated, and that this constituted one of the royal prerogatives. It is far more likely that in order to guard the bodies from insult on the part of the Philistines, the inhabitants of Jabesh-gilead burned them, and for this received praise.

To the author of Chronicles the cremation of royal remains appeared so offensive that he changed it

into a regular burial (I Chron. x. 12). He states the occurrences as follows: "And [they] laid him [King Asa] in the bed which was filled with sweet odors and divers kinds of spices prepared by the apothecaries' art; and they made a very great burning for him" (II Chron. xvi. 14). "And his people made no burning for him [King Jehoram] like the burning of his fathers" (II Chron. xxi. 19).

The custom of making "a very great burning" at the funeral of great men continued for several centuries. The Talmud ('Ab. Zarah 11a) records that at the funeral of Rabban Gamaliel the Elder (c. 117 c.e.) Aquilas, the proselyte, made "a very great burning."

—**In Talmudic Literature:** No mention is made of cremation in Talmudical literature. Both Oh. ii. 2, where the question is discussed whether the ashes of those who were burned are to be considered clean or unclean, and Niddah 27b, where a similar question is raised in regard to a burned corpse, the skeleton of which has been preserved, refer to cases of accidental burning. The Tosafot Ta'an. 15b, s.v. וְנוֹתֵן, and 16a, s.v. אֶפֶר, are of the opinion that the ashes strewn on the reading-desk and on the heads of all that attended the service on fast-days were those of burned human bones. But אֶפֶר מִקְלָה does not signify the ashes of burned bodies, but the ashes of the hearth. Nor does the Talmud contain any suggestion that cremation was once practised by the ancient Hebrews.

E. G. II.

M. Sc.

—**In Modern Times:** The question whether, from the point of view of Jewish law, cremation may be allowed, has been extensively discussed in modern times. It is generally agreed that there is no express law to be found in the Bible demanding the burial of the human body; and though the Shulhan 'Aruk (Yoreh De'ah, 362) contains the statement "Burial in the earth is a positive command," a position assumed also by Maimonides ("Sefer ha-Mizwot," p. 261), this command is merely deduced from קָבַר תִּקְבְּרֶנּוּ ("Thou shalt surely bury him") in Deuteronomy (xxi. 23; compare Sanh. 46b). It seems uncertain whether it was ever a custom in early times to burn the bodies of kings and nobles. Referring to such a burning, the Mishnah ('Ab. Zarah i. 3) says, "Every death which is accompanied by burning is looked upon as idolatry"; and the fact that Saul's body was burned (I Sam. xxxi. 12) is said to have been the cause of the three years' hunger at the time of David (Yeb. 78b; Rashi to II Sam. xxi. 1). Funeral pyres of costly clothes and other articles, to which reference is made (Tosef., ed. Zuckermann, 119, 3, and parallels) in the case of Rabban Gamaliel the Elder, were also not unknown in Hasmonean times (Josephus, "Ant." xv. 3, § 4). According to the Shulhan 'Aruk (348, 1) this is expressly forbidden in the case of ordinary people. Yom-Tob Lipmann Heller even tries to prove that the cases of burning mentioned in the Bible are to be explained as "embalming," by means of which all but the bones was destroyed (Tosafot to Pesahim, iv. 9).

On the other hand, it has been asserted by some authorities that burial is merely a custom ("minhag"), and that no serious objection can be brought against

cremation. In proof of this the following citation has been adduced from Midr. Wayasha' (Jellinek, "Bet ha-Midrash," i. 37): "Isaac begged his father on Mount Moriah: 'Burn me completely, and bring my ashes to my mother that she place them in an urn in her own room, and that whenever she enters the room she may remember me with tears.'" The same idea is referred to in a number of liturgical pieces. It is further asserted that לְמִיתָה כְּבוֹרָה can not be construed as opposed to some other form of disposing of the dead, since it simply means that a Jew should be careful so to dispose of the dead as to bring the body as quickly as possible into contact with mother earth. Many authorities went so far as to permit calcium to be strewn over the body in the grave, in order to hasten the process of decomposition (Solomon b. Adret, Responsum No. 369; Moses Isserles to Yoreh De'ah, 363, 2). This custom became general among the Portuguese Jews. On dogmatic grounds, it is further asserted, no opposition can be entertained against cremation (Maimonides, "Yad," Teshubah, viii. 2, 3); and Joseph Albo ("Ikkarim," iv. 30) criticizes Abraham ibn Daud and Nahmanides for opposing the practise. Some Italian cabalists were opposed to cremation on the ground that according to their system the soul was supposed to go from the house of the deceased to the grave and back again during the seven days following death ("Il Vessillo Israelitico," xxx. 105).

Orthodox Jewish authorities have as a rule opposed cremation on the ground that it is not in consonance with the spirit and traditions of Judaism.

The Italian rabbinate made a declaration in this sense (ib. xxiii. 12). Zadok Kahn, grand rabbi of France, has decided that in the case of cremation the religious ceremony should precede incineration; that the rabbi should then retire and not be present during the act of cremation; and that the "Hashkabah" should be recited at the home. Herman Adler, chief rabbi of Great Britain, considers cremation a violation of Jewish law and custom; but he permits the "Lewayah" at the burying of the remains (ib. xliii. 394). The late haham of the Portuguese community in London, B. Artom, preached Nov. 7, 1874, a sermon on cremation, in which he asserted that it was opposed to the spirit and history of Judaism ("Jewish World," June 15, 1874; compare "Il Vessillo," xxiv. 294, 327). This position was also maintained by J. Hildesheimer in Berlin, Kohen in Inowrazlaw, and others. But Moses Israel Tedeschi, rabbi of Triest, published a responsum in 1890 in which he not only tried to prove that cremation was not opposed to the spirit of Judaism, but asked that at his death his own body should be disposed of in this way ("Monatschrift," 1890, pp. 149, 153). In 1895 the rabbis of Württemberg declared cremation contrary to Jewish law because that law, with rare exceptions, forbids us to mutilate a corpse (see "Rev. Et. Juives," xxxii. 276).

One of the foremost advocates of cremation was Rabbi A. Wiener of Oppeln, who not only contributed articles to the "Flamme," but also became a member of the Gesellschaft für Feuerbestattung. In 1892 the Central Conference of American Rabbis re-

solved "that in case we should be invited to officiate as ministers of religion at the cremation of a departed coreligionist, we ought not to refuse on the plea that cremation is anti-Jewish or irreligious" ("Year Book," 1892, p. 43).

CRÉMIEU: Town in the ancient province of Dauphiné, France. As early as the fifteenth century it had an important Jewish community. Raoul de Gaucourt, governor of Dauphiné, renewed in 1441 the privileges of the Jews of that town for seven years in consideration of the sum of fifty florins, which the Jews Moses Dandéli of Crémieu and Aguiet Solomon of St. Symphorien were to collect from their coreligionists. The Jews of Crémieu refused to pay the sum, and emigrated in large numbers. The dauphin Louis recalled them in 1449, and promised them that if they would reopen their banking-houses he would exact of them in future only one ounce of fine silver, instead of the half-mark that they had formerly been taxed.

CRÉMIEU-FOA, ANDRÉ: An officer in the French cavalry; born in Paris Jan. 20, 1857; died at Porto Novo, North Africa, Nov., 1892. Crémieu-Foa early embraced the military career. The "Libre Parole," the organ of the anti-Semitic party, published in 1892 a series of articles on the preponderance of the Jewish element in the French army. Captain Crémieu-Foa, then garrisoned at Meaux, challenged the editor-in-chief of the "Libre Parole," Edouard Drumont, to a duel, and inflicted upon him a slight wound. Thereupon, the signer of the articles, M. de Lamase, challenged Crémieu-Foa, alleging that the latter should have applied to him for satisfaction.

After the encounter between Crémieu-Foa and M. de Lamase, in which four bullets were exchanged without either of the principals being hit (June, 1892), Armand Mayer, one of the seconds of the Jewish officer, a comrade and coreligionist, was taken to task on the spot by the Marquis de Morès, one of the seconds of M. de Lamase, the marquis charging Mayer unjustly with having divulged the contents of the procès-verbal which had been drawn up at the conclusion of the first encounter, and which should have been kept secret. In the subsequent duel between Mayer and Morès, the former was killed. Crushed by this fatal issue, and exposed to still more violent insults on the part of the anti-Semitic press, Crémieu-Foa was about to issue more challenges when M. de Freycinet, then minister of war, ordered him to Tunis to organize one of the two squadrons of Sudanese spahis destined for Daho-

me, West Africa, which place was then in revolt against the French protectorate. In the ensuing expedition under the command of Colonel Dodds, Crémieu-Foa distinguished himself in several combats previous to the taking of Abomey, so that he was mentioned for bravery in the order of the day, and received in the presence of the troops the congratulations of the commander-in-chief. He died at Porto Novo, Nov., 1892, partly in consequence of a wound sustained while reconnoitering, and partly owing to an attack of tropical fever.

CRÉMIEUX (COLONY). See AGRICULTURAL COLONIES IN THE UNITED STATES.

CRÉMIEUX, GASTON: French socialist and writer; born at Nîmes June 22, 1836; died at Marseilles Dec. 1, 1871. He entered upon an active career as attorney and counselor at law at Aix in 1856, after having taken all the honors at the lyceum of Nîmes; but after two years spent in a fruitless effort to acquire a remunerative practise, he returned to his native town, where his generosity in dealings with impecunious clients soon procured him the honorable appellation of "Avocat des Pauvres."

In the spring of 1862 Crémieux was admitted to the Marseilles bar, and then and there started upon an aggressive political and journalistic campaign against Napoleon III. and the centralizing and reactionary tendencies of his régime. Crémieux's audiences consisted largely of working men, to whom he preached the most advanced political and economic theories of international socialism. The International Working Men's Association, established in London in 1864, found in him a tireless worker. As a participant in an insurrection against the local authorities (Aug. 8, 1870), Crémieux was arrested and condemned to six months' imprisonment; but he was subsequently freed by the revolution of Sept. 4, and was made procurator of the republic at Marseilles. His handsome, youthful exterior and the broad philanthropic range of his ideas made him one of the most conspicuous figures in the public life of southern France.

At the outbreak of the Paris Commune, Crémieux declared himself for the rebellious Parisians and against Thiers and the Versailles government. On March 23 the insurrection in favor of communal home rule took the department of Bouches-du-Rhône by storm; and Crémieux was elected president of a provisory departmental administration. Radical though he was, he was firmly opposed to extreme measures involving useless bloodshed; and he thus incurred the displeasure of his fellow revolutionists. On the twenty-eighth of the same month the department was put under a state of siege; and the Commune of Marseilles took a desperate step in arresting and threatening the lives of a number of prominent upholders of the reactionary government. On April 4 the central government at Versailles sent Gen. Espivent de la Villeboisnet against the rebellious town, enjoining him to resort to the most energetic measures. By a heavy bombardment of the prefecture, the seat of the self-styled communal gov-

ernment, the commander of the Versailles troops compelled the insurrectionary leaders to surrender.

A few days previous to the overthrow of the Commune at Marseilles, Crémieux had imperiled his own life by protecting the lives of the imprisoned friends of Thiers. The victors established a martial tribunal, whose sentences sent many hundreds to death or exile. Crémieux was arrested and court-martialed June 28, 1871. The trial was a mere formality of law, the court having decided beforehand upon capital punishment for all prominent offenders. Within a few minutes sentence of death was passed on Crémieux in spite of strenuous efforts on the part of friends, who testified to the extraordinary clemency and moderation of the defendant in his dealings with disarmed enemies. He received the verdict with perfect composure, and afterward met his death unflinchingly. Crémieux left a widow and four children, one child having died during his imprisonment in Aug., 1870.

CRÉMIEUX, HANANEEL: French Hebraist and judge; born 1800; died 1878; son of Mordecai Crémieux. He was a Talmudic scholar, and was teacher of Hebrew to the Jewish children of Aix, besides often officiating in the capacity of shoḥet, mohel, and hazzan. In 1821 Crémieux entered upon what proved to be a successful business career, and later officiated for seventeen years as judge in the tribunal of commerce of Aix, Provence. In this capacity he was instrumental in securing the passage of the bankruptcy law which gave the assignee the right to institute legal proceedings against a corporation, the stockholders of which did not pay the amount of their shares, either in full or in part. Crémieux was one of the founders of the "Archives Israélites," and contributed to its columns, often anonymously. He was also a member of the consistory of Marseilles.

CRÉMIEUX, HECTOR JONATHAN: French dramatist; born at Paris Nov. 10, 1828; died there in 1892; of the same family as Isaac Adolphe Crémieux. After a preparatory course of studies at the Lycée Bourbon he attended the Paris law school. In common with the majority of his fellow-students, he took an active part in the overthrow of the Orleanistic dynasty, and participated in the turbulent politics of the second republic. During the revolution of Feb., 1848, he secured a commission as lieutenant of the Garde Mobile. Though only twenty years of age, he carefully avoided committing himself to any extreme policy, and assumed a temporizing attitude, which he only abandoned shortly before the coup d'état of 1851, to attach himself to the administrative force of the usurper.

The revolutionary excitement of 1848 and the rôle played by Napoleon III. subsequent to the revolution, suggested to Crémieux the idea of adapting the history of Lodovico Fiesco, from the German of

Friedrich Schiller, for the French stage. In collaboration with his brother Emile, he turned the sonorous masterpiece of the German poet into a spectacular tragedy of the "Hernani" type, in five acts and eight tableaux, full of stirring allusions to contemporaneous events. The emperor, solicitous to bestow political patronage upon those who had been daring enough to give him support in the risky affair of Dec. 2, rewarded Crémieux in 1852 with a clerkship in the Ministry of State; and this appointment, practically a sinecure, together with his first dramatic success, enabled him to enter upon a literary career and to exploit the financial possibilities of the Parisian stage of the second empire.

In spite of the never-wearying readiness of his pen, Crémieux could not hope to reap the whole harvest of success without assistance. During his whole career as a dramatic author he was perpetually collaborating with one or another, following therein the example set by the most popular and prolific French dramatists of his age. With Léon Battu he produced the melodramatic "Elodie, ou le Forfait Nocturne" (1852); with Taine the younger, "La Demoiselle en Loterie"; with Dennery, "Germaine," a dramatization of Edmond About's romance; with Woestyn and Bourget, "La Voie Sacrée, ou les Etapes de la Gloire"; with the Cogniard brothers, the fairy piece "Le Pied de Mouton." Ludovic Halévy, Philippe Gille, Henri Bocage, and Ernest Blum are only a few of his other collaborators. He also wrote librettos for Leo Delibes, Hervé, and Offenbach.

Crémieux's plays, written to suit the demand of the day and passing into oblivion with it, were produced at the Odéon, the Bouffes-Parisiens, the Variétés, and the Théâtre Lyrique. He tried his hand at every conceivable style of production in the dramatic category: opera, proverb, tragedy, melodrama, comedy, vaudeville, etc. Larousse, without claim to completeness, gives a list of thirty-five of his plays. But the only one which has retained its popularity is his libretto to Jacques Offenbach's "Orphée aux Enfers," a masterpiece of brilliant equivocation and mocking "blague" which has made the round of the stage of all countries and still firmly holds its position in the modern theatrical repertory. His collaboration with Offenbach brought him once more prominently before the eyes of his imperial master, who in 1864 made him Knight of the Legion of Honor. His extraordinary diligence and his favor with the public survived the empire and the first and second decades of the third republic. Crémieux committed suicide.

CRÉMIEUX, ISAAC ADOLPHE: French statesman; born at Nîmes April 22, 1796; died in Paris Feb. 9, 1880. He was educated at the Lycée Impérial, where he and a cousin were the only Jewish students. Crémieux was at that time an ardent admirer of Napoleon I., and it was he who, at the head of a deputation of the pupils of the Lycée, addressed the emperor in the court of the Tuileries. For many years he remained faithful to

this idol of his youth, and was the adviser and friend of the proscribed Bonapartes.

Crémieux was admitted to the bar at Nîmes on attaining his majority (1817), and soon became famous. He was a brilliant orator

As Advocate. eloquence with a wide knowledge of the law, rare powers of assimilation, clearness, irony, and the faculty of inspiring others with his own enthusiasm. Many of the most important cases in the south of France were soon entrusted to him, the most famous being that of the notorious royalist bandit Trestaillon, whose conviction he obtained.

This case made Crémieux's name as familiar in Paris as it was in the department of the Gard: the young lawyer entered into relations with all the Liberals of Paris, and he thenceforth passed his yearly vacations in that city. His patriotism was shown in the famous case called "De la Marcellaise" (1819), when he was called upon to defend three young men accused of having sung the hymn of the Revolution. In spite of the president's opposition, he dared to praise it, and recited the poem in paraphrase, to let the jurymen pass judgment upon it. At the famous verse "Amour sacré

de la patrie," all the jurymen had risen, and the accused were acquitted. After the revolution of 1830 Crémieux removed from Nîmes to Paris, where he bought Odillon Barrot's practise at the Court of Cassation. This he retained for nearly seven years, and then resumed his private practise, ranking with the leading lawyers of Paris.

Crémieux was successful in obtaining the abolition of the humiliating oath known as the "More Judaico," which every Jew had been forced to take on coming into court; and this made Crémieux the leader of his coreligionists, whose social status and interests he protected during his entire career. In 1840 Cré-

mieux took an important part in securing the acquittal, through Mehemet-Ali, of the Jewish victims

Participated in the Damascus Affair. of the famous Damascus ritual murder case (see DAMASCUS AFFAIR). His return from the Orient was a series of triumphs, the Jews of Vienna being foremost in their demonstrations of gratitude. He was also received by Prince Metternich, the then chancellor of the Austrian empire.

In 1842 the leaders of the opposition asked Crémieux to present himself for election in the arrondissement of Chinon, to supplant Piscatory, the

ministerial deputy from Indre et Loire. After a hard struggle he was elected, and during the last years of Louis Philippe's reign he achieved brilliant successes, both as a lawyer and as a speaker. He was not only an able and disinterested defender of journalists and statesmen, but also the patron of all artists. At his reunions the most celebrated singers of the Opera and of the Théâtre des Italiens appeared; and on one occasion they were accompanied by Rossini, Meyerbeer, and Auber. Crémieux was one of the most brilliant orators of the "Campagne des Banquets," which brought about the revolution of

Feb. 24, 1848; and his election as a member of the provisional government was due in a great measure to this fact. As minister of

As Minister of Justice. justice he was instrumental in abolishing capital punishment for political offenses, the exposure of the condemned to public curiosity, and the political oath. But the republic, of which he was so proud to have been one of the founders, came to an abrupt end.

Crémieux has often been blamed, and he doubtless blamed himself, for advocating Louis Napoleon's candidacy as president. He believed, however, in

ISAAC ADOLPHE CRÉMIEUX.

(After the painting by Count du Houy.)

THE NEW YORK PUBLIC LIBRARY ASTOR LENOX TILDEN FOUNDATION 125 WEST 47TH STREET NEW YORK 10019

the sincerity of the prince's expressions of republican sentiments, and cherished the illusion that a nephew of Napoleon would sustain the republic in France, and redeem the "eighteenth of Brumaire." Moreover he was strongly prejudiced against General Cavaignac, who, after having refused, on the pretext of ill health, the portfolio of minister of war, offered to him by the provisional government, suddenly became well enough to be the chief executive.

Crémieux's illusions concerning the policy of Louis Napoleon soon vanished. Under date of Dec. 15, 1848, he addressed a letter to the newly elected prince, in which he exhorted him to be a "standard for reconciliation and not of disillusionment," and to remain true to his republican principles. He never

saw Napoleon again. On leaving the prisons of Mazas and Vincennes, to which the coup d'état of his former friend had brought him, he retired from active politics and went back to his law practise, defending throughout France the newspapers that were persecuted, and the interests of all the proscribed republicans, among them Louis Blanc, Challemel-Lacour, Ledru Rollin, Pierre Leroux, and many others.

To enumerate Crémieux's many and important cases would be impossible. Among his clients were the sultan and the viceroy of Egypt. He journeyed to Bucharest in the interests of the ALLIANCE ISRAËLITE UNIVERSELLE, of which he had been one of the founders and of which he had become the president in 1863. Finally, in 1869, he had to give way to the voters of Paris, and, in spite of his seventy-three years, was compelled to take his seat in the Palais-Bourbon, to help overthrow the empire and again save his beloved France. But this time the task was impossible. The incapacity of the leaders and Bazaine's treason lost the army. Gambetta himself, formerly Crémieux's secretary and now his colleague in the Government of National Defense, could not create a new army or capable generals. The five months of terrible anxiety, followed by the inglorious peace, prostrated Crémieux. He offered a part of his wealth to help pay the millions demanded by the Germans, but Thiers would not listen to the plan of a national subscription. Crémieux was made a life senator. He gave 50,000 francs in aid of the victims of the flood at Toulouse, urged by the same sentiments that, in 1860, had led him to address the following appeal to his coreligionists in behalf of the Christians of Lebanon:

"The Christians of the East are subjected to the most horrible persecution. Tortures, rape, assassination, pillage, burning,

the murder of women, children, and old people, even mutilation of corpses—such is the picture presented by the whole region of the **Pro-Christian Appeal.** Lebanon. Blood is shed; misery and famine are spreading among a dense population, whom Mohammedan fanaticism is destroying in a war even against the intention and forces of the Turkish government, and whose sole crime is that they worship the Christ. French Jews, let us be the first to come to the aid of our Christian brothers; let us not await the results of diplomacy, which is always so slow and which will regulate the future; let us alleviate present needs. Let a large subscription be begun to-day in Paris, and let a Jewish committee be organized to-morrow. Do not let us lose one day, one hour; let the signal for abundant relief be given in the midst of this Jewish assembly, gathered in this capital of civilization. This signal will be answered by our

brethren in England, Germany, Belgium, Holland, and all Europe; in the countries that recognize them as citizens, and in those that still refuse them this noble title. You, also, Jews of the American countries where religious liberty is triumphant, you will help the Catholics of Asia, who are so cruelly oppressed by superstition. Let the rich Jew bring his large offering, and the poor Jew his pious obolus. But a still greater thought shall rise from this first impulse. Who knows? Perhaps God, who rules over all, has permitted these catastrophes in order to give a solemn occasion to all the cults to aid one another, for mutual defense against the furious hatreds, the daughters of superstition and barbarity. A permanent committee in every country, with eyes open for all the victims of fanaticism, without distinction of religion, must be created and supported. The misfortunes that fall at this moment upon so many innocent victims arouse the sympathy of all. They suggest the thought of a future protection against this scourge, which our century repudiates with horror—religious persecution."

Crémieux's entire life is a proof of the nobility of his character. In 1832 he heard that his father, on leaving the prison in 1796, had found his business destroyed, and had been compelled to compromise with his creditors. Crémieux did not

rest until he had found all these creditors or their heirs; and he returned to them not only the principal, which most of them had forgotten, but also the accumulated interest for thirty-six years. Thereupon he sought and easily obtained the rehabilitation of his father's name. He never sacrificed any of his convictions to his personal interests, and did not hesitate to antagonize the powerful influence of the Rothschilds in advocating, in the Chamber of Deputies, the acquisition of the railroads by the government.

Always ready to aid his coreligionists, Crémieux never forgave them a mean action. Thus, he refused to aid Deutz, the despicable accuser of the Duchess of Berry, who appealed to him as being a Jew. On Jan. 30, 1880, Crémieux lost his wife, who, since 1824, had been his constant companion and helper. Both had frequently said that neither could live without the other, and Crémieux's death occurred ten days after that of his wife.

CRÉMIEUX or CRÉMIEU, MOSES BEN SOLOMON: Scholar; born at Carpentras, France, in 1766; died May 4, 1837. He was a nephew and son-in-law of Mordekai Crémieux. In 1790 he removed to Aix, in Provence. Here he established a Hebrew printing-office, from which he issued (1829-1835) a corrected edition of the prayer-book used in the four French communities of Avignon, Carpentras, L'Isle, and Cavaillon, together with a commentary thereon, under the title "Ho'il Mosheh Be'er" (Moses Began to Explain). He also published (1833-36) notes on Ibn Ezra's commentaries on Genesis, Exodus, Leviticus, the Five Scrolls, Proverbs,

and Job. The former work is of greater intrinsic value than the latter.

CREMONA: Italian city in the plain of Lombardy; capital of the province of Cremona. The beginnings of the Jewish community in this city appear to date back to the middle of the twelfth century, but the first authentic notice is of the year 1420, when the decurions of the city renewed some earlier privileges of the Jews. They lived in the Via Giudecca (now Via Zuecca), where there was a large synagogue, and in a few contiguous streets; and they had a cemetery in the vicinity, designated to-day as "S. Maria di Bethlem No. 2174." In 1456 Francesco Sforza took them under his protection because of their fidelity to the state. In 1466-68 they were so numerous that the citizens petitioned Princess Bianca Maria Visconti not to admit any more Jews. The treatment received by the Jews in the territory of Milan was generally just. Their chief occupations seem to have been in commerce, banking, and agriculture. They fared ill, however, under Spanish rule. Charles V. permitted the preaching friars to excite the populace against the Jews; but this permission was rescinded in 1541 by Guido Ascanio Sforza, chamberlain of Pope Paul III.

The first considerable disturbance in the ghetto of Cremona occurred when steps were taken to enforce the bull of Pope Julius III. ordering all Talmudic works to be burned (1553). It was in 1559 that the inquisitor-general of the city ordered the Jews to deliver to the Inquisition all their copies of the Talmud. Some of them obeyed; but deputies of the various congregations protested in a memorial, and the governor of Milan intervened in their favor. The Inquisition, however, remained obdurate, and the Dominicans came to its aid. One of these, Hieronymus of Vercelli, was a vicar acting as assistant to the inquisitor-general of Cremona; the other, Sixtus of Siena, was an apostate well known to the Jews from his previous fanatical preaching against them in various parts of Italy. As a result of their agitations, a censorship commission was organized, to which were appointed Vettoria Eliano, another convert, and a Jew named Joshua dei Cantori. The last-named had lived in a feud with Joseph Ottolenghi, a scholar who had opened a school in Cremona, had edited many Hebrew works, and had helped to make Cremona a center of Talmud learning. Joshua was ready to avenge himself on Ottolenghi and his friends by joining the Dominicans in their denunciations, and the commission gave a decision against the Talmud and rabbinical works. These proceedings finally wore out the patience of the governor; he yielded, gave orders that the Talmud should be burned, and ordered Spanish soldiers to aid in searching Jewish houses and the printing establishment for the proscribed works. In April or May, 1559, between 10,000 and 12,000 books were publicly burned. Seven years later, in 1566, Hebrew books were again seized, but were immediately restored by the Senate. When Pius V. ordered the Jews to wear the badge, and forbade the lending of money on interest, Cardinal Borromeo extended the

application of these measures to all the Jews of Lombardy. In 1582 a Christian, having murdered a Jew, was punished on complaint of the community; whereupon the Christian citizens of Cremona sent a deputation to Philip II. requesting the expulsion of all Jews. When the Bishop of Cremona was elevated to the papacy in 1590 as Gregory XIV., the Jews were in danger of being plundered, and dared not leave their houses for several days.

On receiving the deputation from the citizens of Cremona, Philip II. ordered a census of the Jews, and in 1592 their expulsion. But this order was not carried into effect by Volasco, the governor of Milan; on the contrary, he lent his aid to Samuel Coen of Alessandria when the latter offered to carry a petition to Madrid. Coen succeeded in persuading the king to withdraw the order. The inhabitants of Cremona and Padua, however, offered considerable sums of money to Philip as an inducement to expel the Jews, and, advised thereto by his confessor, he acceded to their wishes.

Expulsion 1597. At the same time the Jews were accused of fraud in regard to the taxes, and were thereby deprived of the protection of the state. When the order of expulsion arrived, in 1596, the Jews were unable to leave because of the war in Lombardy between the French and the Spaniards, and the governor permitted them to stay until 1597. A new decree was then obtained from the king, ordering an immediate expulsion, and Volasco was forced to obey it. He tried to soften the lot of the unfortunate Jews by advising a gradual emigration, and by aiding and supporting them with money; he also, hearing that the fugitives were being molested and annoyed, strictly forbade any ill treatment or plundering. Only two families were allowed to remain until the trial in connection with the taxes was finished, and then, after a decision had been given in their favor, these too left. The fugitives went to Mantua, Modena, Monticelli, Reggio, Verona, and Padua. No Jews have lived in Cremona since that time.

In 1588 the community of Cremona numbered 456 persons and was well organized. It had supported in 1550 a Talmud Torah under the direction of R. Joseph Otting. There was also a club for study, "Bet El," the by-laws of which, dated Nov. 26, 1582, are still extant ("Ha-Asif," iii. 220), besides a charitable society, "Honen Dal," whose constitution dated from 1591, when the community was already threatened with danger. The reputation of the community extended beyond its borders. The consent of the rabbis of Cremona was obtained on the occasion of the proceedings against Azariah dei Rossi's "Me'or 'Enayim" (see "Rev. Et. Juives," xxxiii. 86). The community was always ready to render aid to the persecuted, as in the case of the Maranos of Pesaro (*ib.* xx. 70); and when the communities of Italy sent a deputation to Rome to protest against the burning of Hebrew books, that of Cremona was the leader of the movement.

For many years there was a Hebrew printing establishment at Cremona, and when the publication of certain works was interfered with in other places, Cremona shared with Mantua the work of completing them. For example, the "Ziyyuni," one thou-

sand copies of which had been in course of publication and had been burned during the Milan troubles of 1559, was brought out in 1560. In 1556-61 and 1565-67 Vincenzo Conti published here in excellent form several important Hebrew works—the Psalms in 1561, the Pentateuch and the Megillah in 1566 (?). The device of the publisher shows Hercules with the hydra and the motto "Superavit ac virtus." Several other books were subsequently printed at Cremona (for instance, by Christopher Draconi, 1576); the editions were often very large, 2,000 copies of the Zohar being issued in 1559-60. The Jews regarded their works as safe from the Inquisition in the territory of Milan.

The earliest known rabbi of Cremona was Menahem Immanuel b. Abraham Raphael Coen Rapa Porto (1519). Then followed: Joseph Ottling (Ottolenghi [?]; 1555); Eliezer b. Elia Ashkenazi; Abraham b. Abraham Basola;

Rabbis of Cremona. Isaac b. Gershom Gentili; Abraham b. Kalonymus Pescarolo; Raphael b. Isaiah delli Piatelli; Moses Menahem Coen Rafa Porto; Abba b. Elia Zarfati; Joshua Sanvil ben Jekuthiel; David Aaron Norlenghi (1596); Nathan da Cremona; Joshua and Jacob b. Elhanan Heilbronn (היילפרון), born in Cremona; Abraham Menahem Coen Porto, who worked as corrector at Cremona in 1574.

CRESCAS, ABIATHAR IBN, HA-KOHEN:

Physician in ordinary to King Juan II. of Aragon (1458-79); skilful oculist and learned astrologer. In Sept., 1468, he freed the king, who was seventy years of age, from a double cataract of the eyes, which had caused his total blindness. Abiathar preached the memorial sermon at the funeral service held by the Jewish community of Cervera upon the death of Juan II. (Jan., 1479).

CRESCAS, HASDAI BEN ABRAHAM (or **BEN JUDAH**; misreading of **חַסְדָּאי בֶּן אַבְרָהָם** (קרשקש): Religious philosopher; born in Barcelona, Spain, 1340; died 1410. He was of an illustrious and learned family, in "Kore ha-Dorot" falsely designated as of the family עמשי (the abbreviation of על משכבם שלום יבוא, found at the end of the genealogy in his own preface to his great work). He was a disciple of the Talmudist and philosopher

Nissim Ben Reuben (RaN), and, following in the footsteps of both his ancestors and his teacher, he became a Talmudic authority and a philosopher of great originality (Joel, "Don Chasdai Creskas," p. 78, note 2, Breslau, 1866), important in the history of modern thought for his deep influence on Spinoza. While he did not occupy an official position as rabbi, he seems to have been active as a teacher. Among his fellow students and friends, Isaac ben Sheshet (RiBaSH), famous for his responsa, takes precedence. ALBO is the best known of his pupils, but at least two others have won recognition—R. Mattathias of Saragossa (see "He-Haluz," vii. 94), and R. Zechariah ha-Levi, the translator of Al-Ghazzali's "Refutation of the Philosophers" (see Steinschneider, in "Ozar ha-Nehmad," ii. 231). Crescas was a man of means. As such he was appointed sole executor of the will of his uncle Vitalis (Hayyim) Azday by the King and the Queen of Aragon in 1393 (Jacobs, "Sources of Spanish-Jewish History," pp. 134-137). Still, though enjoying the high esteem even of prominent non-Jews, he did not escape the common fate of his coreligionists. Imprisoned upon a false accusation in 1378, he suffered personal indignities because he was a Jew (Grätz, "Gesch." viii., ch. 4). His only son died in 1391, a martyr for his faith (see Crescas' pathetic words in Wiener's edition of "Shebet Yehudah," Appendix), during the persecutions of that period. Nevertheless he kept his "eyes turned to the Father in heaven." How deep his faith was is shown by the circumstance that, notwithstanding this bereavement, his mental powers were unbroken; for the works that have made him immortal are all posterior to that terrible year. Another episode of his life worthy of note is connected with the appearance of the pseudo-Messiah of Cisneros, one of whose adherents he became. In 1401-02 he visited Joseph Orabuena at Pamplona at the request of the King of Navarre, who paid the expenses of his journey to various Navarrese towns (Jacobs, *l.c.* Nos. 1570, 1574). He was at that time described as "Rab of Saragossa."

Of his writings three have become known: (1) His letter to the congregations of Avignon, published as an appendix to Wiener's edition of "Shebet Yehudah" (see above), in which he relates the incidents of the persecution of 1391. (2) An exposition and refutation of the main doctrines of Christianity. This "tratado" was written in Spanish in 1398. The Spanish original is no longer extant; but a Hebrew translation by Joseph ibn Shem-Tob, with the title **בטול עקרי הנוצרים** ("Refutation of the Cardinal Principles of the Christians"), has been preserved. The work was composed at the solicitation of Spanish noblemen (Grätz, "Gesch." viii. 411, note 2), and this explains the use of the vernacular. Crescas' object in writing what is virtually an apologetic treatise on Judaism was to present the reasons which held the Jews fast to their ancestral faith. He does this in a dispassionate, dignified manner, by contrasting the reasonableness of Jewish doctrines with the unintelligible perplexities of the Christian dogma. Crescas may also have had in mind, while thus defending Judaism, the many apostates who tried to demonstrate the genuineness of their Christian convictions by attacking

their native religion. He was a lifelong combatant in the ranks of those who would expose the falsehoods of these apostates.

His main contribution to literature is (3) a work entitled "Or Adonai" (Light of the Lord). In it he develops his philosophy and proves himself master in the realm of thought. He had intended this work for the first part of a complete presentation of the contents of Judaism. It was to be followed by a second, to be known as the "Ner Adonai" (Lamp of the Lord), in which he desired to treat of duties and ceremonies. But this second part was never written. He doubtless had in mind the example of Maimonides. The "Or Adonai," as a philosophical treatment of Jewish dogma, corresponds to Maimonides' "Moreh Nebukim"; the "Ner Adonai" was to have been written on the lines of Maimonides' "Yad ha-Hazakah."

Crescas' "Or Adonai," notwithstanding its signal merit as the production of an independent and original thinker, met with scant attention. The much less meritorious elaboration of his pupil Albo (the "Ikkarim") found its way into the

The "Or Adonai." libraries and minds of innumerable readers, and was republished time and again, though its strong points are mostly purloined from Crescas; but the master and teacher suffered from neglect and even eclipse. (Munk, in his "Mélanges," forgets to mention him.) Only the haggadic commentaries which, always strikingly clear, embroider occasionally the text of his rigid speculations, were frequently quoted in "En Ya'akov," by Jacob ibn Habib, who characterizes them as "sweeter than honey." "Or Adonai" is found in manuscript in almost every extensive Hebrew collection, but the editions have been few and faulty. The first print is that edited at Ferrara in 1556, which edition is disfigured by intolerable carelessness. Other editions are the Johannesburg quarto and the Vienna (1860) octavo. Both have added to the old mistakes a considerable number of new ones (Philipp Bloch, "Die Willensfreiheit von Chasdai Crescas," pp. ii., iii., Munich, 1879).

Neither the style of the author nor the inherent difficulties of the subject are sufficient to explain this lack of interest in the work. His vocabulary is precise, and the presentation concise. The book offers no insurmountable difficulties for earnest students. The matter is attractive enough, and not beside the range of the philosophical interests of the Jews. And yet those who read and commented Maimonides and Albo passed Crescas by. It is the position taken by the author, the boldness with which he strikes at the very roots of the Maimonidean-Aristotelian thesis, that produced this indifference. In this he failed of the sympathy even of such as were glad to honor him as "the Hasid" (Joël, *l.c.* p. 2). Characteristic of the attitude and feeling of the more numerous class which idolized Aristotle as represented by Maimonides, are the words of Shem-Tob in his commentary to part ii. of the "Moreh Nebukim": "Perverted fool" and "without comprehension" are among the words employed, and he characterizes Hasdai's objection to Aristotle as "impudent [הזיות] nonsense" (Joël, *l.c.* p. 2, note 1). In other words, Crescas met the fate always in store for the icono-

clast. Among the Arab philosophers Al-Ghazzali's experience is similar.

Crescas' avowed purpose was to liberate Judaism from the bondage of Aristotelianism, which, through

Object of the Work. Maimonides, influenced by Ibn Sina, and Gersonides (Rabbi), influenced by Ibn Roshd (AVERROES) threatened to blur the distinctness of the Jewish faith, reducing the doctrinal contents of Judaism to a surrogate of Aristotelian concepts. Abu-Hamid al-Ghazzali wrote the "Tahafat al-Falasifa" (Destruction of the Philosophers; see Munk, "Mélanges," pp. 373 *et seq.*) with a like aim—namely, to defend orthodox belief as far as it was menaced first by the doctrines of the philosophers which teach that matter is eternal and indestructible, that the world is indestructible and permanent, and that God is merely a demiurge, and further by their efforts at demonstrating God's existence, their inability to disprove the possibility of dualism, and their denial of God's attributes.

Crescas makes no concealment of his purpose to vindicate orthodoxy against the liberalism of Maimonides and Gersonides. Of these two the former especially had endeavored to harmonize revelation and faith with philosophy. While, in those instances where this harmony could not be established, Maimonides refused to follow Aristotle to the exclusion of Moses, his successors seemed bent upon the opposite course. For them Aristotle was infallible. His concepts of God's providence, of creation, matter, and immortality were theirs. They had often enough been attacked by orthodoxy, but excommunications and invectives were then, as always, powerless to suppress thought. Crescas met them as a philosopher who recognized the right of philosophical speculation. He did not agree with those Christian and Mohammedan theologians who in their speculations were advocates of a twofold truth—one for the theologian and the other for the philosopher, the former not cognizable by natural man, because supernatural and irrational, the latter open to the intelligence of natural man (compare Isaac ALBALAG's **מצד העין**, "philosophical," as opposed to **מצד האמונה**, "theological").

Well versed in philosophical literature, Crescas then proceeds to show that Aristotle is far from infallible. He is, as the Jewish anti-Aristotelian, of one intention with Giordano Bruno, and the precursor of Spinoza. He deplores that Maimonides, whose scholarship and honesty he admires, should have made of the fragile theses of Greek philosophy props for Jewish doctrine, saying that the example proved pernicious for his imitators. He believes it is high time to probe the proofs of "the Greek [Aristotle] who darkens the eyes of Israel in these days." This is his task. After having shown the untenability of the Aristotelian propositions, he would "establish the roots and the cornerstones upon which the Torah [= Jewish religion] is propped, and the pivots upon which it turns" (Preface). He does not denounce heretics, but exposes the weakness of the ground on which rest what he considers to be heterodox views. He desires to set forth the contents of Judaism and the limitations in respect to them of the scope of philosophy.

His book comprises four main divisions ("ma'amar"), subdivided into "kelalim" and chapters ("pera'kim"): the first treating of the foundation of all belief—the existence of God; the second, of the fundamental doctrines of the faith; the third, of other doctrines which, though not fundamental, are binding on every adherent of Judaism; the fourth, of doctrines which, though traditional, are without obligatory character, and which are open to philosophical construction.

The first main division opens with a thorough criticism of the twenty-five (twenty-six) Aristotelian propositions ("haqdamot") which Maimonides accepts as axiomatic, and out of which he constructs his idea of God. In the first section he presents all the demonstrations for these theorems, especially those adduced by Tabrizi; in the second, he shows the inadequacy of these ontological and physical propositions, and thus demolishes Maimonides' proofs for his God-concept. Crescas, admitting that the existence of a first cause is susceptible of philosophic proof, but only by con-

The First Cause. tingence (he rejects the Aristotelian assumption that an endless chain of causes is unthinkable; *i.e.*, the first cause of all that is must be regarded as existent), holds philosophy to be incompetent to prove God's absolute unity, as does Ghazzali. The first cause may be philosophically construed to be simple, for if it were composite another would have to be assumed for the compounding. Still, this would not necessitate the positing of God's unity. Other deities might with other functions still be in existence, even if our God were thought to be omnipotent. Therefore revelation alone is competent to establish God's unity. Without the "Shema 'Yisrael," philosophy fails to be a trustworthy guide. He introduces a new element into his God-idea. His predecessors contended that God's highest happiness—the divine essence, in fact—was His knowledge. He rejects this as inadequate, and posits instead God's love, always intent upon communicating itself and doing good. He argues against Maimonides for the admissibility of divine attributes. From the human subjective point of view, attributes may appear to posit differences in God; but this does not mean that they do so in God objectively. In Him, in the Absolutely Good, they merge as identical unity; predicates, especially of only logical or conceptual significance, are incompetent to cause real multiplicity or composition.

In the second division he enumerates those six fundamental doctrines as presupposed by revealed faith, without which Judaism would fall: God's omniscience, providence, and omnipotence; the belief in prophecy, freedom of the will, and that the world was created for a purpose. God's omniscience embraces all the innumerable individual beings; He has knowledge of what is as yet not in existence; He knows what of all possibilities will happen, though thereby the nature of the possible is not altered. God's knowledge is different from that of man: inferences from one to the other are not valid. (Here he sides with Maimonides against Gersonides.) God's providence embraces directly and indirectly all species and individuals. It rewards and punishes, espe-

cially in the hereafter. Crescas rejects the theories of Maimonides and Gersonides on this point. Love, not knowledge (intellectual), is the bond between God and man. From God's love proceeds only what is good, and punishment is also inherently good. God's omnipotence is not merely infinite in time, but also in intensity. Revelation, and it alone ("creatio ex nihilo"), makes it clear. Natural law is no limitation for God, but whatever is irrational proves neither God's omnipotence nor His lack of power; that is, God acts reasonably. Prophecy is the highest degree of human mentality. Maimonides makes it dependent upon certain conditions. While Crescas admits this, he differs from Maimonides in that he will not admit the refusal of the prophetic gift when these conditions are fulfilled. Connection and communion with God are not brought about by knowledge, but by love and reverence, leading us to Him if we keep His commandments. Very extensive is his presentation of the freedom of the will. He inclines toward its rejection; at all events, to its limitation. The law of causality is so all-pervasive that human conduct can not withdraw itself from its operations. Moreover, God's omniscience anticipates our resolutions. But the Torah teaches the freedom of choice and presupposes our self-determination. Thus he concludes that the human will is free in certain respects, but determined in others. Will operates as a free agent when considered alone, but when regarded in relation to the remote cause, it acts by necessity; or, will operates in freedom, both *per se* and in regard to the provoking cause, but is bound if analyzed with reference to the divine omniscience. Man feels himself free; therefore he is responsible and must be rewarded or punished. The accompanying sentiment (readiness or disinclination to act) makes the deed our own.

In the sixth section of this division, Crescas displays characteristic originality. Maimonides rejected as futile and unwarranted all inquiry into the ultimate purpose of the world. Crescas posits such an ultimate purpose and assumes it to be the happiness of the soul. In this life the soul is intently striving after union with the divine; the laws of the Torah help to realize this, the soul's, never quiescent yearning. After death, the soul will enter upon greater possibilities of love, in the higher existence. Former thinkers made immortality depend on knowledge. This is contrary to the teachings of religion, and also utterly unreasonable. Love brings about the soul's happiness of eternal duration in the hereafter and the communion with God thereupon ensuing. "The soul is the form and essence of man, a subtle spiritual substance, capacitated for knowledge, but in its substance not yet cognizant." By this definition he establishes the soul's independence of knowledge. Knowledge does not produce the soul. Man's highest perfection is not attained through knowledge, but principally through love, the tendency to, and longing for, the fountainhead of all good. Man's last purpose, his highest good, is love, manifested in obedience to God's laws. God's highest purpose is to make man participate in the eternal bliss to come.

The third main division devotes much attention to

the theories concerning CREATION. Whatever theory, however, be accepted, the belief in miracles and revelation is not affected. Religious tradition is so preponderatingly in favor of the assumption that the world and matter are created, and Gersonides' counter-reasoning is so inconclusive, that Crescas regards the denial of creation as heterodox. Immortality, punishment, reward, resurrection (a miracle, but not irrational), the irrevocability and eternal obligation of the Law, the belief in urim and thummim and Messianic redemption, are the other tenets treated as doctrines which should be accepted, but which are not, strictly speaking, basic.

In the fourth division thirteen opinions are enumerated as open to speculative decision, among them the questions concerning the dissolution of the world. (Crescas holds the earth will pass away while the heavens will endure.) Have there been other worlds besides our own? Are the heavenly bodies endowed with soul and reason? Have amulets and incantations any significance? What are the "Shedim"? What about metempsychosis?

An opponent of Maimonides on philosophical grounds, Crescas was also dissatisfied with the method of the "Mishneh Torah," for reasons often adduced by others as well; namely, the absence of indications of the sources, the rare mention of divergent opinions, and the lack of provision to meet new cases, owing to its neglect to establish general principles of universal application ("Or Adonai," Preface).

If among Jews he exercised for a long time only through Albo any perceptible influence, though he was studied, for instance, by Abravanel, who controverts especially his Messianic theories, and by Abram Shalom in his "Neveh Shalom," Crescas' work was of prime and fundamental importance through the part it had in the shaping of Spinoza's system. Spinoza's distinction between attributes and properties is identical with Crescas' distinction between attributes subjectively ascribed and their objective reality in God. The connection between Spinoza's views on creation and free will, on love of God and of others, and those of Crescas has been established by Joël in his "Zur Genesis der Lehre Spinoza's" (Breslau, 1871). See SPINOZA, BARUCH.

E. G. H.

CRESCAS, MORDECAI EN, OF ORANGE: Prominent member of the community of Carcassonne, France; lived in the second half of the thirteenth century. As leader (syndic) of the Jews of the whole district, he succeeded in obtaining special jurisdiction for the Jews of Carcassonne, and secured a decree from Philip the Fair, assuring them of the peaceable possession of the synagogues, cemeteries, and other communal property in the city. If the words **אֵזוֹב** (ezob, lit. "hyssop") and **אֲבִרְנָה** (abrengah) designate "orange," as several historians think, he may have been called also Mordecai ben Isaac Ezobi and Mordecai En Crescas

IV.—23

d'Avrengah. In this case he would be the Talmudist of Carcassonne who was in correspondence with Solomon ben Adret of Barcelona (Responsa, iii., Nos. 214, 302), and the poet who, on his way to Béziers, exchanged some poems with Abraham Bedersi. It seems that toward 1304 he lived in Carpentras, and filled there the position of rabbi.

I. LEV.

CRESCAS, VIDAL, DE CASLAR (רִשְׁקֵשְׁלָרִי; called also **Crescas Caslari**, corrupted into **Kislad**, **Gislad**, and **Décadolas**; Hebrew name, **Israel b. Joseph ha-Levi**): Physician and liturgical poet of Avignon; member of the Yizhari family of that place. In 1327 Crescas translated into Hebrew the "Regimen Sanitatis" of his contemporary, the Spanish physician Arnold de Villanueva, under the title "Ma'amar be-Hanhagat ha-Beri'ut," the manuscripts of which are preserved in various libraries. Crescas wrote a poem for Purim, "Mi Kamoka" (Who Is Like unto Thee?), in about two hundred and forty stanzas, relating the story of the Book of Esther. A few stanzas have been published by Zunz, in "Allg. Zeit. des Jud." 1839, p. 681.

M. K.

CRESCAS, (DON) VIDAL, OF PERPIGNAN: French Talmudist; flourished in the first half of the fourteenth century. He was probably a native of Spain, going to Perpignan shortly before the outbreak of the Maimonides controversy. His position in this religio-philosophical discussion was, like that of many other rabbis, neutral, notwithstanding the efforts of his brother Don Bonafos Vidal of Barcelona, and of Solomon ben Adret, to induce him to take part against the philosophical faction. It is evident, on the contrary, from the letter he addressed to them, that his attitude toward the movement was sympathetic, although he himself was strictly orthodox. He held that while the young should be taught to study the Talmud, they should also have full liberty in the study of philosophy and science. Hence he emphatically sided with his friend Samuel Sulami, who had given shelter to the ostracized philosopher Levi ben Abraham of Villefranche, though thereby incurring the reproach of the orthodox. Although Crescas did not openly espouse the cause of the unfortunate philosopher, yet his letters show how deeply he sympathized with him (Gross, "Gallia Judaica," p. 464).

A. PE.

CRESCENZ, JULIUS BERNHARD: Anti-Jewish writer in Germany at the beginning of the seventeenth century. He wrote "De Judaeorum Privilegiis," Darmstadt, 1604-12; "Geistliches Bedenken, ob die Juden und Ihr Wucher in dem Römischen Reich zu Dulden," *ib.* 1612.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 192.

CRESCENZI, ALEXANDER: Jewish convert to Christianity; lived at Rome in the seventeenth century. In 1666 he translated from the Spanish into Italian Antony Colmenardo Ludesina's treatise on chocolate, printed with notes by Alexander Vitrioli, Rome, 1667. Mandosius speaks of Crescenzi as a mathematician who became celebrated on account of his report, which he edited with mathematical notes, on the eruption of Vesuvius in 1660.

CRESQUES LO JUHEU: Chartographer who flourished at Majorca and Barcelona at the end of the fourteenth century. Prince Juan of Aragon sent to Charles VI. of France in 1381, when the latter was a lad of thirteen years, a "mappa mundi" made by Cresques lo Juheu (see plate under CHARTOGRAPHY); it has been suggested that this is the well-known Catalan map now in the Louvre, which marks an epoch in the history of map-making, as the recent discoveries of Marco Polo were added to the usual information contained in the "portulani" or sea-charts of the Mediterranean mariners. (See CHARTOGRAPHY.) In 1390 Cresques obtained no less a sum than 60 livres and 8 sous for a map made by him for Don Juan, King of Aragon. In the Spanish persecutions of 1391 Cresques was forcibly converted, and was known as Jaffuda Cresques; he appears to have remained in Majorca for a considerable time and to have become known to the people there as "lo Juen buscoler" (the map Jew), or "el Judío de la brujelas" (the compass Jew). In 1419 Henry the Navigator, the second son of King John I. of Portugal, established a naval observatory at Sagres and summoned to him Mestre Jaime of Majorca, who was probably identical with Cresques.

J.

CRESSON, WARDER: Religious enthusiast, and convert to Judaism. Born in Philadelphia, Pa., July 13, 1798; died in Jerusalem, Palestine, Nov. 6,

1860. He was directly descended from Pierre Cresson, one of the settlers of "Haarlem," N. Y., whose grandson, Solomon, migrated to Philadelphia about the beginning of the eighteenth century. Warder Cresson's father, the grandson of the last named, was John Elliott Cresson (1773-1814), who married in 1795 Mary Warder.

Warder Cresson, as a young man, was much given to speculation upon religious and sociological questions. Though all in his family were Quakers, and he was reared in that faith, in 1830 he published a pamphlet entitled "Babylon the Great Is Falling! The Morning Star, or Light from on High," in which he deplores the extravagance and evil tendencies of the times, and exhorts all Quakers to lead a better and less wayward life. He now went

through a period of strong religious mania, joining successively various sects as each appeared to him to represent the true religion. About 1840

he made the acquaintance of Isaac Leeser, who took an interest in him, and he became deeply attached to Judaism, discarding all his other forms of belief. On May 17, 1844, he was commissioned consul at Jerusalem (the first to be so commissioned), though no despatches from him are now on file in the Department of State. He speaks of his departure for Jerusalem as follows:

"In the spring of 1844 I left everything near and dear to me on earth. I left the wife of my youth and six lovely children (dearer to me than my natural life), and an excellent farm with everything comfortable around me. I left all these in the pursuit of the Truth, and for the sake of the Truth alone."

Previous to his departure he had been successfully engaged in agriculture at Gwynedd, a suburb of Philadelphia, and had accumulated a competence.

He was much affected by the surroundings of the Holy City, became more and more inclined toward

Judaism, and assumed the name Michael C. Boaz Israel. During these years (1844-48) he was a frequent contributor to Isaac Leeser's magazine, "The

Occident," devoting much space to a criticism of the methods of the London Society for the Conversion of the Jews. While in Jerusalem he identified himself with the Sephardic community, and was on terms of intimacy with Hakam Jehiel Cohen and the present chief rabbi, Elyashar. In 1848 he determined to become a Jew, and in March of that year, after much opposition from the bet din and the chief rabbi, Abraham Hai Gagin, he was circumcised and received into Judaism. He returned to Philadelphia in Sept., 1848, to arrange his affairs in order that he might pass the remainder of his days in the Holy City.

When his wife and family learned of his determination they interposed every possible obstacle to the execution of his plans. He became estranged from all except one son, and had much difficulty in tracing the property which he had left

in their care. They regarded his actions as indicative of a loss of mind, and in May, 1849, his wife (Elizabeth

Townsend) and his son Jacob applied to the court and obtained a commission in lunacy. He appealed from this decision, and the trial of this cause.

which extended over six days in May, 1851, was one of the famous cases of the time. Eminent counsel were retained on both sides and nearly one hundred witnesses were called. The decision of the lower court was reversed, and Cresson was discharged. The argument of Horatio Hubbell, Jr., one of his counsel, was published in "The Occident" (xxi.) in 1863, with interesting comments from the pen of Isaac Leeser.

During the period of his stay in Philadelphia he was a regular attendant at the Mickve Israel synagogue, taking part in the Jewish communal life, and rigorously observing the ceremonial laws. During that time he contributed to "The Occident," and in 1851 published his strangely jumbled volume, "The Key of David: David the True Messiah, or the Anointed of the God of Jacob," etc. Its value lies mainly in its autobiographical character.

Soon after the trial he returned to Jerusalem and actively supported the efforts then being made for the agricultural regeneration of Palestine. In the

fall of 1852, when Sir Moses Montefiore and Judah Touro were working along the same lines, he announced his intention of establishing an agricultural colony in the valley of Rephaim.

In March, 1853, the columns of "The Occident" (x.) contained his circular, sent from Jerusalem, inviting attention to, and assistance for, his projects. Though interspersed with much theology and with many quotations from the Bible, the circular is one that only a practical farmer and a thinker upon educational subjects could have produced. The prevailing distress was to be relieved by the establishment of agricultural colonies, and the oppressed of Israel in all parts of the world were to be enabled to return to Zion. Ample provision was also projected for the education of the colony. But, the means not being forthcoming, his plans were doomed to failure. Yet he never seems to have given up hope, and during the years 1853-56 the columns of "The Occident" contained many communications from him on this subject.

He married a Sephardic woman shortly after his return to Jerusalem. He lived the life of a pious Oriental Jew, dressed as a native Sephardi, and became a prominent leader of the community. At his death he was buried on the Mount of Olives, with such honors as are paid only to a prominent rabbi.

Besides the two works mentioned above, Cresson wrote: "The Two Witnesses, Moses and Elijah," London, 1844; "The Good Olive-Tree, Israel," *ib.* 1844; "Jerusalem, the Center and Joy of the Whole Earth," Philadelphia, 1844.

H. F.

CRETE or CANDIA: Island in the Mediterranean, about 55 miles south of the Morea. Jews had settled there long before the Christian era (I Macc. xv. 23 mentions Jews in Gortynia, Crete). Philo speaks of the Jews of Crete ("Legatio ad Caium," ed. Mangey, ii. 587). About 4 B.C. the false

Alexander, on his way to Rome, visited the Jewish communities of Crete, which, believing him to be a scion of the Hasmoneans, provided him with large sums of money (Josephus, "Ant." xvii. 12, § 1). Cretan Jews residing in Jerusalem are mentioned in Acts ii. 11. Crete fell into the hands of the Romans in 67 C.E.; and the Jewish communities there shared the fate of others under the dominion of Rome: they were treated as Roman citizens under the pagan emperors, but became the objects of persecution as soon as Christianity had become established. Thus, under Theodosius II. (408), the Cretan Jews were expelled. The period of their banishment, however, must have been of very short duration; for it is recorded that in 440 a pseudo-Messiah arose among them, and that the faith of the Cretan Jews in him was so great that they neglected their business, abandoned their property, and waited for the day on which the new Moses would lead them dry-shod through the sea into the Promised Land (Socrates, "Historia Ecclesiastica," vii. 36).

In 823 Crete fell into the hands of the Saracens, but nothing is known of the fate of the Jews at that time. The island was reconquered in

Under 960 by the Byzantines, who held it
Saracens, until 1204, when it was sold by the
By- Marquis of Montferrat, to whose lot it
zantines, had fallen, to the Venetian republic.
and An insight into the history of the Jew-
Venetians. ish communities of Crete during the

thirteenth, fourteenth, and fifteenth centuries can be gotten partly from an interesting series of communal regulations issued in 1328, and partly from documents in the archives of Venice, published by Hyppolyte Noiret in the "Bibliothèque des Ecoles Françaises d'Athènes et de Rome." The regulations give the 15th of Elul, 1228, as the date of their proclamation in the synagogue, but Güdemann has shown that the date must be the 16th of Elul, 1328. They were reenacted at a later date by a certain Rabbi Zedakah. They speak of four congregations in the island, at the head of which were three leaders (ממנים). One of the synagogues was named "Elijah the Prophet." These regulations are signed by Baruch ben Isaac, Menahem ben Joel, ELEAZAR BEN MATTHIAS, Isaac ben Joseph, Shemariah ben Solomon ben Isaac ha-Kohen, Samson Agora, Elijah ha-Parnas ben Reubeu, Parnas Capsali ben Solomon ben Joseph, Joshua ben Obadiah ha-Levi (Berliner's "Magazin," vii. 131), Judah Anatoli, Benjamin ben Joseph Bonifacio, Shemariah the Cretan, Ishmael the Physician, Menahem ben Jacob ha-Parnas, and Samuel ben Gamliel ben Shem-Tob. They demand attendance at the synagogue services and meetings, uprightness in dealing with non-Jews, extreme caution in the use of the ban, attendance of the whole community at funerals, complete separation of the betrothed before marriage, cessation of all work at midday preceding Sabbaths and festivals, the abandonment of the habit of frequenting courts of law, and cleanliness of the ritual bath, finally forbidding the ejection of tenants for non-payment of rent. Religious conditions in the island must have reached a stage of serious deterioration, for in the section relating to public prayers complaint is made that very often not even a "min-

yan" (ten worshipers) were present. The people were accustomed, on Sabbaths and festivals, to promenade in the parks, to go rowing, or to attend the courts of law.

The Venetian documents cover the period between 1380 and 1485, when Jewish letters flourished in the island. Though numbering only 1,160

Under in a total population of 200,000, the
Venetian Jews must have been of some conse-
Rule. quence. In 1412 complaint is made that they own all the shops in Retimo

and the neighborhood. Their importance is further indicated by the heavy taxes imposed upon them. Up to 1387, they had been taxed in the sum of 1,000 hyperperes. At that date the tax was raised to 2,500; increased in 1395 to 3,000. In 1403 they were compelled to bear one-half the expense incurred in repairing the walls of Candia; in 1439 they were constrained to assume the burden of the annual payment of 4,000 ducats toward the expenses of the war, though the rest of the island had to make but one payment of the same amount. Equally oppressive taxes were laid upon them in 1431, 1432, 1465, and 1485. In addition, they had to lend the government whatever sums were called for by the Senate; in 1410, for instance, 2,000 ecus for the sending of troops to Negropont; 20,000 ecus in 1431; 5,000 ecus in 1447; 3,000 ecus in 1452; 1,000 ecus in 1464. Occasionally the Jews protested against such exactions. In 1389 Shabbethai Retu, Melchior Cassan, and Justof Missin, of Candia, appealed to the Senate

in the name of the Cretan Jews, and the sum was diminished to 2,000 hyperperes in consideration of the eminent services rendered by them to the Venetian republic. In 1415 a protest was again lodged with the Senate.

At times "privileges" had to be bought. In 1386 the Jews of Retimo were allowed to reopen a synagogue closed by Pietro Grimani, upon payment of 800 hyperperes toward the expenses of constructing a port. In 1392 they were required to supply twelve men to guard the ramparts near the ghetto; but in 1395 this order was rescinded for a money consideration. In 1402 the Jews of

In the Negropont were forbidden to acquire
Fourteenth ground except in their own part of
and the city, all the gates in which, except
Fifteenth three, were ordered to be closed. In
Centuries. 1412 complaint was made to the

Venetian Senate that Solomon, son of Lazzar da Meir, had secured permission for himself and his descendants to open shops in any part of Retimo. The concession was immediately revoked. In 1433 the Senate prohibited the Jews of Crete from engaging in the brokerage business. By 1398 the Jews of Khania were not allowed more than 12 per cent interest upon loans; in 1449 they were further prohibited from lending money on mortgages. On the other hand, it is recorded that in 1421 one Cherson, son of Solomon of Retimo, owed a considerable sum of money to three Christian noblemen.

In 1389 the Jews complained that they could not pay the increased tax, because their numbers had been decreased by epidemics and emigration. But by 1395 their numbers had been considerably aug-

mented, perhaps by exiles from Spain (1391) or from Venice (1394). Some, as the Delmedigos, had come from Germany. In 1453 a conspiracy against Venetian rule in Crete was hatched by Sifios Blastos, and another in 1462 by Jean Gavaia. In both cases the conspirators were denounced by a priest and by a Jew named David, son of Elijah Maurogonato. In recognition of the service rendered by David the Senate granted certain privileges to the Jews. Jews were often known as exporters, and were concerned in the exportation of sugar to Austria (Berliner, "Aus dem Inneren Leben," p. 78).

At the beginning of the sixteenth century the communities of Crete were greatly enlarged by the arrival of Spanish exiles. On that occasion the Cretan Jews showed their racial solidarity by selling the golden ornaments in their synagogue in order to raise money to free many exiles from the hands of the captains of vessels who had claimed their passengers as their slaves. Unfortunately, the Cretan Jews were the victims of their generosity; for some exiles from Rhodes, in 1523, carried to Candia the plague, which made great ravages in the community. In 1669 Crete was conquered by the Turks, and its history from that time parallels that of other communities within the Turkish empire.

In 1869, on the advice of the chief rabbi of the island, Moses Ashkenazi, all Jews who were Greek subjects formally adopted Ottoman

Recent nationality. A statute of organiza-
History. tion issued at this time by the grand vizier, Ali Pasha, decreed that the island should consist of a general assembly elected by the whole population. In 1873 the Jews of Khania were accused of a ritual murder; but, owing to the efforts of the French consul-general, the missing child was found in a neighboring village; and the Greek authors of the plot were imprisoned.

At the beginning of the Greco-Turkish war of 1897 there were 225 Jewish families in Crete, or 1,150 persons in a total population of 250,000, distributed among the three cities: Khania (200 families), Candia (20 families), and Retimo (5 families). They are engaged in commerce and in various manual occupations.

During the fifteenth and sixteenth centuries Candia was a center of Jewish learning. The families Delmedigo, Casani, and Capsali produced a series of distinguished rabbis and philosophers. Judah, the chief of the Delmedigo family, settled at Candia about 1400 (see DELMEDIGO family). The following members of these families were rabbis at Candia: Judah Delmedigo, disciple of Judah Minz (1510), Eliezer Delmedigo (c. 1560), Elijah Delmedigo (c. 1590), Samuel Menahem Delmedigo (about 1510), Elijah Capsali (1490-1555), Elkanah Capsali, and Samuel Casani, Elijah Capsali accepting later a rabbinate at Constantinople. Samuel Algazi was rabbi at Candia at the end of the sixteenth century. At present (1902) the head of the consistory is Abraham Elbogen.

Two religious customs were peculiar to Crete. The Haftarat for the afternoon of the Day of Atonement were recited in Greek, with the exception of the first three verses (Elijah Capsali, in "Likketim Shonim," ed. Lattes, p. 22). The 18th of Tam-

muz was held as a feast, known as the "Purim of Candia," on which day the women abstained from work (Lampronti, "Paḥad Yizḥak," fol. 81).

CRIME: An act forbidden by human law and punished by human authority, in contrast to sinful acts which are thought to be evil in the eyes of God.

In the Mosaic legislation the principal crimes against person and property—murder, mutilation, and theft—are punished at the instance of the party injured, or of his kinsmen. The murderer is pursued and brought to justice, or is killed outright (Num. xxxv. 21) by the AVENGER OF BLOOD; mutilation and other injuries to the person are paid for in money (see ASSAULT AND BATTERY); the thief is condemned to make double restitution, and is enslaved if unable to pay.

But there were many offenses not so much directed against any one person as against the whole nation of Israel. They included all those grosser violations of God's declared will which were thought to bring down His wrath and vengeance upon the nation: such acts as idolatry, Sabbath-breaking, blasphemy of the sacred name, incest, adultery (for which the husband had no such civil redress as is afforded by common law). The witnesses to the evil deed were called upon by the Lawgiver, not only to prosecute the offender, but to help in the execution of the sentence (Deut. xiii. 7-11, xvii. 2-7). The duty of witnesses to prosecute is still the law of England, and those who happen to witness a criminal act are often put thereby to great expense. Besides death and banishment to the cities of refuge, the Biblical law has also the punishment of stripes, which are never to exceed forty in number (Deut. xxv. 3). The infliction of stripes is awarded by a judge, not by the congregation.

The crimes which were expiated by a fine, or compensation in money, embraced not only, as said above, larceny, robbery, and mayhem, but also even the ravishing of a maiden "which is not betrothed" (Deut. xxii. 28, 29). The sum which is awarded against the owner of an ox which kills a free man or woman, or a bondman or bondwoman, provided the owner had been properly forewarned of its vicious disposition (Ex. xxi. 29-32), is expiation for this kind of manslaughter. For the

Crimes commission of a forbidden act through
Expiated ignorance, a sin-offering is prescribed
by Fines. (Lev. iv. 1-3); for certain dishonest actions a sin-offering, together with restoration of the thing wrongfully withheld, plus one-fifth its value, is imposed. But these penalties are self-inflicted. The repentant sinner brings them upon himself by confession, and with a view to divine forgiveness (Lev. v.); while punishment in the ordinary sense is only adjudged upon the testimony of witnesses.

In the Mosaic legislation there are two practical motives assigned for the infliction of death for offenses against God or against the state: one, to deter others from offending in like manner; the other, to

root out the evil elements in the nation and to keep the poison from spreading. Sometimes both motives are named together. Thus the man who rebels against the judgment of the high priest or supreme judge must die: "and thou shalt put

Motives away the evil from Israel. And all
for Pun- the people shall hear, and fear, and do
ishment. no more presumptuously" (Deut. xvii. 12, 13); while in the case of the idolater condemned to death, we read: "So thou shalt put away the evil from the midst of thee" (*ib.* 7). This latter motive is brought out strongly in dealing with idolaters, who are regarded as "a root that beareth gall and wormwood" (*ib.* xxix. 17). The punishment by stripes, if not meant to correct and reform the offender, was at least so regulated and limited as not to degrade him.

But there was a view of crime older than the Pentateuch, and firmly embedded in the hearts of people and rulers. Vengeance should not fall on the evil-doer only, but on his children also—on his father, if alive, and on all his father's issue: only thus can God's wrath be appeased. The Pentateuch protests against this savage conception: "Fathers shall not be put to death for sons, and sons shall not be put to death for fathers; every one shall be put to death for his own sin" (Deut. xxiv. 16, Hebr.). As an illustration of actual practise based upon this conception, there is the act of Joshua, who—when Achan had put away gold and silver and fine raiment out of the spoils of Jericho, which had been doomed to destruction—not only has Achan put to death, but also his sons and his daughters. In like manner David, on the complaint of the Gibeonites against the dead king Saul, avenges them by hanging five of Saul's grandsons (II Sam. xxi. 1-9). But when, seven generations after David, Joash, King of Judah, was murdered, Amaziah, his son and successor, caused only the murderers to be put to death, and did not punish their sons, "according to that which is written in the book of the law of Moses" (II Kings xiv. 6). The declaiming of the prophets Jeremiah (xxx. 29) and Ezekiel (xviii. 2) against the proverbial saying, "the fathers have eaten sour grapes, and the teeth of the children are set on edge," shows that a desire to punish the children for the sins of the fathers was still alive among the people.

While English law has never inflicted death by the hands of the hangman on the traitor's or felon's children, yet as late as in the reign of James II. the forfeiture of the convict's property was enforced with such rigor that his helpless children often faced a slower death by starvation. Like cruelty prevailed in France and Spain. And it was equally severe in the old seats of Israel, except where and when the Torah prevailed (compare CONFISCATION AND FORFEITURE).

The Bible places the view that certain wrongful acts, such as murder, shall be punished by society, at least as far back as the days immediately following the Flood, when the sons of Noah were told: "Whoever sheddeth the blood of man, by man his blood shall be shed" (Gen. ix. 16); and Cain expresses the fear that, for the murder which he has committed, "every one that findeth me shall slay

me" (Gen. iv. 14); in other words, it was the duty of society, and even of the beasts of the field, to avenge the blood of Abel.

In the Mishnah we find that some "institutions" of the sages are enforced by penalties; but, generally, only those acts that are sinful, because forbidden in the Pentateuch, meet severe punishment. Some acts, plainly forbidden by the Law, are left to "death by the hand of Heaven," such as the intrusion of non-Levites in the place assigned to the Levites in the service of the Temple (compare Sanh. ix. 6 with Num. i. 51, xviii. 7, as reconciled in Sanh. 84a). Even civil redress for wrongful acts is sometimes withheld, where the application of the law is not clear, and vengeance is left to the powers above (B. M. iv. 2).

The criminal jurisprudence of the Mishnah may be regarded as almost modern in its bearings. The avenger of blood has dropped out; the idea of making fathers and sons suffer for each others' guilt lies now so far in the dim past, that the sages give to the text in Deuteronomy (xxiv. 16)—which forbids such savagery, the law of individual responsibility being sufficiently covered by the concluding words, "every man shall be put to death for his own sin"—this entirely new meaning: "fathers shall not be condemned on the testimony of their sons" (Sanh. 28a). The "congregation" which is to judge of matters of life and death becomes a court of twenty-three learned judges. An execution by stoning or burning is regulated so as to inflict the least possible pain (see CAPITAL PUNISHMENT). All possible advantages are given to the accused in order to temper the severity of the Pentateuchal law (see ACCUSATORY AND INQUISITORIAL PROCEDURE; ACQUITTAL IN TALMUDIC LAW).

Offenses are classified according to the gravity of the punishment: those punished by stoning, by burning, by beheading, and by strangling coming first; next in gravity are those punishable by stripes, the most serious being those for which the Mosaic law prescribes excision ("he shall be cut off from his people"; see KARET); then come those wrongful acts which the written law redresses by fine, forfeiture, or sacrifice, it being understood that whenever the Scripture imposes a duty or a penalty, stripes are excluded. There can be no stripes for theft, for double, fourfold, or fivefold compensation is expressly named as the penalty for the act. Nor can a battery be avenged by stripes, for the Law says "eye for eye," that is, compensation for the loss of the limb or organ; "bruise for bruise" that is, compensation for the pain; and so for other violence done (Ket. 32b), though the offense entailed both pain and loss of money. It is not easy to determine the proper classification of an involuntary killing, with its penalty of banishment; but it comes, like murder, before a court of twenty-three judges.

The sages believed that death under the sentence of the law, provided the condemned man confessed his guilt, was full atonement, and that he would have his share in the world to come (Sanh. vi. 2); that the infliction of stripes was equivalent to

the excision with which the law threatens the offender (Mak. iii. 15), though the latter view is disputed on technical grounds (*ib.* 23b; Meg. 7b). But where the only redress is a money compensation to the injured party, the sages taught that payment alone was not sufficient to secure the forgiveness of God, unless the guilty party had first sought to appease his injured neighbor (see ASSAULT AND BATTERY).

A suggestion occurs more than once in the Talmud (Sanh. 37b; Ket. 30a *et seq.*) that, though Israel has lost its freedom, and its judges can no longer wield the sword of justice, "the four capital punishments have not ceased. He who deserves stoning will fall from the roof, or a wild beast will trample him down; he who deserves burning will fall into a burning house, or be bitten by a poisonous serpent. . . . He who deserves the headman's sword will be delivered to the [heathen] government, or will fall among robbers." Death by the sword was the punishment for murder, and it thus appears that the Rabbis were not unwilling to see Jewish murderers put to death under the laws of Rome or of Persia. The list of offenses punished by death is given in the Mishnah (Sanh. vii., viii., ix., xi.) under the headings of "the stoned," "the burnt," "the beheaded," "the strangled." There are 18 offenses involving the punishment of stoning; 5, of burning; 2, of beheading; 6, of strangulation (compare CAPITAL PUNISHMENT).

Besides the regular forms of punishment for crime, Jewish law recognizes certain irregular methods. "If the thief be found breaking in and be smitten that he die, there shall be no bloodguiltiness for him" (Ex. xxii. 2, R. V.)

On the analogy of this Biblical case the Rabbis decide several others (see BURGLARY). In three cases the person on the point of committing a crime may be killed: where he pursues a neighbor in order to kill him; where he pursues a male to commit sodomy; and where he seeks to ravish a betrothed damsel; for Deut. xxii. 27 indicates the duty of all that hear her cry to help her. But it is not lawful to "save by death from sinning" in the case of the Sabbath-breaker, or of the idol-worshiper, etc. (Mish. Sanh. viii. 7). Where one is suspected of murder, and, though the testimony of the witnesses is not sufficient, the judges are convinced of his guilt, they should cause him to be locked up in a cell, on a scanty diet of bread and water (*ib.* ix. 5). The disputants in the Gemara on this passage are not agreed on the question how great the deficiency in such testimony might be and the judges still be justified in inflicting death by ill treatment and starvation. There had been no trials for murder during hundreds of years in the countries where these disputes took place.

He who steals one of the holy vessels, he who curses God, naming Him with an idol [the wording of the original is rather obscure], and he who cohabits with an idolatress—these are permitted to be killed by zealots. The right of zealots in the last of the three cases is evidently drawn from the example of Phinehas (Num. xxv. 6-8). Lastly, it is

said: "When a priest dared to serve in the Temple while unclean, his brethren the kohanim did not bring him before a court of justice, but the young men among them dragged him outside of the place of assembly and brained him with axes" (Mish. Sanh. ix. 6). See also BURGLARY; CAPITAL PUNISHMENT; CORPORAL PUNISHMENT; KARET; CRIMINAL PROCEDURE; ROBBERY.

L. N. D.

CRIMEA: A peninsula of southern Russia, on the northern shore of the Black Sea. It was formerly known as Krim-Tartary, and in ancient times as Tauric Chersonese. As shown by inscriptions (see BOSPORUS) unearthed in various parts of the Crimea, organized Jewish communities existed there long before the destruction of the Temple. Jerome in his commentary on Obadiah (verse 20) reports, on the authority of his Jewish teacher Hananiah, that, according to a tradition prevalent among the Jews, the Assyrians and Babylonians conveyed their Jewish captives to the coasts of the Black Sea. As to the inscriptions and monuments found in the vicinity of Kertch and Yenikale see Harkavy in "Yevreiskiya Zapiski," published by A. Pumpyanski. The Crimean Jews were Greeks in language, customs, and social life, and enjoyed equal rights with their fellow citizens. But, while their neighbors influenced them, they also exercised a formative influence upon the religion of their neighbors; and the associations termed *σεβόμενοι θεόν ὑψίστου*, that existed there, although not altogether Jewish, certainly showed traces of Jewish monotheistic influence ("Voskhod," 1901, No. 4; compare Schürer, "Die Juden im Bosporianischen Reiche," in "Sitzungsberichte der Berliner Akademie," 1897, p. 204).

In 47 C.E. the Romans conquered the Crimea, but the period of their domination was brief; for about the middle of the first century the Alans seized the country. In the second century they were displaced by the Goths; the latter, in their turn, being dislodged by the Huns in the fourth century. Although there are no records concerning the fate of the Jews during this period, it may safely be assumed that the successive masters of the country did not recognize any difference between the Jews and other inhabitants. Theophanes (671) speaks of the Jews of Phanagoria (Harkavy, "Ha-Yehudim u-Sefat ha-Slawim," p. 129). At the beginning of the seventh century the

Chazars. CHAZARS, a Turkish tribe which occupied the northern shores of the Caspian, overran the plains of the Crimea and gave their name to the greater part of the peninsula. The Chazars being of a mild and tolerant disposition, the Jews under their domination enjoyed complete freedom. This attracted to the Crimea many Jews from neighboring countries, especially from the Byzantine empire during the reign of Leo III. the Isaurian (718), who persecuted them relentlessly. They soon exercised a great influence over the Cha-

zars. As the latter adopted settled habits and began to feel the need of a religion, many of the better classes, including the Chaghan, embraced Judaism. Thus the Crimean Jews became practically the rulers of the country until 1016, when the Chazars were dispossessed by a combined effort of the Russians and Byzantines. An account of all the Crimean cities in the possession of the CHAZARS (965) is given in King Joseph's letter to Hasdai ibn Shaprut.

Another Asiatic people of Turkish stock, the Pecheneges, who had established themselves in the Crimea at the beginning of the tenth century, expelled the Russians. During the domination of the Pecheneges, which lasted about a century and a half, the peninsula enjoyed great prosperity. At the beginning of the thirteenth century the Crimea became a province of the empire of the Kiptchaks, or Tatars. The new masters behaved generally with tolerance to the subjected people, and the Jews enjoyed equal rights with other inhabitants. A change, however, took place in their condition in 1258, when Berke, the third ruler of the Crimean Tatars, with his followers, embraced Islam, and the relations between the newly converted Mohammedans and the Jews became strained. About 1263 the Genoese established themselves at Kaffa, and the seaboard known as Gothia, extending to Cembalo (Balaklava), was ceded to them in 1315. Although many Jews lived in these places, little is known of them during the period of the Genoese domination, which lasted until 1475, when Mohammed II. subjected the Crimea and enslaved the Genoese and other Christians. In Taman at that time reigned the descendants of the Genoese Jew Simone de Guizolti, who had secured this dukedom in 1419 by marrying the Princess Bichachanim.

Travelers of the sixteenth and seventeenth centuries (Busbeck, Cureus, etc.) tell of a considerable Jewish population in the Crimea (see Loewe, "Die Reste der Germanen am Schwarzen Meere," pp. 90, 115, 174, 183). Judging from some letters patent of 1594 granted to Jews of Karasu-Bazar, they were the victims of the rapacity of the Tatars. In these letters patent the khan deemed it neces-

Under the Khans. sary to prohibit the local authorities from stripping his protégés of their property—a proof that this was a common practise. A similar clause is found in another grant of 1743. A collection of letters patent granted to the Crimean Jews by various khans was published by Z. Firkovich (son of A. Firkovich), who pretends that these letters were given to the Karaites. The truth is that they were stolen by Karaites from the Krimchaki of Karasu-Bazar (Harkavy). Travelers in the Crimea in the seventeenth century report Jews as living at Kaffa (Theodosia), Karasu-Bazar, Koslow, Turleri, Bakhchi-Sarai, and Mankup (Des Lucca, "Relation des Tartares," i. 17).

As shown by an epitaph in the cemetery of Chufut-Kale (Firkovich, "Abne Zikkaron," No. 512), the Karaites of that city were attacked in 1778 by the Tatars, twenty-seven persons being killed. Chufut-Kale, situated on a rocky mountain, became the forced abode of the Karaites, who were allowed to spend only their business hours in the Tatar capital. Arriving opposite the palace of the khans,

they were required to alight and proceed on foot till out of sight. It can not be ascertained whether the Rabbinites also suffered from the riots of 1778, or whether they were subjected to the same treatment. In 1783 the Russians conquered the Crimea, and the history of the Jews there becomes merged in that of the Jews of Russia. From a letter (1784) sent from Chufut-Kale to Lutzk it is learned that the Jewish communities suffered heavily from the war between the Russians and the Tatars.

There are three classes of Jews in the Crimea: the Krimchaki, the Karaites, and the Polish-Lithuanian Jews. The Krimchaki are the oldest settlers of the country. The time of their settlement in the Crimea can not be ascertained. They themselves assert that they went there in the sixth century. A tradition

prevails among them to the effect that the manuscript ritual, which is still preserved in their synagogue at Karasu-Bazar, was transmitted from generation to generation for twelve centuries. It was composed by Moses of Kiev (compare Harkavy, "Altjüdische Denkmäler"). It is known under the title "Hazzanya," and, with the exception of some slight variations, is the general Rumanian ritual. Harkavy, however, believes that the settlement of the Krimchaki is relatively of recent date. At present the greater number of them live in Karasu-Bazar, where they have their synagogue, presided over by a rabbi. In order that no profane discourse shall be held in the synagogue, they gather in the courtyard of the synagogue and wait there until the whole community is assembled. Then they enter and proceed at once with the service. As soon as this is concluded they leave the sanctuary in a body. They distinguish themselves by many other customs derived from the Tatars, whose language and customs they still retain. Thus, for instance, the ceremony of marriage takes place at dawn. Instead of using a "baldachin" ("huppah"), they cover the bridegroom and the bride with a "tallit," while the bridesman and bridesmaid ("shoshbinim") twirl chickens round the heads of the couple seven times. Then, after killing the fowls, the bridegroom recites the consecrating formula, and the ceremony is concluded. The bride is not allowed to leave the house for seven days. The Krimchaki are engaged in handicrafts, viticulture, and agriculture. They are renowned for their scrupulous honesty.

The Crimea was in the Middle Ages, and still is, the headquarters of the Karaites. Although the inscriptions on the scroll of the Law (Pinner, No. 10) preserved at the St. Petersburg Library, are proved

to be forgeries, it is beyond doubt that in 1381 there were four Karaite communities in the Crimea—at Kaffa (Theodosia), Kale, Koslow (Eupatoria), and Yenikale—as is proved by a document of that date which is preserved at the St. Petersburg Library (Neubauer, "Aus der Petersburger Bibliothek," document 46).

A strong literary movement existed in the Crimea for many centuries. Among the most renowned scholars of the Crimea were: Jacob ben Moses ha-Temani (of Teman, Greece), author of "Sefer ha-Piṭron" (about the tenth century); Jacob ben Solo-

mon of Mankup, author of a Hebrew grammar (about the twelfth century); Ezechiah ben Gedaliah ha-Nasi, a pupil of Abraham Kerimi (1348); Samuel ha-Kodesh ben David, author of "Massa' la-Erez ha-Kedoshah" (1641); Moses ben Elijah ha-Levi, author of "Massa' la-Erez ha-Kedoshah" (1654); Joseph ben Jacob of Kale, liturgist; Isaac Hazzan ben Moses, liturgist (d. 1664); Hillel Hazzan Kenui, liturgist; Jacob ben Mordecai, liturgist (died 1701); Abraham ben Jacob Yerushalmi, author of "Emunah Omen" and several astronomical works (1713); Joseph Haz-

zan of Kale, liturgist; Moses Chelebi Sinani, author of a work on the slaughtering of animals (d. 1722); Simḥah ben Joseph of Kale, author of "Me'il Shemuel" (d. 1743); Moses Pasha of Kale, author of a commentary on the "Azulah" of Aaron I.; Samuel ben Abraham of Kale, author of "Ner Shemuel" and other works; Elijah Yerushalmi ben Baruk, author of "Asarah Ma'amarot" (eighteenth century); Simḥah Lutzki, author of the bibliographical work "Orah Zaddikim," and of many other works (b. 1740-41); Simḥah ben Joshua, former Rabbinite, author of Biblical commentaries (1818); Joseph Solomon ben Moses (known under the abbreviation "Yashar"), ḥakam of Koslow, author of "Tirat Kesef" (1825); Abraham ben Joseph Solomon, liturgist; Mordecai ha-Hazzan Sultanski, author of "Abkat Rokel" and many other works (d. 1862); Abraham Firkovich, author of "Abne Zikaron" (1786-1874); Solomon ben Abraham Beim, ḥazzan of the Karaite community of Odessa (b. about 1820). See KARAITES and individual articles on the various scholars.

Information concerning the condition of the Karaite communities in the Crimea in the second half of the eighteenth century is furnished by several documents preserved in the St. Petersburg Library. In a letter dated 1755 and addressed to Abraham ha-Shofet, the writer gives details which are substantially as follows: "The total Karaite population of the four communities numbers 500 families: 300 at Kale; 100 at Koslow; 50 at Kaffa; 50 at Mankup.

Near Kaffa is Sulchat, where formerly existed an important community, possessing the largest synagogue in the Crimea. To-day it is of little importance, possessing only a ḥazzan and a shoḥet, who recite the prayers morning and evening. All the synagogues, schools, and habitations of the Karaites are of stone. In each of these communities there is a school in which study is carried on throughout the day under the supervision of a teacher; in Kale there were four schools, three of which, however, are now closed. In the first lived Samuel ben Joseph, the author of a commentary on the "Mibhar," which he did not finish; in the second lectured R. Samuel, the author of "Ner Shemuel"; in the third, Elijah ha-Hazzan, the scribe; and in the fourth, Elijah Me-lammed ben Isaac. Samuel Hazzan lectured at Koslow; Hillel ben Isaac, at Kaffa; Judah Hazzan ben Shelomoh, at Mankup. In 1735 the Crimea was invaded by the Turks. At Koslow they destroyed fifty boxes filled with books belonging to Elijah ben Isaac Hazzan.

Another letter (1764) shows that the Karaites con-

sidered it lawful to have two wives. In 1796 Catherine II. relieved the Karaites by reducing by one-half the poll-tax of twelve rubles which they, in common with the Rabbinites, had hitherto paid. When Nicholas I. issued the edict obliging Jews to serve in the army (1827), the Karaite S. Bobowich went to St. Petersburg, and, appealing to the edict of Catherine II., obtained the release of the Karaites from this obligation. They thus remained free from military service until 1874, when a new law was enacted compelling every Russian subject to serve in the army.

Freedom from military service was not the only advantage the Karaites had gained over the Rabbinites. Other privileges—for instance, that of living and trading in any part of the empire—were granted to them. In 1837 they obtained for their rabbis the privileges enjoyed by the clergy of other faiths. A consistory, dealing with all the matters concerning Karaite worship in the Crimea, was established at Eupatoria. It is presided over by a ḥakam assisted by a ḥazzan and a sham-

Karaitic ḥakam assisted by a ḥazzan and a sham-
Con- mash. These officials are elected by
stitution. the people, but the election must have the assent of the government. Once the popular choice is sanctioned they can not be removed without the permission of the civil authorities. In addition to the salary which these officials draw from the Karaite communities, the government grants them 140 acres of land: 60 to the ḥakam, 40 to the ḥazzan, and 40 to the sham-mash. In 1894 the government established at Eupatoria a Karaite seminary of five classes, the inspector and the teachers of which enjoyed the same privileges as those of the gymnasium.

The most important of the Karaite communities found in the Crimea is that of Eupatoria, which numbers about 500 families. The Karaites are engaged in trade, in which they succeed well, owing to the privileges they enjoy. It is very probable that, besides the Krimchaki, there were not many Rabbinites in the Crimea during the later period of the domination of the khans. The relatively happy condition of the Jews in Poland at that time had tempted most of the Crimean Rabbinites to emigrate thither. This circumstance accounts for the fact that in 1462 thirty Rabbinites, who had been shipwrecked near Kaffa, were compelled to appeal for help to the Karaites, and also explains the absence of Crimean-Rabbinite contributions to Jewish learning.

A few prominent men from the earlier times of the Tatar domination deserve to be mentioned: Abraham Kerimi (fourteenth century), author of "Sefat Emet"; his son-in-law Eliakim; Moses ben Jacob, the exiled (1449) liturgist and author of many works; Asher ha-Kohen (1449); Kalman Ashkenazi (fifteenth century); Isaac Panyanto; Jeremiah Isaac Banin; Moses Kokos (1584); Baruk of Kale, author of "Meḳor Baruk," and his brother Mordecai of Kale; David ben Eliezer Lahno, author of "Mishkan David."

With the occupation of the Crimea by the Russians the Rabbinites gradually increased, and communities consisting chiefly of Polish and Lithuanian Jews are found throughout the country, which forms a part of the government of Taurida, Simferopol being its

capital. The most important communities are: Armiansk-Perekop, Bakchi-Serai, Chufut-Kale, Eupatoria, Yenikale, Karasu-Bazar, Kertch (Bosporus), Kaffa (Theodosia). The Jewish population in the four Crimean districts is divided as follows: Eupatoria, 3,192 (5.06 per cent of the whole population); Perekop, 1,549 (3.01 per cent); Kaffa, 9,670 (6.05 per cent); Simferopol, 17,687 (8.85 per cent).

Many Jewish antiquities were unearthed in the last century in various places in the Crimea. These antiquities consist of: (1) Judæo-Greek inscriptions, the authenticity of which is beyond any doubt. They give evidence that organized Jewish communities existed in the Crimea long before the common era. (2) Tumulary inscriptions to the number of

751, collected by the Karaite ḥakam
An- Abraham Firkovich, in his "Abne
tiquities. Zikkaron," Wilna, 1872. The inscriptions were found in the cemeteries of the following places: 546 in Chufut-Kale, called "Emek Yehoshofat," dating from 151 to 1842; 5 at Sulchat, dating from 910 to 1140; 72 at Mankup, dating from 866 to 1777; 28 at Kaffa (Theodosia), dating from 1078 to 1845; 100 at Eupatoria, dating from 1593 to 1852. A. Harkavy expressed doubts concerning the dates of some of these inscriptions, believing them to have been altered by Firkovich. In Harkavy's opinion none of these inscriptions antedates the thirteenth century. In his "Abne Zikkaron" Firkovich gives the text of epigraphs which he pretended to have found on scrolls of the Law and on Bibles which he had collected and sold to the St. Petersburg Library. These epigraphs, which, if genuine, would throw some light on the history of the Jews in the Crimea during the domination of the Chazars, were manufactured by Firkovich himself, as has been demonstrated by A. Harkavy. See FIRKOVICH, ABRAHAM.

CRIMINAL PROCEDURE: The method indicated by law for the apprehension, trial, and for fixing the punishment of those persons who have broken or violated the law. The prosecution and trial of criminals in Biblical times is enveloped in doubt. The only example of anything like a regular trial of a criminal case found in the canonical books is that of Naboth in I Kings xxi.; but the only thing clear from that scanty account is that Naboth was convicted on the testimony of witnesses, and not upon an extorted confession. The requirement of two witnesses is clearly stated in many passages of the Pentateuch. For everything else, for all matters of detail, we have to look to the Mishnah, slightly aided by quotations from the Baraitas.

In treating of the course of proceedings the Mishnah (Sanh. iv. 1) says: "In capital cases they [meaning the judges] 'open with a view to justification and not to guilt'; but the real meaning of this passage had been lost even as early as the time of the Amoraim (Gemara, *ib.* 32b). According to the Mishnah, capital cases must not be tried on the day preceding a Sabbath or festival, for the court must adjourn to the next day, before it can convict, and courts may not sit on days of rest. While any of the "disciples" present may volunteer an argument for acquittal, they are not allowed to argue for conviction. In capital cases those sitting at the ends—that is, the youngest judges, not the judges of highest standing—gave their opinion first, in order to avoid any undue influence by the latter. None but "priests, Levites, and Israelites"—to the exclusion of converts, as well as of persons whose daughters are disqualified from marrying into the priesthood—are competent to judge capital cases (Mish. Sanh. iv. 2). The Sanhedrin (of 23 or 71) sat in a half-circle so that the members could see one another, and two court clerks stood before them, one to take down the words of the condemning, the other to take down those of the acquitting, judges (*ib.* 3). In capital cases the witnesses were cautioned, after being brought into the court-room, in these or similar terms:

"Perhaps you speak by way of guess or estimate, or from what you have heard, as a witness who heard from the mouth of another witness, or of some trustworthy man. Perhaps you do not know that we are going to test you by formal and by free cross-examination. You should know that cases of life and death are not like cases about money. In a case about money the false witness can repay the money lost and he is forgiven; in a capital case the blood of the accused and of all his posterity clings to him to the end of the world; for so we find it as to Cain, who killed his brother, of whom it is said: 'The bloods of thy brother are crying out against thee' [Gen. iv. 10, Hebr.]—his blood and that of all his posterity. Or perhaps you say: 'Why should we trouble ourselves about this man's guilt?' But it is written: 'When the wicked perish, there is gleeful song'" (Prov. xi. 10, Hebr.).

"By way of guess or estimate" in this exhortation means "from circumstances"; and such evidence was deemed wholly insufficient for a regular conviction (see CRIME).

In prosecutions for theft, embezzlement, and other crimes, which were only punished by fines, double compensation, etc., the procedure was the same as in cases for damage to property ("dine mammonot"), taking place before three ordained judges ("munhim"). Involuntary manslaughter, punishable by exile to the cities of refuge, was tried under the same forms as capital cases. The Mishnah leaves it to be inferred that these forms were also applied to prosecutions for misdemeanors punishable by stripes. Compare ACCUSATORY AND INQUISITORIAL PROCEDURE; ACQUITTAL IN TALMUDIC LAW; CRIME; SANHEDRIN.

L. N. D.

CRIMINALITY: The average tendency to commit crime. The critics of the Jews have always contended that the general standard of morality among the Jews was lower than that of their Christian neighbors, and their tendency toward crime therefore greater. Such a charge was made by Johann David Michaelis in his review of Dohm's apology for the Jews. Michaelis says that while the

Jews form only one-twenty-fifth of the population of Prussia, they furnish one-half of the criminals ("Orientalische und Exegetische Bibliothek," 1775-1785, xix. 7). This statement is false in every respect. The Jews, even now, after the partition of Poland, form only 1 per cent of the population of Germany. Further, David Friedländer has proved from official records that in 1789, in Prussia, of 1,703 criminal convictions only 22 were of Jews. Still Friedländer did not draw the conclusion that Jews were better men than the Christians; he merely contended that in order to judge the moral status of a community other conditions, such as occupation, education, and the political situation of the country, must be taken into consideration.

The difficulties which beset an unprejudiced scientific examination into the figures on which the charge of criminality is based are manifold. First, owing to the numerical insignificance of the Jews, any investigation should extend over a long period of years and over a considerable area. It is known,

for instance, that, at a certain time, in the two penitentiaries of the grand-duchy of Hesse there were, among 600 convicts, only 5 Jews, while, supposing them to be as criminally

disposed as their neighbors, they should have had about 25 representatives in the penitentiary ("Mittheilungen des Vereins zur Abwehr des Antisemitismus," 1896, p. 44), it is wrong, however, to draw favorable conclusions from these figures, for the statistics may have been different a few weeks later. It would also be unfair to point to the fact that, among the 45 persons convicted in Germany between 1882 and 1892 for infringement of the navigation laws, there was not one Jew, and that, during the same period, only 12 Jews were punished for malfeasance in office, while their proportionate representation should have been 73 offenders of this class. The facts are that few Jews are seamen, and they do not very frequently hold public office in Prussia. Similarly it would be misleading to speak of a lower standard of morality among Jews because they have, during the period 1882-92, furnished 191 cases of fraudulent bankruptcy, when their pro rata would have been 20, and 1,116 cases of bankruptcy, when their pro rata would have been 69. These figures do not prove that a Jew is ten and twenty times more apt to become bankrupt, because they must be compared with the number of Jewish and of Christian merchants, before a conclusion can be arrived at. In fact, while the Jews form only 1 per cent of the population, over 16 per cent are merchants. The number of Jewish criminals in Germany appears to be larger than it is, as Jews who evade military service are included in the total. As a matter of fact, however, this is due to emigration, which is of greater moment to Jewish young men to whom the avenues of public offices are closed. If this class of offenders be deducted, the proportion of criminality will be found much smaller.

The greatest difficulty in the way of a thorough study of the subject consists in the fact that statistical material is incomplete, both geographically and chronologically. Few countries furnish complete statistics, and none go back further than a few

years. From these statistics it appears that the proportion of Jewish criminals to the whole population is in general below the average, that crimes of violence are exceedingly rare among them, while bankruptcy, forgery, and gambling are found more frequently among them than among non-Jews; but this is simply explained by the fact that these are the chief offenses of the mercantile classes to which Jews mainly belong. The figures given below are based on official statistics.

For Württemberg, Von Steudel gathered statistics, given in "Monatsschrift für die Justizpflege in Württemberg," 1841, covering the period from Dec. 31, 1827, to June 30, 1839. According to him the Jewish convicts were:

This would indicate a degree of criminality slightly above the normal.

In Germany there were convicted, during the period 1882-92, 38,288 Jews and 3,973,667 non-Jews. To maintain an equality in crime would have required the conviction of 47,306 Jews. In 1882 there were 998 criminals to every 100,000 inhabitants; while among the same number of Jews there were 844 criminals. In 1891 the number of criminals among 100,000 inhabitants had increased to 1,073, while among the Jews it had decreased to 799.

For Austria the percentage of the Jews in the whole population is 4.8, while, according to the official statistics, the Jewish percentage in total number of criminals was as follows:

1881.....4.2	1886.....4.2
1882.....4.1	1887.....4.2
1883.....4.0	1888.....3.9
1884.....4.0	1889.....3.5
1885.....4.1	1890.....3.6

Even in Galicia, which has been always described as a hotbed of moral corruption, the figures are in favor of the Jews, for in 1889 there were among 7,102 convicts only 656 Jews, while, according to their percentage (11.68) in the population, there should have been 829.

D.

CRISPIN, ISAAC IBN: Spanish moralist and poet; lived at the beginning of the twelfth century. Judah al-Harizi praises him among the renowned poets of the twelfth century; and, judging from the title *השר הגדול* ("The Great Prince"), which he prefixes to Crispin's name, the latter must have occupied a high official position ("Tahkemoni," ed. Constantinople, iii. 9b).

Crispin was the author of an ethical work entitled "Sefer ha-Musar" (Book of Instruction). This book, mentioned by Al-Harizi, is, according to Steinschneider, identical with the "Mishle Anashim Hakamim" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1402, 8), and with "Mishle 'Arab," still extant in two manuscripts in the possession of Baron de Günzburg. Under the latter title it was published in the supplements of "Ha-Lebanon," 1867-68. The "Sefer ha-Musar" in this case would be, if not a mere translation, an adaptation from the Arabic, as stated in the introduction to the "Mishle Anashim Hakamim" (see Steinschneider, "Ozerot Hayyim," p. 368). This adaptation was in its turn translated into Arabic by Joseph ibn Hasan, under the title "Maḥasin al-Adab," which is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1220, 4). Like the original Hebrew, the "Maḥasin al-Adab" is divided into fifty "kasidas," which agree with those of the "Mishle 'Arab," published in "Ha-Lebanon." The "Sefer ha-Musar," or "Mishle 'Arab," is mostly written in verse.

CRISPUS: The ruler of the synagogue at Corinth, who became a Christian, with all his house, through the preaching of Paul (Acts xviii. 8). In one of his letters to the church at Corinth (I Cor. i. 14), Paul speaks of Crispus as one of those whom he had baptized. There is a tradition that Crispus became such an important factor in the early Church that he was ordained Bishop of Ægina ("Apost. Const." vii. 46).

I. M. P.

CROATIA: Southwestern part of the Hungarian crown provinces; consists of Croatia, Slavonia, and the Military Frontier, included since 1868. The earliest allusion to Jews in Croatia is found in a letter of the Spanish vizier Hasdai ibn Shaprut, addressed to Joseph, king of the Chazars. Two men, named Mar Saul and Mar Joseph, were the bearers of this letter; and they had come with the ambassador of the "king of the Gíblim" to Hasdai at Cordova. Since both words, "Gíblim" and "Croats," have etymologically the same meaning—i.e., "mountain people"—it is generally assumed that by "Gíblim" is meant the people of Croatia. This is the only evidence, however slight, of the settlement of Jews within the present limits of Croatia in the tenth century. The proximity to Constantinople, as well as the active commerce with Italy, and more especially with Venice, leads to the conclusion that Jews were living in Croatia in the Middle Ages; but as yet the only historical evidence for this hypothesis

is an ordinance of the Venetian doge, dating from the sixteenth century, which forbade the Jews in Dalmatia to own any real estate, and, consequently, to settle there. It is recorded that at about that time a Jewish physician on his way through Ragusa was permitted to stay in that city six months. The political unity which always existed between Hungary and Croatia resulted, naturally, in a common legislation; but it is not known whether the various pro-Jewish and anti-Jewish laws of the empire practically affected Croatia also. A single datum the only one within a hundred years, appears about the middle of the seventeenth century. At that time there is found in the literature, side by side with the common "Jidov" (derived from "Judeus"), the expression — still used

Earliest Mention. by the people—"tschifut," borrowed from the Turkish. The former expression undeniably proves that the first Jews came to Croatia with the Turks during the time of the Turkish rule. But it seems that these Turkish Jews left together with the Turks; for in the eighteenth century the first Croatian Jews appear with German names; hence they had immigrated from the north. An edict of the year 1729 forbids Jews to live either in Croatia or in Slavonia. Yet a small number lived there, as, for instance, in Esseg in 1751, who were looked upon as "black sheep," and had no rights. They fared still worse at Semlin (Zimony), to which town they came during the Belgrade peace negotiations (1739); they were not allowed either as regular or temporary residents.

The enumeration of the Jews of Croatia under Maria Theresa (1773) showed hardly twenty-five families. It was only after the edict of toleration of Emperor Joseph (1782) that the immigration from the north and the south increased, at first in the villages and cities near the Hungarian frontier. Hungarian peddlers, who before this had visited Croatia, now settled here. The emperor's edict especially benefited the Jews of Semlin, who had managed to remain there in spite of the decrees against them. There were Jews in Warasdin in 1770; the hebrah there was founded in 1803, the congregation in 1811. The first Jew appeared in Kreuz in 1794; the Jews of Agram—who consisted of only two Jewish families under Maria Theresa—bought a plot for use as a cemetery in 1811; as early as 1820 there was a congregation in Karlstadt; and isolated families lived in the outlying country, going even into the mountain districts, where to-day not more than two or three families are to be found. In 1830 the gates of the free city of Pozega were opened to the first Jewish tax-farmer; and about the same time the Jews of the surrounding smaller villages had a rabbi at the head of their congregation. The congregations of Croatia were already formed in the first quarter of the nineteenth century.

A liberal legislation slowly bettered the condition of the Jews after 1782. On complaint of the Jews of Cirkvena against the intolerance at the office of the commanding general of Warasdin (in connection with the petition of the Hungarian Jews), a decree was passed (1791) permitting the Jews to live un-

disturbed wherever they chose, and confirming them in the condition in which they had been since the edict of toleration. A light is thrown upon this condition by the decree of the Warasdin magistrate, of the year 1781, which is a curious mixture of modern toleration and medieval prejudice. Under it no Jews besides the twenty-nine families already living in the city are allowed to settle there permanently. Other Jews must receive from the magistrate a certificate of residence for a few days; if this is prolonged without permission, the community has to pay a fine of twenty ducats. In accordance with the state law, they may not own real estate, but they may live in any street. The council of the community has the right, in lawsuits, to pass judgment up to fifty florins, from which there is no appeal; and, furthermore, it may use coercive measures or call in the police to guard its privileges and authority. It is also required that the council provide for the widows and orphans, the sick, and the poor; and they are permitted to engage a rabbi. Even on the Military Frontier the Jews, if living in the Hungarian crown provinces, or paying the toleration tax, have been allowed to peddle since 1787. This tax lay heavy upon the Croatian Jews, who were hoping in vain for a reduction in 1839, when they sent a delegation for that purpose, and addressed a petition for the granting of civil rights, to the Reichstag in Presburg.

The Reichstag again granted them some privileges (1840); but the tax of toleration remained in force. They were now permitted to live anywhere, to build factories, to engage in business or trade, to devote themselves to the arts and sciences, and to acquire real estate in those places where custom formerly had permitted it. About 1850 the congregations were incorporated and chartered, and registers of vital statistics were instituted by the **Increased government.** The attempt of Rabbi **Toleration.** Rokonstein to introduce a hierarchy by making the rabbinate of Agram the chief rabbinate for the whole country, was frustrated by the government, which established the autonomy of every individual community, and recognized the appellation "chief rabbi" merely as an honorary title to be given to rabbis of merit, without combining therewith a higher rank.

In 1859 the Jews obtained the privilege to keep Christian servants; and in the following year they at last acquired the right to own real estate anywhere. The petition for complete equalization, which they sent to the Parliament in 1861, received no attention whatever. In 1873 the Croatian Diet decided upon the emancipation of the Jews: until then the Jewish religion had been merely tolerated, especially on the Military Frontier. The decree of 1840 was not valid in this district; and only a certain number of Jews were allowed to settle. Semlin alone had a school. The war office, while allowing them to engage in honest trades and occupations, did not permit anything that might lead to usury; and they were excluded from the farming of the revenues, except in connection with the catching of leeches. When the Military Frontier was annexed to Croatia, in 1868, the Jews were allowed to live anywhere and to acquire homesteads. Until then there

had been only one congregation in Semlin, with one rabbi. To these restrictive measures in the old Military Frontier it is due that in many sections there were no Jews at the beginning of the twentieth century. The decree of emancipation of 1873 gave to the Jews full civic rights; and the state treasury granted them a moderate sum for Jewish institutions (religious instruction and synagogue-building). The increase of the Jewish population in Croatia is shown in the following statistics: 1840-41, 380 souls; 1857-64, 850; 1869-79, 876; 1880, 13,488; 1890, 17,261; 1900, about 20,000, equivalent to 0.31 per cent of the entire population in 1857 and about 1 per cent in 1900.

The immigrants came from Bohemia, Moravia, and Hungary (Great Kanizsa) into Croatia; from Hungary (Bonyhád) into Slavonia; from Turkey into the Military Frontier. With the exception of a small number of "Spaniolen" (Sephardim) they have the German rites.

There are twenty-seven communities in Croatia: two, at Agram and at Esseg, have over 2,000 souls each (4 per cent and 8 per cent respectively of the entire population), and fourteen over 200 souls each. Eleven congregations have rabbis; the others have rabbinical delegates. There are four Jewish schools, at Agram, Esseg, Semlin, and Vukovár. With the exception of two, the communities are progressive; most of them have new temples with organs, a *hebra kaddisha*, and one or two benevolent societies. The several communities are not bound together by any sort of organization whatever.

The Jews of Croatia are engaged in all occupations, even in agriculture, but especially in trade, wholesale and retail. The wood industries are flourishing since Jewish business men

Statistics. have taken hold of them and have introduced stove and cane factories; they have also opened the one cotton-spinning and weaving establishment in the province. In professional life there are 30 Jewish lawyers (out of a total of 200), 10 Jewish judges, and about 50 Jewish physicians, either holding official positions or practising privately. In the arts and sciences the Jews of Croatia have not distinguished themselves. Even in Jewish science very little has been done; a few religious books by Dr. Jakobi (see AGRAM), a few treatises relating to the history of social life by Dr. S. SPITZER, and some articles on the history of the Croatian Jews (in the "Journal of the Country Archives," 1901-02) having been the entire output in this field up to the end of the nineteenth century. A society, founded by the Jewish youth of Agram in 1899, for the study of Jewish history and science, heralds a new era of intellectual activity.

The relations of the Jews of Croatia with the other denominations have been until very recently most friendly. Anti-Semitism, even in 1883, found no support. The peasantry, again, is indebted to the village Jews for new means of livelihood and the marketing of its products; and in the cities the assimilation of the Jews with the Croats prevents race-hatred. Numerous Jews hold offices as town councilors, some even as mayors, and honorary positions in philanthropic and national societies are held

by them. It is only in the last few years that attempts have been made by the clerical party to injure the Jews economically in many industries by establishing cooperative associations.

G. S.

CROCODILE: This well-known amphibious reptile (*Crocodilus vulgaris* or *niloticus*) is not mentioned by a specific Hebrew name in the Bible. There are passages, however, in which allusions to it occur, and which give a faithful description of it (compare Brehm, "Illustriertes Thierleben," iii. i. 112). Whether Ps. lxxviii. 30 (A. V. margin) refers to the crocodile in the phrase "the beasts of the reed" is still an open question. Upon these beasts destruction is invoked, which would be strange if they were meant to denote Egypt; for the crocodile is the most characteristic animal of that country, and the psalm is pervaded by a friendly spirit toward the empire of the Pharaohs. It is thus more reasonable to hold with Duhm ("Die Psalmen Erklärt," in Marti's "Kurzer Hand-Commentar zum Alten Testament") that swine are meant, as designating the population of the Jordan valley, which, at the time of the composition of the psalm, consisted largely of non-Jews. It is interesting to note in reference to Ex. viii. 2 that the word *zefardea'* (A. V. "frogs") was explained as referring to crocodiles (Arabic, "tim-sah") by all the commentators whom Ibn Ezra mentions in his commentary to this passage.

In Job (xl.-xli.) the description of the LEVIATHAN certainly resembles that of the crocodile. Some of the particulars given—the impenetrable scales (xli. 15); the sharp scales (*ib.* verse 30); the teeth (verse 14); the thick armor (verse 7); the strongly marked

difficulties besetting its capture; the futility of ordinary implements, as **Leviathan**, the hook, noose, and harpoon; and the impotence of the usual weapons, the spear, mace, and arrow (verses 2, 7, 26)—establish a strong presumption in favor of the identification. Against this evidence it has been urged that the other characteristics are not specific enough, as they are common to several large water-animals.

There is some possibility, however, that the writer was describing the crocodile from personal observation. "We have good evidence," says Canon Tristram in "The Natural History of the Bible" (8th ed., p. 261, London, 1889), "of its existence at the present day in the marshes of the Zerka, or Crocodile River." This fact, well known to Pliny ("Historia Naturalis," v. 17) and Strabo (p. 758), and confirmed by Pococke, was corroborated, according to Tristram (*l.c.*), by the Arabs with whom he conversed. W. M. Thomson ("The Land and the Book," popular edition, i. 73) testifies to the presence of crocodiles in the marsh of Zerka: he believes that he heard the splashing of crocodiles making their way "through this hideous swamp in quest of prey" (*ib.* p. 77). The latest testimony to the same effect is that of Schumacher ("Pal. Explor. Fund Quarterly Statement," Jan., 1887, p. 1), who reports having seen a crocodile in that neighborhood.

Although these coast districts did not belong to the regions familiar to the Hebrew writers, it is not reasonable to preclude the possibility that the poet in Job wrote of what he himself had seen, or from

information supplied to him by those who had made personal observations of the animal. Even Gunkel ("Schöpfung und Chaos," p. 48), who, with Cheyne, would probably relegate this chapter to the domain of mythology, concedes that the poet meant to describe, not a mythological creature, but a monster actually living in his day, and that some of the characteristics mentioned are those of the crocodile. According to Gunkel, however, the bulk of the chapter is an adaptation of mythological

Mytho- material; the monster being taken
logical or from the Babylonian creation-myth.

Real? His objections are cogent and his theory must be admitted as having great probability as regards other passages, in which the crocodile is referred to under such designations as "tannim" ("dragons," R. V., Jer. xiv. 6), "rahah" (Isa. li. 9; Ps. lxxxix. 10), and "leviathan" (Ps. lxxiv. 14; Job iii.). But with reference to Job xli. 1 all facts point to the conclusion that the word "leviathan" is probably a later emendation, influenced by the mythical passages (F. Delitzsch, "Hiob," Leipzig, 1902). The enumeration of the characteristics is too complete to admit of any other explanation.

The Arabs call the crocodile "timsah," or "waral," both of which words have passed into Syriac. At one time they must have used the flesh of the animal for food; for the eating thereof is expressly forbidden to faithful Mohammedans. This may, however, be due to a reminiscent confusion of the crocodile with the "koah" (Lev. xi. 30), mentioned among the unclean animals, and which the R. V. translates "land-cro-

codile" (marked in the margin as uncertain); while the A. V., following the Vulgate and the Septuagint, has "chameleon."

Other ing to Bochart ("Microzoicon," i.
Biblical 1069), the land-monitor, the "waral al-
References. ard" of the Arabs (*Psammisaurus scin-*
eus), is meant, or perhaps even a larger monitor, the "waral al-bahr," the Nilotic monitor. Bochart also seems inclined to make the "zab" of Lev. xi. 29 identical with the "koah," or land-crocodile (*ib.* i., book iv., ch. 1). This latter is a lizard, if not a toad; and as such it is explained by the Talmudists (Hul. 127a). According to Kimhi, the Hebrew "koah" (Lev. xi. 30) is a lizard (in Linné the *Lacerta stellio*). The Talmud characterizes this species as not dangerous to man and as having a soft, tender skin (Hul. 122a), which is easily removed from the

body (Shab. 107). In Arabic it is called "hirdhaun." This חֲרִדָּנָא, in the Targ. for zab (the Syriac "hardana"), is translated by "crocodile," and distinguished from a land-lizard, as the "hardana" of the sea. This latter name occurs in a Talmudic caution that at prayer the curved posture of the "crocodile" (?) be not assumed (Yer. Ber. 3d). The Talmudic "ben neflim" (Hul. 127a) has also been identified with the crocodile. But it seems to be the *Psammisaurus sciurus* (Arabic, "sakankur"). The crocodile is perhaps designated by the Talmudic קְרוֹקִיתָא (Ned. 41a), which in B. B. 73b occurs in a fabulous connection as אֶקְרוֹקִיתָא, if this be not a corruption of עֶקְרָבָא ("scorpion"). For Talmudic views on "leviathan" see the article under that title.

E. G. H.

CROMWELL, OLIVER: Lord Protector of England; born April 25, 1599, died Sept. 3, 1658.

Cromwell favored re-admission of the Jews into England, partly in the hope of thereby fulfilling the Messianic prophecy, but mainly because they had aided him as "intelligencers," and he foresaw that, with their control of the Portuguese and Spanish trade, and their large commercial interests in the Levant, the Hamburg Bank, and the Dutch East and West Indies, they would be of service to him in his expansionist policy, and would bring wealth into the country. There were at this time (1653) about twenty Manano fam-

ilies settled in England, who had fled from Spain through fear of the Inquisition. To all appearance Spanish merchants, and attending mass at the chapel of the Spanish ambassador, they were nevertheless known to Cromwell and a few others to be crypto-Jews. Antonio Fernandez CARVAJAL, a Portuguese merchant in London, had been of financial assistance to the Parliament, and had also, through a relative in Holland and a servant named Somers, or Butler, secured for Cromwell information regarding the Royalist intrigues with Spain. At the time of the Dormido mission to England to negotiate for readmission, Carvajal actively supported the petition, and it was favorably received by Cromwell. At this time, however, the anti-Jewish prejudices had become strong, and the Council would not consent (1654). Cromwell then sent for

PETITION OF THE JEWS OF ENGLAND TO OLIVER CROMWELL, DATED JANUARY 24, 1655.
(In the Record Office, London.)

Manasseh ben Israel, and a motion was introduced in the Council in 1655, "That the Jews deserving it may be admitted into this nation to trade and traffic and dwell among us as Providence may give occasion." The motion was referred to a committee, and a conference was finally arranged to consider the question, the members being appointed by three of Cromwell's most devoted political adherents. The conference met in the Council Chamber at Whitehall, Dec., 1655. It consisted of representatives of the army, the law, the trading interests, and sixteen divines, the majority of whom Cromwell had carefully selected on account of their supposed approval of religious toleration.

The first question which arose for consideration was whether there existed any law forbidding the readmission of the Jews, and this was settled by the decision that the expulsion of 1290 had never been valid. When the terms of admission were discussed, a distinctly hostile spirit manifested itself, and the mercantile interests and the clergy united in opposition. To secure a favorable vote the Protector added some more members who were thought to approve of the proposal, but they also ranged themselves with its opponents. Finally, on Dec. 18, a hostile crowd thronged into the Council Chamber, and it was obvious that Cromwell's project could not be carried except under the most extreme restrictions.

Cromwell now saw that his whole scheme would be thwarted if a vote were not prevented. With characteristic promptness he began at once to review the differences of opinion revealed by the various speakers. Protesting that he had no obligations to the Jews beyond those imposed by the Scriptures, he insisted that, "since there was a promise of their conversion, means must be used to that end, which was the preaching of the Gospel, and that could not be done unless they were admitted where the Gospel was preached." Then, turning to the objecting merchants, he said: "You say that they are the meanest and most despised of all people. But in that case what becomes of your fears? Can you really be afraid that this contemptible and despised people should be able to prevail in trade and credit over the merchants of England, the noblest and most esteemed merchants of the whole world?" Finally, having announced that nothing was to be hoped from the conference, and that he should use his own judgment in acting for the glory of God and the good of the nation, he vacated the chair and brought the proceedings to a close. The conference was cowed, and dissolved without a word of protest.

What finally precipitated the solution of the difficulty was the outbreak of the war with Spain. The Spanish Maranos were no longer able to live in England as Spanish citizens, and in 1656, relying upon the decision that the expulsion of 1290 was no longer valid, they openly threw off their disguise and assumed the position of Jews.

In the following year, probably on Feb. 4, 1657, Cromwell in a public meeting made a "seasonable benefaction" to Carvajal, perhaps a verbal assurance that the Jews would not be disturbed in the exer-

cise of their religion. He had previously made a grant of £100 to MANASSEH BEN ISRAEL. Altogether Cromwell's action enabled the Jews to live as such in England at a time when there was sufficient opposition to them on the part of the clergy and the mercantile classes to have prevented their residence, if the government had been weak or ill-disposed toward them.

CROOL, JOSEPH: Teacher and controversialist; flourished in England about 1838. He gave lessons in Hebrew to a few students in the University of Cambridge when, for several years, the regius professors of Hebrew were absentees. He was not by any means a man of learning, though he could read three languages, English, German, and Hebrew; he was given over to prejudices, and delighted in old wives' fables and vain traditions. He was in the habit of wearing a parchment girdle, on which were inscribed passages from the Law and the Talmud.

Crool was opposed to the emancipation of the Jews; believing that the introduction of Jews to Christians in the legislature would lead to the conversion of the former to Christianity. He wrote two works on this subject in 1829, entitled "The Fifth Empire" and "The Last Generation," both published at Cambridge.

CROSS: 1. The stake (*σταῦρος* = עֵלֶב or עֵלִיבָה) used by the Romans at crucifixion. This was so familiar to the Jews in New Testament times that they spoke frequently of "men carrying their cross before them while going to be executed" (Gen. R. lvi.; Pesik. R. xxxi., ed. Buber, 143b), as did Jesus (Matt. x. 38, xvi. 24, and parallels; see CRUCIFIXION).

2. A specific Christian symbol: termed by Jews שְׁתֵּי וְעֵרֵב ("warp and woof"); also עֵלֶם ("idol"). Concerning this the law is: "As far as it is made an object of worship by Christians, it is to be treated as an idol and prohibited for use; if, however, it is worn as an ornament without any religious object, its use is permitted to the Jews" (Isserles, Shulhan 'Aruk, Yore De'ah, 141, 1; R. Mordecai to 'Ab. Zarah iii. in the name of R. Eleazar b. Jacob of Worms). However, being a Christian symbol, it has always been scrupulously avoided by Jews. Pious Jews would not even wear badges or decorations with the cross attached to them, whereas more liberal ones do not hesitate to wear either the Iron Cross as German soldiers, or the Red Cross as members of the Red Cross Society. To embroider ornamental crosses upon silk dresses for Christian ladies

is not forbidden to Jewish artists, according to Solomon b. Adret (see Berliner, "Aus dem Leben der Juden," 1900, pp. 13, 130). The Jewish aversion to using any sign resembling a cross was so strong that in books on arithmetic or algebra written by Jews the plus sign was represented by an inverted "kamez" (L).

The cross as a Christian symbol or "seal" came into use at least as early as the second century (see "Apost. Const." iii. 17; Epistle of Barnabas, xi.-xii.; Justin, "Apologia," i. 55-60; "Dial. cum Tryph." 85-97); and the marking of a cross upon the forehead and the chest was regarded as a talisman against the powers of demons (Tertullian, "De Corona," iii.; Cyprian, "Testimonies," xi. 21-22; Lactantius, "Divinae Institutiones," iv. 27, and elsewhere). Accordingly the Christian Fathers had to defend themselves, as early as the second century, against the charge of being worshipers of the cross, as may be learned from Tertullian, "Apologia," xii., xvii., and Minucius Felix, "Octavius," xxix. Christians used to swear by the power of the cross (see Apocalypse of Mary, viii., in James, "Texts and Studies," iii. 118). Nevertheless Jewish teachers in the Middle Ages declared that Christians must be believed when swearing by the cross, as, in reality, they swear by the true God (Isaac of Corbeil, in "Sefer Mizwot Katan," 119, quoted by Güdemann, "Gesch. d. Erz. u. Cultur in Italien," 1880, i. 90). The fact, however, that the cross was worshiped as an idol during the Middle Ages caused the Jews to avoid (compare Ex. xxiii. 13) the very word "Cross," as well as all derivatives of it; for instance, "kreuzer" they called "zelem" or, abbreviated, "zal"; and the town "Kreuznach" they called "Zelem-Makom."

Several forms of the cross appear to have been used: the simple form, like a plus sign, the so-called St. Andrew's cross, and the Latin cross, which is mentioned in Ezek. ix. 4 (Hebr.) as the "mark of life set upon the men to be saved" (compare Aquila, Symmachus, Theodotion, and Vulgate, or St. Jerome, to Ezek. *l.c.*; and Tertullian, "Adversus Marcum," iii. 22; compare Job xxxi. 35). On the other hand, the oblique or St. Andrew's cross, resembling the letter "x," was used in Justin's time (see "Apologia," i. 60, where he compares the Christian cross with the cosmogonic starting-point in Plato's "Timæus," 36), and was known also to the Jews (see ANOINTING and CABALA), this form as the initial letter of Χριστός being preferably used. In Jewish circles the original connections of both the Latin and the St. Andrew's cross were quite naturally ignored.

CROSS-EXAMINATION. See EVIDENCE.

CROWN.—**Biblical Data:** The translation employed for five distinct Hebrew words in the Bible. It renders, first, "zer," a technical term used frequently in the Priestly portions of Exodus for the golden molding with which the Ark (xxv. 11), the table (xxv. 24), its border (xxv. 25), and the altar of

IV.—24

incense (xxx. 3) were decorated. While this is an uncommon use, the word is employed secondly and more accurately for the Hebrew "nezer." This carries with it the idea of consecration, and refers solely to the circlet worn on the head by a Hebrew monarch as a symbol of his royal power (II Sam. i. 10; II Kings xi. 12), or to that worn by the high priest (Ex. xxix. 6, xxxix. 30). Because of the significance of the crown, the word is used figuratively for the authority of a king (Prov. xxvii. 24). A third word, "atarah," is used in a perfectly general way both directly (II Sam. xii. 30; Ezek. xxi. 31 [A. V. 26] and figuratively (Job xix. 9, xxxi. 36). It also refers to wreaths used at banquets for purposes of decoration (Isa. xxviii. 1), or at games as rewards (Prov. iv. 9). For "crown" in the phrase "crown royal" in the book of Esther, however, there is another Hebrew word, "keter," which seems to be a Persian loan-word.

In the New Testament the words στέφανος and διάδημα are indiscriminately rendered "crown" in the A. V., but distinguished in the R. V. (I Cor. ix. 25; II Tim. ii. 5; Rev. iv. 4, 10). The latter is the real insignia of royalty; the former, a general symbol of superiority. This distinction is not maintained in the Old Testament. Finally, the word occurs not infrequently for "kadkad" in the phrase "crown of the head," referring to the upper part of the head.

In the New Testament a crown symbolizes victory and all that it involves by way of reward. In the Old Testament it is rather a symbol of splendor and dignity (Prov. xii. 4, xvi. 31). Still, if the Hebrew reading is correct, in Ps. cxlii. 8 the crown is indicative of triumph.

E. G. H.

F. K. S.

—**In Post-Biblical Times:** The use of crowns among the Jews in post-Biblical times, both in life and in literature, is varied. Under the influence of Greek custom the guests sat at the festive table with their heads crowned with garlands. In the Book of Wisdom (ii. 8) the ungodly are quoted as saying, with reference to their festal meals: "Let us crown ourselves with rosebuds before they be withered." With these are contrasted the righteous whose reward is with the Lord: "They receive the crown of royal dignity and the diadem of beauty from the Lord's hand (*ib.* v. 16). The custom of sitting with wreaths round the head at feasts seems to have been quite common among the Jews before the destruction of the Second Temple. Ben Sira describes a Jewish feast at which the symposiarch sits with a crown of honor (Ecclus. [Sirach] xxxii. 1-2). Judith and all the women of Israel celebrated a thanksgiving festival after the victory over Holofernes, "dancing, being crowned with olive garlands, and all the men of Israel followed in their armor with garlands" (Judith xv. 13; compare iii. 7). Thus

the Jews of Alexandria, after their miraculous deliverance, celebrated a **Festal Crowns.** thanksgiving feast "crowned with garlands of all kinds of sweet-scented flowers" (III Macc. vii. 16; compare *ib.* iv. 8, and Josephus, "Ant." xix. 9, § 1). Likewise, the Jews in Maccabean times celebrated the Feast of Tabernacles sitting in their booths, "with wreaths upon

their heads," as may be learned from the Book of Jubilees, xiv. 30, where Abraham is said to have received an ordinance to this effect for all generations. Obviously, this custom gave rise to the belief that the Tabernacle feast was a Bacchic festival (Plutarch, "Symposium," iv. 5; compare II Macc. vi. 7).

Whether this Greek custom goes back to ancient Semitic life (see Isa. xxviii. 1-5, and Luzzatto's Hebrew commentary) can not be decided. The Sukkah garlands or crowns of wheat (עֲטוּרֵי סוּכָּה) and עֲטוּרֵי שֶׁבִילִים, Yer. Sukkah i. 51d; Tosef., Sukkah, i. 7) appear to be a reminiscence of the older "crowning of the head." Possibly the crowning of the cup of blessing at the saying of grace (עֲטוּר, Ber. 51a; Yer. Ber. vii. 11d; see also Frankel's commentary) is a survival of the Greek symposium.

Crowns were placed by the Gentiles upon their idols (Epistle of Jeremiah 9; Acts xiv. 13); and accordingly, such "crowns of wheat-ears or of roses"

placed upon idols were interdicted (Yer. 'Ab. Zarah iii. 42c, 43d). The **Crowns of Glory.** Jews, however, modified the custom

by placing crowns of gold upon the forefront of the Temple at the dedication feast (I Macc. iv. 57). They also put garlands of olive around the festal steer that led the annual thanksgiving procession, and around the baskets containing the first-fruits (Bik. iii. 3, 9, 10).

God Himself is constantly represented as wearing crowns. The archangel Sandalfon binds wreaths for his Maker (Hag. 13b); and the angel Akatriel (אֶכְטְרִיֵּאל = "the crowning angel") received his name from his charge of holding the crown of glory over the Most High on His heavenly throne (Ber. 7a). According to the Slavonic Enoch (xiv. 2-3), every evening four hundred angels remove the crown from the head of the sun and lay it before the Lord; and every morning they replace the crown before the sun sets forth upon its daily journey. "The king of light," whose head is surrounded with crowns, "places the crowns of light ever anew upon the angels in the heavens" (Brandt, "Mandäische Schriften," 1893, pp. 13-19). The four and twenty elders in heaven have also "crowns of gold" on their heads; and when prostrating themselves before the Lord they "cast their crowns before the throne" (Rev. iv. 4, 11).

Most crowns of reward mentioned in Hellenistic and rabbinical literature refer to the world to come.

The angel of death says to Abraham (Testament of Abraham, A. xvii.; B. **Crowns of Reward.** xiii.), "If any one is righteous I take crowns and come to him." "The greatness of thy love toward God becomes a crown upon thy head." (Compare "the crowns and thrones of glory" for the righteous in Ascensio Isaie, vii. 22, viii. 26, ix. 10; Hermas, "Similitudes," viii. 2.) Such crowns are especially accorded to the martyrs (see Testament of Job, ix. 13, probably based upon עֲטוּרֵי, Job xxxi. 36; Kohler, in Kohut Memorial Volume, p. 284). "When he has been approved he shall receive the crown of life which the Lord promised to them that love him" (James i. 12, R.V., obviously with reference to Judges v. 31, as interpreted by the Rabbis, Yoma 23a). Likewise, I Peter v. 4: "Ye shall receive a crown of glory that fadeth not"

(compare Rev. ii. 10, "a crown of life"). Especially does Paul dwell upon the "incorruptible crown" obtained in the race for the higher things, in contrast to the "corruptible crown" given to the victor in games (I Cor. ix. 25; II Tim. ii. 5; compare II Tim. iv. 8, and Philo, "De Allegoriis Legum," xxvi. § 26). These older conceptions cast light also on later rabbinical passages concerning the CROWNS OF THE RIGHTEOUS and the CROWN OF THE LAW.

K.

In the Talmudic Hebrew, עֲטָרָה is used (compare the English "crown") for the Biblical כִּרְמִי in the sense of "border" or "rim" (Kelim v. 3; Oh. xiv. 1). In the Targumim כִּרְמִי is usually rendered by the identical זִיז or רִיר, or sometimes by כְּלִיל, which in sense is equivalent to "crown" or "wreath." For the insignia of royalty the late Biblical "keter" is used, together with "kisse" (throne) and "sharbitz" (scepter). While the Biblical כִּרְמִי drops out of use in the Talmudic Hebrew, which restricts the root to its original meaning, "cut off" (hence "devoted," a "nazir"), a new word is introduced, "taga" (תָּגָא), of non-Hebrew stock, in the sense of royal crown and thence of ornament.

"Keter," as well as "atzeret" and its derivatives, has also the applied meaning of ornament, dignity, and distinction. The righteous will wear crowns in the hereafter (Ber. 17a; compare Meg. 15b, where God is the crown on the head of the pious; Lev. R. xxx.). So also prayer is woven into a crown for the head of God (Ex. R. xxi.). "Three crowns there are: the crown of the Torah, the crown of the priesthood, the crown of royalty; but the crown of a good name is higher than these altogether" (Abot iv. 13). In explanation of this enumeration of the three degrees of distinction Ex. R. xxxiv. and Num. R. iv. must be kept in mind. The crown of the learned man (Pharisee), that of the priest (Sadducee), that of royal blood, men of good repute not only attain but even surpass; that is, learning, birth, and station are worthless, while character is all. R. Simeon ben

Johai enumerates these crowns in this order: the crown of royalty, that is, the "table of the show-breads," which had a golden border; the crown of the priesthood, that is, the altar; the crown of the Torah, that is, the Ark of the Covenant. Playing upon the vocalization of כִּרְ (zar and zer), he adds: "If one acquires the Torah, it is for him a zer, a crown; if he does not, it is for him something foreign" (compare Yoma 72b). God is represented in the Talmud as ornamenting the letters יֵצֶמֶת, as well as the letters נֵץ (on p see Shab. 104a), with "crowns," and refrains from multiplying them in view of R. Akiba's disposition to read into these "crowns" halakic decisions (Men. 29b; Shab. 89b). "Crown" is also used for "kingdom"; for instance, in the parable about the moon's jealousy of the sun, she asks: "Is it possible for two kings to have one 'crown'?" and God, acting upon the suggestion, reduces her to the second rank (Hul. 60b). Again,

CROWNS OF THE LAW.

1. In Hambro' Synagogue, London. 2. In a private collection, New York. 3. In the Synagogue at Pogrebishche, Russia. 4 and 6. In Temple Shearith Israel, New York. 5. In the Synagogue at Casale Monferrato, Italy. 7. Oriental; in the United States National Museum, Washington. 8. In the Victoria and Albert Museum, London. 9. Samaritan; in the possession of the Palestine Exploration Fund.

it is used figuratively for a deed entitling one to recognition, as in Yer. Dem. ii. 22c, bottom. Hezekiah was privileged by God to "acquire the crown" of the removal of the brazen serpent (Hul. 6b, 7b). In the same sense the caution occurs against making the Torah and learning a crown of self-glorification (Abot iv. 5).

The most distinguished men are called the crown of their fellows (for instance, in Tosef., Soṭah, xv.). With the death of R. Eleazar ben Azariah passed away the crown of the wise, for the wealth of the wise consists in the crown of learning (compare Soṭah 49b). So also the distinctions conferred on the first day are designated as its ten crowns (Sifra, Shemini Shab. 87b).

The bride wore a crown—wreath or chaplet—at the marriage feast, and so did the bridegroom, who, indeed, was regarded as a king during the nuptial ceremonies (Nowack, "Lehrbuch des Hebräischen Archäologie," i. 164). This custom was suspended for a time in consequence of the Roman wars (Soṭah ix. 14). These bridal wreaths could not be woven of myrtle or roses, but were made of reeds. The reason for this restriction is found in the idolatrous uses of wreaths of the kind prohibited

Bridal Crowns. (Yer. 'Ab. Zarah iv. 43d: "Not only wreaths made of wheat-stalks, but also of roses"; compare also Yer. Bik.

i., toward end 64b, top; Soṭah 49a). In Yer. Soṭah ix. 24b, bottom, R. Jeremiah is reported as wearing a crown of olive-branches in order to amuse the bridal party, from which act he came to be known as the rabbi with the (myrtle bridal) crown (compare Gen. R. lxx.; Lam. R. 94b; the verse "the crown is fallen from our head" [Lam. v. 16] was interpreted to refer to him; Lam. R. to the verse, 69d). Mention is also made of ornaments in the shape of wreaths, which were much affected by women (Shab. v. 1 [57a]; Soṭah 49b). Some of these are even said to have shown in engraving the picture of Jerusalem. By later rabbis the custom of placing a wreath or crown on the head of the bridegroom was regarded as a token of mourning for Jerusalem, "the olive-branches being bitter" ("Aṭeret Zeḳenim" to "Or ha-Hayyim," 560; Tur Eben ha-'Ezer, 65; Tos. Pes. 36a). See CROWN OF THE LAW.

E. C.

E. G. H.

CROWN OF THE LAW: A coronet, usually made of gilded silver, with bells, bearing the Hebrew inscription כתר תורה. It is placed upon the upper ends of the handles of the scroll of the Law. Sometimes the crown is a double one. A similar emblem, often borne between two lions as symbols of strength, decorates the mantle of the scroll and the curtain of the Ark. The device signifies the majestic sovereignty of the Law. It is difficult to say when it was first adopted. In geonic times he who read the last chapter of the Pentateuch on Simḥat Torah had a crown of silver or gold or a garland of myrtle placed upon his head, similar to the one placed upon the head of a bridegroom; whence, probably, the name BRIDEGROOM OF THE LAW. From this arose the custom of having a crown placed permanently upon the scroll of the Law, the making of crowns or garlands on festival days being a transgression of the Law (see Abraham ben Nathan

ha-Yarḥi in "Ha-Manhig," Suk. § 59; and R. Nissim to Alfasi, Meg. iii.; Shulḥan 'Aruk, Oraḥ Ḥayyim, 154, 10).

The masters of the school, called "kings" (Git. 62a), were probably the persons originally decorated with the crown of the Law. This seems to be confirmed by the saying of Hillel: "He who makes use of the crown [כתר] perishes" (Ab. i. 13). [This "crown" was afterward understood to mean the "crown of God" (כתר) = the Ineffable Name, which was probably engraved upon the crown; see Pirḳe R. El. xlvii.; Targ. Yer. to Ex. xxxiii. 4-6, 25.] Compare Ab. iv. 5: "Make not the Torah a crown to glory in it." The saying of R. Simon b. Yoḥai concerning the three crowns—the crown of the Law, the crown of the priesthood, and the crown of royalty (see CROWN IN POST-BIBLICAL TIMES)—appears also to indicate that the crown of the Law, like the two others, was a material crown, and not a figurative expression like "the crown of a good name." The crown of the Law is probably indicated by the following Haggadah: "When the Israelites before receiving the Law on Mount Sinai proclaimed 'We shall do and hearken!' [Ex. xxiv. 17], there came sixty myriads of angels with two crowns for each—one for each of the two promises; and when they sinned before the Golden Calf there came twice as many demons to take their ornaments away" (Ex. xxxiii. 6; Shab. 88a; compare Pesik. 21 [ed. Friedmann, 102b]; Pesik. de R. K. xiv. 124b; Tan., Tezawweh, ed. Buber, 50a).

Regarding the question whether the Keter Torah in use may be sold for the purpose of settling a dowry for a daughter, see Isaac Lampronti, "Paḥad Yizḥak," letter כ, 170b.

CROWNS OF THE RIGHTEOUS: The future bliss of the righteous is described by Rab in Ber. 17b: "There is neither eating and drinking nor marrying nor bargaining nor envy nor hatred nor quarrel in the world to come; but the righteous sit with crowns upon their heads, and feed upon the splendor of the Shekinah, as it is said of the nobles of the children of Israel: 'He laid not his hand upon them, but they saw God, and this was their eating and their drinking'" (Ex. xxiv. 11, Targ.). In Sanh. 111b, Meg. 15b, R. Haninah says: "God himself will be a crown of glory upon the head of each righteous one, as it is written: 'In that day shall the Lord of hosts be for a crown of glory, and for a diadem of beauty, unto the residue of his people'" (Isa. xxviii. 5). Accordingly the Zohar (Wayehi; ed. Cracow, p. 296) speaks of seats surrounded with crowns prepared for the righteous in paradise thirty days before their death, when their forthcoming arrival there is announced. So sings the poet of the "Akdamut":

"Under a canopy of crystal clouds,
Wearing a beauteous crown,
Each in accordance with his deeds,
On a throne with seven steps of fine gold."

CRUCEANU, STEFAN: Rumanian author; born at Jassy April 25, 1868. On receiving his bachelor's degree in 1889 he entered the University of Jassy as a student of philosophy, but at the end

of a year he went to Paris to study medicine. In April, 1885, he published his first work, a socialistic story, in the "Drepturile Omului" (Rights of Man). He became a frequent contributor to different political papers, including the "Natiunea," "Drapelul," "Perdăful," "Fulgerul," "Tunul," and "Propășirea." In 1891 he published his first poem, "Bătălie din Urma" (The Last Heart-Beat), in the "Revista Noua" of Bucharest. He is a contributor to the most prominent journals of Rumania, such as the "Convorbiri Literare," "Radicalul," "Evenimentul," "Noutatea," "Adeverul," "Literatura et Arta Romana," and the "Noua Revista Romana." In 1898 he published most of his poems in one volume under the title "Lacrime."

CRUCIFIXION: The act of putting to death by nailing or binding to a cross. Among the modes of CAPITAL PUNISHMENT known to the Jewish penal law, crucifixion is not found; the "hanging" of criminals "on a tree," mentioned in Deut. xxi. 22, was resorted to in New Testament times only after lapidation (Sanh. vi. 4; Sifre, ii. 221, ed. Friedmann, Vienna, 1864). A Jewish court could not have passed a sentence of death by crucifixion without violating the Jewish law. The Roman penal code recognized this cruel penalty from remote times (Aurelius Victor Cæsar, 41). It may have developed out of the primitive custom of "hanging" ("arbori suspendere") on the "arbor infelix," which was dedicated to the gods of the nether world. Seneca ("Epistola," 101) still calls the cross "infelix lignum." Trees were often used for crucifying convicts (Tertullian, "Apologia," viii. 16). Originally only slaves were crucified; hence "death on the cross" and "supplicium servile" were used indiscriminately (Tacitus, "Historia," iv. 3, 11). Later, provincial freedmen of obscure station ("humiles") were added to the class liable to this sentence. Roman citizens were exempt under all circumstances (Cicero, "Verr." i. 7; iii. 2, 24, 26; iv. 10 *et seq.*). The following crimes entailed this penalty: piracy, highway robbery, assassination, forgery, false testimony, mutiny, high treason, rebellion (see Pauly-Wissowa, "Real-Encyc." s. v. "Crux"; Josephus, "B. J." v. 11, § 1). Soldiers that deserted to the enemy and slaves who denounced their masters ("delatio domini") were also punished by death on the cross.

The crosses used were of different shapes. Some were in the form of a T, others in that of a St. Andrew's cross, X, while others again were in four parts, +. The more common kind consisted of a stake ("palus") firmly embedded in the ground ("crucem figere") before the condemned arrived at the place of execution (Cicero, "Verr." v. 12; Josephus, "B. J." vii. 6, § 4) and a cross-beam ("patibulum"), bearing the "titulus"—the inscription naming the crime (Matt. xxvii. 37; Luke xxiii. 38; Suetonius, "Cal." 38). It was this cross-beam, not the heavy stake, which the condemned was compelled to carry to the scene of execution (Plutarch, "De Sera Num. Vind." 9; Matt. x. 39; John xix. 17; see Cross). The cross was not very high, and the sentenced man could without difficulty be drawn up with ropes ("in crucem tollere, agere, dare, ferre"). His hands and feet were fastened with nails to the cross-beam and

stake (Tertullian, "Adv. Judæos," 10; Seneca, "Vita Beata," 19); though it has been held that, as in Egypt, the hands and feet were merely bound with ropes (see Winer, "B. R." i. 678). The execution was always preceded by flagellation (Livy, xxxiv. 26; Josephus, "B. J." ii. 14, § 9; v. 11, § 1); and on his way to his doom, led through the most populous streets, the delinquent was exposed to insult and injury. Upon arrival at the stake, his clothes were removed, and the execution took place. Death was probably caused by starvation or exhaustion, the cramped position of the body causing

Mode of Execution. fearful tortures, and ultimately gradual paralysis. Whether a foot-rest was provided is open to doubt; but usually the body was placed astride a board ("sedile"). The agony lasted at least twelve hours, in some cases as long as three days. To hasten death the legs were broken, and this was considered an act of clemency (Cicero, "Phil." xiii. 27). The body remained on the cross, food for birds of prey until it rotted, or was cast before wild beasts. Special permission to remove the body was occasionally granted. Officers (carnifex and triumviri) and soldiers were in charge.

This cruel way of carrying into effect the sentence of death was introduced into Palestine by the Romans. Josephus brands the first crucifixion as an act of unusual cruelty ("Ant." xiii. 14, § 2), and as illegal. But many Jews underwent this extreme penalty (*ib.* xx. 6, § 2; "Vita," § 75; "B. J." ii. 12, § 6; 14, § 9; v. 11, § 1; Philo, ii. 529).

During the times of unrest which preceded the rise in open rebellion against Rome (about 30-66 B. C.), "rebels" met with short shrift at the hands of the oppressor. They were crucified as traitors. The sons of Judas the Galilean were among those who suffered this fate.

The details given in the New Testament accounts (Matt. xxvii. and parallels) of the crucifixion of Jesus agree on the whole with the procedure in vogue under Roman law. Two modifications are worthy of note: (1) In order to make him insensible to pain, a drink (*ὄξος*, Matt. xxvii. 34, 48; John xix. 29) was given him. This was in accordance with the humane Jewish provision (see Maimonides, "Yad," Sanh. xiii. 2; Sanh. 43a). The beverage was a mixture of myrrh (קורט של לבונה) and wine, given "so that the delinquent might lose clear consciousness through the ensuing intoxication." (2) Contrary to the Roman practise of leaving the body on the cross, that of Jesus was removed and buried, the latter act in keeping with Jewish law and custom. These exceptions, however, exhaust the incidents in the crucifixion of Jesus that might point to a participation therein, and a regulation thereof, by Jews or Jewish law. The mode and manner of Jesus' death undoubtedly point to Roman customs and laws as the directive power.

From the Jewish point of view, the crime of which Jesus was convicted by the Jewish priests is greatly in doubt (see Jesus). If it was blasphemy, lapidation should, according to Jewish law, have been the penalty, with suspension from the gallows after death (Mishnah Sanh. iii. 4; Sifre, iii. 221). Nor were any of the well-known measures taken (Sanh. vi.)

which provide before execution for the contingency of a reversal of the sentence. Neither was the "cross"—*i. e.*, the gallows for hanging—constructed as usual after lapidation, and as ordained in Sanhedrin vi. 4. His hands were not bound as prescribed; the "cross" was not buried with his body (Maimonides, "Yad," Sanh. xv. 9). Whether the Jewish law would have tolerated a threefold execution at one and the same time is more than uncertain (Sanh. vi. 4; Sifre, ii. 221).

The greatest difficulty from the point of view of the Jewish penal procedure is presented by the day and time of the execution. According

Date of to the Gospels, Jesus died on Friday,
Jesus' Cru- the eve of Sabbath. Yet on that day,
cifixion. in view of the approach of the Sabbath (or holiday), executions lasting until late in the afternoon were almost impossible (Sifre, ii. 221; Sanh. 35b; Mekilta to Wayakhel). The Synoptics do not agree with John on the date of the month. According to the latter he died on the 14th of Nisan, as though he were the paschal lamb; but executions were certainly not regular on the eve of a Jewish holiday. According to the Synoptics, the date of his death was the 15th of Nisan (first day of Passover), when again no execution could be held (Mishnah Sanh. iv. 1; and the commentaries; Yer. Sanh. ii. 3; Yer. Bez. v. 2; Ket. i. 1). This discrepancy has given rise to various attempts at rectification. That by Chwolson is the most ingenious, assuming that Jesus died on the 14th, and accounting for the error in Matthew by a mistranslation from the original Hebrew in Matt. xxvi. 17 (כרב וקרנ), due to the omission of the first כרב; see his "Das Letzte Passamahl Christi," p. 13). But even so, the whole artificial construction of the law regarding Passover when the 15th of Nisan was on Saturday, attempted by Chwolson, would not remove the difficulty of an execution occurring on Friday = eve of Sabbath and eve of holiday; and the body could not have been removed as late as the ninth hour (3 p. m.). Bodies of delinquents were not buried in private graves (Sanh. vi. 5), while that of Jesus was buried in a sepulcher belonging to Joseph of Arimathea. Besides this, penal jurisdiction had been taken from the Sanhedrin in capital cases "forty years before the fall of the Temple."

These facts show that the crucifixion of Jesus was an act of the Roman government. That it was customary to liberate one sentenced to death on account of the holiday season is not corroborated by Jewish sources. But many of the Jews suspected of Messianic ambitions had been nailed to the cross by Rome. The Messiah, "king of the Jews," was a rebel in the estimation of Rome, and rebels were crucified (Suetonius, "Vespas." 4; "Claudius," xxv.; Josephus, "Ant." xx. 5, § 1; 8, § 6; Acts v. 36, 37). The inscription on the cross of Jesus reveals the crime for which, according to Roman law, Jesus expired. He was a rebel. Tacitus ("Annales," 54, 59) reports therefore without comment the fact that Jesus was crucified. For Romans no amplification was necessary. Pontius Pilate's part in the tragedy as told in the Gospels is that of a wretched coward; but this does not agree

with his character as recorded elsewhere (see Schürer, "Gesch." Index, *s. c.*). The other incidents in the New Testament report—the rending of the curtain, darkness (eclipse of the sun), the rising of the dead from their graves—are apocalyptic embellishments derived from Jewish Messianic eschatology. The so-called writs for the execution (see Mayer, "Die Rechte der Israeliten, Athener, und Römer," iii. 428, note 27) are spurious.

E. G. II.

CRUELTY: The disposition to inflict pain and to gloat over suffering. Widely prevalent among, if not characteristic of, savages and barbarians, it has influenced their treatment of strangers, enemies, and evildoers. Primitive races, however, are strongly inured to pain, being early in life trained to endure it unflinchingly, as the various initiatory rites at puberty in universal vogue among them show (see Heinrich Schurtz, "Altersklassen und Männerbunde," pp. 92 *et seq.*, Berlin, 1902). Moreover, lack of imagination incapacitates them for measuring the suffering entailed on others (Tylor, "Anthropology," p. 408, New York, 1897). Again, among them, as also among civilized nations of antiquity, religious notions sanctify the passion for revenge, nearly always an element of cruelty. Abel's "blood cries to heaven" (Gen. iv. 10, Hebr.). The deity itself is injured and offended, and the land is defiled by bloodshed (see Schneider, "Die Naturvölker," 1886, i. 86; Leopold Schmidt, "Die Ethik der Alten Griechen," ii. 309 *et seq.*, Berlin, 1882; Tiele, "Vergelijkende Geschiedenis van de Egypt. en Mesopotam. Godsdiensten," p. 160; "Tr. Soc. Bibl. Arch." viii. 12 *et seq.*).

The "lex talionis," universally observed by savage and semi-civilized peoples, illustrates this principle. Injury had to be requited by corresponding injury. "Eye for eye, tooth for tooth, hand for hand" (Ex. xxi. 24). Literally construed at first, the provisions of this law in course of time, and

"Lex Talionis." with the refinement of feeling accompanying progressing civilization, were translated into pecuniary assessments in compensation of injuries.

Cruel practises connected with the observances of religion, such as mutilations, the cutting of gashes (see CURTINGS), the burning of children to propitiate Moloch, and human sacrifice generally, rest originally upon a similar idea.

The ancient Hebrews in their primitive state were in disposition little different from their neighbors and cognates. In the period of "ignorance" the pre-Mohammedan Arabs deemed "revenge to be the twin brother of gratitude," and not to visit an offense upon the offender was considered cowardly and ignoble (see Goldziher, "Muhammedanische Studien," 1889, i. 15 *et seq.*). The books of Judges and Samuel prove that the Israelitish invaders of Canaan displayed in their dealings with their enemies the temper of their day. The bodies of those slain in battle were stripped of everything valuable. Occa-

sionally their heads were cut off as trophies (I Sam. xvii. 51, 54; xxxi. 9; II Sam. xx. 22). Among the Assyrians this was the rule (compare II Kings x. 6 *et seq.*). In later times, however, decent burial was accorded to dead enemies (Ezek. xxxix. 11), or they were cremated (Isa. xxx. 33).

Captives were shown little leniency. To mark them as conquered, they were subjected to the humiliation of being trodden under foot (Joshua x. 24; compare Ps. cx. 1). This was also the

Treatment of Captives. custom among the Assyrians and Egyptians. Still, excessive cruelties are only reported in cases where fury had been aroused by the length of the pursuit (Judges i. 6 *et seq.*). The most atrocious instance of cruelty in requital of previous insult is afforded, if the text is correct, by David's dealing with the Ammonites (see Klostermann's commentary on II Sam. xii. 31). Amaziah is reported to have hurled ten thousand captive Edomites from a rock (II Chron. xxv. 12). As a rule, however, the Hebrews did not go to such extremes, and, compared with the Assyrians, were merciful. The latter impaled their prisoners, or flayed them alive, or tore out their tongues (see, for the case of the Elamite prisoners, Koyundjik Collection, slabs 48-50; Kaulen, "Assyrien und Babylonien," 5th ed., p. 265). The Philistines put out Samson's eyes (Judges xvi. 21). Nahash, the king of the Ammonites, threatened the Jebusites with the blinding of their right eyes (I Sam. xi. 2). King Zedekiah was blinded by the Chaldeans (II Kings xxv. 7). Among the Chaldeans and Persians, and even now in Eastern countries, this procedure is not exceptional. Ezek. xxiii. 25 alludes to the cutting off of the noses and ears of captives. Rings were put through the under lips of captured kings to fasten the chain to (חֲתָמָה, "S. B. O. T." Ezekiel, p. 133). Atrocious barbarities against women big with child are mentioned as having occurred in the ferocious civil wars of the Northern Kingdom (II Kings xv. 16), but these, as well as the dashing to pieces of children, seem to have been common among Syrians, Ammonites, Assyrians, and Chaldeans (II Kings viii. 12; Amos i. 13; Ps. cxxxvii. 9 *et seq.*). If not killed, the captives were led away "naked" (see *Coat*) and fettered, to be sold into slavery (Num. xxxi. 26; Deut. xx. 14; Isa. xx. 4).

The country of the enemy was devastated; its trees were cut down, its wells wrecked, its cities and hamlets sacked and razed; tribute was levied and hostages demanded (II Kings iii. 19, 25; xiv. 14).

In the earlier civil code of the Hebrews, the "book of the Covenant" (Ex. xxi.-xxiv.), the law of retaliation is still fundamental. Mutilations were thus legalized. The Deuteronomic legisla-

Stages of Progress. tion applies this principle in the case of false witnesses (Deut. xix. 16 *et seq.*). A woman guilty of a certain

indecent act lost her hand (Deut. xxv. 11 *et seq.*). Similar and severer provisions are also found in the recently discovered code of Hammurabi (see Winckler, "Die Gesetze Hammurabi," Leipzig, 1902); and the punishments provided by the laws of other ancient and modern Oriental nations show still greater cruelty. Adulterous women had their noses cut off, while the co-respondent was condemned to a thou-

sand stripes (Diodorus Siculus, i. 78). The statement of Josephus ("Vita," §§ 33, 34) that rebels and traitors suffered the loss of one or both hands reflects the ferocity of the civil war.

The primitive severity of the earlier practise, however, was tempered by clemency. This appears clearly in the provisions for carrying out the punishment of stripes. The number of stripes must not exceed forty (Deut. xxv. 1-4; in Hammurabi's code the maximum is fixed at fifty), and they must be administered before a proper court officer. As also among the Egyptians (see Wilkinson, "Ancient Egypt," ii. 41 *et seq.*), the stripes were applied to the back of the delinquent, not, as is the cruel Eastern practise, to the soles of the feet. The instrument employed was in early times a rod or switch (Prov. x. 13). The later rabbinical authorities prescribe the use of a plaited leather strap, construing "bikoret," in Lev. xix. 20, to indicate this (see Gesenius, "Th." i. 234), and limit the number of stripes to thirty-nine (Mak. iii. 10; Josephus, "Ant." iv. 8, § 21). The use of "scorpions" ("akrabim"), mentioned in I Kings xii. 11, 14; II Chron. x. 11, 14, was, as the context shows, regarded as excessively cruel, and must have been rare. They were pointed and knotty rods, or whips with sharp iron points (Gesenius, *l.c.* ii. 1062). Beating with bags filled with sand and pointed pieces of iron was another method of punishment (Ephraem Syrus). The Syrians seem to have had recourse to similar instruments of torture (II Macc. vii. 1). Later, the Romans adopted the use of whips weighted with rough, heavy stones, or lead balls (Cicero, "Cluent." 63). Thorny rods or switches were also occasionally used (Judges viii. 7, 16; compare Prov. xxvi. 3).

Other indications of the gradual refinement of feeling are revealed in the fact that the slave ultimately acquired a right to protection against bodily injury, and that the master who caused his death by cruel beating was punished (Ex. xxi. 21, 26-27). If, however, death was not immediate, the owner was considered to have injured his own

Treatment of Slaves. property. Philo regards the provision which grants freedom to the maimed slave as based less upon the principle of compensation than upon the desire to protect the slave against further insult, the master naturally finding a constant cause of irritation in the slave incapacitated for full work in consequence of his rash or cruel treatment. The law also modified to a considerable extent the rights of vengeance and *ASYLUM* (Ex. xxi. 13, 14), and provided for the protection of those guilty of manslaughter.

With what abhorrence the Prophets viewed the atrocities committed in the spirit of the savage in earlier times is clear from the opening chapters of Amos. They denounced the cruel rites—mutilations, human sacrifices—sanctioned by the religion of Canaan, and modified barbarity through the potent leaven of mercy and humanity. As a punishment the invasion of a "cruel" people is announced, and the detailed description shows that the Jewish people had outgrown the temper which regarded such atrocities as natural (Jer. vi. 23, 24; Deut. xxxii. 32, 33).

In the later books cruelty is expanded to include

unfriendly and unnatural conduct (Prov. xi. 17) on the part of one from whom, by reason of friendship or consanguinity, consideration is to be expected (Job xxx. 21). As symptoms of cruelty, anger and jealousy are enumerated (Prov. xxvii. 4).

Later Judaism, in interpreting the Mosaic legislation, proceeded upon the theory that any unnatural act was cruel. The seething of the kid in the milk of its mother, the wearing of wool and linen together, the yoking of ox and ass together, the sowing of different seeds

Attitude of Later Judaism. "De Specialibus Legibus"). Humanity, therefore, was declared to be the

sister of piety, and was inculcated in many injunctions of the Mosaic code; it is befitting the king (*idem*, "De Vita Moysis," ii. 1, 2); it is to be shown to strangers as readily and fully as to fellow countrymen; it is due to the demented and to dumb creatures (*idem*, "De Caritate"). The "lex talionis" was modified (Mek., Mishpatim, 8). Capital punishment was virtually abolished in all cases where malice prepense was not established beyond all doubt.

Judges who pronounced the death sentence too frequently were stigmatized as shedders of blood (Mak. 7a), and this in spite of the conviction that "misapplied clemency leads to unjustifiable cruelty" (Lam. R. vii. 16). And when the sentence of death was carried into effect tender regard was extended to the body of the executed (Sanh. v. 3; Babli 55b). Decapitation by the sword was for this reason declared to be an indignity (נְיוּל, B. B. 8b). Needless exposure of the body was looked upon with the same disfavor; a woman undergoing lapidation was not uncovered (Yer. Soṭah iii. 19b, end). This consideration was shown the dead in all cases, the view prevailing that until the body is inhumed, or, according to others, until decomposition sets in, the soul hovering over the abandoned frame feels whatever insult or injury is offered (see BODY IN JEWISH THEOLOGY). R. Akiba inhibited exhumation as an act of cruelty (B. B. 154a).

Philo ("In Flaccum") gives a vivid account of the outrages perpetrated by the Romans upon the living as well as upon the dead. Some cruelties commonly practised by the Romans seem never to have been known to the Hebrews. The exposure of children, and the burying alive of undesired daughters, common among pre-Mohammedan Arabs, were quite unknown to the Hebrews.

In rabbinical Judaism the idea of "cruelty" includes also an unforgiving temper. It thus came to signify what has been termed "the cruelty of civilized men" (Lazarus, "Ethik des Judentums," i. 308), such as calumny, slander, putting to shame, calling men by nicknames, slighting their honor. Characteristic of the one not cruel was the readiness to "forego one's due" (מַעְבִּיר עַל מְדוּתוֹ), and this disposition is deemed essential to the attainment of forgiveness of one's own sins (Yoma 23a). One that in public puts a man to shame is likened to the murderer (B. M. 58b, 59a). One that will not forgive his fellow is cruel: מִנֵּן שֶׂאֵם לֹא מַחֵל שֶׁהוּא אֲכֹרִי (B. K. 92a; see also Maimonides, "Yad," De'ot, vi. 6; Teshubah, ii. 10). Nimrod, Goliath, Haman, Cain,

and others are remembered as examples of cruelty (Pesik. ix. 78b). Tax-gatherers are typically cruel, as also among the Mohammedans (B. K. x. 1-2; Goldziher, *ib.* i. 19, note; Philo, "De Specialibus Legibus"; see PUBLICANS). Prophetic and rabbinical Judaism, in thus enlarging the scope of "cruelty" to embrace not merely the infliction of physical, but also of mental and moral suffering, and in denouncing a haughty, heartless, unforgiving, grasping disposition as "cruel," has discarded utterly the principle of retaliation. The Deuteronomic laws (Deut. xx. 7; Josh. vi. 21) concerning the annihilation of the seven aboriginal nations of the land, if they were ever carried out to the letter, were written in the spirit of holy warfare against idolatry (see BAN) at a time when cruel temper was universally prevalent. Later Judaism condemns cruelty in whatever form. Its abhorrence of barbarity is illustrated also by the prohibition against cutting out a piece of flesh from a living animal (אָכַר מִן הַחַיִּי), which mutilation was a well-established practise among the Romans and many other ancient peoples (Hul. 101b *et seq.*). This prohibition does not rest upon ritual grounds, but is based on moral repugnance; the Noachides are also under this prohibition. The "pound of flesh" in Shakespeare's "Merchant of Venice" is an impossibility according to Jewish law, though the Roman Law of the Twelve Tables legalizes such security. The whole "Shylock" story originated in old Aryan mythology.

That evil-doers were not treated without cruelty is apparent from the frequent allusions in the Biblical books to the terrors and sufferings incidental to imprisonment (II Sam. iii. 34; Job. xiii. 27; Ps. lxxxviii. 7, cv. 18, cvii. 10; Isa. xxiv. 22; Zech. ix. 11). Though prisons existed (Jer. xxxvii. 15, 20), abandoned cisterns filled with mire were used for the detention of men that had incurred the displeasure of the mighty (Jer. xxxviii. 6). Ill fed (I Kings xx. 27), the prisoners were often bound with chains and ropes (Job xxxvi. 8; Ps. cxlix. 8); the feet especially were fastened together with brass (Judges xvi. 21; II Sam. iii. 34; Jer. lii. 11) or iron links (Ps. cv. 18; Prov. vii. 22). Often the feet were put into the stocks or blocks ("sad," Job xiii. 27, xxxiii. 11), while in other cases a veritable instrument of torture was used, the "mahpeket," a wooden contrivance so arranged as to force the body into unnatural contortions. The neck, too, was constrained by a ring ("zinok") or iron collar (Jer. xx. 2; Sirach vi. 30).

The Romans, however, were past-masters in the art of applying these various expedients. Under the non-Hebrew designation קוֹלָר, the Latin "collare," the rabbinical books recall a neck-ring largely in use to render prisoners helpless (Eḥa Rabb. Proem. xxxiv.). Characteristic in this connection as showing the dread of the inhumanities of non-Jewish tormentors is the prohibition (Tosef., 'Ab. Zarah, ii. 4) "not to sell them either weapons or these devices for restraining prisoners"; *i.e.*, קוֹלָרִין (ed. Zuckermann wrongly, כַּבְלִין (קוֹלָרִין) and סָרִין שֶׁל־שְׁלֹאֹתָ שֶׁל בְּרוֹץ (iron chains).

κ.

E. G. H.

CRUELTY TO ANIMALS: The Bible contains no comprehensive principle regarding the rights

of animals. In the Biblical account of creation man is made sole ruler over the lower creatures, with the right to use them for whatever purpose he desires (Gen. i. 28; Ps. viii. 6-8). Still, in the legislative portions of the Bible there are many laws concerning the rights of dumb creatures; so many, in fact, as to justify the assumption of the Rabbis that kindness to animals is a Biblical injunction (צער דאורייתא בעלי חיים דאורייתא; B. M. 32b). The prohibition against eating a limb or flesh cut from a living animal was included by the Rabbis in the seven NOACHIAN LAWS, and the act was thus forbidden not only to Israelites, but also to other nations.

Animals must not be tortured unnecessarily. The ox must not be muzzled while threshing (Deut. xxv. 4), but must be free to eat of the corn while working, as the human laborer is permitted to do (Deut. xxiii. 25, 26; B. M. 87b). The Rabbis considered the term "ox" to be a generic

Precepts of term including all animals. Nor does **Con-** it matter whether the animal belongs **sideration.** to a Jew or not; the Jew who employs it in threshing must not muzzle it (B. M. 90a; Maimonides, "Yad," Sekirut, xiii. 3; Shulhan 'Aruk, Hoshen Mishpat, 338; compare I Cor. ix. 9).

It is forbidden to emasculate an animal, whether clean or unclean, although when emasculated it may, if clean, be used for food (Lev. xxii. 24; Shab. 111a; Shulhan 'Aruk, Eben ha-'Ezer, 5, 11). It is forbidden to pair, or couple in doing any kind of work, animals of different species, especially to pair a wild with a tame animal (Lev. xix. 19; Deut. xxii. 10, and Sifre *ad loc.*; B. K. 54b; Kil. viii. 1, 2).

Mother and young must not be slaughtered on the same day (Lev. xxii. 28). When the paternity of an animal is known, or can be ascertained, it is also forbidden to kill father and young on the same day. Although the transgressor of this commandment is liable to the punishment of flagellation, the animals may be used for food. The seller, if he knows that they are bought to be slaughtered on the same day, must notify the buyer of the relationship of the animals when he sells a mother with its young—for instance, if sold directly before the holidays, when any one buying cattle is presumed to intend to slaughter them immediately (Hul. 83a; "Yad," Shehitah, xiii.; Shulhan 'Aruk, Yoreh De'ah, 16).

It is forbidden to take both mother and young from a nest. When the mother is liberated the young may be appropriated (Deut. xxii. 6). This law applies only to clean, undomesticated birds, but if one has domesticated geese, pigeons, etc., he need not drive off the mother when he takes the young (Hul. 138b *et seq.*; Yoreh De'ah, 292).

Hunting was discouraged by the Rabbis (see Hul. 60b), and the later authorities forbid

Hunting. its pursuit entirely if merely for sport (Ezekiel Landau, "Noda' bi-Yehudah," series ii.; Yoreh De'ah, 10).

The various regulations for the lawful killing of animals ("shehitah") are not only in harmony with the principle of the prevention of cruelty, but seem to have been dictated by it. These laws have no definite Scriptural origin, although the Rabbis take

as a basis for them a Biblical expression (Deut. xii. 21). While the Rabbis themselves do not assign the prevention of cruelty to animals as the reason for the regulations (see Maimonides, "Moreh Nebukim," iii. 26, 48), many of their provisions—for instance, that the knife must be sharp, smooth, without any perceptible notch, and must be drawn, not pressed, against the throat of the animal (see SHEHITAH)—were obviously instituted for the purpose of lessening pain. In spite of the attempts made in various European states in the last fifty years to forbid the Jewish mode of shehitah on the ground of cruelty, this institution of Judaism still stands vindicated as far more humane than any of the modes employed by non-Jews (see Dembo, "Slaughtering of Animals").

The Jewish law not only forbids cruelty, but also enjoins kindness, to animals. "If thou see the ass of him that hateth thee lying under his burden, and thou wouldst forbear to unload him, thou shalt surely help with him" (Ex. xxiii. 5). The expression "of him that hateth thee" is explained by the Rabbis to refer to an irreligious Jew or to a non-Jew (B. M. 32b; "Yad," Rozeah, xiii.; Hoshen Mishpat, 272).

If an animal falls into a pit on the Sabbath, food must be provided for it there for the day, and it must be removed in the evening. Should the animal be in danger of not being able to live through the day, the removal of vessels and tools from one place to another in order to save it is permitted (Shab. 128a; "Yad," Shabbat, xxv. 26; Oraḥ Hayyim, 305, 19). It is also permitted to ask a non-Jew to milk one's cow on the Sabbath when she is suffering from an oversupply of milk (Asheri to B. M. ii. 29). It is, moreover, lawful to cut the nails of an animal, or to comb it, or to heal it, on the weekdays of the holidays (M. K. 10a; Rashi *ad loc.*; "Yad," Shebitot Yoni-Tob, viii. 15; Oraḥ Hayyim, 536, 1-3).

Beasts of burden and all domestic animals must rest on the Sabbath day (Ex. xx. 10, xxiii. 12; Deut. v. 14). It is not permitted to ride an animal on the Sabbath day, or to ride in a wagon drawn by animals, even when the driver is a non-Jew (Yer. Bezaḥ v. 2; Oraḥ Hayyim, *l.c.* 18, Isserles' gloss).

The Rabbis enlarged upon the principle of kindness to animals found in these Mosaic injunctions, by instituting laws to regulate man's dealings with the lower creatures. They teach that before an Israelite sits down to his meal his animals must first be provided with food (Ber. 40a; "Yad," 'Abadin, ix. 8). Some of the Rabbis are of the opinion that no one is permitted to buy animals unless he is able to support them (Yer. Ket. iv. 8). The ethical value of this precept is brought out with great emphasis in the haggadic portions of the Talmud. Moses and David were chosen leaders of Israel because as shepherds they had shown themselves kind and sympathetic to the lower animals (Midrash Rabbah Ex. ii. 3). The angel of God took the part of the dumb creature, demanding of Balaam why he smote his ass (Tan. and Yalk. to Num. xxii. 32). "A righteous man regardeth the life of his beast,

but the tender mercies of the wicked are cruel" (Prov. xii. 10). God, the Righteous, has pity on animals as well as on man, inasmuch as He saved the animals together with Noah from the Flood (Yalk. *ad loc.*, and to Noah, 56). Rabbi Judah I was punished with bodily suffering during many years because, when a young calf that was being led to slaughter hid its face in his skirts, he said, "Go! for this purpose wast thou created!" When, after many years of suffering, he showed mercy to a nest of mice which his maid wished to destroy, he was again restored to health (B. M. 85a). Standing not "in the way of sinners" (Ps. i. 1) is explained as a prohibition against associating with hunters who plague animals by urging dogs against them ('Ab. Zarah 18b; see Rashi). Compare CIRCUS; SHEHITAH.

J. H. G.

CRUSADES, THE: Expeditions from western Europe to recover Jerusalem and the holy sepulcher from the control of the infidel. The undisciplined mobs accompanying the first three Crusades attacked the Jews in Germany, France, and England, and put many of them to death, leaving behind for centuries strong feelings of ill will on both sides. The social position of the Jews in western Europe was distinctly worsened by the Crusades, and legal restrictions became frequent during and after them. They prepared the way for the anti-Jewish legislation of Innocent III., and formed the turning-point in the medieval history of the Jews. The outbursts did not come unexpectedly. Soon after Peter the Hermit and Urban II. had aroused the enthusiasm of French chivalry at the Council of Clermont in 1094, Godfrey de Bouillon declared that he would avenge the blood of Jesus on that of the Jews, and

leave none of them alive, while his companions threatened to exterminate the Jews if they would not become converted. The Judæo-French communities accordingly sent letters to those on the Rhine, who thereupon appointed a fast-day to avert the evil (Jan., 1096); and when Godfrey de Bouillon came to Cologne and Mayence each community made him a present of 500 silver marks to secure his protection. When Peter of Amiens arrived with the crusaders at Treves early in 1096, he did not directly arouse the people against the Jews, but left a general ill will against them throughout Lorraine, especially through the influence of the knight Volkmar, who declared that he would not leave the kingdom until he had slain at least one Jew. In the spring of 1096 twenty-two Jews were slain at Metz, and on May 3 the crusaders and accompanying rabble attacked the Jews of Speyer, slaying eleven of them and only being restrained by the exertions of Bishop John from putting them all to death in the synagogue. On May 18 the Jews of Worms were all slain except a few who were forcibly baptized or who took refuge with the bishop. Their houses were destroyed, and even the corpses denuded. Many slew themselves rather

than fall into the hands of the mob. The bishop's palace was stormed a week later, and all those within it were put to death. The number of the slain is said to have amounted to 800, though the extant list of names reaches only 400 (Salfeld, "Martyrologium," p. 107). One of the richest Jewesses, named Minna, when surrounded by the mob and implored by some of her friends among the nobles to accept baptism, resolutely refused and was put to death. Several were drowned, and Mar Shemariah with his whole family was buried alive amid the jeers of the mob,

Jewish Outbreaks During the First Crusade, 1096.

who nevertheless during the entombment offered in vain to grant them safety if they would become converted.

On the same day Count Emicho arrived at Mayence with a numerous band of crusaders, but he was not admitted by the archbishop Ruthard, who had promised protection to the Jews. Two days later, however, Emicho forced admission through a side gate, and, notwithstanding the armed

Mayence. defense of the Jews, succeeded in destroying them all except Kalonymus, the president of the congregation, and fifty-three others, who hid themselves in the treasure-house of the cathedral. A number of Jews who had defended themselves all day in a fortified position found it untenable as night came on, and, rather than fall

into the hands of the enemy, killed themselves. The corpses after being stripped were cast into nine graves; they are said to have numbered 1,014. Mar Isaac ben David, after having submitted to baptism, burned down his own house and the synagogue and perished in the flames, because it had been rumored that the Christians intended to turn the synagogue into a church. Kalonymus and his 53 companions were taken by bishop Ruthard in boats to Rüdesheim and kept there for some time; but on June 1 he declared he could not protect them unless they submitted to baptism. They determined to slay themselves rather than do this, and Kalonymus put his own son Joseph to death, and then, wild with grief, attempted to kill the archbishop, but was prevented and killed.

The crusaders again attacked the houses and synagogue of the Jews of Cologne on May 30; but here the citizens protected the Jews in their own houses until Archbishop Hermann, on June 3, sent them for safety to seven neighboring villages, Neuss, Wevelinghofen, Altenahr, Xanten, Geldern, Mörs, and Kerpen. The crusaders followed them to these places, killing 200 in Neuss and Altenahr, in several cases throwing old women and young children into the river (Salfeld, "Martyrologium," p. 133); forcing them to be baptized at Geldern and Kerpen; while in Wevelinghofen, Altenahr, and Xanten the Jews slew themselves rather than change their faith. The 300 Jews of Cologne who found themselves at Altenahr selected five men to slay the rest. In the month of June the crusaders reached Treves, and some of the Jews at once slew themselves, a number of Jewesses throwing themselves into the river. The rest betook themselves to the palace of Archbishop Egbert, who attempted in a sermon to persuade the people to spare the Jews, but was himself maltreated and besieged in his palace for a week, at the end of which he told the Jews there was no hope for their lives but in baptism. When they still remained obdurate some of them were exposed by him to the crusaders, who immediately slew them. The rest thereupon accepted baptism. The same fate befell the Jews of Regensburg, while those of Magdeburg were expelled. The crusaders on their march through Bohemia forced the Jews to become baptized, killing those who refused, notwithstanding the remonstrances of Bishop Cosmas. Next year, however, on the return of Emperor Henry from Italy, he granted them permission to revert to their ancestral faith (Pertz, "Monumenta," ii. 181), notwithstanding the protests of Pope Clement III. (Jaffe, "Regesta," No. 5336). The Jews of the Rhine district were decimated: it has been calculated that about 4,000 were killed or slew themselves. The few survivors of Mayence who had taken refuge at Speyer did not return to their old homes until 1104, when a new synagogue was dedicated (September 23). When the crusaders at last stormed Jerusalem, July 15, 1099, they drove all the Jews into one of the synagogues and there burned them alive.

During the preparations for the Second Crusade a narrow-minded monk named Radulph preached the Cross in the Rhine valley, and declared that the Jews should be slain as the enemies of the Christian

religion. BERNARD OF CLAIRVAUX protested energetically against the unchristian behavior of Radulph, and only a few isolated cases of outrage occurred. The Jews were

Second Crusade: expelled from Magdeburg and Halle.

1145-47. Bernard went to Germany to preach the Cross, and met the monk Radulph in open disputation at Mayence in the beginning of November, 1146, but failed to influence the people in favor of the Jews. He accordingly addressed a letter to the peoples of western Christendom, protesting against the persecution of the Jews. Notwithstanding this, when the crusaders came to Würzburg they slew the rabbi, Isaac ben Eliakim, and about twenty-one men, women, and children, whose bodies were buried by the bishop in his garden. This was ultimately purchased by Hezekiah, the brother of the rabbi, as a graveyard for the Jews (see WÜRZBURG).

At the coronation on Sept. 3, 1189, of Richard I., before he started for the Third Crusade, a severe riot occurred, and after he had left the

Third Crusade: country the crusaders who were preparing to follow him attacked, with the aid of the populace, the Jews at Lynn, Stamford (March 7), Bury St.

Edmunds (March 18), Colchester, Thetford, and Ospringe. The chief tragedy, however, occurred at York on the night of March 16, 1190, when 150 Jews of all ages, headed by Rabbi Yom-Tob of Joigny, immolated themselves to escape slaughter or baptism (see YORK).

Before the Crusades the Jews had practically a monopoly of trade in Eastern products, but the closer connection between Europe and

Results. the East brought about by the Crusades raised up a class of merchant traders among the Christians, and from this time onward restrictions on the sale of goods by Jews became frequent (Höniger, in "Zeit. Gesch. Juden Deutsch." i. 94 *et seq.*). The religious zeal fomented by the Crusades burned as fiercely against the Jews as enemies of Christ as against the Moslems. Thus both economically and socially the Crusades were disastrous for European Jews.

CRYPTO-JEWS: Jews professing another religion but practising Jewish rites in secret in their own homes. There was some tendency toward this even in early days, as is shown by the attempts of certain Jews to avoid being taken for such (see Josephus, "Ant." xii. 5, § 1; compare I Macc. i. 15); but the first wide-spread adoption of the practise appears to have been after the Almohade persecutions in Spain in 1146. The father of Maimonides is said to have nominally embraced Islamism at this time, and he was doubtless followed by others. Later, in Spain, after the persecutions of 1391, a whole body of Spanish Jews formally adopted Christianity, but observed Jewish rites in their homes. These were known as **MARANOS** or, in the

Balearic Islands, **CHUETAS**. Officially they were known as "New Christians," and there was considerable legislation directed against them in both Spain and Portugal and in their colonies, the chief activity of the Inquisition being directed against them. It is stated that Maranos are to be found even at the present day, especially at Covilhão in Portugal.

It also appears that there are, or have been, several classes of Crypto-Jews in Moslem lands; thus the ancestors of the **DAGGATUNS** probably kept up their Jewish practises a long time after their nominal adoption of Mohammedanism. This was also done by the Maimins of Salonica (Grätz, in "Monatschrift," Feb., 1884), and near Khorassan there still remain a number of Jews known as the "Jedid al-Islam," who were converted to Mohammedanism half a century ago ("Il Vessillo Israelitico," April, 1884).

J.

CRYSTAL. See **GLASS**.

CSEMEGI, KARL: President of the Hungarian Supreme Court of Judicature; born in Csongrad May 3, 1826; died March 18, 1899. Csemegi received his early education in the schools of Szegedin and Budapest. By order of Count Elemer Batthyányi he organized a battalion of infantry in the Hungarian war of independence of 1848, at the head of which he fought throughout the whole war. After the conclusion of the campaign in the Bácska and Banát districts, he laid down his arms at Lugos, and as punishment was placed in an Austrian regiment, but was soon released on account of ill health. During the absolutist era he had a large law-office in Arad, but was compelled by the chicanery of Austrian officials to transfer it to Butyin in Rumania.

After the restoration of the former constitution, the Hungarian minister of justice, Balthasar Horvath, called him into the ministry, where a wide field presented itself for the employment of his ability. From ministerial secretary he became state secretary, in which capacity he proposed and codified chapter iv. of the laws of 1869, on the legal power and authority of judges. The incorporation of the judiciary of Fiume with that of Hungary was also his work. His epoch-making achievement in the judicial administration of Hungary was, however, the codification of the criminal law on a modern basis. Through this work he succeeded in fundamentally improving legal procedure in Hungary. Especially important was the comprehensive statement which he annexed to the code explaining the basic principles that underlie it, which statement contains a mass of legal knowledge still of much value. His influence left a distinct impress on the science of criminology, which developed rapidly after the adoption of his code.

Csemegi became president of the Supreme Court in 1879, and founded the Society of Hungarian Jurists, which to-day has among its members the most eminent jurists of modern Hungary. He was decorated with the Cross of the Order of St. Stephan of Hungary in 1878, and in 1882 became privy counselor. Twelve years later he resigned his position as president of the Supreme Court. He was granted the honorary degree of LL.D. by the juridical faculty of the University of Budapest in 1896.

Csemegi was a convert to Christianity. His literary work includes: "A Jogvesztés Elmélete és az Államjog," Budapest, 1872; "A Magyar Bünvádi Eljárás Szervezetének Indokai," Budapest, 1882; "Magyar Bünvádi Eljárás a Törvényszékek Előtt," Budapest, 1883; "Az Egyházi Holtkéz," Budapest, 1897. The French government had the statement of principles which he subjoined to the Hungarian criminal code translated into French under the title "Code Pénal Hongrois des Crimes et des Délits," Paris, 1885.

CSILLAG, ROSA: Hungarian opera-singer; born about 1840. She attracted much attention in the chorus of the Hungarian National Theater at Budapest. Trained by Professor Proch, she made her first appearance in 1858 as *Fides* in Meyerbeer's "Le Prophète," in the court opera-house of Vienna, where she delighted her audiences with her beautiful mezzo-soprano voice. Until 1873 Csillag belonged to the cast of the Vienna Royal Opera-House, and was a general favorite. On her tours also she met with much success. Her husband was the celebrated prestidigitator Hermann. When her voice began to fail she became singing teacher at the Vienna Conservatoire.

CSILLAG, THERESE: Hungarian actress; born at Duna-Adony May 17, 1862. For many years she was a popular comedienne at the National Theater in Budapest. At the age of thirteen she attended the dramatic school in that city. In 1879 she was engaged at the National Theater, where she played in ingénue rôles up to 1898. Nearly all Hungarian playwrights of her day wrote special rôles for her, among them being Gregor Csiky, in whose plays she always excelled. Since 1899 she has been engaged at the Vígsház in Budapest. She has embraced the Christian faith.

CUBA: An island in the Atlantic Ocean, the largest of the West Indian groups. The relations of the Jews with the island of Cuba date from the discovery of the island by Columbus in 1492, several Jews having accompanied him on his first voyage (see **AMERICA**, **THE DISCOVERY OF**). On Nov. 2, 1492, Columbus sent Luis de Torres, together with a companion, into the interior to ascertain the character of the island and of its people, and to find its king. Kayserling ("Christopher Columbus," p. 95) asserts that Luis de Torres settled in Cuba and died there.

The records of the Inquisition in America, thus far published only in fragments, are the chief sources of information about Jews in Cuba. Jewish women, forcibly baptized, and sent to the West Indies by the Spanish authorities, seem to have been among the earliest settlers. In 1613 the Inquisition wrung from Francisco Gomez de Leon of Havana the confession that he was a Jew; as a consequence he underwent martyrdom for his faith, and the Inquisition confiscated his fortune, amounting to 149,000

pesos. About 1627 the Inquisition seized Antonio Mendez, Luis Rodrigues, and others on the charge of being Jews. About 1636, 150,000 pesos in gold was extorted from three citizens of Havana on the charge of Judaizing. Their names were Blas de Paz Pinto, Juan Rodrigues Méza and Francisco Rodriguez de Solis; and they appear to have been among the most opulent men in the West Indies. The trial of Gabriel de Granada, about 1642, evoked a reference to an uncle, Miguel Nuñez de Guerta, alias Huerto, who was supposed to be in Havana at this time, and whose bones in 1649 were used by the Inquisition for his execution in effigy. About the same time Luis Mendez de Chaves, Luis Gomez Barreto, and Manuel Alvarez Prieto, of Havana, were in the clutches of the Inquisition on similar charges.

The Portuguese reconquest of Brazil about this period, which compelled thousands of Jews to leave the country, undoubtedly augmented the Jewish population in Cuba. Accordingly, about this time the number of charges of Judaizing increased, and commercial relations with Jamaica and Curaçao further augmented them. A party of the earliest settlers of New York, who arrived in that city in 1654, are supposed to have touched in the neighborhood of Cape St. Anthony, Cuba, on their way from Brazil. In 1689 Vincente Gomez Coello, a Portuguese, was denounced as a Jew in Cuba. The prosecution of Cubans on the charge of Judaizing continued into the next century. In 1712 Jacob Nuñez Lopez was denounced on this charge. In 1717

was celebrated the auto da fé in which Fray Joseph Diez Pimienta figured, an account of whose career has been published by Richard Gottheil. Pimienta lived for a considerable time in Cuba, and became a convert to Judaism, though he several times thereafter changed his faith. As late as 1783 the Inquisition claimed victims, as witness the fate of Juan Rodriguez Mexia and Antonio Santaella, of Havana. These are but a few of the many names of persons in Cuba who have been charged with Judaizing.

In recounting the history of the Jews in Cuba, it is important not to overlook their friendly commercial relations with the buccaneers, as it was customary to style the assailants of Spain's commercial monopoly in the New World, who waged for decades incessant war against her ports and her vessels; and there is reason to believe that there were some Jews among them. Cuba and Cuban waters were for a long time the principal headquarters of these predecessors of the American pirates, from whom the buccaneers differed, however, in that they waged war against Spain.

A considerable portion of Hamburg's trade with Cuba and other West Indian islands was also at this time in Jewish hands. The Jews' familiarity with Cuba and Cuban affairs, as well as their anti-Spanish sentiments, seems to have been known to the enemies of Spain. Thus, for instance, Admiral Vernon, in his expedition against Cuba in 1741, took with him a Jewish interpreter, whom he sent with messages to the governor at Santiago de Cuba in that

year. It is also known that Jacob Franks of New York was a contractor for the British government, supplying the British navy at Jamaica with provisions during the campaign which resulted in the capture, in 1762, of Havana by the British. This capture was extremely important, Havana being regarded as of enormous political and commercial value as the key to America. Cuba's material prosperity is supposed to date from this period, notwithstanding the restoration of Havana to Spain by the treaty of 1763. It is probable that Jewish houses in New York, Newport, Jamaica, Curaçao, London, Amsterdam, and Hamburg were interested in the Cuban trade in tobacco, sugar, and other merchandise, which from this date on became increasingly valuable. Moreover, about this time the population of Cuba was beneficially augmented by the influx of French settlers from Martinique and Guadeloupe, including, apparently, some Jews.

Hernando de Castro, probably a Marano, has been credited with the introduction of the culture of sugar into Cuba. Jews were also engaged in early filibuster expeditions to Cuba; for instance, in 1851.

Until almost the end of the Spanish-American war of 1898, public religious services other than those of the Roman Catholic Church were forbidden; the Inquisition, however, had been abolished in the early years of the century. Since 1881 Jews have been tolerated in Spain and her colonies. The number of Jews in Cuba had increased prior to the war, particularly through Jewish-American interest in the tobacco trade. Richard Davey, in "Cuba: Past and Present," states regarding the conditions preceding the war: "Jews in Cuba barely number 500, and are mostly of Spanish origin, and engaged in trade. A great many Jews fled to the West Indies from Spain in the sixteenth and seventeenth centuries, but few remained in the Spanish possessions. The danger was too great. Five or six of the Cuban Jewish families are reported wealthy, and are much respected, but they keep entirely to themselves." There may, perhaps, be some exaggeration in these statements. A large number of American Jews served in the American army in Cuba during the Spanish-American war, waged for the liberation of Cuba. Since the war the number of American residents has increased, and it is estimated that there are now in Cuba about 1,000 Jewish residents.

CUBIT. See WEIGHTS AND MEASURES.

CUCKOO (A. V. **Cuckow**): The A. V. rendering of שָׁהָף (shahaf) in Lev. xi. 16 and Deut. xiv. 15. In both places it occurs in the list of unclean birds. This identification, however, is only a conjecture, and there is no certain tradition to support it. The Targum transcribes the Hebrew word. The Septuagint gives *ζάπος* ("sea-gull"). The R. V. rendering is "seamew," which is accepted by Gesenius, Bertholet, and Driver in their commentaries, and by Baentsch and Lewysohn ("Zoologie des Talmuds," p. 182). The cuckoo, however, is found in Palestine, where it passes the summer. Two varieties are met with—the common and the spotted cuckoo.

E. G. H.

G. B. L.

CUCUMBER: The rendering of the Hebrew קִישְׁמִית (Num. xi. 5). There are at least two kinds of cucumbers in Palestine (Hasselquist, Groser, Post, etc.); viz., *Cucumis sativus* and *C. chate*. The former is the common green cucumber well known in the western world; and the latter is the Egyptian or hairy cucumber, which is said by Hasselquist to be "the queen of cucumbers, refreshing, sweet, solid, and wholesome." Post (Hastings, "Diet. Bible") speaks of it as doubtless one of the good things of Egypt (Num. xi. 5). "It is longer and more slender than the common cucumber, being often more than a foot long, and sometimes less than an inch thick, and pointed at both ends." The so-called "garden of cucumbers" referred to in Isa. i. 8 is the translation of מִקְשֵׁת, meaning "place of cucumbers"; i. e., a place wherein cucumbers were cultivated. The "lodge" mentioned in the same verse is the shelter of the person who kept birds away and guarded the garden from robbers.

I. M. P.

CUENCA (קִינְקָה): City in New Castile, Spain, which, after its conquest by Alfonso VII., possessed Jewish inhabitants. In the "fuero," or charter, granted to the city about 1189, the king secured to the Jews full personal protection, together with commercial privileges in every way equal to those of the Christians; and in consequence the Jewish community increased so rapidly both in size and in influence, that it was able in 1290 to pay 70,883 maravedis in taxes. The following circumstance is significant: The Jews of Cuenca refused to lend money or grain, greatly to the detriment of agriculture and industry; in consequence of which an agreement was entered into in 1326 between the city council and the Jewish community, whereby any Jew or Jewess was privileged to charge any Christian of Cuenca or its vicinity, either man or woman, 40 per cent annual interest on money or property. The prosperity and commercial activity of the Jews finally drew upon them the hatred of the populace; and in the "year of terror," 1391, the Jews suffered greatly; even the officials and other men of influence of the town participated in plundering and slaying them; many were murdered, while others either settled elsewhere or became converts to Christianity. The grandparents of the historian Joseph ha-Kohen left Cuenca, and repaired to the fortress of Huete.

M. K.

CULI, JACOB: Talmudist and Biblical commentator of the seventeenth and eighteenth centuries; died at Constantinople Aug. 9, 1732. He belonged to an exiled Spanish family, and was the grandson and pupil of Moses ibn Habib. He edited various important works. The first fruit of his literary activity was the publication of his grandfather's writings. To this end he left Safed, where he seemed to have taken up his abode, and removed to Constantinople. As he points out in various passages in his writings, he found in Hayyim Alfandari the Younger a warm supporter. While engaged on the works of his grandfather, he entered (1714) into close relations with the chief rabbi of Constantinople, Judah Rosanes, at the time generally regarded the highest authority of the Orient. Rosanes appointed Culi dayyan, which, together with his position as teacher, secured to him a sufficient livelihood. In 1727 Culi published his grandfather's work "Shammot ba-Arez" (notes on various portions of the Talmud), with an index.

In this year Rosanes died. He left voluminous literary remains in a very chaotic condition. To introduce order into this chaos it needed a scholar of the first rank. With this task Culi was entrusted. But even for him it meant a labor of several years. First, in 1728, he edited the "Parashat Derakim," a work both haggadic and halakic. Three years later he published the voluminous "Mishneh la-Meleh," enriched with numerous important notes. To both these works Culi wrote a preface. In the same year, he edited also his grandfather's "Ezrat Nashim," in the beginning of which there are two responsa of his own. His most important work is his commentary on the Pentateuch, entitled "Me'Am Lo'ez." This work, which is held in high regard by the Jews of the East, is a very elaborate encyclopedic commentary in Ladino, dealing with Jewish life in all its relations. Its material was taken from the Talmud, the Midrash, and the principal works of Talmudic and rabbinic literature. Culi carried his commentary on the Pentateuch through Genesis and as far as ch. xxiv of Exodus. After his death the work was continued by Isaac Magreso and Isaac Behor Arguñi. The five parts were published in Constantinople (1733), partly at the expense of Judah Mizrahi. The first part appeared in a second edition (Salonica, 1798) and a third edition (Smyrna, 1870); and the other parts were republished at Smyrna (1871-73). A portion of the first was issued under the title "Akedat Yizhak" (The Sacrifice of Isaac), Smyrna, 1864.

Culi also wrote a halakic work under the title "Simanim le-Oraita," which, however, remained in manuscript. He seems to have lived for some time in Hebron (compare his responsum No. 2).

CULTURVEREIN DER JUDEN. See **VE-REIN FÜR CULTUR UND WISSENSCHAFT DER JUDEN.**

CUMANUS, VENTIDIUS: Roman procurator in Judea (48-52). According to Tacitus ("Annales," xii. 54), he divided the procuratorship with Felix; the latter being at the head of Samaria, the former of Galilee. Such a division is unknown to Josephus, and, though accepted by Mommsen ("Gesch." v. 525), is rightly discarded by Schürer ("Gesch." i. 477). Grätz, who follows the statement of Tacitus, is forced to amend his text; holding that events show that Samaria belonged to Cumanus, and Galilee to Felix ("Monatsschrift," xxvi. 404).

The procuratorship of Cumanus lay in the stormy period preceding the final insurrection in Judea. He himself had to put down three uprisings, the last one causing his own downfall. The first of these happened in the Temple court at the Passover feast, when one of the Roman soldiers—who were always present on such occasions to keep order in the multitude—shocked the Jews by his indecent behavior. The tumult thus occasioned was suppressed by the soldiers, and a large number of those assembled (by Josephus said to have exceeded 3,000) were crushed to death. The second uprising also was brought about by a Roman soldier. Jewish robbers had attacked an imperial officer named Stephanus near Beth-horon ("B. J." ii. 12, § 2). The soldiers sent by Cumanus to restore order plundered the surrounding villages, and one of them tore up a scroll of the Law. At this the Jews became much excited, sent a large deputation to the procurator at Cæsarea, and were appeased only when the soldier was condemned to death.

Jealousy between the Samaritans and the Judeans was the cause of the third trouble. A Galilean, on his way to the Temple at Jerusalem, had been murdered at Gema ("B. J." ii. 12, § 3) or Ginea ("Ant." xx. 6, § 1; compare Boettger, "Top.-Hist. Lexikon zu Josephus," p. 129). Cumanus hesitated to inflict punishment upon the Samaritans: it is even said that he was in their pay. The Judeans, headed by the zealots Eleazar, son of Dineus, and Alexander, revenged themselves upon the Samaritans, despite the attempt of the leaders in Jerusalem to hold them back. Cumanus sent out the Sebaste troop from Cæsarea; but in the mean time both Samaritans and Judeans had made presentments to Ummidius Quadratus, the governor of Syria, who at once put to death in Cæsarea all those who had been captured by Cumanus; and in Lydda eighteen of the Judeans who had been involved in the disturbance. The high priests Jonathan and Ananias, the latter's son Anan, the Samaritan leaders, Cumanus and the tribune Celer, and others, were ordered to Rome to appear before the emperor. Claudius condemned three of the leading Samaritans to death, banished Cumanus, and sent Celer to Jerusalem to be beheaded. This judgment, according to Josephus ("Ant." xx. 6, § 3), was due to the influence of Agrippa II. with Agrippina, the emperor's wife.

According to Tacitus (*l.c.*), however, the trouble between the Samaritans and the Judeans had been fomented by the jealousy of the two procurators, and it was Quadratus himself who sat in judgment. Antonius Felix was exonerated, as he was the

brother of the emperor's favorite, Pallas, and brother-in-law of King Agrippa.

CUMBERLAND, RICHARD: English dramatist; born in the Master's Lodge, Trinity College, Cambridge, Feb. 19, 1732; died at Tunbridge Wells May 7, 1811. He was educated at Bury St. Edmunds and Westminster, and at Trinity College, where he was entered when but fourteen years old.

About 1750 Cumberland was appointed private secretary to Lord Halifax, and finding the position a sinecure, he devoted his leisure to play-writing. Among his most successful plays were "A Summer's Tale," 1765, and "The West Indian," produced by Garrick in 1770.

Cumberland's most important work, from a Jewish standpoint, was his drama "The Jew," written in 1777, in which he depicted the antithesis of Shakespeare's *Shylock* and Marlowe's *Barabas* in *Sheva*, the benevolent, grateful Jew. *Sheva* is rescued at Cadiz from an auto da fé by *Don Carlos*, and, later, from a mob in London by the son of *Don Carlos*, *Charles Ratcliffe*. In gratitude, *Sheva* gives £10,000 to *Ratcliffe's* sister as a marriage portion, and the balance of his fortune to *Ratcliffe*.

Incidentally it may be stated that "The Jew" appeared two years before "Nathan der Weise," which, however, had been written earlier.

E. Ms.

CUMIN: The seed of the *Cuminum Cyminum*, an umbelliferous plant, which, coming originally from Mediterranean countries, spread to many parts of the world. Its name is common to Greek, Hebrew, Phœnician, Syriac, Ethiopic, and Arabic, as well as to modern languages. Geoponicon and Bar Bahul mention among its varieties the wild, the Ethiopic, and the domestic or garden cumin. Palestine grew a special variety of its own, the *Cuminum Syriacum* (Mish. Demai, ii. 1; the Yer. distinguishes it from the variety called *Cyprian*, the seed of which is curved). By the Arabs as well as by the Jews cumin was used as a condiment. It has a pungent taste, something like caraway, and is used by many people to flavor bread. The oven was heated with cumin for that purpose (Ter. x. 4). It is used also medicinally to soften swellings. In the Talmud it is mentioned as used to stanch excessive bleeding (Shab. 110b) during menstruation and after circumcision (Shab. 18, 4; see also Joel Müller, "Hillufe Minhagim," p. 41, Vienna, 1878); while it is also credited with curative properties for colics ('Ab. Zarah 29a, top). It is not certain whether, in the magic formula against boils given in Shab. 67a, the word "kammon" is an allusion to the seed; but in view of its application in such cases, this is highly probable.

In Isa. xxviii. 25 the method of threshing it is referred to. Instead of the usual instrument, a rod is

used, and the knowledge of this method is pointed out as of divine origin. Matt. xxiii. 23 complains of those who give tithes of cumin but disregard the weightier matters of the Law.

CUNÆUS, PETRUS (also known as **Peter van der Kuhn**): Dutch Christian and rabbinical scholar; born at Flushing 1586; died at Leyden Dec. 2, 1638. From 1617 until his death he was professor of jurisprudence and politics at the University of Leyden. Cunæus holds a position of some importance in the development of Biblical archeology as the author of "De Republica Hebræorum," which appeared in three volumes, in 1617, at Leyden. It was republished in 1632 by Elzevir; and was translated into French in 1703. It was also reproduced in the "Critici Sacri" and in Ugolini's "Thesaurus."

In this book Cunæus deals with the constitution of the old Hebrew kingdom, which he regards as a purely theocratic one. The Lord was the sole ruler, and made the laws, appointed judges, decided questions of war and peace, and was high priest, liberator, and leader of the people. Cunæus had often compared the conditions of Jewish with those of Roman and Greek life, and concluded that Jewish laws were superior to those of the classical world. He instanced the jubilee year of the Hebrews, which, according to his view, would have been the only remedy for the evils of the "latifundia" in Rome. He made use of the teachings of the Rabbis, especially of Maimonides. Cunæus and Grotius were the first Christian scholars who accepted, in their Biblical interpretations, the explanations of the Rabbis.

CUNEIFORM INSCRIPTIONS. See ASSYRIOLOGY AND THE OLD TESTAMENT.

CUNEO: Capital of the Italian province of the same name. According to local traditions, a Jewish community, founded probably after the expulsion of the Jews from France (1381), existed there in the fourteenth century. It seems to have been firmly established only after the immigration of Spanish and Portuguese Jews, the first of the immigrants being some bankers, who, at the end of the sixteenth century, received permission from the pope to open loan-offices ("Rev. Etudes Juives," xix. 143). The oldest monument preserved by the community is a "dukan" of the year 1611. The societies also date back to an early time: the Gemilut Hasidim was founded in 1687; the Talmud Torah, in 1770 by Solomon Jehiel della Torre. Two special memorial days are celebrated in the synagogue of Cuneo: one in memory of a conflagration in 1750, the other of the siege of 1799. The Spanish and the Italian rituals are followed. Among the rabbis have been the following: Jacob ben Mordecai Poggetto, in the sixteenth century; Solomon Jehiel della Torre, in the eighteenth century; M. Sorani, in the nineteenth century.

The community has a permanent population of about 300 persons. The Lattes family, which has lived there continuously since the sixteenth century, is especially noted.

CUP.—Biblical Data: The word most commonly used in the Old Testament for drinking-vessel is כוס (Gen. xl. 11, 13). נביע first occurs in the story of Joseph for the cup with which he "divined" (Gen. xlv. 2-12, Hebr.), and from Jer. xxxv. 5 it appears that it was larger than the כוס, corresponding to a goblet or crater. The נביע was also one of the ornaments of the golden candlestick, or menorah (Ex. xxv. 33 *et seq.*, xxxvii. 17-21), and is described as being "almond-shaped" (משקר), like the calyx of the almond-flower. Other words, like קשות, אגן, סף, which the English versions sometimes render by "cup" or "goblet" (Isa. xxii. 24; Song of Solomon vii. 3; Num. iv. 7; I Chron. xxviii. 17; Jer. lii. 19), were used to designate rather a basin, or bowl-shaped vessel. It may be assumed that the cups of the Jews were in general of the same material, design, and workmanship as those of the Egyptians, Assyrians, and Phenicians, whose craters were celebrated even in Homer's time (Homer, "Iliad," xxiii. 743; *idem*, "Odyssey," iv. 615-618). The cups used at present in synagogues for "kiddush" and "habdalah" are generally of silver, oblong, and shaped like an inverted dome, with a stem and base, resembling the cup figured on the Maccabean coins.

"Cup" is frequently used in metaphors of good or of ill fortune, as in "My cup runneth over" (Ps. xxiii.

5, xvi. 5); "the cup of his fury" (Isa. li. 17, 22); "the bowl of the cup of staggering" (Zech. xii. 2, Hebr.);
Meta- "the cup of astonishment and desolation" (Ezek. xxiii. 33). Babylon is a "golden cup in the Lord's hand that made all the earth drunken" (Jer. li. 7). The "cup of consolation" (Jer. xvi. 7) is one offered to mourners; while the "cup of salvation" (Ps. cxvi. 13) is a cup of thanksgiving for deliverance, in allusion, perhaps, to the wine of the peace-offering ("shelamim"), or to the cup of praise and thanksgiving.

—**In Rabbinical Literature:** In the Talmud the figurative use of "cup" for trouble and suffering (Hul. 92a; compare Gen. R. lxxxviii. 5) is observed in the expression "to taste the taste of death" (טעם טעמא דמיתותא, Yoma 78b; in the N. T., Matt. xvi. 28; Mark ix. 1; John viii. 52; Heb. ii. 9; compare "Etymologicon Magnum": ποτήριον . . . σημαίνει καὶ τὸν θάνατον). Another figurative use of "cup" is for one's wife (Ket. 75b; Ned. 20b; Git. 90a).

Ten—at one time fourteen—cups were ordained for the house of mourning (Ket. 8b; compare Sanh. 70a). The "cup of benediction"—*i.e.*, the third of the four cups of the Passover meal—is often referred to (Ber. 51a; B. B. 97b, etc.; in the N. T., I Cor. x. 16). For other interesting references to "cup" see Ket. 65a; Pes. 96b; Yoma 75a; Bezah 15b, etc.

In Gen. xlv. 5 is found probably the oldest ref

CUP OF BENEDICTION (Hebrew, “kos shel berakah”): The cup of wine taken immediately after grace has been recited at the conclusion of a meal. The custom is first mentioned directly in Mish. Ber. vi. 6: “If wine comes to them [a company of three or more] during the meal, each one blesses for himself; if after the meal, one blesses for all of them.” In other words, wine after the meal is treated with some solemnity. In Pes. x. 1 the four cups of the Passover night are mentioned: the third of these is the cup of benediction following the grace after supper.

In later times the custom arose that where one had with his meal only one unit of wine (one-fourth of a log—about the contents of an egg and a half), he should drink it after the meal as a cup of benediction; and many rabbis deemed it highly meritorious, indeed almost a duty, to have wine in readiness for this purpose at each meal, especially when three men were to partake of it, and would join in saying grace. In that case the one reciting grace aloud would take the cup in his right hand during the recital and hold sweet-smelling spices in his left (see Maimonides, “Yad,” Berakot, vii. 14, 15). But the custom as to the spices has long since gone out of use. In northern countries wine is not accessible as a daily beverage to the mass of the Jews; hence, “strong drink”—i.e., beer or mead, and, later on, spirits, under the name of “wine of the country”—or any beverage other than water, such as sirup or the juice of fruits, was deemed a fit substitute for wine in the cup of benediction (see Shulhan ‘Aruk, Oraḥ Hayyim, 182, 1-2, Isserles’ gloss).

Speaking generally, the cup of benediction is drunk only on Sabbaths or at festivals and other joyous occasions.

CUP OF SALVATION. See PERIODICALS.

CUPBEARER (מִשְׁקֵה): The officer who served the cup to the king. Like the **CUP**, the cupbearer is first mentioned in the Old Testament in connection with the story of Joseph in Egypt (Gen. xl. 21), where the title “chief of cupbearers” (שֵׁר הַמִּשְׁקִים) would show that such a functionary existed at the Egyptian court. In Jewish history this officer is mentioned in the description of Solomon’s court (I Kings x. 5; II Chron. ix. 4), and, later, at the court of Herod I. (Josephus, “Ant.” xvi. 8, § 1). Nehemiah was cupbearer to the Persian king Artaxerxes Longimanus (465-425 B.C.; Neh. i. 11, ii. 1). Cupbearers are frequently represented on the Assyrian

monuments (compare also Tobit i. 22). The Assyrian Rab-shakeh (רַב־שָׁקֵה, II Kings xviii. 17; Isa. xxxvi. 2), formerly supposed to have been the captain of the cupbearers, is now known to have held a different office.

The Egyptian cupbearers were eunuchs (כְּרִיסִים, Gen. xl. 2), as were those of Herod and those in Assyria; and it may be assumed that this was generally the case throughout the Orient. The office of cupbearer at the Median-Persian courts was, according to Herodotus (iii. 34) and Xenophon (“Cyropædia,” i. 3, 8), one of great honor. The cupbearer had in some cases to taste of the cup before presenting it (Xenophon, *ib.*).

I. M. C.

CURAÇAO: An island of the Dutch West Indies, captured from Spain in 1634. It is probable that Jews from Holland were among the first settlers in the island under the Dutch government. But they did not arrive there in considerable numbers until 1650, when twelve Jewish families—De Meza, Aboab, Pereira, De Leon, La Parra, Touro, Cardoze, Jesurun, Marchena, Chaviz, Oleveira, Henriquez Cutinho—were granted permission by Prince Maurice of Orange to settle there. The governor of the island, Matthias Beck, was directed to grant them land, and supply them with slaves, horses, cattle, and agricultural implements, in order to further the cultivation and develop the natural resources of the island, the earlier settlers being chiefly concerned in the more lucrative contraband trade with the Spanish Main. The land assigned to these immigrants was situated on the northern outskirts of the present district of Willemstad. This district is still known as the “Jodenwyk” (Jewish quarter; Corcos, “History of the Jews of Curaçao,” pp. 7-8).

In those early years, despite the favorable auspices under which the Jews arrived, severe restrictions were put upon their movements, and they labored under all the disadvantages to which aliens were generally subject. They were even prohibited in 1653 from purchasing additional negro slaves, much needed for their farms.

In March, 1651, the directors of the Dutch West India Company (in which Jews were large stockholders) wrote to Peter Stuyvesant, the governor of New Netherlands, that they were seriously considering the abandonment of Curaçao, since the island was not proving a source of revenue. They decided, however, to make one more experiment, and entered into a contract with Joseph Nuñez de Fonseca (also known as David Nassi), who undertook to emigrate, taking with him a large number of people, under one Jan de Illan, also a Jew, as patron.

“He intends,” they write, “to bring a considerable number of people there to settle and cultivate the land, but we begin to suspect that he and his associates have quite another object in view; namely, to trade from there to the West Indies and the Main. Be that as it may, we are willing to make the experiment, and you must, therefore, charge Director Rodenborch to accommodate him within proper limits and in conformity with the conditions of the contract” (Albany MSS., “Pub. Am. Jew. Hist. Soc.,” No. 10).

By Dec., 1652, Illan and his followers had made considerable progress, and had begun a trade in logwood with the neighboring is-
Settlement lands. As this trade was not per-
of Illan. mitted by the terms of the contract, and as it was also contrary to the interests of New Netherlands, attempts were made by the directors to stop it. The grant of privileges to Nassi, bearing the date of Feb. 22, 1652, provided that he was to have two leagues of land along the coast for every fifty families, and four leagues for every one hundred families, that he should bring over. The colonists were further granted exemption from taxes for ten years, and the privilege of selecting the lands on which they desired to settle. They were also accorded religious liberty and toleration, though they were restrained from compelling Christians, should any be among them, to work on Sunday, "nor were any others to labor on that day."

This is the earliest known charter of privileges, specifically conceding religious liberty and toleration to Jews in the New World. Its favorable terms, as well as other attempts at settling Jews in Curaçao made at this time, were unquestionably due to the prominence of Jews on the directorate of the Dutch West India Company, and in Dutch affairs generally (see MANASSEH BEN ISRAEL). On April 4, 1652, the directors wrote again to Stuyvesant, speaking of Nassi as "preparing to go there with a large number of people." Yet they had decided misgivings respecting the success of the enterprise, and no confidence in the people or in their leader (Corcos, *l.c.*). Their fears appear to have been justified, for all accounts tend to show that the plan was not carried out on any extensive scale (Corcos, *ib.* pp. 9, 17, 18; Daly, "The Settlement of the Jews in North America," p. 9).

The history of the effective settlement of Jews in Curaçao begins, however, in 1654, when the conquest of Brazil by the Portuguese resulted in the expulsion of the Jews
Jews and their dispersion to the West Indies
Prominent and to the mainland of North America,
in particularly to New Netherlands
Trade. and to Newport, Rhode Island. Large numbers came from Brazil to Curaçao during that and succeeding years, bringing with them considerable wealth. During this period they laid the foundations of that prominence in the commercial development of the island which they have since retained (Corcos, *ib.* pp. 9-10). Shortly after this (1657), regular communication for purposes of trade was established between New Amsterdam and Curaçao. This was principally in the hands of the Jews, and contributed to the commercial development of both colonies. An original Spanish bill of lading and an invoice of goods shipped from Curaçao to New Netherlands in 1658, and directed to Joshua Mordeky En-Riquez, included Venetian pearls and pendants; thimbles, scissors, knives, and bells, thus showing the variety of the trade carried on by the Jews at this time ("Archives of the State of New York, Translation of Dutch Records," xii. 99).

In contravention of their instructions the local authorities connived at the trade carried on with Isaac de Fonseca of Barbados, which began in 1656,

and which tended to undermine the trade monopoly enjoyed by the Dutch West India Company. The Curaçao authorities were kept from interfering with it by Fonseca's threat to turn his trade toward Jamaica and abandon Curaçao.

In 1659 Stuyvesant complained to the directors that Jews in Curaçao were allowed to hold negro slaves, and were granted other privileges not enjoyed by the colonists of New Netherlands, and he demanded for his own people "if not more, at least the same, privileges" as were enjoyed by the "usurious and covetous Jews," as he termed them (Albany MSS.).

The life of the Jews as a community begins definitely in the year 1656, when they established the Congregation Mikveh Israel under the direction of the Spanish and Portuguese community of Amsterdam. In the same year the land originally granted to the first twelve immigrant families was appropriated for a "bet-haim" (burial ground), and was enclosed with a brick wall and consecrated to its purpose. It is not likely, however, that this year witnessed the first services held by the new colonists. Probably they had gathered, as was the case elsewhere, in a room provided by one of their number. When, in 1656, they had outgrown the limitations of a private room, they rented a small wooden building, in which regular daily services were held.

There is no evidence that they were numerous enough at this date to warrant the selection of a rabbi, though the fact that one of the earliest tombstones, bearing the date 22 Menahem (Ab), 5432 = 1671, carries the name of Rev. Abraham Haim

Lopez da Fonseca, tends to prove that he officiated as hazzan for a time. The
Early he officiated as hazzan for a time. The
Tomb- earliest tombstone decipherable is that
stones. of Isaac Henriquez Cotinho (5431 = 1670). Of those interred during the remaining years of the seventeenth century and the first decade of the eighteenth (1670-1707), the names of twenty-seven can be deciphered, thus affording an indication of the extent of the settlement. Among these may be recognized the names of a number of the first settlers of 1650 (Corcos, *ib.* pp. 10-13). The first regularly appointed hakam of the community was Josiah Pardo, who arrived in Curaçao from Amsterdam in 1674, and remained there until 1688, when he left for Jamaica.

Indicative of the close relations between the communities of Amsterdam and Curaçao is the fact that this Pardo was the son of David Pardo, who, with Saul Levi Morteira, Menasseh ben Israel, and Ishac Aboab, constituted the college of rabbis at Amsterdam ("Publications Am. Jew. Hist. Soc." iii. 19).

In 1692 the small wooden building used up to this time having been outgrown, a new synagogue was erected, and consecrated with appropriate ceremonies on the eve of Passover in that year, the services being read by the hazzan, David Raphael Lopez de Fonseca (d. 5467 = 1707). This building, enlarged and reconsecrated in 1731, still stands, a monument to the substantial constructive methods of the early builders.

For reasons not yet satisfactorily explained, in 1693 a considerable number of families left the island

for the continent of America, many going to Newport, among them being members of the Touro family, afterward famous in the history of that town. During the year 1692 a number of Italian settlers in Curaçao, refugees from David Nassi's dispersed colony at Cayenne (dissolved 1664), departed for Tucacas, Venezuela, where they established a congregation called "Santa Irmandade."

A period of substantial prosperity for the Jews of Curaçao began early in the eighteenth century. In 1715 they established a benevolent society for the care of the sick and needy. Five years later they responded liberally to an appeal for aid from the Shearith Israel congregation of New York, and in 1756 met with equal generosity a similar appeal from the Jews of Newport. By 1750 their numbers had in-

branch of the older congregation, and as under its direction. This led to a series of serious disputes, which culminated, in 1749, in an open breach, settled only by the intervention of Prince William Charles of Orange-Nassau, in a decree bearing the date of April 30, 1750, and commanding the disputing communities to terminate their strifes, to submit to the government of the parnasim and board of the original synagogue (Mikveh Israel), and to be subject to the regulations of the Portuguese community in Amsterdam. This arrangement continued until 1870, when the congregation became independent. On Aug. 19, 1750, the governor and council proclaimed a day of thanksgiving and prayer, which was to inaugurate

Congregational Disputes.

INTERIOR OF THE CURAÇAO SYNAGOGUE.
(From a photograph.)

creased to about 2,000 (Chumaceiro). They were prosperous merchants and traders, and held positions of prominence in the commercial and political affairs of the island (Corcos, *ib.* p. 24). By the end of the eighteenth century they owned most of the property in the district of Willemstad. As many as fifty-three vessels are said to have left in one day for Holland, laden with goods which were, for the most part, the property of Jewish merchants (Chumaceiro).

Two communities had come into existence by 1740, the newer one occupying a tract across the harbor from Willemstad, then as now known as "Otrabanda." In order to avoid crossing the water on the Sabbath to attend divine services, those who resided in this outlying district formed themselves into the Neveh Shalom (Dwelling of Peace) congregation, and in 1745 (12th Elul, 5505) consecrated their synagogue. For a time this was regarded as merely a

an era of peace. On this occasion Rabbi Raphael Samuel Mendes de Sola preached a sermon, which was afterward published (1757) in Amsterdam (Corcos, *ib.* pp. 31-38; "Publications Am. Jew. Hist. Soc." iii. 17-18, ix. 149-150).

Increasing in prosperity and in numbers during the next century, the community was not without internal disputes. It was due to one of these controversies between the parnasim and the ministers that a society, called the "Porvenir," was founded in 1862. In the next year this developed into a Reform congregation, under the name "Emanu El," which in 1865 laid the corner-stone of its new building in the quarter "Scharlo," the synagogue being completed and dedicated in the following year. In 1863 a moderate change in the direction of Reform was introduced into the liturgy of the Congregation Mikveh Israel. At the present time the older congregation has a membership of about

800, the younger of 250. Each has its religious schools and charitable organizations.

The ministers of Temple Emanu El were Josuah Naar, Jacob de Solla Mezer Solas, and Isaac Lopez de Leao Laguna. Those of the older congregation (Mikveh Israel) were as follows: Abraham Haim Lopez de Fonseca (d. 1671); David Raphael Lopez de Fonseca (1692; d. 1707); Eliaho Lopez (1692-1712); Raphael Jesuran (1715-48); Raphael Samuel Mendes de Sola (1749; d. 1761); Isaac Henriques Farro (1761; d. 1762); Jacob Lopez de Fonseca (1765; d. 1817; he celebrated the fiftieth anniversary of his ministry in July, 1815); Aaron Mendez Chumaceiro (1856-69);

temple emanu el, curacao.
(After a photograph.)

Haim Israel Sant Cross (1869-89); Eleazar Polak (1893; d. 1894); Joseph Corcos (1896-98).

At the present time (1902) the Jews are among the leading citizens of Curaçao. Forty-four out of fifty-two firms on the two principal business thoroughfares, De Heeren Straat and Breeden Straat, are Jewish. The leading lawyers, physicians, editors, and druggists are also Jews. Among the more prominent Jewish citizens and officials are two bank presidents, one member of the executive council, three members of the colonial council, one district judge, one chief clerk, ten consuls, four captains, and eleven lieutenants of the militia.

II. F.

CURIEL: A wealthy Marano family which settled in the Netherlands and at Hamburg about the sixteenth century. They intermarried largely with the Da Costa family. In 1682 great excitement was caused at Antwerp by the attempt of the rector of

the Church of Saint George to baptize forcibly the son of Diego Curiel, which effort, however, was frustrated. **Moses de David Curiel**, at the beginning of the eighteenth century, was a well-known London Jew.

C. DE B.

CURIEL, JACOB (known in public life as **Alexander Nuñez da Costa**): Resident of the Portuguese court at Hamburg about the middle of the seventeenth century; died there in 1665. He had lived previously at Amsterdam, where he had taken an important part in the reunion, effected in April, 1639, of the Portuguese community, which, through the rise of the German Jews, had split into three bodies. John IV. of Portugal, discovering Curiel's skill in financial matters, sent him (c. 1650) to Hamburg as his agent, and conferred upon him the title of "Hidalgo da Casa Real" (Noble of the Royal House). In 1655 he was elected a warden of the Portuguese synagogue, to which he donated a "tebah" ("fes kodes"). He was buried in the Portuguese cemetery at Altona in 1665.

G.

CURSING: The expressions used for "cursing" it in the Bible are: (1) **מָאֵרָה**; (2) **קָלַל**; (3) **אָלָה** (verb and noun) and **תָּאֵלָה**; (4) **קָבַב**; (5) **נָקַב** (Lev. xxiv. 11, 16); (6) **נָדָה**.

In Talmudic literature occur the terms: **אֲרִירָה**, **קָלַל בְּקוֹסָם** (Sanh. ix. 11), which the Jerusalem Talmud (*ad loc.*) explains as a Nabatæan form of cursing; **הַחֲרִים** (M. K. 15a, 16a; compare Mandl, "Der Bann," p. 25); and the Aramaic **אֲקַל** (Eccl. R. iii. 11; Yer. Yoma iii. 7), **לִטּוּתָא**, **לִטּוּתָא**, **לִטּוּתָא**.

Cursing rests on the belief in the possibility of bringing down calamity upon persons or things by the mere power of the spoken word,

Biblical without any regard to its moral justification. Traces of this heathen conception of the objective reality of a curse, and of its mystic power, are

found in the Bible (Ps. cix.) and in the Talmud (see below); but in general the Bible conceives a curse to be merely a wish, to be fulfilled by God when just and deserved. An undeserved curse has no effect (Prov. xxvi. 2), but may fall back upon the head of him who utters it (Gen. xii. 3; Ecclus. [Sirach] xxi. 27), or may be turned by God into a blessing (Deut. xxiii. 5). The declaration of punishments (Gen. iii. 14, 17; iv. 11), the utterance of threats (Jer. xi. 3, xvii. 5; Mal. i. 14), and the proclamation of laws (Deut. xi. 26-28, xxvii. 15 *et seq.*) received added solemnity and force when conditioned by a curse. Cursing is not only characteristic of the godless (Ps. x. 7), but serves as a weapon in the mouth of the wronged, the oppressed, and those who are zealous for God and righteousness

(Judges ix. 57; Prov. xi. 26, xxx. 10). A righteous curse, especially when uttered by persons in authority, was believed to be unfailing in its effect (Gen. ix. 25, xxvii. 12; II Kings ii. 24; Ecclus. [Sirach] iii. 11). One who had received exemplary punishment at the hands of God was frequently held up, in cursing, as a terrifying object-lesson (Jer. xxix. 22), and such a person was said to be, or to have become, a curse (II Kings xxii. 19; Jer. xxiv. 9, xxv. 18; Zech. viii. 13). It is especially forbidden to curse God (Ex. xxii. 28), parents (Ex. xxi. 17; Lev. xx. 9; Prov. xx. 20, xxx. 11), the authorities (Ex. xxii. 28; Eccl. x. 20), and the helpless deaf (Lev. xix. 14).

Parallel with the Biblical conception of a curse as being of the nature of a prayer (Ta'an. 23b; "Pirke R. ha-Kadosh," ed. Grünhut, vii. 14), and that an undeserved curse is ineffective (Mak. 11a) and falls back upon the head of him who utters it (Sanh.

49a), Talmudic literature betrays a belief, amounting to downright superstition, in the mere power of the word (Ber. 19a, 56a; compare "Z. D. M. G." xlii. 588). Not only is a curse uttered by a scholar unfailing in its effect, even if undeserved (Mak. 11a), but one should not regard lightly even the curse uttered by an ignorant man (Meg. 15a). A curse is especially effective when uttered three hours after sunrise (Sanh. 105b). The Biblical prohibitions of cursing are legally elaborated, and extended to self-cursing (Shebu. 35a). A woman that curses her husband's parents in his presence is divorced and loses her dowry (Ket. 72a). Among the Romans one condemned to death was gagged to prevent his cursing the emperor (Er. 19a).

Cursing is permissible when prompted by religious motives. A curse is uttered against those who mislead the people by calculating, on the basis of Biblical passages, when the Messiah will come (Sanh. 97b). Cursed are those who are guilty of actions which, though not forbidden, are considered reprehensible (compare on this subject Tos. to Men. 64b, *s.v.* ארור).

Scholars cursed sometimes not only with their mouths, but by an angry, fixed look. The unfailing consequence of such a look was either immediate death or poverty (Sotah 46b, and parallel passages). The expression used for this look is נָתַן עֵינָיו בּוֹ (Aramaic, יִהְיֶה בְּהַעֲיִנָּה). This look may be merely a mental curse. According to others it has no reference to the magic power of the "evil eye" (see Bacher, "Agada der Tannaiten," ii. 331, and EVIL EYE).

The Orientals have an ineradicable proneness to curse God, not only on so grave an occasion as the breaking out of war (I Sam. xvii. 43), or under the pressure of a great calamity (Isa. viii. 21), but on the slightest provocation in daily life (compare Lunz, "Jerusalem," v. 271). Talmudic literature contains many laws regarding BLASPHEMY.

C. L.

CURTAIN: An adjustable drapery, usually hung before a window or passageway to insure privacy. In Ex. xxvi. and xxxvi., containing the directions for the making and a description of the erection of the TABERNACLE, the Hebrew term "yeri'ah" (יִרְיעָה) occurs forty-four times. In the

English versions it is rendered "curtain." A more correct translation, however, would be "rug" or "tent-cloth." The rugs described in Exodus were of costly material and of elaborate workmanship. According to rabbinical explanation (Rashi to Ex. xxvi. 1) the thread was composed of four strands, of the four different materials of varied colors mentioned in verse 1. The thread was then six-folded, so that it was actually $6 \times 4 = 24$ -ply. Inwoven on both sides, not embroidered or sewed on, were pictures of the cherubim, showing on each side different figures, a lion, for instance, on one side, and an eagle on the other. Ten of these rugs were sewed (Rashi, "with a needle") or fastened together, in two sets of five each, and were used to screen off the Holy Place. The end rugs of each set were provided with equidistant loops, the loops in one rug having corresponding loops in the other. Each rug had a length of twenty-eight cubits and a breadth of four cubits; so that the five sewed together were twenty cubits in breadth.

In Middot detailed calculations of the dimensions of the Tabernacle and the adjustment of the curtains are given; but on some points the descriptions of the covering of the pillars on the morning side of the tent (see Shab. 98a) vary, and it is not possible to arrive at an accurate estimate of the proportions and the arrangement which the author of Exodus had in mind. Hooks were provided by which the corresponding loops were joined. Other rugs or pieces of cloth, eleven in number, woven of goat-hair, were used to cover the tent. The Hebrews had, at a comparatively early stage of their development, perhaps under Egyptian influence, attained considerable proficiency in the art of weaving such rugs (Nowack, "Lehrbuch der Hebräischen Archäologie," i. 241).

The Arabs were also adepts in this craft, many specimens remaining to show their skill in weaving figures and other ornaments into cloth (Le Bon, "La Civilisation Arabe," pp. 515, 517, 519). The style of these primitive Hebrew rugs is, perhaps, reproduced in the "kiswah" or covering of the "ka'bah" (a coarse fabric of mixed silk and cotton), which serves to confirm Rashi's statement that the yeri'ah was of mixed thread. That the original meaning of the term "yeri'ah" is "rug," or "tent-cloth," is made plain by Jer. xlix. 29; Isa. liv. 2; Jer. iv. 20, x. 20; and Hab. iii. 7, where it is used as equivalent to "tent." The later rabbinical use of the word for parchment, or writing material, of certain dimensions, supports the theory that originally it stood for pieces of cloth or hide cut into various lengths, ready to be fastened or sewed together (Men. 30a, b).

The rendering of "cloth," or "rug," is also sustained by Ps. civ. 2. The use of דָּק in a parallel passage (Isa. xl. 22) points to the same conclusion: for the word translated "curtain" stands for a thin, gauze-like material.

In Num. iii. 26 מִסְכָּךְ is rendered "curtain." It is more properly a portière, at the gate of the court; and, in fact, it occurs in conjunction with another Hebrew word, "paroket" (פֶּרֶכֶת), which is derived from a root, still extant in Assyrian, meaning "to

CURTAIN FOR THE ARK OF THE LAW, FROM A SYNAGOGUE AT SMYRNA.
(In the United States National Museum, Washington, D. C.)

shut off," and is found in Ex. xxvi. 31, and elsewhere, as the designation of the curtain that divides the Holy of Holies from other parts of the Tabernacle. In Assyrian "par-raku," by metonymy, signifies the apartment and shrine which are "shut off"; while the Hebrew has retained the active sense, and denotes the means used for "shutting off." This curtain was made of the same material and in the same manner as the rug. It corresponds to the "burka" (veil) in the ka'bah, which suggests what the paroket may have been in the ancient days of Israel. Talmudic tradition states that such curtains were hung in front of the various gates and doors in the Temple. In fact, thirteen are enumerated with their respective assignments (Ket. 106a). A special officer had charge of them (Shek. v. 1), and women are mentioned as engaged in weaving them (Yoma 51b). That curtains were also used for secular ornaments is learned from Pirke R. El. 41, where mention is made of a canopy ornamented with black curtains.

The Targumim translate "paroket" by "pargod" (Targ. Yer. to Ex. xxvi. 31, 33, 35; xxxix. 34 *et seq.*; Pirke R. El. iv.), a word of doubtful etymology, which, however, is rendered also a "coat," or "cloak," made of richly ornamented material and trimmed with fur (Gen. R. lxxxiv.). Curtains made of similar material might easily have been known by the same name (see Kelim xxix. 1). "Pargod" in the Talmud designates a curtain supposed to divide the inner or higher court of the heavens from the outer and more accessible celestial precincts. From behind this curtain or screen were heard voices that imparted information to the suppliant (Mek. to Ex. xix. 9). It is often contrasted with the direct communication on the part of an earthly ruler, or his secretary and ambassador (see Yoma 77a; Ber. 18b). This pargod is identical with or similar to the "velon" (= Lat. "velum"), a term which also connotes cloth and curtains made of the cloth (Kelim xx. 6; Bezah 14b), and which is used in Num.

R. iv. 13 in explanation of the Biblical פרכת (paroket). In its figurative application "Velon" (וילון = בילון) is the name of the seventh heaven, the Pargod (Hag. 12b; Ber. 58b, etc.).

The name is still in use among the Jews to designate the curtains hung in front of the Ark in the synagogue. Though the European Sephardic Jews do not use them, this may be due to the need of concealment in Inquisition days; and it is very doubtful if they were used in the earlier forms of the Ark of the Law. The earliest examples are without curtains (see Jacobs in "Jew. Quart. Rev." xiv. 737 *et seq.*). The assumption that the curtains now attached to arks are intended to represent the curtain separating the Holy of Holies from the Tabernacle or Temple seems to be disproved by these representations. Very often these curtains were of costly material, velvet, brocade, and silk of various colors, though red and blue seem to have been the more common. They were provided with gold borders, fringes, and tassels, and were often embroidered in gold with inscriptions commemorating the pious donors and the event which occasioned the gift. Others display in artistic execution verses and quotations from the Bible;

while symbols, such as crowns, or the letters כ"ת = כתר תורה ("crown of the Torah"), or lions, the emblem of Judah, are not infrequently woven into them or embroidered upon them. On the "awful days" (Rosh ha-Shanah and Yom ha-Kippurim) hangings made of white fabric are used.

Suggestive symbolical significances and allusions have been read into the colors as well as into the dimensions of the curtains prescribed for the Tabernacle. According to the Syn- Philo, the four colors which appeared in the thread indicated the four elements out of which the universe was created. Baehr, one of the more modern speculators on the symbolism of the Mosaic system, contends that the number seven in the dimen-

ensions of the curtains prescribed for the Tabernacle. According to the Syn- Philo, the four colors which appeared in the thread indicated the four elements out of which the universe was created. Baehr, one of the more modern speculators on the symbolism of the Mosaic system, contends that the number seven in the dimen-

sions is fundamental, and represents holiness in its various degrees. He also holds the four colors to have been of profound significance (Philo, "De Vita Moysis," iii. 6; Baehr, "Symbolik des Mosaischen Kultus," i. 207, 303).

J. E. G. H.

CUSA, NICOLAUS DE: Philosopher and theologian; born in Cusa, or Kues, on the Moselle, 1401; died in Todi, Umbria, 1464. He was Bishop and Cardinal of Brixan (Tyrol) at his death. As theologian he was known for his liberal views and wide mental horizon. It was he who facilitated the transition from the scholasticism of the Middle Ages to the philosophic speculations of the Renaissance.

Cusa came in contact with the Jews both as a papal legate and as a philosopher. As legate he issued, with the approval of the Synod

As Papal Legate. of Bamberg, an ordinance prescribing the badge for all Jews and Jewesses of Bamberg, and forbidding usury.

Contravention of these laws would entail the ban (April 30, 1451). Through the intervention of the Roman emperor Frederick III. this ordinance was not immediately carried out. In 1453 De Cusa was compelled by the emperor to extend the term in regard to the Jews of Nuremberg, and on May 1, 1452, the pope (Nicolas V.) excluded Nuremberg entirely from the provisions of the ordinance. On March 20, 1453, on the representation of the Bishop of Bamberg, his diocese was also exempted; and on Oct. 15, in consequence of a petition of the Archbishop of Salzburg, the ordinance was made inapplicable to the whole of the Salzburg bishopric (see Stern, "Urkundliche Beiträge," i. 47, 52, 53, 55, 57).

As philosopher, De Cusa showed a much more impartial spirit in his attitude toward the Jews. He leaned toward the views of the German mystics. He refers to the book Razieli, without, however, evincing a thorough acquaintance with the Jewish mystics. He cites, also (in "De Beryllo" and "Reparatio Calendari"), Isaac Israeli, Avicbron, Abraham ibn Ezra, and the Maimonidist Jacob b. Makir.

In his principal philosophical work, "De Docta Ignorantia," he credits "R. Solomon" (probably Maimonides) with these reflections: that

Philosophical Views. pure truth is beyond the reach of all knowledge, and can not be reduced to a science; that man must strive to transcend the standpoint of mere reason if

he would attain to pure truth; that science can never lead to a knowledge of God, for God alone can have a knowledge of His being, man's knowledge of God being at best a recognition of the unattainableness of positive knowledge. He follows R. Solomon in his treatment of the various names and attributes of God, holding that the nature of God is of infinite superiority, and can not be expressed in human language; and that only negative attributes can be ascribed to Him.

Nicolaus de Cusa had frequent controversies with Jewish scholars. He believed that they could be made to see the truth of the doctrine of the Trinity, but not that of the Incarnation. He complained that the Jews would not admit the divinity of the Messiah; that, in spite of their belief in a future

universal resurrection, they continued to deny the resurrection of Jesus; and that, in spite of their belief in an eternal life, as is shown by their martyrdom, they would not recognize that this belief has its foundation, not in an observance of the Law, but in a belief in Jesus.

The above statements occur in his "Excitationes." In his "De Pace seu Concordia Fidei" he attempts to round off his system of philosophy with the theory that there is only one religion, manifesting itself in a variety of religious practises. To the different nations God has sent different prophets, in order that each should receive religious instruction in the manner best adapted to it. The existence of different religions is due only to the fact that men are not aware of this underlying religious unity. They all honor the same truth, however; and even the polytheists worship through their various idols a single God. Accordingly, it ought to be an easy matter, on scientific grounds, to reconcile the contending religious creeds; uniformity of religious practise, however, should not be demanded. Thus, the Jews might be allowed to retain their specific ritual, if only the symbolic meaning thereof be kept clearly in mind.

The contrast between these views and De Cusa's dealings with the Jews is explained by the universal idea of his time that it was necessary to segregate and humiliate them.

CUSH.—**Biblical Data:** A nation whose founder is mentioned in Gen. x. 6; I Chron. i. 8 as brother to Mizraim (Egypt) and as a son of Ham; with the exception of the passages in Genesis, A. V. renders it "Ethiopia." This African country is evidently meant in Gen. x. 6, but in the next verse six Arabic tribes are mentioned as sons of Cush, and in verse 8, Nimrod, the representative of Babylonia (Assyria), appears as his descendant. These three verses present the vexing problem, much discussed by scholars, arising from the fact that nations identical in name extend over parts of Africa, Arabia, and Babylonia. In regard to the passages referring undoubtedly to Ethiopia, see ETHIOPIA. In a great many cases it is very difficult to determine whether the translators have used this Greek name correctly, or which of the two other divisions, Arabia or Babylonia, mentioned in the table of nations given in Genesis is meant.

The Arabian branch seems to be intended in II Chron. xxi. 16, where Judah, under Jehoram, is plundered by "the Arabians that were near the Ethiopians." These evidently did not come from the southwestern end of Arabia. In Num. xii. 1, Moses' wife, the Midianitish woman Zipporah, is called an Ethiopian (margin and R. V. "Cushite"). In Hab. iii. 7 the tents of Cushan (the Septuagint reads "Cushim"; the name evidently is the same as "Cush") and the land of Midian are mentioned (compare verse 3 for other names of northwestern Arabia). There are doubtful references in Isa. xliii. 3, xlv. 14, xx. 3, xviii. 1. Some critics place also the Cushite "Zerah" in northwestern Arabia (II Chron. xiv. 9).

Winckler, "Musri, Meluhha, Ma'in," ii., in "Mit-

teilungen der Vorderasiatischen Gesellschaft" (1898, pp. 169 *et seq.*; see also Schrader, "K. A. T." 3d German ed., p. 144), throws light on these passages. He shows that the Assyrians speak of this people as "Kusi" (Kûsh) in northern Arabia, subjected by Esarhaddon. See also Friedrich Delitzsch, "Die Sprache der Kossäer," Leipsic, 1884.

For the Babylonian "Cush" compare Gen. x. 6-8 (see above), and *ib.* ii. 13, where one of the four rivers of Paradise, the Gihon, "compasseth the whole land of Cush." The old attempts to see in this river the Nile lead to impossible geographical identifications; it must have belonged to the system of the Euphrates and Tigris. In Isa. xviii. 1 (Hebr.) the very obscure verses speaking of the land "beyond the rivers of Cush" can not mean Ethiopia, as Winckler, who refers the chapter to Merodach Balandan's legation to Hezekiah ("Alttestamentliche Untersuchungen," p. 146), has asserted. Since Schrader's "K. A. T." 1st ed., p. 87, this name of the Babylonian Cush has been explained by the Kashshi, a warlike nation from the Median Mountains, who conquered Babylonia in the seventeenth century B.C., and ruled over it for several centuries (see BABYLONIA). They may be identical (as usually assumed) with the Cosseans, a mountain people mentioned by the Greeks, or with the Kissians in Elam, or connected with both (see Delitzsch, "Wo lag das Paradies?" pp. 124, 129).

As confirmation of the Biblical statements connecting peoples so remote, the following parallels have been adduced: the Greeks speak of eastern or Asiatic Ethiopians on the Red Sea in Gedrosia (compare Homer, "Odyssey," i. 23). Assyriologists since Rawlinson have often tried to find negro or nigritic types on the sculptures representing Elamites, and French explorers (F. Houssay and Dieulafoy) have recently contended that traces of dusky tribes, relatives of the nigritic aborigines of India, are recognizable in modern Susiana. Various tribes of southern Arabia seem to show African, non-Semitic descent; on Assyrian reports of "dark Arabians" see Winckler, *ib.* p. 144. Glaser, however ("Skizze der Geographie und Geschichte Arabiens," ii. 326-329), treats Cush as a brown-red race, extending in earliest time through Elam, Arabia, and eastern Africa. Others deny the possibility of connecting the three groups, and assume that their names possessed only an accidental similarity, completed by the ancient, vowelless orthography.

E. G. H.

W. M. M.

—**In Rabbinical Literature:** "Cush" in rabbinical literature is taken to be Ethiopia. According to an old Haggadah known to the pre-Christian Hellenistic writers, the wife of Moses, "the Cushite" woman, was the Queen of Ethiopia. Rashi claims that she was merely designated as an Ethiopian on account of her beauty, in order to protect her from the evil eye, but Onkelos makes her a "beautiful" woman, following in this the Talmudic application of the derivatives of the name, such as "Cushi," "black" persons of "negro" race, distinguished thus by their color from other men, to draw a lesson from a comparison for Israel. כושי משונה, the "distinguished Cushite" (= negro), is a standing expression in these Talmudic analogies (Yer. Mo'ed

Katan 16b). In Sifre to Num. § 99, the question is raised, "Was Moses' wife an Ethiopian?" and the answer is given, "She was 'beautiful' and thus 'distinguished' as the Cushi is by his color, by her beauty." In further development of this identification of "Cushite" with "negro," the former becomes simply a synonym for "black" (Suk. 34b; B. B. 97b). In Isa. xi. 11 Targum renders "Cush" by הודאי ("India"), and in their discussion of Esth. i. 1 (Meg. 11a), Rab and Samuel dispute whether Cush is at the furthest extremity of the world or very close to India. The latter opinion rests on the confusion of Cush with the name of a province extending to the borders of India, Huzistan probably (Neubauer, "G. T." p. 386).

E. C.

E. G. H.

CUSTOM (Hebrew, "Minhag"): An old and general usage, or a religious practise, not based on any particular Biblical passage, and which has, through the force of long observance, become as sacred and binding as laws instituted by the proper authorities.

"Custom always precedes law" (Soferim xiv. 18). This is true not only of the Talmudic laws prescribed by the Rabbis, but also of many Biblical institutions. Many statutes and commandments, civil, moral, and ecclesiastical, found on the pages of Scripture undoubtedly had their origin in the customs of the people, which, however, became modified and fixed by being inscribed on the sacred books. Some of the customs, as, for instance, circumcision, or the prohibition of eating blood or of eating the "sinew which shrank," may date back to patriarchal days; others, again, may have a later or perhaps a foreign origin. Moreover, even after the laws had been written down, the manner and form of practise could not always be detailed; and although the Talmud (Zeb. 115b; Sifra to Lev. xxv. 1; see Maimonides' Introduction to the Mishnah) relates that all the details of the Law were delivered by Moses to Israel, there were still many tribal and family customs which must have remained unmentioned. For example, the acquisition of property by the exchange of a garment of some kind ("kinyan sudar") is mentioned (Ruth iv. 7) as an old custom.

Customs which grew up among the people in various places and in different forms, the Rabbis consider of binding importance. "When thou comest to a town follow its customs, for when Moses went up to heaven he refrained from food for forty days and forty nights; and when the angels came down to visit Abraham they partook of his meal, each one submitting to the custom of the place" (Gen. R. xlviii. 16; B. M. of Custom. 86b). Even God Himself complied with the prevailing custom when He buried Moses (Sanh. 46b). If a judge be in doubt concerning a certain law, he is advised to follow the common usage of the people (Yer. Peah vii. 5; Ber. 45a). Should a custom conflict with some established institution ("halakah"), the custom frequently takes precedence (Soferim xiv. 18; Yer. Yeb. xii. 1). The court was equally empowered to inflict punishment upon the transgressor of a custom as upon the transgressor of a written law (Yer. Pes. iv. 3; compare Bek. 2a; Tos. s. v. "Konsin"). To the question, Why men of the present time, who are

acquainted with the calendar, must observe the second day of the holidays, the reply is "Be careful with the customs of your fathers" (Bezah 4b; Maimonides, "Yad," Kiddush ha-Hodesh, v. 5). The later rabbis emphasized still more the importance of custom and precedent, making them of almost equal weight with Biblical injunctions (Shulhan 'Aruk, Yoreh De'ah, 376, 4, Isserles' gloss). "Remove not the ancient landmark which thy fathers have set" (Prov. xxii. 28), was interpreted to refer to the ancient customs of the Jewish people (Yalk. *ad loc.*).

In civil cases the customary law was very frequently consulted. "Everything depends on the custom of the land," was a general principle of the Rabbis. Partners who agreed to divide a piece of land among themselves were obliged to contribute equally to the building of the fence. The material of which the fence should be made and the thickness of the fence were decided by the custom of the land

(B. B. 2a; "Yad," Shekenim, ii. 15;

Legal Ap- Shulhan 'Aruk, Hoshen Mishpat, 157, **plications.** 4). The length of a day's labor and the kind of food to be given to the laborer are also regulated by custom (B. M. 83a; "Yad," Sekirut, ix. 1; Hoshen Mishpat, 331, 1, and Isserles' gloss). Whether a domestic servant is obliged to pay for breaking house utensils during service also depends on custom ("Pitche Teshubah" *ad loc.*). The charge of unchastity ("ta'anat betulim") could not be advanced against a woman in a place where bride and groom were permitted to remain by themselves before the marriage (Ket. 12a; "Yad," Ishut, xi. 8; Shulhan 'Aruk, Eben ha-'Ezer, 68, 1).

The Talmud recognizes different kinds of customs: (1) of the land; (2) of the locality; (3) of the men of Jerusalem; (4) of certain families; (5) of the pious; (6) of scholars; (7) of chaste women; (8) of the Patriarchs; (9) of the Prophets; (10) of the non-Jews; and (11) of the common people.

The provinces of Judea and of Galilee had peculiar customs, which differed greatly from one another. The Galileans and the inhabitants of Jerusalem used to include in the marriage contract ("ketubah") the condition that, if the husband died first, the widow should be permitted to live in his house all the days of her widowhood, while the Judeans added to it,

"or until the heirs agree to pay her the

Differences money due to her by the contract" **of Custom.** (Ket. 52b). The Galileans abstained from work the whole day preceding Passover; in Judea work was permitted until noon (Pes. 55a; compare Frankel's "Darke ha-Mishnah," pp. 66-68).

Whether one may work on the day before Passover, or on the Fast of Ab, depends entirely on the local custom (Pes. 50a, 54b). In some places the sale of small cattle to non-Jews was forbidden; in other places this was not the case (Pes. 53a). The right to eat roasted meat on the eve of Passover also depends on local custom. Todos of Rome established among the Roman Jews the custom of eating roasted kids on Passover nights (*ib.*). In some places lights were not permitted in the houses on the eve of the Day of Atonement (Pes. 53b). These customs were permitted to remain; and the people were

obliged to observe the usages of their respective localities.

The men of Jerusalem also had their peculiar customs, which were often commended by the Rabbis. It was the practice among them, when a caterer was engaged to prepare a meal to which strangers were invited, and he spoiled it, to collect from him a fine for the disgrace caused both to the host and to the guests. In order to indicate the time when meals were ready and guests might enter, it was customary to hang up a screen in front of the door. So long as the screen was there, guests were welcome;

when the screen was removed, guests

Customs of might not enter (B. B. 93b). They were **Jerusalem.** very careful in their transactions, and in their bills they noted even the hour

of the day when the transaction took place (Ket. 93b). So zealous were they in the observance of religious ceremonies that they carried their "lulab" with them the whole day during the Sukkot festival (Suk. 41b). The "pure of mind" of Jerusalem would not sit down to a meal, nor sit in a court of justice, nor sign their names as witnesses, unless they were acquainted with their colleagues and assured of their fitness (Sanh. 23a). It was the custom in the courts of Jerusalem to dismiss both the principals and the witnesses before the discussion of the case by the judges commenced (*ib.* 30a).

Of the pious men—the earlier Hasidim—it is said that they used to spend a whole hour in preparing themselves for prayer. R. Akiba was accustomed to shorten his prayers when he prayed with the congregation, so as not to keep the people waiting for him (Ber. 30b). They are also reported to have been careful to hide sherds and broken glass three fists deep in the ground, so as not to obstruct the plowshare or to cause injury to passers-by (B. K. 30a).

R. Gamaliel II. set the example to all his contemporaries by a request he made before his death, to be buried in a plain cotton shroud—a custom which was followed by all Israel. This proved a great relief to the poor, who were unable to follow the luxurious customs formerly prevailing (M. K. 27b; Ket. 8b). It was the custom of R. Judah b. Illai to bathe his face, hands, and feet in warm water before Sabbath began (Sab. 25b). This also was adopted by the Jewish community (Shulhan 'Aruk, Orah Hayyim, 260, 1). The same rabbi was accustomed, before the eve of the Fast of Ab, to eat a crust of dry bread with salt and water while sitting near the stove, the most despised part of the house. This, with some modifications, was also incorporated among Jewish customs (Orah Hayyim, 552, 6). Women were accustomed not to work on Saturday night until the "Habdalah" had been recited; or on new moons, or on Hanukkah while the candles were burning (Yer. Pes. iv. 1; Orah Hayyim, 299, 10; Isserles' gloss, 417, 1, 470, 1).

While custom was thus regarded as very sacred and binding, the Rabbis were nevertheless careful to distinguish between custom and law (Yeb. 13b; Niddah 66a; Ta'an. 26b). New customs, although tolerated, were not regarded favorably; for the Rabbis aimed chiefly at unanimity and uniformity. It was a principle with them—fancifully derived from the expression "Lo titgodadu" (Deut. xiv. 1)—that

there should be no division in custom and observance, although violations of this were unavoidable and frequent. They considered an erroneous custom to be one that had no basis in the Torah, and such they were ready to discard ("Kizzur kelale ha-Talmud"; compare Yer. Pes. iv. 1).

As the Jews after the completion of the Talmud, wandered farther away from the centers of Jewish learning in Babylon, their customs became more and more divergent. Local usages grew up in every community, which were held in veneration by the people. Even the Geonim, who had a strong influence

over the Jews of the Diaspora between the seventh and eleventh centuries, did not wish to tamper with the local "minhagim." They even frequently advocated the retention of

a custom of which they themselves disapproved. In the course of time the customs increased in number; and the differences between them became very marked and portended danger of schism. Superstitions prevalent among the people of the dark ages frequently crept in among Jewish usages; and the Rabbis then became alarmed, and began to raise their voices against the multiplicity of customs. Maimonides vigorously decried this "minhag sickness," as Güdemann calls it, and Rabbenu Jacob Tam (1100-1171) said, in his epigrammatic style, that "minhag," when inverted, spells "gehinnam"; and that if fools are accustomed to do certain things, it does not follow that the wise should do likewise. During the thirteenth and fourteenth centuries many scholars endeavored to trace the origin of and the reason for the different customs; and a critical spirit prevailed even in the responsa of that period. This effort, the personal example of famous rabbis, and the synods that assembled at different places during that period, greatly helped toward introducing some uniformity in Jewish customs. The most important figure in this age is MhRIL, or Rabbi Jacob Levi Molin, who was born in the middle of the fourteenth century in Mayence and died in Worms in 1427. His book on minhagim, which was published after his death, became the standard for many generations for synagogal and communal customs (see Güdemann, "Gesch. des Erziehungswesens," iii.).

Of far greater consequence than all these local differences of custom is the division between the Sephardim (Jews adhering to the Spanish and Portuguese ritual) and the Ashkenazim (those adhering to the German and Polish rituals). These differ not only in minor customs and observances, but also in

the pronunciation of Hebrew and in their liturgies. The Sephardim have retained the pronunciation of Judea, while the Ashkenazim are considered to have brought with them the language of Galilee. They also differ in the manner of intoning their prayers; the Sephardim still maintaining the old Oriental chants, while the Ashkenazim have permitted a strong European element to enter into their synagogal music. The important portions of the service are alike in both, with some possible variations of words and phrases; but in the prayers of later origin the divergence is very great. The Ashkenazim are supposed to have brought their

prayer-book from Tiberias, Galilee, the earliest authority for which is the Mahzor Vitry (1208), while the Sephardim are supposed to have brought theirs from the Babylonian schools of the ninth century (R. Amram, "Siddur"; see AMRAM BEN SHESHNA). R. Joseph Caro, the compiler of the Shulhan 'Aruk, himself of Spanish origin, in his code followed the Sephardic customs to a very large extent. This fact induced R. Moses Isserles of Cracow to add his annotations, remarking especially the more rigorous customs prevailing in the Ashkenazic Jewish communities. The Shulhan 'Aruk, which first appeared in 1565, became, therefore, the standard in law and custom for all Jewry (see CARO, JOSEPH).

The Cabala, which flourished among the medieval Jews, left an indelible impress upon the customs of the people. Besides the many new customs that were introduced in its wake, many of the old ones changed their form and meaning by receiving cabalistic interpretations (compare Hul. 105b). Even the learned and the scholarly were influenced by its mysterious teachings, and in preparing their codes of laws and in writing their responsa on religious questions, evil spirits, magic, combinations of letters and words to produce certain effects were taken into account. This spirit crept even into the prayer-book, provided amulets for infants, regulated the manner of putting on the garments in the morning, washing the hands, and so forth (Orah Hayyim, 3, 3, 11; 4, 2, 12, 19). The customs adopted by some of the great cabalists were collected and published to serve as a guide to their followers ("Minhag ha-ARI" = The Customs of R. Isaac Luria).

The Cabala is still of great value and of much influence in the lives of the Hasidim, a sect numbering hundreds of thousands of Russian, Galician, and Rumanian Jews. Founded by Israel Ba'al Shem in the beginning of the eighteenth century, this sect has since grown to very large proportions, in spite of the "mitnaggedim"—the rabbis and communities that opposed them. Although they do not discard the laws and customs of the Shulhan 'Aruk, they still attach more importance to worship than to religious observance. In their service they follow to a large extent the Sephardic ritual, although they have retained the Ashkenazic pronunciation of Hebrew (see HASIDIM; BA'AL SHEM-TOB).

At the beginning of the nineteenth century a movement was set on foot among German Jews to introduce reforms in the Jewish service. Originating as it did with the rejection of a portion of the beliefs upon which the old service was founded, the movement also extended to other aspects of Judaism, and resulted in a change not only in the form of synagogal worship, but also in the practise and observance of the religious laws of the Jews. New customs were instituted, such as confirmation at the Feast of Shabu'ot, instrumental music on Sabbaths and on holidays, and so forth. Since the beliefs varied in different communities, the practise also varied; and although the Reform movement counts to-day many votaries in Europe and in America, there is not yet any uniformity in custom. Old Jewish usages, however, still survive in the majority of communities, frequently modified to suit mod-

ern requirements. See REFORM; RITUAL; CONFERENCES, RABBINICAL.

CUSTOMS. See BRIDEGROOM OF THE LAW; BURIAL; CEMETERY; CHILDBIRTH; FOLK-LORE; FUNERAL RITES.

CUTHAH or **CUTH** (Hebrew, כוּתָּה, כוּתָּה; LXX., *Χουθά*; Eusebius and Jerome, *Χουθά*; Assyrian, "Kutu"): One of five cities from which Sargon, King of Assyria, brought settlers to take the places of the exiled Israelites (II Kings xvii. 24, 30). These settlers were attacked by lions, and interpreting this to mean that their worship was not acceptable to the deity of the land, they asked Sargon to send some one to teach them, which he did. The result was a mixture of religions and peoples, the latter being known in the Talmud as כוּתִּיִּים ("Cutthim") and כוּתִּיָּא ("Samaritans"). They "are called in the Hebrew tongue 'Cutheans,' but in the Greek 'Samaritans'" (Josephus, "Ant." ix. 14, § 3). In the Assyrian inscriptions "Cutha" occurs on the Shalmaneser obelisk, line 82, in connection with Babylon. Dungi, King of Ur, built the temple of Nergal at Cuthah (Schrader, "K. B." iii. 81a), which fell into ruins, so that Nebuchadnezzar had to rebuild the "temple of the gods, and placed them in safety in the temple" (*ib.* 51b). This agrees with the Biblical statement that the men of Cuthah served Nergal (II Kings xvii. 30). Cuthah has been identified with the ruins of Tell Ibrahim, northeast of Babylon, uncovered by Hormuzd Rassam. The site of the Nergal temple can still be pointed out. Josephus places Cuthah, which for him is the name of a river and of a district ("Ant." ix. 14, §§ 1, 3), in Persia, and Neubauer ("G. T." p. 379) says that it is the name of a country near Kurdistan. See Schrader, "C. I. O. T." pp. 270 *et seq.*

G. B. L.

CUTTINGS: In Biblical usage, incisions or gashes in the flesh. The Law forbids the Israelites to make any cuttings in the flesh. For this operation two terms are used: "hitgoded" (Deut. xiv. 1) and "saraṭ" (Lev. xix. 28). From the context of these passages it is plain that some connection obtained between the practise so prohibited and the customs of mourning. In the days of Jeremiah such cuttings in the flesh seem to have been the prevalent method of manifesting grief at the death of kindred. The custom is anything but offensive to the prophet; for he mentions (Jer. xvi. 6) the impossibility of mourning for the dead in the usual way as one of the dire penalties awaiting the disobedient people. Other passages confirm the prevalence of this custom as a demonstration of grief and mourning (*ib.* xli. 5, xlvii. 5). From Biblical and other sources it is known that the practise was common to other peoples. Passages in Jeremiah (xlvii. 5, xlviii. 37; compare Isa. xv. 2) prove it to have been customary among both the Philistines and the Moabites; for the Arabs it is attested by Wellhausen ("Reste Arabischen Heidentums," p. 181),

and it is still practised by the Persian Mohammedans at the annual celebration in memory of Ali, Hasan, and Husain.

The assumption that this peculiar habit resulted from a desire to emphasize sorrow is insufficient; and the prohibition is certainly not founded on the idea that such excesses of grief were displeasing to God. The practise is interdicted as "defiling." This term suggests that the rite had originally some significance of a ritual character, and was part of a scheme of worship. This is apparent in I Kings xviii. 28, where the priests of Baal at the sacrifice cut their flesh in order to bring about the gracious reception of their offering and to elicit from their god an answer to their prayer. Some such meaning the custom must have had in the remote days of Israel. The prophet Hosea (vii. 14) reproaches the people because, contrary to the commandment of יְהוָה, they made cuttings in the skin in order to obtain wheat and wine (the reading of the LXX. = יִתְנוּדָדוּ).

A still earlier purpose than that of winning the favor of the Deity must be sought. Originally the custom was connected with the worship of the spirit of the departed. The tearing of the garment as a sign of mourning is a modification of the primitive ritual customs associated with the cult of the dead. In Assyrian is found the cognate verb for the Hebrew "saraṭ," in the sense of rending one's garment (see Delitzsch, "Assyrisches Handwörterbuch," s.v. "Sharaṭu"), the garment being a later substitute for the skin, which in primitive days was slashed and cut in honor of the dead. When the Law (Deut. and Lev.) prohibited this custom, the original association with the cult of the dead may no longer have been present in the mind of the people. It was, however, regarded as a heathenish practise, belonging to the service of Baal; and as such it was objectionable, and called for suppression.

Tattooing (marking the skin by pricking in pigments) is even at the present time a custom much in vogue in the Orient. It seems also to have been occasionally practised among the Israelites and other peoples of Bible days (Jer. xlvii. 5, xlviii. 37). It is prohibited in Lev. xix. 28.

For the custom of cutting the hair—also prohibited, and probably of similar origin—and its connection with funereal cults, see HAIR.

CUZZERI, SEMA (צִמְחָה קוֹצֵר): Italian poet; resident at Padua. He witnessed the terrible attack on the ghetto of Padua on Aug. 20, 1684. He portrays the sorrows of that time in an Italian poem entitled "L'Innocenza Illesa," and narrates the horrible cruelties recorded in Isaac Cantarini's "Pahad Yizhak"; he describes in detail the ghetto of Padua and the persecutions that occurred there, and defends the Jews against the groundless accusation, made at that time, of cruelties committed against the Christians of Budapest. The contents of the still unpublished poem are given in Antonio Ciscato's "Gli Ebrei in Padova," pp. 203 *et seq.* (Padua, 1901).

I. E.

CYMBALS: Musical instruments of percussion. The term is used in the A. V. in all passages except one (Zech. xiv. 20) as the rendering of the Hebrew "zelzelim" and "meziltayim." Known to most nations of antiquity, cymbals served to mark time or rhythm at dances or for singers and other musical performers. This is also their function in the Bible. In Ezra iii. 10 they accompany "hazozerot" (trumpets) only; but elsewhere they are mentioned in connection with several other instruments. They were prominent in the music at religious ceremonies (I Chron. xv. 16, 19; II Chron. v. 13, xxix. 25; Neh. xii. 27). Levites were set apart as cymbalists (I Chron. xvi. 42).

Cymbals were made of brass (I Chron. xv. 19; Josephus, "Ant." vii. 12, § 3; Yer. Suk. v., end), or of copper with a slight admixture of silver, to judge from a pair found in an Egyptian tomb. They varied considerably in size. Among the Arabs two different sets are in use: one, of a large diameter, at religious ceremonies; the other, of smaller size, to accompany the dance. A similar difference seems to be indicated by the several qualifications of the cymbals mentioned in Ps. cl. 5; viz., "high sounding" ("zilzele teru'ah") and "loud" ("zilzele shema"). The fact that Josephus (*l. c.*) describes only one kind, *πλατὰ* and *μεγάλα* ("broad" and "large"), has not been without weight in shaping the opinion that, as among the Arabs, so among the Hebrews, only the broad sort—*i. e.*, those of large diameter—were permitted at holy offices. The Mishnah, too ('Ar. 13a; compare Gem. 13b), is emphatic in stating that only one pair was used in the Temple. The "loud" (shema) cymbals have, in consequence, been explained as castanets, *i. e.*, four small plates fastened to the thumbs and forefingers of both hands (= *κρέμβαλα*, "seistra"; see Pfeiffer, "Ueber die Musik der Hebräer," p. 54)—but there is no warrant for the assumption (see illustrations in "Psalms," ed. Haupt, "S. B. O. T." pp. 232, 233).

The cymbals in use in the Second Temple were credited by the Rabbis of the Talmud with great antiquity, and had undergone repairs impairing the quality of the tone (Yer. Suk. v., end). Still their loud and far-carrying sound was also remembered (*ib.* 55c, below; Tamid 30b). The Temple cymbals were in charge of a special officer: Ben Arza is mentioned in this capacity (Shek. v. 1; Yer. Shek. 48a). His instruments gave the signal for the Levites to chant the psalms (Tamid vii. 3, 4). The verb used to denote playing on the cymbals is "hikḳish" (הִקְשִׁי), which, in connection with the preposition "upon" (עַל) occurring in some passages (where, however, other readings have בְּ = "with"), may possibly indicate that the instrument in the Temple consisted of only one plate, which was stationary, and was beaten by the performer with a clapper or hammer. In confirmation of this view the fact may be considered that, while in Biblical Hebrew the name is a plural (?) or a dual, in later Mishnaic it occurs as a singular.

In Zech. xiv. 20 the Authorized Version renders the Hebrew words "mezzilot ha-sus" by "bells," while the Septuagint has "bridles" (see BRIDLE), and the Targum translates them as "blankets"; *i. e.*,

caparisons. Rashi explains that reference is here made to נִקְשִׁוֹת ("clappers," or clapper-like, globe-shaped balls of metal), which, as he suggests by his translation into French, "tinter," emit a jingling sound—an explanation which Kimḥi, quoting Rabbi Eleazar b. Pedath (Bab. Pesahim 50a), accepts. The use of such contrivances to ornament horses' trappings is common in the Orient. In fact, "zilzol," in Talmudic Hebrew, is the name of a belt (hence the LXX. "bridle") ornamented with such clappers, worn by women of ill repute and indicative of their trade (Midr. R. to Esther i. 11; Soṭah 9a).

Perhaps the allusion in I Cor. xiii. 1 is also to this custom. The *κίμβαλον ἀλαλάζον*, taken as denoting such an attachment to a belt of this kind and purpose, expresses most strongly and strikingly the underlying thought of the passage.

E. G. H.

CYPRESS: Generally, the tree known to botanists as *Cupressus sempervirens*, and common to southern Europe and western Asia. In modern Palestine the cypress is frequently found in the neighborhood of towns, and is often planted in cemeteries. There is some confusion as to which Hebrew word connotes the tree so named. In the A. V. the word "tirzah" (Isa. xlv. 14) is rendered "cypress," the context showing that a hardwood-tree is intended. The R. V., however, has abandoned this translation and adopted "holm-tree." On the other hand, a marginal note to Isa. xli. 19 (comp. lx. 13) suggests "cypress-tree" as a better equivalent than the usual "box-tree" for the Hebrew "te'ashshur" (תַּאֲשִׁשׁוּר), while in II Sam. vi. 5 it is proposed to read "cypress" instead of "fir" for the Hebrew "berot."

The older tradition, which favors the identification of the te'ashshur with the cypress, is fairly reasonable. The Arabs distinguish two classes of cypress-trees. One they call "sharbin," also known as the "tar-tree," because tar is derived from it; it is distinguished by broad branches that spread out on both sides of the trunk. The other class is called "sarw" ("sarwah"), and is of a very straight growth. Both names are derived from a root meaning, according to Fleischer, "to loom up high." Corresponding to "sharbin" is the Assyrian "surwan," also "shurmenu," which is the Syriac "shurbina" (written also "sharwina") and the Targumic "shurbana"; it is the tree known in the Talmud as "turanita." While some of the ancient authorities assume that this species is the cedar, or the *Juniperus oxycedrus*, others render it by the Greek *κυπάρισσος*. The "sarw" ("sarwah"), for which the Syriac has the same name as for the "sharbin," is the *Cupressus sempervirens*, known also as *C. fastigiata*, or, according to Linnæus, *C. pyramidalis*. Though the original distinction has not been clearly maintained in the cognate languages, it is proper to base upon it the difference between the tree designated in Hebrew by "te'ashshur" and that known as "berosh." The te'ashshur is the variety called in Arabic "sarw"—*i. e.*, the straight-

growing—while the berosh is the tree known in Arabic as "sharbin," with branches spreading out. The "tirzah," also, is probably a tree of this family. The wood of the cypress was highly valued, and was used in the construction of ships (Ezek. xxvii. 5), of floors and doors, as well as for lances. Even musical instruments were made of this wood (II Sam. vi. 5). As in the Bible, so also in Assyrian inscriptions, the cypress is frequently mentioned in connection with other trees, but most generally with the cedar.

If the exact value of the Biblical names be in doubt, the accurate determination of the meanings of the terms occurring in the Mishnah and Talmud in designation of trees of the evergreen class is involved in still greater uncertainty. Etymological equivalents of these Biblical names can be found, and other words have been added, but which of them indicates the cypress, or either of the two kinds named, can not be definitely determined. "Berosh," in Tan. to Terumah ix., is explained as the pine; in other passages (B. B. 80b; Git. 57a; R. H. 23a) the cypress is named "toranita," which, again, in the catalogue of the fourteen or twenty-four kinds of evergreen trees (Ket. vii. 31c), is held to be the acacia ("shittah").

A curious custom may be mentioned in this connection: In Bethar, when a boy was born a cedar-tree was planted; when a girl, a cypress (Rashi, "pine"; Git. 57a). A new name for the cypress seems to be "ashuha," the "female" cedar or the cypress. It is plain, however, that the Rabbis understood by the various names which designated the cypress-tree, a tree of great endurance and hardness. An old saw illustrates this: "Why was this stone placed near the cypress?" (Peah viii. 20d); the meaning being, Why put one hard substance near another? or, Why ask puzzling questions?

E. G. H.

CYPROS: Wife of King Agrippa I., daughter of Phasaclus and Salampsio, and granddaughter of Herod I. She had three daughters, Berenice, Mariamne, and Drusilla; and two sons, Agrippa and Drusus, the latter dying in childhood (Josephus, "Ant." xviii. 5, § 4; *idem*, "B. J." ii. 11, § 6). When Agrippa I., while still a prince, was on the point of committing suicide in Idumæa because of his poverty and debts, his wife Cypros restrained him, and bade him appeal for assistance to his half-sister Herodias, Princess of Galilee ("Ant." xviii. 6, § 2). The alabarch Alexander Lysimachus, while refusing Agrippa's request for the loan of a certain sum wherewith to pay his debts, granted the money to his brave and clever wife Cypros (*ib.* 6, § 3).

G.

S. KR.

CYPROS: A woman of noble Arabian family; married about 75 B.C. the Jewish governor Antipater, to whom she bore five children, Phasaclus, Herod (afterward king), Josephus, Pheroras, and Salome (Josephus, "Ant." xiv. 7, § 3; *idem*, "B. J." i. 8, § 9). Once when Herod had to go to Augustus, he gave his mother, Cypros, and his sister into the care of his brother Pheroras, and had them taken

to Masada ("Ant." xv. 6, § 5); but his wife Mariamne and the latter's mother, who looked down haughtily upon Herod's mother and sister ("B. J." i. 22, § 3), had to be sent to a different place. *Κύπρις* ("Cypris") is found as a variant of *Κύπρος*. Herod built a fortified and pleasant retreat near Jericho and called it "Cypros" in honor of his mother ("Ant." xvi. 5, § 2; "B. J." i. 21, § 9). This stronghold was destroyed at the beginning of the Jewish war under Nero (compare Mussafia, "Cyprus," in Kohut, "Aruch Completum," vii. 169).

G.

S. KR.

CYPRUS: The large island in the easternmost basin of the Mediterranean, probably deriving its name from the Cyprus flower (*Κύπρος*), the Hebrew appellation of which is כפר. Josephus states ("Ant." i. 6, § 1) that the island, called כתיים in Hebrew, was named after the city "Ketion" or "Kition." Nevertheless the term "isles of Kittim" (Jer. ii. 10; Ezek. xxvii. 6) indicates that "Kittim" signified all the islands and coastlands of the West, and, according to I Macc. i. 1 (*Χετταίμ*) and viii. 5 (*Κιτιέων βασιλεία*), included Macedonia, and, according to Dan. xi. 30, even Italy. The inhabitants of Cyprus were at first, perhaps, Carians; in historical times, Phoenicians; and later, Greeks. During the last period, as the Judean Agrippa writes to the emperor Caius, the Jews were numerous there (Philo, "Legatio ad Caium," 36; ii. 587, ed. Mangey). They stood in intimate relationship with the inhabitants of the island, and the favorable decree of the Romans regarding Jewish subjects was sent also to Cyprus (I Macc. xv. 23). During the war over the city of Ptolemais between Alexander Jannæus and Ptolemy Lathyrus,

King of Cyprus, the Jews suffered severe losses, and Cleopatra III. of Egypt, mother of the Cyprian king, despatched her Hebrew commanders Chelkias and Ananias to the aid of Alexander Jannæus, who thereupon defeated the Cyprians. Referring to this event, Josephus ("Ant." xiii. 10, § 4) quotes the statement of Strabo that the Jews of Cyprus remained steadfast in their allegiance to the party of Lathyrus, notwithstanding the high favor shown them by Queen Cleopatra.

In Cyprus as in Egypt, the Jews fared well at this time; and a distinguished Cyprian Hebrew, Timius by name, married Alexandra, daughter of Phasaclus and Salampsio, the latter a granddaughter of Herod the Great. This union, however, was without issue ("Ant." xviii. 5, § 4). Christianity was preached here among the Jews at an early date, Paul being the first, and Barnabas, a native of Cyprus, the second, to disseminate the new doctrine (Acts

iv. 36, xi. 19, xiii. 5, xv. 39); and according to a legend Barnabas was killed here by the Jews ("Acta Barnabæ," § 23). There is also an account, agreeing well with what is known from classical authors concerning the fertility of Cyprus, that Queen Helen of Adiabene had fruit brought from the island to Jerusalem. Under the leadership of one Artemion, the Cyprian Jews participated in the great uprising against the Romans under Trajan (117), and they are reported to have massacred 240,000 Greeks (Dio Cassius, lxxviii. 32). This

insurrection was finally quelled after considerable bloodshed (perhaps by Q. Marcius Turbo, who suppressed the uprising in Cyrene and Egypt), with the result that the Jews of Cyprus were almost entirely extirpated. The blood of the Jews slaughtered in Palestine is said to have streamed as far as Cyprus (Lam. R. i. 16, iv. 19); that is, the insurrection and the consequent slaughter of the Jews extended to Cyprus. In further punishment a severe law was enacted, according to which no Jew was thereafter to be permitted to land on Cyprian soil, not even in case of shipwreck; nevertheless Jewish residents were still to be found upon the island at a later period; and the products of the soil, to which Talmudists frequently refer (for instance, the "cumin" of Cyprus, Yer. Dem. ii. 1), were probably brought into the market by them. So rapidly did the Jews multiply that in 610 they were sufficiently numerous to participate in the insurrection against the Greeks under Heraclius.

A scholar, Moses of Cyprus by name, is said to have been arbitrator (in the eleventh century) between the Armenians and the Greeks ("Zeit. für Hebr. Bibl." vi. 116). Benjamin of Tudela found in Cyprus a number of Jewish communities, one of which was guilty of the heresy of observing the Sabbath from Saturday morning to Sunday morning, instead of from Friday evening to Saturday evening. Judah Mosconi also visited the island, as did Menahem ben Perez (Zunz, "Gesam. Schriften," i. 168). In 646, and again in 1154, Cyprus was devastated by the Arabs; in 1571 it was annexed by Turkey, having been wrested from the Venetians on the advice of Don Joseph Nasi, who came near attaining to the dignity of the Cyprian crown (Hammer, "Gesch. der Osmanen," iii. 564). In 1878 Cyprus came under English rule.

S. KR.

During the last twenty years of the nineteenth century several attempts were made to colonize Russian and Rumanian Jewish refugees in Cyprus. The first attempt, in 1883, was made by Friedland, and a settlement of several hundred Russians was effected in Orides near Papho. In 1885, 27 Rumanian families settled in the island as colonists, but were not successful (see "Ha-Meliz," 1888, No. 71, col. 1136). Nothing daunted, Rumanian Jews in 1891 again bought land here, though they did not themselves emigrate. Fifteen Russian families under the leadership of Walter S. Cohen founded a colony in the year 1897 at Margo, with the help of the Abawat Zion of London and the Jewish Colonization Association; and in the year 1899 Davis Trietsch again advocated colonization in Cyprus, especially for Rumanian Jews. As a delegate to the Third Zionist Congress at Basel, in Aug., 1899, he attempted to get an indorsement of the project from the congress; but he was met

Recent Col- by a decided refusal ("Stenogra-
onization. phisches Protocoll des III. Zionisten-
Congresses," p. 232). He nevertheless persevered, inducing a dozen Rumanian Jews and, in the spring of 1900, twelve of the Boryslav miners to emigrate to the island. Twenty-eight Rumanian families followed these; and the colonists received assistance from the Jewish Colonization Associa-

tion. These settlers have farms at Margo, and at Asheriton ("Jewish Chronicle," April 20, 1900, p. 18). The colonists in Cyprus have not prospered; and it is said that the government is opposed to a wholesale immigration of Rumanians ("Bulletin All. Isr." 1900, No. 25, 32). Notwithstanding these reverses, the Jewish Colonization Association has continued to give a small support to the work in Cyprus.

In 1900 there were 36 persons living at Margo ("Palästina," i. 65). In 1902 a pamphlet was presented to the Parliamentary committee on alien immigration in London, bearing the title "The Problem of Jewish Immigration to England and the United States Solved by Furthering the Jewish Colonization of Cyprus." In 1901 the Jewish population of the island was 63 males and 56 females. See W. Bambus, "Jüd. Kolonisation in Cyprien," in "All. Zeit. des Jud." 1899, p. 436.

CYRENE: A large and important city in Cyrenaica, the district of Upper Libya on the north coast of Africa, west of Egypt. Cyrene was one of the five large cities that gave to this region the name of "Pentapolis" (compare Josephus, "B. J." vii. 11, § 1; Targ. Yer. Gen. x. 13, 14; Targ. I Chron. i. 12). Many Jews went from Egypt to Cyrenaica, for even Ptolemy I. Lagus sent Jewish settlers to Cyrene and other cities of Libya (Josephus, "Contra Ap." ii. 4). According to Strabo (cited by Josephus, "Ant." xiv. 7, § 2), the inhabitants of Cyrene at the time of Sulla (c. 85 B.C.) were divided into four classes: citizens, farmers, resident aliens, and Jews; and the extant fragments of the same author show that Lucullus was sent to Cyrene by Sulla to quell disturbances in which the Jews were taking a prominent part. When concessions to the Jews were recommended by the Romans to the various authorities of the East (I Macc. xv. 15-24), the city of Cyrene was among those that received such notification. In 74 B.C. Cyrene was created a Roman province; but, while under the Egyptian kings the Jews had enjoyed equal rights (*ισωνμία*), they were now oppressed by the autonomous Greek population ("Ant." xvi. 6, § 1).

Several Jews of Cyrene are known to history, among them being Jason of Cyrene, whose work is the source of the Second Book of Maccabees (see II Macc. ii. 23), and Simon of Cyrene, who carried Jesus' cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26). In the Acts of the Apostles several Cyrenians are mentioned as being present at the Feast of Pentecost in Jerusalem (Acts ii. 10), where they had their own synagogue (*ib.* vi. 9). Some, including Lucius (*ib.* xiii. 1)—said to have been the first Bishop of Cyrene—went to Antioch (*ib.* xi. 20).

The Jews of Cyrene were in close touch with their brethren in Palestine, and were free to forward their offerings to Jerusalem ("Ant." xvi. 6, § 5). Agrippa sent a letter written in their favor to the Cyrenians ("B. J." ii. 16, § 4). Three sons of a certain Ishmael—who was beheaded in Cyrene—were present at the siege of Jerusalem (*ib.* vi. 2, § 2); and after the war had been ended in Syria, the Romans still met with

opposition in Cyrene, where the Sicarian Jonathan incited the Jews to a riot. The disturbance was, however, quickly suppressed by the governor Catullus ("B. J." vii. 11, § 1; "Vita," § 76).

More serious was the insurrection of the Jews of Cyrene under Trajan (117 C.E.). This was quelled by Marcius Turbo, but not before about 200,000 Romans and Greeks had been killed (Dio Cassius, lxxviii. 32). By this outbreak Libya was depopulated to such an extent that a few years later new colonies had to be established there (Eusebius, "Chronicle" from the Armenian, fourteenth year of Hadrian). Bishop Synesius, a native of Cyrene in the beginning of the fifth century, speaks of the devastations wrought by the Jews ("De Regno," p. 2).

The Targum (Amos i. 5, ix. 7) identifies Cyrene with the Biblical Kir; but this is suggested only by a similarity of sound, and is not warranted (compare Targ. II Kings xvi. 9, and Payne Smith, "Thesaurus Syriacus," p. 3564). Cyrene fell into ruins in Mohammedan times. The spot is now (1902) marked by the village of Grenne or Kurin, in the province of Barka.

G. S. KR.

CYRIL (called also **Constantine the Philosopher**): Apostle of the Slavonians and author of the Slavonic alphabet (Cyrillitza), which is probably a modification of an older Slavonic alphabet (Glagola); born at Salonica about 820; died in Rome Feb. 14 869. His baptismal name was Constantine, and on account of his learning he was called "the philosopher." In his last days he became a monk, and took the name Cyril, by which he is generally known. When the empress regent, Theodora the Byzantine, received in 848 a deputation from the king of the Chazars, with the request to send him a learned man to conduct a religious controversy with the Jews and Mohammedans, Cyril and his elder brother Methodius (died 885) were chosen for the mission. On their way they stopped at Kherson (Chersonesus), and Cyril acquired a knowledge of the Hebrew language and literature from the Jews of that place. He then translated into Slavonic the Old Testament and "eight parts" of the Hebrew grammar.

According to Archbishop Filaret, in his treatise on Russian theological literature entitled "Obzor Russkoi Dukhovnoi Literatury," published in "Uchonyia Zapiski Vtorovo Otdyelyeniia Akademii Nauk," iii. 1, 3, the philosopher translated the "eight parts" of the grammar from Hebrew into Greek. This translation is now lost, as is also his work on the controversy with the rabbis, which his brother Methodius translated into Slavonic. A. Harkavy, in his treatise "Slyedy Znakomstva s Yevreiskim Yazykom," etc., on traces of the knowledge of Hebrew in the ancient Russian writings, is of the opinion that the grammar referred to was translated from Greek into Slavonic.

Owing to the friendship existing at that time between the Byzantine empire and the kingdom of the

Chazars, it was natural that Constantine should succeed in converting a couple of hundred heathens and Greeks to the Greek Catholic Church; the majority of the people, however, remained Mohammedan, and the king and his court still confessed Judaism at about the middle of the tenth century, as is seen from the letter of King Joseph to Hasdai ibn Shaprut, dated about 960.

CYRUS (Persian, "Kurush"; Babylonian and Suisian, "Kurash"; Hebrew, כִּרְשׁ and כּוּרֶשׁ; Masoretic, "Koresh"; Greek, Κύρος): The founder of the Persian empire. The name is also found in India as "Kurus," and is evidently Aryan. The translation "sun" given by Ctesias (in Müller's edition of Didot's "Herodotus," fragm. 29, 49) is due to a confusion with a Persian word, which appears in Zend as "huare."

Persian tradition has surrounded the founder of the empire with many myths. Herodotus, writing about 430 B.C., says (i. 95) that four different stories were current concerning the origin of Cyrus. One

of these, to the effect that he was exposed as a child and suckled by a she dog, is rejected by Herodotus (i. 122).

Sources. It is found, however, in an ancient Greek author (probably Charon of Lampsacus; see Gutschmid, "Kleine Schriften," v. 66), from whom it was borrowed by Dinon, and from the latter again by Trogius Pompeius. This myth, in various forms, is current among many peoples, the most familiar example being the story of Romulus and Remus. It was in all probability narrated of Kai Chosrau, the mythical king, long before Cyrus (Nöldeke, in "Grundriss der Iranischen Philologie," ii. 132 et seq.). The second version which Herodotus examines is the rationalistic transposition of the first; and here the she dog is metamorphosed into a shepherdess of the name of Spako. In Herodotus, another myth, in which Cyrus is the son of a Persian named Cambyses and of Mandane, daughter of the Median king Astyages, is blended with the preceding. In this myth a dream (which Sophocles has embodied in his "Electra," verse 422) foretells that the son of Mandane is to conquer all Asia. The kingship of Cyrus is legalized in this narrative, which makes him the lawful successor of the Median kings. This narrative of Herodotus was controverted about 390 B.C. by Ctesias, who states that Cyrus was not related to Astyages, but that, after dethroning him, he married Astyages' daughter Amytis. This statement is probably correct. Other and purely mythical narratives, probably originating with Ctesias, are contained in the fragments of Dinon (c. 340 B.C.) and of Nicolaus

Damascenus (under Augustus). The story or novel entitled "Cyropædeia," which Xenophon wrote in his old age (after 360), has no value for the historian.

Herodotus has, however, retained, in addition to the legendary features, the historical statement that Cyrus was descended from an old royal family of Persia (i. 125, vii. 11). As regards the deeds and conquests of the king, the traditions in Herodotus are correct, although several features suggest mythological embellishments. Concerning the death of Cyrus, Herodotus knew many traditions (i. 214); yet he relates only those which appear to him the most credible. In Ctesias, however, the traditions are extravagant and distorted.

Thoroughly trustworthy historical accounts of the wars of Cyrus against Babylon, and the manner of his death, are preserved in the fragments of the Babylonian historian Berosus (c. 280 B.C.); while his dealings with the Jews are recorded in the Old Testament. Of the monuments erected by the Persians to his memory, only his tomb now remains. A number of authentic records have, however, been brought to light in Babylon. Among these are: (1) references in the inscriptions of Nabonid; (2) the so-called "Cylinder of Cyrus," or the proclamation which Cyrus issued to the inhabitants of Babylon after the conquest of that city (Rawlinson, "Cun. Inscr. of Western Asia," v. 35); (3) the annals of Nabonid, the last king of Babylon, which were collected after his death, and which contain a summary of the events of his reign; and (4) about 400 private Babylonian documents, dated according to the years of Cyrus' reign.

The Persians dwelling along the southwestern spurs of the Iranian highlands, the Farsistan of today, became divided into a number of tribes, enumerated by Herodotus (i. 125). Among these tribes were the Persian Pasargades in the district watered by the River Araxes (now Kur or Benda-mir) and by its principal tributary, the Medos or Kyros (Pulwan), where, later, the city of Persepolis (Istakhr) was founded. This tribe was ruled by the dynasty of the Achæmenidæ, to which Cyrus belonged.

In the middle of the sixth century all Iran, and very likely also the kingdom of the Achæmenidæ of Anshan, were subject to the Median kingdom. Nabonid (Rawlinson, *l.c.* v. 64, line 29) designates Cyrus as a petty vassal of the Median king Astyages. According to Herodotus (i. 214), Cyrus was king for twenty-nine years; he therefore succeeded his father in 558. Ctesias and Dinon (fragm. 10), like Justin (i. 8), give him thirty years. Ctesias' dates for this period are, however, unreliable. For the chronology of the Persian kings see E. Meyer, "Forschungen zur Alten Gesch." ii. 437 *et seq.* In 553 Cyrus revolted against Astyages, the date being firmly established by the above-mentioned passage of Nabonid. On the events of the war there is little information. If a few Greek sources, dating back to Ctesias and Dinon, are reliable (Polyænus, vii. 6, 1 [= c. 45, 2], 9; Nicolaus Damascenus, fragm. 66; Justin, i. 6), the Persians were at first repeatedly defeated, but finally gained a victory at Pasargadæ (compare Anaximenes

in Stephan of Byzance, "Strabo," xv. 3, 8). According to the annals of Nabonid, the troops of Astyages, in 550 B.C., revolted against their king, whom they took captive and delivered up to Cyrus (this is probably the origin of Herodotus' story of the treachery of Harpagus); Cyrus thereupon invested the city of Ecbatana, and carried off the spoils to Anshan.

In the rising of Cyrus against the Medes only three of the Persian tribes participated—the Pasargades, Maraphians, and Maspians; and it was only after the victory that the whole people became united (compare E. Meyer, "Gesch. des Alterthums," iii. 10). This explains why in the annals of Nabonid Cyrus is thereafter no longer designated as "King of Anshan," but as "King of Persia."

The rise of Cyrus was at first hailed by Nabonid as propitious; for not only was the danger threatened by the Medes thereby removed, but it also became possible to occupy Harran, and to rebuild the temple of Sin, which had been destroyed (Rawlinson, *l.c.* v. 64; compare Scheil, "Recueil de Travaux Egyptiennes et Assyriennes," xviii.; and Messerschmidt, "Stele Nabunaid's," in "Mittheilungen der Vorderasiatischen Gesellschaft," 1896, i. But the neighboring kingdoms soon became aware that the new state was more dangerous than the old one, united to them as the latter had been by means of treaties and dynastic alliances. Thus it came about that a powerful coalition was formed against Cyrus by Babylonia, Egypt, Lydia, and Sparta. The attack was commenced by Cræsus of Lydia in 546; but Cyrus anticipated his adversaries, and before their armies could unite, he defeated Cræsus and took him captive in his own capital, Sardis (546). In the following year the generals of Cræsus completed the subjugation of Asia Minor.

A war against Babylon was now inevitable. In 547 Cyrus had already crossed the Tigris below Arbela, and had conquered a state, the name of which is unfortunately obliterated in the annals of Nabonid. The crash came in 539. Nabonid was not the legitimate heir to the throne, but had been elevated thereto in 556–55 by the magnates, who had supported the incompetent Labashi-Marduk, the son of Neriglissar. The tenure of Nabonid had never been secure. He held aloof from Babylon, where

Portrait Sculpture of Cyrus.
(After Ball, "Light from the East.")

he did not feel safe, and sought support among the people of the rural towns and their deities, which latter were as a rule much older than Babel and its god Marduk. The jealousy of the cities and of their

Cyrus the final catastrophe of the Chaldean empire, and materially facilitated the victory of the Persians. Upon the approach of Cyrus, Nabonid had the gods of Accad (Babylonia) brought to Babylon, thereby still further embittering the priesthood of that city against him (for the correct date—erroneously given in the chronicles of Nabonid as Tam-muz—see E. Meyer, *l.c.* ii. 468 *et seq.*; Stade's "Zeitschrift," xviii. 339). Cyrus gained a victory, which incited rebellion in every part of the Babylonian empire. On Tishri 14 (Oct. 8) Gobryas and his Gutæan warriors occupied Sippara; two days later Babylon fell without a blow, and Nabonid was captured. On Marḥeshwan 3 (Oct. 27) Cyrus formally took possession of Babylon, but spared the city, and returned the rural gods to their respective towns. In his inaugural proclamation, preserved on the Cyrus cylinder, he attributes his victory to the grace of the god Bel-Marduk, who had overthrown Nabonid, and had sought out a just king who would restore the service and the honors due to the god.

There can be no doubt that Cyrus and his Persians, like Darius at a later period, were faithful believers in the pure doctrine of Zoroaster, and disdainfully regarded foreign cults; that they had the consciousness of a superior religious belief, and relied upon the protection of Ahuramazda, the great god who had created heaven, earth, and man, and had placed the world

His Religious Belief. at the feet of the Achæmenian kings. In a political sense, however, they were compelled to reckon with the

religions of the subjugated peoples; and Cyrus and his successors skilfully employed this necessity as a means of securing their power. The time-honored customs of the people were everywhere preserved. Cyrus always conformed to the traditions of the thrones he usurped, and, together with his son Cambyzes, rendered homage to the native deities. On the first day of the year, Nisan 1 (March 20), 538, in conformity with Babylonian custom, he grasped the hands of the golden statue of Bel-Marduk, and thus became consecrated as monarch. From this ceremony dates the first year of his reign as "King of Babylon, King of all the Lands."

Upon the downfall of the Chaldean empire the foreign possessions, Syria, Phenicia, Palestine, and

the border-lands of the desert, all became tributary to Cyrus. In 530 he placed his son Cambyzes upon the throne as King of Babylon, and organized a great expedition against the predatory nomads of the Turanian steppes, in which expedition he met his death (528 B.C.). He lies buried in the midst of his tribe, in Pasargadæ, the Murghab of to-day. The frequently expressed doubt ("Z. D. M. G." xlviii. 653) as to the identity of Murghab with Pasargadæ appears unfounded, as does more particularly the assumption that the figure on the tomb represents the younger Cyrus, the

brother of Artaxerxes II. Cyrus' tomb, restored by the Greeks in the time of Alexander, is still (1902) standing. On the pilasters, or galleries surrounding it, is the picture of the king, with four wings—typifying the soul, or "ferwer," of the great ruler—and a crown patterned on Egyptian models, and bearing the inscription, "I am Cyrus the king, the Achæmenian."

The earnest desire of the Jews for the downfall of the Chaldean kingdom was fulfilled; but the outcome was not what their prophecies had led them to expect. The political power of the Chaldeans had been broken, but no vengeance had fallen upon Babylon for its misdeeds. Instead of being destroyed as was anticipated, the city remained intact, and became the splendid winter residence of the Persian kings. Nor was the longed-for universal revolution, crowned by the establishment of the Messianic kingdom, effected. Another and more powerful pagan empire had taken the place of that which had been overthrown. The faith in the world-dominion of YHWH was now shaken, and dependency settled upon the Jews.

It was to counteract these evils that the anonymous comforter, conveniently called "Deutero-Isaiah," the author of Isaiah xl.-lv., now arose. The very fact that YHWH had carried out His prophecy in a wholly unexpected manner, by choosing a pagan to overthrow the idols of the nations, so that He alone might be acknowledged as the only true God, was accepted by the second Isaiah as the surest evidence of the divine government. This prophet, Cyrus, through whom were to be redeemed His chosen people, whom He would glorify before all the world, was the promised Messiah, "the Shepherd of YHWH" (xliv. 28, xlv. 1). Having received the sovereignty of the whole earth as the ransom for Israel, Cyrus would now rebuild Jerusalem for them. The chapters in question were published after the fall of Babylon (xlvi., xlvii., etc.); consequently, in the winter of 539-38, before the Return, and in Babylon itself, not, as Duhm believes, in Palestine. The fanciful hope of Deutero-Isaiah, that upon the return of the Jews the world would change its character, and the desert become level, fruitful, and well watered, was not

Cyrus and the Jews. fulfilled. Cyrus, however, permitted the Jews to return to their own land.

There was no reason to detain them longer in Babylon; and if they returned to their homes, they would be in a position to defend the border-land against Egypt and the desert. In the first year of his reign as King of Babylon, Cyrus issued from his summer residence, Ecbatana, an order for the return of the Jews and for the rebuilding of the Temple. Fragments of this edict are contained in a proclamation of Darius (Ezra vi. 2-5; compare *ib.* v. 13 *et seq.*); and the doubts as to the authenticity of this edict are as little justified as is the opinion expressed by Kusters (and approved by many) that the alleged return of the Jews during the reign of Cyrus did not take place at all. The reason why the Jews did not at once rebuild the Temple is to be found in the sorry economic condition in which they were left.

The author of II Chron. xxxvi. 22 has substituted

an invention of his own for the genuine edict of Cyrus contained in Ezra i. 1 *et seq.* Cyrus "the Persian" is also mentioned in Dan. vi. 28, x. 1, as the successor of the "Median" Darius (vi. 1). After all, the author of the Book of Daniel had a very vague conception of the history of the Persian empire.

CYZICENUS ANTIOCHUS. See **ANTIOCHUS IX. CYZICENUS.**

CZACKI, TADEUSZ: Polish statesman and author; born in Poryck, government of Volhynia, Russia, Aug. 28, 1765; died in Dubno, Volhynia, Feb. 8, 1813. When Prince Adam Czartoryski was placed at the head of the educational district of Wilna, Czacki was appointed school inspector of Volhynia, Podolia, and the Ukraine. An opponent of the Jesuits, he combated their work in the field of pedagogy, and on one occasion raised by public subscription the sum of two millions of Polish florins to insure the existence of the gymnasiums in Vinnitza and Kiev. In 1805 he founded the high school in Kremenetz, Volhynia, which was destined to be of inestimable benefit to the Poles. Its influence is still evident in Volhynia, Podolia, and the Ukraine. After Czacki's death his heart was deposited in one of the halls of this Volhynian school, under the inscription "Ubi thesaurus tuus, ibi est cor tuum." It was Czacki that discovered the grave of Copernicus, proving most conclusively the Polish origin of that great astronomer.

Czacki's "*Rozprawa o Żydach*" (Discourse on the Jews), first published at Wilna 1807, and translated into Russian by Basil Anastaszewicz, passed through several editions, and was published finally in "*Dziela Tadeusza Czackiego*" (Works of Tadeusz Czacki), edited by Edward Raczyński, Posen, 1845 (iii. 138-270).

For the history of the Jewish institutions, Czacki, who did not know Hebrew, availed himself of the only sources open to him; namely, Bartolucci and Ugolino.

After relating the primitive history of the Jews, Czacki describes their situation among the Arabs, Italians, Spaniards, French, Germans, and Hungarians. He tells of their entrance into Poland in the twelfth century; of their intellectual condition; of their government and laws; and of the persecutions to which they were subjected.

"Under the rule of most of the Christian governments," says Czacki in his "*Rozprawa o Żydach*," "they [the Jews] experienced indulgence rarely, oppression often, and disdain almost always" (p. 37). "Their profits were wrested from them." "Many a

writer considered it an honor to multiply the number of the insults against the Jews, or to charge them with horrible crimes" (p. 54). "In the reign of Sigismund III. of Poland the spiritual authorities ventured to give permission for the erection of synagogues. Permission was granted also for the print-

ing of books, which could not have been inspected, since in them are found criticisms and gibes against the Christians." Of a few Polish authors who wrote against the Jews—Mojecki (1598), Mieczyński (1618)—Czacki declares that "they have vented all that frenzy under the guise of religious zeal can utter" (p. 95).

Exemption from the poll-tax was granted in 1775 to those who would apply themselves to agriculture, and by 1787, owing to Czacki's efforts while he was serving on the Commission of the Treasury (see his report of 1787 on the Ruthenian and Ukrainian provinces), he had the satisfaction of seeing a few scores of families in the enjoyment of that privilege. There were many Poles who worked with Czacki for the emancipation of the Jews. "When, in the year 1794, despair armed the [Polish] capital, the Jews were not afraid of death, but, mingling with the troops and the populace, they proved that danger did not terrify them and that the cause of the Fatherland was dear to them" (the official organ of the Warsaw Revolution of 1794, and other Warsaw newspapers).

Chapter iv. of Czacki's "Discourse" contains a brief analysis of Duke Boleslaus' privilege, which was confirmed by Casimir the Great and by Duke Vitold; chapter vi., the sources of the laws with which the Jews were permitted to govern themselves, and an account of the Jewish civil law, according to Selden and Maimonides; chapter vii., an exposition of the criminal law; and chapter viii., an account of the state of learning among the Jews.

Chapter ix. bears the title "Of the Plan of the Reform of the Jews." In 1788 the Polish Diet directed its attention to the Jews. The Commission of the Treasury, of which Czacki was a member from 1786 to 1792, examined the subject, and found: (1) that there were in Poland about 900,000 Jews of both sexes, and that they multiplied exceedingly; (2) that the young generations bore to a gradually increasing extent the germs of diseases (especially *spina ventosa* and the itch), and that there were one and a half times as many deaths among Jewish children as among Christian children; (3) that the knowledge prevailing among the Jews was nothing but a systematic ignorance; (4) that the rabbis exercised a despotic authority; (5) that three-fourths of the export trade and one-sixteenth of the import trade of Poland was in Jewish hands; (6) that as the living expenses of a Jewish merchant were half as much as that of a Christian merchant, he could sell his goods more cheaply; (7) that bankruptcies were more frequent among the Jews than among the Christians; (8) that in the provinces, with the exception of Great Poland, almost one-half of the workmen were Jews; (9) that every city had barber-surgeons who possessed "no knowledge except experience"; (10) that there was no learned Jewish midwife in the whole country, wherefore many Jewesses died in confinement; (11) that there were fourteen Jewish agricultural families in the whole country; (12) that it was a very rare case for a Jewish fortune to hold together for several generations; (13) that the cause of the hatred of the Jews for those of a different faith was the pride peculiar to ignorant people.

The reforms in the laws regarding the Jews were to be based on the following grounds: (1) hitherto the government has tolerated the Jews; henceforth it must grant them the rights belonging to citizens; (2) the government has the right to require that the Jews should be educated in the measure of the needs of the country; (3) when the differences abasing the Jews disappear, all injurious disabilities will be abolished; (4) all trade and manufactures are free, but as the Jews have become the cause of the ruin of the peasants in the keeping of inns, that right is suspended. The project of reforms consisted of eight sections, from which the following passages are quoted: "The law recognizes the Jews as free people. . . . They can be elected officers, and they can elect officers, according to the universal laws. The law awards the same reward and the same penalty to Jews as to Christians. They are at liberty to acquire lands and mills by inheritance. . . . The authorities will permit those Jews to buy estates who will aid in the execution of this law, especially in the matter of the settling of Jews on farm-lands. This privilege is granted to all Jews after the lapse of twenty years. Taxes are to be the same for Jews as for Christians. No Jew shall be baptized until he has reached a proper age—the twentieth year in the case of men, the eighteenth in that of women. The civil and criminal laws of the Jews are discontinued. They shall, however, maintain their own religious institutions for the adjustment of religious affairs. A Jew that settles on farm-land is exempt from taxes for ten years. The most industrious Jewish agriculturists for the same interval will receive the value of ten bushels of rye. There will be twenty of these prizes." The remaining sections (iv.–viii.) consider in a series of paragraphs the education of the Jews; the Jewish superiors and their powers; the family and arbitration courts; the change of dress, and the use of the language in public and private transactions; the debts of the Jewish communities and the way of canceling them.

The short discourse on the Karaites ("Dziela Tadeusza Czackiego," iii. 271–285) attempts to explain, on the basis of the sources accessible to the author and referred to above, "what the Karaites are, and wherein they chiefly differ from other Jews; when their separation occurred; and in what countries they dwell."

S. Po.

CZARNIECKI, STEFAN: Polish general; born 1599; died at the village of Sokolovka, Volhynia, Feb. 12, 1664. Czarniecki distinguished himself in the wars against Sweden and Russia (1656–61), but unlike Wisniewitzki, who stands out as the protector of the Jews during the Cossack uprising, he dealt very harshly with them. After the Cossack rebellion of 1648 he joined Prince Potocki against Chmielnicki, but was surrendered to the Tatars after the defeat of the Poles at the Yellow Waters (see COSSACKS' UPRISING). He was released after a captivity of two years, then fought against the Cossacks again, and helped to defeat them near Beresteczko. When the Swedish king, Charles X., invaded Poland

and forced John Casimir to flee into Silesia, Czarniecki hastened to Cracow and besieged the castle, but lack of provisions soon forced him to retire. Poland was now made the battle-ground for Russia, Poland, and Sweden, and the Jews, receiving protection from none, were harshly dealt with by all.

The communities which had been spared the fury of Chmielnicki and his followers now felt the effects of the conflict. The Russians showed them no mercy; the Swedes gave them no protection; and the Poles accused them of being friendly to the Swedes, and cut them down in great numbers. Czarniecki dealt remorselessly with them. Retreating from the Swedes, he devastated the country and vented his rage on the Jews. He is said to have killed 200 in Kobylin; 100 in Mezhrich; 100 in Wreschen; 300 in Lenczyc; 600 in Kalisch, Posen, Petrokov, and Lublin. Hundreds of families were exterminated in Cracow (1656); many Jews, in order to escape a worse fate, drowned themselves in the river; and others changed their religion. The Poles destroyed the synagogues and took great delight in tearing up the Holy Writings. Some of the most important communities were utterly destroyed; others were reduced to a pitiful condition of ruin and helplessness. The numerous communities of Great and Little Poland became depopulated by war and migration, and the unceasing conflicts which led to the decline of Poland caused also the decline of Polish Judaism.

CZARNIKAU: Town in the district of Bromberg, province of Posen, Germany. The Jewish community of this town probably dates back to the beginning of the seventeenth century, at which time, according to tradition, the Polish prince Sapieha had various relations with the Jews living there. The community was most numerous in the years 1855–64, when it numbered 1,200 persons, while it numbered only 470 in 1815, and 600 in 1900. In place of the old synagogue, built in 1759, a beautiful and massive building was erected in 1878. In 1819 the new cemetery was laid out on the Posener Chaussée, the old one being transferred to the city to be laid out as forest. In 1843 the community built its own schoolhouse, which was enlarged in 1878. The elementary school, with three grades, is a public school; and its two teachers are appointed by the government. The community supports, in addition, a Hebrew religious school, with three grades, under the direction of the rabbi.

The following rabbis have officiated in the community: Isaac Fränkel, Elia Spiro (1830–55; distinguished for his Talmudic scholarship and piety; born at Inowrazlaw, and educated at the yeshibah of Lissa), Dr. Popper (1855–90), Dr. Freund (1893–1899). The present (1903) incumbent is Dr. Weyl. The Jewish societies of Czarnikau include: a Hebrew kaddisha, an Israelitische Frauenverein, a Verein zur Unterstützung Durchreisender Armen, and a Litteraturverein. For more than fifty consecutive years Jews have had a seat in the municipal council.

I. Co.

CZARTORYSKI, PRINCE ADAM GEORG: Polish statesman and patriot; born in Warsaw Jan. 14, 1770; died in Montfermeil Castle, near Paris, July 15, 1861. After the final partition of Poland Czartoryski and his brother Constantine went to St. Petersburg in 1795 and entered the service of the Russian government. The prince became the intimate friend of Grand Duke Alexander, and when the latter ascended the throne, Czartoryski became assistant to the minister for foreign affairs. When his aspirations for the restoration of Poland by the aid of his friend, the emperor, proved futile, he became the bitter enemy of Russia and was at the head of the Polish insurrection of 1830-31. After the failure of the last effort for the liberation of Poland he went to Paris, where he was recognized as the leader of the Polish refugees until his death.

Czartoryski was generally friendly to the Jews. In his early career he was the protector of the Jewish scholar Mendel Levin (Satanover), whom he engaged as teacher for his children. As a member of the commission appointed by Emperor Alexander I. (1804) to prepare the enactment of Dec. 9, 1804, concerning the Jews (see ALEXANDER I. of Russia), Czartoryski did not, as alleged of him, work against the interests of the Jews. As a Polish patriot he was concerned mainly with the welfare of Poland, his zeal on behalf of the Jews of Poland being none the less genuine though subordinate to his main object.

In later times, mainly through the efforts of Jean Czynski, and other Polish patriots who pointed out the hopelessness of liberating Poland without the help of the middle classes and of the Jews, the prince became an outspoken champion of the emancipation of the Jews. In a speech which he delivered on Nov. 29, 1844, he advocated granting the same rights to Polish Jews as were claimed for all other natives of Poland, and eulogized the Jewish martyrs of the insurrection of which he was the leader. The prince in his last days also instructed his son, Prince Ladislaus, ever to remain the friend of the Jews. Czartoryski is still revered among the Polish Jews, especially among those who emigrated to France or came under the influence of the community of Polish exiles in Paris.

P. WI.

CZATZKES or TSCHITKIS, BARUCH: One of the Neo-Hebraic poets of the beginning of the nineteenth century; lived at Lutsk, Volhynia. Delitzsch ("Zur Gesch. der Jüdischen Poesie," p. 109) mentions him as one of the Germanizing Hebrew poets of the "Bikkure ha-Ittim" school. The poem "Ha-Bittahon" by Czatckes in that periodical (xi. 177) is translated from the Russian of Kheraskov, and is, according to Weissberg ("Neuhebräische Aufklärungsliteratur in Galizien," p. 53, Leipsic and Vienna, 1898), the first instance of a German Slavic Jew translating Slavonic poetry into Hebrew. Czatckes also contributed sixteen proverbs to the above-cited volume of the "Bikkure ha-Ittim," and was the author of a song of praise,

which appeared in the first edition of I. B. Lewinson's "Te'udah be-Yisrael."

H. R.

P. WI.

CZECHOWIC, MARTIN: Polish Unitarian priest; born at Zbaszynie about 1530; died 1613. Czechowic lived at a time when religious restlessness was prevalent in Poland. Numerous religious sects arose, varying from the old Catholicism and the new Reformation to sects which rejected the Trinity and denied the divinity of Jesus. The members of the sect which professed disbelief in the Trinity were called Unitarians, and the most radical among them were called by their opponents "Half Jews." The religious dissension and constant disputes which arose in consequence led to a number of Jews taking part in these disputations.

Martin Czechowic frequently changed his religious views. He was a Roman Catholic priest in Kurnik until 1555, when he became a member of the Bohemian Brotherhood in Wilna, and, in 1575, wrote in denunciation of the baptism of infants (Lublin, 1575). He also wrote a book endeavoring to show that the objections of the Jews to Jesus as Messiah were unfounded. It was published under the title "Rozmowy Chrzescijanskie o Tajemnicach Wiary" (Rakow, 1575). In reply to this, Rabbi Jacob Nahman of Belzyc wrote a defense entitled "Odpis Jacoba Zyda z Belzyc na Dialogi Marcina Czechowiza" (Lublin, 1581). The arguments of Jacob Nahman were able and logical, and called forth a reply from Czechowic, entitled "Vindiciæ Duorum Dialogorum Contra Jacobum Judæum de Belzyce."

CZENSTOCHOW. See CHENSTOCHOV.

CZERNIGOV. See CHERNIGOV.

CZERNOWITZ: Capital of the province of Bukowina, Austria, situated near the banks of the Pruth, about 150 miles from Lemberg. Jews were living here and in a few other places in Bukowina when the Austrians took possession of the country in 1775. They were mostly of Polish and Rumanian origin, and had probably settled there in the fifteenth century, when it formed a part of Moldavia. During the occupation of Bukowina by Russia (1769-74) some White Russian Jews found their way thither. Czernowitz was termed "village" in the official documents of 1775, and in 1816 it had a total population of 4,516 persons. Its development began only in the thirties, from which time the history of the Jewish community may be said to date. Toward the middle of the nineteenth century the community was divided into two hostile camps: the Orthodox Jews, who detested all innovation; and the advocates of reform. The two parties avoided intercourse with each other, and the affairs of the community suffered considerably from this state of things. A kind of truce founded on mutual toleration was brought about by Chief Rabbi L. E. Igel, who held the office from 1854. He employed all his efforts to maintain peace in the community. During the forty years of his rabbinate many useful institutions were founded. Religious schools were opened under the supervision of Dr. Heinrich Atlas and Mandel Tit-

tinger, who for twenty-five years held the office of deputy burgomaster of Czernowitz. In 1879 the Alliance Israélite of Vienna established at Czernowitz a center for the crownland of Bukowina. The community possesses a yearly income of 20,000 florins for charitable purposes, in addition to casual donations. In 1895 L. E. Igel was succeeded in the chief rabbinate by Joseph Rosenfeld, assisted by the rabbis Benjamin Weiss and Berl Bremer. The community possesses many synagogues, one of which is Sephardic. From 1836 to about 1860 a Hebrew printing-office existed at Czernowitz; but owing to the poverty of the plant and management, it was never very active. The total population in 1900 was 67,622, of which about 22,000 were Jews. Among the numerous societies and charitable institutions the most noteworthy are: the Jewish Hospital, the hebra kaddisha, the Jüdischer Frauen-Verein, the Krankenunterstützungsverein, and the Talmud Torah. Czernowitz was at one time the home of a famous printing-press. See GALICIA.

CZESTIONEV: Village in the government of Warsaw, Russian Poland. It is the seat of a Jewish agricultural college, which was completed in 1901, accommodation being provided for sixty students. The college lands comprise 1,630 acres, 1,090 of which are arable, the remainder consisting of forest and meadows. The live and dead stock is (1901) valued at 2,574 rubles and 10,350 rubles respectively; and the receipts from the farming operations for 1901 were entirely satisfactory.

The students receive elementary instruction of a thoroughly practical nature in agriculture, horticulture, market-gardening, and dairying; and they also learn to work in wood and iron and to repair the agricultural plant. Candidates for admission to the college must know Russian, and have completed their thirteenth year. A preparatory school has been established for pupils who are not sufficiently advanced to enter the college. The college has opened up a new field for many of the Jewish youth of Poland.

CZYNSKI, JAN (JEAN): Polish lawyer, author, and journalist; born June 20, 1801; died in London, England, Jan. 31, 1867. The son of Jew-

ish parents who had embraced Roman Catholicism before his birth, Czynski was throughout his entire life one of the most zealous defenders of the Jews. After completing his studies he practised law in Lublin, and became an active participant in the wars of the Polish Revolution of 1830, serving as chief of staff under General Szeceptycki, the commandant of the palatinate of Lublin. The animosity exhibited toward the Jews during the revolution was most bitter, and Czynski was unsparing in his efforts to prove that it was undeserved. On one occasion, when the Lublin populace had accused them of evading military service, and threatened to attack them as traitors and spies, Czynski appeased the mob, and called a meeting of the leading inhabitants in the synagogue, where he stoutly defended his Hebrew compatriots.

On the failure of the revolution, he settled, in 1832, in Paris, where he lived for many years, and cooperated on the Polish National Committee with Prince Adam Czartoryski and Lafayette, ultimately removing to London. In 1851 he issued a circular to his compatriots, suggesting the formation of a society to consist of all Polish Jews in England and France.

Czynski was a versatile and prolific writer, mainly on historical subjects. He wrote a series of historical novels, and, under the pseudonym of "Ernesta Rollin," some plays, which were produced on the French stage. Of principal interest to Judaism were: "Le Reveil d'Israel," Paris, 1847; "Le Fils de la Juive," *ib.* 1848; and "Israel en Pologne," *ib.* 1861. Czynski was associated with several journals, including "La Pologne," of which he was for some time editor-in-chief.

In all his works and newspaper articles he never failed to seize an opportunity to espouse the cause of the Jews of Poland; and the grateful esteem with which his efforts were regarded is best evidenced by the obituary notices contributed to the "Archives Israélites" (xxviii, 167) by Léon Hollaenderski and Isidore Cahen. The former pays a glowing tribute to Czynski, of which the following is a translation: "The name of Jean Czynski is inscribed with gratitude in the annals of Judaism side by side with the immortal names of Czacki, Synowiecki, Castellan Ostrowski, and other illustrious friends of humanity and of the Jews of Poland."

[**D'**, **DA**, **DE**: In the alphabetical arrangement of names the above prefixes have been disregarded; consequently **D'Aguilar** will be found as **Aguilar**, **D'**; **Da Costa** as **Costa**, **Da**; etc.]

DABBASHETH: A town on the border-line of Zebulun (Josh. xix. 11). It has been identified by Conder with Dabsheh, the ruins of which are near the hills east of Acco. The Septuagint reading is *Baithapaβa*.

E. G. H.

G. B. L.

DABERATH: A town on the eastern boundary of Zebulun (Josh. xix. 12), but belonging to the domain of Issachar, and assigned to the Levites (Josh. xxi. 28; I Chron. vi. 58). It is the modern Deburich, an important strategic position at the foot of Mount Tabor and overlooking the entrance into the great plain of Esdraelon. It was here, perhaps, that Barak mustered his troops (G. A. Smith, "Hist. Geog. of the Holy Land," p. 394). From Josephus ("B. J." ii. 21, § 3) it is known that a Jewish garrison was placed here for the purpose of watching the plain. The name occurs in a slightly altered form in the Talmud (Neubauer, "G. T." p. 265). Moore conjectures that Deborah was a native of this place (see Buhl, "Geographie des Alten Palästina," p. 216).

G. B. L.

DACOSTA, ISAAC-FRANCIS: Musician and composer; born at Bordeaux Jan. 17, 1778; died there Nov. 29, 1864. He was a pupil of the Musical Conservatory in 1798. Later, while first cornet at the opera in Paris, he was vice-leader of the *Musique des Gardes du Corps*, under Louis XVIII. He wrote several romances and concertos. Meyerbeer composed for him, in 1836, the clarinet solo in the fifth act of "The Huguenots." He is believed to have been the son of the musician Samuel-Franco Dacosta, who was arraigned before the revolutionary tribunal at Bordeaux in 1794.

G.

C. DE B.

DAGESH: The diacritical point placed in the center of the letters of the Hebrew alphabet to indicate either their intensified (doubled) pronunciation, or, in the case of the letters **בגדקפת** (b, g, d, k, p, t), their hard (unaspirated) pronunciation. The root "dagash" means in Syriac "to prick" (compare Targ. to Prov. xii. 18); but the context in which the term "dagesh" first occurs militates against deriving it from this signification of the root. The use of "dagesh" as the name of the point indicating the intensified pronunciation is only a secondary one, for in the old Masoretic texts and in the *Mahzor Vitry* (ed. Horowitz, p. 228), "dagesh" indicates the intensified pronunciation itself, in contrast to "rafe," the weak pronunciation. The root "dagash" occurs only once in the traditional literature, in a reference to the letter **ד** (d) of the word **אחד** ("ehad," Deut. vi. 4), and that, too, in a sentence of the Palestinian

Talmud which is known only from a later quotation (Tur Oraḥ Hayyim, lxi.). A reference to the dagesh, though without the use of the specific term, is to be found in the *Pesikta Rabbati* and in "Sefer Yezirah."

From the Masorah the word passed into the terminology of the grammarians in its earlier sense, as, for instance, in Ben Asher and Saadia Gaon. The latter called one part of his grammatical work "The Book of Dagesh and Rafe"; preserving, as did the Karaite lexicographer David b. Abraham, even in the Arabic text the Hebrew-Aramaic terms. Saadia uses Arabic noun and verb forms derived from the word. Hayyuj uses in their stead the corresponding Arabic terms "shadid," "mushaddad," "kharif," "mukhaffaf"; and he was followed in this by others writing in Arabic. From the time of Abraham ibn Ezra, however, philologists writing in Hebrew re-established the use of the word "dagesh," from which various nominal and verbal forms were derived and added to the terminology of Hebrew grammar.

There is no trace among the early writers of a classification of the various uses to which the dagesh was put, such as became customary later, though the relation in which the six letters **בגדקפת** stood to the dagesh was of course emphasized; the letter **ך**, because of its double pronunciation by the Palestinians, was added to the six in "Sefer Yezirah" and in Ben Asher. The term "dagesh kal" (light dagesh), to denote the hard unaspirated pronunciation of the letters **בגדקפת**, occurs perhaps first in David Kimhi's "Miklol" (ed. Venice, 1545, p. 49a). The rules for the "dagesh haẓaq" (strong dagesh, that denoting a doubling of the letter) were first formulated by Elijah Levita ("Perek Shirah," 54a *et seq.*), who enumerates eight cases in which it occurs. Later grammarians have superseded this division by a more extended one (see König, "Lehrgebäude der Hebr. Sprache," i. 52 *et seq.*).

Graetz has shown that the use of the dagesh is anterior to the use of the vowel-points, for which it was, in a measure, a substitute. It distinguished the absolute from the construct state, the quiescent shewa from the mobile, and at times stood in place of the "matres lectionis." The regular use of the dagesh and its representation by means of a point seem to be a peculiarity of the Tiberian vowel-system. In the so-called superlinear, or Babylonian, system, the point was originally not used at all, nor was dagesh indicated in all cases which required it. In Berlin MS. Or. quart. 680, which, according to Kahle, originally contained the true Babylonian punctuation, the dagesh has the form **ⴁ**. It is used with the six letters **בגדקפת**, in such cases as require regularly the dagesh forte, but generally only where a mistake might be made; also in the letter resh, in alef when that letter is consonantal; and with lamed, especially in enclitic words. The dagesh is found four times with the alef in the Masoretic system (Stade, "Der Masoretische Text," § 42b) and often in the Karlsruhe MS. (see "Proc. Fifth Or. Con-

gress," II. i. 136). The dagesh is also used with the preposition **מן**, and is often retained at the end of a word, a practise not adopted by the Tiberian system.

In the peculiar fragments of shortened Hebrew published by M. Friedländer ("Proc. Soc. Biblical Archeology," 1896), the sign for both dagesh forte and dagesh lene is **ֿ**, while rafe is expressed by **ֿ**. The alef when consonantal is also provided with the dagesh. This system is also employed in the Mahzor fragment published by Levias ("Am. Jour. Semit. Lang." xv. 157). In certain genizah fragments at Cambridge and in others in the possession of Elkan Adler, the dagesh is indicated by a line placed over the preceding vowel; though at times a point is used for dagesh lene. In the St. Petersburg codex of the Prophets, also, dagesh forte is represented by a line over the preceding vowel; dagesh lene, by a point in the letter as in the Tiberian system. The point, however, is used occasionally for both dageshes. In all these cases the use of the point seems to be an intrusion from the Palestinian system. The irregularity in the use of the dagesh may also be seen in MS. Berlin Or. quart. 578, from which Praetorius has published the Targum of Joshua (1901).

W. B.—G.

DAGGATUN: Nomad tribe of Jewish origin living in the neighborhood of Tementit, in the oasis of Tuat in the Moroccan Sahara. An account of the Daggatun was first given by R. Mordecai Abi Sarur of Akka (Morocco), who in 1857 journeyed through the Sahara to Timbuctu, and whose account of his travels was published in the "Bulletin de la Société de Géographie" (Dec., 1895; see "Bulletin All. Isr." ii. 42, 1880; "La Grand Encyclopédie," xxiii. 254; Meakin, "Land of the Moors," p. 17). According to R. Mordecai, the Daggatun live in tents and resemble the Berber Tuaregs, among whom they live, in language, religion, and general customs. They are fairer in complexion than the generality of African Jews, and are still conscious of their origin. They are subject to the Tuaregs, who do not intermarry with them. R. Mordecai is authority for the statement that their settlement in the Sahara dates from the end of the seventh century, when 'Abd al-Malik ascended the throne and pushed his conquests as far as Morocco. At Tementit he tried to convert the inhabitants to Islam; and as the Jews offered great resistance he exiled them to the desert of Ajaj, as he did also the Tuaregs, who had only partially accepted Islam. Cut off from any connection with their brethren, these Jews in the Sahara gradually lost their Jewish practises and became nominally Mohammedans.

These statements of R. Mordecai evidently rest upon some foundation. The Arabs driven to Ajaj are to be identified with the Mechagra mentioned by Erwin de Bary ("Ghat et les Tuareg de l'Ain," p. 181), among whom a few Jews are said still to dwell.

V. J. Horowitz ("Morokko," p. 58, Leipsic, 1887) also speaks of many free tribes in the desert regions who are Jews by race, but who have gradually thrown off Jewish customs and have apparently accepted Islam. Among these tribes, he says, are the Daggatun, numbering several thousands and scattered over several oases in the Sahara, even as far as the River Dialiva or Niger. He says, also, that they are very warlike and in constant conflict with the Tuaregs. According to Horowitz, the Mechagra mentioned above are also to be reckoned as one of these Jewish tribes.

There seems to be little doubt that Jewish blood has largely been mixed with that of the Berbers living in the Moroccan and Algerian Sahara. In

fact, the Berbers are said to have been at one time Jews ("Jew. Quart. Rev." iv. 375); according to another tradition they are descended from the Philistines driven out of Canaan (Basset, "Nedromah," p. 13). There is a tradition that Moses was buried in Tlemçen, and the presence of a large number of Jews in that part of Africa is attested, not only by the many sacred places and shrines bearing Biblical names which are holy to the Mohammedans as well as to the Jews, but also by the presence there of a large number of Jewish sagas, which Basset has collected in the work cited above. L. Ruin ("Origines Berbers," p. 406) says: "Certain Berber tribes were for a long time of the Jewish religion, especially in Amès; and to-day, even, we see among the Hanensha of Sukahras (Algeria) a seminomad tribe of Israelites devoted entirely to agriculture" (see "Rev. Arch. de Constantine," 1867, p. 102). In addition, it may be noticed that Jews are to be found in the Berber "ksurs" all along southern Morocco and in the adjacent Sahara. Thus, at Outat near Taflet there is a mellah with about 500 Jews (Horowitz, *l.c.* p. 202); and at Figuig, a mellah with 100 Jews (*ib.* p. 204). Going farther south from Taflet to Tuat, there is a large community of Jews in the oasis of Alhamada; and at Tementit, a two weeks' journey from Taflet, the 6,000 or 8,000 inhabitants are said to be descendants of Jews converted to Islam (*ib.* p. 205). Even much farther to the west, in the province of Sus, there is Ogulmin with 3,000 inhabitants, of whom 100 are said to be Jews. Detailed information in regard to the Daggatun (whose name may perhaps be derived from the Arabic "tughatun" = infidels) is still wanting. Rohlf ("Reise Durch Marokko," p. 144) found no professing Jews in the whole oasis of Tuat; those who lived there in former times having all been either converted or exterminated by the Mohammedans. He notes, however, that their descendants have preserved the Jewish characteristic aptitude for trade.

G.

DAGGER: A short, edged, and pointed weapon for stabbing. It is given in the Ehud episode (Judges iii. 16, 21, 22) as the English equivalent for "hereb," which elsewhere is rendered "sword." See **SWORD**.

E. G. H.

G. B. L.

DAGHESTAN: Russian province, situated on the eastern slopes of the Caucasus, and bounded by Circassia, Georgia, and the Caspian Sea. In Turkish the name means "mountainous country."

According to the last census, that of 1897, the Jewish inhabitants numbered 12,000, or 1.85 per cent of the total population. The distribution of Jews in the various districts of Daghestan was as follows (1894): Avar, 11; Andi, 2; Gunid, 3; Dargi, 4; Kazikumukh, 3; Kaitago-Tabassaran, 2,853; Kyurin, 2,762; Temir-Khan-Shura: city, 1,950, and village of Sultan-Yangi-Yurt, 95; Derbent, 2,490; Petrovsk, 915; total, 11,088.

Some other Caucasian tribes of Daghestan are supposed to be descendants of Jewish colonists who in the centuries before the common era migrated to Daghestan in great numbers (Erckert, "Der Kaukasus," p. 360). Among these may be mentioned the Andies, numbering 26,000, and the Kyurines, numbering 150,000.

The Jews of Daghestan greatly resemble the other warlike inhabitants of this mountainous region; and they have acquired the virtues as well as the faults of the latter. They differ from their Christian and Mohammedan neighbors in speech, using the Tat language, which is a combination of Persian and Hebrew. Their writing is a mixture of square characters and Rashi. They wear the Circassian dress, and always go heavily armed, even sleeping without having removed their weapons. Their houses, like those of the other inhabitants, are ill built and dirty, and on the walls one finds, together with brightly shining arms, smoked fish or mutton hung up to dry. The main occupation of the Daghestan Jews is agriculture; but little of the land is owned by them, it being usually rented of their Mohammedan neighbors, to whom they pay their rent in produce, usually tobacco. They raise in addition vegetables and grapes; and some of them are engaged in the tanning of hides; while a few are small traders.

The rabbis and prominent Jews of Daghestan in the nineteenth century were:

Rabbis: Shalom ben Melek Mizrahi, Temir-Khan-Shura; Elijah ben Mishal Mizrahi, Derbent; Saadia ben Ezra, Tarku; Ephraim ben Haninah; Nissim ben Sharbit, Derbent; Jacob ben Isaac Mizrahi, chief rabbi of Daghestan (1866), Derbent; Isaac Mizrahi, father of Jacob, Derbent.

Other prominent men: Abraham ben Enoch, died 1861; David ben Shabbethai; Bisra ben Machir; Ephraim ben Koshi; Joseph ben Rabba; Hanukkah ben Jacob; Aaron ben Jeremiah; Pesah ben Jonah; Osiyahu ben Elijah; Baba ben Machir; Mordekai ben Perez; Joshua ben Hanukkah; Haninah ben Mordekai; Zaddik ben Nissim—all of Temir-Khan-Shura; Benjamin ben Issachar, president of Jewish community (1866), Derbent.

The Jews of Daghestan are noted for their hospitality; and they still retain the old Hebrew custom of washing the feet of strangers who visit them, this duty being performed by the

Women. women. The latter, like all Eastern women, lead a rigorous life. They have their separate rooms, are not allowed to sit at the same table with the men, and on the very rare occasions when they show themselves to strangers they keep their faces covered. As in Biblical times, they may be seen every evening on their way to the well, rich and poor alike barefooted and carrying earthen-

ware jars upon their heads. The gathering by the well seems to be a recreation for the women, who exchange news there and linger to gossip with their neighbors. Another occupation which the women appear to enjoy is the noisy lamentation for some departed friend. Gathered on the flat roof, they sit in a circle, and, swaying their bodies, begin a mournful song. Gradually they all wail louder and louder, tearing their hair and biting their fingers until they find themselves compelled to stop from sheer exhaustion. When a funeral occurs the entire community takes part in the lamentations, which are kept up for a whole week. It is customary to break a silver coin over the open grave, and to scatter the fragments in different directions, presumably to drive away evil spirits.

The Daghestan Jews are very ignorant and superstitious, and are made the more so by their life and surroundings. Their rabbis are illiterate, although they speak Hebrew rather fluently. The Mohammedans often attack and rob the homes of the Jews, destroy their burial-places, and molest their graves. The Jews, being compelled to rent the land of them, are completely at their mercy, and are obliged to pay very heavy taxes, which at times are almost unbearable. In some places the Jews are reduced to great poverty; they live in dugouts, are constantly abused and exploited, possess scarcely any property, and have not even the means to pay for the religious instruction of their children. The Mohammedan landowners require every able-bodied man and woman to work for them a certain number of days in each year, either in the fields, or tending cattle, threshing, repairing their houses, etc. In one village the inhabitants give to the landlords at least one hundred days each in the course of a year, and are obliged besides to furnish a certain number of eggs and chickens, as well as charcoal, sand, wood, salt, and shoes. They must also make many cash payments for various purposes.

There is a tradition among the Jews of Daghestan that they are the descendants of the Lost Ten Tribes; but the history of their wanderings is now forgotten, the written documents which they once possessed having in the course of time been either lost or destroyed.

The mountain Jews dwell in "auls" (villages), scattered among those of non-Jewish tribes; at times in separate communities, and at other times in mixed ones. The greater part of them live in the districts of Temir-Khan-Shura, Kaitago-Tabassaran, and Kyurin, and the remainder in the cities. There are (1902) five synagogues in the province, besides numerous houses of prayer, and twenty-six Hebrew schools with an aggregate of 520 pupils. See CAUCASUS; CHAZARS; DERBENT.

DAGOBERT: King of France (602-638). In order to emulate the religious zeal of Heraclius and Sisebut, the rulers of the Byzantine and West-Gothic empires, who were persecuting the Jews,

Dagobert decreed, about 629, that the Jews who were not converted to Christianity by a certain date should either leave his dominions or be put to death. "Many changed their faith at that time, while large numbers were slain by the sword," says the Jewish historian ("Emek ha-Bakah," p. 8). This measure could hardly have been instigated by Heraclius, since it was unlikely that Dagobert was in communication with him; it was rather, as Cassel rightly asserts, a local persecution, directed against certain individuals; and it was not even carried out rigorously, for at the Council of Rheims, held a year later, the canonical decrees issued previously, referring to the traffic in Christian slaves, attendance at Jewish feasts, and the filling of public offices, were renewed.

DAGON (Hebrew, דָּגוֹן): Philistine god, referred to in Judges xvi. 23; I Sam. v. 2-5; and I Macc. x. 83, xi. 4; but not in Isa. xlvi. 1, where Δαγων, in "Cod. Alex.," is a mistake for Ναβιά; nor in I Chron. x. 10, where בית דָּגוֹן is a corruption of בית שֵׁן (I Sam. xxxi. 10). The extent of the worship of Dagon is also indicated by the name "Beth-dagon," designating (Josh. xv. 41) one of the towns of the Shefela, and another on the boundary of the territory of Asher (*ib.* xix. 27). The inscription of the Phœnician king Eshmunazar also mentions "towns of Dagon" (line 19). The significance of this god can be gathered with sufficient certainty from his name and from the plastic representations of him: for דָּגוֹן is most probably a derivative of דָּג ("fish"), just as צִידוֹן (Sidon) is derived from צִיד ("booty") and שָׁמְשֹׁן (Samson) from שֶׁמֶשׁ ("sun"); and it is probable that "Odakon" (Ὀδάκων), by which the Chaldean

one another. Indeed, it is quite possible, as some scholars have suggested, that the figures of Dagon found on Babylonian gems, on an Assyrian cylinder, on a piece of sculpture from Khorsabad, on a similar piece from Nimrud, and on a Babylonian cylinder (compare the reproductions of these figures, especially in H. Clay Trumbull's "Jonah in Nineveh," 1892, p. 19), combining in different ways the body of a man and of a fish, are simply different representations of the god Dakan-Dagan (see Friedrich Delitzsch in Calwer, "Bibellexikon," s.v. "Dagon"; Layard's "Nineveh," 1849, ii. 466 *et seq.*). Neither is it contradicted by what is said in I Sam. v. 4 about the figure of the god Dagon, for the Assyro-Babylonian images also show the head and hands of the god. In this case, Dagon personifies the idea that the ocean, with its wealth of fish, was worshipped as the chief source not only of human nourishment, but also of human culture (compare Berosus' interesting amplifications of this idea in Trumbull, *l.c.* pp. 8-11). The same god would naturally be worshiped both near the Persian Gulf and on the Mediterranean Sea. The El-Amarna tablets indicate an intercourse at an early period between the regions along the Euphrates and Tigris, and those of western Asia and Egypt.

As regards the worship of Dagon, very little is known. Details of the construction of his "house," mentioned in Judges xvi. 26 *et seq.* and in I Sam. v. 1 *et seq.*, are likewise uncertain; and the only feature of the ritual to which reference is made (I Sam. v. 4 *et seq.*; compare Zeph. i. 9) is the fear of touching the threshold of his temple. Dagon's temple at Ashdod was burned by the Maccabee Jonathan (Josephus, "Ant." xiii. 4, § 5). See THRESHOLD, SACREDNESS OF THE.

E. K.

DAINOW, ZEBI HIRSCH B. ZEËB WOLF (known as the **Slutzker Maggid**): Russian preacher; born at Slutzk, government of Minsk, in 1832; died in London March 6, 1877. He possessed oratorical ability of a high order, and inspired the progressive element of the Russian Jewry through his exhortations in behalf of secular knowledge and his glorification of industry, patriotism, and progress. In him the modern Russo-Jewish "haskalah" (progressive movement) found its orator; and its great exponents, like Gordon, Smolenskin, and their

representation of Dagon.
(From a bas-relief in the Louvre.)

Berosus designates a personification of Oannes, who is supposed to rise out of the Persian Gulf, is identical with "Dakon," probably changed into "Odakon" through the similarity in sound to "Oannes."

It is, furthermore, by no means certain, notwithstanding G. F. Moore in "Encyc. Bibl." i. 985, that Dagon, the Odakon just mentioned, and the Assyrian god Dakan-Dagan stood in no relation with

Assyrian Representation of Dagon.
(From Layard's "Nineveh.")

friends and followers—who up to that time had received from the pulpit nothing but condemnation and censure—recognized in Dainow a powerful ally, and at first encouraged him in every possible way. But he aggravated, rather than allayed, the fear of the conservative classes that he was not in accord with them on some religious questions; and by discarding the traditional dress and manners of the “maggid” he aroused suspicion and also opposition in certain quarters. The support and encouragement that he received from the government officials augmented the hostility, and this fact misled Dainow to believe that he was persecuted by fanatics and had to suffer for the sake of the principles which he wished to enforce on his audiences. Judah Loeb Gordon, who understood the Russian Jews and their needs much better than Dainow did, made light of these imaginary persecutions, and warned Dainow against the evils that would result from a complaint to the authorities against his opponents. The violent attack on his antagonists in general, and particularly on the Jews of Byelostok and on A. B. Gottlober—which Dainow published in “Ha-Shahar,” v. 329–347—gives a good idea of the condition of his mind. The reply to that attack (*ib.* pp. 601–605) contains a good description of Dainow and his methods at that time.

In 1874 he left Russia forever, and settled in London, where he became preacher in a congregation of Russian and Polish Jews, and also lecturer on Haggadah at the En Jacob synagogue. Even in his letters from London he complained continuously of opposition and persecution, giving vent to grievances that were as imaginary as those he had suffered in his native land, if not more so. All contemporary accounts agree that he was highly respected and well treated in London, where his oratorical powers were recognized even by the English rabbis. His premature death in March, 1877, was universally regretted; and his funeral was probably the most imposing that a Russian Jew had ever had in the British capital.

Besides the article mentioned, there is only one publication bearing Dainow's name. It is a pamphlet named “Kebod ha-Melek” (Glory of the King, Odessa, 1869), and contains a sermon, delivered by Dainow in Odessa, eulogizing Czar Alexander II. It appeared also in a Russian translation.

DALBERG, KARL THEODOR, BARON VON: Archbishop of Mayence and subsequently Grand Duke of Frankfort-on-the-Main; born Feb. 8, 1744; died Feb. 10, 1817. He was one of the noblest German princes and statesmen, and took a friendly and liberal attitude toward the Jews. He always favored their complete emancipation; but was long prevented from realizing it in his own dominion, through the Frankfort patricians and, especially, the Rhenish Confederation. After the dissolution of the latter—when Frankfort created a constitution of its own on the principle of equality—Dalberg enacted (Dec. 28, 1811) a special law decreeing that all Jews living in Frankfort, to-

gether with their descendants, should enjoy civil rights and privileges equally with other citizens. For this the Jews paid him 440,000 florins, in consideration of which the annual protection tax of 22,000 florins was abolished. Thus Dalberg transmuted the Frankfort Jews from tolerated into full citizens.

DALE, ALAN. See COHEN, ALFRED J.

DALET (ד): Fourth letter of the Hebrew alphabet. The name is evidently connected with “delet,” meaning “door,” and was borrowed from the shape of the letter in the Phœnician (ancient Hebrew) script (see ALPHABET). It corresponds to the “delta” (Aramaic pronunciation of “dalet”) of the Greek alphabet, in which the original form of the letter has been very clearly preserved. In the classification of letters (consonants), as it is found for the first time in “Sefer Yezirah” (iv. 3), the dalet is included in the group דטלנת (d, t, l, n, t), which are formed at the upper edge of the tongue. The grammarians, who classify the letters according to the organs of speech by which they are formed, designate this group as linguals (see Abu al-Walid, “Luma’,” ii.; Abraham ibn Ezra, “Zahot,” 11b).

According to modern phonetic terminology, dalet (“d”) is the sonant dental, corresponding to which ת (“t”) is the mute, and ט (“t”) the emphatic explosive dental (König, “Lehrgebäude der Hebräischen Sprache,” i. 34). According to the Masorah, dalet belongs to the letters (בנרכפת) which have a double pronunciation: softened or aspirated, and hard or unaspirated (see under DAGESH). The aspirated dalet (ד) was most probably pronounced like the Neo-Greek δ or the soft English “th” (in “the”). In the grammatical division of the letters which has been adopted generally by Hebrew philology since Saadia, dalet is included in the eleven which occur only as root sounds and never as functional sounds. Only Dunash b. Labrat included the ד as well as the ט in the group of functional sounds, because in forming the “hitpa’el” of certain roots, both represent ת (see Bacher, “Abraham ibn Esar als Grammatiker,” p. 58).

For the textual criticism of the Biblical books the similarity of dalet (ד) and resh (ר) is an important point, as may be seen, for example, on comparing Gen. x. 3 with I Chron. i. 6 (דיפת and ריפת) or Gen. x. 4 with I Chron. i. 7 (רודנים and דודנים). In Job xxiv. 24 רמו is translated by the Targum אורינו as if the word were דמו (“wait”), which was certainly the original reading. As a numeral, ד has the value 4. As an abbreviation it stands for דף (“page”), especially in later literature, and also for other words beginning with ד. The tetragrammaton is sometimes represented by ד, as being the second letter of אדני.

W. B.

DALLAS: County seat of Dallas county, Texas, on the east bank of the Trinity River. It was settled in 1844. It has a population of 50,000, including 1,200 Jews. Moses Ullmann, now of Galveston,

Tex., and Dr. E. M. Tillman, still of Dallas, were the first Jewish settlers, taking up their residence there in February, 1871. A few emigrants made Dallas their home after the promulgation of the Russian May Laws in 1881, a larger number arriving subsequent to the Russian persecutions ten years later. Since then the growth of the Jewish population has been gradual and steady.

The Hebrew Benevolent Association was founded in May, 1872, and the Ladies' Hebrew Benevolent Association in the same year. The Jewish cemetery was purchased in 1872, and the first Jewish service was held during the New-Year holidays of that year. Dallas Lodge, No. 197, I. O. B. B., was established in 1873, and now has a large membership. Congregation Emanuel was organized in 1874, and held its first service in the hall of the I. O. B. B. Temple Emanuel was dedicated on Shabuoth (Feast of Pentecost), 1876, but having become too small for the increased congregation, a new temple on Ervay street was dedicated in 1898. The Orthodox Jews established a congregation, Shearith Israel, in 1884, but their synagogue was not dedicated till 1894. Besides the two congregations here mentioned, there are two *hebrot* (small congregations) maintained by the Polish, Russian, and Rumanian immigrants. The Orthodox community also supports a ladies' benevolent association, making three Jewish benevolent societies in Dallas.

The social and literary interests of the Dallas community are represented by the Phoenix Club and the Progressive Literary Association. Benevolent orders are represented by the I. O. B. B., Free Sons of Israel, and B'rith Abraham. The following rabbis have ministered at Temple Emanuel since its foundation: A. Suhler, H. M. Bien, Henry Schul, Joseph Silverman, E. M. Chapman, G. A. Kohut, Oscar J. Cohen, and William H. Greenburg, the present (1902) incumbent.

In active communal and public life Dr. E. M. Tillman, David Goslin, E. M. Kahn, Charles Kahn, Alex. Ortlieb, and Alex. Sanger are prominent. Philip Sanger, recently (1902) deceased, was identified with nearly every public movement in the city. D. A. Eldridge, attorney, is an ardent communal worker.

Dallas has a Jewish weekly newspaper, "The Jewish Sentiment," edited and published by Frank J. Cohen.

DALMBERT, SIMON MAYER: Officer in the French army, and communal worker; born at Mutzig, Bas-Rhin, in 1776; died May 11, 1840. He took part in the early campaigns of the empire, at first with the cavalry, then with the infantry. He was commissioned at Cassel in 1809 to organize the army of Westphalia. Returning to France after the fall of the kingdom of Westphalia, he settled at Paris (1813), entering the service of the government. He took an active interest in the organization of Jewish worship, being nominated vice-president of the Central Jewish Consistory of Paris in 1816. He was instrumental in the abrogation (1818) of the decree of March 17, 1808 (see NAPOLEON I.). He

obtained the royal ordinance of June 29, 1819, establishing Jewish primary schools, and secured the ordinance of Aug. 20, 1823. Dalmbert also contributed to the establishment in 1829 of the central rabbinical school of Metz. He was made a member of the Legion of Honor and was decorated with the Order of Westphalia.

DALPUGET: Family of merchants; settled at Bordeaux, France. They originally came from Avignon, and refused to obey the decree of expulsion from Bordeaux passed by the jurats and Parliament of that city in 1734 at the request of the Portuguese Jews there. Successive decrees in 1739 and 1740 were likewise suffered to pass unnoticed, the Dalpugets plying their trade as linen merchants and building up quite a large business as bankers. In time the members of this family came to be looked upon as the leaders of the Avignonese Jews. In 1750 they were tacitly accepted as citizens of Bordeaux, although they still labored under certain disabilities, for the removal of which they and members of the Astruc and Lange families petitioned the king in 1757. In 1759 (July 14), letters patent of complete registration were granted to them.

Emanuel, Israel, Jacob, Joseph, Manuel, and Salon Dalpuget were the most prominent members of the family, all being engaged in commerce at Bordeaux. Several of the female members were converted to Christianity.

A. M. F.

DALY, CHARLES P.: Historian and jurist; born in New York city 1816; died in 1899. Daly was of Roman Catholic parentage. He was admitted to the bar at the age of twenty-three, and, after serving for a year in the state legislature, was elected judge of the court of commons pleas of New York in 1844, and filled the judicial office for forty-two years, for twenty-seven years as chief justice, retiring in 1886.

Judge Daly's profound scholarship, unquestioned integrity, brilliant conversational gifts, and commanding dignity combined to give him for many years a unique position in American life. He was deeply interested in Jewish affairs and Jewish history, and lost no opportunity to express disapproval of anti-Semitism. He was often chosen to be the orator at important Jewish functions, as, for instance, on the occasion of the celebration in 1872 of the fiftieth anniversary of the Hebrew Orphan Asylum in New York city; and again in 1883 on the laying of the corner-stone of the new building erected by that society, both of these addresses being published at the time. The former, as expanded by him in 1893, was reprinted in book form, with annotations by Max J. Kohler, under the title "Settlement of the Jews in North America,"

New York, 1893. It was one of the earliest works on the subject of American-Jewish history, and is still authoritative. Judge Daly was an honorary member of the American Jewish Historical Society, and several times presided over sessions of its annual meetings.

M. J. R.

DAMA, SON OF NETINA: The name of a non-Israelite held up by Rabbi Eliezer and other rabbis to his brethren as an example of true love and piety toward parents. He lived in Ashkelon, and occupied there a high position, being *παρίης βουλῆς*, "head of the council" (Pesiḳ. R. 23). One day, when grossly insulted by his mother in the presence of his colleagues, he preserved his reverential attitude toward her, and no angry utterance escaped his lips. Dama was once in possession of a precious stone wanted to complete the breastplate of the high priest. The agents commissioned to buy it happened to come when his father was asleep, the key of the box containing the stone being under his pillow. No offer of the agents could induce Dama to disturb his father. The agents were disappointed and went away. It is further related that in the year following, a red heifer was born in his herd, which compensated for the sacrifice incurred in carrying out his filial duty. As regards the name "Netina," it can not be determined with certainty whether it is that of a male or of a female. "Netina" may mean one of the Netinim (see Mishnah *Kid.* i. 1; compare the name *Ἀντιόχερος*, name of a popular leader in the city of Gaza; Josephus, "Ant." xiii. 12, § 3).

DAMAGE: Money recoverable as amends for a wrong or injury sustained. The simple and clear rule as to the obligation of a person who has caused damage to his fellow man is to give full compensation, and is expressed in the words "He that kindled the fire shall surely make restitution" (Ex. xxii. 6). Where one causes physical injury to his fellow man the following five things are to be considered in determining the amount of compensation due to the injured person: (1) "nezek," the permanent loss, if any, caused by the injury; (2) "shebet," the temporary loss during the illness caused by the injury; (3) "za'ar," the pain and suffering of the injured person; (4) "rippui," the cost of the cure required for the restoration of health; (5) "boshet," the insult involved in the injury. The rule "as he hath done so shall it be done to him; breach for breach," etc. (Lev. xxiv. 19), has been interpreted by Jewish tradition and practise to refer to compensation, and does not demand actual mutilation of the body, as a literal interpretation might imply. Compensation had to be given by the offender not only for injuries inflicted by himself, but also for those caused by his property. The latter are brought under four heads ("arba'ah abot neziḳin"), namely: (1) a goring ox, (2) a pit, (3) a feeding animal, (4) fire. See *BABA ḲAMMA*; *NEZIḲIN*.

S. S.

M. F.

DAMASCUS: An ancient city of Asia Minor, situated at the foot of the Anti-Lebanon, 180 miles south by west of Aleppo; now the capital of the vilayet of Syria. In the Old Testament it is called *דַּמֶּשֶׂק* (Dammeseḳ), or *דַּרְמֶשֶׂק* (Darmeseḳ, I Chron. xviii. 5 *et seq.*; II Chron. xvi. 2, xxiv. 23), or *דִּמְשֶׁק* (Dummeseḳ, II Kings xvi. 10). The form with "r" is Aramaic, although the Egyptian lists also contain a "Saramaski," which W. Max Müller ("Asien und Europa," p. 227) explains as "Tiramaski." The usual Egyptian transcription is "Timasḳu" (*ib.* pp. 162, 234). In the cuneiform inscriptions the name reads "Dimashḳi" or "Dimashḳa," the latter form being used also in the El-Amarna tablets (ed. Winckler, 142, 21), where, however, the form "Timashgi" (*ib.* 139, 63) also occurs. The Arabs called the city "Dimashḳ-al-Sham," for which "Al-Sham" is today usually substituted.

The present Damascus, which is undoubtedly situated on the site of the ancient city, covers the northwestern part of the beautiful

Position. and fruitful plain Al-Ghuta, south of the Anti-Lebanon. This plain is intersected by numerous mountain streams, one of which, Nahr Barada ("Amana," II Kings v. 12: the "Chrysorrhoas" of the Greeks), on leaving the mountains, separates into seven branches, two of which pass through Damascus. The rich vegetation of the plain, as well as the numerous gardens behind which the city lies half concealed, presents an enchanting view to the traveler approaching from the desert, who now understands why both Jews (Bab. 'Er. 19a) and Bedouins have called the city a paradise.

The situation is particularly favorable to commerce. Caravan routes of great antiquity, stretching from the shores of the Mediterranean, from Arabia, from the Euphrates, and from northern Syria converge at Damascus and serve to make it a commercial center of great importance. That inhabitants of the city, even in ancient times, utilized its favorable location is evident from I Kings xx. 34. Among the articles of commerce, Ezek. xxvii. 18 mentions wine of Helbon and other commodities. Unfortunately, however, these passages, owing to the corruption of the text, are no longer intelligible (compare Cornill, Bertholet, Kraetzschmar, and Toy *ad loc.*).

That Josephus ("Ant." i. 6, § 4) mentions Uz, the son of Aram, as founder of Damascus, has little value, as the tradition probably reflects later conditions only. Similarly, the statement of Nicholas of Damascus ("Ant." i. 7, § 2), according to which Abraham immigrated to Damascus and ruled there for a time, probably rests upon later combination (compare Justin, xxxvi. 2), and finds no firm support in the ambiguous statement of Gen. xv. 2. The oldest reliable data in regard to the

In Biblical Times. city are found on the Egyptian monuments, to which the El-Amarna tablets may be added. Damascus is mentioned

among the cities captured by Thothmes III. From the El-Amarna tablets it appears that under Amenophis III. the Egyptian dominion in these districts began to totter, as the Hittites continually invaded the country. If the identification of Max Müller (see above) is correct, Rameses III. succeeded in conquering the city. At the time of David, Damascus,

together with the neighboring territory, was inhabited by Arameans. They endeavored to come to the assistance of their hard-pressed fellow tribesmen of Zobah; but David overthrew them, so that Damascus was compelled to recognize his authority (II Sam. viii. 5 *et seq.*). Under Solomon the fruits of this conquest were lost. A former subject of the King of Zobah, Rezon (LXX. 'Εσρώου), the son of Eliadah, declared himself King of Damascus and founded a kingdom which was destined to give the Israelites considerable trouble (I Kings xi. 23 *et seq.*). The struggles with the Arameans of Damascus, of which the Jewish kings skillfully availed themselves (*ib.* xv. 18 *et seq.*), constitute a great part of the history of the Ephraimitic kingdom (*ib.* xx. 22; II Kings vi., viii. 12, x. 32, xiii.; Amos i. 3). Only when the danger threatening from Assyria became more obvious did a later king, Rezin (or, more correctly, Razun) of Damascus, change his policy. He formed a coalition with Pekah of Ephraim, with whose help he determined to enter upon the conquest of Judah (Isa. vii. 1-16). Ahaz meanwhile summoned the aid of the Assyrians; and the new policy finally led to the conquest of Damascus by an Assyrian army in 732 B.C. (II Kings xvi. 9). Concerning the city and its inhabitants during a period of 200 years there is no information. According to I Kings xx. 34, a quarter of the city was assigned to the Ephraimitic merchants. II Kings xvi. 10 *et seq.* mentions an altar in the city, of which Ahaz ordered a copy to be made; otherwise information on the religion of the Damascenes is confined to the facts which may be gleaned from the theophorous names of the kings (compare Baethgen, "Beiträge zur Semitischen Religionsgeschichte," pp. 66 *et seq.*).

After its conquest by the Assyrians, Damascus continued to be of a certain importance because of its favorable position. While little can be gleaned from the references contained in the Later Prophets (Jer. xlix. 23 *et seq.*; Ezek. xxvii. 18, xlvii. 16 *et seq.*; Zech. ix. 1), it is clear that the city, like other places

in Syria, exchanged Assyrian for Bab-

In Post-Biblical Times. In Syria, exchanged Assyrian for Babylonian rule, and this again for that of the Persians and of Alexander the Great.

After the battle of Issus (333 B.C.), Damascus, when the Persian king had left behind his harem and his treasure, was treacherously delivered over to Parthenio (Curtius, iii. 13). During the following period, although the Ptolemies occasionally succeeded in exerting dominion over the city, it was principally in possession of the Seleucids; Antioch, however, and not Damascus, was made their capital.

In the history of the Maccabees the city is mentioned several times in connection with the campaigns of Jonathan (I Macc. xi. 62, xii. 32); and upon the division of the Seleucid empire it became for a short time the capital of a smaller kingdom (Josephus, "Ant." xiii. 13, § 4; 15, § 1). But in the year 85 Antiochus XII. was vanquished by the Nabataean princes, who as a consequence acquired control over Damascus (*ib.* xiii. 15, §§ 1-2). About 70 B.C. Ptolemy of Chalcis endeavored to take the city, for which reason Aristobulus, son of the Jewish queen Alexandra, marched to its aid (*ib.* xiii. 16, § 3). But in 65 the Romans put an end to this period of

changes by conquering Damascus and incorporating it with the province of Syria. Damascus obtained, however, the relative independence of a Hellenic city, and belonged to the municipal confederation of the Decapolis (Schürer, "Gesch." 3d ed., iii. 118 *et seq.*). The importance of the district which belonged to Damascus may be seen from the fact that it was adjacent to that of Sidon (Josephus, "Ant." xviii. 6, § 3). For a time the city was again under the dominion of the Nabataean kings, inasmuch as the Arabian king Aretas (II Cor. xi. 32) had an ethnarch there, the Romans having probably accorded this privilege for the purpose of propitiating him.

At this time about 10,000 Jews lived at Damascus, governed by an ethnarch (Acts ix. 2; II Cor. xi. 32). The attraction which Judaism exercised at that time over the pagans was so great that many men and women were converted to that religion. Paul succeeded, after a first rebuff, in converting many of the Jews of Damascus to Christianity (49 C.E.). This irritated the Jewish ethnarch to such a degree that he attempted to arrest Paul; and the latter's friends only saved his life by lowering him in a basket out of a window built in the wall of the city. Many

Jews were murdered by the pagan inhabitants upon the outbreak of the great war of liberation (Josephus, "B. J." ii. 20, § 2; vii. 8, § 7). Later, Damascus, as the coins show, obtained the title of metropolis; and under Alexander Severus, when the city was a Christian colony, it became the seat of a bishop, who enjoyed a rank next to that of the Patriarch of Antioch. In the fifth century, under the rule of the Eastern empire, being the Talmudic time, Jews were living at Damascus; for the rabbi Rafram bar Pappa went to pray in the synagogue of Jobar (Bab. Ber. 50a). During the conflicts between the Byzantines and the Persians the city frequently suffered heavily. When Syria was conquered by the Persians (614), the Jews of Damascus, profiting by the presence of the invaders, joined with their coreligionists of Palestine to take vengeance on the Christians, especially those of Tyre. In 635 Damascus fell into the hands of the Mohammedans; the inhabitants, by their timely and voluntary surrender, succeeding in saving fifteen Christian churches.

The rule of the Ommiads brought a new period of splendor to the city, which now became the capital of that califate. The Jewish community continued, and certainly existed in 970; "for," says a historian, "Joseph ben Abitur of Cordova, having lost all hope of becoming the chief rabbi of that city, went to Palestine in that year, and settled at Damascus" (Abraham ibn David, "Sefer ha-Kabbalah," in Neubauer, "Med. Jew. Chron." i. 69; Conforte, "Kore ha-Dorot," 5b). This period terminated with the advent of the Abbassids, and the city suffered during the following centuries from continuous wars. Fortunately for the Jews, it resisted the siege of the Second Crusade (1147). Some time afterward a large number of Palestinian Jews sought refuge at Damascus from the enormous taxes imposed upon them by the Crusaders, thus increasing the community.

G.

F. Bu.

Little information exists concerning the Jews in Damascus during the following centuries. The few data are given by travelers who visited the place. In 1128 Abraham ibn Ezra visited Damascus (though compare the note of Harkavy, "Hadashim gam Yeshanim," vii. 38). According to Edelman ("Ginze Oxford," p. ix.), Judah ha-Levi composed his famous poem on Zion in this city; but Harkavy (*l.c.* p. 35) has shown that "Al-Sham" here designates Palestine and not Damascus. In 1267 Nahmanides visited Damascus and succeeded in leading a Jewish colony to Jerusalem.

Benjamin of Tudela visited Damascus in 1170, while it was in the hands of the Seljukian prince Nur al-Din. He found there 3,000 Rabbinite Jews and 200 Karaites. Jewish studies flourished there much more than in Palestine; according to Bacher it is possible that during the twelfth century the seat of the Palestinian academy was transferred to the city. The principal rabbis of the city were: Rabbi Ezra and his brother Sar Shalom, president of the tribunal; Yussef Hamsi, R. Mazliah, R. Meir, Yussef ibn Piat, R. Heman, the parnas, and R. Zadok, physician.

About the same time Pethahiah of Regensburg was here. He found "about 10,000 Jews, who have a prince. The head of their academy is Rabbi Ezra, who is full of the knowledge of the Law; for Rabbi Samuel, the head of the Academy of Babylon, ordained him" (ed. Benisch, p. 53). It was a Damascus rabbi, Judah b. Josiah, who, toward the end of the twelfth century, was "nagid" in Egypt (Sambari, in "Med. Jew. Chron." i. 133). At a later period another nagid, David b. Joshua, also came from Damascus (Grätz, "Gesch." ix., note i.).

In 1210 a French Jew, Samuel b. Simson, visited the city. He speaks of the beautiful synagogue situated outside the city (Jobar) and said to have been constructed by Elisha (see below; compare "Ozar Tob," 1878, p. 38; Carmoly, "Itinéraires," p. 136).

Twelfth to the Fifteenth Century. Under Saladin the city again enjoyed considerable importance; but upon his death the disturbances began anew, until in 1516 the city fell into the hands of the Turks, since which time it has declined to the rank of a provincial town.

It seems probable that Al-Harizi also visited Damascus during the first decade of the thirteenth

century. At least he mentions the city in the celebrated forty-sixth "Makamah."

Toward the end of the thirteenth century Jesse b. Hezekiah, a man full of energy, arose in Damascus. He was recognized by Sultan Kelaün of Egypt as prince and exilarch, and in 1289 and in June, 1290, in conjunction with his twelve colleagues, he put the anti-Maimonists under the ban (Grätz, "Gesch." vii. 186-195).

The letters of the rabbis of Damascus and of Acre have been collected in the "Minhat-Kena'ot" (a compilation made by Abba Mari, grandson of Don Astruc of Lunel). No data are available for the fourteenth century. Estori Farhi (1813) contents himself with the mere mention of Damascene Jews journeying to Jerusalem (Zunz, "G. S." ii. 269). A manuscript of David Kimhi on Ezekiel was written by Nathan of Narbonne and collated with the original by R. Hiyya in Damascus, Ab 18, 1375 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 316).

The Jewish community of Damascus continued its existence under the sultans (Borgites and Mamelukes) of Egypt, who conquered Syria; for the Jewish refugees of Spain established themselves among their coreligionists in that city in 1492, constructing a synagogue which they called "K h a t a ' i b."

The anonymous author of the "Yihus ha-Abot" (1537; published by Uri b. Simeon in 1564) also speaks of the beauties of Damascus; and of the synagogue at Jobar, "half of which was constructed by Elisha, half by Eleazar b. 'Arak" (Carmoly, *l.c.* p. 457; compare similar accounts by Raphael of Troyes and Azulai, *ib.* p. 487).

Elijah of Ferrara (1488) had come to Jerusalem and had a certain jurisdiction in rabbinical matters over Damascus as well. He speaks of a great plague which devastated Egypt, Syria, and Jerusalem; but he does not say in how far the Jews of the first-named city suffered (Carmoly, *l.c.* p. 333). Menahem Hayyim of Volterra visited Damascus in 1481, and found 450 Jewish families, "all rich, honored, and merchants." The head of the community was a certain R. Joseph, a physician ("Jerusalem," i. 211).

Obadiah of Bertinoro (1488) speaks in one of his letters of the riches of the Jews in Damascus, of the beautiful houses and gardens (ed. Neubauer, p. 30). A few years later (1495) an anonymous traveler speaks in like eulogistic terms (*ib.* p. 84). He lived

Plan of the Modern City of Damascus.
(After Baedeker, "Palestine and Syria.")

with a certain Moses Makran, and he relates that the Damascene Jews dealt in dress-goods or engaged in some handicraft. They lent money to the Venetians at 24 per cent interest.

An anonymous Jewish traveler (see "Shibhe Yerushalayim," 51b; and Graetz, "Hist." Hebrew transl., vii. 27) who arrived a few years after the Spanish immigration, found at Damascus 500 Jewish households; also a Karaite community whose members called themselves "Muallim-Ṣadaḳah"; and a more important Rabbinite community, composed of three groups and possessing three beautiful synagogues. One of these belonged to the Sephardim; another, to the Moriscos (Moorish Jews) or natives; and the third, to the Sicilians. In each synagogue there was a preacher, who read the works of Maimonides to the pious every day after the prayer. The preacher of the Sephardim was Ishak Mas'ud, that of the natives Shem-Tob al-Furani, and that of the Sicilians Isaac Haber. There were also two small schools for young students of the Talmud, containing respectively thirty and forty pupils.

Sixty Jewish families were living in the village of Jobar, one mile from Damascus, who had a very beautiful synagogue. "I have never seen anything like it," says the author; "it is supported by thirteen columns. Tradition says that it dates from the time of the prophet Elisha, and that he here anointed King Hazael [see also Sambari in Neubauer, "Med. Jew. Chron." i. 152]. R. Eleazar ben 'Arak [tannaite of the first century] repaired this synagogue." In order to indicate, finally, that the city was even then under the Ottoman rule, the narrator adds that the people of Damascus had just received a governor ("na'ib") from Constantinople.

The "Chronicle" of Joseph Sambari (finished 1672) contains the names of a number of rabbis of note who lived here during the sixteenth century. He

says that the Jewish community lived chiefly in Jobar, and he knows of the synagogue of Elisha and the cave of Elijah the Tishbite. At the head of the community was a certain Abu Ḥaṣirah (so-called from a peculiar kind of headdress which he wore), who was followed by 'Abd Allah ibn Naṣir. Of the rabbis of Damascus proper he mentions Joseph Hayyat; Samuel Aripol, author of "Mizmor le-Todah"; Samuel ibn 'Imran;

Joseph al-Ṣa'ih; Moses Najjarah, author of "Le-kah Tob"; Hayyim Alshaich; Joseph Maṭalon; Abraham Galante ("Med. Jew. Chron." i. 152). In this home of learning there was also a model-codex of the Bible called "Al-Taj" (the Crown; *ib.* p. 119). In 1547 Pierre Belon visited Damascus in the train of the French ambassador M. de Fumel. He speaks of the large number of Jews there; but makes the singular confusion of placing in this city the events connected with the famous Aḥmad Shaiṭan of Egypt ("Revue Etudes Juives," xxvii. 129).

Among the spiritual leaders of Damascus in the sixteenth century may be mentioned: Jacob Berab, who, in the interval between his sojourns in Egypt and at Safed, lived there for some years (c. 1534); Hayyim Vital the Calabrian (1526-1603), for many years chief rabbi of Damascus, and the author of various cabalistic works, including "Ez-Hayyim"; Samuel

ben David the Karaite (not "Jemsel," as Carmoly, "Itinéraires," p. 511, has it), who visited Damascus in 1641, mentions the circumstance that the Karaites there do not read the Haftarah after the Pentateuch section (*ib.* p. 526; but see Zunz, "Ritus," p. 56). Moses Nagara; his son, the poet Israel Nagara; and Moses Galante (died in 1608), the son of Mordecai Galante, were also

among the prominent men of the sixteenth century. The most celebrated rabbis of the seventeenth century were Josiah Pinto, a pupil of Jacob Abulafia, and author of the "Kesef-Neḥar" ("Med. Jew. Chron." i. 153; "Kore ha-Dorot," 49b), and his son-in-law, Samuel Vital, who transcribed and circulated a large number of his father's cabalistic manuscripts. During the eighteenth century nothing important is known of the community.

Some information is obtainable from travelers who visited Damascus during the nineteenth century.

Alfred von Kremer, in "Mittel-Syrien und Damaskus" (1853), states that in the nineteenth century the municipal government of the city two Christians and one Jew had places; the number of Jews was 4,000, only 1,000 of whom, however, paid the poll-tax; the last Karaite had died there some fifty years previously, the Karaite synagogue being then sold to the Greeks, who turned it into a church ("Monatsschrift," iii. 75). Benjamin II. gives the same number of inhabitants.

INTERIOR OF A DAMASCUS SYNAGOGUE.
(After a photograph.)

He describes the synagogue at Jobar (to the northeast of the city) thus:

"The structure of this ancient building reminds one of the Mosque Moawiah; the interior is supported by 13 marble pillars, six on the right and seven on the left side, and is everywhere inlaid with marble. There is only one portal by which to enter. Under the holy shrine . . . is a grotto . . . the descent to which is by a flight of about 20 steps. According to the Jews, the Prophet Elisha is said to have found in this grotto a place of refuge. . . . At the entrance of the synagogue, toward the middle of the wall to the right, is an irregularly formed stone, on which can be observed the traces of several steps. Tradition asserts that upon this step sat King Hazael when the Prophet Elisha anointed him king" ("Eight Years in Asia and Africa," pp. 41 *et seq.*).

was appointed by an imperial decree in 1888 (still in office in 1901).

During the nineteenth century the Jews of Damascus were several times made the victims of calumnies, the gravest being those of 1840 and 1860, in the reign of the sultan 'Abd al-Majid. That of 1840, commonly known as the DAMASCUS AFFAIR, was an accusation of ritual murder brought against the Jews in connection with the death of Father Thomas. The second accusation brought against the Jews, in 1860, was that of having taken part in the massacre of the Christian Maronites by the Druses and the Mohammedans. Five hundred of the last named,

COURT-YARD OF A SYRIAN HOUSEHOLD AT DAMASCUS

(From a photograph by Bonfil.)

Benjamin II. also speaks of valuable copies of parts of the Bible to be found in Damascus; though the dates he gives (581 and 989) are unreliable. Neubauer mentions a copy of the Bible which belonged to Elisha ben Abraham b. Benvenisti, called "Crescas," and which was finished in 1382 ("Med. Jew. Chron." i. 21).

Damascus has had eight chief rabbis during the last hundred years, namely: (1) Joseph David Abulafia (1809-16). (2) Jacob Antebi (1816-1833). (3) Jacob Perez (1833-48). (4) Aaron Bagdadi (1848-66). (During the next two years the office of chief rabbi was vacant, owing to internal quarrels.) (5) Hayyim Kimhi of Constantinople (1868-72). (6) Mercado Kilhi of Nish (1872-76). (7) Isaac Abulafia (1876-88). (8) Solomon Eliezer Alfandari, commonly called "Mercado Alfandari" of Constantinople, who

who had been involved in the affair, were hanged by the grand vizier Fuad Pasha. Two hundred Jews were awaiting the same fate, in spite of their innocence, and the whole Jewish community had been fined 4,000,000 piasters. The condemned Jews were saved only by the official intervention of Fuad Pasha himself; that of the Prussian consul, Dr. Wetzstein; of Sir Moses Montefiore of London, and of the bankers Abraham Camondo of Constantinople and Shemaya Angel of Damascus. From that time even down to the present day, blood accusations have several times been brought against the Jews; these, however, have never provoked any great excitement.

The present Jewish community of Damascus numbers 11,000 (though in 1894 Socin-Benzinger, in Baedeker's "Palestine," 2d ed., estimated their num-

ber as 6,320) persons in a total population of 160,000 inhabitants. It has eight synagogues, besides the ancient one of Jobar; several

Situation in 1901. of them, according to local traditions, date from the sixteenth century. The entire administration of the community is concentrated in the hands of the chief rabbi, his secretary, and some rabbis. Twice a year, at Passover and at Sukkot, all the families are taxed by the chief rabbi in proportion to their means, and the revenues are collected accordingly. This sum is used to defray the salaries of the chief rabbi, the rabbis who study the Talmud at the yeshibah, and the slaughterers at the butcher-shops; also to relieve the poor of the community. The chief rabbi ("hakam bashi") represents the community in affairs with the government. There is also a spiritual chief to decide in religious questions, the incumbent in 1901 being Isaac Abulafia. On the peculiarities of the ritual, which Damascus has in common with other Syrian communities, see Zunz, "Ritus," pp. 55, 56.

There are four Jewish benevolent societies in Damascus: (1) "Ahe-Ezer" (mutual help), distributing money and food to the needy Jews of the city; (2) "Yishma' Yisrael," furnishing dowries for poor young girls; (3) "Bikkur Holim," for relief of the sick poor; (4) the Ladies' Society, helping indigent families and women in childbirth.

The majority of the Jewish population are engaged as engravers on copper and wood, or as weavers, carpenters, and smiths. There are a few bankers and some small merchants. Four or five Jews are employed in the government offices, among them being Jacob Ades Effendi, inspector-general of real estate on the civil list in the vilayet of Damascus. But the mass of the population lives in misery. The members of the rabbinate, who form a kind of corporation, study in the yeshibot or in libraries belonging to pious families. Isaac Abulafia, the spiritual leader, is the only rabbinical author of the present time. Of the eight works which he has written, five are entitled "Pene-Yizhak"; one, "Leb-Nishbar"; and two are collections of discourses. Some of these books are still in manuscript.

Aside from the synagogues mentioned above, there is a yeshibah containing many books and an ancient genizah. In 1880 the Alliance Israélite Universelle founded a boys' school (which in 1899 had 229 pupils on its roll), and in 1883 a school for girls (298 on the roll in 1899). Two of the most important Talmud Torahs are now under the supervision of the Alliance: in 1899 they had 419 on their rolls. The Anglo-Jewish Association also contributes to the support of all these schools.

In 1902 a dispensary for the Jews was opened in Damascus by Edward D. Stern of London ("Jew. Chron." Jan. 2, 1903, p. 24).

M. FR.—G.

DAMASCUS AFFAIR: Accusation of ritual murder brought against the Jews of Damascus in

1840. At that time Damascus, together with Syria, belonged to Mohammed Ali, pasha of Egypt, who had revolted against the authority of his suzerain, the sultan Mahmud of Constantinople. The governor of Damascus was an Egyptian Arab, Sherif Pasha by name.

On Feb. 5, 1840, Father Thomas, originally from Sardinia, and the superior of a Franciscan convent at Damascus, disappeared with his servant. This monk, who practised medicine, was very well known in the Jewish and Mohammedan quarters, as well as among the Christians. Some days previous he had had a dispute with a Turkish muleteer, who had heard him blaspheme Mohammed, whereupon the Turk is reported to have said: "That dog of a Christian shall die by my hand." Upon Thomas' disappearance the French consul at Damascus, Ratti Menton, who was an enemy to the Jews, following the advice of certain monks, instituted investigations in the Jewish quarter; and the governor, Sherif Pasha, pretending to act merely in accordance with the friendly relations existing between the governments of Louis Philippe and Mohammed Ali, aided the French consul in a culpable way. A confession was extorted by torture from a Jewish barber named Negrin, and eight of the most notable Jews, among them Joseph Lañado, Moses Abulafia, and Farhi, were imprisoned and tortured. Their teeth and beards were pulled out, they were burned, and finally tempted with gold, to persuade them to confess an imaginary crime. Lañado, a feeble old man, died under this treatment. Moses Abulafia became a Mohammedan in order to escape the torture. In spite of the stoic courage displayed by the sufferers, Sherif Pasha and Ratti Menton agreed on the guilt of the accused in view of the words resembling a confession that had escaped them in their agony. While Ratti Menton published libels against the Jews in French and in Arabic, Sherif Pasha wrote to his master, Mohammed Ali, demanding authorization to execute the murderers of Father Thomas. In the mean time the populace fell upon the synagogue in the suburb of Jobar, pillaged it, and destroyed the scrolls of the Law.

The Jewish communities of Europe were appealed to, and public meetings were held in London, Paris, and even New York and Philadelphia. Especially important was a meeting called by the lord mayor of London at the Mansion House, London, July 3, 1840. As a result the lawyer Isaac Crémieux and the Orientalist Salomon Munk from France, and Sir Moses Montefiore from England were sent as mediators to Alexandria to plead with the khedive. They arrived at Alexandria Aug. 4, and after repeated interviews with Mohammed Ali, obtained from him, on Aug. 28, the unconditional release and recognition of the innocence of the nine prisoners who still remained alive of the thirteen imprisoned. They then went to Constantinople, and obtained from the sultan Majid a firman declaring the accusation of ritual murder to be absurd (see **BLOOD ACCUSATION**). The Austrian consul at Damascus, Merlatto, and the Austrian consul-general at Alexandria defended the rights of the Jews during all the incidents arising in this celebrated case. It was in part the Damascus affair which suggested to

some French Jews later the idea of founding the Alliance Israélite Universelle.

M. FR.

DAMIANI, PETER: Italian prelate; born at Ravenna 1007; died at Faenza 1072. About 1035 he entered the convent of Fonte Avellana near Gubbio, of which he became abbot. Together with Hildebrand, subsequently Pope Gregory VII., and Abbot Desiderius of Monte Casino, Damiani belonged to the most zealous champions of Church reform. In 1057 he was appointed Cardinal-Bishop of Ostia. At the instance of an Egyptian ecclesiastic, Hones-tus, he wrote two small controversial pamphlets to serve as a guide in religious disputations against the Jews, although he himself had no taste for such polemics.

In the first of these pamphlets, "Antilogus Contra Judæos," he sought, by means of numerous passages from the Old Testament, such as those relating to the Creation, the building of the Tower of Babel, the triple priestly benediction, the thrice-repeated "Holy," and the Messianic passages, to prove the Christian doctrines of the Trinity, the Messiah, and the divine sonship of Jesus. In the second, entitled "Dialogus Inter Judæum Requentem et Christianum e Contrario Respondentem," he endeavored to refute—by claiming that all of the laws referred to are to be interpreted spiritually—the objection raised by the Jews that the Christians fail to observe the ceremonial law, although Jesus declared that he came to fulfil that law.

DAMPIERRE (Hebr. דַּמְפִּירָא, דַּמְפִּירָא, or דַּמְפִּירָא): Village of Champagne, in the department of the Aube, France; not to be confounded with "Dom-paire," Vosges, as is sometimes done (Zunz, "Z.G." p. 33, and Renan-Neubauer, "Les Rabbins Français," p. 444). In the Middle Ages there was a somewhat important Jewish community in this village. King Philippe-Auguste, after an agreement with the Countess of Champagne, and Gui, Seigneur of Dampierre, in 1206, ordered the Jews to affix a special seal to the documents recording their loans, and forbade them to lend money on holy vessels or on the lands of the Church. During the years 1212, 1220, and 1225 the Jews had among their debtors the seigneurs of Dampierre and the abbey of Saint-Loup of Troyes.

Rabbis: (1) Isaac ben Samuel the Elder, abbreviated "ר", surnamed "the Saint" (1120-95); (2) his son Elhanan, martyred in 1184; (3) Joseph ben Simeon; (4) Isaac ben Abraham, abbreviated רִיבֶנָה or רִיבֶנָה, called sometimes "Isaac the Younger" to distinguish him from Isaac ben Samuel; (5) Isaac ha-Laban ben Jacob.

DAMROSCH, LEOPOLD: German-American violinist and conductor; born at Posen, Prussia, Oct. 22, 1832; died in New York Feb. 15, 1885. He commenced to learn the violin at the age of nine, but owing to his parents' opposition, who wished him to study medicine, he was compelled to study in the house of friends. In 1851 he entered Berlin University, where he studied medicine, and was graduated with high honors three years later. He then returned to Posen, and soon forsook medicine in order to devote himself entirely to music. In 1856 he appeared at Magdeburg as a violin virtuoso, and afterward made a tour of the chief cities of Europe. He was one of the famous band who sat under Liszt at Weimar. Liszt made him solo violinist in the ducal orchestra, and dedicated "Tasso" to him, a distinction conferred only upon two other musicians, Wagner and Berlioz.

In 1858 Damrosch married Helene von Heimburg, a singer of talent. He now became director of music at the Stadttheater in Posen, where he remained until 1866, when he accepted the position of director of the Philharmonic Concerts at Breslau. Here he organized a symphony society with an orchestra of eighty members. The society gave twelve annual concerts, and many eminent artists appeared among the performers. Damrosch also established a choral society, and gave recitals as a soloist.

In 1871 Damrosch was invited by the New York Arion Society to become its conductor. He went to America and soon became very successful both as a violinist and as conductor of his own compositions. In 1873 he organized a musical choir. Morris Reno and some twelve other lovers of music met at Damrosch's house and formally pledged themselves to become musical missionaries. Trinity Chapel was secured for a study-room, and on Dec. 3, 1873, was given the first concert of the Oratorio Society, with choir numbering 50 to 60. By the following May the society was able to produce Handel's oratorio "Samson" at Steinway Hall.

For five years Damrosch worked gratuitously for the Oratorio Society (at the time of his death it had a membership of 500, and ranked among the leading choruses of the world). In 1876 Damrosch became conductor of the Philharmonic Society, and in the following year, yielding that place to Theodore Thomas, founded the Symphony Society of New York. In 1880 he received the degree of doctor of music from Columbia College. The next year he planned the great musical festival which was held at the Seventh Regiment Armory, with a chorus of 1,200 voices and an orchestra of 250 instruments. But his crowning success was in 1884, when he successfully established German opera at the Metropolitan Opera House, New York. On the failure of that theater to secure an Italian troupe, he went to Germany, and in five weeks brought back a number of artists, who constituted the famous company which first established German opera in America. Damrosch not only personally directed each opera, but at the same time continued his work as director of the Oratorio and Symphony societies. His health broke down under

the strain, and he died of pneumonia in the following year.

Damrosch was one of the great conductors of modern times, and no man, except possibly Theodore Thomas, contributed so largely to the cultivation of good music in America. He was a devotee of Wagner. His works include: seven cantatas; symphony in A; the music to Schiller's "Joan of Arc"; an opera, "Sulamith"; and many other pieces.

V. E.

DAN.—**Biblical Data:** 1. The name of Jacob's fifth son (Gen. xxx. 6), whose mother was Bilhah, Rachel's handmaiden (*ib.* xxx. 3, xxxv. 25). He was therefore a full brother of Naphtali (xxx. 8). Dan's name occurs also in Gen. xlix. 16 *et seq.*; Judges xviii. 29; I Chron. ii. 2, and in all the passages where his sons are mentioned (Gen. xlii. 23 *et seq.*).

2. "Dan" designates one of the twelve tribes of Israel, both in poetic (Deut. xxxiii. 22; Judges v. 17) and in prose passages (Num. i. 12; ii. 25, 31; Deut. xxvii. 13; Judges xiii. 25, xviii.

The Tribe. 12; Ezek. xlvi. 1, 32 *et seq.*; I Chron. xxvii. 22; II Chron. ii. 13); but it generally occurs in combinations such as "the sons of Dan" (Num. i. 38, ii. 25, vii. 66, x. 25, xxvi. 42; Josh. xix. 47), "the generations of Dan" (Num. xxvi. 42), "the tribe of the sons of Dan" (Num. xxxiv. 22; Josh. xix. 40, 48), or, simply, "the tribe of Dan" (Ex. xxxi. 6, xxxv. 34, xxxviii. 23; Lev. xxiv. 11; Num. i. 39, xiii. 12; Josh. xxi. 5, 23). The following are detached details from the history of the tribe given in the Old Testament. The artist Aholiab or Oholiab, who took part in the construction of the Tabernacle (Ex. xxxi. 6, xxxv. 34, xxxviii. 23), was a member of this tribe, as was also the mother of a man who blasphemed the name of YHWH (Lev. xxiv. 11). At the time of Moses, Dan is represented as one of the larger tribes of the children of Israel, and as numbering 62,700 men of twenty years of age and upward (Num. i. 39, ii. 26). Somewhat later, when the tribe of Benjamin, for instance, is reported as having only 35,400 (Num. i. 37) or 45,600 men (*ib.* xxvi. 41), the number in the tribe of Dan is given as 64,400 (*ib.* xxvi. 43). Its men able to bear arms were among the three tribes (Dan, Asher, and Naphtali) whose army in the wilderness of Sinai covered the northern flank (Num. ii. 25–31, x. 25–27). Ammiel, one of the twelve spies (*ib.* xiii. 12), belonged to Dan; and its prince was Bukki (*ib.* xxxiv. 22). On entering Canaan the representatives of Dan, together with those of Reuben, Gad, Asher, Zebulun, and Naphtali, took their position on Ebal, the mount of the curse (Deut. xxvii. 13). In Moses' blessing Dan is characterized as "a lion's whelp: he shall leap from Bashan" (*ib.* xxxiii. 22). The latter clause, however, does not fit Dan, since that tribe did not live in the well-known plain of Bashan east of the Jordan.

The land assigned to the tribe of Dan was in western Canaan, its several cities and boundaries

being enumerated in Josh. xix. 40–46. Noteworthy among the cities are Zorah, Eshtaol, Thimnathah or Timnah, Ajalon (near which was fought the famous battle described in Josh. x. 12), and Ekron, which is

found in the cuneiform inscriptions as "Ankarruna." On the north the territory of Dan ended opposite Joppa, the modern Jaffa. This territory, not very extensive originally, was soon diminished by its dangerous neighbors, the Philistines. It is not surprising, therefore, that the Danites had great difficulty in conquering the country that had been assigned to them (Josh. xix. 47; Judges xviii. 1). Accordingly, they sent a deputation to find a district suitable for the reception of a part of the tribe. This was found in the vicinity of the city of Laish (Judges xviii. 7–27; see below, 3). Another indication that the tribe of Dan was harassed is found in the sentence "Why did Dan remain in ships?" (Judges v. 17). This probably had reference to the fact that members of the tribe of Dan had enlisted on the ships of the Phenicians (see Budde, "Kurzer Handcommentar," 1897, and Nowack, "Handcommentar," 1900).

The distress of Dan increased when, toward the end of the period of the Israelitish judges, the Philistines, receiving reinforcements from their former home (Guthe, "Gesch. des Volkes Israel," 1899, p. 65), endeavored to invade the middle territories of Canaan (Josephus, "Ant." v. 8, § 1). Then help arose for Dan in the person of the hero Samson (Judges xiii. 2–xvi. 31), whose work was brilliantly continued by Samuel (I Sam. vii. 11), and then by David and other kings. This explains why the tribe of Dan is mentioned in the accounts of David (I Chron. xxvii. 22) and Solomon (II Chron. ii. 13), and in later times (Ezek. xlvi. 1, 2, 32).

3. The later designation for the Canaanite city Laish (Judges xviii. 7, 14, 27, 29) or Leshem (Josh. xix. 47), the latter name being probably derived from "Lesham." The city lay in a deep valley near Beth-rehob (Judges xviii. 28), on the northern frontier of Palestine, at the place where "men come to Hamath" (Num. xiii. 21). According to Josephus ("Ant." v. 3, § 1), it was not far from the sources of the lesser Jordan, and, according to the "Onomastica Sacra" (s.v. "Dan"), three or four Roman miles from Paneas. In the Book of Enoch (xiii. 7) it is said that "Dan lay south of the western side of Mt. Hermon." Originally inhabited by Canaanites, it was captured by a part of the tribe of Dan, whose territory in southwestern Palestine was invaded by the Philistines (Josh. xix. 47; Judges xviii. 1 *et seq.*), and who named it after their tribal ancestor (Josh. xix. 47). The mention of the name of Dan as early as the time of Abraham and Moses (Gen. xiv. 14; Deut. xxxiv. 1) is therefore anticipated by the later chronicler (compare "Beth-el" in Gen. xii. 8 and xxviii. 19). Consequently there is no reason to assume, from Gen. xiv. 14 and Deut. xxxiv. 1, the existence of another city of Dan.

The place seems to be identical with Dan-jaan (II Sam. xxiv. 6), which was situated east of the Lake of Gennesaret toward Sidon; and as this was the route on which Laish-Dan lay (Judges xviii. 7, 29), it is probable that "Dan-jaan" is a corruption of

"Dan-jaar" (Dan in the wood), and that this was merely an occasional designation of the city of Dan.

The place is often mentioned in the phrases "from Dan even to Beer-sheba" (Judges xx. 1; I Sam. iii. 20; II Sam. iii. 10; xvii. 11; xxiv. 2, 15; I Kings iv. 25; Amos viii. 14) and "from Beer-sheba even to Dan" (I Chron. xxi. 2; II Chron. xxx. 5); while in Jer. iv. 15 and viii. 16 it is mentioned as a northern frontier town of Palestine.

Dan is also referred to in connection with the ritual; for, according to Judges xviii. 31, a graven image stood there up to the time of the destruction of the sanctuary at Shiloh, which sanctuary is mentioned for the last time in I Sam. iv. 12. Jeroboam I. set up at Dan one of the two golden calves which he intended as symbols for יהוה (I Kings xii. 29). Many persons of the northern tribes of Israel, therefore, made pilgrimages to Dan (Amos viii. 14; II Kings x. 29); but the city soon fell into the hands of Israel's northern enemies (I Kings xv. 20; II Chron. xvi. 4).

A hill near the valley in which lay the ancient city of Dan is to-day called "Tall al-Ḳaḍī"—i.e., "Hill of the Judge"—the name being, perhaps, a reminiscence of the name Dan = "judge."

—**In Rabbinical and Hellenistic Literature:** Dan plays a peculiar rôle in rabbinical tradition. Owing to the fact that his name, as the name of a tribe, is connected with the blasphemer (Lev. xxiv. 11), and with the idolatry of northern Israel (Judges xviii. 30; I Kings xii. 29; Amos viii. 14), while Samson, the judge of the tribe of Dan, proved faithless to his nazirate (Judges xiii. 2), Dan came to be regarded as the black sheep of the house of Jacob. His hatred of Joseph, because he brought to his father evil reports against the sons of Bilhah and Zilpah, induced him to plot against Joseph's life, and he advised the brothers to deceive their father by telling that they had found the coat of Joseph dipped in blood (Test. Patr., Zebulun, 4; Dan, 1; Gad, 1). Dan and Gad were in league with the crown prince of Egypt against Joseph and Asenath (see **ASENATH**, **PRAYER OF**).

As early as the days of Moses the tribe of Dan worshiped idols, wherefore the pillar of cloud failed to protect it, and consequently Amalek smote Dan, who was the "hindmost" and "feeble" because "he feared not God" (Targ. Yer. to Deut. xxv. 18; Pesik. iii. 27b; Pesik. R. xii.; Tan., Ki Teze). Being "the rearward of all the camps" (Num. x. 25), Dan fell a victim to "the fire that devoured the uttermost part of the camp because of the idol which provoked the anger of the Lord" (Targ. Yer. to Num. xi. 1, Hebr.). It was also Dan's idolatry which induced Balaam to order altar and sacrifices for the defeat of Israel (Targ. Yer. to Num. xxii. 41, xxiii. 1). Dan's idolatry restrained Abraham in his

march against the Babylonian kings (Gen. xiv. 15; Gen. R. xliii.) and appalled Moses in his vision of the future (Targ. Yer. to Deut. xxxiv. 1; Sifre, Debarim, 357). The children of Dan taught their sons the idolatrous Amorite practises contained in the books hidden under Mount Abarim (Gaster, "Chronicles of Jerahmeel," 1899, p. 167).

Jacob's blessing of Dan, in which he is compared to a serpent (Gen. xlix. 16-18), is referred to Samson (Gen. R. xcvi.), and the serpent is said to have been made the emblem of the tribe on its standard (Num. R. ii.).

But Dan became the very type of evil-doing. He was placed to the north (Num. ii. 25), this being the region of darkness and evil (Jer. i. 14),

Dan, Type because of his idolatry which wrapped of the world in darkness (Num. R. ii.).

Antichrist. Still further goes a tradition which identifies the serpent and the lion (Gen. xlix. 17 and Deut. xxxiii. 22) with BELIAL (see the literature in Bousset's "Antichrist," 1895, pp. 87, 113). Irenæus ("Adversus Hæreses," v. 302), Hippolytus ("De Christo et Antichristo," pp. 14, 15), and other Church fathers have a tradition, which can not but be of Jewish origin, that the ANTICHRIST comes from the tribe of Dan, and base it upon Jer. viii. 16: "The snorting of his [the enemy's] horses was heard from Dan"—a verse referred also in Gen. R. xliii. to Dan's idolatry. Irenæus remarks that Dan is, in view of this tradition, not in the Apocalypse (Rev. vii. 5-7) among the 144,000 saved ones of the twelve tribes. Nor is the omission of Dan in I Chron. iv. et seq. unintentional. Bousset, who has a special chapter devoted to the Dan Antichrist legend (*l.c.* pp. 112-115), believes that the connection of Dan with Belial in Test. Patr., Dan, 5 points to the same tradition. This seems to find corroboration in Targ. Yer. to Deut. xxxiv. 3, where the war against Ahriman (אַרְמַלְיוֹן) and Gog or Magog in the vision of Moses seems to refer to Dan, 1 (compare Sifre, *l.c.* to הַיָּמִים הָאֲחֵרִים; see also **DAN** and **TEN TRIBES**, **THE LOST**.)

K.

—**Critical View:** Kuenen ("Theologisch Tijdschrift," v. 291) and others after him, such as Cheyne ("Encyc. Bibl." s.v.), have argued that "Dan" is the title of a deity. In the etymology adduced in the explanatory remarks attributed to Rachel (Gen. xxx. 6) nothing is said about the character of the child. The judgment referred to is by God, and is passed upon Rachel. The reference to the name "Daniel" and to the cuneiform name of a king, "Ashur-dan," in support of the critical view has not been regarded by conservative scholars as sufficient to prove the contention in issue. Still, the analogy with other names, both tribal (GAD) and personal, is strongly in favor of the views advanced by Kuenen and his successors. "Daniel," in all probability, means "Dan is El" (compare "Eliyahu") and not "God is my judge"; and "Ashur-dan" is also a combination of two names of deities.

The personal existence of a son of Jacob bearing the name "Dan" has also been denied by modern scholars. This is in accord with the general doubt cast on the patriarchal biographies and genealogies. It is contended that no clan or tribe ever sprang from one ancestor. While among the tribes one of

the name of Dan may have existed, the designation is that of an eponym, assumed after the tribe had come to reflect upon its own origin and its relations to other tribes (Cornill, "History of Israel," p. 32; Stade, "Gesch. des Volkes Israel," i. 124, 146; Guthe, "Gesch. des Volkes Israel," pp. 5 *et seq.*; Holzinger, "Kurzer Handcommentar," on Gen. xxx. 24; Gun- kel, "Handcommentar," on Gen. xxix. 35; Cheyne, in "Encyc. Bibl." cols. 992 *et seq.*).

The assumption that Dan was the son of Rachel's handmaid, Bilhah, whose other son was Naphtali, signifies, according to the modern view of the ideas underlying such genealogies, that the tribe of Dan recognized a closer geographical or historical connection with that of Naphtali, in common with which it was regarded, or regarded itself, as somehow in a position subordinate to the tribes that traced their descent directly through Rachel from Jacob. The universal applicability of this principle has been doubted by König ("Bibelkritisches," 1902). In the case of Dan, tradition furnishes only scant material by which to test the theory. Yet, as the genealogies and biographies of other tribal eponyms appear to justify the general principle, there is no reason, from the point of view of the critical school, to question its applicability to Dan (see TRIBES, THE TWELVE).
E. G. H.

DAN ASHKENAZI: German Talmudist and exegete; flourished in the second half of the thirteenth century. Dan, who was one of the most prominent Talmudists of Germany and the teacher of Mordecai ben Hillel, emigrated to Spain toward the end of the thirteenth century, probably in consequence of the cruel persecutions to which the Jews of Germany were subjected at that time, when many were driven to seek asylum in other countries.

In Spain, where he was called "Ashkenazi" (German), he met the foremost rabbinical authorities, who thought highly of him. Dan, however, was so imprudent as to give a letter of recommendation to a youth who pretended to be a prophet (compare ABRAHAM OF AVILA); and when the latter turned it to account, Solomon Adret cast scorn upon the German rabbi in his circular letter on the pseudo-prophet (Adret's Responsa, No. 548). Even before this occurrence the relations between these two men do not seem to have been very friendly, since Dan declared at Saragossa that, from the strict point of view of the Halakah, there could be no objection to the slaughtering of animals by Christians, as the reason given in the Talmud for forbidding the slaughtering of animals by pagans did not apply to Christians; for the pagan regarded the slaughtering as a sacrifice to his idols, while the same could not be said of the Christians (*ib.* No. 529; but Dan's reasons are not clearly stated).

Dan, who was a person of much individuality, was misunderstood by many, and acts were ascribed to him which he certainly did not commit (*ib.* No. 530). Adret's five responsa (Nos. 1229-1233) show that Dan was not a man to be overlooked; Adret's successor as rabbi of Barcelona, Nissim b. Reuben, also recognizes Dan's scholarship (Responsa, No. 32; ed. Rome, p. 72). Yom-Tob b. Abraham of Seville (RITBA) calls Dan "our teacher" (*ib.*),

although this did not prevent him from writing a pamphlet against Dan regarding their dispute over an important halakic question (RITBA to Yibum, 109).

Dan was also very independent as an exegete; the fragments of his exegesis that have been preserved in manuscript, and also in the works of Bahya ben Asher and in the collection "Hadrat Ze'ekanim" (Leghorn, 1840), are highly interesting on account of their rationalism, which was not to be expected from one who had allowed himself to be misled by a false prophet. For instance, he interpreted מלאך, in Ex. xxiii. 20, as "messenger," not "angel," and supposed it to refer to Joshua. It is curious to note that in the collection of responsa "Besamim Rosh," which Saul Berlin published as Asher b. Jehiel's work, the statement is made that Dan wrote his Tefillin in Aramaic (No. 24).

L. G.

DAN-JAAN: If the reading is correct, the name of a city mentioned only once in the Bible (II Sam. xxiv. 6). It was one of the places included in the route of Joab and his associates when they were sent out by David to number the people. Their route was eastward across the Jordan, northward through the trans-Jordanic tribes, westward to Sidon, passing Dan-jaan on the way, and southward as far as Beer-sheba. It is natural, then, to identify Dan, on the northern boundary of Israel, with Dan-jaan, although Conder, after Schultz, seeks to identify it with Danian near Achzib. For "Jaan" various emendations have been proposed. Gesenius changes יען into יער ("Dan of the wood"). Wellhausen and, following him, Budde, Kittel, and Driver read וּמִן סָבִיב ("and from Dan they went round"). Klostermann and Grätz change יען into יין (Ijon), a city mentioned in connection with Dan in I Kings xv. 20.

E. G. H.

G. B. L.

DANCING.—Biblical Data: Rhythmical and measured stepping to the accompaniment of music, singing, or the beating of drums. This exercise, generally expressive of joy, is found among all primitive peoples. It was originally incident to religious worship, or to the martial demonstrations of a tribe. It may be inferred, therefore, that dancing of this character obtained also among the ancient Hebrews. Their cognates, the Bedouin Arabs, at the present time indulge in wild dances of this kind (Doughty, "Arabia Deserta," i. 31), and in the rites of the hadj old religious dances have been preserved (Wellhausen, "Reste Arabischen Heidentums," 1st ed., pp. 106, 165).

That dancing among the Hebrews was chiefly connected with demonstrations of joy is indicated by the use of the word שָׁחַק = צַחֵק, usually connoting "playing," "sporting," or "jesting."

Ter- (I Sam. xviii. 7; II Sam. vi. 5, 21; **minology.** I Chron. xiii. 8, xv. 29; Jer. xxx. 19, xxxi. 4: בְּמַהוֹל מִשְׁחָקִים). That violent motions of the feet, not a graceful gliding, characterized the dance appears from the verb רָקַד, meaning originally "to leap like lambs," used with the meaning of "to dance."

כִּרְכַּר, in II Sam. vi. 14, 16, seems to indicate a round dance (compare I Chron. xv. 29), most likely the turning round and round upon the heels on one spot, as practised by the dervishes. The choric dance is denoted by מְחֻלָּה מְחֻלָּה, a derivative of חָוָל = "to writhe," "to turn" (Lam. v. 15; Ps. xxx. 11, 12; Cant. vii. 1; Ex. xv. 20, xxxii. 19; I Sam. xviii. 6 [Septuagint, "dancing women"], xxi. 2, xxix. 5; Judges xi. 34, xxi. 21; Ps. lxxxvii. 7). That the religious dance constituted the principal feature of every festival is shown by the history of the word חַג ("Z. D. M. G." xli. 719; Driver's "Notes on the Books of Samuel," p. 173; Wellhausen, "Israelitische und Jüdische Geschichte," p. 101, Berlin, 1897; *idem*, "Reste Arabischen Heidentums," *l.c.*). In the course of time it came to mean merely a festival, or one of the three pilgrim festivals, though its primitive connotation was a procession around the altar or shrine executed in a certain halting rhythm, whence the pilgrimage to Mecca, the hadj, has taken its name. The term "pesah" recalls the same facts. It indicates this "limping" dance (see Toy in "Journal of Biblical Literature and Exegesis," xvi. 178 *et seq.*); whence, also, the jibe in I Kings xviii. 26: "How long will you dance at two 'thresholds'?" (Jastrow's emendation). These religious processional dances may have represented some mythological event, a swaying to and fro of contending parties (see Jacob's experience in Gen. xxxii. 29: "he limps").

The Biblical books have undoubtedly preserved the memory of religious dances in connection with the making of the golden calf, and at the Red Sea (Ex. xv. 20, xxxii. 19). **Religious Dances.** The story of Jephthah's daughter (Judges xi. 34) illustrates this custom, and suggests that it was a part of a very ancient sacrificial cult. In I Sam. xviii. 6, xxi. 11 women dance in honor of Saul and David. It seems that women were prominent in these choragic ceremonies. The "kedeshot" attached to every sanctuary may even have been professional dancers. Ps. cxviii. 27 probably alludes to a procession of this kind in the puzzling phrase אִסְרוּ חַג. Post-exilic psalms evidence that processions of dancers to the sound of various musical instruments (flutes, trumpets, timbrels, cymbals, drums) had a prominent share in religious celebrations (Ps. xxvi. 6, cxlix. 3, cl. 4 [lxviii. 25: S. B. O. T.]). The request which was addressed to Pharaoh by Moses (Ex. x. 9) indicates that such processions were an old-established custom.

As do the dervishes even at the present day (Tristram, "Eastern Customs," pp. 207-210), so did the Prophets resort to dancing as a means of working themselves up to the proper nervous pitch (I Sam. x. 10, 11; xix. 20-24). Their resulting exaltation proved contagious, as do, according to Lane, the mad contortions of the dancing dervishes to-day.

Dancing marked also tribal and family festivals. At Shiloh an annual feast was celebrated at which the maidens indulged in dancing (Judges xxi. 21), and it is more than probable that Abel-meholah ("the dancing meadow") owes its name to a similar usage (I Kings xix. 16). For the times of the Tal-

mud a kind of "marriage dance," such as is found in many modern children's plays, is remembered (Ta'an. iv. 8) as occurring on the Day

Tribal and Family Dances. of Atonement and on the fifteenth day of Ab; and the theory that these "dances" are survivals of marriage by capture is not without reasonableness.

The "torchlight procession" which took place at the Festival of the Water-Drawing (שִׁמְחַת בֵּית הַשּׁוֹאֵבָה) was participated in by the most distinguished notables (Suk. v. 1-4).

In the days when Greek immoralities menaced the very existence of Judaism, dancing—especially by professional and probably lewd women—was looked upon with disfavor (Ecclus. [Sirach] ix. 4). The daughter of Herodias undoubtedly imitated and took the place of a professional dancer at the banquet (Matt. xiv. 6). From other Biblical passages it is clear that dancing was demanded on similar occasions (Jer. xxxi. 4, 13). Lam. v. 15; Eccl. iii. 4; and Ps. xxx. 11 indicate that the dance was considered an expression of joy. Some have urged Cant. vii. 1 in support of the theory that a sort of square dance ("kimeholat ha-mahanayim") was known to the Jews. Wetzstein identifies it with the sword-dance that still takes place at Eastern wedding-feasts.

E. G. H.

—**In Talmudic Times:** In post-Biblical times dancing continued to be a favorite exercise on both religious and secular occasions. "The woman of sixty runs to the sound of music like the girl of six" (M. K. 9b). A feast was made complete by dancing, and noted scholars were in the habit of providing such entertainment for their guests (Ned. 51a). Dancing in honor of the bride at a wedding was deemed an act of piety, and sedate rabbis often vied with one another in its exercise. Thus, R. Judah b. 'Illai used to dance at weddings waving a myrtle branch (Ket. 17a). Moreover, the festive procession which in Biblical times made the periodical pilgrimages to Jerusalem such a source of popular joy, forming the main feature in the observance of the great holidays, continued to fill with glee the high-ways of Palestine in Talmudic days. Franz Delitzsch properly uses a description of these jubilant ceremonies as an argument against these theorists who hold that the Law had rendered the life of the post-exilic Jews sad and gloomy, depriving their religious practises of spontaneity and joyfulness. The Mishnah, for instance, relates in how truly popular a manner and with what accompaniment of genuine joy the men from the provinces were wont to bring the first-fruits to the Temple at Jerusalem. They did not come singly, as men bearing burdens, but in festive processions, with light, joyous, grateful hearts.

"All the villages of a district send their dwellers to the chief city of the district; the pilgrims pass the night in the streets of the town, refraining from entering the houses, and at dawn the leader cries out: 'Arise, and let us go up to Zion, to the house of our God!' While on the march they sing choral psalms, 'I was glad when they said unto me, Let us go unto the house of the Lord,' being the favorite refrain. When they reach Jerusalem they chant: 'Our feet are standing within thy gates, O Jerusalem!' (Ps. cxxii.). At the Temple mount they strike up: 'Praise ye the Lord, praise God in his sanctuary!' (Ps. cl.). and having reached the hall, they finish with 'Praise ye the Lord, praise the Lord, O my soul!' (Ps. cxlvi.). The men from

the neighborhood bring fresh figs and grapes, and those from afar dried figs and grapes. And the ox of sacrifice goes before them, its horns embossed with gold and a crown of olive on its head. The flute is played all the while they are marching, until they come close upon Jerusalem. Then they send delegates to the city to offer their first-fruits. The foremost priests come out to meet them; according to the number of pilgrims is the priestly deputation. In Jerusalem all workmen in the streets pause in their work to greet the comers: "Be welcome, our brethren, men of such-and-such a town!" And the flute still plays on before them until they reach the mount of the sanctuary" (Bik. iii. 2; Yer. *ad loc.*).

The Talmud also contains traditions concerning the joyful manner in which the two national holidays, the 15th of Ab (the Feast of Wood-Offering, or "Xylophoria," as Josephus calls it) and the Day of Atonement, were celebrated. Various causes, it appears, were held to have given birth to these two feasts; at any rate, they were generally observed. On those days the maidens of Israel were in the habit of going forth to the vineyards, each clad in well-washed white, and joining in the choral dances. They all appeared in borrowed gowns, so as not to shame the poor. The young men came and looked on, while the dancers sang appropriate songs. It would seem that brides were oftentimes chosen at these gatherings (Ta'an. 30b). Similarly, there is a Talmudic tradition that "whoever has not witnessed the joy of the Festival of Water-Drawing has seen no joy in his life." On those occasions,

Festival of Water-Drawing. on the night of the first day of the Feast of Tabernacles, huge assemblies of people gathered in the women's court of the Temple, bearing lamps of gold and vessels for water, while every house in Jerusalem was brightly illuminated. "Pious men and men of affairs," adds the tradition, "danced with torches in their hands, singing songs of joy and of praise, and the Levites made music with lyre and harp and cymbals and trumpets and countless other instruments" (Suk. 51a; Maimonides, "Yad," Lulab, viii. 12, 13). Two galleries were built for the spectators, one for men and one for women. The celebration lasted all night and ended at dawn, announced by blasts of trumpets, with the pouring of water upon the altar.

The fondness of the ancient Jew for dancing is suggested in the hope naively expressed by R. Eleazar: "Some day the Holy One, blessed be He! will give a dance for the righteous, and He will sit among them in the Garden of Eden, and each one will point his finger at Him, saying, as it is written (Isa. xxv. 9), 'Lo, this is our God; we have waited for him, and he will save us: this is the Lord; we have waited for him, we will be glad and rejoice in his salvation'" (Ta'an. end).

It will be seen that dancing among the Jews preserved its primitive character: a spontaneous expression of joy rather than an esthetic pleasure. In both ancient and medieval times, therefore, it consisted of "gesticulations, violent leaps and bounds, hopping in a circle, rather than graceful pose, and soft, rhythmic movements." The popularity of the amusement in the Middle Ages is attested by the spread of the dancing-hall, or "Tanzhaus," which, for the use of both weddings and ordinary dances, was established in almost every ghetto of France and Germany. At first these halls, frequented es-

pecially on Sabbaths and feast-days, witnessed little mixed dancing. But when the latter habit came into vogue, the Rabbis opposed it strenuously on account of the license and the marital quarrels to which it led, citing in support the verse in Proverbs: "Hand to hand shall not go unpunished" (xi. 21, Hebr.). The nearest relations alone, such as husband and wife, father and daughter, brother and sister, were exempted from the inhibition. Needless to say, the rabbinic rule was often infringed by the bolder young men and women. That mixed dancing was not without its moral dangers was witnessed by the license which its prevalence engendered among the enthusiastic followers of Shabbethai Zebi. Occasionally, professional Jewish dancers occur; for instance in the seventeenth century, when the sultan engaged Jewish fiddlers and dancers to perform at a banquet; and they are not infrequent in the modern Orient, more especially in Tunis. In these latter forms, of course, dancing has become a purely social diversion without any religious import; but the original significance of dancing as an expression of religious joy and fervor may yet be observed in the synagogues of Orthodox Jews on the Feast of Simhat Torah ("Rejoicing of the Law"), where the primitive religious dance may be said to have survived.

DANHAUSER, ADOLPHE - LÉOPOLD:

French musician; born in Paris Feb. 26, 1835; died there June 9, 1896. He studied at the Paris Conservatory under Bazin, Halévy, and Reber; took first prize in harmony (1857); first prize in fugue (1859); second Prix de Rome (1862). He became chief inspector of instruction in singing in the schools of Paris in 1875; afterward professor of solfeggio at the Conservatory. He composed: "Le Proscrit," a musical drama (produced at Auteuil in 1866); "Maures et Castillans," a three-act opera (not produced); several "Mélodies Vocales"; "Soirées Orphéoniques" (collection of twelve choruses for three equal voices). He wrote a well-known textbook, "Théorie de la Musique" (1878); "Abrégé de la Théorie de la Musique" (1879); "Chants pour les Ecoles"; "Recueil de Petits Chants à Une Voix" (1883); "Questionnaire, Appendice de la Théorie de la Musique" (1886).

DANIEL.—**Biblical Data:** In Hebrew (1) דָּנִיֵּל; (2) דָּנְיָאֵל. (1) The form without the *v* (see Masorah Magna to Ezek. xiv. 14) occurs in Ezek. xiv. 14, 20; xxviii. 3; also in a Palmyrene inscription (see De Vogüé, "Syrie Centrale," No. 93). The pronunciation "Dani'el" (God is my Judge) is more probable than "Dan'el" (God is a Judge), because in consonance with the general structure of Hebrew names. It is

therefore probably correct to vocalize the consonants in the three places thus: דַּנְיֵאל. (2) The hiatus between the vowels "i" and "e" gave rise to the pronunciation "Danyel" (דַּנְיֵאל, Dan. i. 6), with the insertion of a consonantal "i"; compare "Eli' atah" ("Eliathah," I Chron. xxv. 4) with "Eliyata" (verse 27; compare König, "Historisch-Kritisches Lehrgebäude der Hebräischen Sprache," ii. 481 *et seq.*). The name should be interpreted, in accordance with Gen. xxx. 6, as "God is the Defender of my right."

The following persons called "Daniel" are mentioned in the O. T.: 1. A son of David by Abigail (I Chron. iii. 1); the parallel passage (II Sam. iii. 3) has "Chileab"; but this reading is perhaps a corruption due to the fact that the last three letters of דַּנְיֵאל are identical with the first three letters of the following word, לְאֶבְיָאֵל.

The Name in the Old Testament. The forms of his name found in the Septuagint—*Δανιήλ* and *Δαμνηλ*—support this view, in that they show the first letter of the name to be ד (Δ). G. Kerber (in his "Die Religionsgeschichtliche Bedeutung der Hebr. Eigennamen," 1897, p. 36) combines the name "Kile'ab" with "Kaleb," the name of the well-known companion of Joshua, and with "keleb" = dog. This, however, is a mere hypothesis, and can not serve as an argument for the name "Kile'ab."

2. A man of extraordinary righteousness (Ezek. xiv. 14, 20) and wisdom (xxviii. 3), who appears to have been almost as well known as Noah and Job, with whom he is mentioned in both of the passages cited.

3. A priest of the sons of Ithamar (Ezra viii. 2). The parallel passage in the Greek Book of Ezra (viii. 29) has the forms *Γαμνηλ*, *Γαμηλος*, and *Γαμαληλ*, which are evidently miswritings for *Δανηλ*. This priest returned with Ezra from Babylonia to Jerusalem in 458 B.C., and was one of those who sealed Israel's covenant with God (Neh. x. 6).

4. The most important bearer of the name is the hero of the canonical Book of Daniel and of the additions found in the Septuagint. This Daniel was among the prisoners carried by Nebuchadnezzar to Babylon after the capture of Jerusalem in the third year of the reign of

Descent of Daniel. Jehoiaquin; he was also one of the young men instructed, by order of Nebuchadnezzar, in the learning and the tongue of the Chaldeans (Dan. i. 3-4). No mention is made, however, of Daniel's birthplace or family. It is not known whether he belonged to the family of the King of Israel or to that of an Israelitish magnate. Josephus ("Ant." x. 10, § 1) evidently inferred from Sanh. i. 3 that Daniel was a relation of King Zedekiah (*ἦσαν τῶν ἐκ τοῦ Σεδεκίου γένους τέσσαρες*), while Pseudo-Epiphanius, on the strength of the same passage, makes Daniel the scion of a noble Israelitish family (compare Prince, "Critical Commentary on the Book of Daniel," p. 25).

The Chaldeans gave Daniel a new name derived from their own language; namely, "Belteshazzar," the Hebraized form of "Balatshu-uzur" (lit. "His Life Protect"). When requested to eat the food of the heathen, he asked that he and his Hebrew

friends might be given their own food, in keeping with the Law of their fathers. Daniel soon had an opportunity to reap the reward of his piety; for, inspired by God, he interpreted King Nebuchadnezzar's dream, and the king in return made him ruler over the whole province of Babylon and chief over all the wise men of Babylon (Dan. ii. 48). Daniel distinguished himself a second time by interpreting another dream of Nebuchadnezzar (*ib.* iv.), and by deciphering the mysterious words "Mene, Mene, Tekel, Ufarsin" (*ib.* v. 25).

Daniel retained his high position under Darius until his fellow dignitaries induced the king to issue a decree forbidding any one to ask anything of God, or of any man except the king, for a period of thirty days. When Daniel, nevertheless, continued to pray three times a day at an open window looking toward Jerusalem, he was cast into the lion's den, but was rescued by his God and honored anew by the king. He retained his influence until the third year of Cyrus' reign over Babylon (that is, up to 536 B.C.), and prophesied the future of God's kingdom (*ib.* i. 21, vi. 28, x. 1).

E. K.

—**In Rabbinical Literature:** According to rabbinical tradition Daniel was of royal descent; and his fate, together with that of his three friends, Hananiah, Mishael, and Azariah, was foretold by the prophet Isaiah to King Hezekiah in these words, "and they shall be eunuchs in the palace of the king of Babylon" (Isa. xxxix. 7; compare Sanh. 93b; Pirke R. El. lii.; Origen, commentary to Matt. xv. 5; Jerome, commentary to Isaiah, *l.c.*). According to this view, Daniel and his friends were eunuchs, and were consequently able to prove the groundlessness of charges of immorality brought against them, which had almost caused their death at the hands of the king. Even in his youth, when he convicted the false witnesses against the pious and beautiful Susanna, Daniel gave proof of that wisdom (see SUSANNA, HISTORY OF) which afterward made him so famous that it was said of him, "If he were in one scale of the balance and all the wise men of the heathens in the other, he would outweigh them all" (see Yoma 77a). When the king Nebuchadnezzar heard Daniel reproduce the dream which he had, had he could not doubt the truthfulness of his interpretation (Tan., ed. Buber, i. 191). Nebuchadnezzar admired Daniel greatly, although the latter refused the proffered divine honors, thus distinguishing himself favorably from his contemporary Hiram (the "prince of Tyre," in Ezek. xxviii.), who demanded honor as a god (Gen. R. xcvi.).

Life at court was fraught with many dangers for the pious Daniel. In the first place he denied himself much in the matter of food, since he would not partake of the wine and oil of the

Nebuchadnezzar's Idol. heathens ('Ab. Zarah 36a); and more than once he endangered his life by refusing to take part in the idolatry of the king. Daniel was not forced, as

were his three friends, to worship the idol which Nebuchadnezzar set up; for the king, who well knew that Daniel would rather be cast into the fiery furnace than commit idolatry, sent him away from

Babylon in order that he might not be forced to condemn his own god—namely, Daniel, whom he worshiped—to death by fire. Furthermore, it was God's intention to cause the three men to be taken out of the furnace during the absence of Daniel, so that their rescue should not be ascribed to the merit of the latter (Sanh. 93a; compare also Cant. R. vii. 8, and AZARIAH IN RABBINICAL LITERATURE). Nevertheless, the king endeavored to induce Daniel to worship the idol by trying to make him believe that it was something alive and real; and he ordered that there be placed in its mouth the frontlet ("ziz") of the high priest, on which was written the name of God; and since this name possessed the miraculous power of enabling inanimate things to speak, the idol could utter the words "I am thy god." Daniel, however, was not to be so easily deceived. Asking permission to kiss the idol on the mouth, he stepped before it and conjured the frontlet in the following words: "Although I am only a man of flesh and blood, yet I stand here as God's messenger. Take care that God's name is not desecrated by you, and thus I command you to follow me." While he was kissing the idol the frontlet passed from the idol's mouth into his. When Nebuchadnezzar, as usual, sent for musicians to give songs of praise to the idol, he noticed that Daniel had silenced it (Cant. R. vii. 9).

On another occasion Daniel was strongly urged by King Cyrus to recognize Bel, whose divinity was evidenced by the fact that he ate up the sacrifices placed daily before him. This was reported by the priests, who entered the temple every night by a subterranean passage, ate the sacrifices, and then announced that the idol had eaten the offerings. Daniel exposed this fraud. He had ashes strewn on the floor of the temple, and on the following day he convinced the king that persons had entered the temple at night, by showing him the footprints in the ashes. At another time a dragon was worshiped by the Babylonians, and their king tried to make Daniel also worship it. Daniel boiled pitch, fat, and hair together and gave lumps of it to the dragon, which thereupon burst.

Daniel's success at court naturally excited the envy and ill will of the Babylonians, who gathered in a mob and threatened the king and

In the Lions' Den. his house if he did not deliver Daniel to them. The king was powerless to resist, and the people took Daniel and threw him into a den with seven famished lions. Daniel remained there unharmed for six days, being fed during that time by the prophet Habakkuk, whom an angel had in an instant transported from Judea to Babylon, holding him by the hair of his head. On the seventh day the king went to the den to bewail Daniel, and was astonished to find him alive. Praising God for the help accorded to His pious servant, the king ordered that Daniel should be drawn out of the den and that his accusers should be cast therein; and they were immediately devoured by the wild beasts (see BEL AND THE DRAGON).

In like manner was Daniel delivered from lions in the reign of Darius. By the advice of Daniel this ruler had placed the affairs of the government in

the hands of a board composed of three officials, with Daniel at their head. He was, therefore, the second after the king. His high position excited the envy of the other officials, who, in an underhand way, succeeded in inducing the king to sign a decree forbidding any one, on pain of death, to pray to any god or man, except to the king (Yosippon, ed. Cracow, 1589, iii. 7a-7d). Although Daniel was not forced to sin in any way, he was prepared to sacrifice his life rather than omit his prayers; hence it was easy for his enemies to convict him of having violated the royal order. While he was at prayer his enemies entered his room, and watched to see whether the accusations against him could be substantiated, as the king did not believe them. Daniel did not omit his "Minhah" prayer. Notwithstanding his friendship for Daniel, the king listened to the accusations of the nobles, and condemned him to be cast into the den of lions. The mouth of the den was closed with a huge stone, which had rolled of itself from Palestine to Babylon for that purpose. Upon this stone sat an angel in the shape of a lion, so that Daniel's enemies might not harass him (Midr. Teh. xxiv., lxvi.); and the beasts in the den received Daniel as faithful dogs might receive their returning master, wagging their tails and licking him (Yosippon, iii. 8b; Aphraates, "Homilies," ed. Wright, iv. 67). Early the next morning the king hastened to the den in order to learn Daniel's fate, and called him by name; but he received no answer, as Daniel was just then reading the "Shema" (Midr. Teh. lxvi.), after having spent the night in song of praise to God, to which the lions had silently listened (Yosippon, *l.c.*). Daniel's enemies insisted that the lions were tame because they were not hungry, whereupon the king commanded that the accusers themselves spend a night with the beasts. As a result the enemies of Daniel, numbering 122, with their wives and children, making a total of 366 persons, were torn by 1,469 lions (Midr. Teh. *l.c.*; in Yosippon [*l.c.* Sc] this experience is attributed to Habakkuk. The legend of the dragon is in any case probably only a later differentiation of the Biblical story in Dan. vi.).

These miracles kept Daniel in favor with the king, who thereupon issued orders that the Jews should return to Palestine and rebuild the Temple. Daniel's great age induced him to ask for his dismissal from the king's service; but his request was not granted until he had found a worthy successor in Zerubbabel, whom he recommended to the king for all the offices that he himself had filled. Daniel was then graciously dismissed with valuable presents from the king, and went to Shushan, where he lived piously until his death (Yosippon, *l.c.* 9d-10a; but compare Cant. R., *l.c.*, according to which Daniel returned to Palestine at the command of Cyrus). Although Daniel was no prophet, God held him worthy to receive the revelation of the destiny of Israel, even to the Day of Judgment, thus distinguishing him from his friends, the prophets Haggai, Zechariah, and Malachi, who had no visions (Dan. x. 7). Daniel, however, forgot the "end" (קץ) revealed to him, after an angel had shown him everything (Gen. R. xcviil. 2).

L. G.

—**In Arabic Literature:** The Moslems consider Daniel as a prophet, though he is not mentioned in the Koran. It was he who preached in Babylonian 'Irak—that is to say, Chaldea—exhorting the people to return to God. He lived during the reigns of the Persian king Lahorasp and of Cyrus, and taught these two princes the unity of God and the true religion. Tabari says ("Chronique," French translation of Zotenberg, i. 44) that thousands of people who had died in a certain town from an epidemic were resuscitated a thousand years later by the prayer of Daniel, a legend probably borrowed from Ezek. xxxvii. 1-10.

When Daniel had become a noted prophet, Cyrus made him the chief of all his kingdom in order that he might teach his people the true religion. The prophet asked the king to let him go back to Palestine and build the Temple. Cyrus consented to the reconstruction of the sanctuary, but refused to let him go, saying, "If I had a thousand prophets like thee, I should have them all stay with me." There is another tradition, to the effect that Daniel was king of the Israelites after their return from captivity.

According to Muhammad ibn Jarir (quoted by Tabari, *l.c.* p. 751), it was Nabuchadnezzar who ordered Daniel to be thrown into the lion's den. A pit was dug purposely for him; and he and five companions were cast before a famished animal. Shortly afterward the king, on approaching the pit, saw there seven persons instead of six. The seventh was an angel, who struck Nabuchadnezzar a blow in the face, and by that changed him into a wild beast.

The Arabs attribute to Daniel the invention of geomancy ("ilm al-raml") and the authorship of the "Uṣūl al-Ta'bir" (The Principles of Interpreting Dreams).

Mas'udi says there were two Daniels: Daniel the Elder, who lived in the period between Noah and Abraham, and was the father of the above-mentioned

sciences; and Daniel the Younger, who, according to a tradition, was the maternal uncle of Cyrus, whose mother was a Jewess. The Arabs attribute to him the book "Kitab al-Jafar" (Divination) and many predictions relative to the Persian kings.

DANIEL, TOMB OF: Tradition has named two places as the site of Daniel's tomb. In the "Mar-

tyrologium Romanum," for instance, which consecrates July 21 to Saint Daniel, the place of his death is given as Babylon, and it was claimed that he was buried in the royal vault there. Benjamin of Tudela, who visited the Holy Land about 1160 C.E., gives much more accurate information in his account of Susa. In the façade of one of its many synagogues he was shown the tomb assigned by tradition to Daniel. Susa is the modern Shuster, and this synagogue is still standing. There are some good representations of it, as, for example, in Flandin and Coste, "Voyage

TRADITIONAL TOMB OF DANIEL.

(From Flandin and Coste, "Voyage en Perse Moderne.")

en Perse Moderne" (plate 100), and in Loftus, "Chaldea and Susiana" (pp. 317 *et seq.*).

Benjamin declares, however, that the tomb does not hold Daniel's remains, which were said to have been discovered at Susa about 640 C.E. The remains were supposed to bring good fortune; and bitter quarrels arose because of them between the inhabitants of the two banks of the Choaspes. All those living on the side on which Daniel's grave was situated were rich and happy, while those on the opposite side were poor and in want; the latter, therefore, wished the bier of Daniel transferred to their side of the river. They finally agreed that the bier should rest alternately one year on each side. This agreement was carried out for many years, until the Persian shah Sanjar, on visiting the city, stopped

the practise, holding that the continual removal of the bier was disrespectful to the prophet. He ordered the bier to be fastened with chains to the bridge, directly in the middle of the structure; and he erected a chapel on the spot for both Jews and non-Jews. The king also forbade fishing in the river within a mile of Daniel's bier ("Itinerary of Benjamin of Tudela" [Hebr.], ed. Asher, i. 74-76, ii. 152-154; compare Pethahiah of Regensburg, p. 77, below, Jerusalem, 1872). The place is a dangerous one for navigation, since godless persons perish immediately on passing it; and the water under the bier is distinguished by the presence of goldfish.

Mohammedan traditions agree in stating that Daniel was buried at Susa, and a similar tradition was current among the Syriac writers (Budge, "Book of the Bee," p. 73). Al-Baladhori (ninth century) says that when the conqueror Abu Musa al-Ash'ari came to Susa in 638, he found the coffin of Daniel, which had been brought thither from Babylon in order to bring down rain during a period of drought (compare Al-Tabari, i. 2567). Abu Musa referred the matter to the calif Omar, who ordered the coffin to be buried, which was done by sinking it to the bottom of one of the streams near by ("Futuh al-Buldan," p. 378). A similar account is given by Ibn Haukal (ed. De Goeje, p. 174) and Al-Isfahri (ed. De Goeje, p. 92), who add that the Jews were accustomed to make a circuit around Daniel's tomb and to draw water in its neighborhood (see also Yakut, "Mu'jam al-Buldan," iii. 189). Al-Mukadasi (ed. De Goeje, p. 417) refers to the contention between the people of Susa and those of Tustar. A slightly divergent tradition reported by Ibn Tai-miyyah says that the body was found in Tustar; that at night thirteen graves were dug, and it was put in one of these—a sign that the early Moslems were opposed to the worship of the tombs of holy men ("Z. D. M. G." liii. 58).

The authenticity of the tomb at Susa is believed in by the mollahs of Arabistan, even though five days journey from Dizful, near Mal Amir, there is another tomb sacred to Daniel.

DANIEL, APOCALYPSE OF. See APOCALYPTIC LITERATURE.

DANIEL, BOOK OF*—Critical View: One of the books of the Old Testament. It may be divided into two parts: chapters i.-vi., recounting the events of Daniel's life; chapters vii.-xii., containing his prophecies. "While the first part proves that it is impossible for the world-empire to belong to the heathen forever, the second part shows that Israel is destined to found this world empire through the son of man, who has long since existed in heaven" (J. Böhm, "Reich Gottes und Menschensohn im Buche Daniel," 1899, p. 60).

In its form the book shows striking differences, for while ii. 4 to vii. 28 is written in Aramaic, the preceding and following portions are written in Hebrew. It is not easy to discover the reason for this peculiarity; it suggests, however, that the "Chaldeans" in this book are the Arameans or Syrians. A

similar instance occurs in the Seder 'Olam Zuṭa (ed. Joh. Meyer), where the author gradually lapses into Aramaic in talking of personages of the Babylonian exile, but on p. 117 returns to Hebrew. The author may have meant to introduce the "Chaldeans" in their own language, and then inadvertently continued in the language that was familiar to him (see Driver, "Daniel," in "Cambridge Bible for Schools," p. xxii.). J. Böhm (l.c. p. 150) maintains that the Aramaic portion was so written because its contents concerned all peoples; Prince and others suggest that the whole book was written originally in Hebrew, and translated into Aramaic; and that a part of the Hebrew book was lost, and replaced by the Aramaic translation. This opinion, however, does not weigh the fact that the Aramaic begins with the speech of the "Chaldeans." Other scholars think that the whole book was originally written in Aramaic, while the beginning and end were translated into Hebrew so that the book might be incorporated into the canon (Marti, in his

Commentary, 1901, p. ix.). But if its

Form. inclusion in the canon had depended on its Hebrew form, it would have

been necessary to translate the whole into Hebrew. In any case the linguistic diversity in parts of this book is no reason for assuming two sources for it, as Meinhold does in his Commentary (p. 262); for the Aramaic Book of Daniel could not have begun with ii. 4.

Another difference in form is found in the fact that the political history forming the background of the first six chapters is absent in vii.-xii. This difference may be thus explained: The author thought it his first task to recount without a break the historical facts of Daniel's life; his second task being to record the revelations vouchsafed to Daniel which were not connected with the experiences of other people. In the first six chapters Daniel is introduced in the third person, while in the others he appears as the speaker. This is explicable on the ground that the second part of the book is concerned only with the presentation of Daniel's inner experiences to the exclusion of all objective relations. Such transitions are found in other books—compare, for example, Hosea i. and iii. The change of person therefore does not necessarily affect the unity of the book. (For other opinions on the composite character of the Book of Daniel, see Eduard König, "Einleitung ins Alte Testament," p. 384; Von Gall, "Die Einheitlichkeit des Buches Daniel," 1895; G. A. Barton, "The Composition of the Book of Daniel," in "Jour. Bib. Lit." 1898, pp. 62-86). Barton finds a contradiction between i. 1, 5, 18, and ii. 1; for Nebuchadnezzar is designated as "king" in i. 1, and, according to i. 5, 18, Daniel and his friends were to be prepared three years prior to appearing before the king, while in ii. 1 it is stated that this happened as early as the second year of Nebuchadnezzar. Still it was not an unnatural prolepsis on first mentioning Nebuchadnezzar, who subsequently became king, to give him the title by which he was commonly known at the time of writing. Barton also finds a contradiction between the words "And Daniel continued even unto the first year of King Cyrus" (i. 21) and "In the third year of Cyrus, king

* For Biblical Data see DANIEL.

of Persia, a thing was revealed unto Daniel" (x. 1). But i. 21 does not mean that Daniel *lived* "even unto the first year of Cyrus," but that Daniel survived even the fall of Nebuchadnezzar's kingdom and that of his successor. The other contradictions mentioned by Barton are discussed by Eduard König in "Theologisches Litteraturblatt," 1898, cols. 539 *et seq.* His conclusion that nine different and complete episodes follow the first chapter is therefore untenable. The book, however, may have included originally only i.-vii., an assumption that would explain the following three circumstances: the dropping of the Aramaic; the formula "Hitherto is the end of the matter" (vii. 28); and the juxtaposition of two materially identical narratives as found in vii. and viii. As events unfolded themselves, amplifications of the prophecy in the form of pamphlets, pointing even more clearly to the day of liberation, may have been added.

The date of the writing of the book may be inferred from the following considerations: It was not written by one of the exiles, for many

Date of the Book. portions of the text could not have been composed by a contemporary of the second king of the Babylonian empire and his immediate successors. This is proved

even by the form of that king's name as given in the book. His Assyrian name was "Nabu-kudurriuzur" (Friedrich Delitzsch, "Assyrische Lesestücke," 1900, p. 192), which the Hebrews at first pronounced "Nebu-kadr-ezzar" (Jer. xxi. 2 *et seq.* [26 times]; Ezek. xxvi. 7, xxix. 18 *et seq.*, xxx. 10). The middle "r" was then dissimilated from the final "r," giving "Nebu-kadr-ezzar," a form which is found in Jeremiah only in xxvii. 6-xxix. 3, but which is the usual form in all later writings (II Kings xxiv. 1 *et seq.*; II Chron. xxxvi. 6 *et seq.*; Ezra i. 7; Esth. ii. 6; Dan. i. 18 *et seq.*; Soferim xiv. 7; Seder 'Olam R. xxiv. *et seq.*; and Septuagint, *Ναβουχοδονόσορ*).

Nor would a contemporary of Nebuchadnezzar and his successors have written the stories of the Book of Daniel in the form in which they exist, since they contain many details that can not be harmonized with the data furnished in other historical sources. The first verse, for instance, contradicts other passages of the O. T. in saying that King Nebuchadnezzar came to Jerusalem in the third year of the reign of Jehoiakim, and besieged it. For the verb *בָּא* means here, as elsewhere, "come," "arrive," and can not be equivalent to "break up"; this is also proved by the context of i. 1. But Jeremiah announced the coming of the Chaldeans only in the fourth year of Jehoiakim, a year that is expressly designated, in Jer. xxv. 1, xlv. 2, as the first year of King Nebuchadnezzar. The date, "in the third year of the reign of Jehoiakim" (Dan. i. 1), is probably derived from II Kings xxiv. 1 *et seq.*, where it is said that Jehoiakim, after having been subject to Nebuchadnezzar three years, turned and rebelled, and was attacked by predatory bands of the Chaldeans and their vassals. As no date is given for the beginning of this period of three years, it might be supposed that it began with the accession of Jehoiakim. The supposition being made, it could be said that the Chaldeans besieged Jerusalem in the third year of Jehoiakim, when Nebuchadnezzar

would naturally be their leader. But these statements in Dan. i. 1 are erroneously drawn from II Kings xxiv. 1 *et seq.*, and contradict those found in Jer. xxv. 1, 9, and xlv. 2. Such discrepancies are not unparalleled in the O. T. (compare Eduard König, "Einleitung ins Alte Testament," pp. 172 *et seq.*). Nor can Nebuchadnezzar's madness (Dan. iv. 12 *et seq.*) during seven years be taken literally. Belshazzar's father, Nebuchadnezzar, is mentioned again (v. 11, 13, 18, 22) in a way which compels the inference that he really was such. This may be explained on the ground that during the long period of oral tradition the unimportant kings of Babylon might easily have been forgotten, and the last king, who was vanquished by Cyrus, would have been taken as the successor of the well-known Nebuchadnezzar. The same thing occurred in Bar. i. 11, and Sennacherib is mentioned as the son of Enemessar (*i.e.* Shalmaneser) in Tobit i. 15, Sargon (Isa. xx. 1) being passed over. It is also well known that the period 516-331, of which only a few events are recorded, was contracted to thirty-four years in computing the time elapsed since the Creation (Seder 'Olam R. xxx.).

The Book of Daniel was not written immediately after the Exile. The post-exilic prophets did not know it, for the four horns to which Israel's enemies are compared in Zech. i. 21, have a local meaning, representing the four points of the compass, and do not refer to the successive kingdoms, as in Dan. ii. 29 *et seq.* The same is the case with the four chariots in Zech. vi. 1 *et seq.* These passages are not exactly parallel with the predictions in Daniel, but it is also stated in Hag. ii. 6-9 *et seq.*, that within "a little while" the Messianic time will come. And even Ben Sira says expressly (Ecclus. [Sirach] xlix. 15) that he has never found a man who resembled Joseph, a statement he could not have made had he known the extant Book of Daniel, since Daniel is there drawn as a man who, like Joseph, rose to be prime minister by virtue of his ability to interpret dreams.

The Book of Daniel was written during the persecutions of Israel by the Syrian king Antiochus Epiphanes. This assertion is supported by the following data: The kingdom which is symbolized by the he goat (viii. 5 *et seq.*) is expressly named as the "kingdom of Yawan"—that is, the Grecian kingdom (viii. 21) the great horn being its first king, Alexander the Great (definitely stated in Seder 'Olam R. xxx.), and the little horn Antiochus Epiphanes (175-164). This kingdom was to persecute the host of the saints "unto two thousand and three hundred evenings and mornings" (viii. 14, R. V.); that is, "half-days," or 1,150 days; and Epiphanes did, in fact, profane the sanctuary in Jerusalem for about that length of time, from Kislew 15, 168, to Kislew 25, 165 (I Macc. i. 57, iv. 52). The little horn described in Dan. viii. 9-12, 23-25 has the same general characteristics as the little horn in vii. 8, 20; hence the same ruler is designated in both passages. The well-known passage ix. 23-27 also points to the same period. The first and imperative rule in interpreting it is to begin the period of the seventy times seven units (A. V. "seventy weeks") with the first period of seven (ix. 25), and to let the second period, the "sixty-two times seven units," follow this; for

if this second period (the sixty-two weeks) be reckoned as beginning again from the very beginning, the third period, the "one week," must be carried back in the same way. The context demands, furthermore, that the origin of the prediction concerning the rebuilding of Jerusalem be sought in Jer. xxv. 11-13 and the parallel passage, *ib.* xxix. 10. The "anointed," the "prince," mentioned after the first seven times seven units, must be Cyrus, who is called the anointed of the Lord in Isa. xlv. 1 also. He concluded the first seven weeks of years by issuing the decree of liberation, and the time that elapsed between the Chaldean destruction of Jerusalem (586) and the year 538 was just about forty-nine years. The duration of the sixty-two times seven units (434 years) does not correspond with the time 538-171 (367 years); but the chronological knowledge of that age was not very exact. The Seder 'Olam Zuṭa (ed. Meyer, p. 104) computed the Persian rule to have lasted fifty-two years. This is all the more evident as the last period of seven units must include the seven years 171-165 (see "Rev. Et. Juives," xix. 202 *et seq.*). This week of years began with the murder of an anointed one (compare Lev. iv. 3 *et seq.* on the anointing of the priest)—namely, the legitimate high priest Onias III.—and it was in the second half of this week of years that the Temple of the Lord was desecrated by an abomination—the silver altar erected by Antiochus Epiphanes in place of the Lord's altar for burnt offering (see I Macc. i. 54).

Stories undoubtedly existed of a person by the name of Daniel, who was known to Ezekiel as a wise man. Tradition then ascribed to

Genesis of the Book of Daniel. this wise man all the traits which Israel could attribute to its heroes. He was exalted as the pattern of piety and faithfulness; and it may also have been said that he interpreted dreams, read cryptograms, and foreshadowed the beginning of the Messianic kingdom. In any case his name may have played the same rôle in literature as that of Solomon or that of Enoch; and as one author ascribed his book, "Koheleth," to Solomon, so another author may have made Daniel responsible for his. As to the origin of his prophecies, it would probably be unjust to say that they were inventions. They may have been suggested by the author's enthusiastic study of the past history of God's people. He utilized the past to unlock the future. This is evident from ix. 2, where the author says that he had paid attention to the prophecy of Jeremiah concerning the seventy years, which prophecy became the basis for a new prophecy. This shows that the author was merely a disciple of the Prophets, one who reproduced the prophecies of his masters. His book, indeed, is not included in the section Nebim.

DANIEL IBN AL-ANISHATA. See DANIEL B. SAADIA HA-BABLI.

DANIEL, HAYYATA ("The Tailor"): A Palestinian, two of whose Scriptural interpretations are

preserved in the Midrash: one to Gen. xxvi. 14 (Gen. R. lxiv. 7; compare Sanh. 58b; Yalk. on Prov. xii. 11), and the other to Eccl. iv. 1 (Lev. R. xxxii. 8; Eccl. R. *ad loc.*). The time of Daniel may only be conjectured. As the rabbis mentioned in the contexts are of the third and fourth centuries, and as the one cited after him, and supplementing his views, is of the fourth generation of amoraim, Daniel can not be placed earlier than that generation. Bacher ("Ag. Pal. Amor." iii. 761) includes him among those whose period is uncertain.

DANIEL BEN HASDAI. See DANIEL BEN SOLOMON.

DANIEL B. ISAAC. See PISA, DANIEL DA.

DANIEL BEN JACOB OF GRODNO: Russian halakist; died in Grodno April 30, 1807. He was dayyan there for forty years. He is ordinarily called "saint," "pious," and "modest." He is the author of "Ḥanude Daniel" (The Precious Things of Daniel), on questions concerning the preparation of food (Grodno, 1810). Daniel's opinions are frequently mentioned in Zebi Hirsch Eisenstadt's widely used work, "Piṭhe Teshubah," on Shulḥan 'Aruk, Yoreh De'ah.

DANIEL BEN JUDAH: Liturgical poet, who lived at Rome in the middle of the fourteenth century. He was the grandfather of Daniel ben Samuel ha-Rofe, rabbi at Tivoli. According to Luzzatto, Daniel ben Judah was the author of the well-known hymn "Yigdal Elohim Hai," containing the thirteen articles of belief of Maimonides. This poem, which forms part of the morning prayer among the Ashkenazim, and is sung by the Sephardim on the eve of Sabbaths and holy days, is included in the Romanian ritual for Saturday evening.

I. BR.

DANIEL B. KETINA: Babylonian amora; flourished in the second half of the third century. He was a contemporary of ZE'ERA (Yer. Suk. iv. 54b; Hul. 62a *et seq.*). He is cited in the Palestinian as well as in the Babylonian Talmud by some of the foremost teachers of his generation (Yer. Shab. iii. 5c; Yer. 'Er. i. 19d, ii. 20a; M. K. 8b, 12a; Hag. 8b; Ket. 97a; B. K. 97a; B. M. 64b), but generally as the transmitter of Halakot he had learned from his predecessors. That he was regarded as a saint appears from the legend relating that he would daily inspect his garden and mark the beds requiring water, whereupon rain would descend and moisten the beds thus marked (Ta'an. 9b; Yalk., Zech. 578). Rabbah bar bar Ḥanah, Rab's nephew, married his son to Daniel's daughter (Ber. 47a; compare Rabinowicz, "Diḳduke Soferim," *ad loc.*).

S. M.

DANIEL BEN MOSES AL-ḲUMISI, or AL-DAMAGANI: One of the most prominent Karaite scholars of the earlier period; flourished at

the end of the ninth or at the beginning of the tenth century; a native of Damagan, the capital of the Persian province of Kūmis, in Tabaristan, as is shown by his two surnames, the latter of which is found only in "Kirkisani." His attitude to Anan and his violent opposition to the Ananites (*i.e.*, the first Karaites, Anan's followers and immediate successors) are characteristic of his place in Karaism. At first he esteemed Anan highly, calling him "rosh ha-maskilim" (chief of the scholars); but later he despised him and called him "rosh ha-kesilim" (chief of the fools). Nevertheless, Daniel's opinions were respected by the Karaites.

As regards Daniel's theories, he denied that speculation could be regarded as a source of knowledge, and, probably in accordance with this tenet, he maintained, in opposition to Anan, the principle that the Biblical laws must not be interpreted allegorically, nor explained contrary to the simple text (see below). He evinces little regard for science, as, for instance, when he asserts that it is forbidden to determine the beginning of the new moon by calculation, after the manner of the Rabbinites, because such calculations are condemned like astrology, and the practise of them is threatened with severe punishment, according to Isa. xlvii. 13-14. Yet Daniel himself, in his commentary to Lev. xxvi., indulges in long reflections on the theodicy and on the suffering of the pious. His conception of the angels, also, is most extraordinary. He says that wherever "mal'akim" (angels) are mentioned in the Bible, the designation does not refer to living, speaking beings who act as messengers, but to forces of nature, as fire, fog, winds, etc., by means of which God performs His works (compare Maimonides, "Moreh," ii. 6). This may be due to the influence of the Sadducees (who also denied the existence of angels; compare Acts xxiii. 8), in view of the fact that works circulated among the earlier Karaites named after Zadok and containing Sadducean opinions.

Daniel favored a rigorous interpretation of the Law. The following decisions of his have been preserved: It is forbidden to do any work whatever on the Sabbath—even to clean the hands with powder—or to have any work done on the Sabbath by a non-Jew, whether gratuitously, or for wages or any other compensation. The burning of lights is forbidden not only on Friday evenings, but also on the evenings of the festivals. In the description in Lev. xxiii. 40 of the trees which, according

Legal to Daniel, were used in erecting the
Decisions. booths, the phrase "peri ez hadar" (the fruit of goodly trees) is more definitely explained by "kappot temarim" (branches of palms), the palm being distinguished for its beauty (Cant. vii. 8).

Like Anan, Benjamin al-Nahawandi, and Ishmael al-'Okbari, Daniel forbade in the Diaspora the eating of those animals that were used for sacrifice, adding to the proofs of his predecessors others drawn from Hosea ix. 4 and Isa. lxvi. 3. The prohibition contained in Ex. xxiii. 19 ("Thou shalt not seethe a kid in his mother's milk") must not be interpreted allegorically, as Anan interpreted it, but literally. The priest carried out the injunction to "wring [pinch] off the head" of the bird ("melikah," Lev.

i. 15) by cutting the head off entirely, after the slaughtering. The clean birds are not recognizable by certain signs, as the Rabbinites assert, but the names of the birds as found in the Pentateuch are decisive (and as these can not always be identified, the Karaites make the class of forbidden birds very large). Among the locusts only the four species expressly named in Lev. xi. 22 are permitted as food. It is forbidden to eat eggs because they must be considered as living things that can not be slaughtered, as is proved by Deut. xxii. 6-7, where it is permitted to take the young, but not the eggs. Of fish the eggs only are permitted; the blood is forbidden. The leper must still be considered as unclean (this, too, is directed against Anan, who had held that the laws regarding the clean and the unclean were not applicable in the Diaspora). The carcass of an animal, however, ceases to be unclean after use has been made of it in any way, as is proved by Lev. vii. 24.

In regard to the levirate marriage Daniel agrees with Anan that "ahim," in Deut. xxv. 5, does not mean "brothers," which would violate the prohibition contained in Lev. xviii. 16, but "relations." The story of Judah and his sons (Gen. xxxviii. 8) proves nothing, because at that time the prohibition against marrying a brother's wife did not exist. The prohibition contained in Lev. xviii. 18 can not be taken literally (as the Rabbinites take it), for the wife's sister is forbidden under any circumstance, just as is the husband's brother (there is here an example of the method of analogy, "hek'kesh"); it is rather the stepsister of the wife that is meant in the passage in question; *e.g.*, the daughter of the father-in-law's wife whom the last-named had by her first husband. In this case the prohibition ends with the wife's death. The daughter is not excluded from the heritage, as the Rabbinites say, although her portion is less than that of the son, being only one-third; for in the law of valuation in connection with vows (Lev. xxvii.) women were valued less than men. In conformity with this law, the mother also receives one-third. Daniel was doubtless influenced here by the Mohammedan law (see Koran, sura iv. 12, 175). In other re-

Influence spect, Daniel follows the Talmud in
of Islam holding that the descendants of one
and entitled to a portion succeed to his en-
Talmud. tire rights; the children of the son—
i.e., grandchildren—taking precedence

over the daughter, their aunt. Finally, Daniel holds that responsibility for the observance of the commandments must begin not with the thirteenth, but with the twentieth year; that the New-Year begins on the tenth of Tishri, as follows from Ezek. xl. 1; and that Mohammedans also may act as witnesses of the new moon's appearance.

Daniel wrote several works in Hebrew, all of which, save for a few quotations and fragments, have been lost. There is undeniable evidence that he compiled a legal code ("Sefer ha-Mizwot"), and a work on the rights of inheritance. The latter, against which Saadia directed his polemics, was perhaps merely a part of the code just mentioned. He also wrote commentaries to the Pentateuch, to Joshua, and to Judges, and probably to other Bib-

cal books. They were not running commentaries, but explanations to certain passages, and contained also digressions. Words were often explained in Arabic. These commentaries, especially that to the Pentateuch, probably contained many of the decisions enumerated above.

DANIEL BEN SAADIA HA-BABLI (or **Daniel the Babylonian**): Talmudic scholar; lived at Damascus in the thirteenth century. He was a pupil of Samuel b. Ali Halevi, the anti-Maimonist. After Maimonides' death he undertook a campaign against the latter's works, which, however, he conducted in a more temperate and judicial spirit than was shown by his master. His criticisms took the form of questions (forty-seven on the "Mishneh Torah" and thirteen on the "Book of Precepts"), which he sent to Abraham, the son of Maimonides. The partisans of Maimonides urged the excommunication of Daniel, but Abraham contented himself with writing a controversial work (**ברכת אברהם**, "Blessing of Abraham," Lyck, 1870) in refutation of Daniel's attacks. Later on Daniel attacked the orthodoxy of Maimonides, and reproached him for not believing in the existence of evil spirits. As there are in the Talmud several passages on demonology, he did not shrink from denouncing him as a heretic. Abraham not being willing to launch the anathema, the Maimonides party induced the exilarch David of Mosul to excommunicate Daniel, who died of grief.

DANIEL BEN SOLOMON (BEN HASDAI): Exilarch at Bagdad in the second half of the twelfth century. According to Pethahiah, Daniel's father, Solomon, was highly esteemed by the calif, a circumstance that for a time lent new dignity to the exilarchate, which had sunk into entire insignificance. Scholars assume that Daniel's father was also identical with the exilarch Hasdai, who, according to Benjamin of Tudela and Joseph Sambari ("Med. Jew. Chron." i. 123), was the teacher of the agitator David Alroy. The family, which traced its ancestry back to King David, lived in great splendor, to which Abraham ibn Ezra, who visited Bagdad in the middle of the twelfth century, alludes in his commentary to Zech. xii. 7, speaking of "the splen-

dor of the house of David." Nothing is known of Daniel's political or literary activity. He doubtless approved the opposition to Maimonides led by the learned Samuel b. Ali of Bagdad, though Daniel himself did not come to the front. As he left no children, the exilarchate was transferred after his death to Mosul, where it was contested by two rival candidates, DAVID BEN HODAYA and SAMUEL. A fragment from the Cairo Genizah contains the colophon of a manuscript once in the possession of Daniel b. Solomon.

DANIELILLO ("Little Daniel") OF **LEG-HORN**: Anonymous author of a small apologetic work of the seventeenth century, written in Spanish, which Grätz erroneously considers to be pseud-epigraphic. It was copied by Isaac Mendes in 1738, and published at Brussels in 1868, under the title "Danielillo ó Respuestas á los Cristianos," by M. Caplan from a manuscript in the Royal Library in that city. By far the larger part of the work is devoted to a dialogue between D. Antonio de Contreras and Danielillo, but it contains many passages from the dialogue of Andrés Antonio and Obadiah, written in 1583, and still in manuscript (Wolf, "Bibl. Hebr." iv. 487, 726; De Rossi, "Bibl. Antichrist," p. 36). The principal contents of the work is a dialogue of the Augustinian monk Juan Carasco of Madrid, who was converted to Judaism in Holland, and wrote a work in defense of Judaism and against Roman Catholicism (Nodriz-Haya, 1633). The Duke del Infantado, Hurtado de Mendoza, who is mentioned in the work, was Spanish ambassador at Rome in 1623. From page 104 to the end is given to the "Razonamiento," the discourse delivered in the presence of theologians and courtiers at Paris, at the command of Henry IV., by Elijah Montalto, physician to the king.

DANILEVSKY. See RUSSIA.

DANON, ABRAHAM: Turkish writer; born at Adrianople, European Turkey, in 1857; attended the Talmud Torah in that city, pursuing his Talmudic studies at a yeshibah. After having presided over a small seminary at Adrianople, he was appointed director of the seminary founded by the Alliance Israélite Universelle at Constantinople. Under the title "Toledot Bene Abraham," he published a Hebrew translation of Theodore Reinach's "Histoire des Juifs," Presburg, 1888, completing the story, as he says in the preface, by extracts from Graetz, Geiger, Kalman Schulmann, and others. Under the title "Maskil le-Aidan" (Aidan's Poem;

דָּאָנאָן, abbreviation of "Abraham Josef Danon"), he published a series of Hebrew translations of the poems of Vergil, Victor Hugo, and Sadi, together with some original contributions (Adrianople, 1888). In Sept., 1897, he went to Paris to represent the Oriental Jews at the Congress of Orientalists.

Danon's chief distinction rests on his initiative in founding at Adrianople in 1888 a historical review, bearing the title "Yosef-Da'at," or "El Progresso," which was published in Hebrew characters and in three languages; namely, Judæo-Spanish, Hebrew, and Turkish. The aim of the review was to collect all the documents relating to the history of the Oriental Jews. But the Ottoman government censorship suppressed this review, together with all others published in Turkey. As the fruit of patient labor, Danon published a collection of fifty-five Judæo-Spanish ballads which are sung in Turkey, each ballad being accompanied by its French translation. They first appeared in the "Revue des Etudes Juives," xxxii. and xxxiii., and were published separately by Durlacher, Paris in 1896. They form one of the most curious chapters in the literature of the Oriental Jews. Danon has also published some studies on the Oriental Jews (Jews of Adrianople and of Salonica), which appeared in the same review. Danon is the only author of the present generation of Oriental Jews who writes in Hebrew, other writers publishing their works in Judæo-Spanish.

M. FR.

DANON, BERAKAH BEN YOM-TOB: Talmudical scholar; lived at Jerusalem in the first half of the nineteenth century. He was the author of a work entitled "Bad Kodesh" (Holy Linen), containing sermons, and novellæ on Maimonides' "Yad." It was published in Salonica in 1846, together with a work by his father on the same subject, entitled "Kebod Yom-TOB."

DANON, JOSEPH BEN JACOB BEN MOSES IBN: Hebraist and Talmudist; born at Belgrade about 1620; died at London toward the end of the seventeenth century. He was descended from an old Spanish family which had settled at Belgrade several generations earlier. Having received an excellent education, he became the secretary of Joseph Almosnino, rabbi of Belgrade. When Belgrade was taken by Prince Max Emanuel of Austria (Sept. 6, 1688), Danon, with the greater part of the Jewish community in that city, was exiled. He maintained for some time a precarious existence in various Moravian towns, dependent sometimes upon public charity for food and shelter. He finally wandered to Amsterdam, where he received aid and protection from the Mæcenas of Jewish learning, Joseph Zarfati.

Danon now devoted himself to literary pursuits, and wrote a work entitled "Sheloshah Sarigim" (Three Branches), a treatise on the three foundations upon which, according to the Talmud (Abot i. 2), the world is based—the Law, Worship, and Charity. The first part only of this manuscript work, with its preface, is still extant. During his residence at

Amsterdam he composed an index of the abbreviations found in Hezekiah de Silva's "Peri Hadash," a commentary on Joseph Caro's Shulhan 'Aruk. At the death of his protector, Danon settled in London, where he remained, highly appreciated, until his death.

DANTE, ALIGHIERI: Florentine poet; born 1265; died at Ravenna Sept. 14, 1321. Dante took an active part in the political feuds then distracting his native city, and in 1302 was banished. From that time on he lived in exile, enjoying from time to time the hospitality of several princes of northern Italy, such as Can Grande della Scala of Verona and Guido Polenta of Ravenna. Dante's principal work is the "Divina Commedia." A few Hebrew words ("Hosanna," "Sabaoth": "Paradiso," vii. 1; "El," "Eli," "Malacoth": *ib.* xxvi. 134; "De Vulgari Eloquentia," i. 4), and the two hitherto unexplained and perhaps inexplicable passages ("Inferno," vii. 1—"Pape Satan, Pape Satan, aleppe"; and xxxi. 67—"Raphel ma' anech, zabl almi"), have led to the assumption that Dante understood Hebrew; which, however, is contradicted by his own testimony ("Paradiso," xii. 73). Dante's "Divine Comedy" served as a model for his contemporary Immanuel ben Solomon in the closing (twenty-eighth) chapter, "Tofet we-'Eden" (Hell and Paradise), of his "Divan." Mose de Rieti's "Mikdash Me'at" (Little Sanctuary) can not unreservedly be considered an imitation of Dante's "Paradiso."

In spite of Kraus's objections (see his "Dante, Sein Leben und Sein Werk," p. 146), it seems certain that Dante entertained friendly relations with Immanuel ben Solomon. Whether the two poets became acquainted at the court of Can Grande in Verona, where Immanuel also stayed for a while, or at the house of their common friend Bosone in Gubbio, can not be ascertained. Their friendship is shown by an exchange of sonnets between Bosone and the Jew Manoello (*i.e.*, Immanuel), in which Dante's death is bewailed. An alleged exchange of sonnets between Cino da Pistoja and Bosone, in which Cino transfers Dante and Manoello to the Inferno, while Bosone defends both, is spurious. From this it appears that the close personal relations between the

two poets was a matter of common knowledge to their contemporaries. Concerning the question as to whether Dante is alluded to in the character of Daniel in the 28th chapter of Immanuel's "Divan," in which the poet is led through the Inferno and Paradise, see IMMANUEL BEN SOLOMON.

DANZ, JOHANN ANDREAS: German theologian and Hebraist; born at Sundhausen, near Gotha, 1654; died at Jena Dec. 22, 1727. Danz studied at Wittenberg and at Hamburg, where he learned Hebrew under Esdras Edzardi; and he became professor of Oriental languages at the University of Jena, at first in the philosophical, and after 1713 in the theological faculty. He was considered the greatest Hebrew scholar among his Christian contemporaries. Danz wrote several text-books on Hebrew grammar, which for nearly a century remained standard works. He is the author of "Nucifrangibulum Sanctam Scripturæ V. T. Linguam Hebraicam Enucleans," Jena, 1686. This first edition contained two parts, the first treating of the etymology, the second of the syntax, of the Hebrew language. In the following editions these parts were published separately: part one under the title "Literator Ebræo-Chaldaicus," Jena, 1694, 1710, 1715, and 1745; part two under the title "Interpres Ebræo-Chaldaicus," Jena, 1694, 1708, 1710, 1755, and 1796. The "Nucifrangibulum" was followed by "Spicilegium," *ib.* 1689, and "Rabbinismus Enucleatus," *ib.* 1696, 1751; Frankfurt-on-the-Main, 1761.

His most popular work, however, was his "Compendium Grammaticæ Ebræicæ-Chaldaicæ," Jena, 1699, of which numerous editions appeared. It was translated into German, under the title "Hebräische und Chaldäische Grammatik," and edited, by G. Kypke, Breslau, 1784. Among his works on Hebrew antiquity may be mentioned: "Antiquitas Baptismi Initiationis Israelitarum Vindicta," Jena, 1710; "Pluralitates Personarum Divinarum Genesis i, 26," Jena, 1710; "De Sinceritate Scriptorum V. T. Suspicio Errorum in Decade Exemplorum, Abrahaneli," etc., Jena, 1717.

F. T. H.

DANZIG (Polish, **Gdansk**): Capital of West Prussia. The Jewish population of Danzig in 1895 was 2,474, in a total population of 125,605.

The oldest document concerning the Jews of Danzig, a charter of King Casimir authorizing two Jews, Zub and Michael, to trade in Prussia, bears the date of 1476; although Jews may have lived there in the preceding century. It is probable that the Jewish mer-

chants who came to trade with Dan-

The Five zig were accustomed to land their
Con- merchandise outside the town, and
gregations. return to their homes after having
finished their business. Yet a great

many of them were invited by rich merchants of Danzig to come to the town to translate letters written in Hebrew or to superintend the preparation of kasher-wine. The authorities took no notice of this, and therefore the Jews are not mentioned in any official document till the second half of the fifteenth century. Until 1813 they lived in the four suburbs of Danzig—Schottland, Weinberg, Mattenbuden, Langfuhr—and in Danzig proper, thus forming five distinct congregations. They maintained this division into separate congregations until 1881. Schottland was founded in the second half of the fourteenth century, and it appears that Jews settled there soon after its foundation.

The commercial success of the Jews aroused the envy of the inhabitants of Danzig, and in 1551 the "voyevoda" (governor) of Danzig wrote a petition to Sigismund II. asking him to exclude the Jews from Danzig, except on fair-days. In 1552 he received a favorable answer, and, as a preliminary measure, Jewish commerce was heavily taxed. The authorities of Danzig appear to have placed an arbitrary interpretation on the edict, for in 1616 the burgomaster of Danzig was ordered by Sigismund III. to pay Isaac Joenbower of Cracow, Abraham Solomon of Posen, Jelen of Lublin, and Wolf of Lemberg a fine of 100,000 gold pieces for arbitrary exclusion. There are other documents showing that the "Privilegium Casimirianum" was not strictly observed. In the "Regesty" (i., No. 643) it is mentioned that on April 25, 1583, the Jew Abraham Shmoilovitz of Burov brought lumber to Danzig; that on the 28th of the same month the Jew Mendel Urelovichsh of Brest brought in 235 barrels of grain; and that on different days of May in the same year Shmoilovitz brought rye, wheat, barley, and oats.

The life of the Jews who settled at Schottland soon after its foundation was very precarious, and they were subjected to incessant and petty persecu-

tions on the part of the non-Jewish
The inhabitants. In 1508 the council of
Suburbs. Danzig enacted a fine for buying any-

thing from a stranger. In 1520, when the German troops were marching against Danzig, the citizens burned the suburbs. Whenever an enemy approached the town, those who lived in the suburbs were generally the first to suffer. In spite of these difficulties the Jews of Schottland contemplated forming a congregation, and, indeed, they united themselves with the Jews of Hoppenbruch, a small town near Danzig, and acquired a synagogue and a cemetery. The Jews of Weinberg and those

of Stolzenberg formed the congregation of Weinberg. There were Jews in Danzig also, some being under official protection, while others lived there with the connivance, but without the permission, of the authorities. An edict of the council, dated 1605, prohibiting the Jews from meeting for religious exercises, reveals the presence of a community in Danzig itself. In 1616 the Jews were expelled from the town, their presence being permitted only during the six days of the Dominik fair, a fee of three florins each per day being exacted. In 1626 the council accorded certain privileges to Jewish lumber- and grain-dealers, and the "Privilegium Casimirianum" was renewed in favor of certain Jews.

After the Reformation the situation of the Jews of Danzig grew worse. The contending religious sects were united in oppressing them, and the Reformation produced new efforts for their conversion,

which efforts, however, as it appears

The Reformation. from a sermon by Pastor Cramer (printed in 1664), were without success. The preacher lamented that a

Jew, though sentenced to death, would not embrace Christianity. As the position of the Jews was not legally secured in Danzig during the seventeenth century, they dared not form a congregation. It was only at the beginning of the eighteenth century, when Danzig was stricken with a succession of calamities, that they were admitted to the town to revive its commerce. But they did not enjoy that hospitality for long. About that time the Jews were driven from the bishop's domain, and the fact of their finding a refuge at Danzig roused the anger of the bishop. He protested before the council of Danzig, and, not obtaining any satisfaction, he incited the mob against the Jews. This happened in 1723, and there is no further mention of Jews in Danzig until 1747. Those of Schottland had, by 1724, a well-organized congregation. They founded in that year a society for the aid of the sick and a *hebra kaddisha*. The register of the latter was kept in Hebrew from 1724 to 1848.

In 1750 Frederick Augustus permitted the Jews to settle again in Danzig, though they were subject to heavy taxes. The Jews of the

Re-settlement. three suburbs of Schottland, Weinberg, and Langfuhr steadily increased in number. In 1757 the congregation of Schottland numbered 46 contributing members. In 1767 its expenses amounted to 4,644 florins (\$580); in 1768, to 6,117 florins (\$764); in 1772, to 13,139 florins (\$1,642), when the congregation had two synagogues. Till 1777 there was no physician for its hospital, but in that year it engaged Phoebus, the son of Meshullam of Prague. In 1752 the congregation elected as its rabbi ELHANAN BEN SAMUEL, formerly rabbi of Fordon.

The congregation of Langfuhr settled in that suburb when it was still under Polish protection. The Count of Weiher, owner of that domain, permitted the Jews to settle there, and they built a fine synagogue, acquired a cemetery, and formed a *hebra kaddisha*. The cemetery was devastated by the Russians in 1813, not a single tombstone being left in place. The register (פנקס) begins with 5535=1775; the *hebra kaddisha* then counted 47 paying members.

The congregation of Langfuhr was then a dependency of the rabbinate of Schottland. In 1782 the three congregations cited above were united under Rabbi Meir Posner. In 1807 the suburbs being devastated by Napoleon's army, the Jews of Weinberg entered the town; a great many of them lost their lives during the bombardment of Danzig.

After the treaty of Tilsit (July 9, 1807) Danzig, with the three above-named suburbs, became a free state, and remained such for the space of not quite seven years. The Jews rejoiced at this development, but they had to pay a contribution of 50,000 German thalers (\$18,000), most of which was sustained by the community of Schottland. Their life was still rather precarious: admission to the exchange was refused them, and their right of residence in the town was only provisional. In 1813, when Schottland and Langfuhr were destroyed, the Jews of these two suburbs were admitted to the town, and on Feb. 3, 1814, after Danzig had become a Prussian city, they obtained citizens' rights. They had then the opportunity of forming a congregation; but unfortunately there was no cohesion among them, and their 300 members were still divided among five distinct communities, four of which were named after the suburbs in which they had lived. Not until 1881 were these congregations united into one by the efforts of Rabbi Werner; in that year one large synagogue was built for the united communities. M. SEL.

Appended is a brief account of the rabbis of Danzig and of its suburbs:

Schottland: Of the five original communities that of Schottland has always been reputed the wealthiest and most important. ABRAHAM B. ELIEZER HA-KOHEH, author of "Ori we-Yish'i" (Berlin, 1741), and R. Moses b. Jonah, who died there June 27, 1754, were among the scholars whose names are associated with the religious history of Schottland.

The following were the regularly appointed rabbis of the community: R. Elhanan b. R. Samuel Sanwil Ashkenasi (1752-80), born in 1713, died Sept. 22, 1780; pupil of R. Zebi Hirsch of Halberstadt; R. Meir b. R. Judah Löb Posner Munk (1782-1807), born in 1735, died Feb. 3, 1807; R. Chajim (1807-35), son of the preceding; died June 11, 1835; R. Israel b. R. Gedalja Lipschütz (1837-50); Dr. Abraham Stein (1850-64), subsequently rabbi of the Meisel synagogue at Prague, where he died Sept. 2, 1884; Dr. Joshua Wallerstein (1865-76), born in 1838, died June 19, 1876; Dr. Cosman Werner (1878), during whose rabbinate the communities were united.

Langfuhr and Weinberg: The community of Langfuhr had always been included in the rabbinate of Schottland. In 1782 the community of Weinberg also came under the same rabbinate, whose incumbent thereafter designated himself as rabbi of שו"ל ("Schottland, Langfuhr, Weinberg"). When Dr. Stein became the rabbi of Schottland in 1850, R. Israel Lipschütz officiated as rabbi of Weinberg and Langfuhr, dying Sept. 19, 1860. In 1878 the community of Weinberg called a rabbi of their own, Dr. S. Gronemann, who assumed the district rabbinate of Hanover when the communities were united.

Mattenbuden: The community of Mattenbuden

was organized toward the end of the eighteenth century, and did not have a synagogue until 1793. The following officiated as rabbis: R. Moses b. R. Chajim Chefez of Sklow; died April 7, 1807; R. Isaac Itzig b. R. Elhanan, son of the rabbi of Schottland; died Feb. 19, 1814; R. Samuel Sanwil b. R. Judah Löb Rosenstein, grandson of R. Elhanan of Schottland; died Feb. 6, 1824; R. Michel Levin Munk (R. Jehiel Arje b. R. Matitjahu-ha-Kohen), born in 1788; called to Danzig in 1853.

Danzig: R. Marcus Noah Perls (R. Mordecai b. Noah ha-Levi) of Lissa, died July 8, 1825; R. Moses Eliezer Thorner, died Aug. 6, 1837; R. Michel Levin Munk, died Aug. 23, 1853.

The above-named communities united under the name "Vereinigte Gemeinde." The following were its rabbis: Dr. Cosman Werner, called in 1878 to Schottland, was subsequently appointed rabbi of the united community. In 1895 he accepted a rabbinate at Munich. Dr. S. Posner, called as acting rabbi in 1896, subsequently became second rabbi at Karlsruhe. Dr. S. Blumenthal, called in 1897, and officiated to 1900 was subsequently appointed rabbi at Berlin. Since 1900 Dr. Max Freudenthal, previously district rabbi at Dessau, has been the incumbent.

D.

M. FRE.

DANZIG, ABRAHAM BEN JEHIEL: Lithuanian codifier; born in Danzig in 1747 or 1748; died at Wilna Sept. 12, 1820. He was descended from a family of scholars in West Prussia, his great-grandfather, Jehiel Michael, having been rabbi in Schottland, near Danzig; his grandfather was Samuel, the author of the commentary on Isaiah, "Neḥamot Ziyron." When Danzig was fourteen years old his father sent him to the yeshibah in Prague,

after exacting from him a promise that **His** he would not mingle with the "Mod-
Youth.erns," who, through the influence of Mendelssohn in Prussia, were gradually coming into prominence. Under the guidance of Ezekiel Landau and Joseph Liebermann, Danzig zealously devoted himself to the study of the Talmud, and at eighteen years of age he left Bohemia with a "haber" diploma, showing him to be a proficient Talmudist. He then settled in Wilna, Lithuania. When offered the salaried position of rabbi he declined it, considering it improper to receive a stipend in such a capacity, and he engaged in business as a merchant, visiting the fairs of Leipsic and Königsberg. Only in his later years, and after having lost almost his entire fortune through the explosion of a powder-magazine, could he be induced to accept the position of dayyan in Wilna, which office he held until his death. His fixed intention had been to emigrate to the Holy Land.

Danzig is the author of the following: "Hayye Adam: Nishmat Adam" (The Life of Man: the Soul of Man), Wilna, 1810, reedited many times; "Hokmat Adam: Binat Adam" (The Wisdom of Man: the Understanding of Man), *ib.* 1814, reedited many times; "Sha'are Zedek" (The Gates of Justice),

on the commandments and prohibitions having reference to the land of Palestine, *ib.* 1812; Jerusalem, 1863; "Zikru Torat Mosheh" (Be Mindful of the Teaching of Moses), precepts for the Sabbath, Wilna, 1820, and several editions (this little work contains by way of supplement the treatise "Mizwot Mosheh" [The Precepts of Moses], an extract from Askari's book "Haredim"

His [The God-Fearing]; "Toledot Adam,"
Works. a commentary on the Passover Haggadah, *ib.* 1817 (in the Haggadah edition "Ma'aleh Bet Horon"); "Bet Abraham" (The House of Abraham), his last work, 1821, and many editions (also translated into Judæo-German by Isaac Hamburger, Lemberg, 1875). Among the writings of Danzig not yet published are an elaborate ethical work, specimen pages of which are contained in the introduction to "Zikru Torat Mosheh," and commentaries to several books of the Bible.

Danzig is especially known as the author of "Hayye Adam" and "Hokmat Adam," which represent the most important productions in the line of codification after the time of Joseph Caro and Mordecai Yafe. In these two works Danzig treats of the same subject-matter as the first two parts of the Shulḥan 'Aruk. The enormous mass of new material which had accumulated in the field of the Halakah since the appearance of the Shulḥan 'Aruk—a period embracing more than two and a half centuries—was collected and critically sifted by Danzig and presented in a readily intelligible form. His codex, however, was intended primarily for the cultured layman and not for the officiating rabbi. Hence there is a tendency to give prominence to the more exacting side of the Law, even though in his expert decisions and treatises, which, under the respective titles of "Nishmat Adam" and "Binat Adam," are added to "Hayye Adam" and "Hokmat Adam," Danzig shows independence enough to oppose the views of the Aḥaronim, and he frequently protests against the tendency to decide in favor of new prohibitions. His "Hayye Adam" met with unusual success during the author's lifetime. In many cities societies were formed for the purpose of studying this work; and even to-day these societies may be found in most of the Polish-Russian communities.

This success was well merited; for there is hardly another work that presents in so concise and lucid a

manner all the details of the discussions of the Aḥaronim. **His**Danzig pre-
Importance serves in his works a certain fresh-
as Codifier.ness of tone, and dwells with special emphasis upon the ethical bearings of religious precepts. The high ethical standpoint of the author reveals itself most conspicuously in his "Bet Abraham," and the contents of this little book alone should suffice to refute the accusation that Talmudism had stifled religio-ethical sentiments. The love of God, it is pointed out, is man's highest mission, to which the fear of God is only a preparatory stage. The enjoyment of worldly things is not in itself to be condemned; but man is to bear constantly in mind that the recognition of God and the exercise of good deeds are the proper occupation of life. He lays great stress upon prayer; but this must not be

mere lip-service; and, accordingly, he bids his children say their prayers in German rather than in unintelligible Hebrew. This is all the more noteworthy since Danzig in this very work enters a protest against all innovations, and even denounces the reading of German books.

Love of truth and contentedness he especially enjoins; and declares repeatedly that "an offense against one's fellow being is far more reprehensible than a sin against God." He not only admonishes his family, therefore, to refrain from all dishonesty in their business relations with both Jews and non-

Jews, but makes it a duty never to decide in money matters according to one's own opinions, but to inquire of a learned man whether the intended action conforms to the Law. While insisting upon the strictest observance of the rites, he bids his children even to let the time of prayer pass if this be necessary to secure money wherewith to pay a working man's wages.

Characteristic of Danzig is his warning not to study the Cabala before the age of maturity and before the study of the Talmudic-rabbinic literature. He himself shows an acquaintance with the Cabala; but in his halakic writings this is not made apparent. A somewhat mystical touch appears in his prayer for the eve of the Day of Atouement. This prayer may be found in "Hayye Adam" (No. 144), and has been published separately several times in Judeo-German as well as in Hebrew, under the title "Tefillah Zakkah" (Sincere Prayer).

L. G.

DAPIERA (DE PIERA), ASTRUC: Martyr; lived in Barcelona. He was probably a relative of Isaac de Piera, who also lived in Barcelona, and who, in the year 1391, was baptized under the name of Guillermo Vidal Puol ("Rev. Et. Juives," iv. 59). Dapiera, accused of witchcraft, was put in prison in 1370 by the grand inquisitor of Aragon, Fr. Nicolas Eymeric. He was sentenced to express his repentance publicly in the cathedral, and to suffer imprisonment for life.

M. K.

DAPIERA or **DA PIERA** (דאפירא, דפיירה), **SOLOMON BEN MESHULLAM:** Neo-Hebraic poet of North Spain; died after 1417. He was a relative of Meshullam ben Solomon Dapiera, who flourished, probably in southern France, in the earlier part of the thirteenth century, and who, in several extensive poems, declared against the "Moreh Nebukim" of Maimonides. Before the troubles which came upon him and the Jews in Spain generally, Dapiera seems to have been rich, and charitable to the needy. Forced to leave his native place, he took refuge in Saragossa at the house of Benveniste ben Labi, the Mæcenas of Hebrew scholars, where he became tutor to Benveniste's two sons, with one of whom, Don Vidal Joseph ibn Labi, he exchanged many letters and poems. Through the recommendation of his host, to whom he was not

related, as Grätz avers, he became a favorite with Don Meir Alguadez.

While in Saragossa, Dapiera filled the position of scribe to the congregation; letters are extant written by him in its name. He, however, did not remain there, but again took up the wanderer's staff. In 1417 he was in Monzon, where he made the acquaintance of a young poet, En-Samuel Bonastruc. Despite certain mannerisms, Dapiera may be ranked among the first Hebrew poets of his time. He showed great skill in rimed prose and artistic versification, and the criticism which Grätz passed upon him as a poet is now known to be undeserved. Under the title "Imre No'ash" (Speeches of a Desperate One) he compiled a comprehensive dictionary of rimes in three parts, two of which dealt with homonyms and synonyms. It is probable that the "Maskiy-yot Kesef," edited by Mordecai Tama (Amsterdam, 1765), is a part of the "Imre No'ash" ("Literaturblatt des Orients," ix. 343; Steinschneider, "Cat. Bodl." col. 2386).

Dapiera was a prolific poet and writer; more than forty piyyuṭim issued from his pen; and the manuscript Or., fol. 1059, in the Berlin Royal Library, contains versified panegyrics sent by him to such men as Moses Abbas, Samuel al-Rabi, Don Bonfos, Astruc Ramuk, Astruc Crescas, Don Solomon al-Constantini, Magliaḥ of Majorca, as well as to Christian scholars. Many of his letters are still extant; one of them, to the above-mentioned Magliaḥ of Majorca, was published by Edelman in his "Dibre Hefez" (p. 27). H. Brody has published in his "Beiträge zu Salomo Da-Pieras Leben und Wirken" (Berlin, 1893) a number of Dapiera's letters and poems. Solomon ben Meshullam Dapiera must not be confounded with Solomon ben Immanuel Dapiera, who probably died shortly before 1363, and who, under the title "Batte ha-Nefesh" (Smelling-Flask), translated from Arabic into Hebrew the didactic poem "Al-Saba'niyyah" by Abu 'Imran Moses Tobi, to which he wrote a commentary (see Hirschfeld in the "Report of the Judith Montefiore College," 1894, p. 8).

M. K.—G.

DARDA: One of the wise men surpassed in wisdom by King Solomon (I Kings iv. 31). He is mentioned, with Ethan, Heman, and Chalcol, as a son of Mahol. In I Chron. ii. 6 he is called "Dara," the son of Zerah. Rabbinic fancy has identified Darda with "the generation of knowledge" ("dor de'") of the wilderness. "Kol Adam" refers to Adam; "Ethan" is Abraham; "Heman" is Moses; and "Chalcol" is Joseph (see Rashi on I Kings v. 11).

E. G. H.

G. B. L.

DARDANELLES or **CHANAK-KALESSI:** Name of the two cities situated opposite each other on the shores of the strait at the entrance to the Sea of Marmora. The European city is inhabited by

Mohammedans exclusively; the Asiatic city contains Mohammedans, Greeks, Armenians, Europeans, and Jews. The Jewish community dates from the year 1510 according to local traditions which report that the Portuguese rabbi Jacob Ben-Habib, the author of "En Ya'akob," after emigrating from Portugal, established himself at Salonica, and afterward led a colony of twenty Jewish families from Gallipoli to Dardanelles. The old epitaphs in the cemetery of the city are illegible. The community is not mentioned until the middle of the seventeenth century, when the false Messiah Shabbethai Zebi was imprisoned by Sultan Mohammed IV. in the castle of Abydos in the vicinity of the Dardanelles. The Jewish population of this city, as well as of all the places along the Sea of Marmora, made a pilgrimage to the pseudo-Messiah (1664). Dardanelles is the birthplace of a Jewish author, Judah Benveniste, who wrote two works, "Tiwwasha' Yehudah" (Judah Shall Be Saved), published at Smyrna, and "Zeker Dabar" (Remembrance of the Word), published at Salonica (1863).

In a total population (1902) of 11,600 inhabitants there are 2,700 Jews. The latter have four synagogues, one school of the Alliance Israélite Universelle with 178 boys, a congregational school for girls (100), a Talmud Torah with 150 pupils, and a society of young people, "Ahabat Re'im," which furnishes a midday meal to poor school-children. Members of the three chief Jewish families, the Sedaccas, Gormezanos, and Taraganos, represent foreign powers as consular agents.

DAR'I, MOSES (or **MOSES OF DAR'AH** [דרעי; in Africa]):

1. **Moses ben Adonim ha-Lewi**: Karaite; flourished in Dar'ah toward the end of the ninth century. He was a grammarian of prominence, as is shown by the title "Medakdek" (Grammarian) given to him. Some of his exegetic notes, conceived in the true Karaite spirit, have been preserved. Of his religious poems one fragment only is in existence, and of this the first stanza alone is in print, so that it is difficult to form an opinion regarding the poem. Pinsker assumes that the father of Moses was that Adonim one of whose poems is yet extant ("Likḳuṭe Qadmoniyyot," p. 138); but this theory can not be accepted without further proof.

BIBLIOGRAPHY: Pinsker, *Likḳuṭe Qadmoniyyot*, p. 105; Fürst, *Gesch. des Karäert.* i. 97.

2. **Moses Dar'i**: Rabbinate; mentioned by Maimonides in his collection of responsa, "Pe'er ha-Dor" (No. 19). He emigrated from Maghreb (Spain) to Egypt, where he exchanged his own tefillin for others conforming to the regulations of the Geonim. Steinschneider inclines toward the opinion that he later joined the ranks of the Karaites, and that he is identical with the Moses Dar'i below.

BIBLIOGRAPHY: Pinsker, *Likḳuṭe Qadmoniyyot*, p. 46; Steinschneider, in Geiger's *Jüd. Zeit.* ix. 178.

3. **Moses Dar'i**: The most prominent among Karaite poets. Concerning the dates of his life and activity the last word has not yet been said. Pinsker, the first to study his collected poems and give detailed information concerning him, places him in about the middle of the ninth century, and holds that

Dar'i's "Diwan," according to certain data contained therein, was finished about 843. Steinschneider, Geiger, and Schorr have, for weighty considerations, rejected Pinsker's supposition.

There can be no doubt whatever that Dar'i was familiar with the works of the greater poets, from Gabirol to Abraham ibn Ezra, and that he derived much material from Judah ha-Levi, and not, as Pinsker maintains, that Gabirol, Moses ibn Ezra, Judah ha-Levi, and other Rabbinate poets took Dar'i as their model. Dar'i himself, in the superscriptions to his poems, names pieces by Judah ha-Levi and others that served him as patterns. The earliest date, therefore, that can be assigned to Dar'i is the end of the twelfth century. The date which appears in Dar'i's collection of poems must be regarded as a falsification.

Concerning the life of Dar'i little is known. His ancestors are said to have gone from Jerusalem (the presumptive starting-point of so many old families) to Spain, and from thence to have emigrated to Dar'ah, where Dar'i was born. He took up his abode in Egypt, and there completed the "Diwan." He made visits to Damascus, but his reception there was not cordial. While on his way to Jerusalem he wrote one of his poems. Two of his sons died at an early age; his third son, Uri, heads a genealogical table (Pinsker, "Likḳuṭe Qadmoniyyot," p. 49) extending to the twentieth generation.

Dar'i's poems often contain his name in acrostics; the fullest of these is: **אני משה בן מרי ורבי אברהם**. It also occurs abbreviated as **משה קראי רופא חוק** and **משה קראי חוק**; which makes it evident that the epithet "rofe" (physician) refers to Dar'i himself. The "Diwan" (collection of poems) consists of two parts: the first part is the work proper, bearing the title "Firdaus Azhar al-Qaṣa'id wal-Ash'ar"; the second part is in the nature of a supplement. The two parts together contain about five hundred religious and secular poems. By far the greater number are in Hebrew; a few are written in Arabic. In some poems the verses are in Hebrew and Arabic alternately. Dar'i was acquainted with all those forms of poetry introduced into Hebrew literature from Spanish-Arabian countries.

In his religious poems—one whole series of which is arranged to correspond to the weekly lessons—he prays for forgiveness of sins, bewails persecutions and hardships, and gives expression to his longings for redemption. Among his secular poems occur several of a satirical character, directed against the "Anshe Mishnah" (followers of the Mishnah, or Rabbinites). There are also nuptial poems and love-songs, somewhat coarse in conception; eulogies and poems on friendship, extravagant in their fervor; besides elegies, epigrams, enigmas, etc. He is not wanting even in the affectations and artificialities of form and language peculiar to his models. His imagination often soars to great heights, and he displays great cleverness, especially in his epigrams. His language is fluent, but occasionally he has recourse to poetic license. His productions contain the stereotyped ideas and imageries which his predecessors used, following them even in the matter of linguistic expression; in other words, he plagiarizes

freely. Of Dar'i's longer poems all that is known is reported by Pinsker.

BIBLIOGRAPHY: Pinsker, *Likutei Kadmoniyot*, pp. 46-105, 135, and pp. 113 *et seq.*, where Dar'i's religious poems are enumerated; Geiger, in *Z. D. M. G.* xv. 813 *et seq.*, xvi. 290; Schorr, in *He-Haluz*, vi. 57; Steinschneider, in Geiger's *Jüd. Zeit.* ix. 176 *et seq.*, where other sources also are mentioned; D. Kohn, in *Ozar ha-Sifrut*, v. 90 *et seq.*

II. B.

DARIUS I. (דָּרְיוֹשׁ; Δαρειος): King of Persia from 521 to 485 B.C.; son of Hystaspes. The sources for the history of Darius are his own trilingual inscription at Behistun, the Babylonian contract tablets, and the accounts which the Greeks from Herodotus onward have given. Herodotus is corrected repeatedly by Ctesias. The older branch of the Achæmenides died out with Cambyses and his brother, the true Smerdis, while the head of the younger branch, which traced its descent to Teispes, was Hystaspes, governor of Parthia, who submitted to the new ruler. His son Darius, however, undertook to win back the scepter from the Magian Gaumata, who had assumed the title of king and had married Cyrus' daughter. Darius and six intimate companions of noble blood, relying on the protection of Ahuramazda, attacked the usurper on the 10th of Tishri (Oct. 16), 521, at a city in Media, and killed him; Darius now became king.

In Persia itself Darius was confronted by a new pretender, a second pseudo-Smerdis. In addition, the subject nations throughout the East (for instance, the Elamites, Medians, Parthians, Hyrkansians) tried to win back their independence, and placed at their head men who claimed descent from the royal family. The most serious rebellion was the one in Babylon under Nidintabel, who called himself Nebuchadnezzar III., the son of Nabonid. The first Babylonian record of Nebuchadnezzar III.'s reign is dated Tishri 17 (Oct. 23) of the year of his accession, 521.

Darius besieged Babylon and sent capable generals against the other usurpers. In Jan. or Feb., 520, Babylon yielded, and Darius was free

Darius to personally direct the crushing of the Median revolt. But in the spring **Crushes** Median revolt. But in the spring **Rebellions.** Babylon rebelled again under the Armenian Arakha, who also pretended to be Nebuchadnezzar, son of Nabonid. There are many records dated in Darius' reign. At the beginning of 519 Babylon was retaken by Vidafra; and by the summer of 519 Darius had authority over the whole of the empire. These events directly concerned the Jews, who thought they presaged the great crisis, the self-annihilation of the heathen kingdom, which, according to Ezekiel, was to precede the Messianic era. But the Jews entertained no idea of rebelling: they were too thoroughly imbued with the teaching of the Prophets that it was wicked to forestall the ways of God. Nevertheless, they looked upon Zerubbabel, of the house of David, who, as the Persian governor, was the head of the little province of Judea, as the coming Messiah. It was fit then that they should make preparations, since God Himself was evidently preparing. Consequently, on the first day of the sixth month, in the second year of the reign of Darius, the prophet Haggai announced to Zerubbabel that the time was ripe, and the high priest Joshua began the rebuilding of the Temple.

On the 24th of the ninth month (Dec. 17), 520, the foundation-stone of the Temple was laid. The prophet Zechariah supported Haggai and encouraged the people, even when news came of the continuous victories of the Persians. As late as the 24th of the eleventh month (Jan. 13), 519, he had a crown made for Zerubbabel out of gold sent by Jews in Babylon.

The hopes in the Messianic era were vain, for soon the Persian rule was more firmly established than ever. Jerusalem received a visit from the satrap of Abarnahara (the Persian province of Syria), Tatnai (Greek Σάτιννης; Babylonian, "Ushtani"). The activity of the Jews and the building of the Temple naturally excited his suspicion. When the elders referred to Cyrus, who had ordered the Temple built, he dared not interfere, but reported the matter to Darius, who judged the affair correctly and without prejudice. He knew he need never fear a rebellion of the Jews, and that it would be of advantage to the kingdom to further their religious interests. The cost of building the Temple was paid out of the tribute-tax of Syria. He commanded the Jews to offer in the Temple a daily sacrifice for the welfare of the kingdom and for his sons. On Adar 3 (March 10), 515, in the sixth year of Darius, the Temple was completed (Ezra vi. 14).

DARIUS SEATED ON HIS THRONE.
(From Flandin and Coste, "Voyage en Perse.")

Darius was the organizer of the Persian Empire. His conquests served to round out the boundaries of his realm in Armenia, the Caucasus, and India, and along the Turanian steppes and the highlands of Central Asia. In order to systematize the collection of the tributes from subject nations, Darius divided his empire into twenty provinces ruled by governors, who are enumerated by Herodotus (iii. 89 *et seq.*). Each province was subdivided, each part with its own head. These governors and vice-governors were called, in Persian, "khshatrapavan" (guardians of the land; in Greek, σατράπης; in Hebrew, אֶחָשְׁתָּרָפָן; in Babylonian, "pahat" (= Hebrew פָּחָה). The number of the satraps and the districts over which they ruled frequently changed. According to the Book of Daniel (vi. 2), "It pleased Darius to set a hundred and twenty princes [satraps] over the kingdom"; while Esther says that Xerxes (Ahasuerus) "reigned from India even unto Ethiopia, over a hundred and seven and twenty provinces [מְדִינָה]"; but this number can not be relied upon. It was Darius, also, who introduced and regulated the coinage of the realm. The standard coin was the

golden daric (Hebrew and Phenician **אֲדֵרֶכֶת**, to be distinguished from **אֲדֵרֶכֶת**, "drachma"), weighing 8.4 grams = 130 grains, and in silver worth 20 shekels, each 5.6 grams = 86.5 grains; 100 shekels, or 5 darics, made a silver mina; and 6,000 shekels, or 300 darics, made a silver talent.

Light is thrown upon the religious policy of Darius by the inscription of Uzaḥor, chief priest of the goddess Neit in the Egyptian city Sais. Uzaḥor was summoned to Elam (Susa) by Darius, and was fully empowered to restore the Hierogrammatic College (the House of Life), for which institution he trained many children. Darius himself went to Egypt and showed such deep interest in the institutions of the land that the Egyptian priesthood re-

doorkeepers (Cant. R. iii. 1). It was during Darius' reign that Daniel disobeyed the order to worship the king ('Ab. Zarah 3a; compare Dan. vi. 11-12).

The latter Darius, by whom the Talmud means the king mentioned in Hag. i. 1, and who is not identical with Darius the Persian (see R. II. 3b, and Tos. *ad loc.*), was the son of Esther, and thus of pure descent on his mother's, and impure on his father's, side. This is implied in the Syrian hyrax (Lev. xiii. 5), the emblem of the Medo-Persian empire, uniting as it does the signs of the clean and of the unclean animals (Esth. R. viii. 3; Lev. R. xiii. 5). Compare CYRUS.

DARKNESS: The rendering in the English versions of the Hebrew **חֹשֶׁךְ** and its synonyms **אֶפֶל**, **אֶפְלָה**, **עֶרְפֶּל**, **עֶרְפֶּל**. At one time darkness was regarded as something substantial, and not merely as the absence of light. This is apparent from the frequent juxtaposition of "darkness" with "light." God forms light and darkness (Isa. xlv. 7); light and darkness are consumed or confined (Job xxvi. 10). In the Creation-story, darkness is said to have been over primitive chaos, **ABYSS**. In this opening sentence traces or reminiscences of an early mythological personification have been detected (see COSMOGONY). Darkness antedates creation. It has also been noticed that it is not called good, as are the other works of the Creator. The absence of the definite article before **חֹשֶׁךְ** in Gen. i. 1 points in the same direction.

Something of this mythological notion is present in Job's imprecation (Job iii. 4, 5), where both "Hoshek" and "Zalmut" (or "Zalmawet") are invoked as though ravenous monsters lying in wait for prey (the verb recalls the blood-avenger, the "goel"). They are in parallelism with a phrase—"Let all that maketh black the day" [R. V.]—which is now recognized by nearly all commentators to describe mythological beasts (see DRAGON). In ordinary speech, of course, the Hebrew mind did not revert to this personification of darkness and its underlying antecedent mythological conceits. Darkness is simply the night, as light is the day (Gen. i. 5, 18). The sun grows dark; the day is darkened; and the like. In mines and other subterranean regions darkness has its realm, which the searcher for the precious metals invades, and thus forces upon it the establishment of new boundaries (Job xxviii. 3). This impression of substantiality goes with the descriptions of Egyptian darkness (Ps. cv. 28; Ex. x. 23). Darkness is also likened to a pillar of cloud (Ex. xiv. 20), as something almost palpable, if not personal. It is a frequent circumstance of theophany (II Sam. xxii. 12 = Ps. xviii. 12); and is associated with "She'ol" in such a way as to make it plausible that this place of the ingathering of the shades was a domain ruled over by twin demons, Hoshek and Zalmut (darkness and thick darkness). The double form, masculine and feminine, "hoshek" and "hashekah," also goes back to mythology.

In figurative speech, for reasons that are apparent, darkness was used for a secret hiding-place (Isa. xlv. 3; Job xxxiv. 22; Ps. cxxxix. 11, 12). As the effect of sorrow is to dim the eyes by tears, or as grief or sin injects darkness into the world (com-

SYRIAC COIN, WITH NAME OF DARIUS IN PERSIAN, EGYPTIAN, and Assyrian.
(In the British Museum.)

garded him as the last great lawgiver of Egypt (Diodorus, i. 95; compare Herodotus, ii. 110).

In the Book of Daniel, whose author had but a dim knowledge of Persian history, "Darius the Median" appears as the son of Xerxes (ix. 1), successor to the Babylonian Belshazzar and predecessor of Cyrus (vi. 28, x. 1). The epithet "Median" is to be explained by the fact that in the Orient, as among the Greeks, the name "Media" was applied to the whole Persian realm (for instance, in the Minean inscription of South Arabia [Halevy, n. 535]; compare "kings of Media and Persia" in Dan. v. 28, viii. 20; Esth. x. 2; compare i. 3, 14).

B.* iv. 304; Meissner, in *Stade's Zeitschrift*, xvii. 191; Revillout, in *Revue Egyptologique*, i. 72 *et seq.* G. E. ME.

DARIUS III.—Biblical Data: Last King of Persia; reigned from 336 to 330 B.C.; conquered by Alexander the Great. He is probably the "Darius the Persian," with whose reign the record of the priestly heads of families mentioned in Nehemiah (xii. 22) ended. On this passage compare Eduard Meyer, "Entstehung des Judenthums," p. 103. G. E. ME.

—In Rabbinical Literature: Darius and Cyrus were the commanders of Belshazzar's two legions. When they saw him in a debauched state, they made him descend from his throne, deprived him of his crown and of his royal robes, and left him standing in his shameful nakedness (Esth. R. iii. 1; compare David Luria *ad loc.*). According to another version, Darius and Cyrus were Belshazzar's

pare 'Ab, Zarah 8a), the Hebrew speaks of distress as darkness (Isa. v. 30, xxix. 18; Ps. cvii. 10-14, again "Hoshek" and "Zalmut").

Darkness is uncanny. It may be the hiding-place of evil spirits; this, at all events, was the notion in post-Biblical times (compare DEMONOLOGY); therefore darkness expresses fear, dread, terror. As such it is one of the equipments of the DAY OF THE LORD, a circumstance of judgment (Amos v. 18, 20; Zeph. i. 15; Nahum i. 8). This eschatological idea underlies also the darkness which ensues upon the Crucifixion (Matt. xxvii. 45). According to the theory advanced by Gunkel ("Schöpfung und Chaos"), that in eschatological visions primitive mythology finds its expression, the underlying idea is that darkness is an attendant on final judgment or punishment (Matt. viii. 12, xxii. 13, and frequently in N. T.).

Darkness is also the emblem of mysterious afflictions, of ignorance and frailty (Job xix. 8, xxiii. 17; Isa. ix. 2), of sin and evil (Isa. v. 20; Prov. ii. 13), of mourning (Isa. xlvii. 5), of doubt and vexation (Job v. 14, xii. 25), and of confusion (Ps. xxxv. 5). As wisdom is light, so ignorance is darkness (Job xxxvii. 19; Eccl. ii. 14).

Darkness was the ninth of the ten Egyptian plagues (Ex. x. 21 *et seq.*). What caused the darkness has been a subject of much unsatisfactory discussion. Some reminiscence based upon observation of natural phenomena is always involved in the other plagues. What the reminiscence is in this case has not been determined; a storm of dust has been suggested by some commentators. E. G. H.

DARMESTERER, ARSÈNE: French philologist and brother of James Darmesteter; born at Château-Salins Jan. 5, 1846; died at Paris Nov. 16, 1888. Darmesteter, who came as a little boy to Paris, went first to a primary school, but learned much from the books in the workshop of his father, who was a bookbinder. At the age of twelve he went to the Talmud Torah school, where, in addition to religious subjects, he studied French, Latin, and Greek. It was in this school that he determined to solve the problem of the Old French words in the text of Rashi. At the age of sixteen he presented himself for the baccalaureate. His father had intended him to become a rabbi; but criticism of the New Testament had led him to criticize the Old; his religious orthodoxy had been shaken, and, although he continued his Hebrew studies, his warm religious faith had given place to scientific interests. Science was destined, he thought, to transform and to unite humanity.

For a year he was a pupil at the Séminaire Israélite under Zadoc Kahn; the next year he worked at the Collège Ste. Barbe to qualify for his licentiate, which he obtained in 1864. He studied Latin epigraphy under Léon Renier. In 1865-66 he began to study Old French at the Ecole des Chartes. It was about this time that he wrote the remarkable essay on the Talmud which he had finished just when the similar article by Emmanuel Deutsch had appeared. The article was afterward revised by Darmesteter and published posthumously in his "Reliques Scientifiques."

In 1867 Darmesteter became a pupil of Gaston Paris, the great Romance scholar, who quickly recognized his powers. In 1869, at the request of Paris, the minister of public instruction sent Darmesteter to study the French glosses in the manuscripts of Rashi at Oxford and Cambridge, and in the British Museum. In six weeks, working from twelve to fourteen hours a day, he went through fifty-nine manuscripts. His object was to elucidate the phonetics and structure of Old French by means of the forms preserved in Hebrew characters. The first results of his investigations were published in "Romania" in 1872, in which year he was nominated "répétiteur" (lecturer) in Romance languages at the Ecole des Hautes-Etudes. He finished in the same year his first large work, "Traité sur les Mots Composés" (published in 1874), in which he showed his powers as a philologist on ground which he had made his own.

To Darmesteter a language was essentially living; he was not content with a mastery of the bare facts of phonetics and morphology; the problem which above all attracted him was that of the creation of new words, and the development of new senses from old words. The "Mots Composés," in which some 12,000 words are dealt with, has become a classic.

In 1871 Darmesteter had already begun, jointly with Adolphe Hatzfeld, a dictionary of the French language, expecting to complete it in three years. Its publication, however, did not begin until after Darmesteter's death. Hatzfeld, a man with singularly fine logical and literary perceptions, struck by the lack of order in the classification of the meanings of words given in Littré's great work, proposed to reduce them in each case to one or two fundamental meanings. Darmesteter saw that the problem of each word could only be solved by the history of the word. Hatzfeld and Darmesteter worked together for seventeen years. When Darmesteter died the first draft of the manuscript was complete and the printing was begun. The revision of the etymological part, and the great treatise on the formation of words which he had planned and, in part, written, as a preface, were completed by his former pupils A. Thomas and L. Sudre. The work was awarded a grand prix at the Paris Exhibition of 1900, and the prix Jean Reynaud, of 10,000 francs, by the Académie des Inscriptions et Belles Lettres, the highest honor in its power to bestow.

The dictionary was far from absorbing Darmesteter's energies. In 1874 he deciphered the difficult and beautiful French elegy, preserved in the Vatican, on the burning of the thirteen Jewish martyrs at Troyes in 1288. In the same year he

ARSÈNE DARMESTERER.

examined in Parma and Turin fifty-five other manuscripts of Rashi. In 1876 he discovered the important phonetic law of the protonic, known since as "Darmesteter's law." He obtained in 1877 his doctor's degree from the Sorbonne, presenting two dissertations: "De Floovante" and "De la Création Actuelle des Mots Nouveaux dans la Langue Française." On June 16, 1877, he was nominated "maître des conférences" in Medieval French at the Faculté des Lettres of Paris.

In 1878 he published, in collaboration with Hatzfeld, "Le Seizième Siècle," a book on the language and literature of the sixteenth century in France, which is used as a text-book in the universities of Germany and of England as well as of France. In 1880 he gave much of his time to the foundation of the Société des Etudes Juives, and especially to the "Revue" issued by it, in which he published a number of papers dealing with ancient and medieval Jewish history. He was also for some time professor of French at the Paris Rabbinical Seminary. In 1881 he became lecturer at the Ecole Normale Supérieure des Filles at Sèvres. His lectures, delivered to audiences of women students training as teachers in secondary schools, became the "Cours de Grammaire Française" (4 vols.), published posthumously, and translated

"The Life of Words." into English by Alphonse Hartog.

The French Academy awarded it the Saintour prize in 1897. In 1883 he was appointed at the Sorbonne titular professor of Medieval French literature and of the history of the French language. In 1886 he published "The Life of Words," which appeared first in an English translation, and then in the French original under the title "La Vie des Mots," a series of lectures on the changes of meaning in words, in which certain theories, originally published in 1876 in the "Revue Philosophique," were extended and developed. Most of Darmesteter's papers were collected in two volumes, "Reliques Scientifiques" (Paris, 1890), by his brother James. The first volume contains a biography, a bibliography, and Jewish and Franco-Jewish studies; the second, the purely French studies. The book was intended for the public, and has gone through many editions in France; it throws a new light on linguistic development. In 1885 heart-disease, unsuspected but of long standing, probably aggravated by the accidental death of his mother and by periods of almost superhuman intellectual effort, declared itself. On Nov. 7, 1888, he acted as examiner at the Sorbonne in a room without a fire; the chill brought on endocarditis, and he died on Nov. 16, 1888.

A second edition of the "Mots Composés," edited by Gaston Paris, and with an index of 12,000 words compiled by Darmesteter's wife, was published in 1894. An essay on the Celtic element in French was published in the "Revue Celtique" for 1901.

The notes on the "La'azim" of Rashi are still unpublished.

DARMESTER, JAMES: French Orientalist; born March 28, 1849, at Château-Salins, Lorraine; died Oct. 19, 1894, at Paris. His parents were from a family established in Lorraine since the middle of the eighteenth century. When, in 1791, the Jews of France were bidden to choose surnames for themselves, the great-grandfather of James selected the name "Darmstädter," in remembrance of the Darmstadt ghetto whence his parents had emigrated to Lorraine. The French registrar translated the name into his own language and wrote it "Darmesteter." Calmann and Cerf, the son and grandson of the original Darmesteter, were booksellers and bookbinders in the town of Château-Salins; and there, in 1839, the latter married Rosalie Brandeis, the daughter of one of Napoleon's officers. The Brandeises, of Polish origin, were of a notable stock—rabbis, physicians, and soldiers through many generations. The family archives contain interminable series of rabbis. A great-uncle of the Darmesteters was physician to the Czar of Russia; their grandfather and their maternal uncles were soldiers or army doctors. From the Brandeises James and his brother Arsène inherited their love of letters, their scientific bent, and their enthusiastic patriotism.

James Darmesteter.

James was the youngest son. The eldest, Achille, a lad of uncommon promise, died suddenly one evening on his return from school, when Arsène was about six years and James about three years old. In 1852 the death of Calmann Darmesteter in Paris, leaving there a widow wholly unprovided for, gave Cerf and his wife a reason for moving to the capital; and with the widow they settled in the crowded quarter of the Marais. Work was difficult to procure; privations were many; and the close air and inappropriate food affected the health of James, who never grew to his full size, his stature being slightly deformed and his health always frail. He resembled in an extraordinary degree the illustrious poet of Recanati; and when he visited Florence in 1887 the Florentines dubbed him "Il piccolo Leopardi."

With the tenacious idealism of the Hebrew race, the bookbinder and his wife, poor as they were, spared no sacrifice to afford their children a first-rate education. Both of them were grounded at the primary school of the Rue des Hospitalières, Saint Gervais; proceeding thence, on attaining their tenth or twelfth year, to the Talmud Torah, the seminary of the Jewish Consistory, a school whence most but not all of the pupils entered the Rabbinical College. At the age of eleven James obtained a Bischoffsheim scholarship; and thenceforth he followed the education of the Lycée, first at the Collège Charlemagne, then at the Collège Bonaparte (now Collège

Condorcet), the most prominent of Parisian public schools. In after days he was wont to compare the

"amiable and sterile education of the public school," much to its disfavor, with the original and somewhat chaotic system of the Talmud Torah; but it was partly to the classical discipline of the Lycée, and to its preoccupation with rhetoric and logic, that James Darmesteter owed his singularly beautiful style, at once lucid and suggestive, terse and admirably descriptive, elliptic and convincing.

Darmesteter's school-days were a series of triumphs that terminated in the acquisition of the "Prix d'Honneur" at the general competition in 1867. On the morrow every school in France echoed with the Latin phrases which the delicate little Jew of eighteen had put into the mouth of the dying Demosthenes.

After such brilliant school-days, Darmesteter showed a certain hesitation in deciding on his career. He obtained his baccalaureate in science and in letters, took the higher degrees in letters and in law, and then earned his daily bread by giving lessons. He had as yet published nothing. He had indeed begun a drama, a philosophical novel, a history of the satanic element in modern literature, and a synthesis of religions. But all these schemes were relinquished ere they neared completion. He fancied, as at his age Ernest Renan had imagined, that his gift was perhaps in the line of natural science. "But I studied only vague generalizations," he wrote later, "without that interest in details which is the beginning of wisdom. I wished to make a synthesis of the universe. I decided to employ nine years in research: a year for each science, following the order of Comte. In the tenth year I would write my book." Meantime he studied Byron in English, Heine in German, and Carducci in Italian. But ere the fourth year of his program was completed—a program loosely adhered to—one day, in reading Michelet's "Bible de l'Humanité," he heard the voice of the antique Orient: he had found his vocation.

On the advice of Michel Bréal, Darmesteter in 1872 entered the Ecole des Hautes Etudes. He was not long a student. His rapid and surprising progress soon invaded the whole domain of ancient Persian literature, language, history, and religion. From the first he associated the life and the history of a people with the development of its language, and sought to interpret its faith by its traditions rather than by arbitrary philological comparisons.

In order to understand the Avesta, he felt it important to study the inscriptions of ancient Iran, the legends of Firdusi's "Shah Nameh," the Pahlavi commentaries of the "Bundahish," and even the rites of the modern Parsees of Bombay, rather than to compare the text of the Iranian Scriptures with the Holy Writ of ancient India, in the manner of certain German scholars. Each race, he felt, was, in matters of religion, more like itself throughout the continuity of its history than it was like any other race, however near a neighbor and contemporary. His "Haurvatât et Ameretât," published in 1875, proclaimed the student a master; and soon

after he entered the Ecole des Hautes Etudes as professor.

In 1877 his "Ormuzd et Ahriman" attracted the notice of F. Max Müller at Oxford; the eminent Sanskrit scholar entrusted to the young Frenchman the English translation of the Avesta for the collection of the "Sacred Books of the East"; and the same year Darmesteter went, for the first time, to England. While continuing his English edition of the Avesta, he contributed to the French reviews various essays and articles on points of historical and philological interest: these were collected in 1883 under the title "Etudes Iraniques." The same year witnessed the completion of his English Avesta, of which the first volume had appeared in 1880.

Darmesteter's translation of the Avesta had advanced him in the knowledge not merely of Persian, but also of English; and at one moment his increasing admiration for English literature went far toward robbing Zoroaster of his last and most brilliant disciple. But his devotion to his real career was too deep-rooted for any other interest

English Studies. to endanger it, though ever and anon the Orientalist paused in his more serious labors to publish an edition of "Childe Harold" (1882), a volume of "Essais de Littérature Anglaise" (1883), a classical edition of "Macbeth" (1884), a book on Shakespeare (1889), or to write the charming pages collected in his posthumous "English Studies" (1896). Few Frenchmen have understood England so intimately. Darmesteter, by a sort of happy guesswork, had divined the English character before he set himself to study it.

His translation of the Avesta into English had convinced Darmesteter that these sacred books—being in fact a prayer-book, a collection of ritual—could be understood only by a study of the religion which still practises their rites; and in February, 1886, almost immediately after his election to the chair of Iranian languages at the Collège de France, he left Paris for Bombay, the seat of an important Parsee community. The thirteen months spent by him in India formed, in many respects, the most important period of his life. In Bombay he became acquainted with the sages of the Zoroastrian cult; read priceless manuscripts with the venerable Tahmuraz; discussed points of ritual with the alert and modern-minded Yivanje Modi; and laid the foundations of that epoch-making translation of the Avesta to which in 1893

Journey to India. the French Academy of Inscriptions awarded the "Prix Biennal" of twenty thousand francs. There, too, he came to the conclusion that the antiquity of the Avesta had been greatly exaggerated by Iranian scholars; and that the Zoroastrian Scriptures bear traces of the influence not only of Buddhism, but also of the Jewish Bible, and especially of the Neoplatonist philosophy: "On peut dire que les Gâthas sont le premier monument du Gnosticisme, mais d'un Gnosticisme pratique, arrêté sur la pente fatale par un sens profond du réel et une préoccupation morale qui ne cherche dans l'abstraction qu'un moyen d'édification." According to Darmesteter, no part of the text of the Avesta is anterior by more than a century to the common era: the oldest fragments being

contemporary with Vologeses, while the bulk of these Scriptures may be attributed to the reign of Ardashir (middle of the third century of the common era).

But if the letter be relatively modern the spirit is ancient. The faith that Ardashir and his minister, Tansar, sought to restore and to reduce to writing was, even in their time, an inheritance from distant forefathers. This antique element persists in a great part of the doctrine of the Avesta—in the principle of dualism, for instance, as in the limit set to the duration of the world, in the final defeat of evil, and in the idea of resurrection—no less than in certain details of the ritual, such as the sacrifice of the sacred plant, the Haoma. In an elaborate introduction to the third volume of his French translation published by Leroux (Paris, 1893), Darmesteter brings the whole force of his philological knowledge and his historical method to bear upon this question of the origins of Zoroastrianism. In the present state of science some of the factors of the problem are lacking; but those existing have never been classified with so masterly a competence nor presented with such originality and grace as by Darmesteter.

During his stay in India Darmesteter did not devote the whole of his time to the study of Zoroastrian tradition. He had left Europe with a mission from the French government to collect the popular songs of the Afghan tribes. On leaving Bombay he proceeded to the Northwest frontier and thence to the hills of Abbotabad. He who had made friends at Bombay with the Parsee priests might then be seen on the market-place of Peshawur talking with ragged mountain chiefs from Afghanistan or Baluchistan, or listening in prison to a poet in tatters—taken more or less redhanded—and writing down from his dictation some picturesque incendiary Pushtun ballad. These wild songs of border hate and love delighted the romantic soul of Darmesteter, while that other half of his mind, the scientific half, never asleep, noted strange linguistic forms and singular mutations of consonants, until,

Afghan from a quantity of scattered details,
Studies. he drew the unforeseen conclusion that in the language of the Afghan tribes there still survives the antique speech of the Medes. The Afghan tongue of to-day springs from Zend, as French springs from Latin. These Afghan songs, with a French translation and an important philological essay, were published by Leroux under the title "*Chants Populaires des Afghans*" (1888-90).

Darmesteter did not confine himself to seeing every side of native life. Everywhere he met with the kindest, the most hospitable reception. At Bombay he stayed with the governor, Lord Reay; at Lahore, with Sir Alfred Lyall. The officers of Abbotabad made him an honorary member of their mess; just as the learned "mobeds" of Bombay had welcomed him as a brother in Zoroaster, and as the most distinguished mendicants of the fair of Peshawur had treated him as a fellow of their rambling academy of Afghan letters. He liked, admired, and understood all this variegated universe of India. Something of the magic and the miracle, something of the sheer delight and amazement of this voyage into the silver land of Indian nights lingers still in

the pages of his "*Lettres sur l'Inde*," published on his return to Paris (Lemerre, 1888).

In his Peshawur garden one day Darmesteter chanced to read a small volume of English verses entitled "*An Italian Garden*." On his return to Europe in 1887 he called in London on their author, Miss Mary Robinson; in 1888 he married her. Between these two dates he translated into French, under the title "*Poésies de Mary Robinson*" (1888), a selection of her poems, and published them with an introduction which is one of the most spontaneous and lyric of this scholar's efforts.

Darmesteter was no scholar buried in his books. His immense and noble curiosity embraced the whole order of the universe. Everything interested him, and more and more, as the years of middle life expanded and matured his marvelous faculties, was he preoccupied by the problems of moral, social, and political reform. He longed for the day when justice and righteousness should rule in the land. He was more than a Republican: he was a Liberal, convinced that the future lay with the party that should organize democracy for the greatest good of the greatest number, without forgetting that a moral ideal and a moral discipline are integral parts of the greatest good. He felt that the first thirty years of the Third Republic had been too exclusively given to political battles. The lot of the toiler, the education of the young, the faith of reasonable men, had been neglected.

When still a youth of fifteen or sixteen, at the Collège Condorcet, Darmesteter had broken from the Jewish faith. For many years the

Relation rigid orthodoxy that he associated with
to Judaism. the Synagogue inspired him with a singular distaste. Yet his nature was a profoundly religious one, as was shown in "*La Chute du Christ*" (1880), which was republished and remodeled in an infinitely finer form in 1889 under the title "*La Légende Divine*." Therein he reveals a revolt against the silence of God in the world, a pity for human suffering, an enthusiastic altruism which at last becomes the source of a new religion—a religion of justice and rectitude, the religion of Amos and Hosea.

Darmesteter never returned to the Synagogue; but he returned to the Bible. "My faith is of my own making, not metaphysical, but moral, evolutionist, and Biblical," he wrote in 1887. A few years later he was to give to this new faith the name of "Prophetism." In the reconciliation of the truths of science with the social ethics of the Hebrew Prophets, he saw the possible faith of the future. He expressed this conviction in the essays collected under the title "*Les Prophètes d'Israël*" (Calmann Lévy, 1892). The prophetism of James Darmesteter reveals no secrets of the future life and makes no promises. In his system the spiritual other-world is neither included nor denied. No rites and no miracles enforce the moral faith which Darmesteter drew, in almost equal portions, from the writings of the Prophets of his race and the principles of the Revolution of 1789.

Darmesteter was far less a metaphysician than a moralist and a sociologist. So early as 1882, under the pseudonym of "Y. D. Lefrançais," he had writ-

ten for the primary schools of France a book of "Lectures Patriotiques," destined to imprint on the minds of children the love of their country and those principles of peace, justice, fraternity, and mutual aid from which he was to construct, ten years later, his ideal prophetism. In 1893, when the house of Calmann Lévy founded the "Revue de Paris" and offered its political direction to Darmesteter, he accepted this new duty, seeing in it an opportunity to forward ideas that he felt necessary to the dignity and happiness of France. The article in which he proposed to all the warring parties of his country a general disarmament in favor of a policy of social reform, opens the volume, "Critique et Politique," published posthumously in 1895.

Darmesteter died suddenly on Oct. 19, 1894, after a few days' indisposition. No successor has been found for his chair either at the Collège de France or at the Ecole des Hautes Etudes.

I. BER.

DAROCA: Town in the Spanish province of Saragossa, and formerly a part of the ancient kingdom of Aragon. It contains an old Jewish community. It had its privileges, like the neighboring community of Calatayud, and for the most part shared the same fortunes. In 1264 it paid an annual tax of seven hundred and fifty dineros. Many wealthy Jews lived at Daroca, among them Don Abraham Maquatel (Maquarel), a contemporary of Isaac b. Sheshet. A number of them were baptized in 1413, among them a wealthy Jew named Alfonso Reus; the Ram family, whose children and grandchildren filled high offices; and others. Don Astruc ha-Levi represented the community of Daroca at the disputation of Tortosa, and was the author of the circular letter to the community of Gerona.

DARSHAN, SIMEON. See KARA, SIMON.

DARSHANIM. See HOMILETICS.

DART: A pointed weapon to be thrown by the hand; a javelin or lightspear. The English version uses "dart" as an equivalent for five Hebrew words: (1) "Hez," which should be rendered "arrow" (compare the Assyrian "uṣṣu" and the Phenician פן). (2) "Massa," given in the list of weapons which of

necessity must prove ineffective in the struggle with the leviathan (Job xli. 26). In the same connection is found (3) "total," and from the words "counted as stubble," a weapon with a shaft can be inferred (Job xli. 18). (4) "Shebet": with three of these Joab smote Absalom (II Sam. xviii. 14). The most usual form is (5) "shelah." This the workers on the Temple wall under Nehemiah constantly had with them (Neh. iv. 11). Hezekiah provided them in abundance for the defense of the Temple (II Chron. xxxiii. 5). The men under Jehoiada were armed with them (II Chron. xxiii. 10). Darts were used in sieges (I Macc. vi. 51), and it may be that the reference here is to darts used to carry fire into the works and the city of the enemy. The New Testament speaks of the "fiery darts of the wicked" (Eph. vi. 16).

DASCOLA, ASTRUC. See KANSI, SAMUEL.

DASHEV: Village in the government of Kiev, Russia. It has a population of 6,200, including 3,200 Jews, whose sources of income are mainly commercial and industrial. About 714 are artisans, 278 of these being masters. Tailoring occupies 176 persons; blacksmithing, 80; cabinet-making, 72. The output of the cabinet-makers and blacksmiths is valued at 10,000 rubles annually, and is sold at the neighboring fairs. There are 252 Jewish day-laborers, most of whom (175) hire out for field-work. About 17 families are engaged in dairy-farming. There are no charitable institutions. Three hundred children are taught in ḥadarim.

M. SEL.

DATHEMA: The name of a fortress in Gilead to which the Jews fled when hard pressed by Timotheus. There they shut themselves in, prepared for a siege, and sent to Judas Maccabeus for aid (I Macc. v. 9-11). Dathema was one of many places in a similar plight, and seems, from the description of it, to have been strongly enough fortified to necessitate "an innumerable people bearing ladders and other engines of war" to take it. Judas attacked in three divisions, drove off Timotheus, killed eight thousand of the enemy, and saved the city (I Macc. v. 29-34). The Peshitta reads "Rame-tha," from which George Adam Smith ("Historical Geography of the Holy Land," p. 589) infers that it was perhaps Ramoth Gilead. Conder (Hastings, "Dict. Bibl." i. 560) suggests the modern Dameh on the southern border of the Lejah district. It can not, however, be positively identified.

G. B. L.

DATO, MORDECAI BEN JUDAH: Italian rabbi and preacher; born 1527; lived in various places in the territory of the house of Este; died after 1585. Steinschneider thinks it possible that he was a grandson of Angelo (= Mordecai) Dato, mentioned in Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 436. Dato was a pupil of the cabalist

Moses Cordovero, and was himself an adept in the Cabala. He is honorably mentioned by Azariah de Rossi in connection with a Messianic prediction ("Me'or 'Enayim," ch. xliii.), by Menahem Azariah de Fano, and by Angelo Alatrini, who dedicated to him his "Angelica Tromba" (Ferrara, 1579). Dato's writings follow the Cabala of Cordovero and Luria. He added marginal notes to the "Asis Rimmonim," a compendium of his pupil Samuel Gallico's "Sefer ha-Pardes" (Venice, 1601), but the editors have so mutilated and misplaced his notes, which they have incorporated in the text, as to render the compendium unintelligible. It has since been reedited by M. A. de Fano (Mantua, 1623). Dato wrote "Migdal Dawid" (Tower of David), a disquisition on questions relating to the Cabala, and also annotations to the Zohar, both of which are in manuscript. The British Museum contains manuscripts of some of his sermons in the Italian language, but in Hebrew script ("Yad Yosef," p. 24), of a cabalistic commentary to Esther, and of collections of his poems.

M. FR.

DAUGHTER IN JEWISH LAW: The legal status of a daughter in Jewish law changed very materially from patriarchal times to the Talmudic era. In the former period the daughter had no appreciable legal rights; she was merely a member of her father's household, and as such was, in common with the other members of the household, subject to the power of her father, who was accountable to no one for his treatment of her. This state of absolute subjection to the parental control was somewhat modified by the Mosaic law; but it was not until the days of the rabbinical authorities that this ancient patriarchal authority was abolished, and legal rights secured for the daughter, resulting in her practical emancipation from parental government upon reaching her majority at the age of twelve years and six months.

In illustration of the power of the father in patriarchal times, many incidents may be cited from the

Bible, of which a few will suffice. The right of the father to kill his daughter is apparently not questioned in Judges xi. 34-39, though some commentators (*e.g.*, Levi ben Gershon and David Kimhi, also Nicholas de Lyra) hold that the passage must not be interpreted as indicating that Jephthah actually killed his daughter in this case. In later times this extraordinary power, more especially when used to offer up sons and daughters as sacrifices, is condemned (II Kings xxiii. 10; Ps. cvi. 37, 38; Ezek. xvi. 20, 21). A man could sell his daughter to be a maid servant (Ex. xxi. 7), and, like Laban, he could also sell her in marriage (Gen. xxxi. 15; compare Gen. xxix. 21-30). The incident in reference to Lot's daughters (Gen. xix. 8), as well as a similar incident in Judges xix. 24, shows the extent of paternal authority. Since the daughter was practically the property of her father, damages for an injury done to her were demandable by the father (Ex. xxi. 31). The father was likewise entitled to damages for slander of the good name of his daughter (Deut. xxii. 19) and for her seduction (Ex. xxii. 16; Deut. xxii. 29).

Laban, after having given his daughters in marriage to Jacob, claimed the right of paternal authority over them long after their marriage (Gen. xxxi. 43); and it seems that Jacob, to a certain extent, recognized this right (*ib.* xxxi. 31). In Judges xv. 1, 2, and in I Samuel xxv. 44, incidents are recorded showing the exercise of paternal authority over the married daughter; for in both cases the married daughter is taken from her husband by her father, and given in marriage to another without the husband's consent.

In the Talmudic and post-Talmudic law there is an entire change in the legal status of the daughter. Thus, of the law in Ex. xxi. 7, according to which the father was permitted to sell his daughter to be a maid servant, the Talmud says that it was in force only as long as the law concerning the jubilee was in force (Kid. 69a; Maimonides, "Yad," 'Abadim, i. 10); and the Talmud bases this view upon the ground that in the year of the jubilee all slaves were absolutely free, and that, therefore, when the jubilee year was no longer observed, the right of the father to sell his daughter to be a maid servant must necessarily be taken away, because the safeguard against her continuance in perpetual slavery no longer existed.

According to another tradition, the jubilee year was not observed after the destruction of the First

Temple ('Ar. 12b); thus, according to the Talmud, the right of the father to sell his daughter was taken away at least as early as the sixth century before the common era. The mother never had the right to sell her daughter (Sotah iii. 8).

The Talmudic law practically emancipated the daughter from parental authority when she attained her majority. The daughter was a minor ("keṭannah") under the age of twelve years; between the ages of twelve and twelve and a half she was called "na'arah"; and upon attaining the age of twelve years and six months she became "bogeret," and was no longer under parental control. All of the father's rights over his daughter's person and prop-

erty which survived in Jewish law from patriarchal times ceased when she became *bogeret*. These rights are thus summed up in the Mishnah (Ket. iv. 4; *ib. Gem.* 46b): While the daughter is a minor, the father may give her in marriage; he is entitled to her earnings and to that which she finds; he may annul her vows; and he must receive the bill of divorce when one is given by her husband. She becomes *sui juris* upon attaining the age of twelve years and six months, or upon her betrothal earlier (Mishnah B. M. i. 5; Ket. iii. 8, iv. 4; Nid. v. 7).

The right of the father to annul his daughter's vow is based upon Biblical law (Num. xxx. 4-6). His right to give her in marriage while she is a minor is admitted in the Mishnah (Ket. iv.); but it is condemned as immoral by the Rabbis, who are of the opinion that the father should not give his daughter in marriage during her minority, but that he must wait until she is old enough to decide whether or not she is satisfied (Kid. 41a).

The father is entitled to the custody of his daughter; but, if he divorces his wife, his daughter remains with her mother (*ib.* 102b). According to the later law, however, which seems to have followed the decisions of the Roman law, the court must determine whether the mother in such cases is a proper guardian for the daughter; and the question of the custody of the girl is one to be judicially determined according to the best interests of the child (Shulhan 'Aruk, Eben ha-'Ezer, 82, 7).

The father must support his daughter while she is a minor (Ket. 49a), even though she has been given into the custody of her mother who has been divorced ("Yad," Ishut, xxi. 17); but the father is not obliged to support his daughter after she has attained the age of six years, if she has a separate estate which is sufficient for her maintenance (Eben ha-'Ezer, 71, 1). If the daughter, after attaining her majority, remains with her father, and is supported by him, he continues to be entitled to her earnings and to that which she finds (B. M. 12a; and Shulhan 'Aruk, Hoshen Mishpat, 270, 2).

After the death of her father, his son and heir must support the daughters out of the patrimonial estate until their marriage (Ket. 52b; B. B. 116b). The daughter's right to be supported out of the estate of the father is limited to that part of the estate which actually was in her father's possession at the time of his death. She has no right to demand support out of any part of the estate which has accrued to the heirs after the father's death, and which may be the increase or increment of the estate which they received from him (Bek. 52a; Ishut, xvi. 5). The right of the daughter to be supported out of the father's estate is recognized by an early decision, delivered in Jerusalem by Judge Admon (c. 40 C.E.), whose decision was approved by Rabban Gamaliel. Admon said: "If a man die, leaving sons and daughters, and his estate be large, the sons inherit it and the daughters are maintained by it; but if the estate be small the daughters are maintained by it and the sons may go begging" (Mishnah Ket. xiii. 3; *ib. Gem.* 108b). If the heirs are spendthrifts, and the estate is in danger of being

dissipated by them, the court will set aside a certain portion of the estate beyond the control of the heirs, in trust for the support of the daughters (Eben ha-'Ezer, 112, 11, gloss). It seems that, inasmuch as the mother is not liable for the support of her daughter, the latter can not claim maintenance out of the estate of the mother (Mishnah B. B. viii. 4; *Gem.* 122b).

The Talmudic law provides furthermore (Mishnah Ket. iii. 11; *ib. Gem.* 52b) that the husband shall include in the marriage contract

Right of Dowry. (KETUBAH) a clause providing that any daughters which may be born to

him shall live in his house and be supported by his estate until their marriage. This right of support or aliment is technically known as "*mezonot*," and is to be distinguished from "*parnasah*," or the right of dotation which the daughter has in her father's estate.

The law requires that the father shall provide the daughter with a suitable dowry upon her marriage; and the obligation to provide the Dowry rests upon the father's heirs (Mishnah Ket. vi. 6; *Gem.* 68a). There is a difference of opinion among the authorities as to the right of a daughter to receive a dowry from her mother's estate, although the preponderance of authority is in favor of this right (Eben ha-'Ezer, 113, 1, gloss).

The daughter may inherit her father's estate if he has left no son or issue of a deceased son. The right of the daughters to inherit was originally established by the Mosaic law in the case of the daughters of Zelophehad (Num. xxvii. 7); and the decision in this case was made a general law (*ib.* verse 8). The right of the daughter to inherit was qualified by a later decision in the same case, providing that the heiress of her father's estate was obliged to marry one of the family of the tribe of her father, in order to preserve the inheritance within the tribe. Rabba said that this provision of the law applied only to the time of the division of the land of Palestine among the different tribes, and that it had no application in later times (B. B. 120a); so that a daughter inheriting the estate of her father might marry any one she pleased, more especially because, since the destruction of the Temple and the dispersion of the people, all laws relating to the land of Palestine were in abeyance.

The laws of inheritance are the same with reference to the sons and daughters, with the exception that the law of primogeniture does not apply to daughters (Bek. 52a; B. B. 122b).

The Talmudic authorities disagreed as to whether the son and the daughter inherit the mother's estate equally or whether the sons inherit to the exclusion of the daughters (*ib.* 111a). It was finally decided, however, that the same rule applied as to the father's estate, the sons being preferred (Hoshen Mishpat, 276, 4). If the maternal inheritance descends to the daughter while she is yet a minor, it is nevertheless beyond the control of her father; and the general rule, that the father is entitled to all the property of his minor daughter, does not apply in this case (Kid. 46b).

In order to evade the law of inheritance, which prefers the sons to the exclusion of the daughters,

it has become customary since the Middle Ages for the father to provide an inheritance for his daughter upon her marriage, by executing an

Nuptial Settlement agreement wherein he confesses that he has received a certain sum of money from his daughter in cash. He acknowledges this as a debt due by him and his heirs, to become payable upon his death in cash; and he thereby pledges or mortgages all of his goods, movable and immovable, to pay the same. He furthermore states that it was a condition of the loan that, when his male heirs enter upon their inheritance, they shall have the right either to pay the said sum in cash or to give to the daughter a share in his estate equal to one-half of the share of one son (not the first-born). By this agreement the daughter is assured of a share in her father's estate or of a sum of money equivalent to it (Eben ha-'Ezer, 113, 2; Hoshen Mishpat, 281, 7, gloss). The form of this contract is given in Appendix F to Mendelssohn's "Ritualgesetze der Juden," and it is known as the "shetar hazi zakar" (contract for a son's half share).

If a man marries a widow who has a daughter by her first husband, and, as part of the consideration of the contract of marriage, agrees to support the daughter for a specific number of years, it is a binding contract which may be enforced by the daughter, even though the mother is divorced and leaves the house of her husband taking her daughter with her, or even if the daughter is married (Mishnah Ket. xii. 1; *ib. Gem.* 101b; "Yad," Ishut, xxiii. 17, 18; Eben ha-'Ezer, 114, 1).

DAUPHINÉ: Former province of France, now absorbed in the departments Isère, Hautes-Alpes, and La Drôme. It is supposed that Jews settled here in the first centuries of the common era (Bédarride,

"Les Juifs en France, en Espagne, et

Thirteenth Century. en Italie," xxviii.); but nothing is known of their history down to the thirteenth century. Six Jews of Val-

rèas, department of Vaucluse, were accused in 1247 of having murdered a Christian child for ritual purposes. The investigation, which was set on foot by two Franciscan monks, was conducted with ferocity. The unfortunate accused, who unanimously protested their innocence, were horribly tortured for eight days, and finally condemned by the judges—creatures of Dragonet de Montauban, Lord of Val-rèas—"to be burned, without the crime charged against them having been legally proved, or having been confessed by them" (Elie Berger, "Les Registres d'Innocent IV." i. 424). Profiting by the sentiment aroused by this alleged crime, the Bishop of St. Paul-Trois-Châteaux, the constable of Valence, and a few other noblemen of the province imprisoned the Jews living on their estates and despoiled them of all their possessions.

Pope Innocent IV. intervened in their behalf, and, in a letter addressed to the Archbishop of Vienne,

he enjoined that prelate "to bring to the bar of equity all the wrongs that had been so inconsiderately inflicted upon the Jews, and not to suffer them in the future to be arbitrarily molested on account of these and similar accusations" (Elie Berger, *l.c.*).

In 1253, however, the same pope, yielding to the importunity of the archbishop Jean, authorized him to expel the Jews from the province ("Gallia Christiana, Prov. Vienne," instr. l., li.). They came back in 1289, but in that year the council of Vienne compelled them to wear the yellow badge in the shape of a quoit, and forbade them to employ Christian servants.

The dauphin Humbert I. favorably received the Jews driven from France in 1306, and authorized them to establish banking-houses within his states, on payment of considerable taxes. **Fourteenth Century.** (Prudhomme, "Les Juifs en Dauphiné aux XIV^e et XV^e Siècles," p. 12; compare "Revue Etudes Juives," ix. 254, and Depping, "Les Juifs dans le Moyen-Age," p. 161). He entrusted them also with public offices and admitted them into his court (Prudhomme, *l.c.* pp. 14, 18, 72).

During the Black Death, having been accused of poisoning the cisterns and wells, the Jews of St. Saturnin and Ste. Euphémie were butchered and their possessions plundered (1348).

The Black Death. At Veyne ninety-three were massacred. At La Mure a Jew accused of having kidnaped a Christian child was condemned to a horrible death; being cut in two and his quivering limbs hanged on a gallows (*l.c.* 30). Urged by the need of money, the dauphin Humbert, between 1350 and 1365, confiscated all the outstanding credits of the Jews in the county of Gap and in the baronies of Montauban and Meuilon ("Revue Etudes Juives," ix. 247); and in 1388 he annulled the privileges which he had granted to the Jews of Dauphiné, who, in order to have them restored, had to pay him the sum of 1,000 florins (Valbonais, "Histoire du Dauphiné," vol. ii., *preuves* No. 9; compare Prudhomme, *l.c.* p. 23, and Depping, *l.c.* p. 162). In the same year he imposed upon them a special tax of 10,000 francs, and in 1390 he laid upon them an additional tollage of 2,000 francs.

On March 4, 1413, the dauphin's council compelled the Jews to have their synagogues, their ovens, their wells, and their markets separate

Fifteenth Century. from those of the Christians (Prudhomme, *l.c.* p. 58; Depping, *l.c.* p. 196). The dauphin Louis (1461-83),

afterward King Louis XI. of France, accused them of excessive usury and of dealings with his enemies during his exile in Flanders and Brabant, and condemned them to a fine of 1,500 gold crowns ("Revue Etudes Juives," ix. 239). In consequence of this they emigrated in great numbers from Dauphiné.

From the seventeenth century onward they were no longer allowed to reside in that province. A decree of Parliament (Jan. 10, 1665) granted them a sojourn there of not more than three days, under penalty of being whipped and of having their merchandise, money, and chattels confiscated (Prud-

homme, *l.c.* p. 69). Jews lived in all the important places of Dauphiné, but the principal congregations were in VIENNE, NYONS, GRENOBLE, ST. SYMPHORIEN D'OZON, CRÉMIEU, MONTÉLIMAR, VALENCE, and ÉTOILE.

Jews were resident in the following places also:

Graisivaudan District: A Hebrew document dated Adar 6, 5106 (Jan. 30, 1346), states that the officers of the Jewish communities of the district had pledged themselves under oath to pay to the dauphin, in addition to their share of the money needful for the expenses of the country, such further taxes as should be levied upon them ("Revue Etudes Juives," x. 239, 240).

Crest or Crest-Arnault: Here, in 1296, R. Menahem ben Aaron copied the Pentateuch with the five Megillot and the Haftarat, for Jacob of Crest, son of Solomon the Saint, the martyr of Grenoble (Zunz, "Z. G." p. 208; Gross, "Gallia Judaica," p. 148).

Montauban: R. Eliezer ben Jehiel, מנחם, copied here, at the end of the thirteenth century, the manuscript of the "Semaḥ" now preserved at Paris (Gross, *l.c.* p. 318). The dauphin Humbert II. gave orders in 1339 to all his officers in the baronies of Montauban and of Meuillon to compel all the debtors of the Jews to settle their debts when due (Prudhomme, *l.c.* p. 19).

Serre: The wealthy Astrug Mancip, or Astrugon Mancip, one of the familiars of the dauphin Humbert II., lived here. In a document of the year 1346 he calls himself the dauphin's "garderium speciale" (Prudhomme, *l.c.* pp. 25, 76).

L'Albenc: The home of R. Solomon ben Eliezer Hayyim ha-Kohen, called "Diéau" or "Deuaye," who about 1340 copied the Pentateuch with Onkelos and the commentary of Rashi (Prudhomme, *l.c.* p. 18; Gross, *l.c.* p. 269).

Gap: The physician David Levi lived here. Raoul, lord of the manor of Gaucourt and governor of Dauphiné, granted him in 1445, on the recommendation of King René, Count of Provence and Forcalquier, the right to practise medicine in the baronies, the counties of Gap and Embrun, and the districts of Champsaur ("Revue Etudes Juives," ix. 261).

Peirins: Home of Moses, the surgeon, to whom the governor of Dauphiné in 1370 granted the unrestricted right to practise medicine in the whole province, "where the lack of physicians is daily deplored" (*ib.* ix. 251).

Jews also dwelt at La Salette (Carinoly, "Revue Orientale," iii. 460), La Tour-du-Pin, Villeneuve de Royban (Prudhomme, *l.c.* pp. 16, 58, and 76), Aouste, Oriol-en-Royan, Bordeaux, Communay, Albion, Tullins, Beaucroissant, St. Christophe, Chatte, Grane, Moutiers, Le Pont, Bourgoin, St. Sorlin, La Roche-sur-le-Buis, Moirans, Voiron, Roy bon, St. Nazaire, Laval, and Montrigaud ("Revue Etudes Juives," ix. 240-247).

All these communities have entirely disappeared. To-day in the ancient province of Dauphiné only a few Jewish families remain, and these are scattered at Grenoble, Valence, Nyons, and Valréus.

BIBLIOGRAPHY: Prudhomme, *Les Juifs en Dauphiné aux XIVe et XVe Siècles*, in *Acad. Delphinale*, xvii. 129 et seq.; idem, *Notes et Documents sur les Juifs du Dauphiné*, in *Revue Etudes Juives*, ix. 231 et seq.

DAVID.—**Biblical Data:** Second King of Israel; according to I Chron. ii. 15, the youngest of the seven sons of Jesse the Bethlehemite; or, according to I Sam. xvi. 10 et seq., xvii. 12, the youngest of eight sons. His adventurous career before he became king was evidently a popular theme in Israel; and so many incidents were woven around his early years that it is now impossible to construct a strictly historic account from the traditions preserved. David kept his father's sheep, and found opportunities to prove himself a dauntless defender of his charges. He was further noted for

David his poetic and musical talents; and

Consoles these determined his future. When

Saul. Saul fell into an incurable melancholy,

David was summoned to court to cheer the despondent king by playing upon the harp; and Saul became so fond of the young man that he selected him as his armor-bearer.

During the wars with the Philistines, which occupied most of Saul's reign, David distinguished himself so highly that he attracted the attention of all Israel. Saul gave him his daughter Michal for a wife; and the king's eldest son, Jonathan, became his intimate friend. David, however soon incurred the anger of the suspicious king, and had to flee in peril of his life. Thereupon the priests of Nob, who had innocently aided the fugitive, had to bear the brunt of the sick king's anger, and all but one—who escaped to David—were executed as traitors. David then placed himself at the head of a band of men daring and desperate. Eager to be of use to his countrymen, he relieved the city Keilah, which was threatened by the Philistines; but when Saul, regarding him as a rebel, advanced against him, David could make a stand only for a very short time.

After various adventures, during which he magnanimously spared the life of the king, David fled into the land of the Philistines, and became a vassal of King Achish of Gath, who assigned to him the city of Ziklag for a residence. He ruled here a year and four months, when the disastrous battle near the mountains of Gilboa ended the life and reign of Saul. These are the bare facts of David's early history, which in the second Book of Samuel are developed into a charming picture.

The unfortunate battle of Gilboa completely changed the situation. Saul and three of his sons lay dead on the field; Israel was prostrate; and the country west of the Jordan was again under Philistine rule.

At the Battle of

Gilboa. East of the Jordan, in Mahanaim,

Abner, Saul's general, founded a small kingdom for Saul's only surviving son, Ishba'al, or Ishbosheth, as the name is changed in Samuel; but this kingdom, too, was probably under Philistine suzerainty. David then determined upon returning to his own country; and after having opened negotiations in Ziklag with the tribes and families of Judea, he had himself anointed at Hebron as tribal King of Judea, without, however, giving up his relations as a vassal of the Philistines. This state of affairs lasted for seven years and six months; and when Abner attempted to conquer David's little kingdom for Saul's son, he was defeated at Gibeon by David's general, Joab. Afterward, owing to a

quarrel between them in connection with Rizpah, one of Saul's concubines, Abner left Ishba'al and went over to David, but was killed by Joab on pretext of a vendetta. Ishba'al, also, was murdered soon afterward. Since Mephibosheth, a young lame son of Jonathan, was now the only surviving male descendant of Saul, the districts lately ruled over by Ishba'al offered David—as the heir of Saul through his marriage with Michal—the throne made vacant by death; and, after a solemn election, David was anointed at Hebron as King of all Israel.

The duties of the newly anointed king were marked out for him by the conditions of the country. His first task was to shake off **King of All** the suzerainty of the Philistines and **Israel.** again make Israel an independent state. This undertaking was brilliantly accomplished by David. In a long series of fierce battles he "smote the Philistines and subdued them," and took Methg-ammah out of their hands

Concerning David's military and political achievements, there is but meager information: a few isolated facts, however, are known; and the interrelation of these can only

As a Conqueror. be conjectured. David subdued and made tributary to the new Israelitish kingdom the cognate tribes of Moab, Ammon, and Edom, as well as their neighbors on the northern frontier of Israel, the Arameans, who had joined the Ammonites in a war against David and his kingdom. Scanty as is the record of these wars, it indicates that they were not instituted for plunder or conquest; nor can it be proved that David was in a single instance the instigator. The Syrian-Ammonite war, the only conflict of which there is a detailed account, was occasioned by a frivolous provocation, the messengers of David having been wantonly insulted when on an errand of good-will and friendship (II Sam. x.).

David waged his wars vigorously, and did not hesitate to employ stern measures. His punishment of Moab and Edom was especially severe; but his alleged cruelties against the Ammonites rest on a misinterpretation of II Sam. xii. 31.

Thus, through David, the people of Israel, who only a generation before had submitted to the insults of the Ammonites (I Sam. xi. 2), became the ruling nation between the Nile and the Euphrates; and it seemed as if their king was to end his days in peace and in the enjoyment of the position he had attained. In the prime of life, however, and at the height of his fame, David sinned; and the inexorable consequences of his transgression plunged him into misery, and threatened even the stability of his kingdom. David's sinful connection with Bath-sheba, whose husband he indirectly assassinated, encouraged his eldest son, Amnon, to deal wickedly with his beautiful stepsister, Tamar; whereupon he was slain by Absalom, her full brother. Absalom had to flee, but was recalled at the intercession of Joab. Stung, however, by the ill-timed severity of his father, Absalom instigated a rebellion in David's former capital, Hebron. David, taken

Death of Absalom. completely by surprise, had to flee across the Jordan; but gaining time through Absalom's fatal delay, he gathered his old, well-trying troops about him, and easily dispersed Absalom's undisciplined bands at Mahanaim. Joab, with his own hand, killed the fleeing Absalom, against the king's express command.

David irritated the Israelites by unwise and one-sided negotiations with the Judeans, whose defection had evidently been a heavy blow to him; and this bitterness resulted in a conflict between the Israelites and the Judeans on the return march. This conflict, which took place at the Jordan, became so bitter that the Benjamite Sheba ben Bichri succeeded in urging Israel to a revolt, which Joab, however, immediately quelled. Sheba fled to the city Abel Beth-maachah, on the northern boundary of the kingdom; but the inhabitants seized him, cut off his head, and threw it over the wall to Joab.

The remaining years of David's life and reign were peaceful. The question of his successor, however, brought up new difficulties. Adonijah, the eldest of David's sons after Absalom's death, was generally

Traditional Tomb of David at Jerusalem.
(From a photograph by the American Colony, Jerusalem.)

(II Sam. viii. 1), so that they were no longer a menace to Israel. David's next solicitude was to provide another center for his new kingdom; for, aside from the ancient rivalry between Judah and Joseph, the position of Hebron, in the extreme south, made it impossible for David, as King of all Israel, to remain there. He therefore selected Jerusalem for his capital, that city being still in possession of the Canaanite tribe of the Jebusites, and consequently on neutral ground. Notwithstanding its almost impregnable position, he conquered the city, and made it the political as well as the religious center of Israel by transferring to it the old national shrine, the Ark of the Covenant, in a solemn procession with sacrifices, in which he himself figured prominently as a worshiper and celebrant. In memory of its migrations in the wilderness, the Ark was at first placed in a tent. According to II Sam. vii. 1-17, David thought of building a magnificent temple for it at Jerusalem, but was dissuaded by the prophet Nathan.

regarded as his heir, and David allowed him to appear officially as crown prince. The ambitious and intriguing Bath-sheba tried to secure the succession for her son Solomon, the youngest of David's children, and David, infirm and completely under Bath-sheba's influence, believed a report—whether true or false—that Adonijah, unable to await his father's death, had already proclaimed himself king and had received the oath of allegiance. David, therefore, solemnly presented Solomon to the people as his successor and had him anointed. Soon afterward he died, at the age of seventy, having reigned for seven years and six months at Hebron as tribal King of Judah, and thirty-three years at Jerusalem as the second King of all Israel.

K. H. C.

—**In Rabbinical Literature:** David, the "chosen one of God" (Ab. R. N. xliii.; ed. Schechter, p. 61), belonged to a family that was itself among the elect of Israel. His ancestors were the noblest of the noble, the great men of the most prominent tribe of Israel (Ruth iv. 18-22), and he was a descendant of Miriam, the sister of Moses, although this is not clearly stated in Scripture (Sifre, Num. 78; ed. Friedmann, p. 20b). The judges IBZAN and OTHNIEL were David's relations (B. B. 91a; Sifre, *l.c.*), and as the "ruler David" (David ha-Melek) continued the honorable traditions of his family, so the "pious David" was the son of a man who died sinless (Shab. 55b). Notwithstanding his piety Jesse's marital life was not untroubled; he intended even to liberate his favorite female slave and marry her, but his wife frustrated this design by disguising herself as the slave, and Jesse unwittingly married her the second time. The result of this union was David, who was passed off as the son of the slave, in order to leave Jesse in his error (Yalk., Makiri, ed. Buber, ii. 214; compare also Samuel Laniado's "Kele Ya'ar" to I Sam. xvii.). The supposed son of a slave, David was not educated with Jesse's other sons, but passed his days in the wilderness pasturing sheep (Yalk., Makiri, *l.c.*).

This pastoral life prepared him for the position he was to occupy. He treated the sheep entrusted to his care lovingly and tenderly, wherefore God said: "He understands how to pasture sheep; therefore he shall become the shepherd of My flock Israel" (Midr. Teh. lxxviii. 70; Ex. R. ii. 2; for a similar Arabic legend see Grünbaum, "Neue Beiträge," p. 193). In the lonely desert David also found opportunity to display his extraordinary strength and courage. Thus, in one day he strangled with his hands four lions and three bears that attacked his flock (Baraita of the Thirty-two Rules, iii.; Midr. Sam. xx.). David was once in great danger when he came upon a gigantic reem asleep. Taking it for a high mountain, he tried to climb it; but the animal awakened suddenly, and David found himself lifted high up into the air on its horns. David now vowed to God to build a temple 100 ells high—as high as the horns of the reem—if He would save him from the beast, and God thereupon sent a lion, which, as "king of the animals" (compare Hag. 13b), exacted respect even from this gigantic beast, which fell down before the lion, enabling David safely to

alight. Then a deer came, which the lion immediately pursued, so that David escaped both from the reem and the lion (Midr. Teh. xxii. 22). David's pastoral life ended in his twenty-eighth year, when Samuel anointed him king (Yalk., Makiri, *l.c.*; compare also Seder 'Olam R. xiii.).

The prophet thought at first that Eliab, David's eldest brother, was destined by God to be king, but it was indicated to him by means of the holy oil that David was the chosen one. When Samuel attempted to pour oil from the vessel upon each of David's brothers in succession, the oil remained in the vessel; but when David's turn came it flowed freely of itself; the drops that fell on his garments changed immediately into diamonds and pearls; and when the anointing was finished the horn was as full as before. David's mother now came and revealed the secret that had been kept for so many years, and his father and brothers learned that he was not the son of a slave (Yalk., Makiri, *l.c.*; Yalk. ii. 124 contains only a part of this legend; also Ephraem Syrus in his commentary to I Sam. xvi. 13, ed. Benedictini, p. 365; compare Ginzberg, "Die Haggada bei den Kirchenvätern," i. 27, 28). Although the anointing was kept secret, its effects became evident in David's remarkable spiritual development, for he received even the gift of prophecy (Josephus, "Ant." vi. 8, § 2; Sanh. 93b). He thereby excited the envy of many, especially of DOEG, who tried to prevent King Saul from calling David to his court (Sanh. *l.c.*; compare DOEG IN RAB. LIT.). Saul became acquainted with David while the latter was still a boy, and grew attached to him, especially because of the cleverness he displayed on the following occasion: A woman who had to leave her home, and was unable to take her money with her, hid the gold pieces in barrels of honey, which she left in the care of a friend. The latter discovered the money, took it, and restored to the woman on her return only the honey. The woman brought the case before Saul, but as she could not prove her assertion the case was dismissed. When David, who was then a little boy playing before the king's house, heard the story, he undertook to convict the thief. At his suggestion the king commanded the barrels of honey to be broken, and two coins which the thief had not noticed were then found on the bottom, the theft being in this way proved (Jellinek, "B. H." iv. 150, 151, and in various "ma'asch" collections).

David could enjoy the peace of court life only for a short time, as Goliath's appearance forced Saul into war. The sick king gladly accepted David's offer to march in his place against the blasphemous heathen (compare GOLIATH IN RAB. LIT.), and when little David put on the great Saul's armor and found it to fit him perfectly, Saul recognized that David was intended for a higher mission. This change in David was due to the "holy oil" with which he was anointed; hence Saul became jealous of him, and David refused for this reason to go to battle in the king's armor (Tan., ed. Buber, iii. 84). Five stones came of themselves to David (Midr. Sam. xxi.), and when he touched them they changed into one stone (Zohar, Deut. 272). With them he intended to slay

Goliath, for they symbolized God, the "three fathers" of Israel, and Aaron, whose descendants Hophni and Phineas had been killed shortly

David and Goliath. before by Goliath (Midr. Sam. *l.c.*; the Midrash quoted by Kimhi to I Sam. xvii. 40 is somewhat different).

As soon as David glanced at the giant the latter was struck with leprosy and rooted to the ground so that he could not move ("Zara'at"; Pesik., ed. Buber, p. 175; see also Zohar, Num. p. 206, and parallel passages quoted by Buber). When David called out to Goliath "I shall give your flesh to the birds of heaven," Goliath looked up at the word "birds," the movement displacing his head-dress; and at the same moment the stone flung by David struck the giant's exposed forehead (Midrash quoted by Kimhi *ad loc.*; differently in Midr. Teh. lxxviii.). As Goliath was armed cap-a-pie, David was at a loss how to cut off his head. Uriah offered to help David if the latter would give him a Jewess for wife, and when David consented Uriah showed him how the ends of the bands that held the armor together were joined across the soles of Goliath's feet. David gave Bath-sheba to the Philistine, and she became later a source of much trouble to him, because he had had so little regard for the dignity of a Jewess (Midr. quoted by Alshech to I Sam. xvii. 50, and by Samuel Laniado to II Sam. xii.). David's victory over Goliath increased Saul's jealousy, who closely inquired into David's origin through his general Abner, in order to find out whether he really was a descendant of Pharez, for in that case Saul feared to see in David the future king. David's old enemy Doeg tried to prove that David being a descendant of the Moabitess Ruth, could not be regarded as a legitimate member of the Jewish community; the prophet Samuel, however, decided that the Biblical interdiction (Deut. xxiii. 3, 4) referred only to the men and not to the women of that people (Midr. Sam. xxii.; Ruth R. iv. 4; somewhat differently Yeb. 76b, 77a, and Ephraim Syrus, *l.c.* 379; compare Ginzberg, *l.c.* pp. 32, 33).

David did not remain long with Saul, being obliged to flee from him shortly after Goliath's death. God did not abandon him, however, and not only saved him from his enemies, but also instructed him how to rule the world justly and wisely. Thus, David once had an opportunity to find out that even lunacy, which he thought served no purpose, had its place in the plan of the universe, for he owed it to his fictitious madness that he was not slain by Goliath's brothers, who formed the body-guard of King Achish (see **ACHISH** IN RAB. LIT.; Midr. Teh. xxxiv. 1; Yalk. ii. 131, with variants; Second Alphabet of Ben Sira, ed. Venice, p. 24). He was compelled to change his mean opinion of the spider in his flight before Saul, when he was hiding in a cave, and his pursuers, seeing a spider's web across the front of the cave, thought it useless to enter; for God had commanded the spider at that moment to give a proof of its usefulness (Ben Sira, *l.c.*; partly in Targ. to Ps. lvii. 3; compare Levy, "Chal. Wörterb." i. 48). David had a wonderful, and at the same time instructive, escape when he seized the water-flask of Abner (see

I Sam. xxvi. 7), and found himself caught between the legs of this giant as between two pillars; for a wasp stung Abner, who mechanically moved his feet, releasing David, who now recognized that even an apparently noxious insect can sometimes render service to man (Ben Sira, *l.c.*). Other miracles that David experienced in his flight before Saul were: the appearance of the angel informing Saul, who was about to seize David, that the Philistines were coming into the country (I Sam. xxiii. 26), whereupon Saul was obliged to give up the pursuit (Midr. Teh. xviii.); and the heavenly aid sent to David on his expedition against the Amalekites (I Sam. xxx. 17 *et seq.*), when the night was illuminated by lightning, thus enabling David to end the battle speedily (Lev. R. xxx. 3; Midr. Sam. xviii.).

David's first thought on coming to the throne was to capture the ancient holy city of Jerusalem from the Jebusites. He did not fear the power of these heathen, but he did fear the covenant Abraham had made with their ancestors, the words of which were engraved on bronze figures

(Pirke R. El. xxxvi.; compare **JEBUSITES** IN RAB. LIT.). The city was furthermore surrounded by a high wall, and David could enter only after the wall had miraculously lowered itself (Midr. Teh. xviii.; compare **JOAB** IN RAB. LIT.). Although the Jebusites could not appeal to the promise given to them by Abraham, because they had attacked the Jews in the time of Joshua, yet David would not seize the holy city without indemnifying them for it (Pirke R. El. *l.c.*). After the capture of Jerusalem David marched against the Philistines in the valley of Rephaim (II Sam. v. 22 *et seq.*), and God commanded him to attack his enemy only after seeing the tree-tops bend, for God would judge the guardian angel of the heathen before giving the latter into the hands of the pious, and David was notified by the movement of the tree-tops (pseudo-Jerome commentary on II Sam. v. 24; compare Ginzberg, *l.c.* p. 125). On this occasion the pious king showed his great confidence in God, for there were only four ells between the two armies, and David had to use his utmost authority to make his followers refrain from battle, declaring that he would rather succumb in obeying God than conquer and be disobedient. He had hardly uttered these words when the tree-tops began to move, and he attacked the Philistines victoriously; whereupon God said to the angels: "Behold the great difference between him and Saul!" (compare I Sam. xiv. 19; Midr. Teh. xxvii.). The Philistines thought that David would not war against them, because they possessed a pledge—namely, the bridle of a charger that Isaac had given to Abimelech, the king of the Philistines, as a covenant (Pirke R. El. xxxvi.)—and the Arameans thought the same, as they possessed the "mazzebot" which Jacob and Laban had erected as covenants. The Sanhedrin, to whom David applied, decided that he was not obliged to keep the covenants of the fathers with the heathen, because the Philistines of David's time were not the descendants of the ancient inhabitants of the country, but a new people that had come from Caphtor (see **AMOS** ix. 7); and the Arameans had lost all right to the covenant

between Laban and Jacob on account of their attacks on Israel at the time of Moses and Joshua (Midr. Teh. lx.; Pirke R. El. l.c.).

David was not only a warrior, but also a wise and energetic ruler. Shortly after his accession he appointed not less than 90,000 officials, but he made the mistake of omitting the wise Ahithophel, for which both paid dearly later, as it was principally

David's curse that brought about

David as Ruler. Ahithophel's tragic end (Yer. Sanh. x. 29a, end; abbreviated in Suk. 52b, 53a; compare AHITHOPHEL IN RABBINICAL LITERATURE; PSALMS). Although he was king, he yet modestly asked counsel of his teachers Ira of Jair (M. K. 16b) and Mephiboshet regard-

posed new ones. When he had finished he exclaimed: "O Lord of the world, is there any creature in the world that has praised Thee so much?" Whereupon God sent a frog to inform him that this mean little animal sounded the praise of God uninterruptedly from early dawn till late at night (Yalk. ii. 889, end of Ps.). David, however, forgot himself so far as to boast only for a moment; generally he was very modest (Sotah 10b). His coins showed on one side his shepherd's crook and scrip, and on the other David's tower (Gen. R. xxxix.; *contra*, B. K. 97b).

David's piety was so great that his prayers were able to bring things from heaven down to earth (Hag. 12b). It was one of his dearest wishes to build the Temple. God said, however, that the

DAVID PRAYING.

(From a Passover Haggadah, Vienna, 1823, in the possession of J. D. Eisenstein.)

ing his decisions in ritual questions (Ber. 4a). He devoted so much time to the study of the Torah and to prayer that he was satisfied with "sixty breaths of sleep" (Suk. 26b). As soon as midnight had come the strings of his harp, made from the entrails of the ram that Abraham had sacrificed on Mount Moriah in place of Isaac, vibrated, and at the sound the king awakened and began to study the Torah (Ber. 3b; Yer. *ib.* i. 2d; Pirke R. El. xxi.). David also devoted much time to prayer, the one hundred daily benedictions being his work (Yer. Ber., end; on the ancient reading of this passage, see Ratner, "Ahabat Ziyyon we-Yerushalayim," *ad loc.*). He also collected psalms from the time of Abraham down to his own day (B. B. 14b), and com-

posed new ones. When he had finished he exclaimed: "O Lord of the world, is there any creature in the world that has praised Thee so much?" Whereupon God sent a frog to inform him that this mean little animal sounded the praise of God uninterruptedly from early dawn till late at night (Yalk. ii. 889, end of Ps.). David, however, forgot himself so far as to boast only for a moment; generally he was very modest (Sotah 10b). His coins showed on one side his shepherd's crook and scrip, and on the other David's tower (Gen. R. xxxix.; *contra*, B. K. 97b).

David's Piety. David could not build it (Pesik. R. 2; ed. Friedmann, p. 7). David's thoughts

were so entirely directed to good that he was among the few pious ones over whom evil inclinations ("yezer ha-ra'") had no power (B. B. 17a), and his sin with Bath-sheba happened only as an example to show the power of repentance ('Ab. Zarah 4b, 5a). Some Talmudic authorities even assert that David did not commit adultery, for at that time all women obtained letters of divorce from their husbands who went to war, to use in case the latter should die on the field. Similarly David must not

be blamed for Uriah's death, since the latter had committed a capital offense in refusing to obey the king's command (II Sam. xl. 8, 9; Shab. 56a; Kid. 43a). The episode with Bath-sheba was also a punishment for David's overweening self-confidence, who thought himself equal to the "three fathers," and besought God to subject him to a trial that he might be able to prove the purity of his heart. God thereupon sent to him Satan in the shape of a bird; David threw an arrow at the latter, hitting instead a beehive under which was Bath-sheba, and on beholding her the king was at once violently enamored of her (Sanh. 107a). He spent twenty-two years in repenting this sin (Tanna debe Eliyahu R. ii.); and he also was stricken with leprosy for half a year, during which time he was abandoned not only by his own court, but by the Holy Spirit, in punishment for his sin (Yoma 22b; compare Ginzberg, *l.c.* pp. 43-46).

The most severe punishment, however, was Absalom's revolt; and it is a proof of David's great confidence in God's goodness that he thanked Him for sending his own son against him rather than a stranger, as the former might have been more inclined to be merciful to him if things had come to the worst (Ber. 7a). In his despair, however, David was about to deny God publicly, in order that the people might not call God unjust for so poorly rewarding David for his piety and justice. His friend Hushai the Archite came in time to show him that his punishment was not unmerited, and would not appear as such to the people, for it may be gathered from Scripture (Deut. xxi. 10 *et seq.*) that he who follows his passion and marries a captive of war must expect from this marriage a "stubborn and rebellious son." If David had not married Absalom's mother, who was a captive, he would not have had such a son (Sanh. 107a). David's kindness of heart is clearly shown in his behavior toward this wayward son, for he not only tried to save the latter's life, but the sevenfold repetition of Absalom's name in his dirge had the effect of saving him from the seven fires, or divisions, of hell (Sotah 10b). Still David's sins were not atoned for by all these sufferings, and God one day gave him the choice between having his race destroyed and being taken prisoner by enemies. David chose the latter.

Thereupon it happened that David, pursuing a deer (Satan in disguise), was led into the country of the Philistines, where he was seized by Ishbi-benob, Goliath's brother, who flung him into a wine-press. David was confronted by a horrible death, when the bottom of the press began to sink miraculously, so that he was saved from being crushed. Then he was rescued from his perilous position by Abishai, who was apprised, also miraculously, that David's life was in danger (see ABISHAI IN RAB. LIT.); these two pious men conquered the giant Ishbi by pronouncing the name of God (Sanh. 95a; Jellinek, "B. H." iv. 140, 141). Among the trials of David was also the famine of three years (II Sam. xxi. 1 *et seq.*), which he regarded at first as a punishment for the godlessness of the people, and therefore examined the religious and moral conditions of the country for three successive years (Midr. Sam.

xxviii. and the parallel passages in Buber *ad loc.*). When he found everything in good order he applied to God to find out the cause of the famine, and was informed that it was a punishment for not allowing the remains of Saul, "the anointed of God," to rest in holy ground. David thereupon brought the remains of Saul and Jonathan to the spot worthy of them, all the people taking part in the ceremony; and this love that Israel showed to its dead king induced God to take pity on them and end the famine (Pirke R. El. xvii.). Another debt of the people had still to be paid; namely, Saul's unmerciful behavior toward the Gibeonites, who now insisted on taking vengeance on his descendants. David tried his best to pacify them, conferring with each, and promising them as much money as they might demand. But when he saw that the Gibeonites possessed so little of the characteristic trait of the Israelites—mercy—he ordered them to be excluded from the Jewish community (Midr. Sam. *l.c.*). Although David was responsible neither for the famine nor for the execution of the descendants of Saul who were delivered to the Gibeonites, yet he was wrong in not employing for the relief of the sufferers during the famine the treasure that he had accumulated during many years, especially the gifts of gold presented to him by the women of Israel after his victory over Goliath. It would have been better to use them for that purpose than to save them for the building of the Temple, and God said therefore that he should not build it (Midr. Ruth Zuta, ed. Buber, p. 51). David is also censured for undertaking the census of the people, and is punished by a plague (II Sam. xxiv. 15) that, though lasting only a few hours (Ber. 62b; compare Ginzberg, *l.c.* p. 67), demanded many victims, among whom four of his sons, and the elders accompanying him, were slain by the angel; the latter even wiped his bloody sword on David's garments, causing thereby the trembling from which David suffered before his death (Tanna debe Eliyahu R. vii.). This trembling was a punishment for having cut the garment of Saul (I Sam. xxiv. 5); David now found no warmth in the garments that he wore (I Kings i. 1; Ber. 62b; compare Midr. Teh. lvii.).

When David saw his end approaching he tried to escape death by the following means: God had once revealed to him that he would die on a Sabbath, and David therefore spent every Sabbath in studying the Torah, so that the angel of death could not seize him.

But the angel outwitted him by causing a noise in the royal palace; whereupon David interrupted his work for a moment, and went to a stairway. The stairs broke down, and David fell dead (Shab. xxx; Ruth R. i. 17). He died on a Sabbath and feast-day—Pentecost—and as no corpse might be moved on Sabbath, and David's body lay in the sun, Solomon called eagles, who guarded the body with their wings (Ruth R. *l.c.*). David reached the age of seventy years, which were presented to him by Adam. David had been destined to die immediately after his birth, but when God was showing the future generations to Adam, the latter offered to give seventy years of his life to David (Pirke R. El. xix.; Yalk. i. 41). Death did not put an end to

David's greatness and splendor, for he was also among the elect in paradise (Jellinek, "B. H." v. 168; vi. 25, 26), and on the Day of Judgment he will pronounce the blessing over the wine during the great feast (Pes. 119b; compare CUP OF BENEDICTION). On the Day of Judgment David will also recite a psalm; the pious in paradise and the impious in hell will loudly say "Amen"; and then God will send an angel to bring even the impious to paradise (Jellinek, "B. H." v. 45, 46).

L. G.

—**In Mohammedan Literature:** Nearly all the legends relating to David (or Da'ud, as he is known to the Arabs) are elaborations of the Biblical narratives which were in circulation among the Jews at the time of Mohammed, and most of which may be traced back to the Koran or its commentaries. Other works which speak of him are the "Khasim" of Husain ibn Mohammed, the "Kis̥sat al-Anbiya'," the "Dhakhirat al-'Ulum wa-Natijat al-Fuhum," and the "Ta'rikh Muntakhab."

To the Arabs these legends are important, as they form for them a real part of the world's history; and it is interesting to see how they are woven together and connected in a natural sequence. The very stones with which David kills

David and Goliath. Goliath are historical: one is the stone which Abraham threw at the devil when the latter tried to dissuade him from sacrificing Isaac; another is that which Gabriel pushed out of the ground when he created the spring for Ishmael; another again is the stone with which Jacob fought the angel sent against him by his brother Esau. After killing Goliath, David shares the kingdom with Saul, finally conquers his jealousy through his own generosity, and lives happily with him until Saul's death, when David is unanimously elected king. Baiḍawi remarks that the children of Israel were united for the first time under David.

In addition to the kingdom, God grants David wisdom—interpreted to mean prophecy and the Psalms—and teaches him all he wishes to know; viz., the language of birds and stones, and how to make coats of mail. According to the Arabs, David was the inventor of chain armor, which he was enabled to make because the iron became soft in his hands. "It became like wax," says Baiḍawi, "so that he could mold it into any form he chose." It is related that David obtained this gift in the following manner: One day he overheard two angels, in the guise of men, comparing opinions about him.

David's Knowledge. "He would be a perfect king," said one, "did he not take money from the public treasury"; whereupon David begged God to provide him with some means of self-support, and he was granted knowledge of the art of making armor.

At another time David overheard two men disputing as to the comparative merits of himself and Abraham; one of them contending that David had never endured such trials as had Abraham. David thereupon begged God to try his faith, and God sent a marvelous bird, which led David to a lake, on the shore of which he saw a beautiful woman bathing. This was none other than Bath-sheba, called "Saya"

by the Arabs. After causing the death of her husband and marrying her, as related in the Bible, David is rebuked by two angels disguised as men, who tell him the story of the one ewe lamb, and demand judgment. In the Koran these angels come upon David on a day when the doors are closed; and on this Baiḍawi remarks that David so divided his time as to spend one day for devotion, one for giving judgment, one for preaching, and one for his own affairs. He also fasted every other day, and spent half the night in prayer. David was so filled with remorse that he wandered for three years in the desert, and shed more tears in that time than all humankind before him. During David's absence Absalom had made himself king, and had to be deposed.

After this experience, David never had confidence in his own judgment; and God therefore gave him a miraculous bell, which rang to show

David as Judge. the guilty party. As on one occasion he lost confidence in this also, it was taken away from him; and David

called the boy Solomon to his aid in matters of justice. Wonderful tales are told showing the sagacity of this lad, then scarcely in his teens.

As David grew old he had only one more desire; namely, to see his future companion in paradise. This request is also granted; and after long wanderings David finds him on the summit of a mountain, on a verdant spot moist with his tears. This companion dies, and is buried by David, who on returning home finds the angel of death waiting for him also.

M. W. M.

—**Critical View:** The salient features of the life and reign of David as outlined from I Sam. xvi. to I Kings ii. have been given above; and the most incisive criticism has been unable to modify any essential point of the narrative, which rests upon a strictly historic foundation. A far different impression of David is given in I Chronicles. Everything doubtful and offensive in regard to David and his house is here passed by, and he himself appears primarily as being preoccupied with the organization of the Temple service. He is said to have gathered together all the material for the building of the Temple, and to have planned every detail, so that Solomon merely had to carry out the work. He also arranged every part of the ritual, and distributed the various offices. The priests he divided into twenty-four families, who performed the service in the sanctuary according to lot. From among the Levites were chosen: (1) the Temple musicians, also divided into twenty-four classes; (2) the functionaries designated for subordinate service in the Temple, as door-keepers and overseers of supplies, chosen by lot according to their families; (3) judges and officials over Israel. The chronicler also mentions ordinances of David pertaining to military matters and to the royal domains.

Subsequently David came to be regarded as the

founder of Israel's religious poetry. For since seventy-three of the Psalms have special superscriptions assigning their authorship to **David** and him, it became more and more the custom to ascribe the whole Psalter to him. Modern criticism has raised well-founded objections to this assumption. Indeed, the only generally recognized authentic specimen of the king's poetic activity is the splendid dirge on the deaths of Saul and Jonathan (II Sam. i. 19-27).

David's historic importance can not be rated too high, as even those critics must admit who belittle his personal merits by ascribing his successes to a series of extraordinarily fortunate circumstances. Few men in the world's history have achieved as much as David. The molding of Israel into a nation is exclusively his work, for he was the first to unify what until then had been merely a conglomerate of clans and tribes; and Israel remained one nation even after the division of David's single kingdom. Saul had earnestly endeavored to give political unity to Israel; but he had been unequal to the task, and achieved nothing permanent. With Saul's death everything was lost, and the condition of the people was as hopeless as ever. David, in whom prudence and courage were most happily combined, and who was as careful and circumspect in the preparation of his plans as he was daring and energetic in their execution, followed up his successes with a definite end in view; and while aiming only at the attainable, did not rest until he had reached his goal. In view of the immense difficulties he had to overcome and of the crude and complex conditions which he was called upon to meet, the secret of David's success must be sought in his personality. He made himself the living center of his people and of his kingdom. A born ruler of men, and possessed of a royal nature that attracted and led all that came within his influence, he awakened the national enthusiasm, and thereby overcame every obstacle. For David not only made Israel a nation, but also elevated it at once to the pinnacle of glory. Israel itself has felt this; and therefore the return of a David has become the dream of its future and the object of its most ardent hopes.

David's character has often been criticized unfavorably because his critics have not taken the trouble to consider him in relation to his time. It is undeniable that he was the idol of his contemporaries, and that the power of his magnetic personality was irresistible. He was not a saintly character; and the Biblical accounts, with a nice regard for truth, have neither suppressed nor palliated his faults and weaknesses. Still, only blind prejudice will deny that his nature, in its essence, was noble and that he was animated and guided by true piety and a childlike faith in God. Even in modern times it is easy to understand how his contemporaries saw in him "the king after the heart of God."

K. H. C.

DAVID, CITY OF. See JERUSALEM.**DAVID:** Oriental rabbi; lived at Mosul toward the end of the twelfth century. He was a nephew of the exilarch Daniel b. Solomon (S. Jona writes

"Daniel b. Samuel"; also called "Daniel ben Hasdai"), who died in 1175, leaving no male offspring. David contended for the position of exilarch with his cousin Samuel; but while they were thus contending, Samuel b. 'Ali ha-Levi anticipated both and obtained the office.

Certain authors identify this David with David b. Hodaya, exilarch of Mosul, and think that Al-Harizi mentions him ("Taḥkemoni," ch. 46). Pethahiah ("Sibbub," pp. 9, 17, St. Petersburg, 1881) says that when he went to Mosul (1176) he found there the nasi R. David, together with his cousin R. Samuel, who did not succeed in becoming exilarch after Daniel's death. See **DAVID BEN HODAYA**.

DAVID: A family which played an important part in the earlier annals of the Canadian Jews.

Aaron Hart David: Second son of Samuel David; born in Montreal 1812; died there 1882. He became noted as a physician and communal worker. A licentiate of the Royal College of Surgeons in 1834, he graduated at the University of Edinburgh in 1835, taking up the practise of medicine at Montreal. He became dean of the medical faculty and professor of the practise of medicine at the University of Bishop's College, and governor of the College of Physicians and Surgeons of Lower Canada. David was a prominent member of the Medico-Chirurgical Society of Montreal and a member of the British Association for the Advancement of Science. He held the degree of D.C.L., and was honorary general secretary of the Canada Medical Association. He was for many years president of the Spanish and Portuguese Congregation Shearith Israel of Montreal, in the affairs of which he took a deep and active interest. He was also one of the earliest members of the volunteer military forces of Canada, and served with the Montreal Rifle Corps in the rebellion of 1837-38. He joined the troops sent to the front to repel the Fenian raid in 1866, acting as surgeon to the Hochelaga Light Infantry. David married Catherine Joseph, a daughter of Henry Joseph of Berthier, and had several sons and daughters. Three of his sons were members of regiments which saw service during the Fenian disturbances.

David David: Eldest son of Lazarus David. Born at Montreal Oct. 14, 1764; died there Nov. 30, 1824. He was one of the most prominent citizens of Montreal, and was one of the founders, and a member of the original board of directors, of the Bank of Montreal, the largest financial institution in Canada. He devoted much of his considerable wealth to philanthropic objects, and took a keen interest in the affairs of the Spanish and Portuguese congregation of Montreal, giving it the use of a plot of land for the erection of its first synagogue; this was built in 1777, and was the earliest Jewish place of worship in Canada.

Lazarus David: The first member of the David family to settle in Canada; born in Swansea, Wales, in 1734; died in Montreal Oct. 22, 1776. He went to Canada about the time of the British conquest, and took up his residence in Montreal in 1763. He

was one of the founders of the Spanish and Portuguese Congregation Shearith Israel of Montreal, and was one of the most active organizers of the earliest Canadian-Jewish community. He also took a prominent part in the political affairs of his day, and was an extensive landowner in Montreal. His is the oldest Jewish grave in Canada. He was married in Rhode Island, in 1761, to Phoebe Samuel, who was born in England in 1736 and died at Montreal in 1786. He had three sons, David, Samuel, and Moses, who were all prominent in Canadian communal affairs, and two daughters, Abigail and Fanny (Frances). Abigail married Andrew Hays, one of the early Jewish settlers of Canada, and had issue. Fanny married Myer Michaels, but had no issue.

Moses David: The youngest son of Lazarus David; born 1767; died 1814; married Charlotte, a daughter of Commissary Aaron Hart. He was active in the political life of his times and was a communal worker of note. He had a son, **Moses Eleazar David**, born in 1813, who laid the corner-stone of the second synagogue of the Spanish and Portuguese congregation of Montreal in Chenneville street in 1835.

Samuel David: Second son of Lazarus David; born at Montreal Oct. 22, 1766; died there 1824. He married, in 1810, Sarah, daughter of Commissary Aaron Hart of Three Rivers. A prominent Jewish communal worker, he took an active part in the affairs of the Shearith Israel congregation of Montreal. Although engaged in extensive mercantile pursuits, he joined the British forces on the outbreak of the war with the United States in 1812, and had a distinguished military career. His diary, covering the latter part of the eighteenth and the opening years of the nineteenth century, furnishes many pictures of early Jewish colonial life. He had four sons and three daughters. Two of his sons were prominent as cavalry officers in the rebellion of 1837-38, notably at the battles of St. Charles and St. Eustache.

Tucker David: The third son of Aaron Hart David; took up his residence in New York, and was active in the affairs of the Spanish and Portuguese congregation of that city.

DAVID BEN AARON IBN HUSAIN: Moroccan poet; lived in the second half of the eighteenth century. At the end of a collection of dirges of Moroccan poets written in commemoration of the destruction of the Temple, there is one composed by David in 1790, in which he describes in vivid colors the persecutions of the Moroccan Jews in that year in consequence of the death of the sultan Muley Sidi Mohammed. The dirge is interesting for the data it contains regarding these persecutions.

I. BR.

DAVID BEN ABRAHAM (Arabic name, **Abu Sulaiman Da'ud al-Fasi**): Karaite lexicographer of the tenth century. His surname "al-Fasi" shows that he came from Fez. From a reference by Abu al-Faraj Harun ("Rev. Et. Juives," xxx. 252; compare Pinsker, "Likkute Kadmoniyot," i. 183), and from the fact that Saadia is quoted by him, it is concluded that he flourished in the second half of the tenth century. During that century Fez produced two other authorities on Hebrew philology; namely, Dunash b. Labrat and Judah b. David Hayyuj. It was to the congregation of Fez, also, that Judah b. Kuraish, about the beginning of the tenth century, directed his epistle embodying the first systematic application of comparative philology to the elucidation of Biblical Hebrew, a method largely followed by David b. Abraham and the two previously mentioned philologists.

David's lexicon, written in Arabic, of which two manuscript copies are extant, is called "Agron," as Abu al-Faraj Harun and Ali b. Sulaiman attest. One of Saadia's works bears the same title. According to the somewhat defective introduction, the Arabic title, "Kitab Jami' al-Alfaz" (Book Containing a Collection of Words), is a translation of the Hebrew title "Agron."

The copious extracts which Pinsker and Neubauer have furnished from this book afford a definite idea of its nature and contents. The introduction contains general rules on Hebrew word-formation and on the functions of the various letters. The roots

The "Agron." are classified according to the number of letters which they contain. The lexicon is divided into twenty-two parts, each part being introduced by a brief essay on the functions of particular letters where their use is functional, and on their importance as single-letter roots where they are so used. Neither his views on grammar nor the grammatical terms given go beyond those found in the works of Saadia and Ibn Kuraish (for David's grammatical terminology see the notes to Bacher, "Die Grammatische Terminologie des Jehuda Hajjug"). The comparison of the Hebrew and the Arabic is an important part of the lexicon, and agrees generally with the "Risalah" of Ibn Kuraish, a work with which David was familiar, although he makes no special reference to its author. A peculiarity of David's work is his view that words explainable by the Arabic are in reality Arabic words which have been taken into the Biblical vocabulary (see Bacher, "Die Hebräisch-Arabische Sprachvergleichung des Abu al-Walid," pp. 71-78).

In his other etymological analyses the interchange of consonants occupies a very important place. He rarely quotes the Aramaic for comparison, but gives the preference to the Neo-Hebraic words of the Mishnah and the Talmud. The Targum he refers to frequently, but in a polemic spirit, mentioning Onkelos the Proselyte as author of the Targum to the Pentateuch, and Jonathan b. Uzziel as author of that to the Prophets. He also refers to the Masorah, and mentions a number of accents. As to the Biblical text, he accepts the traditions of the college of Tiberias as authoritative, and applies to their pure and elegant language the expression "goodly

words," found in the blessing of Jacob (Gen. xlix. 21).

David's Karaite proclivities are evident from the fact that in a number of passages he indulges in polemics against the Rabbis, quoting

Karaite Saadia simply as the "Fayyumite." **Tendencies.** He cites no other author, alluding only in a general way to the Biblical exegetes ("mufasssirin") and the grammarians ("dik-dukiyyin"). On one occasion, in connection with an explanation of a Biblical passage, he makes an attack upon Mohammed and Mohammedanism, which attack, however, is judiciously made in Hebrew. In addition to critical comments on Biblical passages, the lexicon of David contains numerous exegetical discussions not directly bearing upon his etymological analyses. On one occasion he refers to a commentary on the Psalms, and on another to a commentary on the Song of Solomon, neither being elsewhere mentioned by him. In the "Introduction to the Decalogue," falsely ascribed to Solomon b. Yeruham, a work on punctuation ("tanqit") by David b. Abraham is cited.

A compendium of David's lexicon is said to have been prepared by Abu Sa'id b. al-Hasan al-Basri (Levi b. Japheth) at the close of the tenth century. This is the view of Ali b. Sulaiman, who employed this edition for his own lexicon; but according to Abu al-Faraj Harun, David himself prepared a compendium ("Rev. Et. Juives," xxx. 252).

DAVID BEN ABRAHAM HA-LABAN:

French religious philosopher and cabalist; lived after 1200. His grandfather, Judah, was rabbi of Coucy-le-Château. David was the author of "Masoret ha-Berit" (The Bond of the Covenant), on the existence, the unity, and the attributes of God, and also on creation and its purpose (Paris MSS. Nos. 800, 871). The fact that the work exists in several manuscript copies shows that it was much read.

I. BER.

DAVID B. ABRAHAM MODENA. See MODENA, DAVID B. ABRAHAM.

DAVID B. ABRAHAM PROVENÇAL (PROVENZALE): Italian scholar; born before 1538; eulogized by the greatest of his contemporaries as the most eminent preacher of his century and as a prominent scholar. He and his brothers Moses and Judah were leading members of the congregation in Mantua. A friend of Azariah dei Rossi, and, like him, thoroughly familiar with the humanitarian tendency of his time, David was the first among the Jews to refer to the works and the importance of Philo; thereby strongly influencing the researches of Azariah, who was the founder of historical criticism in Jewish literature.

In a student's prospectus which has been preserved, David recommends the study of Latin and Italian. In his "Dor Haflagah," no longer extant,

he endeavored to prove that more than 2,000 foreign words in Greek and Latin are of Hebrew origin; but the few etymologies preserved in Dei Rossi's "Me'or 'Enayim" are somewhat daring.

David was the author of: "Ir Dawid," a commentary on the Pentateuch; a commentary on Canticles; "Migdal Dawid," a work on grammar; and "Hassagot," a defense of Philo against the "Me'or 'Enayim."

In general, David seems to have been averse to study toward the end of his life; it is true that he is said to have complained in 1564 of those who busied themselves with the theater and the secular sciences, but this was probably only one of the characteristic inconsistencies of the time. In 1565 David was employed as corrector of Arama's "Akedat Yizhak," a work issued in Venice. He was living in 1572, the year in which Azariah dei Rossi composed his "Me'or 'Enayim." None of his works has been preserved.

DAVID BEN ABRAHAM SHEMARIAH:

Cabalistic writer; lived at Salonica toward the end of the sixteenth century. He wrote "Torat Emet" (The True Law), which is an abridgment of the section on Genesis in the Zohar, with a commentary and glossary. Afterward he found a copy of the Zohar Hadash (Salonica, 1597), and added the contents of some of the parashiyot to his work. At the end of the book there is an appendix called "Tokahah" (Warning), which Steinschneider supposes to be intended for "Miftahot" (Index). This work was printed at Salonica in 1604.

DAVID OF ARLES, MAESTRO: Rabbi of Avignon in the sixteenth century. He figured prominently in a casuistic question which agitated the rabbis of Provence, Italy, and Palestine.

The two brothers Isaac and Jacob Gard, learned rabbis of Lisle (Comtat-Venaissin), led astray by a misprint in the rabbinical code "Eben ha-Ezer," had sanctioned a marriage which was really forbidden. The rabbis of Avignon, led by David and his son-in-law Boniaquet (or Bonisac) de la Roque, supported by Isaac ben Immanuel de Lattes of Bologna and his friend Abraham, son of Aaron of Rome, strongly protested against the decision. All endeavors proving fruitless, and being weary of disputation, the protestants finally appealed to the supreme authority of Joseph Caro, who, together with his rabbinical college, upheld Maestro David and his friends, and pronounced on two occasions (1560 and 1562) a decree of excommunication against Isaac Gard, his brother Jacob having died in the mean time.

DAVID BEN ARYEH LOEB OF LIDA: Lithuanian rabbi of the seventeenth century. On his

mother's side he was a nephew of R. Moses Rivkes, author of "Be'er ha-Golah." At first rabbi of Lida (whence his name), he became successively rabbi of Zwolin, Mayence, Ostrog, etc. In 1682 he went to Amsterdam, and became rabbi of the Ashkenazic community there. A quarrel broke out between him and the rabbis of the Spanish and Portuguese Jews, who suspected him of being a follower of Shabbethai Zebi. David was obliged to resign his rabbinical office and leave Amsterdam. The Polish rabbis protested and denounced the calumniators.

The storm gradually subsided and David returned to Amsterdam. A few years later he went back to Poland, and died in Lemberg. The inscription on his tombstone bears the date 5450 = 1690, but Polak (see "Kol Bat Gallim," p. 3) proves this to be a mistake, as several works are extant which were indorsed by him after the year given in the inscription. Stern (see "Bikkurim," i., Preface, p. xxxvi.) gives Heshwan, 5448, which may, however, be a misprint for 5458 = 1698.

David wrote the following works, some of which were printed after his death: "Be'er 'Esek" (The Well of Dispute), containing his discussions with the rabbis of Amsterdam, together with anathemas of the Polish rabbis (Lublin, 1684); "Dibre Dawid" (The Words of David), a book on morals (Lublin, n.d.; Offenbach, 1723; Zedner gives 1724, but without place of publication); "Halluke Abanim" (Smooth Stones), a commentary on Rashi to the Pentateuch (Fürth, 1693); "'Ir Miklat" (The City of Refuge), a commentary on the 613 commandments (Dyhernfurth, 1690; this is included also in the "Yad Kol Bo"); "Migdal Dawid" (The Tower of David), a cabalistic commentary on Ruth (Amsterdam, 1680); "Berit Adonai" (The Alliance of God), a treatise in Judeo-German on circumcision (Amsterdam, 1684); "Sod Adonai" (The Secret of God), a treatise in Hebrew on circumcision, with a commentary entitled "Sharbit ha-Zahab" (The Golden Scepter), written at Mayence in 1680, and published at Amsterdam 1694; "'Ir Dawid" (The Town of David), a collection of homilies, edited by his son Pethahiah (Amsterdam, 1719); "Shir Hillulim" (Wedding Song), a poem on the occasion of presenting a scroll of the Pentateuch to the synagogue (Amsterdam, 1680). DAVID, BENJAMIN FERDINAND: French deputy; born at Niort, department of Deux-Sèvres, March 30, 1796; died there Jan. 24, 1879. He studied medicine, and went on several cruises to the Gulf of Mexico as assistant surgeon in the navy in 1813-14. He was deputy from Deux-Sèvres from 1834 to 1837, and again from 1842 to 1846; mayor of Niort in 1840; and representative of Deux-Sèvres at the legislative assembly of 1849, and from 1852 to 1870. David was in favor of the coup d'état of Dec. 2, 1851, and supported the imperial government throughout the Second Empire.

DAVID BEN BOAZ: Karaite scholar; flourished in the tenth century. He is reported to have been the fifth in the line of descent from Anan, the founder of Karaism (Anan, Saul, Jehoshaphat, and Boaz, father of David). The Karaite chronicler Al-Hiti mentions David under the year 383 of the Hegira (993 C.E.), and gives the titles of the following three works written by him: a commentary on Ecclesiastes; a commentary on the Pentateuch; a treatise on the fundamental principles of the Pentateuch. Of these three only a fragment of the second, comprising Leviticus and the latter half of Deuteronomy, is still extant in manuscript in the St. Petersburg Library. In this commentary, says Harkavy, David frequently attacks Saadia, whom he never calls by name, but by the appellation "hadha al-rajul" (this man).

DAVID BONET BONJORN or **BONGORON:** Convert to Christianity; lived in Catalonia in the second half of the fourteenth century. He is believed to have been the son of the astronomer Jacob Poel. In consequence of the persecutions of 1391 he embraced Christianity, assuming the name "Maestre Bonet Bonjorn." He was the intimate friend of Profiat Duran, who had also been compelled to embrace Christianity. Persuaded by David, Profiat consented to accompany him to a foreign country so that they might both return to Judaism. On the eve of departure David changed his mind, and declared himself satisfied with his new religion. Profiat Duran left Spain alone. He subsequently addressed to his friend the well-known epistle "Al Tehi ka-Aboteka," a masterpiece of satirical criticism against converts to Christianity.

DAVID, CHRISTIAN GEORG NATHAN: Danish political economist and politician; born at Copenhagen Jan. 16, 1793; died there June 18, 1874. Christian received his education in his native city, graduating from its university in 1811. His first contribution to literature was a reply (in 1813) to Th. Thaarup's translation of Buch

holz's "Moses und Jesus," a work unfriendly to the Jews, under the title "Et Par Ord i Anledning af Forhindringen til Oversættelsen af Buchholz's Moses und Jesus." He then took the degree of doctor of philosophy at the University of Göttingen, and published "for Statsoekonomisk Archiv," I-II, 1826-29.

In 1830 David deserted Judaism and joined the Protestant Church. In the same year he was appointed professor of political economy at the University of Copenhagen, and about the same time became political correspondent for the "Maanedsskrift for Litteratur" and leader of the Liberals. In 1834 he started a weekly paper, "Fædrelandet," but being accused of publishing articles in advocacy of a constitutional government, he was dismissed from the university, although acquitted by the court. After a trip to England David served as a representative from 1840 to 1846, being also elected (1841) an alderman of Copenhagen. He then associated himself with the government party, and was appointed by the king to the Senate. Soon afterward he was elected representative from Copenhagen to the first Folkething, where he became leader of the "Helstatsparti" (Unionist party).

David was elected chief inspector for the prison department in 1849; was chief of the state statistical department from 1854 to 1875; and became a director of the National Bank in 1858. After the war of 1864, he became secretary of the treasury in the administration of Bluhme, but in the following year he resigned his office. In 1870 he also gave up his seat as member of the Rigsdag, and withdrew entirely from political life.

J. So.

DAVID, FERDINAND: Violinist and violin-teacher; born at Hamburg Jan. 19, 1810; died suddenly July 19, 1873, near Kloster, Switzerland, while on a mountain tour with his family. His musical talent manifested itself early; and after a course of only two years with Spohr and Hauptmann at Cassel, he made his début in 1825 as a virtuoso in the Gewandhaus, Leipsic. During 1827 and 1828 he was a member of the orchestra of the Königs-

städtische Theater in Berlin, where he first became acquainted with Felix Mendelssohn. A year later he became first violinist in the private quartet of a wealthy and influential amateur of Dorpat, Baron von Liphardt, whose daughter he subsequently married. He was in Russia from 1829 until 1835, making frequent and successful tours to Riga, St. Petersburg, Moscow, and other important cities.

When, in 1835, Mendelssohn became conductor of the Gewandhaus concerts, he chose David for his concert-master; and here the young violinist found ample scope for the development of his genius, particularly after the establishment of the Conservatory in 1843. In this position he remained until his death; and it was largely due to his influence that Leipsic remained the center of violin-playing in Europe after the death of Mendelssohn, Schumann, and Gade. The relations between Mendelssohn and David were particularly cordial, and upon the death of Mendelssohn, David was one of those to whom the posthumous works of the master were entrusted for publication.

In his playing David combined the qualities of Spohr with the greater technical skill and brilliancy of the modern school. Joachim, Wilhelmi, and other eminent violinists of the present day were among his pupils. It was largely due to his initiative that many old masterpieces of the Italian, French, and German schools were preserved; for he not only took a prominent part in preparing revised editions of the works of Haydn, Beethoven, and others, but actually edited and published, for purposes of study, nearly the whole classical repertoire of the violin. His greatest work in this domain is the celebrated "Die Hohe Schule des Violinspiels: Werke Berühmter Meister des 17ten und 18ten Jahrhunderts," consisting of twenty-three numbers containing selections from Porpora, Tartini, Vivaldi, Leclair, J. S. Bach, and many others. Scarcely less important are the studies, op. 39, 44, 45, and 70. Among his other works are the following: Five concertos, that in D minor (op. 35) being arranged also by A. Wilhelmj; 6 caprices, op. 20; "Concert Polonais," in E; 12 Salonstücke, op. 24; 5 *tr.*, op. 28; 30 Charakterstücke, entitled "Aus der Ferienzeit" (op. 46, 47, 48, and 50); "Bunte Reihe," 24 pieces, op. 30, and its continuation, "Nachklänge," 15 pieces, op. 41; 8 Kammerstücke, op. 36; a comic opera, "Hans Wacht," 1852; and, in addition to these numerous variations on original, operatic, national, and song themes, as well as other minor compositions.

DAVID OF FEZ. See DAVID B. ABRAHAM.

DAVID GERSON: Rabbi at Reshid, Egypt; flourished in the middle of the seventeenth century. He was a contemporary of Mordecai ben Judah ha-Levi, author of "Darke No'am," in which are given some of Gerson's responsa. He is also mentioned as a great rabbinical authority by Abraham ben Mordecai ha-Levi, author of "Ginnat Weradim" and "Gan ha-Melek," who was his pupil. Moses Hagiz, in his "Lekeṭ ha-Kemah" on Oraḥ Ḥayyim, attributes to David Gerson the discontinuance of the practise of lighting a pipe from a tallow candle, which according to some authorities is forbidden, as the use of tallow (= חלב) is prohibited in the Pentateuch. David Gerson gave as a reason a dream which he once had of being punished as though he had eaten fat because he used to light his pipe from tallow candles.

DAVID BEN ḤAYYIM HA-KOHN (known under the abbreviation **RaDaK**): Rabbi at Corfu, and later at Patros, Greece, at the beginning of the sixteenth century. He was a pupil of Judah Minz, and a contemporary of Elijah Mizrahi and Moses Alashkar, with whom he maintained a correspondence, though chiefly with the latter, with whom he subsequently had some disputes. David became prominent through his attacks upon Benjamin Ze'eb, who had permitted an "agunah" to marry on the testimony of a Gentile.

The whole of David's works, with the exception of thirty-three responsa, perished in a fire at Adrianople. The responsa were arranged by David's son-in-law, David Vital, and were published under the title "She'elot u-Teshubot MaHaRDaK" (Constantinople, 1537; reprinted several times).

I. Br.

DAVID BEN HODAYA OF MOSUL: Prince of the Davidic house; lived at Mosul (New Nineveh) about 1150-1220. His genealogy, contained in an excommunication issued by him, reads as follows:

"David, son of Hodaya, son of Azariah, son of Solomon, son of Messias (or Moses), son of Judah, son of Hezekiah, son of Judah, son of Gamaliel the latter, son of Judah, son of Gamaliel the latter, of Tiberias, son of Judah the Saint, etc., son of Shefatiah, son of King David."

The list of names is evidently incomplete and incorrect. After the death of the childless exilarch Daniel ben Ḥasdai (or Solomon; see Grätz, vi. note 10), his two nephews, David b. Hodaya and Samuel, were candidates for the office. The election was still undecided when the traveler R. Pethahiah was at Mosul (about 1175). David was a powerful protector of Samuel ben Ali at Bagdad, the chief opponent of Maimonides in the East.

Samuel had made many enemies by his attacks on Maimonides, and against these the above-mentioned excommunication, dated about 1191, was directed. Al-Ḥarizi, who visited Mosul in 1217, mentions David as the exilarch (ch. 46), and praises him and his nephew Hodaya as the most meritorious in that region. See DAVID.

A. K.

DAVID BEN ISAAC HA-KOHN: Prominent rabbinical scholar; lived at Avignon in the thirteenth century. Aaron b. Jacob ha-Kohn of Narbonne, his grandson, who went to Majorca in 1306, names him in his "Orhot Ḥayyim" as the teacher of R. Eliezer ben Immanuel of Tarascon, and quotes his ritual work "Hilkot Terefot" (Laws on Forbidden Food; Renan-Neubauer, "Les Rabbins Français," p. 516; compare *idem*, "Ecrivains Juifs Français," p. 468). In the collection of responsa which he exchanged with R. Samuel of Agde, Rabbi Eliezer often mentions David as his teacher, and quotes in his name casuistic decisions of R. Nathan of Trinquetailles (*ib.*). R. Eliezer's son Immanuel was the grandfather of Isaac de Lattes (Isaac of Lattes, "Sha'are," No. 74).

M. SEL.

DAVID, JACOB JULIUS: Austrian journalist and author; born at Weisskirchen, Moravia, Feb. 6, 1859. Immediately after his birth his parents removed to Fulnek, Moravia, where his father died of cholera when David was but seven years old. The boy successively attended the gymnasias of Teschen, Troppau, and Kremsir. In 1878 he entered the University of Vienna to study philology. While a student he was subjected to want and privation; and it was not until 1890 that he was able to secure means for passing his examinations for his doctorate. Thereafter he devoted himself

wholly to literature and authorship, his first poems appearing in the "Deutsches Dichterbuch aus Oesterreich," edited by Karl Emil Franzos. Later he published long and short stories, and numerous poems and essays in various publications and periodicals of Austria and other countries; distinguishing himself equally as a lyric poet, essayist, dramatist, and novelist.

The more important of his productions are: "Das Höfe-Recht," a story, Dresden; "Das Blut," "Gedichte," "Probleme," Dresden, 1892; "Die Wiedergeborenen," six tales, Dresden; "Hagar's Sohn," a drama in four acts, which appeared in the "Moderne Rundschau," and was performed in the Landestheater of Vienna on Jan. 20, 1891; and "Am Wege Sterben," Vienna, 1900. All these productions, evincing a rich, vivid imagination, forcible style, and exquisite finish, mark their author as a fine artist of the realistic school. At the beginning of his literary career David was for some time associate editor of Franzos' "Wiener Illustrirte Zeitung." Since 1891 he has collaborated on the "Montags-Revue," writing for it theatrical notices on the performances in the Vienna Burg- und Volkstheater, and later also conducted the art department in the "Oesterreichische Volkszeitung."

I. BER.

DAVID BEN JACOB MEÏR: Italian astrologer of the fifteenth century, and a member of the Kalonymus family. He wrote in 1464 two astrological treatises, the smaller of which is on the conjunction of Saturn and Jupiter. He dedicated the latter work to King Ferdinand I. of Naples, and hoped thereby to obtain religious liberty for his coreligionists. In 1466 David translated from Latin into Hebrew an astronomical work of John of Gmünd, which he called "Mar'ot ha-Kokabim" (The Aspects of the Stars). The work is a description of an astronomical instrument which had been invented at Vienna in 1417. He was invested by the king with an office, probably that of astrologer. In 1484 he wrote a philosophical treatise on the "Destructio Destructionis" of Averroes, which he addressed to his son Hayyim Kalonymus.

DAVID BEN JUDAH: Exilarch of Babylonia 820-834; successor to Iskawi II. at a time when this dignity was on the decline. His appointment was contested, by a party which favored Daniel, a Karaite according to Bar Hebraeus. The calif Al-Ma'mun, to whom the contest between David and Daniel was submitted, is said to have declined all interference by issuing an edict permitting any community numbering not less than ten persons—be they Christians, Jews, or Zoroastrians—to elect its own chief. Bar Hebraeus adds that the followers of David were "Tiberians"; if the reading is correct (which Grätz doubts). This would point to the participation of Palestinian Jews in the election. David was finally recognized as exilarch. About 834 David appointed as gaon in Pumbedita a scholar of the name of Isaac ben Hananya.

A. K.

DAVID BEN JUDAH: German cabalist; flourished in the thirteenth century. He was not the son of Judah ha-Hasid (see A. Epstein in "Monatsschrift," 1895, p. 450), but he may have been his grandnephew, the fact of his father's name being "Judah" being responsible for the confusion in the sources quoted by Gross ("Magazin," i. 106 *et seq.*). David was an eminent cabalist, and is highly praised by Eleazar of Worms. He wrote the following works, none of which has been published: "Sodot shel Ma'aseh Bereshit" (The Mysteries of the Beginning), a cabalistic explanation of the Creation;

"Ma'aseh Merkabah" (Description of the Chariot); "Perakim be-Siklin ha-Nibdalim," chapters on the individual intellects which, according to David, are between the **עולם המרכבה** and **עולם המפירות**; "Sefer ha-Gebul" (Book of the Boundaries), on the names of God (the foregoing treatises are still extant in manuscript in the Bodleian Library: Neubauer, "Cat. Bodl. Hebr. MSS." No. 1911, 5); "Or Zaru'a" (Sown Light), a mystic commentary on the prayers (*ib.* No. 1024); a commentary on the Sefer Yezirah (mentioned in the preceding work); "Libnat ha-Sappir" The (Whiteness of the Sapphire), cabalistic explanations on the Haggadot of the Talmud, quoted by Bezalel Ashkenazi in his "Shittah Mekubbezet" (B. B. ed. Lemberg, 1809, p. 64); "Mare'ot ha-Zobe'ot" (Visions of the Assembled), a mystic commentary on the prayers, after the "Or Zaru'a." I. D. Luzzatto expresses his doubts concerning David's authorship of the "Or Zaru'a," as the work contains passages from the Zohar, which was composed later (see "Yad Yosef," p. 13).

DAVID BEN JUDAH. See LEON, MESSER DAVID BEN MESSER.

DAVID BEN KALONYMUS OF MÜNZENBERG: German Tosafist and liturgical poet; flourished at the end of the twelfth century and the beginning of the thirteenth. He was rabbi of Münzenberg, Hesse. His mother was a daughter of Kalonymus the Elder of Speyer, and his teacher was his granduncle Samuel ha-Hasid, also of Speyer. He is quoted in the Tosafot and in the Talmudic works of his pupil Simson of Sens (Commentary to Sifra, 34a and 53a), of Mordecai ben Hillel (Ket. ii. 2; 'Ab. Zarah v.), of Isaac b. Moses of Vienna ("Or Zaru'a," No. 720), of Meir b. Baruch of Rothenberg (Responsa, No. 872), and others. He is also the author of some *seliḥot*.

I. BER.

DAVID KALONYMUS OF NAPLES: Italian scholar; lived in the fifteenth and sixteenth centuries. In "Kerem Hemed" (iii. 173) there is published a letter written in 1286 by Jesse b. Hezekiah, the Exilarch of Damascus, anathematizing those who calumniated Maimonides. David Kalonymus, intending to give greater publicity to the anathema, transcribed three or four copies of it. He was particularly induced to do so, he said, by the fear that during the persecutions which the Jews suffered at that time in Portugal and western Castile, the original might be lost. At the end of the letter is found: "Written at Naples the first of Ab, 5266" (= July 21, 1506). Steinschneider ("Cat. Bodl." col. 1575) thinks it possible that David was the son of Hayyim Kalonymus, and the father of Kalo Kalonymus (see Zunz, "Z. G." 10, 232).

DAVID (ABU SULAIMAN) AL-ḲUMISI: Karaite teacher of the tenth century, of whom little

IV.—30

is known. As his name indicates, he was a native of the Persian province of Ḳumis. He died in Jerusalem in the year of the Hegira 334 (= 945 C.E.). His Biblical commentaries, written in Arabic, have been lost, and only two passages of his are known. One of them refers to the Passover sacrifice, which according to Karaites did not begin until the twilight of the 15th of Nisan, and which, being a private sacrifice, could not displace the Sabbath. When the 15th of Nisan fell on a Sabbath, the private sacrifice was omitted, only one lamb, according to David, being offered for the whole of Israel. It was not eaten, however, but burnt whole (see PASSOVER). The other passage refers to the prohibition, generally accepted by the Karaites, against eating the fatty tail. David derived the prohibition from Lev. iii. 9, where the fatty tail is called simply "fat." This "proof," though refuted by Saadia, is repeated by all the Karaites.

DAVID LAḤNI BEN ELIEZER: Rabbi at Karasu-Bazar, in the Crimea, at the end of the seventeenth century. He was a native of Poland, whence his Tatar surname "Laḥni" (from "Liah" = Poland). Abraham Firkowich claimed to have had in his possession a manuscript containing a work by David entitled "Mishkan David" (The Residence of David), which was divided into two parts, the first treating of the Hebrew roots and their significations, the second of Hebrew synonyms. David arranged and published the Crimean "Ḥazanya" ritual.

DAVID BEN LEVI: Rabbi of Narbonne, France; flourished at the end of the thirteenth century. From the fact that he speaks of R. Samuel Shekili, who was probably his master, as of one already dead, it is likely that he lived on into the fourteenth century. He wrote an important work called "Miktam" (from the Biblical **מִכְתָּם לְדָוִד**), containing the halakic decisions of the Talmud arranged in the order in which they occur in the latter. This book is often quoted in the "Orhot Ḥayyim" of Aaron ha-Kohen, in the "Kol Bo" of David Abudarham, and in the "Bet Yosef" of Joseph Caro. In the consultations of R. Solomon b. Adret are found decisions signed "David b. Levi, author of the 'Miktam.'" David corresponded with Isaac b. Isaac of Chinnon, who called him his master. A part of the "Miktam" is still extant in manuscript in the collection of Baron Günzburg; the collection of Halberstamm contained a fragment of David's commentary on Alfasi.

I. BR.

DAVID (ABU SULAIMAN) IBN MERWAN AL-MUKAMMAS (or **AL-MIKMAS**) **AL-RAKKI** (also known as **David ha-Babli**): Philosopher and controversialist; native of Rakka, Mesopotamia, whence his surname; flourished in the ninth and tenth centuries. Harkavy derives his byname from the Arabic "kammas" (to leap), interpreting it as referring to his asserted change of faith (Grätz, "Gesch." Hebr. transl., iii. 498). This is uncertain. The name is written אֶלְקִימָס in Mas'udi's "Al-Tanbih" (ed. De Goeje, p. 113), in a Karaite commentary to Leviticus, and in a manuscript copy of Jefeth's commentary to the same book ("Jew. Quart. Rev." viii. 681), and is perhaps a derivative from the city of Kumis in Taberistan (Yakut, iv. 203). Another Karaite bears the name "Daniel al-Kumisi," and in Al-Hiti's chronicle this name is also spelled with a zade ("Jew. Quart. Rev." ix. 432).

David, the father of Jewish philosophy, was almost unknown until the latter part of the nineteenth century. The publication of Judah Barzilai's commentary to the Sefer Yezirah ("Mekize Nirdamim," 1885), in which is found a poor Hebrew translation of the ninth and tenth chapters of David's philosophical work, first brought the latter into notice. Barzilai says that he does not know whether David was one of the Geonim, but claims to have heard that Saadia had known him and had profited by his lessons. Pinsker and Grätz, confounding him with Daniel ha-Babli of Cairo, make him a Mohammedan convert to Karaism, on the ground that he is quoted by Karaite scholars, and is called by Hadasi "ger zedek" (pious proselyte). The discovery by Harkavy of the "Kitab al-Riyad wal-Hada'ik," by the Karaite Al-Kirkisani, threw further light on David. Al-Kirkisani cites a work by him on the various Jewish sects, and says that David had "embraced Christianity" (tanassar); that he was for many years the pupil of a renowned Christian physician and philosopher named Hana; and that, after acquiring considerable knowledge of philosophy, he wrote two works against Christianity which be-

Polemical came famous. But it seems more prob-

Works. able that the word "tanassar" means simply that David had intercourse with Christians. Kirkisani, indeed, does not mention his return to Judaism, and no Rabbinite mentions his conversion to Christianity. His conversion to

Christianity can hardly be reconciled with the fact that he is cited by Bahya, by Jedaiah Bedersi (in "Iggeret Hitnazzelut"), and by Moses ibn Ezra. Kirkisani mentions two other books by David: "Kitab al-Khalikah," a commentary on Genesis extracted from Christian exegetical works; and a commentary on Ecclesiastes. He is incorrectly mentioned as a learned Karaite by David al-Hiti in his chronicle of Karaite doctors, published by Margoliouth ("Jew. Quart. Rev." ix. 432).

In 1898 Harkavy discovered in the Imperial Library of St. Petersburg fifteen of the twenty chapters of David's philosophical work entitled "Ishrut Ma'alat" (Twenty Chapters). The subject-matter of these fifteen chapters is as follows: (1) the Aristotelian categories; (2) science and the reality of its existence; (3) the creation of the world; (4) the evidence that it is composed of substance and accidents; (5) the properties of substance and accident; (6) a criticism of those who maintain the eternity of matter; (7) arguments in favor of the existence of God and His creation of the world; (8) the unity of God, refuting the Sabeans, the Dualists, and the Christians; (9) the divine attributes; (10) refutation of anthropomorphism and Christian ideas; (11) why God became our Lord; (12) showing that God created us for good and not for evil, and combating absolute pessimism as well as absolute optimism; (13) the utility of prophecy and prophets; (14) signs of true prophecy and true prophets; (15) mandatory and prohibitive commandments. David as well as other Karaites—for instance, Joseph al-Basir and Al-Kirkisani—was a follower of the Motazilite kalam, especially in his chapter on the attributes of God, wherein he holds that, though we speak of these attributes as we speak of human attributes, the two can not be compared, since nothing comes to Him through the senses as is the case with man. God's "life" is a part of His "being"; and the assumption of attributes in the Deity can in no way affect His unity. "Quality" can not be posited of the Deity. In his tenth chapter, on "Rewards and Punishments," David holds that these are eternal in the future world. This chapter has many points in common with Saadia, both drawing from the same source (Schreiner, "Der Kalam," p. 25). David is the first Jewish author who mentions Aristotle ("Jew. Quart. Rev." xiii. 450).

David quotes two others of his own works which are no longer in existence: "Kitab fi al-Budud" and

"Kitab fi 'Arq al-Ma'alat 'ala al-Man-

Other Works. tik," on the categories. In one passage David relates that he had a philosophical disputation in Damascus

with a Mohammedan scholar, Shabib al-Basri. A fragment of another work, "Kitab al-Tauhid," on the unity of God, has been discovered among genizah fragments, and has been published by E. N. Adler and I. Broydé in "Jew. Quart. Rev." (xiii. 52 *et seq.*). David does not betray his Jewish origin in his philosophical work. Contrary to the practise of Saadia, Bahya, and other Jewish philosophers, he never quotes the Bible, but cites Greek and Arabic authorities. It is possible that this accounts for the neglect of his work by the Jews.

DAVID, MEYER MICHEL: Hanoverian court banker and agent of the board of finance; born in Hanover in the middle of the eighteenth century. He was a son of Michel David of Hanover, the friend of Moses Mendelssohn. Michel David made a gift to his native city of the synagogue which he and Solomon Getschlick had purchased. Meyer, his son, left (c. 1798) one hundred thousand thalers to found a school in Hanover in which sons of the Jewish poor might obtain free instruction in the sciences, in Hebrew, and in certain modern languages, and might receive besides a monthly allowance. This school, called the "Meyer Michel Davidsche Freischule," was reorganized in 1835; J. M. Frensdorff was inspector until 1861, and S. Kayserling from Frensdorff's death until 1898. It has produced rabbis, teachers, bankers, mechanics, and merchants, and still continues its beneficent work.

DAVID (TEVELE) BEN MOSES: Russian rabbi and author; born in Turetz, in the government of Minsk, 1792; died at Minsk April 27, 1861. At the age of fifteen he went to Volozhin, where he studied in the yeshibah under Rabbi Hayyim, from which he graduated as rabbi. At the age of twenty-five he became rabbi of Stouptz, where he remained from 1817 to 1849, in which year he was elected chief rabbi of Minsk. He occupied that position till his death. There he wrote "Bet Dawid," in two parts, containing responsa and sermons. After his death the following works written by him were published: "Naḥalat Dawid," the first part containing responsa, and the second part containing novellæ on Baba Kamma and Hullin (Wilna, 1864); "Dibre Dawid," responsa (Wilna, 1882). Among the pupils of David Tevele were Rabbi Joshua Heller of Telshi and Rabbi Abraham Samuel of Eishishki.

DAVID BEN MOSES OF NOVOGRUDOK: Russian rabbi, commentator, and author; born 1769; died in Novogradok, government of Minsk, 1836. He was appointed rabbi of that town in 1794, and occupied the position for forty-three years, until his death.

David was considered one of the leading and most learned Talmudists of Russia in his time, and was

especially noted for his keenness in that form of discussing knotty rabbinical questions which is known as PILPUL. David is the author of "Galya Massekta," a work still highly valued among old-style Talmudists. It was published at Wilna in 1844 in two volumes: the first containing responsa and novellæ; the second being devoted to sermons, commentaries on the Haggadah, etc.

DAVID NIETO REDIVIVUS. See DEUTSCH, HEINRICH.

DAVID THE PIOUS: French scholar; lived at Château-Thierry in the second half of the twelfth and the beginning of the thirteenth century. Zunz ("Literaturgesch." p. 305; compare Carmoly, "Itinéraires," p. 177) identifies him with R. David ben Joseph, who, with Isaac ben Abraham of Dampierre, Isaac ben David, and Joseph ben Moses, adopted the decisions of the synod of Troyes which had met about 1160 under the auspices of Rabbenu Tam. Samuel of Falaise (Sir Morel) probably referred to David the Pious when he spoke of רבינו דוד as being a contemporary of Sir Léon of Paris ("Rev. Et. Juives," vii. 47). Together with Solomon ben Judah the Saint, of Dreux, the two brothers Simson and Isaac ben Abraham of Dampierre, Samson of Corbeil, Abraham of Touques, and Eliezer ben Aaron of Burgundy, he was among those scholars of the north of France to whom, about 1204 or 1205, Meir ben Todros ha-Levi ABULAFIA addressed his epistle against the doctrine of resurrection as taught by Maimonides.

DAVID RAPHAEL BEN ABRAHAM POLIDO: Satirist; flourished in the seventeenth and eighteenth centuries. His name, and the fact that his work was printed in Leghorn, suggest that he was an Italian; but Somerhausen reads פולניא (Polonya [?]) instead of פולידא; whereas Steinschneider interprets it as "Fulda." David wrote "Zikron Purim" (Remembrance of Purim), a parody on the piyyuṭim for the Feast of Purim, followed by a testament of Haman, a poem full of coarse jokes, but a good imitation of the Sephardic piyyuṭim (Leghorn, 1708). Delitzsch gives 1736 as the date of its publication.

DAVID B. SAADIA. See DOSA B. SAADIA.

DAVID, SAMUEL: French musician; born in Paris Nov. 12, 1836; died there Oct. 3, 1895. He received his musical education at the Conservatoire, where he was a pupil of Bazin and Halévy. In 1858 he received the "Grand Prix de Rome" for his cantata "Jephtha," and in the following year was the recipient of another prize for the work entitled "Le Génie de la Terre," which was performed by a male

chorus and orchestra, the former numbering 6,000 voices. In 1861 he was appointed professor at the Collège de Saint-Barbe, and in 1872 he became musical director in the synagogues of Paris.

David was the composer of the following operas and operettas, all of which were performed in Paris: "La Peau de l'Ours," operetta, 1858; "Mademoiselle Sylvia," operetta, 1868; "Tu l'as Voulu," operetta, 1869; "Le Bien d'Autrui," 1869; "Un Caprice de Ninon," 1871; "La Fée des Bruyères," 1878. David is also the composer of an "ode-symphonic" entitled "Le Triomphe de la Paix," 1878, which is generally regarded as his most popular composition.

He has written, besides the above-mentioned works, four symphonies, a number of choruses and songs, and the following unperformed operatic works: "Les Chevaliers du Poignard"; "Une Dragonnade"; "La Gageure"; "L'Education d'un Prince"; "Les Changeurs"; "Absalon"; and "I Maccabei" (in Italian). A theoretical work, "L'Art de Jouer en Mesure," Paris, 1862, is also popular.

N. T. L.

DAVID B. SAMUEL HA-LEVI (usually called **ṬaZ**, from the initials of his work "Ṭure Zahab"); Polish rabbi; born in Lodmir or Vladimir, Volhynia, about 1586 (see Grütz, "Gesch." x. 57, and

"K'in'at Soferim," p. 48b, note 809); died in Lemberg Jan. 31, 1667. David's chief instructor was his elder brother, Isaac b. Samuel ha-Levi, and his reputation for Talmudical knowledge spread far and wide; so that R. Joel Särkes (BaH) of Brest gave him his daughter in marriage. After residing with his father-in-law for several years—which were spent in diligent study—David and his family removed to Cracow. Thence David was called as rabbi of Potlitsha, near Rava, where he lived in great poverty. Later he went to Posen, where he remained for several years (see Responsa of Joel Särkes [BaH], new series, No. 17); and about 1641 he became rabbi of the old community of Ostrog, or Ostroh, in Volhynia. There David had a famous yeshibah, and was soon recognized as one of the great rabbis of his time. In Ostrog David wrote his commentary on Joseph Caro's Shulhan 'Aruk, Yoreh De'ah, which he published in Lublin, 1646, and which was accepted as one of the highest authorities on ceremonial law.

Two years after the publication of his commentary David and his family had to flee for their lives from the terrible massacres of the Cossack insurrection under Bogdan CHMIELNICKI in 1648–49. David went to Steinitz near Ostrau, Moravia, where he remained for some time and probably acted as rabbi. This fact gave rise to an erroneous belief that before the persecution David was rabbi of Ostrau and not of Ostrog, Volhynia (see "Neuzeit," 1865, No. 29, and Kohn, "Biographien Hervorragender Rabbinischer Autoritäten," etc., pp. 109 *et seq.*, Brünn, 1890). David did not find Moravia congenial, and returned to Poland as soon as order was restored, settling in Lemberg, where he remained for the rest of his life.

David was made "rosh bet din," and when Meïr Sack, the chief rabbi of Lemberg, died (1653), he succeeded him in the rabbinate. At that time the city usually had two rabbis, one for the town proper and the other for the suburbs; David was at first the suburban rabbi; as one of the delegates to the Council of Four Lands in Lublin in Nisan, 1664, he signs as of "outside the town" (approbation to "Ammudeha Shib'ah," by R. Bezalel, darshan of Sluzk, Prague, 1674). Under another approbation he signs "of Lemberg and the Province," indicating that other communities were also subject to his spiritual rule.

The last days of David were saddened by the violent death of his two sons, Mordecai and Solomon, who were martyred in the great riots which occurred in LEMBERG in the spring of 1664. Their mother, the daughter of Joel Särkes, had died long before this, and David married the widow of her brother, Samuel Hirz b. Joel, rabbi of Pinczow. His third son from the former marriage, Isaiah Segal, and his stepson Aryeh Löb, were the two Polish scholars who were sent—probably by David, or at least with his consent—to Turkey in 1666 to investigate the claims of the pseudo-Messiah SHABBETHAI ZEBI. They brought back as a present from the false Messiah a white silk robe for David, and a letter in which Shabbethai Zebi promised to avenge the wrongs of the Jews of Poland.

Most of the works of David were published

long after his death. The "Ture Zahab" on Shulhan 'Aruk, Oraḥ Ḥayyim, was published by Shabbethai Bass in Dyhernfurth in 1692, together with the "Magen Abraham" by ABRAHAM ABELE GUMBINER; and both commentaries, together with the text, were frequently republished with several other commentaries, and still hold first rank among rabbinical authorities. Two years before the publication of this work, Judel of Kovli, in Volhynia, a cabalist and rabbinical scholar who wrote a commentary to the Oraḥ Ḥayyim, gave money to have it published together with the "TaZ," but his wishes were never carried out, and his money was used to publish another work of David's, the "Dibre Dawid" (The Words of David), a supercommentary on Rashi (Dyhernfurth, 1690). Part of the "TaZ" on Shulhan 'Aruk, Hošen Mishpat (to ch. cxcvi.), appeared separately in Hamburg in the same year, with notes by Ze'bi Hirsch ASHKENAZI. The other half, in spite of various attempts and of the general demand for it, did not appear till about seventy years later (Berlin, 1761). The "TaZ" on Shulhan 'Aruk, Eben ha-'Ezer, which was utilized in manuscript by Samuel b. Phoebus, the author of "Bet Shemuel" on the same part of the Shulhan 'Aruk, was first printed in Zolkiev in 1754. David was the author of responsa which, though sometimes quoted from the manuscripts, were never published. TaZ and his opponent, Shabbethai Kohen (ShaK), are the greatest authorities among the AḤARONIM; and their decisions are of greater importance than those of Joseph Caro or of Moses Isserles. In 1683 the rabbis of the Council of Four Lands declared that the authority of the "TaZ" should be considered greater than that of the "ShaK," but later the "ShaK" gained more and more in authority. Compare SHABBETHAI B. ME'IR HA-KOHN.

DAVID BEN SOLOMON IBN ABI ZIMRA or **ZAMIRO** (also known as **RaDBaZ**): Spanish Talmudist and cabalist; born in Spain about 1479; died at Safed, Palestine, 1589. He was thirteen years of age when his parents, banished from Spain, settled in Safed, where he studied under the direction of Joseph Saragossa. This statement, which is given by all his biographers, is contested by Frumkin ("Eben Shemuel," p. 48). Later David removed to Cairo, and in 1514 he is found there as a member of the bet din presided over by the "nagid" Isaac Sholal. In 1517, on the abolition of the office of nagid by the Turkish government,

David was appointed chief rabbi of Egypt, which position he held for forty years. As he was highly revered alike for his vast knowledge, the integrity of his character, and the extent of his philanthropy, the yeshibah over which he presided attracted many distinguished pupils, among whom may be mentioned Bezalel Ashkenazi, and Isaac Luria, the father of the new cabalistic school.

In the introduction to his commentary on the Song of Songs, Isaac Akriḥ paints in vivid colors the character of David, in whose house he lived for ten years. According to this writer, David was very prominent in both the social and the political life of Egypt, thanks to his high intelligence and to an ample fortune. During his rabbinate he introduced many reforms in the every-day life of the Egyptian Jews, as well as in their religion. It was he who abolished the use of the Seleucid era among them.

On attaining the age of ninety David resigned the chief rabbinate, and divided the greater part of his fortune among the poor, making special provision for scholars. He then removed to Jerusalem, but did not stay there long, on account of the burdensome taxes that the Turkish government had imposed upon him. He settled in Safed, where he became an active member of the bet din presided over by Joseph Caro, who held him in great esteem. David died, as shown above, at the age of one hundred and ten years.

He was the author of the following works: "Dibre Dawid" (Words of David), containing decisions and novellæ on Maimonides' "Yad," published by Joseph Zamiro together with his own work "Hon Yosef," Leghorn, 1828; "Yeḳar Tif'eret" (Honor of Excellency), containing answers to the criticisms of Abraham ben David (RABAD) on Maimonides' "Yad," and commentaries on those passages in that work which the "Maggid Mishneh" of Vidal de Toloza overlooks: of these commentaries the portions on Hafla'ah and Zera'im were published in Smyrna 1757, and the remaining portions in the Wilna edition of the "Yad," 1890; "Kelale ha-Gemara" (Rules of the Gemara), a methodology of the Talmud, published in the collection "Me-Harere Namarim" of Abraham ben Solomon Akra, Venice, 1599; "Or Qadmon" (Pristine Light), a cabalistic work, edited by Moses Hāgis, Venice, 1713; "Magen Dawid" (Shield of David), a mystical explanation of the alphabet opposing Recanati and R. Judah Ḥayyat, edited by M. Hāgis, Amsterdam, 1713; "Meẓudat Dawid" (The Bulwark of David), giving reasons for the commandments according to the four methods of explanation known as "pardes" (Zolkiev, 1862); "Mikṭam le-Dawid" (David's Poem), cabalistic homilies on the Song of Songs, still extant in manuscript; "Keter Malkut" (Crown of Royalty), prayers for the Day of Atonement, first published with the above-mentioned "Or Qadmon," reprinted in the "Shebeṭ Musar" of Elijah ben Abraham Solomon ha-Kohen of Smyrna, and finally inserted by Heidenheim in the ritual for the eve of the Day of Atonement; "Gillui le-Idrot," a commentary on the "Idrot," with notes by Ḥayyim Vital, still extant in manuscript in the Abarbanel Library at Jerusalem; "Dine Rabba we-Zuṭa" (The Great and Small Decisions), a commentary on the Shulhan 'Aruk; "Shib'im Pa-

nim la-Torah" (Seventy Methods of the Explanations of the Torah). The last two works are mentioned in the preface of "Magen Dawid." David ben Solomon's responsa are his greatest contribution to Jewish literature; parts of it were published in Leghorn, 1651 (Nos. 1-300); Venice, 1799 (Nos. 1-318); Fürth, 1781 (Nos. 400-649); Leghorn, 1818 (Nos. 2051-2341). A complete edition of the responsa was published in Sudzilkow 1836.

DAVID IBN YAḤYA. See IBN YAḤYA, DAVID.

DAVID BEN ZAKKAI: Exilarch; known in Jewish history especially for his controversy with Saadia; died in 940. He was a relative of the prince of the Exile, 'Ukba, who had been deposed from office and banished, and was his successor in the exilarchate. The office was at this time confronted by a dangerous adversary in the person of the passionate and ambitious gaon Mar Kohen-Zedek (in office 917-936), who attempted to make the Academy of Pumbedita the only center of the Babylonian Jews, thereby threatening the existence of the sister academy at Sura. He, as well as the Academy of Pumbedita, refused to recognize David as exilarch, whereupon the latter, who was equally resolute and ambitious, deposed Kohen-Zedek and appointed another gaon. This dispute lasted for two years, until Nissim Naharwani, highly respected for his piety, intervened and reconciled the adversaries, peace being concluded at Sarsar (half a day's journey south of Bagdad). Kohen-Zedek and his college accompanied the exilarch as far as Bagdad (in the fall of 921); David ben Zakkai, in turn, recognizing the former as gaon of Pumbedita. But the reputation of the Academy of Sura continued to dwindle. A weaver filled the office of gaon for two years (926-928), and the ancient and famous academy was on the point of being dissolved, when Saadia, called from Egypt by the exilarch, was appointed gaon. This was against the advice of Naharwani, who favored Zemah ibn Shahin ("Medieval Jew. Chron." ii. 80); but the wisdom of the choice was shown when Saadia made the fame of Sura surpass even that of Pumbedita.

The friendly relations between David b. Zakkai and Saadia were soon disturbed. David shrank from nothing which might strengthen his position, and misused his influence in order to extort large contributions from the community. A case of inheritance which David had decided illegally for reasons of self-interest, led to a rupture between the two. The exilarch asked the two geonim to sign the document in question. Kohen-Zedek dared not refuse, but Saadia did. David deposed Saadia from office and banished him, appointing in his place the insignificant Joseph b. Jacob b. Satia. Saadia, however, took up the gauntlet; he, in turn, deposed David, and, together with his followers, appointed David's brother, Josiah Hasan, as exilarch.

The Babylonian Jews were now divided into two parties, each of which appealed to the calif Al-Muktadir. His successor, Al-Kahir, finally decided

the case. The opposing exilarch was banished to Khorasan, where later on he died; and Saadia was deprived of his gaonate (beginning of 933). Saadia went to Bagdad, devoting the four years of his involuntary leisure to research. He was reinstated in consequence of a law case in which one of the parties concerned chose the exilarch as judge, while the other chose Saadia, whereupon David had the man maltreated who appealed to his adversary. This caused general excitement, and restoration of peace between the two became imperative. A reconciliation took place on Feb. 27, 937. The opposing gaon was removed from office, and Saadia forgot his injuries. After the exilarch's death Saadia even voted for his son Judah as his successor. David took part in the controversy with BEN ME'IR in regard to the fixing of the calendar; and he was one of those who excommunicated the agitator (see "Rev. Et. Juives," xl. 261, xlii. 182).

DAVID-GORODOK: Town in the government of Minsk, Russia. In 1895 it had a population of 10,086, including 4,902 Jews. The latter are mostly engaged in business and in industrial vocations. There are 672 artisans, 564 of whom conduct their own business. Trade in bricks, timber, boats, fish, meat, fire-wood, hoops, iron brackets, etc., engages the activities of the inhabitants. The greater part to these products goes by boat to Minsk and Kiev. About 20 families are engaged in agriculture; 20 persons are occupied in gardening; 6 are teamsters; 13 are employed in shop or factory, mill or brick-yard, etc.; and 140 hire out as day-laborers. There are no charitable institutions. There is a public school enrolling 300 male pupils, of whom 11 are Jewish; and it has a girls' department containing 75 pupils, 10 of whom are Jewish. There are 23 ḥadarim, with 150 pupils, and 7 independent teachers of the Russian language, with 50 pupils.

S. J.

DAVIDOV (or **DAVYDOV**), **JULIUS:** Russian physician; born at Goldingen, Courland, 1803; died at Moscow 1870. He graduated from the University of Dorpat in 1833, and practised medicine in his native town until 1838, when he removed to Moscow. At the time of his death he held the position of chief physician of the Nicholas Orphan Asylum. Prior to his removal to Moscow he had embraced Christianity.

Two of his sons became distinguished: **August Davidov**, mathematician; author of many popular school-books on mathematics; born at Goldingen in 1823; died at Moscow in 1885. **Carl Davidov**, violoncellist; born at Goldingen in 1838; died at Moscow in 1889.

M. R.

DAVIDOVICH, JUDAH LÖB: Russian Hebraist; born at Wilna 1855; died at Odessa Jan. 1, 1898. He spent several years of his youth working

and studying in Western countries. Returning to his native land, he served his term in the Russian army; later he studied surgery, but had no success as a practising "Feldscher," or assistant surgeon; and after a futile attempt to make a career as a singer, he settled in Odessa about 1885 as a private teacher, remaining there until his death.

Davidovich was a frequent contributor to Russian newspapers on topics of general interest, and in Odessa he was influenced by Asher GINZBERG to turn his attention to Hebrew literature. His most notable effort in that line is his translation into Hebrew of Herbert Spencer's essay on education, with preface and explanatory notes, published, under the name "Ha-Hinnuk," by the AHIASAF Company (Warsaw, 1894). He also wrote two valuable articles on educational subjects in "Ha-Shiloah" (vols. i., ii.).

BIBLIOGRAPHY: *Ha-Shiloah*, iii. 187.

P. Wl.

DAVIDS, ARTHUR LUMLEY: English Orientalist; born in London 1811; died from a sudden attack of cholera July 19, 1832. At an early age he applied himself more particularly to the study of mechanics, music, and experimental philosophy. At the age of fifteen he began the preparation of a "Bible Encyclopedia," at the same time making himself proficient in Turkish and in other foreign languages. Wishing to follow the legal profession, he entered the office of a solicitor, but found himself prevented as a Jew from proceeding to the bar. This prompted his devotion to the cause of the civil emancipation of the Jews, which he advocated in several articles addressed to the London "Times."

David's reputation as a scholar rests on his "Grammar of the Turkish Language," dedicated to the Sultan of Turkey, Mahmud II., which, being the product of so youthful a scholar, evoked high appreciation and commendation.

DAVIDSOHN, BOGUMIL. See DAWISON, BOGUMIL.

DAVIDSOHN, GEORG: German journalist; born at Danzig, Prussia, Dec. 19, 1835; died in Berlin Feb. 6, 1897. He was originally destined for a merchant's career, but in 1856 went to Berlin, and acted for various newspapers as reporter of events in the economic and business world. He joined the editorial staff of the "Berliner Börsen-Zeitung" in 1860, devoting himself mainly to the commercial department; but soon found opportunity for also exercising his literary gifts as a feuilletonist in the weekly supplement to this paper, which he founded under the title "Die Börse des Lebens." He made the review of musical events and the criticism of operas his specialty. In 1868 Davidsohn established the "Berliner Börsen-Courier," which he conducted till his death, retaining the position as its chief editor even after 1884, when it became the property of a joint-stock company.

Personally intimate with Richard Wagner, Davidsohn was the first advocate of his productions in the Berlin press. He was one of the founders of the first

Berlin Wagnerverein, and subsequently became an enthusiastic advocate of the Wagnerian theatrical arrangements in Bayreuth, thus championing the composer's cause at a time when it met with general animosity and opposition.

B. B.

DAVIDSOHN, LEON: Russian publicist and translator; born at Kopil, government of Minsk, 1855. He was educated at an early age in the Talmud and the Hebrew language. His father confided him to a teacher who explained the Bible according to Mendelssohn's commentary. When Davidsohn was a boy of nine years he could write Hebrew verse. At the age of twelve he was sent to the yeshibah of Mir; two years later he went to Karelitz, where he studied the Talmud under his uncle Isaac Jehiel, rabbi of that town. At the age of fifteen, having been graduated as rabbi, he went to Minsk and began the study of Russian and of other secular subjects.

One of Davidsohn's articles about that time in the Hebrew paper "Ha-Kol," in which he exhorted the rich Russian Jews to found a school of Jewish science, made a great impression on the progressionists. In the same year he wrote for the same paper articles on the development of handicraft and agriculture among the Jews. From Minsk he went to Warsaw, where he graduated as doctor of medicine in 1888. He there made the acquaintance of the Polish writer Clemens Junosza, who asked him to translate into Russian Abramovich's "Die Kliatche" and "Masse'ot Binyamin ha-Shelishi." The latter work he translated also into Polish under the title of "Don Kiszot Zydowski." He practises medicine at Pruzhany, and continues to write articles for various Hebrew papers.

B. Et.

DAVIDSOHN, ROBERT: German journalist; younger brother of Georg DAVIDSOHN; born at Danzig April 26, 1853. He joined his brother on the editorial staff of the "Berliner Börsen-Courier," writing satirical critiques of actors, actresses, and singers. Worsted in an attack on Lilli Lehman, he soon after left Berlin. He then went to Italy to gather historical material, and soon made an enviable reputation in this new line of endeavor.

Davidsohn is the author of "Vom Nordkap bis Tunis," 1884; "Philipp II. August von Frankreich und Ingeborg," 1888; "Geschichte der Stadt Florenz," 1896; and an edition of the last-named work covering the thirteenth and fourteenth centuries, published in 1900.

DAVIDSON, ANDREW B.: Professor of Hebrew and Oriental languages in New College, Edinburgh; born at Kirkhill, in the parish of Ellon, Aberdeenshire, Scotland, in 1831; died in Edin-

burgh Jan. 26, 1902. He was educated at the University of Aberdeen, graduating in 1849. He entered New College, Edinburgh, in 1852, to study for the ministry, and was licensed in 1857.

In 1858 Davidson became Hebrew tutor in New College. Here he produced an "Elementary Hebrew Grammar" (2d ed., 1896) and his "Hebrew Syntax" (1894).

In 1862 his first book on Job (ch. 1-14) was published by Williams & Norgate. When, in the following year, the chair of Hebrew fell vacant, Davidson was appointed professor by the unanimous vote of the Free Church Assembly. In 1871 he was chosen to be one of the Old Testament revision committee. Davidson was the author of a book on Job, published in 1884 as one of the "Cambridge Bible Series." For the same series he wrote the commentaries on Ezekiel, Nahum, Habakkuk, and Zephaniah. He wrote also in the series of handbooks published by T. & T. Clark a commentary on the Epistle to the Hebrews (1882); and he furnished many important articles for the "Bible Dictionary" edited by Dr. Hastings, among them "Covenant," "Eschatology of the Old Testament," "God," and "Prophecy."

T.

F. H. V.

DAVIDSON, BENJAMIN: English Orientalist of Jewish birth; died 1871. He was a worker for the British Society for the Propagation of the Gospel Among the Jews, and when that institution founded in London (1847) a college for the training of its missionaries, he was appointed principal. He is the author of an "Analytical Hebrew and Chaldee Lexicon," "Syriac Reading Lessons, with Analysis," and "Chaldee Reading Lessons." He assisted in the editing of the "Englishman's Hebrew and Chaldee Concordance." His chief work, however, was posthumous—a "Concordance of the Hebrew and Chaldee Scriptures," London, 1876.

V. E.

DAVIDSON, ELLIS A.: English author and technologist; born at Hull 1828; died at London March 9, 1878. Going early to London, he attended the School of Design and the School of Art at South Kensington, and was one of the first art-teachers sent into the provinces by the Science and Art Department. For several years he was connected with the college at Chester. In 1866 Davidson was appointed principal art-master of the City Middle Class School, a position which he subsequently resigned in order to devote himself more completely to the production of a series of educational works especially devoted to technical training, in which he may be regarded as a pioneer. He was well known as a successful art-lecturer, having acquired great facility in speech and considerable skill with his pencil.

Davidson took an active interest in several communal movements, especially those intended to promote the intellectual development of the adult members of the Jewish industrial classes. He also delivered lectures under the auspices of the Teachers' Training Association, the Horological Society, and the Horse Guards. He produced a series of models

for class-teaching of drawing, which were used in government and other schools.

Davidson was the author of a number of elementary works on drawing and popular hygiene, among which may be mentioned the following, all published in London: "Orthographics and Isometrical Projection," 1868; "Houses and What They Are Made Of," 1869; "Our Food: a Useful Book for Boys and Girls," 1870; "Drawing for Carpenters and Joiners"; "Gothic Stonework: History and Principles of Church Architecture," 1874; "The Amateur House-Carpenter."

G. L.

DAVIDSON, THOMAS: Philosopher and lecturer; born of Presbyterian parents at Deer, near Aberdeen, Scotland, Oct. 25, 1840; died at Montreal, Quebec, Sept. 14, 1900. After graduating from Aberdeen University (1860) he successively held the positions of rector of the Grammar School of Old Aberdeen, teacher and professor in various places in England, Scotland, and America. He traveled extensively, and became a proficient linguist, acquiring a knowledge of French, German, Italian, Spanish, Greek, Latin, and Arabic. His ideal was to popularize knowledge among the masses, and with this end in view he founded the London Fabian Society, but lost interest in it when it drifted into socialism. His interest in St. Thomas Aquinas secured for him an invitation from the pope to proceed to Italy and assist in the preface to a new Vatican edition of the saint's works. He organized the Collegiate Institute of Canada and the Glenmore School for Culture Sciences at Keene in the Adirondack Mountains. Davidson's most successful work was in connection with the Educational Alliance in New York, where he attained wide popularity by a series of lectures on sociology. A special class was formed for Jewish young men and women, whom he introduced to the great writers on sociology and their problems. He aimed at founding among them what he called a "Breadwinners' College," but his work was cut short by his untimely death. His pupils have continued the classes, and annually honor his memory.

Among Davidson's many works are: "Fragments of Parmenides" (1869), and "The Parthenon Frieze and Other Essays" (1882). He introduced to English readers the philosophical system of Antonio Rosmini-Serbati, most of whose works he translated.

J. S.

DAVILA, DIEGO ARIAS: Minister and confidant of King Henry IV. of Castile; born of Jewish parents in Segovia; died in 1466. He, together with his family, embraced the Christian faith when Vincent Ferrer was preaching special sermons with a view to making converts. Drawn to the court of Juan II. of Castile by Alvaro de Luna, Davila, in conjunction with his former coreligionist Juan Pacheco, became both the farmer and the administrator of the royal taxes. In time he gained the confidence of the prodigal young king Henry to such a degree that the latter appointed him head of the

royal audit office or minister of finance ("contador mayor").

To win popular favor both he and his wife showed themselves very generous toward the Church; nevertheless he was always considered a Jew. The author of the "Coplas del Provincial" addressed to Davila the following malignant couplet:

"A ti Diego Arias p . . .
Que eres é fuiste Judío,
E tienes gran señorío
Contigo non me disputo."

[TRANSLATION.]

"Diego Arias, thou wretched hypocrite,
A Jew thou wert and a Jew thou art.
Great is the power that is thine;
Hence to no dealings with thee I incline."

Toward his coreligionists Davila's attitude was for a long time cold and forbidding; only later, when it became his duty to appoint supervisors of the revenues in most of the cities, did he have recourse to Maranos. Furthermore, despite repeated decrees of the Cortes to the contrary, he appointed Jews as tax-farmers. The chief administrator of the ducal tax-revenues at the time was D. Moses Zarfati; Rabbi Abraham and Joseph Castellano were the farmers of the revenues in the bishopric of Roa from 1460 to 1462, and D. Moses of Briviesca the farmer of the revenues of S. Salvador de Oña in 1455. While the Jewish tax-farmers were very lenient, the Marano officials appointed by Davila showed themselves merciless, which drew upon them the enmity of the people to such an extent that D. Gomez Manrique, who possessed great influence, preferred charges against the minister, and in the "Advice" which he addressed to him ("Consejos a Diego Arias") he predicted for him a fate similar to that of Alvaro de Luna. With a king so frivolous and prodigal as Henry, Davila's situation was indeed very difficult and precarious; and he often found himself on the verge of being deposed. On one occasion, when he represented to the king that the conditions urgently demanded a curtailment of expenditure, the king replied in an imperious tone: "You speak as Diego Arias; I act as king."

The castle Puñorostro, together with the villages and hamlets connected with it, which, after its acquisition by him, he turned into an entailed estate. Davila transferred to his oldest son, **Pedro Davila**, whom he married to D. Maria de Mendoza, niece of the first Duke del Infantado and a grandchild of Marquis de Santillana. Pedro filled the same position as his father had at the court of Henry IV., until he was overthrown through the intrigues of Alonso de Fonseca.

Davila's second son, **Juan Arias Davila** (not "de Avila"), was Bishop of Segovia. Full of hatred against the Jews, he caused sixteen of them who had been accused of a ritual murder to be burned at the stake.

DAVIN, SOLOMON BEN DAVID, OF RO-DEZ: Astronomer; lived in the second half of the fourteenth century. He was a disciple of Immanuel of Tarascon (France). He translated from the Latin

into Hebrew, under the title "Sefer Mishpete ha-Kokabim," the astronomical and astrological work of Abu al-Hasan Ali ibn Abi Rijal, entitled "Al-Bari" (The Excellent). This work was translated into Spanish, at the request of Alfonso X., by the physician Judah ben Moses Cohen in 1256, and from the Spanish back into Latin by Gilles de Thebaldis of Parma.

Davin's translation, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 1067), is accompanied by glosses, which begin with the abbreviated form of his name—**אשרת המעתיק** (= **אמר שלמה דאון**), "And said Solomon Davin, the disciple, the translator." Davin also translated the astronomical tables of Paris, to which he added notes. This translation is still extant in manuscript (Munich MS. No. 343).

DAVIS, ALFRED: Philanthropist; born in London 1811; died Jan. 6, 1870. Starting life as a general dealer, he soon commenced business on his own account; and his firm subsequently became one of the largest concerns in England as importers of foreign goods in the Birmingham and Sheffield trade.

Davis was an ardent worker in the cause of the advancement of the community, and was early associated with the Jews' Free School, of which he was treasurer for twenty-five years, and to which he contributed some munificent donations. He undertook the expense of the educational equipment of the teaching staff, and at his death bequeathed the sum of £30,000 (\$150,000) to the institution. He was also a liberal supporter of Jews' College.

DAVIS, FREDERICK: Archeologist; born at Cheltenham 1843; died in London July 14, 1900. He was the eldest son of John Davis of Derby, and was educated at the Derby and Belper schools. Entering the engineering profession, he for some years was a partner in the Phoenix Foundry and Engineering Works at Derby. He devoted himself to archeological pursuits, and was elected a member of the council of the Society of Antiquaries and of the Silchester Excavation Committee. Davis wrote a history of the discoveries of the "Roman British City of Silchester," and also a work entitled "The Etymology of Some Derbyshire Race Names," and at the time of his death was preparing a work on "Mismomers."

DAVIS, JAMES (OWEN HALL): English playwright and journalist; born about 1848. He was educated at University College, London, and took the degree of bachelor of laws in 1869. After devoting some years to the practise of law as a solicitor (1874-86), he abandoned it in favor of journalism. He was editor and proprietor of a society paper, "The Bat" (1885-87), and assistant editor of Galigani's "Messenger" in Paris (1888-90). For a

time Davis interested himself in politics, contesting Dundalk in the Conservative interest at the election of 1890. He is the author of several comic operas which have had an enormous success, among them being "A Gaiety Girl," "An Artist's Model," "The Geisha," "A Greek Slave," and "Florodora." Since 1899 he has edited a weekly paper, "The Phoenix."

J.

V. E.

DAVIS, MAURICE: English physician and philanthropist; born Oct. 8, 1821; died in London Sept. 29, 1898. Davis was one of the earliest English Jews trained for the medical profession. He was educated at King's College, London, where he had a distinguished medical career, gaining the first prize in medicine and clinical surgery, and filling several residential positions in the King's College Hospital. In 1887 he was placed on the commission of the peace for the county of Middlesex, and became justice of the peace for the new county of London. Davis served on the committee of the metropolitan branch of the British Medical Association and on the board of directors of the Society for the Relief of Widows and Orphans of Medical Men; he was a member of the Jewish Board of Guardians of the council of the Anglo-Jewish Association, and was an honorary medical officer of the Jewish Convalescent Home.

He produced some literary work, contributed to various specialist periodicals, and wrote some extravaganzas for the benefit of different charities.

DAVIS, MIRIAM ISABEL: English painter; born in London, where, after making a tour of the galleries of Venice, Florence, and Rome, she began a systematic course of artistic study at the Bloomsbury School of Art. Her artistic career commenced in 1882, in which year she exhibited at the Society of Lady Artists. In 1887 a picture by her entitled "New Music" was hung at the Royal Academy; in 1889 she contributed to the Paris Salon; and since then has exhibited in every gallery of importance. Among her works are: "Winter Harmonies," 1887; "A Shady Seat," 1888; "The Last of the Season," 1889; "White and Gold," 1890 (exhibited at the New Gallery); "Pure Emblems of Pleasure," 1891 (Royal Academy); "Simplicité," 1892 (Paris Salon). From 1895 Miss Davis has been engaged in portrait painting, exhibiting often at the Society of Women Painters, of which she was one of the founders.

DAVIS, MYER DAVID: English educationist and writer; born in London 1830. He was educated at Jews' Free School, in which he ultimately became Talmud Torah master. Subsequently he was headmaster of the Gates of Hope School of the Spanish and Portuguese Jews. For two years (1873-1875) he was editor of the "Jewish World." After this, earning his living by private tuition, he devoted his leisure to research among the unpublished records of the preexpulsion history of the Jews of England. He has made an unrivaled collection of excerpts from the Latin and Hebrew records prior

to 1290, which was published by the Anglo-Jewish Historical Exhibition of 1887 under the title "Shetaroth: Hebrew Deeds of English Jews" (London, 1888).

DAVIS, NATHAN: Traveler and archeologist; born 1812; died at Florence Jan. 6, 1882. He spent many years of his life in northern Africa, and for some years lived in an old Moorish palace about ten miles from Tunis. Early in life he became converted to Christianity, and in 1852 he edited the "Hebrew Christian Magazine," becoming afterward a non-conformist minister. From 1856 to 1858 he was engaged on behalf of the British Museum in excavations at Carthage and Utica. He discovered numerous antiquities, including Roman mosaic pavements and Phenician inscriptions.

His publications are: "Tunis, or Selections from a Journal During a Residence in That Regency," Malta, 1841; "A Voice from North Africa," 1844; "Evenings in My Tent," 1854; "Ruined Cities Within Numidian and Carthaginian Territories"; "Carthage and Her Remains," 1861. He also published "Israel's True Emancipator," 1852, and "Arabic Reading Lessons," 1854.

DAWISON (DAVIDSOHN), BOGUMIL: Actor; born at Warsaw May 15, 1818; died at Dresden Feb. 1, 1872. In his boyhood he earned a precarious living as itinerant correspondent for various firms, alternating this occupation with that of sign-writer; and then he obtained employment in the editorial office of the "Gazeta Warszawska," where his intelligence attracted the attention of the editor, Dr. Krugski, and where he rose to be dramatic critic. But the stage itself had such attractions for the youth that he began studying at the Warsaw Theatrical School (1835). On Nov. 30, 1837, Dawison appeared at the Polish Theater as *Gustav* in "Zwei Galeerensträflinge," and he obtained engagements in 1839 at Warsaw and Wilna. On Aug. 9, 1841, he made his German debut as *Baron Sternhelm* in "Das Letzte Abenteuer," following with *Ferdinand* in Schiller's "Kabale und Liebe" and *Masham* in "Un Verre d'Eau." Dawison remained in Lemberg for five years, going thence in 1846 to Breslau, Brieg, and Stettin.

BOGUMIL DAWISON.

His next appearance was on Feb. 13, 1847, at Hamburg, where a year later he married Wanda von Ostaja-Starzewska. In 1849 he starred in Vienna,

and on Nov. 6 signed a six-year contract with Heinrich Laube. The latter developed Dawison's latent powers and made him the greatest character-actor on the German stage.

Two years before his contract with Laube had expired, Dawison went to the Hof-Theater in Dresden, where he became the rival of the local favorite, Emil Devrient. Numerous bickerings ensued, and Dawison departed for Munich, whence he went to Berlin (1855-56). He appeared in Paris at the celebration of the one hundredth anniversary of Schiller's birth (1859), and on reciting the entire third act of "Don Carlos" was acclaimed by the French as the greatest exponent of classic declamation.

In 1864 Dawison starred Germany, and in 1866 he went to the United States. He played seventy-six times while there, earning for himself \$50,000. On his return his memory gave way, and a few months later he became a raving maniac. He died while in a paroxysm.

His best rôles were *Mephisto*, *Franz Moor*, *Marc Antony*, *Hamlet*, *Alba*, *Don Carlos*, *Charles V.*, *Ricaut de la Marlinière*, *Harleigh*, *Stephan*, *Foster*, *Molière*, *Morinelli*, *Richard III.*, *Lear*, and *Othello*. For the Polish stage Dawison wrote some dramas and comedies, among them "Nasz Antos," Warsaw, 1835, and "Noc i Poranek" (after Bulwer's novel "Night"), Warsaw, 1844.

DAY (Hebrew, "yom"): In the Bible, the season of light (Gen. i. 5), lasting "from dawn [lit. "the rising of the morning"] to the coming forth of the stars" (Neh. iv. 15, 17). The term "day" is used also to denote a period of twenty-four hours (Ex. xxi. 21). In Jewish communal life part of a day is at times reckoned as one day; e.g., the day of the funeral, even when the latter takes place late in the afternoon, is counted as the first of the seven days of mourning; a short time in the morning of the seventh day is counted as the seventh day; circumcision takes place on the eighth day, even though of the first day only a few minutes remained after the birth of the child, these being counted as one day. Again, a man who hears of a vow made by his wife or his daughter, and desires to cancel the vow, must do so on the same day on which he hears of it, as otherwise the protest has no effect; even if the hearing takes place a little time before night, the annulment must be done within that little time. The day is reckoned from evening to evening—i.e., night and day—except in

reference to sacrifices, where daytime and the night following constitute one day (Lev. vii. 15; see **CALENDAR**). "The day" denotes: (a) Day of the Lord; (b) the Day of Atonement; (c) the treatise of the Mishnah that contains the laws concerning the Day of Atonement (see **YOMA** and **SABBATH**).

E. G. H.

M. F.

DAY OF JUDGMENT (יום הדין): Name given to the first of Tishri, as being the New-Year's Day. In the Bible the Day of the Blowing of the Trumpet is the first day of the seventh—Sabbatical—month (Lev. xxiii. 24), and no mention is made of the Day of Judgment. The "day of God," in the sense of a time of divine judgment of the wicked, is the one that will appear at the end of days (see **DAY OF THE LORD**; **ESCHIATOLOGY**); and a description of the divine judgment in heaven is found in Dan. vii. 9, 10, 22, where the "Ancient of days" is depicted as sitting upon the throne while the books are opened before Him. This description is also found in the apocryphal books. Of a specific day in the year on which God holds judgment over the world, no trace is found in pre-Talmudic literature. Philo, in his treatise on the festivals, calls New-Year's Day the festival of the sacred moon and feast of the trumpets, and explains the blowing of the trumpets as being a memorial of the giving of the Law and a reminder of God's benefits to mankind in general ("De Septennario," § 22). The Mishnah R. H. i. 2 contains the first known reference to the Day of Judgment. It says: "Four times in the year the world is judged: On Passover a decree is passed on the produce of the soil; on the Pentecost, on the fruits of the trees; on New-Year's Day all men pass before Him [the Lord] כבני מרן [an expression rendered by the Amoraim "like young lambs" (see "Aruk," s.v. בני מרן and אמר)]; and on the Feast of Tabernacles a decree is passed on the rain of the year."

This Mishnaic dictum is amplified in the Tosef. R. H. i. 11-13. Besides the Psalm (xxxiii. 15) quoted in regard to New-Year's Day, Ps. lxxx. 4-5 is quoted, and then follows R. Akiba's dictum:

"On the [second] Passover day the barley-offering is an invocation to God for the blessing of the soil's produce; the firstlings brought on Pentecost are an invocation for the blessing of the fruits of the trees; and the libation of water on the Feast of Tabernacles is an invocation for blessing through rain. On New-Year's Day the threefold prayer should be recited, the first extolling God as King, 'Malkiot'; the second imploring God's remembrance for the good of man, 'Zikronot'; and the third referring to the trumpet's blasts, 'Shofarot.' For on New-Year's Day all men are judged; and the decree is sealed on the Day of Atonement."

R. Jose says, with reference to Job vii. 18, "Man is judged every day"; while R. Nathan explains it as "God judges man every moment" (R. H. 16a; Yer. R. H. i. 57a).

While the views of both R. Jose and R. Nathan seem to contradict that held by their master Akiba, the latter's has been universally received, and has found expression in the New-Year's liturgy which, while called "Teki'ata de-Rab" (Yer. R. H. i. 57a; Pes. xxiii. 150a) is by no means a composition of Rab's, but is "the Teki'ah liturgy fixed in Rab's school-house," and is of Essene origin (R. H. 32b, ותיקים; see Joel, "Notizen," p. 30, Breslau, 1873;

LITURGY; ESSENE). As is shown from the Mishnah quoted, the first of Tishri was known only by the name of "New-Year" (see also ATONEMENT, DAY OF; NEW-YEAR).

K.

F. R.—K.

DAY OF THE LORD (יִום ה'): An essential factor in the prophetic doctrine of divine judgment at the end of time (see ESCHATOLOGY), generally, though not always, involving both punishment and blessing. It is identical with "that day" (הַיּוֹם הַהוּא: Isa. xvii. 7, xxx. 23, xxxviii. 5; Hos. ii. 18; Micah ii. 4, v. 10; Zech. ix. 16; xiv. 4, 6, 9), "those days" (Joel iii. 1), "that time" (הַזֶּמַּן הַהוּא: Jer. xxxi. 1, R. V.; xxx. 25, Hebr.; Zeph. iii. 19, 20), or simply "the day" (Ezek. vii. 10), or "the time." On the supposition that Genesis reflects the nation's earliest hopes—denied by the critical schools—the promises given to the Patriarchs of ultimate blessings upon Israel and, through Israel, upon mankind (Gen. xii. 2, 3; xvii. 2, 4, 5, 6; xxvi. 3, 4; xxvii. 29; xxxii. 12), may be taken for the primitive germ of the idea. The original conception was probably that of the day on which YHWH manifests Himself as the wielder of thunder and lightning, as the devastator who shatters the powers opposing Him; and this was in historical times transformed into the day when He would smite Israel's foes (compare Isa. xiii. 6; Ezek. xxx. 3). But in the eighth century B.C. Amos is found sounding a decided warning against his people's expectation that simply because they are YHWH's people the "day of YHWH" will bring requitement on Israel's enemies alone. It will be an occasion of visiting wrong-doing both within and without Israel. "I will cause the sun to go down at noon, and I will darken the earth in the clear day" (Amos v. 18; viii. 9).

In Amos the punitive aspect of "the day" is dominant; ix. 8-15 is held to be exilic by most modern commentators; but see Driver, "Joel and Amos," pp. 119-123 (Amos iii. 2, v. 18, viii. 9). The day is "darkness and not light" (v. 18). Amos' contemporary Hosea does not use the phrase, but he expresses the idea of a judgment to come along lines identical with those found in Amos (Hosea x. 8, xiii. 16). Isaiah, too, strikes in the main the note of gloom. Israel and Judah both feel the weight of divine wrath provoked by their unrighteousness (Isa. i. 10-17, 21-26; ii. 19-21; iii. 1-15; v. 8-24). But this will show YHWH's power. He will be exalted (ii. 11-17). The judgment cometh suddenly with earthquakes and thunder and tempest and whirlwind and the flame of a devouring fire (xxix. 6). Still through this terrible process, like the purifying of silver, the nation will be restored on a basis of righteousness (i. 24-26). Isaiah's horizon is national. The foreign nations, too, will be judged, but only in relation to Israel. The kingdom is Israel's alone (this is on the theory that the Messianic passages, except Isa. i. 24-26, are of a later age; see Cheyne, Duhm, Hackmann, G. A. Smith, and others; Hastings, "Dict. Bible," ii. 488). Micah, too, emphasizes the doom of Jerusalem as the feature of the end-time (iii. 12).

In the latter half of the seventh century B.C. (Nahum, Habakkuk, and Zephaniah) the idea that "that day" will see the punishment of wicked Assyria

in behalf of righteous Israel finds expression. This view thus contains a new ethical element; it is not, as formerly in the popular conception (see above), the *natural* relation of Israel and YHWH that brings wrath upon Israel's enemies, but it is because Israel is righteous (צַדִּיק), and Assyria, or non-Israel, is wicked (רָשָׁע; Hab. i. 4, 13). Judgment and consequent destruction fall on the "Gentiles," not on Israel. There is here the first intimation of a world-judgment in connection with "the day," an aspect that becomes thenceforth more and more prominently emphasized. Zephaniah, indeed, puts it strongly, but with the significant addition that a righteous remnant of Israel will survive the day ("judgment" on Jerusalem—i. 8-13; on Philistia, Ethiopia, Assyria—ii. 1-6; "on the nations"—iii. 8; on the earth's inhabitants—i. 2, 3). The day of YHWH is a day of trouble, distress, and desolation; of supernatural terrors and of darkness and thick darkness (i. 14-18). The assembled nations are destroyed by YHWH's anger (iii. 8). The enemies of Israel who are to be punished are, in Zephaniah's conception, no longer definite peoples, as they were for Isaiah (see above); they are the גִּוִּים generally, and the instruments of God's punitive power are a mysterious if not mythical people—the "invited guests" of YHWH (קְרָאִי, i. 7).

In the Exile the conception underwent further amplifications. Judgment is held to deal with individuals. As a result a righteous congregation (not nation) was to emerge to form the nucleus of the Messianic kingdom. This kingdom was to have its prelude in the day of YHWH, meting out individual retribution (Jer. i. 11-16; xxiii. 7, 8; xxiv. 5, 6; xxv. 15-24, 27-33; xxxvi. 6-10), which will lead to change of heart (xxiv. 7; compare xxxii. 39); a new heart and a new covenant (xxxii. 33, 34). The blessings of the new conditions will be participated in by the nations (iii. 17; xii. 14, 15; xvi. 19). Only the impenitent will be destroyed (xii. 16, 17).

Ezekiel's vision enlarges on details. A universal uprising of the nations under Gog is one of the incidents (compare Ezek. xxxviii., xxxix.; Zeph. i. 7). With this the climax in the development of the idea of the day of YHWH seems to have been reached. Henceforth the thought of judgment (= day of YHWH) disappears almost entirely, and is succeeded by a universal Messianic kingdom, preceded not by a day of wrath, but by the missionary zeal of righteous Israel and the spontaneous conversion of the nations (see MESSIAH).

Of the post-exilic prophets only Malachi lays great stress on the element of judgment. The Temple is central to his religious construction.

After the Exile. To it YHWH will come suddenly, but a messenger will prepare for His coming for judgment. Before that "great and dreadful day" ELIJAH will "turn the heart of the fathers to the children, and the heart of the children to their fathers" (Mal. iv. 23, 24 [A. V. 5, 6]). This judgment (in Hag. ii. 21-23, it is destructive for the nations) is only on Israel (*ib.* ii. 17; Mal. iii. 3, 5, 13 *et seq.*). The day "burns as a furnace"; it destroys "all the proud and the workers of iniquity."

In apocalyptic writings, however, the day of

YHWH reappears. Joel (400 B.C.) reverts to it. The valley of Jehoshaphat is the place of judgment. The nations are gathered, judged, and annihilated (Joel iii. 1, 2, 12). YHWH is Israel's defender (iii. 2). Israel is justified, but it is Israel purified (ii. 25-27, 28, 29; iii. 16, 17). Before "the day" all Israel is filled with the spirit of God (ii. 28, 29). Nature announces its approach (ii. 30, 31). As in Joel, so in all apocalyptic visions the idea is prominent that the day of YHWH (= of judgment) marks evil's culmination, but that Israel and the righteous will be supernaturally helped in their greatest need. Faintly foreshadowed in Ezekiel, this thought is reproduced in various ways, until in Daniel (vii. 9, 11, 12, 21, 22; xii. 1) it finds typical expression, and is a dominant factor in Jewish apocalyptic writings and Talmudic eschatology (see APOCALYPTIC LITERATURE, s.v. BOOK OF ENOCH; DANIEL; DAY OF JUDGMENT; ESCHATOLOGY).

Regarding the name "Day of the Lord" given by Christianity to Sunday, see DIDASCALIA; RESURRECTION FROM THE DEAD; SUNDAY. Regarding the Talmudic day of God in the sense of "millennium," see MILLENNIUM.

DAYS, LUCKY AND UNLUCKY. See SUPERSTITION.

DAYYAN, ABRAHAM BEN ISAIAH: Turkish rabbi; lived at Aleppo, Asiatic Turkey, in the first half of the nineteenth century. He wrote "Shir Hadash" (A New Song), an Arabic glossary on the Psalms (Leghorn, 1841); "Zikron ha-Nefesh" (Remembrance for the Soul), ethical discourses arranged in alphabetical order (*ib.* 1842); and a work in two parts: the first, "Holek Tamim" (He Who Walks in Uprightness), similar in character and arrangement to the preceding; the second, "Po'el Zedek" (He Who Acts Justly), responsa (*ib.* 1850). At the end of the last-named work the author gives a history of Aleppo, or, as he calls it, Aram Zobah, from its conquest by David to the present time.

DAYYENA. See DIENA.

DEAD BODY. See CARCASS.

DEAD, DUTY TO THE: The dead, free from all obligation (Shab. 30a), have many claims upon the living. "Their wish must be respected and fulfilled" (Git. 14b; Maimonides, "Yad," Zekiyah, viii. 2, xiii. 1; Shulhan 'Aruk, Hoshen Mishpat, 125, 8). "It is unlawful to speak evil of the dead" (Ber. 19a; Mordecai Yoma, ii. 1196; Hagahot Asheri Ta'anit, iii. 64; compare Diogenes Laertius, "Chilon," i. 3, 70, whence the Latin proverb "De mortuis nil nisi bonum"). It is a transgression of the Law (Deut. xxi. 23) not only to leave the dead unburied (see BURIAL), but also to do anything which may disfigure or desecrate the dead (נוול המת) (Yer. Sanh. vii. 3; Yer. Soṭah iii. 19b; see CRUELTY). For this reason a post-mortem examination was forbidden by R. Akiba (B. B. 154a, b; compare Hul. 11b), although ana-

tomical knowledge was obtained by occasional post-mortem examinations such as are mentioned in Ber. 45a (compare Nid. 30b). In fact disrespectful treatment of a dead human body, as, for instance, placing the bones in a sack and loading them upon a beast, instead of carrying them reverently to their last resting-place, is regarded as inhuman (Ber. 18a). See also BURIAL SOCIETIES; CEMETERY; FUNERAL RITES.

"Every act of kindness done to the dead is called 'hesed shel emet' [= "true unselfish love"] because the hope of compensation is excluded" (Gen. R. xevi.).

In case the dead was offended in his lifetime, his pardon is to be solicited at the grave by the offender in the presence of ten persons (Yoma 87a; Yer. Yoma viii. 45c); this is called asking "me'ilah." Particularly should the memory of the righteous be held in honor, and his name when mentioned be blessed (Ps. cxii. 6; Prov. x. 7; Yoma iii. 11; Pesik. R. 12; Midr. Teh. to Ps. cxviii. 1; Gen. R. xlix.; Midr. Shemuel i.). For this reason the names of good men, and especially of parents, were preserved by being given to children (Haggadah Shab. i. 17; see Zunz, "Z. G." p. 318). When mentioned, the name of the dead, especially of parent or teacher, is to be accompanied by some formula of blessing upon his memory (Kid. 31b; see INVOCATION; Zunz, *l.c.* pp. 320-348). See also JAHRZEIT; KADDISH; LEVIRATE.

K.

DEAD SEA: Lake in southeast Palestine, and one of the curious natural phenomena of the earth. It occupies the lowest part of the great depression which extends from northern Palestine to the Gulf of Akabah. At its most northerly point 150 meters above the level of the Mediterranean, the depression south of the Dead Sea rises to a height of 240 meters. The surface of the Dead Sea is 394 meters, and its greatest depth not less than 793 meters, below the level of the Mediterranean. Therefore the present formation of the basin prohibits any outflow, and geological investigations have shown that there never was one. The Jordan pours daily 6,000,000 tons of water into the Dead Sea; but since about an equal amount is daily evaporated, the level remains nearly the same, varying only from 4 to 6 meters with the change of seasons. Owing to this

evaporation, to the mineral character of its own basin, and to the constant addition of saline elements from the **Water.** Jordan, the water of the Dead Sea contains a large proportion of mineral matter, chiefly salt, chlorids of magnesium and calcium. It is consequently bitter to the taste and has an oily consistency. It is likewise extremely buoyant. The human body floats well out of the water, and diving is almost impossible. With the exception of some microscopic protophytes—namely, fresh-water diatoms and pathogenic microbes—nothing can live in the waters of the Dead Sea. Even salt-water fish die in it, and the bodies of fresh-water fish carried down by the Jordan float on the surface in great numbers. It is not true, however, that birds

flying over the sea die. Another peculiarity is the amount of asphalt that floats in large quantities on the surface. This is probably due to the great prevalence of sulfur on the shores.

The Dead Sea is enclosed east and west by mountain ridges, which, forming to the northwest the headland Ras Feshkhah, descend abruptly into the water. Elsewhere on the west the ridges are separated from the sea by a barren strip of land, of which the only cultivable part lies below the spring Engedi. On the east the mountains descend precipitously to the water's edge, except where a fertile little plain marks the mouths of a wadi. In the southern part, at the mouth of the Wadi beni Hamad, there is an extensive level stretch, forming the

refers to it as "Salt Sea," or the "Sea of Sodom"; and Josephus and Pliny call it "Lake Asphaltites."

The name "Dead Sea" is used by Paulsanias, Justin, and the Church Fathers.
Names
Given to It. Josephus ("B. J." iv. 8, § 4) mentions the salty taste of its water, the impossibility of diving in it, its change of color, and the great floating blocks of asphalt, which were used for calking ships and for medicinal purposes. Similar descriptions are given by Tacitus ("Hist." v. 6) and Pliny ("Hist. Naturalis," v. 15). The Talmud (Shab. 108b) mentions the density of the water, and says that a bath in the Dead Sea is considered good for certain ills, especially diseases of the eye, although the salt extracted from the sea was considered

VIEW OF THE DEAD SEA.

(From a photograph by Bonfils.)

large peninsula Al-Lisan. This peninsula—which in its southern extremity is rich in salt—divides the sea into two unequal parts; the smaller and shallower in the south, and the larger in the north, where the sea is deeper. On the southern shore of the sea is an open barren plain, Al-Sabkhah, the brown soil of which is flecked with salt. Toward the west rises a high ridge, Jabal Usdum, which is composed almost entirely of salt.

The Dead Sea, known at present as "Baḥr Luṭ" (Lot's Sea), is called in the Old Testament "Sea of Arabah" (R. V. Deut. iii. 17; Josh. xii. 8), "East" or "Eastern Sea" (Ezek. xlvii. 18; Joel ii. 20; Zech. xiv. 8) and "Salt Sea" (Gen. xiv. 3). The Talmud

noxious to the eyes (Hul. 105b). Because of the poisonous air about the sea no ship sailed on it (Hirschensoln, "Sefer Sheba' Hokmot," 1888, p. 173).

The destruction of the five cities of Sodom, which, according to the Old Testament, were near the Dead Sea (Gen. xiv. 3), is intimately connected with the geological history of the region. After

References the great depression of the Jordan valley, with its southern continuation, **to It in Old Testament.** had been formed, it became the basin of a mighty sea during the heavy rains of the diluvian epoch. The surface of this sea—which stretched from the watershed of the Araba valley, south of the Dead Sea, to the Sea of Galilee—was 426 meters above the present level of the Dead Sea, and about 30 meters above that of the

Mediterranean. Traces of fresh-water vegetation show that the water did not then contain nearly so much salt as at present. It became salty as it sank, leaving that great deposit of salt to the south, of which the Jabal Usdum is a remnant. A second rising of the water produced the high terraces lying south of the sea and extending along both sides of the Jordan; and a third gave rise to the lower terraces lying in front of the others. Blanckenhorn conjectured that an earthquake depressed the bottom of the valley south of the sea, where the five cities were situated, causing the salt sea to flood it. He sees a connection between the asphalt pits of the valley of Siddim and the large amount of asphalt

in the southern part of the sea, and thinks that an earthquake might have freed the gases of petroleum and asphalt confined in the earth. These could easily have become ignited, thus causing the catastrophe. The event would naturally have been preserved by tradition; and it does actually figure in extra-Biblical accounts. Justin attributes to it the separation and emigration of the Canaanitish tribes.

F. Bu.

DEAF AND DUMB IN JEWISH LAW: In Jewish legislation deaf and dumb persons are frequently classed with minors and idiots, and are considered unable to enter into transactions requiring responsibility and independence of will. They are regarded as irresponsible persons in the eye of the law, and in many cases their claims upon others, or the claims of others upon them, have no validity. Still, to preserve peace and order, the Rabbis made special provisions for this class in civil, criminal, and ritual cases.

The deaf-mute, as well as the deaf or the mute, was not competent to be a witness to any transaction; for all testimony was given by

As word of mouth, and the witnesses had **Witnesses.** to be able to hear the exhortation of the court. There was only one exception to this rule, and that was in the case of an 'AGUNAH, where the testimony of deaf-mutes was sufficient to warrant her remarriage. No oath could be administered to deaf-mutes, nor could an oath be administered through charges brought by them (Maimonides, "Yad," To'en, v. 12; Shulhan 'Aruk, Hoshen Mishpat, 96, 5). To a dumb person, however, an oath could be administered, either by his writing out the formula of the oath above his signature, or by his assenting to the oath read before him by nodding his head in approval (Eisenstadt, "Pithei Teshubah," Shulhan 'Aruk, *ad loc.*).

A deaf-mute who caused bodily injury to another

person, or whose ox gored a man, could not be punished by the court, although an injury to him or to his possessions was punishable. The court, however, had to appoint a trustee for the ox that proved itself to be mischievous; and this trustee was then held responsible (B. K. 39a, 87a; "Yad," Nizke Mamon, vi. 3; *ib.* Hobei, iv. 20; Hoshen Mishpat, 406, 5, and 424, 8).

The uninterrupted possession of real estate for three years, which, according to Jewish law, established one's claim to the land, was of no avail when the property belonged to a deaf-mute, or when the deaf-mute was the holder (To'en, xiii. 2; Hoshen Mishpat, 149, 18).

The deaf-mute or the deaf, after he had satisfied the court as to his full understanding of the transaction under consideration, could buy and sell movable goods, but not real estate. The dumb, however, who was not deaf, might transact business and make gifts, even in real estate (Git. 59a, 71a; "Yad," Mekirah, xxix. 2; Hoshen Mishpat, 235, 17-19).

Since the deaf-mute had no legal power of acquiring property, if he found anything he was not entitled to the possession of it, and any one might take it away from him. The Rabbis, however, considered this an act of robbery; and in order to preserve the peace of the community, they decided that such property must be returned to him (Git. 59b; "Yad," Gezeleh, xvii. 12; Hoshen Mishpat, 270, 1).

According to Biblical law as interpreted by the Rabbis, the marriage of a deaf-mute was not valid; yet the Rabbis sanctioned such a mar-

Marriage. riage when contracted by signs. Since this was merely a rabbinical provision, it had not the same validity as a perfect marriage; and many complications often arose therefrom (Yeb. 112b; "Yad," Ishut, iv. 9; Shulhan 'Aruk, Eben ha-'Ezer, 44, 1). A male deaf-mute was not permitted to perform the levirate ceremony ("halizah"); nor could this ceremony be performed in the case of a deaf-mute woman (Eben ha-'Ezer, 172, 11).

Just as the male deaf-mute could marry by signs, so also could he divorce his wife by signs. The questions put to him in order to determine his full knowledge of the transaction, were at least three in number, two of which required a negative and one a positive answer, or vice versa. The deaf-mute and the mute were examined in the same manner, and a divorce was then granted by the court. But if at the time of marriage the husband had been perfectly sound, and he had become deaf and dumb after his marriage to the woman, the law did not permit him to divorce his wife (Yeb. 112b; "Yad," Gerushin, ii. 16, 17; Eben ha-'Ezer, 121, 5, 6).

In the case of a deaf-mute who was permitted to divorce his wife by signs, the court gave to the divorced woman, in addition to the regular bill of divorce ("get"), a note which read as follows:

"On the day . . . —we, the undersigned, members of the court, sitting in a court of three, being of one mind—there came before us . . . , who made us understand by signs that he wished to divorce . . . , who was married to him by signs; and when he thus explained to us his intention by signs, we wrote this bill of divorce by which she becomes entirely divorced and free to be married to any man that she may desire, and none shall hinder her from that day forever. And this shall be unto her a

bill of dismissal, a document of release, and a letter of freedom according to the institutions of the Rabbis, and she shall be permitted to marry any man" (Eisenstadt, "Pitḡe Teshubah," *ad loc.* quoted from the code of R. Terveham).

In ritual matters, similar restrictions were placed upon deaf-mutes. The deaf-mute and the 'eaf could not discharge the religious obligation of an Israelite to hear the blowing of the shofar on New-Year's Day, by blowing it before him, while the mute might do so (R. H. 29a; "Yad," Shofar, ii. 2; Shulḥan 'Aruk, Oraḥ Ḥayyim, 589, 2). The same law prevailed in reference to the reading of the Book of Esther ("Megillah") on Purim (Meg. 19b; "Yad," Megillah, i. 2; Oraḥ Ḥayyim, 689, 2).

The deaf-mute was not permitted to slaughter an animal; but if he did slaughter one, and others saw that it was done in accordance with the prescribed rules, its flesh could be eaten. Neither was the deaf allowed to slaughter; but if he did slaughter an animal, although no one saw him do it, its flesh could also be eaten. The mute might slaughter, if some one pronounced the blessing for him (Hul. 2a; "Yad," Sheḥiṭah, iv. 5, 9; Shulḥan 'Aruk, Yoreh De'ah, i. 5 and 7).

J. H. G.

DEAF-MUTISM: Disease of the ear, generally beginning in infancy, causing deafness and consequent dumbness. As with blindness, Jews, at any rate in modern times, have shown a marked tendency toward deaf-mutism—in the general proportion, as compared with non-Jews, of two to one. The following table indicates this:

There appears to be no distinction between the liability of Jews and of Jewesses in this regard, though the proportion of females so afflicted is slightly less among both Jews and non-Jews. There is some evidence to show that the liability is racial, or at any rate congenital. A. Guttstadt ("Verbreitung der Blinden und Taubstummen im Preussischen Staate," p. 139) points out that the proportion of those who became deaf and dumb after birth is practically the same among Jews and Christians—3.2 as against 2.7; whereas there were 6.5 per 10,000 congenitally deaf among Jews as against only 3.4 among Christians.

The reasons for this inferiority among Jews are probably their continued residence in towns and cities, their general tendency to nervous diseases, possibly the result of continued persecution, and their tendency to consanguineous marriages. Thus, in 1882, of the twenty-eight families represented

among the inmates of the Jews' Deaf and Dumb Home, London, the three families resulting from first-cousin marriages had an average of three deaf-mutes among them, whereas among the rest only an average of 1.2 was found (Twelfth Report, p. 16).

As the Jews have suffered most from this disease, it is perhaps only natural that they should have done much to alleviate it. Jacob Rodriguez Pereire was the first to invent a means of training deaf-mutes to utter articulate sounds, and thus prevent their depending upon signs. His method has been the foundation for all modern improvement, and has been reintroduced during the present generation, the chief exponent of the method in England being also a Jew, Mr. J. Van Praagh.

DEATH, ANGEL OF.—Biblical Data: In the Bible death is viewed under form of an angel sent from God, a being deprived of all voluntary power. The "angel of the Lord" smites 185,000 men in the Assyrian camp (II Kings xix. 35). "The destroyer" ("ha-mashhit") kills the first-born of the Egyptians (Ex. xii. 23), and the "destroying angel" ("mal'ak ha-mashhit") rages among the people in Jerusalem (II Sam. xxiv. 15). In I Chron. xxi. 15 the "angel of the Lord" is seen by David standing "between the earth and the heaven, having a drawn sword in his hand stretched out over Jerusalem." Job (xxxiii. 22) uses the general term "destroyer" ("memitim"), which tradition has identified with "destroying angels" ("mal'ake ḥabbalah") (Bacher, "Ag. Pal. Amor." iii. 279, note 9), and Prov. xvi. 14 uses the term the "angels of death" ("mal'ake ha-mawet"). See DEMONOLOGY.

The Rabbis found the angel of death mentioned in Ps. lxxxix. 45 (A. V. 48), where the Targum translates: "There is no man who lives and, seeing the angel of death, can deliver his soul from his hand" (compare also Targ. to Job xviii. 13; Ps. xci. 5; Hab. iii. 5). Eccl. viii. 4 is thus explained in Midr. R. to the passage: "One may not escape the angel of death, nor say to him, 'Wait until I put my affairs in order,' or 'There is my son, my slave: take him in my stead.'"

—**In Rabbinical Literature:** The angel of death occurs very frequently in rabbinical literature.

Where the angel of death appears there is no remedy (Ned. 49a; Hul. 7b). If one who has sinned has confessed his fault, the angel of death may not touch him (Tan., Balak, ed. Buber, 139). God protects from the angel of death (Gen. R. lxviii.). By acts of benevolence the anger of the angel of death is overcome; when one fails to perform such acts the angel of death will make his appearance (Derek Erez Zuṭa, viii.). The angel of death receives his order from God (Ber. 62b). As soon as he has received permission to destroy, however, he makes no distinction between good and bad (B. K. 60a). In the city of Luz the angel of death has no power, and when the aged inhabitants are ready to die they go outside the city (Sotah 46b; compare Sanh. 97a). A legend to the same effect existed in Ireland in the Middle Ages ("Jew. Quart. Rev." vi. 336).

The angel of death was created by God on the

first day (Tan. on Gen. xxxix. 1). His dwelling is in heaven, whence he reaches earth in eight flights, whereas pestilence reaches it in one

Form and Functions. (Ber. 4b). He has twelve wings (Pirke R. El. xiii.). "Over all people have I surrendered thee the power," said

God to the angel of death, "only not over this one which has received freedom from death through the Law" (Tan. to Ex. xxxi. 18; ed. Stettin, p. 315). It is said of the angel of death that he is full of eyes. In the hour of death he stands at the head of the departing one with a drawn sword, to which clings a drop of gall. As soon as the dying man sees the angel, he is seized with a convulsion and opens his mouth, whereupon the angel throws the drop into it. This drop causes his death; he turns putrid, and his face becomes yellow ('Ab. Zarah 20b; in detail, Jellinek, "B. H." i. 150; on putrefaction see also Pesik. 54b; for the eyes compare Ezek. i. 18 and Rev. iv. 6). The expression "to taste of death" originated in the idea that death was caused by a drop of gall ("Jew. Quart. Rev." vi. 327; see DEATH, VIEWS OF).

The soul escapes through the mouth, or, as is stated in another place, through the throat; therefore the angel of death stands at the head of the patient (Jellinek, *l.c.* ii. 94, Midr. Teh. to Ps. xi.). When the soul forsakes the body its voice goes from one end of the world to the other, but is not heard (Gen. R. vi. 7; Ex. R. v. 9; Pirke R. El. xxxiv.). The drawn sword of the angel of death, mentioned by the Chronicler (I. Chron. xxi. 15; comp. Job xv. 22; Enoch lxii. 11), indicates that the angel of death was figured as a warrior who kills off the children of men. "Man, on the day of his death, falls down before the angel of death like a beast before the slaughterer" (Grünhut, "Likḳuṭim," v. 102a). R. Samuel's father (*c.* 200) said: "The angel of death said to me, 'Only for the sake of the honor of mankind do I not tear off their necks as is done to slaughtered beasts'" ('Ab. Zarah 20b). In later representations the knife sometimes replaces the sword, and reference is also made to the cord of the angel of death, which indicates death by throttling. Moses says to God: "I fear the cord of the angel of death" (Grünhut, *l.c.* v. 103a *et seq.*). Of the four Jewish methods of execution three are named in connection with the angel of death: burning (by pouring hot lead = the drop of gall), slaughtering (by beheading), and throttling. The angel of death administers the particular punishment which God has ordained for the commission of sin.

A peculiar mantle ("idra"—according to Levy, "Neuhebr. Wörterb." i. 32, a sword) belongs to the equipment of the angel of death (Eccl. R. iv. 7). The angel of death takes on the particular form which will best serve his purpose; *e.g.*, he appears to a scholar in the form of a beggar imploring pity (M. K. 28a). "When pestilence rages in the town, walk not in the middle of the street, because the angel of death [*i.e.*, pestilence] strides there; if peace reigns in the town, walk not on the edges of the road. When pestilence rages in the town, go not alone to the synagogue, because there the angel of death stores his tools. If the dogs howl, the angel of death has entered the city; if they make sport, the prophet Elijah has come" (B. K. 60b). The "des-

IV.—31

trouder" ("saṭan ha-mashḥit") in the daily prayer is the angel of death (Ber. 16b). Midr. Ma'ase Torah (compare Jellinek, "B. H." ii. 98) says: "There are six angels of death: Gabriel over kings; Kapziel over youths; Mashbir over animals; Mashhit over children; Af and Hemah over man and beast."

When the Messiah comes all the dead will arise, and there will be an end to death; for the angel of death himself will be destroyed by the Messiah (Pesik. R., ed. Friedmann, p. 161b). Satan, as the angel of death, is identified here with Antichrist. "The last enemy that shall be destroyed is death" (I Cor. xv. 26; compare Heb. ii. 14). The same

Identical with Antichrist. idea seems to be expressed in the Book of Jubilees xxiii. 29: "And they shall fulfil all their days in peace and joy, and shall live on, since there will be no Satan and no evil to destroy them."

The angel of death, who is identified with Satan, immediately after his creation had a dispute with God as to the light of the Messiah (Pesik. R. 161b). When Eve touched the tree of knowledge, she perceived the angel of death, and thought: "Now I shall die, and God will create another wife for Adam" (Pirke R. El. xiii., end; compare Targum Yer. to Gen. iii. 6, and Yalk. i. § 25). Adam also had a conversation with the angel of death (Böcklen, "Die Verwandtschaft der Jüdisch-Christlichen mit der Parsischen Eschatologie," p. 12). The angel of death sits before the face of the dead (Jellinek, *l.c.* ii. 94). While Abraham was mourning for Sarah the angel appeared to him, which explains why "Abraham stood up from before his dead" (Gen. xxiii. 3; Gen. R. lviii. 5, misunderstood by the commentators). Samuel told Sarah that Abraham had sacrificed Isaac in spite of his wailing, and Sarah died of horror and grief (Pirke R. El. xxxii.). It was Moses who most often had dealings with the angel. At the rebellion of Korah, Moses saw him (Num. R. v. 7; Bacher, *l.c.* iii. 333; compare Sanh. 82a). It was the angel of death in the form of pestilence which snatched away 15,000 every year during the wandering in the wilderness (*ib.* 70). When Moses reached heaven, the angel told him something (Jellinek, *l.c.* i. 61).

When the angel of death came to Moses and said, "Give me thy soul," Moses called to him: "Where I sit thou hast no right to stand." And the angel retired ashamed, and reported the occurrence to God. Again, God commanded him to bring the soul of Moses. The angel went, and, not finding him, inquired of the sea, of the mountains, and of the valleys; but they knew nothing of him (Sifre, Deut. 305). Really, Moses did not die through the angel of death, but through God's kiss ("bi-neshikah"); *i.e.*, God drew his soul out of his body (B. B. 17a; compare ABRAHAM IN APOCRYPHAL AND RABBINICAL LITERATURE, and parallel references in Böcklen, *l.c.* p. 11). Legend seizes upon the story of Moses' struggle with the angel of death, and expands it at length (Tan., ed. Stettin, pp. 624 *et seq.*; Deut. R. ix., xi.; Grünhut, *l.c.* v. 102b, 169a). As Benaiah bound Ashmedai (Jew. Encyc. ii. 218a), so Moses binds the angel of death that he may bless Israel (Pesik. 199, where "lifne moto" [Deut. xxxiii. 1] is explained as meaning "before the angel of death").

Solomon once noticed that the angel of death was

grieved. When questioned as to the cause of his sorrow he answered: "I am requested to take your two beautiful scribes." Solomon at once charged the demons to convey his scribes to Luz, where the angel of death could not enter. When they were near the city, however, they both died. The angel laughed on the next day, whereupon Solomon asked the cause of his mirth. "Because," answered the angel, "thou didst send the youths thither, whence I was ordered to fetch them" (Suk. 53a). In the next world God will let the angel of death fight against Pharaoh, Sisera, and Sennacherib (Yalk., Isa. 428).

The teaching of God shields one from the power of the angel of death. The children of Israel have accepted the Torah only in order that the angel may have no power over them ('Ab. Zarah 5a). Since death results only from sin, it can not, of course, come to those who live in accordance with the Torah. Although the sentence of mortality once pronounced could never be recalled ('Ab. Zarah 5a), yet the angel of death may not visit teachers of the Law; he is rather their friend (*ib.* 35b), and even imparts learning to them (Ber. 51a).

Talmud teachers of the fourth century associate quite familiarly with him. When he appeared to one

on the street, the teacher reproached him with rushing upon him as upon a beast; whereupon the angel called upon him at his house. To another he granted a respite of thirty days, that he might put his knowledge in order before entering the next world. To a third he had no access, because he could not interrupt the study of the Talmud. To a fourth he showed a rod of fire, whereby he is recognized as the angel of death (M. K. 28a). He often entered the house of Bibi and conversed with him (Ḥag. 4b). Often he resorts to strategy in order to interrupt and seize his victim (B. M. 86a; Mak. 10a).

The death of Joshua ben Levi in particular is surrounded with a web of fable. When the time came for him to die and the angel of death appeared to him, he demanded to be shown his place in paradise. When the angel had consented to this, he demanded the angel's knife, that the angel might not frighten him by the way. This request also was granted him, and Joshua sprang with the knife over the wall of paradise; the angel, who is not allowed to enter paradise, catching hold of the end of his garment. Joshua swore that he would not come out, and God declared that he should not leave paradise unless he was absolved from his oath; if not absolved, he was to remain. The angel of death then demanded back his knife, but Joshua refused. At this point a heavenly voice ("bat kol") rang out: "Give him back the knife, because the children of men have need of it" (Ket. 77b; Jellinek, *l.c.* ii. 48-51; Bacher, *l.c.* i. 192).

L. B.

—**In Arabic Literature:** The angel of death is spoken of in the Koran (suras xxxii. 11, lxxix. 1), and is called by the Mohammedans Azrael—probably identical with *עֲזְרִיָּאל*, the angel of Gehinnom, according to "Emek ha-Melek" ("Tikkune Teshubah"; quoted by Eisenmenger, "Entdecktes Judenthum," ii. 333). "When Death was created by God, he, on account of his terrible power, had to be put in 70,000 chains of a thousand years' journey's length each, and behind millions of barriers. When Azrael was placed in charge of him and saw him, he called the angels to look at him, and when he, at God's command, spread his wings over him and opened all his eyes, the angels fainted away and remained unconscious for a thousand years. Azrael was given all the powers of the heavens to enable him to master Death."

Azrael reaches from one end of the world to the other (Jellinek, "B. H." v. 49), and has 70,000 feet and 4,000 wings. His whole body is covered with eyes (see 'Ab. Zarah 20b) and with tongues as numerous as the living creatures on earth. When any of these latter die, the corresponding eye bulges forth. At the end of the world all these eyes excepting eight are plucked out by God—those of Israfil (Sarafel), Michael, Gabriel, Azrael, and the four "hayyot" of the Heavenly Chariot alone remaining. The times of the death of persons is made known to the angel of death through the roll-book in his possession showing a white stripe around the name of the person doomed. Forty days before death, however, a leaf falls from the tree of life, under the throne of God, into the lap of Azrael, who is seated in the seventh heaven, thus announcing the death (compare Yer. Ber. ii. 8, 5c, and the picture of the fig-tree).

"When people lament and weep too much over the death of a person, the angel of death shall stand at the door and say: 'What cause have you for such violent complaint? I am only the messenger of God and have done His bidding, and if you rebel against Him, I shall return often to take one of your house'" (compare Midr. Yalk. to Deut. xiv. 1, 2; 'Er. 19b; and Böklen, *l.c.*).

"When a righteous person dies, the angel of death comes with a host of good angels, carrying sweet odors of paradise, and makes the soul leave the body like a drop taken out of a bucket of water. When a wicked person dies, the angel of death comes in the company of demons, who pull the soul out as with iron spits" (compare Midr. Teh. to Ps. xi. and "Nishmat Hayyim," ii. 20).

DEATH, VIEWS AND CUSTOMS CONCERNING.—**In Biblical and Apocryphal Literature:** The ancient Hebrews expected to "be gathered to [or sleep with] their fathers" when death befell them (Gen. xxv. 8, xlvii. 30), and feared only the idea of going down to Sheol mourning (*ib.* xxxvii. 35). To sleep and be at rest was the desire of the distressed (Job iii. 13-22). To die "in a good old age"

was regarded as a blessing (Gen. xv. 15, xxv. 8); to be cut off from the land of the living in the noontide of life was dreaded and looked upon as a misfortune (Isa. xxxviii. 10). Only occasionally the stings of death and the stroke of Sheol became terrors, from which the Lord was petitioned to redeem man (Hosea xiii. 14; Ps. xvi. 10, xlix. 16 [15], lxxxvi. 13). Nowhere, however, in the Bible is death regarded as a real evil, except from the point of view that man, being of divine origin, should have had, like any other heavenly being, access to the tree of life and have lived forever (Gen. iii. 22). Accordingly, the eschatological view found expression in such phrases as that "death will be swallowed up forever" and "the dead shall rise again" (compare Isa. xxv. 8, xxvi. 19).

Still the popular view in the days of Kohelet (Eccl. vii. 1, ix. 4-6) and of Ben Sira (Ecclus. [Sirach] xli. 1-4) was that there was no other prospect for man but that of the dreary life of the shades in Sheol, and this made life on earth all the more precious. Nor did this view in any way prevent Ben Sira from seeing in the yielding of the first woman to the tempter the cause of men's death (*ib.* xxv. 24). More pronounced on the latter point is the Book of Wisdom: "God created man to be immortal; . . . nevertheless through envy of the devil came death into the world" (Wisdom ii. 23, 24). "For God made not death; through righteousness immortality is obtained" (*ib.* i. 13, 16; vi. 18; xv. 3). This view (expressed also in Ethiopic Enoch, xcvi. 4 and Slavonic Enoch, xxx. 16-18) was made the basic idea of Paul's system of salvation (Rom. v. 12; I Cor. xv. 21; Heb. ii. 14), after the apocalyptic literature of the Jews had made the problem of sin and death the object of most serious reflection, which culminated in the hope of the final annihilation of death in the world to come (IV. Esd. iii. 7; vii. 32, 119; viii. 53). Satan is called in the New Testament "a murderer from the beginning" (John viii. 44) and "the destroyer" (I Cor. x. 10). See DEATH, ANGEL OF, IN RABBINICAL LITERATURE.

Death is conceived of as a person who has charge of the shades in the nether world (Ps. xlix. 15; see also DEMONOLOGY). He is their general (Gen. R. xxvi.).

The following is the description of Death as one of God's messengers:

"When Abraham had refused to let the archangel Michael take his soul, God said to the latter: 'Call Me hither Death of the shameless countenance and the pitiless look, [this seems to allude to the name of Azazel—*אזאזל*—and the deadly look (*עין הרק*)]. Death shivered and trembled at being called to come before the Lord, when God said to him: 'Come hither, thou bitter and fierce name of the world [an allusion to both Azazel and *אזאזל*, I Sam. xv. 32], hide thy fierceness, cover thy corruption, and cast away thy bitterness from thee, and put on thy beauty and all thy glory, and go down to Abraham My friend and bring him to Me.' Death put on a robe of great brightness and made his appearance like the sun, and became fair and beautiful above the sons of men, assuming the form of an archangel, his cheeks flaming with fire, and went to Abraham, a sweet odor and a flash of light announcing his coming to the patriarch, who took him to be an archangel, the chief captain of God, and welcomed him as the bringer of light and a most glorious helper. But Death rejoined: 'Most righteous Abraham, I am the bitter drop of Death' (*אני כדור המוות*), whence the name *אסיראל*; and when asked for his errand, he said: 'For thy holy soul am I come.' Abraham again refused to give up his soul. Death followed him into his chamber, and when Abraham lay down

upon his couch, he sat by his feet and would not depart, notwithstanding all the entreaties of the patriarch to let him live.

"On inquiry of the patriarch, he told him that only because of his great righteousness, his hospitality to men, and his love toward God, which became a crown of glory upon his head, did he approach him in such beauty and glory; to sinners he came in fierceness, corruption, and bitterness. 'Show me these,' asked Abraham; but Death replied, 'Thou canst not stand these looks.' Thereto Abraham answered: 'By means of the name of the living God—*יְיָ הַחַיִּים*—I shall be able to look.' So Death put off his sunlike glory and put on his tyrant-like robe and made his appearance fiercer than all wild beasts, and filthier than all filth, and he showed Abraham seven fiery serpents' heads and fourteen faces: (1) of flaming fire, (2) of darkness, (3) of a viper, (4) of a precipice, (5) of a fierce asp, (6) of a terrible lion, (7) of a cerastes, (8) of a basilisk, (9) of a fiery simitar, (10) of terrible lightning and thunder, (11) of a stormy sea, (12) of a rushing river, (13) of a three-headed serpent, and (14) of a cup filled with poison; and then he showed him every mortal disease emanating from the odor of Death. Seven thousand man- and maid-servants of Abraham died from the effect of this odor and sight, so that Abraham implored Death to hide his fierceness and to put on his former garb of beauty. Death complied with his request, and joined Abraham in a prayer to God to restore to life those who had died so suddenly by his fierceness; and the prayer was granted.

"Abraham, however, would not consent to surrender his soul until Death had explained to him the different forms and faces he had shown him in all their fierceness; whereupon Death replied that the seven heads of serpents indicated the seven ages during which he is to destroy all men, rich and poor, and to bring them to the bottom of Hades. Because people die by fire, by falling from precipices, by the sword, by rushing rivers, on the raging sea, and in storms of lightning, by wild beasts or cups of poison, he assumed all those aspects. Finally, he spoke of the seventy-two kinds of death [see ABRAHAM, TESTAMENT OF, and footnote, *JEW. ENCYC.* i. 95b] and of the death of the righteous. Then Death took the right hand of Abraham, and his soul clung to him."

Death appears here as the personification of psychical evil, with numerous traits borrowed from Ahriman in the Zend Avesta, but not of moral evil (see Test. Abraham, A, xvi.-xx.; "Texts and Studies," ii. 2, Cambridge, 1892; "Anti-Nicene Fathers," Eng. transl., pp. 183 *et seq.*, New York, 1897; see also DUMAH).

E. C.

K.

—**In Rabbinical Literature:** There are different views among Jews concerning the cause of death. Some assign it to Adam's first sin in partaking of the forbidden fruit (*Tanna debe Eliyahu* R. v.). This view is somewhat modified by the Rabbis, who regard death as the fruit of personal sin; maintaining that, like Adam, each person dies on account of his own sin (*Shab.* 55a, b), as "there is not a righteous man upon earth that doeth good and sinneth not" (*Eccl.* vii. 20). Still, the Rabbis speak of a number of "saintly men who died

Cause of Death. without sin and only in consequence of the poison of the serpent" (*בַּעֲטוּר שֶׁל נָחִי*); *e.g.*, Benjamin; Amram; Jesse, the father of David; and Chileab, David's son (*Shab.* 55b; B. B. 17a; compare *Derek Erez Zuta*, where thirteen persons are named). Another view is that death was ordained at creation, and that Adam by his sin merely hastened death (*Ex. R.* ii.; Tan. [Yelamdenu], Wayesheb, ed. Vienna, 44b). Accord-

ing to others, Adam was destined to live forever and not to taste death, but, owing to the fact that men like Hiram of Tyre and Nebuchadnezzar wanted to be worshiped as gods, God decreed death for man (*Ex. R.* ix.). The opinion is also expressed that God would have annihilated the power of the angel of death over Israel after its acceptance of the Law,

but for the fact that the divine decree could not be reversed ('Ab. Zarah 5a). From the point of view that sin precedes and causes death in each person, the Talmud designates special reasons for the death of innocent children (Shab. 32b).

There are 903 (הוצאות, Ps. lxxviii. 21) distinct deaths. The hardest is by asthma; and the easiest is called **מיתת נשיקה** (**Modes of Death**, "death by the kiss"), which is "like drawing a hair out of milk": that is the interpretation of **על פי י'** ("by the mouth of the Lord," Deut. xxxiv. 5, Hebr.). Six persons are known to have died in that way; namely, the three patriarchs, and Moses, Aaron, and Miriam (B. B. 17a).

Death coming after five days' illness is considered ordinary; after four days, a reprimand of Heaven; after three days, a severe rebuke; after two days, a hastened death; after one day, a sudden one, or, according to some, an apoplectic one (M. K. 28a). To die before reaching the age of fifty is **כרת** ("to be cut off," Lev. xviii. 29). Sixty years is a ripe age; seventy is old age; and eighty, advanced age (M. K. 28a).

Many allegorical tales are related in rabbinical literature about the communication of the dead with the living. A pious man, being rebuked by his wife for giving away a dinar (denarius) to a beggar in time of famine, went to sleep in the cemetery.

It was New-Year's eve, and he overheard the spirits of two women gossiping. One of them proposed to fly with the living, and listen behind the curtain in the judgment chamber to the promulgation of the future visitations in the world. The other spirit excused herself, saying, "I can not accompany thee because I am buried in reed matting; go thyself, and come back and tell me what thou hearest."

Presently her companion returned and reported: "I heard that the hail will kill whatever is planted in the first rainy season." The pious man planted in the second season. The following year he again went to sleep in the cemetery on New-Year's eve, and overheard a similar conversation, gaining the information that whatever was planted in the second season would be consumed by blight. The pious man planted during the first season. His wife was curious to know how he managed to evade the calamitous visitations, and he, being pressed, related his story. A few days later the woman had a quarrel with the mother of the second spirit, and abused her for having given her daughter an indecent burial. The third year the pious husband again sought to obtain information regarding future crops; the second spirit said, "Hush, companion! our former conversation was overheard by mortal men" (Ber. 18a).

R. Ze'ira left his money with the mistress of a boarding-house. Returning, he found that she had died. He repaired to the cemetery and inquired of her: "Where is my money?" Said she: "Go, take it from the socket under the door-pivot. At the same time tell my mother to send me my comb and the eye-dye flask by a certain woman who will arrive here to-morrow" (*ib.* 18b).

A similar story is told of Samuel, who was absent when his father Abba died, and wished to find out

where he treasured the money entrusted to him by orphans. Samuel went to the cemetery and inquired after "Abba," but was told, "There are many 'Abbas' here." Said he, "I want Abba, the son of Abba." "There are many by this name." "But I want Abba b. Abba, the father of Samuel [Samuel being more famous than his father]; where is he?" He was informed that his father was studying at the high yeshibah in heaven. On reaching it Samuel observed Levi standing outside, as a punishment for not attending R. Aphi's yeshibah below. Meanwhile Abba appeared. Samuel saw him crying and laughing, and asked him: "Why cryest thou?" "Because thou wilt soon join us." "Why laughest thou?" "Because thou art very much respected here." "If so," said Samuel, "let Levi enter!" And Levi was allowed to enter. Then the father informed Samuel where to find the money (*ib.*).

The dead are supposed to take an active interest in worldly affairs. The assertion of Kohe-

Continued let that "The dead know not any-
Conscious- thing" (Eccl. ix. 5) is interpreted,
ness of "The wicked who are considered dead
the Dead. while yet alive." R. Isaac said, "The sting of a worm to the dead is like the

pricking of a pin in the flesh of the living" (Shab. 13b). The dead are very sensitive. One must not tell tales around the death-bed of a scholar (Ber. 19a). Inasmuch, however, as the dead are exempt from performing the precepts, they feel slighted if such performance should take place in their presence by the living, as it would be like "mocking the poor" (Prov. xvii. 5). R. Hiyya, on his way to the cemetery with R. Jonathan, noticed the *zizit* of the latter's garment untied, and admonished him to pick them up, else the dead would remark, "To-morrow they will join us, and now they scoff us" (Ber. 18a; compare Yer. Ber. 4c, d; Eccl. R. ix. 5; see Bacher, "Ag. Tan." ii. 526). From this it is inferred that where the custom prevails to wrap the dead with a *tallit* over the shroud, the fringe must be removed or made unfit for purposes of prayer (Shulhan 'Aruk, Yoreh De'ah, 351). Also, in burying a scholar it is customary to deposit in his coffin a scroll that is unfit for reading (*ib.* 351; Maimonides, "Yad," Sefer Torah, x. 36).

The Zohar obviously disapproves this practise of making use of the cemetery as a *genizah* for defective scrolls, and tells the following story of R. Hezekiah and R. Jose, who were passing the ruins of Aleppo in Syria, the latter carrying along a fragment of a scroll. While resting they heard a rumbling noise arising from a grave, and a cry: "Wo, wo, the world must be in trouble, for the Torah has appeared here. Or perhaps they come again to laugh at us and disgrace us?" The rabbis were frightened and asked, "Who art thou?" "I am a dead man. Once upon a time, when the world was in trouble, R. Hiyya came here with a scroll to pray. I and my comrades went out to meet him, and introduced him to the patriarchs in paradise; but on examination the scroll was found to be defective, having a superfluous letter 'waw' in the word **פרקת** [Lev. xi. 3], and because we admitted him we were expelled from the high yeshibah" (Zohar, ed. Cracow, **אחרי מות** 127).

DEATH-DAY CUES.

1. Visiting the Sick. 2. Making the **Confession**. 3. Lighting the Candles. 4. **Mourning**.
(From Bojenschatz, "Kirchliche Verfassung," 1748.)

The practise of praying for the intercession of the dead is of early origin. Caleb on reaching Hebron visited the cave of Machpelah, and **Prayers to** prayed to the patriarch to be saved **and of** from cooperating in the conspiracy of **the Dead.** the scouts sent by Moses to make a report of the conditions existing in the Holy Land (Sotah 34b). The Talmud mentions the custom of visiting the cemetery to request the dead to pray for the living (Ta'an. 16a; compare *ib.* 23b).

The noise of the soul's departure from the body reverberates through the world from one end to the other, and yet the sound is unheard **The Soul of** (Yoma 20b). Prior to the soul's exit **the Dying.** it sees the Shekinah (Pirke R. El. xxxiv.). The soul after death is in the same condition as it is in life when one dreams (*ib.*). Until the body is entirely consumed the soul hovers over the grave (Shab. 152b).

R. Judah ha-Nasi in his last will commanded his sons that on every Sabbath eve after his demise they should continue to light the candles, set the table, and prepare the couch in their customary places, as on every Sabbath eve he would visit his home. Once a neighbor knocked at the door for entrance, and Rabbi's servant answered: "Hush! Rabbi is at home." After this, Rabbi ceased his visits, so as not to reflect on the righteous men who died before him (Ket. 103a). Samuel said: "If one wants to have a taste of death, let him sleep with his shoes on" (Yoma 78b). "And God saw everything he had made, and behold, it was very good" (Gen. i. 31). "This includes death," wrote R. Meir on the margin of his Bible, playing on the similarity of מָוֶת and מָאֹרֶת (Gen. R. ix.). "The day of death [is better] than the day of one's birth" (Eccl. vii. 1) is explained in Eccl. R. *ad loc.* and Ex. R. xlviii. to mean that "death tells of the meritorious life of the departed; it is like the vessel entering port laden with goods." The great ones of each generation must die to make room for the greatness of successors; "the righteous themselves ask for death as a favor" (Midr. Teh. to Ps. cxvi. 15). The Zohar calls death a festal day (יוֹמָא דְּהִילּוּלָא; Zohar, Shemini, in referring to the death of Nadab and Abihu; compare also Heilprin, "Er Ke ha-Kinnuyim," fol. 20c.) The day when Adam died was made a holiday (Tanna debe Eliyahu R. xvi.).

The windows of the death-chamber should be opened to allow the spirits to enter and to depart (מעבר יבק, *s. v.* שַׁפְּתֵי בָהֶן, vi.; see BIRDS AS SOULS).

The angel of death is supposed to wipe his bloody knife in water near the dead; hence all water of the adjacent houses must be emptied on the ground (Yoreh De'ah, 339). As the "shedim"

Super- are supposed to follow the dead or to **stitutions.** hover around the graves, those who follow a funeral cortège must wash their hands on their return, before entering a house (*ib.* 376, 4); but should not dip them in the river. A special lavatory for this purpose is usually provided at the cemetery. On returning from the funeral one should sit down and rest on the way several times, so as to drive away the spirits that follow him (Tur Yoreh De'ah, 375). The board

upon which the dead is cleansed must not be turned over. One should not visit the same grave twice during one day (Will of R. Judah the Pious); nor sleep in the cemetery (Nid. 17a); nor look closely on the face of a dead person; nor kiss the dead, not even when a near relative ("Sefer Hasidim," § 236).

A common superstition is current that if the shadow of one's head is invisible against the wall in a house where a light is burning on **Omens** HOSHA'NA RABBAH eve, it is a sign **of Death.** that the person is destined to die within the year; if visible, he will live (see Nahmani, commentary on Num. xiv. 9). R. Ammi says: "If one wishes to know whether he will live during the following year, let him during the ten Penitential Days burn a candle in his house where no wind can blow it out. If it does not become extinguished he will live; otherwise, not" (Hor. 12a).

To discover whether the husband or the wife will die first, calculate the numerical value of the letters in the names of both. If the amount is even, the man will die first; if odd, the woman (נְפִלְאִים מְעִשִׂיךְ, letter Mem, § 6).

Superstitions concerning death in connection with dreams are numerous. One of them, the vision of a scroll in the Ark, foretells death, as the death of Aaron follows the description of the tablets placed in the Ark ("Sefer Hasidim," § 533). See DREAMS.

A dying child may be released from death's grasp if nominally sold by the parents to a friend for a shekel ("Sefer Hasidim," § 245). A change of name may save from death (R. H. 16b). Removal of a feather pillow from beneath the head of a dying person helps the soul to depart more easily. But some rabbis objected to this treatment, on the ground that it disturbs the sinking person and hastens his death (כְּנֶהֱגָה to Tur Yoreh De'ah, 339; "Sefer Hasidim," §§ 245-246). The iron keys of the synagogue, if placed under the pillow, have the same effect (*ib.*). In accordance with Prov. x. 18: "He that uttereth slander [רְבֵהָ = "evil news"] is a fool." Announcement of death should be made indirectly (Pes. 3b); it was for this reason that the shofar was blown in Talmudical times when death occurred in a town (M. K. 27b). The beadle who summons the congregation to early morning prayer by three knocks at their doors or windows, announces a death in the town by reducing the number of knocks to two. It is a good omen to die with a smile on the face, or to die on one's birthday. Rain on the day of a funeral is a sign of compassion and forgiveness toward the dead (Tur Yoreh De'ah, 353).

It is customary to bend the thumb of the corpse so that the whole hand resembles the word "Shaddai" (Almighty), and to bind it in this position with the zigzit. A shard is placed on the eyes, a little stick in the hands, a piece of metal on the body, a little bag with earth from the Holy Land under the head, and a three-toothed wooden fork in the hands, to enable the dead to excavate a subterranean way to the Holy Land on the day of resurrection, when all the Jewish dead will arise in Palestine. A towel is hung up and a glass of water placed beside it, so that the soul might bathe when it returns to the body.

DEATH (Statistics). See MORTALITY.

DEBARIM. See DEUTERONOMY.

DEBARIM RABBAH: A Midrash or homiletic commentary on the Book of Deuteronomy. Unlike Bereshit Rabbah, the Midrash to Deuteronomy which has been included in the collection of the Rabbot in the ordinary editions does not contain running commentaries on the text of the Bible, but twenty-five complete, independent homilies, together with two fragmentary ones, on as many sections of Deuteronomy, which for the larger part are recognized as "sedarim," the Sabbatical lessons for public worship according to the Palestinian three-year cycle. The index to the rabbinical Bible (Venice, 1525) gives twenty-seven sedarim in Deuteronomy; on nineteen of these there are homilies in the present Midrash, as well as a fragment, which, according to the editions, belongs to another seder (Deut. xxix. 9). It may be due to differences of time and place in the division of the cycle of sedarim that in the Debarim Rabbah there are no homilies on seven or eight of the sedarim mentioned in that index—namely, Deut. xi. 10, xiv. 1, xv. 7, xxiii. 10, xxiii. 22, xxiv. 19, xxvi. 1, and occasionally and conditionally xxix. 9—and that, besides a homily on a section mentioned in other sources as a seder (Deut. iv. 25), there are five additional homilies on the sections Deut. i. 10, iv. 7, xi. 26, xxiv. 9, and xxix. 1, which were not otherwise known as sedarim. In some of these homilies, moreover, the halakic exordiums (see below) close with the words מנין שקרינו בענין, which clearly show that the Scriptural sections on which the homilies were pronounced were used for public lessons. The editor of this Midrash, however, has probably included only the homilies on the Sabbatical lessons of the cycle of sedarim; for Debarim Rabbah contains no homilies on the lessons of the Pesikta cycle belonging to Deuteronomy, Deut. xiv. 22 and xxv. 17 (Deut. xxxiii. 1 is a seder as well as a Pesikta section).

The economy of this Midrash containing sedarim homilies on Deuteronomy, as well as the character of the individual homilies, could easily have been misconstrued and forgotten after the division of the Torah into pericopes according to the one-year cycle had come into general use. In present editions Debarim Rabbah is divided only according to these latter pericopes; it was not noticed that the homilies on **כי תבא** and **כי תצא** did not correspond with the beginnings of the pericopes Deut. xxi. 10 and xxvi. 1. The sidrot Nizzabim and Wayelek formed one pericope in the oldest Midrash editions (Constantinople, 1512, and Venice, 1545); hence in these editions Debarim Rabbah contains only ten sections, corresponding with the pericopes. The further designation of these sections as "parashiyyot" and their enumeration from 1 to 11, dividing Nizzabim and Wayelek, are addenda of the later editions.

According to its original composition, this Midrash includes the following homilies (the passages marked with an asterisk are sedarim):

(1) Parashah i. Nos. 1-9 (according to the Wilna ed.), on *Deut. i. 1; (2) *ib.* Nos. 10-14, on Deut. i. 10; (3) *ib.* Nos. 15-20, on *Deut. ii. 2; (4) *ib.* Nos. 21-25, on *Deut. ii. 31; (5) par. ii.

Nos. 1-9, on *Deut. iii. 23; (6) *ib.* Nos. 10-17, on Deut. iv. 7; (7) *ib.* Nos. 18-24, on *Deut. iv. 25; (8) *ib.* Nos. 25-30, on *Deut. iv. 41; (9) *ib.* Nos. 31-37, on *Deut. vi. 4; (10) par. iii. Nos. 1-7, on *Deut. vii. 12; (11) *ib.* Nos. 8-11, on *Deut. ix. 1; (12) *ib.* Nos. 12-17, on *Deut. x. 1; (13) par. iv. Nos. 1-5, on Deut. xi. 26; (14) *ib.* Nos. 6-11, on *Deut. xii. 20; (15) par. v. Nos. 1-7, on *Deut. xvi. 18; (16) *ib.* Nos. 8-11, on *Deut. xvii. 14; (17) *ib.* Nos. 12-15, on *Deut. xx. 10; (18) par. vi. Nos. 1-7, on *Deut. xxii. 6; (19) *ib.* Nos. 8-14, on Deut. xxiv. 9; (20) par. vii. Nos. 1-7, on *Deut. xxviii. 1; (21) *ib.* Nos. 8-12, on Deut. xxix. 1; (par. viii. No. 1, merely a halakic exordium, doubtful if belonging to *Deut. xxix. 9); (22) par. viii. Nos. 2-7, on *Deut. xxx. 11; (23) par. ix. Nos. 1-9, on *Deut. xxxi. 14; (24) par. x. Nos. 1-4, on *Deut. xxxii. 1; (25) par. xi. Nos. 1-5, and probably 7-8, on Deut. xxxiii. 1 (*ib.* No. 6 is an interpolated second halakic exordium; No. 8 probably closes the homily and the Midrash, the remaining pieces being additions borrowed from the "Midrash on the death of Moses").

These homilies, which in a new edition of the Midrash should be marked as its proper components, evince a great regularity of workmanship in their composition and execution. Each homily begins with a halakic exordium, has one or more proems, followed by the commentary—in which, however, only the first verse, or a few verses from the beginning of the section read, are treated—and ends with an easily recognizable peroration containing a promise of the Messianic future or some other consolatory thought, all concluding with a verse of the Bible. The comments referring only to the first verses of the lesson characterize Debarim Rabbah as a Midrash of homilies in which even the proems are rather independent homilies than introductions to the comment on the Scriptural section; and the exordiums show, further, that Debarim Rabbah is very similar to the Tanhuma Midrashim. In the halakic exordium (an essential of the haggadic discourse which is found neither in Pesikta and Wayikra Rabbah nor in Bereshit Rabbah) an apparently irrelevant legal question is put, and answered with a passage from the Mishnah (about twenty times) or Tosefta, etc. Such answers are generally introduced in Debarim Rabbah by the formula **כך שנו חכמים**; though the formula usual in Tanhuma, **כך שנו רבותינו**, occurs twice (in parashah i. Nos. 10 and 15). Then follow other halakic explanations (compare parashah v. No. 8; par. vii. Nos. 1 and 8; par. ix. No. 1; par. xi. No. 1) and haggadic interpretations, the last of which are deduced from the Scriptural section of the Sabbath lesson. Thus, a connection between the halakic question and the text or the first verse of the lesson is found, and the speaker can proceed to the further discussion of the homily, the exordiums closing generally with the formula מנין שקרינו בענין, followed by the first words of the Scriptural section. The formula occurs 18 times as cited; twice as מנין שכתוב בענין; once as מנין שכך בענין; twice as מנין שנאמר בענין; it is lacking altogether in only a few of the homilies.

The stylistic manner of opening the discourse with a halakic question is so closely connected with the original Midrash Tanhuma, however, that in consequence of the introductory formula **ילמדנו רבינו** ("May our teacher instruct us?"), with which the exordiums and hence the homilies began, the name "Yelamdenu" was given to this Midrash. Even in early times some scholars concluded from the halakic exordiums in De-

**Re-
semblance
of Ye-
lamdenu.**

barim Rabbah that this Midrash was derived in large part from the Yelamdenu; as did ABRAHAM BEN SOLOMON AKRA in his "Kelale Midrash Rabbah," Venice, 1601.

It is curious that while in Debarim Rabbah every homily has a halakic exordium, in the extant Tanhuma Midrashim the part on Deuteronomy is without any (the Tanhuma edited by Buber lacks the exordiums to Exodus also). It would be erroneous to conclude from this, however, that the present Debarim Rabbah must be identified with Tanhuma, and Tanhuma to Deuteronomy with Debarim Rabbah, or that Debarim Rabbah as well as the Tanhuma Midrash in the editions to Deuteronomy, and several other Midrashim to Deuteronomy of which fragments have been published in modern times, or from which quotations are found in old authors, have all borrowed from the original Yelamdenu. If the designation "Tanhuma homilies" be given to the homilies described above, consisting of halakic introductions, proems, comments on various verses, etc., modeled on the form of the Yelamdenu Tanhuma, and if the latter was also the model for the haggadic discourses in the centuries immediately following Tanhuma, it may be said that Debarim Rabbah contains these homilies in a much more primitive form and also in a more complete collection than the Midrash Tanhuma to Deuteronomy in Buber's and the earlier editions; for these editions (as Theodor has shown in his "Die Midraschim zum Pentateuch," in "Monatsschrift," 1886, pp. 559 *et seq.*) are extant in a very defective form, treat much fewer sedarim than Debarim Rabbah, and, are with few exceptions, only shorter or longer fragments of sedarim homilies.

In view of the form of the homilies and the composition of the whole work, which lend to Debarim Rabbah the appearance of a Tanhuma Midrash, it is not strange that passages from this Midrash are quoted, in some citations of earlier authors (in the thirteenth century and later), as belonging to Tanhuma. Textually, Debarim Rabbah has little in common with the Tanhuma Midrashim on Deuteronomy, either in the editions or in the extracts from Tanhuma in Yalkut or from Yelamdenu in Yalkut and 'Aruk. Some halakic questions found also in Tanhuma in homilies on Genesis, Exodus, and Leviticus are quite differently applied and developed in the exordiums of Debarim Rabbah. This Midrash, in its use of the old sources, such as Yerushalmi, Bereshit Rabbah, and Wayikra Rabbah, often shows a freer treatment, and endeavors to translate Aramaic passages into Hebrew and to modernize them.

As regards the time of writing or editing the Debarim Rabbah, "the epoch of the year 900" comes, according to Zunz, "perhaps" nearest the mark.

The Midrash was not known either to R. Nathan, the author of the 'Aruk, or to Rashi (the passage in a citation quoted by the latter is not found in Debarim Rabbah). A large number of extracts are found in Yalkut, generally with the designation of the Midrash אלה הרברים רבה, as it is commonly cited by the older authors. The same name is given to the Midrash on Deuteronomy in Cod. Munich, No.

229; this contains for the first pericope, דברים, four entirely different homilies which have but a few points of similarity with those in present editions, but which are likewise composed according to the Tanhuma form, and are on the same Scriptural sections as the homilies in Debarim Rabbah; namely, on Deut. i. 1, i. 10, ii. 2, ii. 31. The second and third pericopes have also halakic exordiums closing with the words, . . . מנין ממה שקרינו בענין, in which, however, the question is put without any formula. The Munich manuscript agrees with Debarim Rabbah in the pericopes עקב to נצבים, but has additions to the latter; the remaining pericopes are lacking. Another manuscript Midrash, in the possession of A. Epstein, Vienna, contains not only the same homilies as Cod. Munich for the pericope דברים, but for the pericope ואתחנן has similar homilies, that are entirely different from Debarim Rabbah and are on the sedarim Deut. iii. 23 (not iv. 7), iv. 25, iv. 41, vi. 4; all these four homilies have halakic exordiums. The manuscript also has a different exordium for the beginning עקב. From this point to the pericope כי חבא, it agrees with the editions (the exordiums, however, are preceded only by the word הלכה, without אדם מישאל); in pericope נצבים and its additions it agrees with the Cod. Munich. For וילך (also on Deut. xxxi. 14) it has a different text; and in the last two pericopes, ואת הברכה and האוני, it agrees with the Midrash Tanhuma in present editions. It may be assumed with certainty that the first one or two pericopes of this manuscript—in which several passages can be pointed out that R. Bahya (end of the thirteenth century) quotes from the Midrash Rabbah or from אלה הרברים רבה—belong to a Midrash that originally included the whole of Deuteronomy. What remained of that Midrash was combined in those codices with pericopes from Debarim Rabbah and Midrash Tanhuma. Among the numerous Midrashim to Deuteronomy there are known to be a number of fragments of a Debarim Zuta, the preservation of which is due to the author of Yalkut.

DEBASH, ISAAH BEN SAMUEL: Provençal poet of the second half of the thirteenth century. Renan supposes that the surname "Debash" (honey) is the Hebrew translation of the Provençal name "Miles," a surname frequently borne by the Jews of Provence. Debash is known by two poems addressed to the poet Gorni in defense of Shiloni, also a poet, who had been criticized by Gorni. These two poems are still extant in manuscript (Munich MS. No. 128).

I. Br.

DEBE RABBI ISHMAEL. See ISHMAEL BEN ELISHA.

DEBIR: 1. A king of Eglon referred to in Josh. x. 3 *et seq.* The Septuagint reads *Δαβιν*. Debir was one of the five kings who joined Adonizedek, King of Jerusalem, against the city of Gibeon. In the battle which ensued, according to the Book of Jashar, Joshua, who had come to the support of Gibeon, caused the sun and the moon to stop in their courses while he took revenge on his enemies. The outcome was a crushing defeat for Debir and the allied kings, who fled, but were caught and ignominiously put to death.

J. JR.

I. HU.

2. City in the south of Judah. According to Josh. xv. 15 and Judges i. 12, it was originally called "Kirjath-sepher" (קִרְיַת סֵפֶר); according to Josh. xv. 49, "Kirjath-sannah" (קִרְיַת סָנָה). In Josh. x. 39, xi. 21, xii. 13, it is said to have been conquered by Joshua, while in *ib.* xv. 15 *et seq.*; Judges i. 12 *et seq.*, Othniel is named as its captor. It was the seat of a tribal chief, and therefore a place of some importance. It is mentioned among the Levitical cities in Josh. xxi. 15. Its situation is not certainly known. Probably it is identical with Al-Dahariyyah, a large village on the top of a hill southwest of Hebron. Some consider the "Debir" mentioned in Josh. xv. 7 to be another place; but no city of this name is elsewhere mentioned as being in the vicinity indicated in the passage, and the text seems to be corrupt.

E. G. H.

F. BU.

DEBIR, THE. See HOLY OF HOLIES.

DEBORAH: 1. Rebekah's nurse, who accompanied Jacob, and died on the road to Beth-el. She was buried under a terebinth ("oak" in A.V. and R.V.), on this account named "Allon-bakut" (terebinth of weeping; Gen. xxxv. 8). This tree appears later on in Jewish history in connection with another Deborah. In Judges iv. 5 it is called "the palm-tree of Deborah," as though named in honor of the prophetess, who sat under it and judged Israel; but it is more likely that "Deborah" in this connection is a reminiscence of the nurse.

How Deborah came to be in the camp of Jacob is explained by Moses ha-Darshan as follows: "Rebekah had said to Jacob, 'I shall send thee hence, and I shall bring thee back' (see Gen. xxvii. 45); and in fulfilment of the second part of her promise she sent Deborah to bring him back." The nurse is also mentioned in Gen. xxiv. 59, but her name is not given.

E. G. H.

G. B. L.

2.—**Biblical Data:** A prophetess who judged Israel. The story of Deborah is given in Judges iv. and v., and, although these chapters agree in some details, the differences between the two are so great as to make it necessary to treat them separately. Ch. iv. is a prose narrative from which it is learned that for twenty years Jabin, King of Canaan—whose royal city was Hazor, and whose general, Sisera, also had a special city, Harosheth of the Gentiles—oppressed Israel. During this time, or for a part of it, there was a prophetess named Deborah, wife of Lapidoth; she also acted as judge. Her

residence was between Ramah and Beth-el in the Mount of Ephraim. Stirred by the wretched condition of Israel she incites a rebellion, and sends for Barak, the son of Abinoam, to Kedesh of Naphtali, and orders him to muster ten thousand troops of Naphtali and Zebulun and concentrate them upon Mount Tabor, the mountain at the northern angle of the great plain of Esdraelon. At the same time she states that she will draw Sisera to the River Kishon. Barak declines to go without the prophetess. Deborah consents, but declares that the glory of the victory will therefore belong to a woman, for a woman will capture Sisera. Barak gathers ten thousand troops and comes to Mount Tabor. As soon as the news of the rebellion reaches Sisera he collects nine hundred chariots of iron and a host of people. A battle is fought, and Sisera is completely defeated. He himself escapes on foot, while his army is pursued as far as Harosheth of the Gentiles and destroyed, not a man being left. Sisera passes the tent of Jael, who calls him; and he lies down to rest. He asks for a drink; she gives him milk; and while he is asleep she hammers a tent-pin through his temple. When Barak, in hot pursuit, passes the tent, she shows him the dead general. The narrative closes with the statement that thenceforth the power of Jabin waned until he was finally destroyed. For Judges v., see DEBORAH, SONG OF.

—**In Rabbinical Literature:** Deborah was one of the seven prophetesses God raised in Israel: Sarah, Miriam, Deborah, Hannah, Abigail, Huldah, and Esther (Meg. 14a). The epithet *אִשָּׁת לַפִּידוֹת* ("wife of Lapidoth") is interpreted by the Rabbis (*l.c.*) as referring to the woman who furnished wicks for the "lamps" of the sanctuary. The story is told more elaborately in Tanna debe Eliyahu R. ix.: Deborah, being married to an "am ha-arez," induced him to furnish wicks for the Shiloh sanctuary, and he made them so big as to turn the lights into blazing torches (*לִפְדוֹת*). His real name was "Barak," given to him because his face "shone like lightning" (*בָּרַק*); he was also called "Michael," because he was modest before God (*מִיכָאֵל אֵת עֲצָמוֹ*); but his name "Lapidoth" (furnisher of lights) indicates the merit of his wife Deborah, which caused her to become a great light in Israel. The fact that she was appointed by God to be judge and prophetess while Phinehas, the son of Eleazar, was living, was to evidence that the spirit of God rests alike upon Jew and Gentile, man and woman, bondman and bondwoman. The name "Deborah" is made an object-lesson: Two women were prophetesses, yet at the same time conceited and overbearing; all the more ugly were their names: that of the one being "Deborah" (bee), that of the other, "Huldah" (weasel). Of Deborah it is said: "And she sent and called Barak" (Judges iv. 6) instead of going to him; while Huldah sent a message to King Josiah: "Tell the man that sent you to me," etc. (II Kings xxii. 15), omitting to address him as king (Meg. 14b; compare marginal glosses).

Deborah's dwelling under the palm-tree (Judges iv. 5) is explained in several ways. According to one view, she would not, being a woman, teach or

judge in privacy, but in the open air, where all could assemble; according to another opinion the palm-tree symbolized the unity of hearts of all Israel, all being turned, like the leaves of the palm, to God their Father in heaven (Tanna debe Eliyahu ix.; compare Yalk. ii. 42). Deborah's prophecy consisted in her revealing the fact that God aids Israel by means of men who consecrate their lives to the worship of God and the study of His Law, praising Him in the bet ha-keneset and bet ha-midrash (Tanna debe Eliyahu ix. and x., derived from הכתר הכבוד בעם ברכו Judges v. 2, 9; compare Targum to I Macc. ii. 42, and "Apost. Const." lxiii.). "Barak, because he heeded her prophecy, was made participant of her song" (Judges v. 1).

Deborah's song, which is taken by Grätz ("Gesch." i. 115) to be a poem not composed by her—the form שקמתי (Judges v. 7) being the second person feminine; *i. e.* "Until thou didst arise, O Deborah," not "I arose" (A. V.)—is referred by the Haggadah to such Hasidean heroes as aided the Maccabean warriors in their battle against the Syrians (Tanna debe Eliyahu x.; 'Er. 54b, Targ. to Judges ii. 2-9, 11). The words "I arose a mother in Israel" show her conceit, and her punishment for such pride was that she lost her powers of prophecy (Pes. 66b).

K.

DEBORAH, THE SONG OF: Name of the triumphal ode found in Judges v. 2-31 and ascribed in the title (Judges v. 1) to Deborah; it celebrates the victory in the plain of Megiddo over Sisera and his army. The song belongs to the earlier poetry of the Hebrews, but shows such a remarkable power of expression and such a spontaneity that it takes a high place among the masterpieces of the world's poetic literature. The Masoretic text, while exhibiting corruptions and obscurities, may be said on the whole to be fairly faithful to the original. It has, however, been in the way of all attempts to reduce the poem to meter and divide it into regular strophes. The principal pauses occur after v. 11 and v. 22, and the prevailing rhythm has four beats to the line.

The poem opens, after the summons to praise YHWH, in which the kings of the surrounding nations are asked to join, with the description of YHWH's marching forth from Seir (verses 2-5). Then the song enlarges on the disorganized state of affairs before the war "until thou didst arise, O Deborah" (verse 7) (the ending of the verb שקמתי, which may be taken to be the first person, is rather the archaic form of the second person feminine); this apostrophe to Deborah (or declaration by Deborah) is followed by continued portrayal of the critical situation in Israel, which was completely unmanned because disloyal—though the phrase ("they chose new gods," v. 8) is of obscure meaning—to the ancestral God. The text of verses 9-11 shows some misplacements, and verse 9 may be a marginal note by some later hand, or a eulogy added, of the class so numerous found in the Old Testament. Verses 12-22 describe the march into battle, the victory, and the flight of the Canaanites; verse 12a is the appeal to Deborah to strike up the battle-song, followed by that to Barak to open the fight. Praise is bestowed on the tribes of Ephraim, Benjamin, Machir (Manasseh), Zebulun, Issachar (Deborah's tribe), and Naphtali (Barak's tribe), while cen-

sure is dealt out to Reuben (Gilead), Dan, and Asher for lack of patriotism. Verses 19-22 detail the battle, in which "from heaven fought the stars" (YHWH's said), and the rout of the enemy. The third division, verses 23-31, narrates the flight and death of Sisera (verses 23-27), and graphically describes a scene in his palace where his mother and her women await his return with anticipations of rich booty (verses 28-30). "Meroz"—an unknown place—is cursed for its unwillingness to help YHWH, and by contrast Jacl is blessed for her bravery (verses 23-27). The whole poem concludes (verse 31) with a fervent wish that Sisera's fate befall all of YHWH's enemies, while His friends shall be invincible. The poem may have been included in the "book of the wars of YHWH" (Num. xxi. 14; see Ber. 58a). Modern critics for the most part concede that the song was written very near the time at which the battle therein described took place.

DEBORAH: A Jewish weekly in the German language, founded in 1855 by Isaac M. Wise and Max Lilienthal in Cincinnati, Ohio, for German immigrants who had not mastered English. It was planned as a German supplement to the AMERICAN ISRAELITE, and with the increase of the English-speaking Jewish population it lost ground continually. It was kept up until Wise's death (March 26, 1900), he being assisted at various times by S. H. Sonneschein, Henry Zirndorf, and G. Deutsch. The last weekly issue appeared April 6, 1900. In Jan., 1901, G. Deutsch, assisted by S. H. Sonneschein, resumed the publication of "Deborah" as a monthly; but this was discontinued in Dec., 1902.

D.

DEBTOR AND CREDITOR: The law-books treat under this head the incidents of payment: the kind of money that the creditor must accept; the place at which the debtor must pay; the means of sending or bringing the money; good and bad tenders; the creditor's duty to give a receipt; etc.

The Jewish codes treat some of these questions on Talmudic authority. They speak of debtor and creditor as "malweh we-loweh" (literally, "lender and borrower"), looking upon a liquidated debt, even when it arises from the sale of land or goods, as a loan.

The question, What is a good tender—so as to stop interest and costs—is of no consequence in Jewish law, as the latter awards neither interest nor costs. Though debts were not paid with checks or notes in Talmudic times, yet cases quite analogous are discussed.

A debt is payable wherever the creditor demands it, even if he meets the debtor in the wilderness

(provided the payment leaves to the debtor the means for getting home); but should the debtor offer to the creditor in the wilderness money which he has borrowed in a settled country, the creditor may refuse to take it (B. K. x. 6, also applicable to liabilities arising from torts or bailment; Maimonides, "Yad," Malveh, xiii. 8; Shulhan 'Aruk, Hoshen Mishpat, 74, 1).

The custom arose in the days of the Geonim for the creditor, at or after the time of a contract made before witnesses, to request the debtor

Time of Payment. to pay only before witnesses; and, according to rules drawn by the Geonim from Shebu'ot vi., such a request must be complied with. That is to say, the debtor will in such a case be unable to set up payment except by the testimony of witnesses (Maimonides, *ib.* xv. 1, and see gloss for disputed points). So if the creditor stipulates that the witnesses must be scholars or physicians, or that he, the creditor, shall be trusted without oath against the plea of payment, the stipulation was enforced (*ib.* xv. 2, 3). Similar stipulations may be made by the debtor; with what effect see *ib.* xv. 5; compare generally Hoshen Mishpat, 69.

The debtor is responsible for the sum due till he pays it over to the creditor or to his agent. Should the creditor say to him, "Throw me my money and be quit," and he does so, but the money is lost or stolen before it reaches the creditor, he is quit (Git. 78b; see Maimonides, *ib.* xv. 1). What is said about throwing the money applies, of course, to any mode of transmission chosen by the creditor (Hoshen Mishpat, 120, 1, 2).

In the absence of special terms, a loan or a sale on credit (unless there be a local custom to the contrary) is presumed to fall due in thirty days (Tosef., B. M. x. 1; Shulhan 'Aruk, Hoshen Mishpat, 73, 1). Where a time of payment has been set, either in an oral "loan" or by bond, whether the debtor be dead or alive, the creditor may make no demand before the day set (see Hoshen Mishpat, 73, 2, 3, 4, for the settlement of disputes as to the time of maturity).

At maturity the debtor may wish to pay at once, so as no longer to hold the money at his own risk—for example, if it be feared that the government will levy an arbitrary tax or change the money standard—and the creditor is bound to accept. If he refuses, the debtor may deposit the

Acceptance. money with the court or with some trustworthy party; but not when the debt is not yet due and some untoward act, as above, seems imminent. If no such risk is apparent, however, the creditor must accept; for the setting of a time is intended only for the debtor's benefit.

After maturity the debtor may wish to pay in dribblets. Here the better opinion is that the creditor may not refuse such payments. Still, if there is a pledge or mortgage for the debt, the debtor can not compel the creditor to release part of the property, even though it may be easily divisible (Hoshen Mishpat, 74, 4, based on B. M. 77b).

When the coin in which a contract was made has been demonetized by the government, it must still be accepted so long as it remains current in some other country to which the creditor has access; if

not current in such a country, the debtor must pay in the coin current at the time; and such is also the rule for the wife's jointure (*ib.* 74, 7).

It has been shown under ALIENATION how a demand is transferred in a "meeting of three." Thus, the promise of a third person may be transferred in payment of a debt. As Maimonides says, if A owes a mina to B, and B says to A in a meeting of three, "Give to C the mina which you owe me," and C assumes it, but it turns out that A is insolvent, C may back out; for B has misled him. But if C knew of A's insolvency, or if A was well off at the time and became insolvent afterward, C may not repudiate his assumption. Again, suppose A has no demand on B, but owes a mina to C, and he refers the latter for payment to B, although he refers him thus in a "meeting of three," there is no transfer. B need

Can- not give the money to C; but if he
celation. does, he can recover it from A. Also, if C says, "I do not wish to collect from B," he may hold A liable, even after collecting part of the demand from B ("Yad," Malveh, xvi. 3, 4). The inference from the cases in which the old debt is not barred by reason of fraud or mistake is that where the debtor in a meeting of three furnishes to the creditor a new obligor with a full understanding of the facts all round, the old debt is extinguished.

The formal acquittance by which a bond is canceled is known as "shober" (literally, "breaker"), and is in form a "shetar"; that is, attested by two witnesses. Where the debt is by bond, the bond is delivered upon payment in full. Upon partial payment, the creditor may insist on receiving a new bond for the remnant, or he may give an acquittance for the part paid. For a debt otherwise than by bond, the debtor may have his shober, provided he pays the scrivener's fees. But if the creditor claims to have lost or mislaid the bond, the debtor is entitled to a shober at the creditor's cost, and may, moreover, compel him to take an oath that the bond is not in his possession (Hoshen Mishpat, 54, and authorities there quoted).

L. N. D.

DEBTS OF DECEDENTS: Under the old law as it is recognized in many passages of the Talmud (*e.g.*, Ket. 81b) and implied in the Mishnah (Ket. ix. 2; B. K. x. 1), the goods and chattels of a decedent, or the moneys due to his estate, can not be seized by his creditors or by his widow, who is a bond creditor for her jointure ("ketubah"), though R. Meir distinctly said, and the Mishnah in one place intimates, that all of a man's estate is bound by the latter instrument. The very name given to lands and slaves, "estate which has responsibility" ("aharayot"), as shown in the article on ALIENATION, indicates that land was deemed by the old sages the primary fund for securing creditors (see also DEED). It may hence be inferred that in Palestine, even after the destruction of the Temple, and in Babylonia, the Jews were, down to the completion of the Talmud, in the main land-owning farmers, not landless traders or artisans.

In later times, when the bulk of the Jews had become landless, this rule became impracticable, and

the Geonim instituted another rule, subjecting the goods and demands of decedents, as well as their lands, to their debts (see Shulhan 'Aruk, Hoshen Mishpat, 107, 1). Maimonides shows that even without this new institution the orphan heirs of A, who have as such obtained the land of his debtor, must give them up to A's creditors: for the lands would be considered as coming to them from their father (Ket. 92a); and morally orphans were always bound to pay their father's debts to the extent of both lands and chattels received ("Yad," Malweh, viii. 9, based on Ket. 91b). As to priorities of bond creditors on descended lands, see DEED. Regarding personal property, all creditors are on an equality, except in so far as one gains a priority by making the first seizure. The codes say little or nothing about the distribution of an estate that is not sufficient to satisfy all creditors.

Bond creditors take lands sold by the heirs out of the hands of the purchasers (unless the heirs will pay the debt), in like manner as they prevail against purchasers from the debtor himself.

The manner of appraising the lands of infant heirs, and of advertising and selling the same for the payment of debts, is described in the article on APPRAISEMENT (see also Hoshen Mishpat, 109). A sort of judicial conveyance, known as "adrakta," is drawn up after the selling of the lands, which must contain the declaration that the lands sold belong to the deceased debtor, naming him (*ib.*).

A debt arising by word of mouth, or by written contract not sealed (see DEED), can be set up against the debtor's heirs in three cases only: (1) if the debtor had in his last sickness acknowledged the debt; (2) if the debt was not due at the debtor's death; (3) if the debtor had been excommunicated for failing to satisfy a judgment, and had died while under the ban; for in other cases the debt might have been paid in the debtor's lifetime without the knowledge of the heirs.

And, except in these three cases, even a debt by bond can not be enforced against the heirs during their infancy (boys under thirteen), though the bond contain a clause that the debtor trusts the honesty of the creditor; for these heirs, if of full age, might find proof to overcome the bond or to show its having been paid. Nor can the debt be enforced during the infancy of the heirs if the testimony of witnesses is needed to bring it within one of these three cases; for witnesses can not be adduced against an infant. Hence it was usual to make a judicial minute of the debtor's death-bed acknowledgment. So decides Caro (Hoshen Mishpat); but Maimonides (Malweh, xii. 1, 2) holds that during the infancy of the heirs no proceedings can be taken in any cases but the following two: (1) where the demand belongs to a Gentile, and bears interest which it is for the benefit of the infants to stop; (2) the case of a widow's jointure, provided she has not married again. In these two cases the court should appoint a guardian for the infant heirs, who will guard their interests; and if there is no defense, the descended estate will be sold, and the debt paid off (see also B. B. 5b, 22a, 174a).

Whether the heirs be under or over age, the creditor can not proceed against them without taking the

oath, unless there be a clause in his bond in which the debtor declares faith in his truthfulness. Should the creditor die, and his heirs set up a claim against that of the debtor, they must take a solemn oath framed for the circumstances (see Sheb. 45a), unless a clause in the bond avows faith in the creditor and in his heirs. Where the creditor does not know of assets descended, and calls upon the debtor's heirs for payment, and they, while admitting the debt, deny the receipt of assets, they may clear themselves by the rabbinical oath.

A fine, such as was often imposed by the rabbinical courts ("kenas"), falls to the ground with the wrong-doer's death, and can not be collected from his heirs (Hoshen Mishpat, 108, 2).

The rule of enforcing all demands against the obligor's heirs is of late date. Rab and Samuel, the first of the Babylonian "pairs" (c. 230-250), still agreed in the proposition: "He who lends by word of mouth can not collect either from heirs or from purchasers" (B. B. 175a; but see ROBBERY as to liability of descended lands for things taken forcibly).

This feature of the older Talmudic law falls in with the common-law rule that the heir (*i.e.*, the successor to the decedent's lands) is bound only for the bonds or sealed instruments of his ancestor. Later on, in both systems of law natural equity prevailed over narrow distinctions.

L. G.

L. N. D.

DECALOGUE: A word, derived from the Greek, corresponding to the Biblical עשרת הדברות; LXX. *oi déka λόγοι* (Ex. xxxiv. 28; Deut. x. 4; compare Josephus, "Ant." iii. 5, § 3) and τὰ δέκα ῥήματα (Deut. xiv. 13); also τὰ δέκα λόγια, in the title of Philo's dissertation Περὶ τῶν Δέκα Λογίων; in later Hebrew הרברות ע' (Shabbat 86b) or, without the numeral, הרברות (B. K. 54b). As a singular, ἡ δέκαλογος (scil. βιβλος) was first used by the Church Fathers (see Clement of Alexandria, "Protrepticus," iii. 12, § 8, and "Stromata," vi. 16, §§ 133, 137); the corresponding Latin "decalogus" is met with in Tertullian ("De Anima," xxxvii.).

—**Biblical Data:** The Decalogue is given in the Pentateuch in two versions (Ex. xx. 2-17 and Deut. v. 6-18) that exhibit some variants (see below). According to the Biblical records, it represents the solemn utterances of YHWH on Mt. Sinai, directly revealed by Him to Moses and the people of Israel in the third month after their deliverance from Egypt, amid wonderful manifestations of divine power marked by thunder and lightning and thick smoke (Ex. xix.). As such, God wrote the Ten Words upon two tablets of stone—"tables of testimony" (לוחות העדות, Ex. xxiv. 12, xxxi. 18, xxxii. 16) or "tables of the covenant" (לוחות הברית, Deut. ix. 9, 11, 15)—and gave them to Moses. The people having gone astray, Moses, carried away by righteous indignation, broke the tables (Ex. xxxii. 19), and God subsequently commanded him to hew two other tables like the first (Ex. xxxiv. 1), whereon to rewrite the Ten Words (Ex. xxxiv. 1). According to another passage (Ex. xxxiv. 27, 28), Moses was bidden to rewrite, and did rewrite, the Commandments himself; but in Deut. iv. 13, v. 18, ix. 10, x. 24, God appears as the writer. This second set, brought

down from Mt. Sinai by Moses (Ex. xxxiv. 29), was placed in the Ark (Ex. xxv. 16, 21; xl. 20), hence designated as the "Ark of the Testimony" (Ex. xxv. 22; Num. iv. 5; compare also I Kings viii. 9).

The Decalogue opens with the solemn affirmation, put in the first person, that the speaker is YHWH, Israel's ("thy") God, who hath led

Contents. Israel ("thee") out of Egypt. Therefore there shall be for Israel ("thee")

no other gods before YHWH's ("my") face. Prohibition of idolatry follows as a logical amplification of this impressive announcement, and then a caution against taking YHWH's name in vain. The duty of remembering the Sabbath and that of honoring father and mother are emphasized. Murder, adultery, theft, and false testimony are forbidden, and the Decalogue concludes with an expanded declaration against covetousness.

—Critical View:

The Decalogue in Deuteronomy does not differ materially from that in Exodus in regard to the affirmations and obligations contained therein. Verbal discrepancies, however, are comparatively numerous, while the reason adduced for the Sabbath is altogether different. In detail these variants may be grouped as follows:

(a) *Differences in the consonantal (Masoretic) text, in identical words:* For example, "mizwotai" (מצוותי, Ex. xx. 6), which occurs as "mizwotaw" (מצוותיו, Deut. v. 10, in the "Ketib"); this variant is due to an anticipation of the transition from the first to the third person which ensues after this verse). Similarly, there are changes in the use and position of the auxiliary vowel letters; e.g., אֱלֹהֵי (Ex. xx. 5) and אֱלֹהֵי (Deut. v. 9); יִאֲרֹכֶנּוּ (Ex. xx. 12) and יִאֲרֹכֶנּוּ (Deut. v. 16).

(b) *Syntactical differences:* E.g., the syndetic arrangement "children, grandchildren, and great-grandchildren" (Ex. xx. 5, Hebr.), over against the polysyndetic "children and grandchildren and great-grandchildren" (Deut. v. 9, Hebr.); and the asyndetic succession "Thou shalt not kill. Thou shalt not commit adultery. Thou shalt not steal" (Ex. xx. 13-17), over against the polysyndetic "Thou shalt not kill, and thou shalt not, . . . and," etc. (Deut. v. 17, Hebr.).

(c) *Stylistic variations:* "Covet," occurring twice in Exodus (xx. 17), is replaced in one instance by "desire" in Deuteronomy (v. 18). "Graven image and any likeness" in Ex. xx. 11 (Hebr.) appears as "[the] graven image of any

likeness" in Deut. v. 8 (Hebr.). "Remember (זָכוֹר) the Sabbath" in Ex. xx. 9 corresponds to "Keep" (שָׁמֹר) in Deut. v. 12. עֵד שֶׁקֶר ("false witness") in Ex. xx. 16 corresponds to עֵד שָׁוְא ("a witness of iniquity" or "falsehood") in Deut. v. 17 (A.V. 20), the prohibition being furthermore prefixed by "and." The sequence "house and wife" in Ex. xx. 17 is reversed to read "wife and house" in Deut. v. 18 (A.V. 21).

(d) *Additions and amplifications:* Deuteronomy adds in two places (v. 12, 16) the formula "as YHWH, thy God, hath commanded thee." Another addition is found in Deuteronomy in the text of the command to honor father and mother (v. 16): "and that it may go well with thee." Ex. xx. 10 summarizes "thy cattle," which in Deut. v. 14 (Hebr.) is expanded to "thine ox and thine ass and all thy cattle," to which is added "that thy man-servant and thy maid-servant may rest as well as thou." Deut. v. 18 (Hebr.) has "his field," which in the corresponding passage of Exodus is wanting.

But of greatest interest is the variation in the reason given for the Sabbath. Ex. xx. 10, 11 connects it with creation (compare Gen. ii. 2); Deuteronomy assigns to it a social purpose and connects it with Israel's liberation from Egyptian bondage. Thus the Sabbath may be said to rest in Exodus on a universal-theological, in Deuteronomy on a national-historical-economic, basis.

A careful analysis of these variants leads to the conclusion that Exodus, on the whole, presents an earlier text than Deuteronomy. The clearly marked effort at stylistic refinement (the substitution of "lo tit'awweh" for "lo talmud"; the mention of the "wife" before the "house"; even the polysyndetic phrasing, showing a straining after effect) points in this direction. The insertion of the formula "as YHWH hath com-

manded" indicates that the appeal rests on a well-known and long-established law. The enumeration of the various kinds of cattle also betrays the hand of a later writer, and so does the explanatory and qualifying gloss "that it may go well with thee."

On the other hand, the variants in the command against idolatry point to the priority of the Deuteronomical reading. Exodus is more explicit and strenuous, as if afraid that the laxer wording ("graven image of any likeness") of Deut. v. 8 might not be sufficiently comprehensive to bar every species of

earliest manuscript of Decalogue (second century?), containing Variations from the Masoretic Text. Probably the Oldest Example of Square Characters in a Hebrew Manuscript.
(From "Transactions of Society of Biblical Archaeology.")

idolatry. The Sabbath law in Deuteronomy, at least in part, appears to confirm this; while the expression "keep" is stronger than that in Exodus, "remember," and would thus indicate a later solicitude for a better observance. Also, its anxiety for the welfare of the servant exhibits a humane spirit not ordinarily to be looked for in documents of antiquity. The introduction of the theological motive in Exodus, where Deuteronomy has the historical-economic, is an element that favors the assumption of the higher antiquity of the Deuteronomic Decalogue.

These variants, however, have been explained as due to scribal carelessness, such as is easily established by a comparison of the texts of other parallel passages; the writers, contrary to the later rabbinic practise and injunction, failing to consult the written text while quoting from memory, and thus mixing with their lines reminiscences of similar but not identical verses (compare Bardowicz, "Studien zur Geschichte der Orthographie des Alt-Hebr." Frankfort-on-the-Main, 1894; Blau, "Studien zum Alt-Hebr. Bücherwesen," Budapest, 1902). But upon examination this plausible theory will be seen to create new difficulties in the matter in point. The Decalogue must be considered, on the basis of the Mosaic authorship of the Pentateuch, to have been fundamental; and as such its wording must have been so accurately fixed as to preclude the possibility of latitude for scribal caprice. The Rabbis, indeed, have felt this difficulty. They have solved it by assuming that both versions are of identical divine origin, and were spoken in a miraculously strange manner at one and the same time ("Bedibbur Ehad"; see Mek., ed. Weiss, p. 77, Vienna, 1865; Shebu. 20b; R. H. 27b; Yer. Ned. iii. 1; Yer. Shebu. iii. 5; Cant. Rabbah xxviii.; Sifre, Ki Tabo).

Ibn Ezra (to Ex. xx. 1) recognizes the insufficiency of this explanation, but is equally dissatisfied with the solution proposed by Saadia. The latter, conforming to his rigorous theory of inspiration, would not admit that the Masoretic text was other than of divine origin. It is therefore his theory that literally the Deuteronomic Decalogue equally with that of Exodus was divinely inspired. While Exodus presents the reading of the first set of tables, Deuteronomy contains that engraved by divine direction on the second (see "Jour. Asiatique," Dec., 1861, in Neubauer, "Notice sur la Lexicographie," etc.; Geiger's "Jüd. Zeit." i. 292). With profuse professions of regard for Orthodox teachings, Ibn Ezra ventures to hold that these variants are in the nature of linguistic differences often noticeable in the Biblical books.

—**Modern Views:** Modern conservative scholars, with few exceptions (G. Livingston Robinson, "The Decalogue and Criticism," 1899), in so far as they do not maintain that the version of Exodus is the original Mosaic, or at least the older, while that of Deuteronomy (also Mosaic) departs from the original text in conformity with the parenetic method and purpose of Deuteronomy, have concluded that both versions are amplifications—those in Deuteronomy on the whole being later than those in Ex-

odus—of an anterior and old (Mosaic) but briefer list of ten statements written in the manner of the prohibitions against murder, adultery, theft, etc. (Strack, "Exodus," p. 241; Franz Delitzsch, in "Zeitschrift für Kirchliche Wissenschaft und Leben," 1882, p. 292; Holzinger, "Exodus," in "Kurzer Hand-Commentar zum A. T." pp. 79 *et seq.*, Tübingen, 1900; Eduard König, "Einleitung," p. 187, and Index, *s.v.*; Wildeboer, "Die Literatur des A. T." p. 17).

Graphically considered, the writing of the letters (about 620) contained in the Decalogue on two tables of stone of moderately large dimensions does not present, as was long thought, an impossibility. The Mesha stone proves the contrary. The Decalogue written in the style of the latter would fill about twenty of its lines (Holzinger, *l.c.* p. 69). The unevenness in the length of the first and the second parts is a much stronger indication that the original version was without the amplifications noticeable in the commandments of the first and tenth groups.

The tradition, according to which earlier tables were replaced by others, shows that for a long time the knowledge was current of changes in the text, and not, as Holzinger contends (*l.c.* p. 77), that a Mosaic law had never existed.

The original Ten Words probably opened with (1) "I am YHWH, thy God," etc. Then followed:

- (2) Thou shalt have no other gods before Me [beside Me].
- (3) Thou shalt not take the name of YHWH thy God in vain.
- (4) Remember the Sabbath-day.
- (5) Honor thy father and thy mother.
- (6) Thou shalt not murder.
- (7) Thou shalt not commit adultery.
- (8) Thou shalt not steal.
- (9) Thou shalt not bear false witness.
- (10) Thou shalt not covet (Wildeboer, *l.c.* p. 19).

Eduard König and others (see Lotz in Herzog-Hauck, "Real-Encyc." 3d ed., p. 563) place as the second of these original Ten Words the prohibition against the making and the worshiping of graven images. It is probable that the early Hebrews shared with the Arabs the repugnance to molten plastic idols (פסל; see Wellhausen, "Reste Arabischen Heidentums," p. 102); but "mazzebot" (pillars or stones) were legitimate accessories of the YHWH cult down to a much later period than that of such a Mosaic decalogue. Moreover, idolatry was tolerated in North Israel and even in Judea down to the later centuries. Upon these considerations, Kuenen, Wellhausen, Stade, Schultz, and Smend have argued against the ascription of any decalogue to Mosaic times; but with the omission from the original ten of the injunction against idolatry, the mainstay is taken from under the opposition to the authenticity of the tradition connecting Moses with such a lapidary code.

These simple brief statements were amplified in course of time; the fourth, for instance, reflecting in both versions agricultural conditions such as did not obtain in the Mosaic days. So also does the promised reward of the fifth. The reason given in Deuteronomy for keeping the Sabbath also appeals to circumstances of agricultural civilization; that adduced in Exodus is of a theological nature, and can not be much older than the priestly code (P), nor can it antedate the reception into the Pentateuch of Gen. i.

and ii. 1-4. Critics have assigned the Exodus version, with this exception, to the ninth century B.C.; the Deuteronomic text, to the seventh century.

From the point of view of Pentateuchal analysis Wellhausen ("Die Composition des Hexateuchs und der Historischen Bücher des Alten Testaments," 1885, pp. 84, 85, and *passim*) maintains that

Decalogue of Exodus xxxiv. the Jahvist (J) contains an altogether different decalogue; viz., that of Ex. xxxiv. 14-26. Goethe, in his "Zwo Fragen, 1773," was the first modern to

suggest this. This decalogue is concerned with ritual affairs. Holzinger (Commentary on Exodus, p. 119) proposes the following brief sentences as its contents:

- (1) Thou shalt not worship any strange god.
- (2) Thou shalt not make thee any molten images.
- (3) Thou shalt observe the Feast of Mazzot [Pesah].
- (4) The first-born are Mine [YHWH's].
- (5) Thou shalt observe the Feast of Weeks.
- (6) Thou shalt observe the Feast of the Ingathering.
- (7) Thou shalt not mix with leaven the blood of My offerings.
- (8) The fat of My feast shall not remain with thee until the next morning.
- (9) The choicest of the first-fruits of the land shalt thou bring to the house of YHWH, thy God.
- (10) Thou shalt not seethe the kid in the milk of its mother.

In order to extract these "ten words" from the passage, many other laws therein contained of seemingly equal importance have to be omitted, as also the reasons assigned for their observance. This attempt to reconstrue another decalogue may be said to be a failure, all the more as it is conceded that the decalogue in P (Ex. xx.) is virtually anterior to that (Ex. xxxiv.) in J (Holzinger, *l.c.* p. 120). Still less satisfactory, because altogether unreasonable, is the venture to recover the Decalogue from fragments in Ex. xx. 27, 28, and xxiii. 10-16 (Meissner, "Der Dekalog," Halle, 1893; Staerk, "Das Deuteronomium," pp. 29 *et seq.*, 40, Leipsic, 1894).

Written on two stone tables (Deut. iv. 13, v. 19, x. 34), with script on both sides (Ex. xxxii. 15), the

Decalogue would most naturally have been divided into two groups, of five "words" each, each group appearing on one stone. In this way, according to Josephus ("Ant." iii. 5, § 4) and Philo ("De Decalogo," § 12, *δύο πεντάδας*), the Decalogue was originally delivered, the first pentad containing the commandments of "pietas" (relating to God or His visible representatives on earth, the parents); the other, those of "probitas" (relating to conduct toward one's fellow men).

The Midrash mentions a similar division: *ה' על לוח זה* (Ex. R. xli.), though, according to R. Nehemiah, each table contained the complete text of the Ten Words (compare Yer. Shek. vi. [quoted in "En Ya'akov"]). The first table would thus have contained 146 of the 172 words of the Exodus Decalogue, but the other only 26. In view of this inequality in the distribution it has been suggested that the one table contained only the first three commandments; the other, the last seven. But if the amplifications were omitted, the grouping in sets of five would result in assigning to the one table 28 words and to the other 27 (Strack, "Exodus," p. 242).

The order of the prohibitions against murder, adultery, and theft, as now given in the Maso-

retic text, in Josephus, and in the Syriac Hexapla, is not followed by the Septuagint, the Codex Alexandrinus, and Ambrosianus

Sequence and Numbering. (which have "murder, theft, adultery," nor by Philo (who has "adultery, murder, theft"), nor by the

Codex Vaticanus (which reads "adultery, theft, murder").

Differences obtain also in regard to the numbering of the various commandments. The traditional Jewish system makes Ex. xx. 2 the first "word," and verses 3-6 are regarded as one; viz., the second (Mak. 24a; Mek., ed. Friedmann, p. 70b, Vienna, 1870; Pesik. R., ed. Friedmann, p. 106b, *ib.* 1880). This arrangement is found also in the Codex Vaticanus of the LXX. and in the Deuteronomy of Ambrosianus. Still R. Ishma'el counts verse 3 as the first "word" (Sifre to Num. xv. 31; ed. Friedmann, p. 33a, Vienna, 1864). Philo and Josephus count verse 3 as commandment i.; verses 4-6 as ii.; verse 7 as iii.; verses 8-11 as iv.; verse 12 as v.; verse 13 as vi.; verse 14 as vii.; verse 15 as viii.; verse 16 as ix.; and verse 17 as x.

The numbering adopted by the Roman Catholic and Lutheran churches combines verses 3-6 into a single commandment which is numbered i., in consequence of which, up to the last, every commandment is advanced by one, the Jewish No. III. becoming II., and so on. In order to maintain the number ten, the Jewish No. X. is divided into IX. ("Thou shalt not covet thy neighbor's wife") and X. ("Thou shalt not covet thy neighbor's house," etc.). This method of numbering is ascribed to Augustine ("quæst. 71 ad Exodum"), but the Codex Alexandrinus, as E. Nestle was the first to notice ("Theol. Studien aus Württemberg," 1886, pp. 319 *et seq.*), also exhibits it. Modern critics are inclined to accept this latter system of enumeration, partly because the Jewish No. I. is not a "commandment," in which they overlook the Hebrew designation *דבר* ("word"), and partly because, as the Jewish enumeration has it, verses 3 and 4-6 certainly constitute one command.

The "aseret ha-dibrot" are accentuated in the Hebrew in two ways: one for private reading, when the verses are marked to begin at 2, 3,

Accentuation of the Commandments. 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 17 (13-16 as one verse); the other for solemn public recital, when the first two commandments and the introduction are

read without interruption, because God is introduced as the speaker, and every other commandment as a separate verse (Pinsker, "Einleitung in das Babylonisch-Hebräische Punktationssystem," pp. 48-50). It may be possible, though it has been doubted, that this double accentuation preserves the traces of an old uncertainty concerning the numeration of the various "principles" or "words." These accents are respectively known as the "ta'am ha'el-yon" (superlinear) and the "ta'am ha-tahton" (sub-linear). The Oriental Jews know only the division into ten words; *i.e.*, that observed in private reading (W. Wickes, "Accentuation of the Twenty-one So-called Prose Books of the O. T." p. 130). The superlinear accentuation is generally used for the cantillation of the Decalogue on the Feast of Weeks

as the memorial day of the revelation—*i.e.*, the giving of the Torah (ומן מותן תורה)—while on the ordinary Sabbaths, when the Decalogue is read as a part of the pericope (Yitro and Wa'ethannan), the sublinear is followed (Japhet, "Die Accente der Heiligen Schrift," 1896, p. 160; Geiger, "Wiss. Zeit. Jüd. Theol." iii. 147 *et seq.*; also "Urschrift," p. 373, note).

DECALOGUE, THE, IN JEWISH THEOLOGY:

The Ten Words are designated by Philo as κεφαλαία νόμων—"the heads of the law," the title of the chapter "De Decem Oraculis." The second table Philo, contrary to the usual order, begins with the commandment against adultery, describing adultery as the greatest of all violations of the Law, since it corrupts three houses—that of the adulterer, that of the wronged husband, and that of the adulterer's wife. The fourth commandment refers to all festivals, and, according to Philo, embraces all the laws conducive to the spread of kindness and gentleness and fellowship and the feeling of equality among men (with reference to Sabbatical year and the jubilee). Under the fifth commandment he ranges all laws in regard to family life, the honor due to old people, the duties of the old to the young, the ruler to his subjects, the benefactor to the needy, the master to his servants, etc.

Philo's exposition of the preeminence and original character of the Decalogue, both in its general tenor and in many of its particular details, reflects the teachings of the Mishnaic period, as indeed it also anticipates some of the positions of later Rabbis. The fact that the recital of the Ten Words constituted a salient feature of the daily liturgy in the morning service (Tamid v. 1; Ber. 3c) indicates that they were regarded as the essential parts of divine revelation. This practise was discontinued as a protest against the unwarranted inference drawn

therefrom by sectaries that the Decalogue alone had been revealed by God on Sinai (Ber. 11a). The Shema' ("Hear, O Israel," Deut. vi. 4) and the selections from Deut. vi. 4-9, xi. 13-22; Num. xv. 37 *et seq.*, which follow the Shema' in the order of the liturgy, and form as it were a part thereof, were believed to contain in essence the Decalogue.

The new Pesikta (Bet Ham. vi. 41; comp. Bacher, "Die Agada der Palästina. Amoräer," ii. 183) holds the reading of the Shema' every morning as tantamount to the keeping of the Ten Commandments, because they, too, had been proclaimed "in the morning" (Ex. xix. 16). Again, Sifre to Deut. i. 3 controverts the assumption that the Decalogue alone had been revealed through Moses. Like the Shema', Num. xix., looked upon by R. Hiyya as fundamental, is construed by R. Levi as a cryptogram of the Decalogue (see DIDACHE).

According to Hananiah, the son of Joshua's brother, the Decalogue contains all the laws of the Torah (Yer. Shek. 46d, bottom; Soṭah 22d; Cant. Rabbah to v. 14), his words, "parashiyyoteha wedikdukeha shel Torah," recalling Philo's view that the Decalogue contains the capital, the rest of the Pentateuch the special, laws. Berechiah is credited with a similar opinion (Bacher, *l.c.* iii. 356). The Decalogue is compared with a rare jewel of ten pearls (Exod. R. xlv.; Tan. [Ki] Tissa, end). The Patriarchs had been loyal to the principles of the Decalogue long before they had been revealed to Moses. (Attention is called to Yalk. Shim'oni, i. 276, end.) The universality of the Decalogue is accentuated by the fact of its being offered in turn to all the nations (Deut. xxxiii. 2, 3; Hab. iii. 3; Ta'an. 25a; 'Ab. Zarah 2a) in the desert territory ("hefker") which belonged to none exclusively (Mek., Yitro, 1), and of its proclamation in all the (seventy) languages of the world (Shab. 88b).

The first and second commandments are rated as preeminent (Sifre to Num. xv. 31), both on account of their doctrine and also because they alone, as is indicated by the use of the first person singular, were spoken to the people by God Himself (Macc. 24a; Sanh. 99a; Hor. 8a; compare Geiger, "Jüd. Zeit." iv. 113 *et seq.*). On the other hand, the tenth commandment is also held fundamentally to include the others; at least its violation amounted to transgressing the seven "nots" (לאוין) of the Decalogue (Pesik. R. 22). As the tenth forbids the coveting of a neighbor's wife, the foregoing statement of its scope agrees with the similar valuation placed upon the seventh (against adultery:

The Seventh Commandment. Tan., Naso). Adultery is a violation of the first commandment, according to Jer. v. 7, 8, 12; of the second, according to Num. v. 14 (אָן) = Ex. xx. 5); of the third, because adultery is denied, as is generally the case, with an oath; of the fifth, inasmuch as the child of such a union can not honor its parents; of the sixth, because adulterers are always prepared to kill if caught in the act; of the seventh, which directly forbids adultery; of the eighth, as the adulterer is virtually a thief (see Prov. ix. 17); of the ninth, because the adulteress gives false testimony against her husband; of the tenth, in that the adulterer makes his son

another man's heir. In regard to the fourth (concerning the Sabbath), the eventuality is assumed that the issue of an adulterous intimacy between a non-priest and a woman of the priestly caste might become a priest. The arrangement of the two tables whereby one is opposite six indicates that murder includes the denial of God (Mek. to Ex. xx. 17). The last six commandments are also regarded as the basis of all morality (Tosef., Shebu. iii. 6).

As a statue is seen by a thousand, and its eye covers them all, so, R. Levi says, every single person heard the words as though personally addressed (Pesik. 110a; Tan., ed. Buber, to Yitro 17; compare Pesik. xxi., where Jochanan is credited with this simile, while Levi points to one sound heard by many). The fact that the versions of Ex. and Deut. present textual discrepancies was explained by the theory that both were divinely given **בְּרִיכָה אֶחָד** in one act of divine speech (Sheb. 20b; R. H. 27a; Mek. xx. 8; Sifre, Deut. xxii. 11), which "would be impossible for men," and "which the human ear could not hear"; but, according to Ps. lxii. 12, the one speech of God was apprehended as two by men. In fact, the Ten Words were all proclaimed at once ("bedibbur ehad," Mek. xx. 1). The first set of tables did not contain, in the fifth, the words "that it may be well with thee," because they were predestined to be broken (B. K. 55a). Interesting is the report that R. Hyya was ignorant of this difference between Deut. and Ex. (B. K. 54b).

The Decalogue often appears as a subject of controversy with non-Jews, a circumstance which goes far to demonstrate the fundamental value attached to it (see Pesik. R. xxiii.). One such controversy is with Hadrian (Pesik. R. xxi.). The subjects discussed are such as why is circumcision not in the Decalogue? (Pesik. R. xxiii.; Tan. to Lek Leka, Agad. Bereshit xvii.); or why does not the Torah begin with the Decalogue? (Mek. to xx. 2). The "Ten Words" are even a "pleader" for Israel (Pesik. R. xi.; Midr. Teh. to Ps. xvii. 4).

How the Ten Words were distributed between the tables is also a subject of rabbinical inquiry. The prevailing opinion is that there were five on each; but it has also been maintained that each had the whole ten (see DECALOGUE; Yer. Shek. 49d; Yer. Soṭah 22d; Cant. Rabbah v. 14; Mek. xx. 27); even twice—once on each side (Yer. Shek. vi. 1). Simai argues that the Ten Words were inscribed on each table four times (*τετραράκις*; *ib.*).

The dimensions of the tables furnish a fruitful subject for exegetical ingenuity. The objection that they were too heavy for one man to carry (raised even by modern Bible critics) is met by ascribing to the letters engraved thereon miraculous powers. They virtually carried the tables; only when they began to fly away did Moses feel the

Tables of the Law. Tan., Ki Teze *et al.*). The first set given with pomp attracted the "evil eye," and hence were broken (Tan., Ki Teze). According to some, Moses was ordered by God to break the tables, and received God's thanks for the act (Ab. R. N. ii.; see note of Schechter on the passage; Yalk. 363, 640). According to another version, when Moses noticed that the script began to

fly off, he became alarmed and threw the tables down, whereupon he was struck dumb (Yalk., Ki Teze). By the use of "anoki" ("I am," an Egyptian word; Pesik. R. xxi.), which God had employed in His conversations with Abraham, Isaac, and Jacob (Gen. xv. 1, xxvi. 24, xxxi. 13), He convinced the people that it was the God of their fathers who spoke to them (Tan., ed. Buber, to Yitro 16).

In post-Talmudic literature and liturgy the Decalogue is also expounded and expanded as the fountainhead whence all other laws flow. Shebu'ot being the day of the revelation (Shab. 86a), this idea was prominently utilized in the piyyuṭim and AZHAROT for the holiday. Saadia adopts the numeration of the letters of the Decalogue given in Num. Rabbah xviii. as 613, a number likewise fixed by Nahshon Gaon ('Aruk, under **תפלה**). Eliezer ben Nathan has the same number in the "Ma'arib" for Pentecost, Eleazar b. Judah the same in the "Sefer ha-Hayyim." In reality, the Decalogue contains 620 letters, the mnemotechnic word for which is **כתר** ("crown": "the Crown of the Law"), which number, according to its expounders, corresponds to the 613 COMMANDMENTS, one for each letter, the seven others, auxiliary vowel-consonants, indicating the seven Noachian commandments (see beginning of "Bet" in the "Sha'ar ha-Otiyyot").

Many "poetic" elaborations of the Decalogue are in existence, but the plan was also carried out by writers on legal matters (Zunz, "Literaturgesch." p. 95; Steinschneider, "Hebr. Bibl." vi. 125). The philosophical writers of the tenth to thirteenth centuries occasionally emphasized the fundamental nature of the Decalogue. Judah ha-Levi, in his

"Cuzari" (ii. 28), remarks: "The root of knowledge was placed in the Ark, which is like the innermost chamber of the heart, and this [root] was the Ten Words and their derivatives; that is, the Torah." BAḤYA BEN JOSEPH, in his "Ḥobot ha-Lebabot," gate i., urges the importance of the Decalogue, and connecting therewith the Shema', construes the latter as laying down ten main principles corresponding to the Ten Words. ALBO, in his "Ikkarim" (iii. 26), develops in extenso the idea of the Decalogue's fundamentality, calling attention to the difference between the "words" on the first table as theological, and those on the second as ethical, both together covering the whole field of religion. Of Bible commentators following on the same line may be mentioned Rashi to Ex. xxiv. 12: "The first word of the Decalogue is the fountainhead of all."

Nahmanides makes the first one of the mandatory commands ("mizwot 'aseh"). The whole people heard all ten, but understood only commandments one and two as perfectly and thoroughly as Moses. From three on, however, they did not comprehend, and therefore Moses was forced to explain them. Maimonides, desirous of removing all anthropomorphic conceptions, reiterates Philo's idea, that it was not God's voice that was heard, but an impersonal voice created especially for the enunciation of the Decalogue ("Moreh," i. 65; compare Saadia, "Emunot we-De'ot," ii. 8; "Cuzari," i. 89). The writing on the tables was also a "creation" ("Moreh," i. 66). The Karaites entertain the same view (see Japhet Abu-

Ali on Ex. xx.; Munk, "Guide," i. 290, note 2; Aaron ben Elia, "Ez Hayyim," ch. 55, 98). On the effect of the second Commandment see ART.

The third commandment, interpreted to prohibit swearing, led, in unconscious appreciation of its original meaning—a caution against pronouncing divine names or imparting them to persons other than the properly initiated—to a reverent avoidance of the mention of the Shem ha-Meforash (Sotah 38a; Sifre to Num. vi. 27, and elsewhere), and to extreme caution even in writing not to expose "the Name" to disrespect or thoughtless disregard.

Many of the modern catechisms have summarized both the doctrines and the duties of Judaism to correspond with the ten ideas of the Decalogue:

- (1) The unity and personality of God.
- (2) His incorporeality.
- (3) Against profanation of the Name.
- (4) Sabbath and festivals; cruelty to animals; slavery.
- (5) Family relations.
- (6) Rights and duties of life.
- (7) Marriage and chastity.
- (8) Rights and duties of property; interest and usury; begging.
- (9) Duties to the state.
- (10) Covetousness; other personal virtues and vices.

For modern expansions of the Decalogue see Gerson Lasch ("Die Göttlichen Gesetze," 1857). In Dr. Samuel Hirsch's "Catechismus" the third commandment is made the basis of the discussion of prayer, inasmuch as prayers expressive of wishes and hopes no longer entertained violate the commandment. Isaac M. Wise, among modern Reform rabbis, declared the Decalogue to be "the Torah," which alone was divinely revealed. According to him, Reform Judaism has in the Decalogue its legal basis, and finds in it its limitations (see "Hebrew Review," i., Cincinnati, 1880; Isaac M. Wise, "The Law").

E. G. H.

DECAPITATION. See CAPITAL PUNISHMENT.

DECAPOLIS, THE ("Ten City"): Name of a district of Palestine that included a number of autonomous cities. According to Pliny ("Historia Naturalis," v. 18, 74) these ten cities were Damascus, Philadelphia, Raphana, Scythopolis, Gadara, Hippos, Dion, Pella, Gerasa, and Canatha. With the exception of Scythopolis (= Beth-Shean) all these cities are east of the Jordan. It is curious that Damascus, which lies much further north, is also included in the Decapolis. Josephus mentions Scythopolis ("B. J." iii. 9, § 7), Philadelphia (*ib.* ii. 18, § 1), Gadara, and Hippos ("Vita," §§ 65, 74) as in the Decapolis. The "Onomasticon" of Eusebius and Jerome (ed. Lagarde, 251, 89, and 116, 29) describes the Decapolis as situated in Peræa, round about Hippos, Pella, and Gadara, these cities being expressly mentioned, perhaps, because they were more prominent than the others in the history of Christianity; Pella, for example, is known as the home of the first Christian community, and it is also included in the Decapolis by Epiphanius ("Hæreses," i. 30, § 2). It is curious that Stephanus Byzantius includes Gerasa (Γέρασα) in a district he calls Τεσσαρεσκαίδεκάπολις ("Township of Fourteen"), but this is probably a clerical

error for "Ten City." Ptolemy (v. 15, §§ 22, 23) places the Decapolis in Cœle-Syria, and enumerates most of the cities mentioned by Pliny, as well as some in the neighborhood of Damascus, eighteen cities in all, and among them Capitolias, founded by Nerva in the year 97 or 98. The city of Abila is mentioned on an inscription ("C. I. G." No. 4501) as being included in the Decapolis.

The population of the Decapolis was chiefly pagan. Scythopolis was attacked by the Maccabeans (II Macc. xii. 29), but most of the cities of the Decapolis were not subjugated until the reign of Hyrcanus. Pompey again separated them from the Jewish territory in 63 B.C., and placed them as autonomous cities directly under the government of the legate of Syria. Gadara and Hippos were given to Herod (Josephus, "Ant." xv. 7, § 3; compare 10, § 2); but after his death they were again declared to be free by Augustus, so that Galilee and Perea, the two districts of Herod Antipas' tetrarchy, were separated by the Decapolis. The cities of the Decapolis used the Pompeian era in reckoning dates; were organized entirely along Hellenic lines; had Greek worship and Greek games, and were always hostile to Jews. Pliny (*l.c.* xv. 4) speaks highly of the small olives of the Decapolis. Jesus had several persons from the Decapolis among his followers (Matt. iv. 25; Mark v. 20), showing that many Jews were living there. When the Jewish war broke out, the pagans fell upon the Jews, an uprising for which JUSTUS OF TIBERIAS took bloody revenge. The Talmud speaks often of the pagan population of these cities, the philosopher Oenomaos of Gadara, for instance, being cited; hence several cities mentioned in the Talmud under other names may have been identical with the cities of the Decapolis, as Susitha with Hippos, Pehla with Pella.

The Decapolis must have existed as a special district in the second century, since the geographer Ptolemy speaks of it as such; when, however, the province of Arabia was organized (106), several of those cities came gradually to be included in that province—for example, Gerasa and Philadelphia (Amman. Marcell. xiv. 8, § 8), in 295, according to Marquardt ("Staatsverwaltung," i. 277, Leipsic, 1873); the other cities with their territories were probably included a century earlier.

DECKERT, FRANCIS: Clerical anti-Semitic agitator; born at Vienna 1846; died there March 21, 1901. From its beginning in the eighth decade of the nineteenth century Deckert was identified, as a political agitator and writer, with the anti-Semitic movement; but he did not become prominent until the liberal press exposed some of his questionable business transactions. In retaliation he published a pamphlet on SIMON OF TRENT, in an effort to confirm the truth of the blood accusation ("Ein Ritualmord Actenmässig Nachgewiesen," Vienna

1893). Actuated by the same motive, he induced the convert Paulus Meyer to write an account of a ritual murder which he pretended to have seen in 1875 in Ostrow, Russia. The story was published in the Vienna "Vaterland," and the parties named as perpetrators in the crime brought a libel suit against Meyer and Deckert, the latter being sentenced (Sept. 15, 1893) to a fine of 400 florins (\$160).

Deckert continued to preach anti-Jewish sermons, which he published in his magazine, "Der Sendbote des Heiligen Joseph." To one of these sermons he appended a "prayer for the distress caused by the Jews" (1894), a travesty of the "Lord's prayer" in the most infamous language. The government confiscated it. His violent diatribes were several times the object of an interpellation in the Reichsrath, and evoked from the premier, Prince Windischgrätz, the reply (May 27, 1895) that he regretted such expressions were heard from a Christian pulpit. Nevertheless, the lawsuit brought against Deckert for inciting riots was dismissed (Jan. 14, 1896). He continued his tirades with a collection of sermons under the title "Juden 'raus!" (Out with the Jews), published in the same year. He became popular with the anti-Semitic city government, and in 1899 was given the Salvator gold medal, the highest distinction in the gift of the city. He, however, bequeathed in his will a sum for charity to be distributed without regard to religious distinctions.

DECKINGEN, JUDAH BEN BENJAMIN

(also known as **Leva Rokhausen**): German lexicographer of the sixteenth century. He was the pupil of Isaac of Ahrweiler, and lived as tutor at Wendersheim (1555), Rüsselheim, and other places of southern Germany. In 1556 he compiled a Hebrew-German glossary of five quarto pages, prepared as an aid in the translation of German into Hebrew. This work has been published from a manuscript by N. Brüll.

DECSEY, SIGMUND: Departmental president of the Supreme Court of Budapest; born in 1839 at Aszod. He studied law at Budapest; founding with Desider Szilágyi (afterward minister of justice and president of the Parliament) "a lawyer's relief society." On completing his studies Decsey entered the service of the state as notary of the Court of Cassation (1870); was promoted five years later to the office of judge of the Royal bench ("Tafel"), to that of judge of the Royal Court ("Curie") in 1886, and "Senats president" in 1895. He was concerned chiefly with banking, but died Nov. 25, 1910.

DEDANIM (Hebr. דִּדָּנִים: R. V. Dedanites):

The descendants of the Arabian Dedan, spoken of (Isa. xxi. 13) as engaged in commerce. Dedan is first mentioned (Gen. x. 7; I Chron. i. 9) as a son of Raamah, son of Cush, and again (Gen. xxv. 3; I Chron. i. 32) as a son of Jokshan, son of Keturah. Dedan is found in Jer. xlix. 8, where Edomitish settlers seem to be referred to, as "Dedan" occurs in

the prophecy against Edom; again in xxv. 23, with Tema and Buz; in Ezek. xxv. 13, with Teman, in the prophecy against Edom; and in Isa. xxi. 13 ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye traveling companies of Dedanim"). As a Keturean tribe Dedan seems to have occupied a position in northwest Arabia. Regarding the reference to Dedan in Ezek. xxvii. 15, 20, which points to South Arabia, Gesenius and Winer suggest that the Keturean Dedan intermarried with the Cushite branch, and this theory of mixed descent gains weight from the fact that in each case the brother of Dedan is mentioned as Sheba. Thus the name of Dedan may apply to one tribe.

B. P.

DEDE AGATCH: Turkish port on the Ægean Sea, at the mouth of the Maritza, near Enos, European Turkey. It has about two hundred Jews in a population of three thousand. The community, founded in 1870, possesses a synagogue, and a primary school attended by thirty children. The rabbi acts also as shoḥet and mohel, and is paid out of the meat-tax. There are two charitable societies—a "bikkur ḥolim" and a "gemilut ḥasadim."

M. FR.

DEDICATION. See CONSECRATION OR DEDICATION.

DEDICATION FEAST. See HANUKKAH.

DEED (translated from the law Latin "actum"): In English law a contract under seal. To it corresponds very closely in Jewish law the "sheṭar" (lit. "writing"); the latter, however, means a solemn document, and is as such distinguished from the mere note of hand ("ketab yad").

I. The sheṭar was said to be sealed, and in Biblical times seal-rings, making an impression upon wax, clay, or lead, were evidently used to authenticate written documents; but in the Mishnah and in the later rabbinical literature the sealing of a document means neither more nor less than the signatures of two or more attesting witnesses.

In Biblical Hebrew "sefer" (lit. "a book") is the common name for a document, whether it be a conveyance (Jer. xxxii., *passim*), a bill of divorce (Deut. xxiv. 1), or an indictment (Job xxxi. 35).

Another word, "geṭ," is found in the Mishnah, mostly applied to the bill of divorce, but used also in a more general sense. It is known,

Letters according to its outward form, either **Patent and** as the "straight deed" ("geṭ pashuṭ")

Close. or as the "tied deed" ("geṭ meḳush-shar"), the former being open, the

other folded and sealed (Mishnah B. B. x. 1). The straight deed is signed by the witnesses at the bottom of the page; the tied deed (generally made up of several sheets sewed together) is folded and signed by one witness on the back, then folded again and signed by another witness. The latter form went out of use at an early date. The Talmud (B. B. 160a) says it was invented to prevent undue haste, especially in making out bills of divorce.

Concerning the form of written documents in use among the Jews before the Babylonian captivity, nothing is known. For more than a thousand years before that event, written contracts—especially

bonds for the payment of money with interest thereon—were in use in Assyria and Babylon, thousands of which are still preserved and known as “contract tablets”; and the forms observed in them have had their influence upon the documents of the post-exilic Jews.

The ordinary language of written documents, such as marriage contracts, bills of divorce, assignments of claims, as it has come down through the Mishnah and Baraita, was Aramaic; so also bonds, as appears by samples of their language (Mishnah B. B. x. 2).

II. An important variety of the deed is the bond known as the “*sheṭar hob*” (writing of debt).

The sealed bond—that is, an acknowledgment of debt attested by two or more witnesses—is of “higher dignity,” to use an English law term, than the simple note of hand or a promise

by word of mouth. For the judgment on a bond may be levied on “subjected property”—that is, property sold or pledged to others after the delivery of the bond—while a judgment on an oral contract or on a note of hand can be made only out of “free property.” In other words, the bond creditor can subject the debtor’s land or slaves to his claim, notwithstanding a subsequent sale, gift, or pledge to others; the bond thus operating as a mortgage, from the time of its delivery, of all the debtor’s lands wherever situate—according to R. Meir, however, only when a clause to that effect (“*aharayut*”) is inserted; but, according to the majority, with or without such a clause (Mishnah B. M. i. 6; B. B. x. 8), its omission being deemed an error of the draftsman. Hence, one who finds a bond on the highway should not return it to either debtor or creditor, as it may have been paid off and thrown away, and might now by collusion be used to the injury of third parties (B. M. i. 6). It was thought that the attestation of a bond by witnesses would give to it sufficient notoriety to deter others from buying the debtor’s land or lending upon its security. The obligor’s signature was not a necessary part of a bond or other document; though the Babylonian contract tablets always bear it. According to Rashi, such subscription was customary in his time; and it has been so since.

When a bond was discharged, the creditor generally made out an acquittance (“*shober*,” lit. “a breaker”) with the same formalities as those observed in the bond (see DEBTOR AND CREDITOR).

No set form of words is required to make a valid bond. The marriage contract, or *ketubah*, in so far as it secures to the bride sums of money payable upon divorce or upon the death of her husband, is in the nature of a bond, and can be collected in similar manner out of “subjected property” (Ket. 90b).

It was usual to express the sum in two ways: first, in *zuz* or drachmas; next, in shekels or in minas. In case of contradiction the

Indications smaller sum prevails. But if the sum of **Amount** is twice named in the same coin, the last or lower figure prevails over the

first or upper. Should the lower figure be indistinct or partially blotted, it can be supplied from the number first written. Where money units are named in the plural, but the number is rubbed out,

the number two is presumed. Where a bond written in Greek contained the sum *ὀδοήκοντα* (80) with its first part blurred, and probably raised from *πεντήκοντα* (50), the judge at Tiberias (Yer. B. B. x. 1) allowed only 30 shekels, *τριάκοντα* being the smallest sum ending in the plainly written syllable *κοντα*.

A bond was given generally for the repayment of a loan, and is in that case a “document of loan” or “*sheṭar milweh*.” The Talmud speaks often of its being accompanied by an instrument known as a “*prozbul*,” meant to defeat the law concerning the year of release (see SABBATICAL YEAR).

The cost of writing the bond falls on the borrower; and the scrivener may, in the lender’s absence, prepare a bond at the borrower’s instance (B. B. x. 3). Where a bond was so blotted or worn as to become illegible, the creditor might have it reestablished on the testimony of witnesses by the decree of court.

The name of a surety ought to be inserted in the body of the bond above the attestation of the witnesses, and be connected by the word “and” with that of the chief debtor. If he simply writes under the attestation, “I, A, son of B, am surety on this bond,” he is at most liable on a “simple contract”; and only his “free property” can be levied on. Even this is doubtful; for, unless he has become surety before the loan is made, or property is delivered, there is no consideration for his suretyship (*ib.* x. 8, where the point is raised by Simeon ben Nannas, the most celebrated lawyer of his time).

The plural “*sheṭarot*” (writings, documents) stands for bonds as a class of property. It has been shown, under ALIENATION AND ACQUISITION, how a bond is transferred.

In the chapter of the Mishnah on overreaching (“*ona’ah*”; compare B. M. iv.), bonds are said to have no market price; for the value of a bond depends not only on the time it has to run, but also on such uncertain elements as the maker’s honesty and solvency. Hence, the rule that a sale or purchase at more than a sixth above or below the market price gives a right to rescission is not applied to bonds.

III. Deeds for the conveyance of land, by way of sale or gift, are treated under the heads of ALIENATION AND ACQUISITION; GIFTS; SALES. Other important deeds are the *KETUBAH*, or marriage contract; deed of LEASE.

L. N. D.

DEEP: 1. In contradistinction to “rock,” which is used figuratively for “a refuge” (Isa. xxxiii. 16; Ps. xxvii. 5, xl. 2, lxi. 3), the “deep” (“*ma’amak-kim*”) is a metaphorical expression for misfortune or sorrow (Ps. lxix. 2, 15; cxlxx. 1). Thus the “deep valley” (“*emek*”) designates a “place of affliction and judgment” (Joel iv. 2, 12, 14, Hebr.), and the phrase “deep pit” and similar words are used in the sense of “great danger” (Prov. xxii. 14, xxiii. 27; Isa. xxiv. 17, 22; Zech. ix. 11; Ps. lv. 23, lxxi. 20, lxxxvi. 13, lxxxviii. 6, cvii. 20; Lam. iii. 47, 53; iv. 20; compare the Arabian saying, “They live in a valley that is at the mercy of torrents.” Hence “the depths of Sheol” (Prov. ix. 18) is an image of utter affliction.

2. “Deep” is also an expression for the unfath-

omable and inscrutable. Therefore hardened sinners are said to make deep—that is, heap up—their sins (Isa. xxxi. 6; Hosea v. 2, ix. 9), and “deep” is synonymous with “inexhaustible quantity” (Rom. xi. 33; II Cor. viii. 2). The Bible also speaks of people who are “deep”; that is, are cautious in speech (Isa. xxxiii. 19; Ezek. xxxiii. 5 *et seq.*). The Bible applies the word “deep” also to the heart (Ps. lxxiv. 7; Judith viii. 14), and to a man’s words (Prov. xviii. 4), or to his plans (Prov. xx. 5), while it finds “deep things” (secrets) in the universe (Job xii. 22), in the nature of things (Eccl. vii. 24), and in history (Dan. ii. 22). Hence the word “deep” is used in the sense of “inscrutable” in reference to God’s thoughts (Ps. xcii. 6). As a further consequence of these metaphorical applications, “to make deep” came to be an equivalent for “to conceal” or “to deceive” (Isa. xxix. 15). It is interesting to note that in the cuneiform texts wisdom is designated as “the deep” (“nimeku”), and is characterized thereby as something difficult of attainment and seldom found.

E. K.

DEFENSE: Means of protection from assault. In Biblical times outlying farms were protected from bands of marauders by watch-towers (“migdal”; see Tower). When the collection of houses in a village became large enough to need protection, they were generally enclosed by a wall, and were then known as cities. At times centers of strategic importance were held as fortresses (see FortRESS).

J.

DEGREES, SONG OF. See PSALMS.

DEHAVITES (דְּהַוִּיטִים; R. V. *Dehaites*): The Dehavites are mentioned among the peoples settled in Samaria who opposed the reconstruction of the Temple at Jerusalem (Ezra iv. 9). Whether the Dehavites are to be connected with a nomadic Persian tribe, the *Δάοι*, mentioned by Herodotus (i. 125), or with the name of the city of Du'-va, mentioned on Assyrian contract tablets, is doubtful. The Septuagint reads, in codex A, *Δαβαῖοι* (“the Davæans”), but in codex B the reading is *Σοσωναχαιοι οἱ εἰσὶν Ἠλαμαιοι*, which means “the Susamchites who are the Elamites,” taking the word translated “Dehavites” as a verb.

K.

B. P.

DEICHES or **DAICHES** (דֵּיכֶס or דֵּיכֶשׁ): Polish family; mentioned as early as the seventeenth century, and members of which are living in Russia and Austria. The relationships of those bearing the name can be determined only in a few cases; and the fact that “Deiche” is common as a first name among Russo-Polish Jewesses suggests the probability of a common origin of the family name. Nevertheless, as there are Deiches in Russia who are known to have come from the city of Cracow, and as there are others of that name resident in that city, it is not impossible that Cracow is the native place of the Deiches family. The following are the more important members of the family:

Eliezer Elijah b. Solomon Zebi Hirsch Deiches: Russian Talmudist; born at Wilna in 1797; died there in 1881. Eliezer officiated as rabbi of the communities of Woronowo, Padzelwe, and Eishishuk, succeeding his father as dayyan of Wilna

at the age of twenty-nine, and remaining in that office until his death. As dayyan he was noted for his endeavors to lighten the burden imposed by the ritual, while he himself lived a life of asceticism.

Elijah Judah b. David Deiches: Russian rabbi and Talmudist; flourished in the eighteenth and nineteenth centuries; died at Jerusalem Feb., 1858. Elijah was the son of David b. Aryeh Löb Deiches, who was rabbi of Eishishuk at his death in 1842. Elijah was for many years rabbi at Neustadt-Shirwint and Wilkowiski, where he also directed large yeshibot. He then removed to Palestine, and was one of the leading rabbis of Jerusalem.

Israel Hayyim b. Löb Hirsch Deiches: Russian rabbi and Talmudist; born at Dorshunishak, near Kovno, Dec., 1850. At the age of three he accompanied his father to Kovno, where, under the direction of his father and of other scholars, he devoted himself to the study of the Talmud. In 1869 he removed to Wilna. Here he married the daughter of Moses Bielitzki, called also Moses Zerne's. He remained in that city until 1885, when he went as rabbi to Neustadt-Shirwint, whence he emigrated to England; he is now rabbi and editor of a Hebrew paper in Leeds. He is the author of the following works: “*Pirhe ha-Abib*” (Blossoms of Spring, Wilna, 1870), discussions on portions of Jewish law, composed at the age of eighteen; “*Imre Yosher*” (Words of Uprightness, Wilna, 1887), sermons; “*Netivot Yerushalmi*” (The Ways of Jerusalem, Wilna, 1880), a commentary on the treatise Baba Kamma of the Palestinian Talmud; “*Kuntros . . . 'al ha-RiBaSH*,” remarks and notes to the responsa of Isaac b. Sheshet, included in the Wilna edition of that work (1878); “*Ma'arekot Yisrael*” (The Armies of Israel), halakic discussions on various subjects included in the “*Orah ha-Hayyim*” of R. Hayyim of Ratzki (Wilna, 1879). H. N. Steinschneider (“*Tr Wilna*,” p. 106) gives 1853 as the date of Deiches' birth.

Jacob Mordecai b. Simon Deiches: Polish Talmudist of the seventeenth century. He was first associate rabbi at Cracow, and as such approved Hayyim Krochmal's “*Mekor Hayyim*,” which appeared at Fürth in 1697.

Leizer Deiches: Polish Talmudist and rabbi; flourished in the beginning of the eighteenth century. He was rabbi at Opatow (Galicia), and was among the scholars who lived for a time in Joseph b. David Oppenheim's house for the purpose of studying the rare books and the still rarer manuscripts in the latter's library. At the request of Oppenheim, Deiches prepared for the press Abraham Abele Gombiner's work, “*Magen Abraham*,” on the Tosefta (Amsterdam, 1732). Gombiner's grandson remarks in the introduction that Deiches was so modest that he objected to having his labors in connection with the work publicly acknowledged.

Löb Hirsch Deiches (generally called **Aryeh Zebi b. David**): Lithuanian Talmudist; died at an advanced age at Kovno Oct. 1, 1891. He was a son of Rabbi David of Eishishuk, and a brother of Elijah Judah Deiches. He officiated for some years as rabbi at Dorshunishak, near Kovno, and removed to the latter place in 1853, where he filled the offices of associate rabbi and director of a yeshibah until his

death. He is the author of "Zibhe Teru'ah," a commentary on the prayers of New-Year's Day (Wilna, 1867).

Samuel b. Aryeh Löb Deiches: Lithuanian rabbi; died at Wilna March 23, 1825. His father was rabbi at Lida, near Wilna; his grandfather, called Elijah Arkes ("Arke" is the diminutive of "Aaron"), was a native of Cracow. On his mother's side he was a nephew of the dayyan of Wilna—"the great Simeon." Like the latter he was for many years one of the dayyanim of Wilna, and was famous for his devotion to the study of the Talmud. Many of the works printed at Wilna during his term of office bear his printed approbation. His brother David was the father of Elijah Judah Deiches; his other brother Meir was dayyan at Kovno.

L. G.

DEISM: A system of belief which posits God's existence as the cause of all things, and admits His perfection, but rejects Divine revelation and government, proclaiming the all-sufficiency of natural laws. The Socinians, as opposed to the doctrine of the Trinity, were designated as deists (F. Lichtenberger, "Encyclopédie des Sciences Religieuses," iii. 637). In the seventeenth and eighteenth centuries deism became synonymous with "natural religion," and deist with "freethinker."

England and France have been successively the strongholds of deism. Lord Herbert, the "father of deism" in England, assumes certain "innate ideas," which establish five religious truths: (1) that God is; (2) that it is man's duty to worship Him; (3) that worship consists in virtue and piety; (4)

Deism in that man must repent of sin and abandon his evil ways; (5) that divine retribution either in this or in the next

life is certain. He holds that all positive religions are either allegorical and poetic interpretations of nature or deliberately organized impositions of priests. Hobbes (d. 1679) may be mentioned next (see Lange, "Gesch. des Materialismus," i. 245; F. Toennies, "Hobbes," in "Klassiker der Philosophie," Stuttgart, 1896). John Locke (d. 1704; see Jodl, "Gesch. der Ethik," i. 149 *et seq.*), in "The Reasonableness of Christianity as Delivered in the Scriptures" (1695), declares that "the moral part of the law of Moses is identical with natural or rational law." John Toland (d. 1722), the forerunner of the modern criticism of the N. T., in "Christianity Not Mysterious" (1696), says: "Revelation is no reason for assuming the truth of any fact or doctrine; it is a means of information." Anthony Collins (d. 1729), author of "Discourse on Freethinking" (1713) and "Discourses on the Grounds and Reasons of the Christian Religion" (1724), asserts that "Christianity is mystical Judaism." He applies the comparative method, and utilizes the Mishnah to show the affinity of N. T. theological allegorizing to that of the Rabbis. Tindal (d. 1733), in "The Gospel a Republication of the Religion of Nature" (1730), avers that "Revelation, both Jewish and Christian, is only a repetition of the *lex naturæ*."

In France, Voltaire, Diderot, and, above all, Rousseau, were exponents of deism, on the whole illustrating the intellectual moralism of the school. In Germany it is the "Aufklärungsphilosophie" that to a certain extent is under the influence of the deistic

theses, and as Moses MENDELSSOHN is one of the prophets of the "Aufklärung," deism may be said through him to have had a part in the shaping of modern Jewish thought. Reason and

common sense are, according to Mendelssohn, identical ("Werke," ii. 265, 283, 315). Religion is, according to him, natural and eminently practical. To "do," not to "believe," is the chief care of the religious man. Natural theology is as accurately certain as mathematics. That God is, is a fact, not a belief. Mendelssohn parts company with deism by modifying the doctrine of divine retribution. According to him, happiness and the doing of right are coincidental. The virtuous man is happy. However, Mendelssohn is not consistent throughout, as he admits repeatedly that, without the assumption of immortality, morality can not stand, nor can God's Providence be established (Phædon). Revelation for him is not necessary to religion; but the national law of Judaism, which is not natural, had to be revealed ("Schriften," iii. 311-319, 348-356; v. 669, Leipsic, 1843).

The Mendelssohnian arguments left their imprint on the Jewish theology of the nineteenth century (see L. Löw, in "Ben Chananja," i.). His "deistic" moralism on the one hand, and his "national legalism" on the other, have not been without influence on the theories of the Reform rabbis (see HOLDHEIM, SAMUEL), which differentiated the moral—that is, the universal and eternal—injunctions and principles of the Law from the national and temporal; while the distinction made between moral and ceremonial laws (see CEREMONIES), though recognized by Saadia and others, received a new emphasis through Mendelssohn's views. The relations of deism to Judaism, however, have not been made the subject of systematic inquiry, though non-Jewish controversial writers have often argued that Judaism, positing a transcendental God, virtually stood for deism. This contention must be allowed if deism connotes anti-Trinitarianism. Judaism has always been rigorously Unitarian. Deism, as the denial of original sin and the soteriology built thereon, also harmonizes with Jewish doctrine. But the doctrine of deism which relegates God, after creation, to the passive rôle of a disinterested spectator, is antipodal to the teachings of Judaism. God directs the course of history and man's fate (Ex. xix. 4, xx. 2; Deut. xxxii. 11, 12; xxxiii. 29; Ps. xxxiii. 13, cxlv. 16; Jer. xxxii. 9). God neither slumbers nor sleeps. He is Israel's guardian (Ps. cxxi.). Nations may plot and rage, but God's decrees come to pass (Ps. ii.).

The question as to what God has been occupied with since the creation is the subject of rabbinical speculations (Lev. R. iii., viii.; Gen. R. lxviii.; Pesik. 11b; compare Midr. Sam. v.; Tan., ed. Buber, Bemidbar, xviii.; Tan., ed. Buber, Matṭot, end; Tan., Ki Teze, beginning). God presides over the births of men (Nid. 31a; Lev. R. xiv.; Tan., Tazria'). He takes care that the race shall not

die out (Pes. 43b; Pesik. R. xv.). Even the instinctive actions of animals are caused by God, and so is He the power and will behind the acts

Talmud and of terrestrial governments (Eccl. R. Midrash. x. 11). None wounds a finger without God's will (Hul. 7b). God sends the wind that the farmer may have wherewith to live (Pesik. 69a; Lev. R. xxviii.; Eccl. R. i. 3; Pesik. R. xviii.). God assigns the fate of the nations and of individuals (R. H. i. 2). Man's life is in the hand of God (Lam. R. iii. 39). Not alone the creation of the world, but also its preservation (Gen. R. xiii.; Eccl. R. i. 7, iii. 11; Gen. R. ix.; Midr. Teh. to Ps. ix.), as well as the destiny of man and mankind, is subject to God's constant guidance. In fact, creation was never considered finished (Hag. 12a). As the daily morning prayer has it: "[God] createth a new creation every day, everlastingly" (compare Rekanati, "Ta'ame ha-Mizwot," p. 37, and "Akedat Yizhak," gate iv.). Albo ("Ikkarim," iii. 26) calls attention to the distinctive element of the Jewish God-conception which associates Him not merely, "as some philosophers do," with the creation, but also with the direction of the world after creation.

These ideas of God's government are expressed in the Jewish prayer-books (especially for Rosh ha-Shanah), and are in one way or another put forth by the philosophers. The question how God's government is compatible with human freedom has kept the Jewish thinkers on the alert; but, whatever their answer, none disputes God's supremacy and government (Saadia, "Emunot we-De'ot," iv.). Ibn Gabirol assumes that God's direction is carried into effect through "mediating forces." Judah ha-Levi's discussion of the names of the Deity (Elohim and YHWH) proves his antideistic convictions. "Ehyeh asher ehyeh" indicates God's constant presence in Israel and His help ("Cuzari," iv. 1, ii. 7). Maimonides' discussion of Providence ("Moreh," iii. 17) is also antideistic, though largely influenced by the pseudo-Aristotelian doctrine that Providence does not extend to the care of individuals.

Deism posits the moral freedom of man, his predisposition to virtue: so does Judaism (Ber. 33b). "All is in the hands of God save the fear of God" is the Talmudical formula for a doctrine resting on Biblical teachings, and accepted by Jewish theology. Judaism is theistic, not deistic. See GOD; MIRACLES; PROVIDENCE, DIVINE; REVELATION, DOCTRINE OF.

DEITY. See GOD.

DEL BANCO, MIRIAM: American authoress; born June 27, 1867, at New Orleans; daughter of Rabbi Max Del Banco, who died shortly after her birth. Her mother removed to St. Louis, in the public schools of which city the daughter was trained, displaying remarkable poetic talent. Later she was sent to her uncle at Cape Girardeau, Mo., where she attended the State Normal School. After completing the course with honors, she rejoined her mother, who in the mean time had removed to Chicago, in which city Miss Del Banco obtained in 1885 a position as teacher in the public schools; since 1889

she has been assistant principal at the Von Humboldt School. She has been a frequent contributor to both the Jewish and general press, having written a large number of poems, both Jewish and secular; she has likewise translated Kayserling's "Die Jüdischen Frauen," which appeared as a serial in the columns of the "Jewish Advance" and was published in Chicago in 1881; and Alberti's "Ludwig Börne," which appeared in the "Menorah," 1888-89. **BIBLIOGRAPHY:** I. Markens, *The Hebrews in America*, pp. 208, 209.

M. Co.

DEL BENE, DAVID (also known as **Mehaṭob**): Italian rabbi; born at Mantua in the latter half of the sixteenth century; died at Ferrara in the beginning of the seventeenth century. Possessed of great oratorical talent and having received a thorough secular education, he began while a youth to preach in the synagogue of his native town. His sermons attracted crowds of listeners, the more so as he introduced in his addresses quotations from Italian poets, and even went so far as to speak of "the holy Diana." This mode of preaching could not fail to antagonize the zealots, who raised a storm of opposition against the young orator. Israel Sforza put himself at their head, and petitioned the rabbis to excommunicate him. Consequently David retired from the pulpit, and resolved to turn his attention to rabbinical studies. His former judge, Menahem Azariah of Fano, became his master. Having acquired considerable Talmudical reputation, so much so that he was often consulted in regard to complicated halakic questions, David was appointed rabbi at Ferrara, which position he held for thirty-six years. David was distinguished by the ascetic purity of his life.

I. BR.

DEL BENE (מהטוב), JUDAH ASHAEL BEN ELIEZER DAVID: Italian rabbi; born about 1618; died at Ferrara April 2, 1678. Together with Menahem Recanati he signed a halakic decision on the remission of debts in the jubilee year, which decision is cited in "Paḥad Yizhak" by Isaac Lampronti, who counts Del Bene among the greatest Talmudical authorities of the time. Del Bene wrote "Kis'ot le-Bet Dawid" (Thrones of the House of David), Verona, 1646. It is a philosophical work, divided into eight sections ("bottim") and fifty chapters ("she'arim"), and deals with the creation of the world, the heavens and the planets, the elements, the immortality of the soul, resurrection, articles of faith, the preeminence of the Hebrew language, the liturgists and payyetaṇim, and Mohammedanism. In the part dealing with the last-named subject Del Bene shows the superiority of Christianity over Islam, notwithstanding the Trinitarianism of the former. Another work of his, entitled "Yehudah Meḥokeki" (Judah, My Lawgiver), is quoted in "Kis'ot le-Bet Dawid." Del Bene was a skilful poet, and many of his productions have been included in miscellaneous poetical collections. His style, however, is inferior because of his too frequent use of synonyms, though, as he says in "Kis'ot le-Bet Dawid," in treating of Hebrew style, he considers its wealth of synonyms to be one of its most beautiful features.

DELACRUT, DELACROT, or DE LA CROTA, BEN SOLOMON: Polish scholar; lived in the middle of the sixteenth century. He settled early in Italy, and at one time seems to have attended the lectures on Cabala and philosophy at the University of Bologna, devoting himself to the interpretation of cabalistic and scientific works. He was the author of the following: (1) "Perush," a commentary on Joseph Gikatilla's cabalistic work, "Sha'are Orah," Cracow, 1600; (2) a commentary on Solomon ben Abigdor's Hebrew translation of Sacrobosco's treatise on astronomy, "Tractatus de Sphæra," or "Aspectus Circulorum" (Hebrew, "Mar'eh ha-Ofanim"), with an explanation of the difficult passages of the translation according to the reading of his masters of the University of Bologna, and the interpretation he had found in Christian works (Cracow, 1720); (3) "Zel ha-'Olam" (The Image of the World), a translation of a treatise on cosmography written in French by Gossouin, under the title "Livre de Clergie," or "L'Image du Monde" (Amsterdam, 1733).

DELAIAH: 1. A son of Elioenai in the Davidic genealogy (I Chron. iii. 24; A. V. "Dalaiah"). The sons of Delaiah are mentioned in the long post-exilic list of those who returned from captivity under Zerubbabel (Ezra ii. 60; Neh. vii. 62). They were unable to trace their descent. In I Esd. v. 37 the name is given as "Dalan."

2. Son of Mehetabeel and father of Shemaiah, who tried to persuade Nehemiah to seek refuge at night in the Temple, which caused Nehemiah to suspect him of spreading false alarms at the instigation of Sanballat (Neh. vi. 10).

3. Son of Shemaiah, a prince during the régime of Jehoiakim; one of those to whom Micaiah related the reading of the prophecy of Jeremiah by the prophet's scribe Baruch (Jer. xxxvi. 12).

4. A priest who headed the twenty-third of the twenty-four priestly divisions in the reign of David (I Chron. xxiv. 18).

G. B. L.

DELAWARE: A state on the Atlantic seaboard of the United States. The first Jew of whom anything definite is known as a resident of the state was Solomon Solis, born in Wilmington March 13, 1819 (Morais, "The Jews of Philadelphia," p. 51). Prior to 1855 M. M. Stern, now of Philadelphia, was engaged in business in Milford. There were, however, few Jews in the state before 1860, when Nathan Lieberman settled in Wilmington, his brother Henry about the same time locating in Dover, the capital of the state. Since then there has been a small influx, the total number of Jewish residents being given as 928, of whom over 800 reside in Wilmington. That city contains the only Jewish organizations in Delaware. Congregation Adath Kodesh Baron de Hirsch

was organized in 1885 and incorporated Sept. 13, 1889. Its present rabbi is Herman A. Blatt. A free Hebrew Sunday-school, dating from Jan. 1, 1896, has now (1903) over 300 pupils. The charitable organizations are the Moses Montefiore Benefit Society, incorporated Feb. 10, 1883; the Hebrew Charity Organization, incorporated March 9, 1902. The latter has a loan fund without interest. There are also the Young Men's Hebrew Association, the Wilmington Lodge No. 470, I.O.B.B., and a few smaller organizations. A few Jewish families are scattered in Viola, Newcastle, Odessa, Millsboro, Laurel, Delaware City, Lewes, Georgetown, Seaford, Harrington, Middletown, and Milford.

DELGADO, GONÇALO: Portuguese Marano of the sixteenth century, and son of Juan Pinto Delgado; born at Tavira, where he occupied the position of an "escrivão dos orfãos" (secretary of an orphanage). He is the author of "Poema Composto de que Era, o Argumento: a Violente Irrupção Feita Pelos Inglezes no Anno do 1596, Sequeando e Abrazando a Cidade de Faro," a poem narrating the circumstances of an English incursion in 1596, during which the town of Faro was stormed and sacked. The poem is dedicated to Ruy Lourenzo de Tovar.

BIBLIOGRAPHY: Barbosa Machado, *Bibliotheca Lusitana*, ii. 393; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 41.

M. K.

DELGADO, JOSEPH: Farmer of the revenue of Lumbrals, Castile. On July 26, 1723, he, his wife Antonia de Cardenas, and his brother Gabriel Delgado, refusing to renounce their faith, were sentenced to imprisonment for life by the Inquisition at Llerena. On the same day, the mother-in-law of Joseph Delgado was burned at the stake for the same reason.

S.

M. K.

DELGADO, JUAN (MOSES) PINTO: Marano poet; born at Tavira, Portugal, about 1530; died in 1591. Going to Spain in his youth, he studied the humanities at Salamanca, where he formed a friendship with the poet Luis de Leon. He was talented in many ways, and was endowed with an unusually retentive memory, being able to reproduce verbatim a discourse heard but once. Pursued by the Inquisition, he left his wife and child at Tavira, and went first to Rome, and then to France, where he openly professed Judaism and took the name of Moses.

The poems of Jean Pinto Delgado are distinguished for grace, sublimity of style, and variety of meters; "parts of them are written not only with tenderness, but in a sweet and pure versification," says Ticknor. In addition to various poems, he composed poetical versions of certain books of the Bible, which were published together under the title "Poëma de la Reyna Ester, Lamentaciones del Propheta Jeremias, Historia de Rut, y Varias Poesias" (Rouen, 1627), and dedicated to Cardinal Richelieu. The view of J. A. de los Rios and Ad. de Castro that there exists an earlier edition, published at Paris, is very questionable. Barbosa Machado says that Delgado trans-

lated parts of Petrarch into Portuguese. Daniel Levi de Barrios says of him:

"Del Poema de Hester en sacro coro
Mosch Delgado da esplendor sonoro,
Y corren con su voz en ricas plantas
De Jeremias las Endechas santas."

DELIATITZ, ELIJAH BEN ABRAHAM:

Russian Talmudist and rabbi of Deliatitz; flourished at the beginning of the nineteenth century. He wrote: (1) "Shene Eliyahu" (The Years of Elijah), notes on the comments of Elijah Wilna on the Abot de-Rabbi Nathan; (2) "Ben Abraham" (The Son of Abraham), a concordance of the parallel passages in the Abot, with explanations (Wilna, 1833). Deliatitz is also the author of "Ma'aneh Eliyahu" (The Reply of Elijah), a commentary on the last Mishnah of 'Uk-zin, and on the fifth Mishnah in the fifth section of Kilayam, published with the preceding work.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 204; Benjacob, *Ozar ha-Sefarim*, p. 654; S. J. Fuenn, *Keneset Israel*, p. 105.

DELILAH: A woman of Sorek, loved by Samson (Judges xvi. 4-20). The chief of the Philistines bribed her to discover the source of Samson's great strength. Three times she failed. First, at his own suggestion, she bound him with "seven green withes," but these he easily snapped asunder. Then she tied him with new ropes: these also failed. Then she fastened the locks of his hair to the loom (see Moore, "Judges," *ad loc.*), but with the same result. Finally, after many complaints that Samson did not trust her, he told her that his strength lay in his hair. Then, when he was asleep, she called in a man to cut off his hair. She then awoke him, and delivered him into the hands of the waiting Philistine chiefs, from each one of whom she received 1,100 pieces of silver. In all probability Delilah was a Philistine woman, although not necessarily a "political agent" of the Philistines (Cheyne and Black, "Encyc. Bibl." s.v.; see SAMSON).

G. B. L.

Delilah's name, דלילה, has been explained as "faithless one" by E. Meier ("Hebräisches Wurzelwörterbuch," p. 330), and as "traitor" by Ranke ("Weltgesch." i. 51); it has also been compared with the Arabic "dalilah," Modern Arabic "dyle," used to designate a hetæra (Gesenius, "Th." p. 341; compare "dallum" = amorous, coquettish, in Gesenius, "Lexicon," p. 195b).

This interpretation of the name would be justified

only if it were certain that the story of Samson is a myth, and that the name "Delilah" had, in connection with his story, a symbolical significance. This, indeed, has been assumed by Ignaz Goldziher, for example, who, in his "Der Mythos bei den Hebräern" (pp. 186 et seq.), says: "Delilah is the setting sun, which has completed its day's labor, or, rather, which is no longer the sun, but the night that cuts her lover's curly locks (crines Phœbi), in which his whole strength is centered." E. Wietzke (in the pamphlet "Der Biblische Samson der Aegyptisches Horus-Ra," 1888) likewise identified Delilah with the night; but these assumptions are more or less arbitrary attempts to reduce Samson to a mythological figure. It is more correct to apply to Delilah Philo's words, in his "De Sampson," concerning the first Philistine wife of this hero: "O nefanda mulier abominabilis, optas audire ut tradas dicentem, ut exuas coronam ab eo!" In the stories of "The Arabian Nights" the name of Delilah has come to be applied to a cunning woman (see Joseph Horowitz in "Z. D. M. G." pp. 333-335).

E. K.

DELITZSCH, FRANZ: Christian Hebraist; born at Leipsic Feb. 23, 1813; died there March 4, 1890. He was not of Jewish descent; although, owing to his rabbinical learning and his sympathy with the Jewish people, and from a misunderstanding of his relation to his Hebrew godfather (whom he called "uncle"), a Jewish ancestry was often attributed to him. He devoted himself early to Semitic studies, was made assistant professor at Leipsic in 1844, and was called as professor to Rostock in 1846, to Erlangen in 1850, and in 1867 to Leipsic, where he spent the remainder of his life. His services to Hebrew philology and literary history and to Biblical exegesis were great. As an Old Testament critic he was progressive: beginning as a bulwark of conservatism, he gradually moved toward the modern position (for example, in regard to the documents of the Pentateuch, and the dates of Deuteronomy, Isaiah [xl.-lxvi.], and Daniel). In Biblical psychology his work was less satisfactory, and has not met with favor. As a student he became deeply interested in post-Biblical Hebrew literature, and even his Biblical commentaries are full of citations from rabbinical and Neo-Hebraic works. In 1837 he worked out a catalogue of the Hebrew and Syriac manuscripts in the Leipsic Rathsbibliothek (published 1838). In conjunction with Steinschneider he edited and annotated Aaron ben Elijah's "Ez Hayyim" (Leipsic, 1841); though his chief work in this branch was his "Zur Geschichte der Jüdischen Poesie" (Leipsic, 1836), a history which is still of use. Mention should also be made of his "Jüdisch-Arabische Poesien aus vor-Muhammedanischer Zeit" (Leipsic, 1874); "Jesus und Hillel" (3d ed., 1879); "Jüd. Handwerkerleben zur Zeit Jesu" (3d ed., 1879; Eng. transl. "Jewish Artisan Life," London, 1877); and his edition of Weber's "System der Altsynag. Theologie" (Leipsic, 1880).

Delitzsch's principal publications, besides those already mentioned, are his "Pentateuch-Kritische Studien," in "Zeitschr. für Kirchliche Wissenschaft," 1880, 1882; and the following commentaries: On

Genesis, 1852, 1853, revised ed., 1887; Job, 1864; Isaiah, 1866, 1889; Psalms, 1867; Proverbs, 1873; Song of Songs and Ecclesiastes, 1875. These commentaries, though they follow the Masoretic text without attempt at emendation, are exegetically strong.

Delitzsch was also active in other lines of Biblical science. He took part in the revision of Luther's translation of the Bible, instituted by the government of Saxony in 1873; he collaborated with Baer in the publication of a revised Masoretic text of the Old Testament (the Baer-Delitzsch text, unfortunately left unfinished); and, in connection therewith, produced a series of studies (from 1871 to 1886) on the Complutensian Polyglot. Delitzsch was a vigorous opponent of the anti-Semitic movement in Germany, and was one of the foremost opponents of Rohling, defending the Jews against the blood accusation. In 1841 he made a public declaration on this subject in the Waisenhaus-Kirche in Dresden, and in 1882 published a responsum ("Christliche Zeugnisse Gegen die Blutbeschuldigung," p. 12). In this connection he wrote "Rohling's Talmudjude" (7th ed., 1881); "Was D. Aug. Rohling Beschworen Hat?" (1883); "Schachmatt den Blutlügen Rohling und Justus" (2d ed., Erlangen, 1883); "Neueste Traugeschichte des Antisemitischen Propheten" (Erlangen, 1883). This did not prevent him from repelling what he considered unjust attacks upon Christianity in the Jewish press ("Christentum und Jüdische Presse," Erlangen, 1882). His interest in the Christianization of the Jews led him to found in 1886 at Leipzig the institution which, after his death, was called the "Institutum Judaicum Delitzschianum"; and for them he translated the New Testament into Hebrew (1877), with the aid of J. E. Salkinsohn. His son **Friedrich Delitzsch** is noted as an Assyriologist; he is professor of Assyriology at the University of Berlin.

DELMANSI. See ANAW.

DELMEDIGO (דֵּלִמְדִּיגוֹ = "Del Medico"): A family of German descent. About the end of the fourteenth century its founder, **Judah Delmedigo**, emigrated to the island of Crete, whose inhabitants were mostly of German origin (compare Joseph Solomon Delmedigo, "Elim," p. 30, Amsterdam, 1629). Judah had three sons: (1) **Abba ha-Zaken** (I.), who, at his own expense, erected a German synagogue (הַנְּקִרָא אֶלִּימְדִּיגוֹ); (2) **Mejuhas**, who died childless; and (3) **Shemariah**, with the surname Cretensis (אֶקְרִיטִי). The last wrote a philosophical work, "Heber Ish we-Ishto" (compare Geiger, "Wiss. Zeit. Jüd. Theol." iii. 447), and many grammatical treatises (compare Wolf, "Bibl. Hebr." ii. 597, No. 33; Zunz, in "Catalogus Lib. Manuscript. Bibl. Senat. Lips." 324). His son **Moses** was the father of **Elijah Cretensis ben Moses Abba Delmedigo** (see next column). Elijah left two sons: **Moses**, a philosopher, and **Judah**, a rabbi (see Jew. Encyc. iv. 509). One of Judah's daughters, Rachel, married Joseph of Constantinople, a descendant of Mordecai b. Eleazar Comtino (compare Grätz, "Gesch." viii. 274, 438, note), in whose library his (Comtino's) commentary on Ibn Ezra was studied by

a later descendant of the family, Joseph Solomon Delmedigo.

Casta (קִשְׁתָּי: *idem*, "Elim," p. 29), the only daughter of Joseph of Constantinople and Rachel, married her relative Elijah, whose genealogy, on his father's side, is as follows: The above-mentioned Abba ha-Zaken (I.) had three sons: **Elijah**, **Moses**, and **Elkanah**—all Talmudists—who, together with other rabbis, defended—"with flaming swords"—their countryman Moses Capsali against the charges of Joseph Colon (Grätz, "Gesch." viii. 253). Elkanah's son **Samuel**, also a rabbi, had a son **Samuel Menahem**, who was born after his father's death. This Samuel Menahem, physician and teacher of philosophy, the head of a yeshibah in Padua, was made a prisoner of war, was ransomed by his countrymen, and was recalled as rabbi to Candia. His son **Abba** (II.) had a son **Eliezer**, who presided over a Talmudic school for many years, and was a zealous opponent of the Cabala. His son **Elijah**, also a Talmudist, his father's successor as rabbi in Candia, and husband of the above-mentioned Casta, was the father of **Joseph Solomon Delmedigo** (see Jew. Encyc. iv. 508) the most illustrious member of the family (compare Steinschneider, "Cat. Bodl." 1510). It is not reported that children were born to him on the island of Candia (see his lament in his "Ta'alumot Hokmah," ii. 3b, Preface). His remarks ("Elim," p. 32), "that he had a little daughter at home," and "that he needed much money for his daughter's dowry," are explained by Moses Metz as humorous references to his work "Bosmat bat Shelomoh" (Geiger, "Melo Chofnazim," p. xlv.) and to the expenses of its printing. He was married in Frankfort-on-the-Main, where he held the position of communal physician, and where his two daughters were born. One died young (Carmoly, in "Allg. Zeit. des Jud." 1856, Jahrg. 20, No. 20, with inexact statement of sources). The other, Sarah, married the physician Solomon Bing, and after his death (1680) Isai Oppenheim, who died, according to her tombstone (No. 3009 in the old cemetery of the Israelitic community in Frankfort), Feb. 9, 1691 (M. Horwitz, in Berliner's "Magazin," x. 113).

M. Sc.

DELMEDIGO, ELIJAH CRETENSIS BEN MOSES ABBA: Cretan philosopher and physician; born in Candia in 1460; died there March, 1497 (Grätz, "Geschichte," 3d ed., viii. 244, note). Elijah was instructed by his father in Bible and Talmud, and when scarcely more than a child he addressed halakic questions to Joseph Colon, who highly praised his erudition and clear mind (Responsa, No. 54).

The high opinion of such a Talmudical authority probably led to the call, which Delmedigo received a little later, to preside over the Talmudical school of Padua. There he devoted himself to the study of philosophy, chiefly that of Aristotle, Maimonides, and Averroes, whose systems he afterward inculcated among Christian students by lectures and by translations and commentaries written in an elegant literary Latin.

Delmedigo's reputation as philosopher soon stood so high that he was chosen by the University of Padua, with the approval of the Venetian Senate, as

umpire in a dispute on some philosophical subject between the professors and students of that university; and as a result of his decision he, at the age of twenty-three, was appointed professor of philosophy, teaching successively at Padua, Florence, Venice, Perugia, and Bassano. Among his students was the eminent scholar Count Giovanni Pico di Mirandola, who became his lifelong friend and protector.

This happy period in Delmedigo's life did not last long. The members of the party against whom he had decided the above-mentioned dispute had not forgiven him for their defeat, and they commenced to persecute him. Moreover, a quarrel arose between Delmedigo and Judah Minz, rabbi of Padua, who, being strongly opposed to scientific progress and freedom in religious matters, could not agree with the theories propounded by Delmedigo in his work "Behinat ha-Dat" (see below). This quarrel soon developed fierce persecutions, obliging Delmedigo to leave Italy; and he returned to his native place, where he was received with much sympathy by his countrymen, both Jews and Christians. There he taught philosophy for two or three years, at the expiration of which he underwent an operation on the cheek, which caused his death. Joseph Solomon Delmedigo, who in his "Mazref le-Hokmah" gives some biographical notes on Elijah, relates that crowds of learned Christians, clad in mourning, attended Elijah's funeral.

Elijah's scientific activity lay chiefly in translating from Hebrew into Latin and in commenting upon some of Averroes' commentaries

His Works. on Aristotle. He did this mostly at the request of Pico di Mirandola. His translations and independent works are: "Quæstiones Tres: I. De Primo Motore; II. De Mundi Efficientia; III. De Esse Essentia et Uno," Venice, 1501; "Adnotationes in Plurima Dicta," or "Anno. Quædam in Lib. de Physico Auditu Super Quibusdam Dictis Commentatoris [Averrois] et Aliis Rebus," etc., published as an appendix to the preceding work; two questions on the hylic intellect, in Latin and in Hebrew, under the title "She'elah 'Amukkah 'al Ahdut Sekel ha-Hayulani" (the first question being whether the hylic intellect is one; the second, whether it conceives substances separated from matter [Paris MS. No. 968; at the end of this work, Delmedigo promises to publish a book on the number of the precepts according to the Talmud]); "Averrois Quæstio in Librum Priorum (Analyticarum)," Venice, 1497; Averroes' commentary on Plato's "Republic," "De Regimine Civitatis" (no longer extant, and known only from quotations); "Averrois Commentatio [Summa] in Meteora Aristotelis," with an introduction as well as fragments from Averroes' "Middle Commentary," *ib.* 1488; "Averrois Commentatio [Media] in Metaph. Aristotelis," i.-vii. *ib.* 1560; Averroes' proem to the large commentary to Aristotle's "Metaphysics," xii., translated once for Pico di Mirandola, and a second time for Cardinal Grimani (Paris MS. No. 6508); a small treatise on

metaphysics (*ib.*); "[Averrois] De Substantia Orbis," in Latin and in Hebrew, under the title "Biur ha-Ma'amar be-'Ezem ha-Galgal" (*ib.*); "Sperma" (*ib.*); "Behinat ha-Dat" (Investigation of Religion), written at the request of his disciple Saul Cohen Ashkenazi, and published by Delmedigo's great-grandson, Basel, 1519; also, with a commentary, by Isaac Regio, Vienna, 1833. In the last-named work Delmedigo endeavored to separate religion from philosophy.

In his opinion religion consists in actions leading to a moral life, and is not a matter of

"Behinat ha-Dat." syllogisms requiring demonstration. Philosophical speculations leading to a better understanding of the religious principles are indeed permitted, if not prescribed, by the Law; but these speculations are applicable only for the small minority possessing a philosophical training. As for the majority, they must take the Biblical and Talmudical prescriptions in their literal sense. Still, he admits that Judaism, besides religious prescription, contains certain dogmas, such as the unity and incorporeality of God, divine retribution, belief in the miracles related in the Law and resurrection; but these are by no means illogical—as is, for instance, the Trinity—and no true philosopher will declare them untenable. Delmedigo ascribes a divine origin to the halakic part of the Talmud, which is the traditional interpretation of the laws. The haggadic part, on the contrary, being the work of men, has no higher authority than the dicta of the philosophers. The Cabala, he claims, is rooted in an intellectual swamp; no trace of it is to be found in the Talmud, and its basal work, the Zohar, is the production of a forger.

The "Behinat ha-Dat" can hardly be called an original work. All that Delmedigo says in it respecting philosophy and religion is borrowed from Averroes' "Faṣl al-Maḳal," as has been pointed out by A. Hübsch ("Monatsschrift," 1882, pp. 555-563; 1883, pp. 28-46). Delmedigo's merit in connection with this work lies chiefly in the courageous expression of his opinions, heedless of consequences, which, as the result showed, were disastrous for him. His assertion concerning the haggadic part of the Talmud was probably the cause of his quarrel with Judah Minz, who regarded it as a veritable heresy. On the other hand, the cabalists, who were at that time powerful, could not forgive Delmedigo for his severe attacks upon the Cabala; and even his friend Pico di Mirandola, who was a warm supporter of the Cabala and caused many cabalistic writings to be translated into Latin, was probably offended by his attacks.

Samuel Algazi, in his "Toledot Adam," attributes to Delmedigo a commentary to the Song of Songs; but this is no longer extant. According to Joseph Solomon Delmedigo ("Mazref le-Hokmah," p. 5), Elijah wrote several works in which he defended Maimonides against the criticisms of Levi b. Gershon.

DELMEDIGO, ELIJAH BEN ELIEZER: Cretan rabbi and Talmudist; flourished in the second half of the sixteenth and in the first of the seventeenth century in Candia. He was widely known in his time as a Talmudic scholar. A halakic decision of his exists in Joseph Samaga's "Derek Yemin." He was the father of the famous philosopher and writer Joseph Solomon Delmedigo.

DELMEDIGO, JOSEPH SOLOMON (Ya-ShaR = Joseph Solomon Rofe): Philosopher and physician; born at Candia June 16, 1591; died at Prague Oct. 16, 1655; son of Elijah ben Isaac ben Joseph. Joseph received a liberal education, was conversant with the Jewish as well as secular sciences, and was a student at the Univ. of Padua, which he entered at the age of fifteen, he studied logic, natural philosophy, metaphysics, and divinity; and then devoted himself to medicine and to his favorite studies, mathematics and astronomy, the latter under Galileo. While at Padua he frequently visited, at Venice, Leo de Modena, who exercised a great influence over him. Returning to Candia, Delmedigo's freethinking tendencies and his preference for secular studies soon made his residence there impracticable. For many years he led a wandering life, first to Cairo, in search of new books for his rich library. There he associated with the scholars, especially hakam, Jacob Iskandari, at whose request he wrote his works on mechanics. At Cairo, Delmedigo triumphed over a certain Mohammedan professor in a public debate on mathematics. At Constantinople, also (where he studied the Cabala), he associated chiefly with the Karaites. Going by way of Wallachia and Moldavia, he visited Poland and Lithuania. At Wilna he was engaged as physician to Prince Radziwill (c. 1620).

The appearance in Wilna of a man with such a versatile intellect was a rare event. Among his pupils here was Moses ben Meir of Metz. A Karaite, Zerah ben Nathan of Troki, addressed to Delmedigo a number of questions on scientific subjects, the answers to which constitute his "Elim." After a few years in Lithuania and Poland, Delmedigo went to Hamburg, where he officiated as rabbi or preacher to the newly established Sephardic community. An

epidemic compelled him to move to Glückstadt; from there he went to Amsterdam, where he officiated as rabbi for a few years. About 1630 he settled in Frankfort-on-the-Main, and in 1631 became a communal physician. He finally, about 1648, settled in Prague, and resided there until his death.

Delmedigo was the author of numerous scientific works. Most of them are known only by the author's list of his own writings. The following enumeration may contain some duplicates, as it is not always possible to distinguish between books which have one and the same title:

"Ya'ar ha-Lebanon" (The Forest of the Lebanon), an encyclopedia of science according to the system of the ancients. One part treats of the value of things, entitled "Hefes Mehuppas"; the other, of various religious notions.
"Kamah" (Shadow of Wisdom), reckoning of the time of the length of a shadow.
"Basmat bat Shelomoh" (Basmat bat Shelomoh), on arithmetic, geometry, astronomy, graphy, chiromancy, harmony, logic, ethics, and metaphysics. Delmedigo claims to have elaborated in the "Bosmat" a system of his own.
"Or Shib'at ha-Yamin" (The Light of the Seven Days), on creation and on optics.
"Kesbet Derukah" (A Bent Bow), on the rainbow and on colors. This and the preceding are appended to the "Bosmat."
"Ir Gibhorim" (City of Heroes), divided into two parts: (1) "Geburot Adonai," on astronomy; (2) "Niflaot Adonai," on chemistry and mechanics.
A commentary on the "Almagest" (a part of which is used in the "Elim").
"Sefer 'ot Te'alah" (Healing by the Source), a medical work.
"Sefer Binah" (Source of Instruction), the aphorisms of Hippocrates translated from Latin into Hebrew. Chapters are included in the

(Plaits of Gold), selections from Hebrew literature, with a commentary entitled "Nekudat ha-Kesef."

"Tor ha-Ma'alah" (Order of Dignity), on the treatment of scholars.

"Ruah Eliyahu," a defense of Elijah Mizrahi's commentary on Rashi.

On Porphyry's "Introduction to Logics," and on the "Categories."

Translations of several of Philo's works and of Judah Abravanel's "Philon et Sophia."

Explanations of difficult passages in Isaac Aramah's "Akedat Yizhak."

Comments on Ibn Ezra's "Sefer ha-Shem" and "Sefer ha-Ehad."

"Arubbot ha-Shamayim" (Windows of the Heavens), on metaphysics.

"Rahel Nebakkah," and a number of other works upon unknown subjects.

"Elim" (Amsterdam, 1629) contains answers to twelve scientific questions propounded by Zerah ben Nathan, and seventy mathematical paradoxes. The title is an allusion to Ex. xv. 27. The work also contains some letters of Zerah ben Nathan, and dissertations by one of Delmedigo's disciples, Moses ben Meir of Metz.

"Rosh Mashbir," on arithmetic.

"Ma'yan Gannim" (Source of the Gardens), a continuation to the answers to Zerah ben Nathan. It consists of the following short treatises: on trigonometry; on the first two books of the "Almagest"; on astronomy (these three printed with the "Elim"); on astronomical instruments; on Cabala and the supernatural; on astrology; on algebra; on chemistry; on the aphorism of Hippocrates; on the opinion of the ancients concerning the substance of the heavens; on the astronomy of the ancients, who considered the motion of the higher spheres due to spirits (Delmedigo shows that their motion is similar to that of the earth); on the principles of religion; mathematical paradoxes (printed together with the "Elim").

Another of Delmedigo's disciples, Samuel Ashkenazi, published under the title of "Ta'alumot Hokmah" (Basel, 1629-31) that portion of the "Ma'yan Gannim" which deals with the Cabala. This work shows that Delmedigo was a follower of the system of Isaac Luria. Geiger has published ("Melo

Ibn Ezra. He was so afraid of being accused of heresy that he covered the discussions on scientific and theologic questions in his "Elim" with the cloak of orthodoxy, and attributed his own opinions to Zerah or to Moses b. Meir of Metz. It was probably this fear that caused him to suppress the treatises on angelology and Cabala in his "Ma'yan Gannim." Still his contemporaries Yom-Tob Lipman Heller and Jair Hayyim Bachrach speak of Delmedigo in the highest terms, and praise his piety and his vast erudition.

I. Br.

DELMEDIGO, JUDAH B. ELIJAH: Italian Talmudist; born in Candia; son of the philosopher Elijah Cretensis DELMEDIGO; studied at Padua under Judah Minz; he then returned to his native city, where his reputation as teacher of the Talmud attracted many pupils, among them Samuel Algazi. He was in continual controversy with the aged historiographer and teacher of the Law Elijah CAPSALI, who also had a school at Candia, both of the adversaries succeeding in rousing the interest of their most eminent contemporaries. Traces of the many differences of opinion that separated these two men and led to bitter disputes between them may be found in the responsa of the foremost authorities of this time. The liturgical poet Moses Alashkar, Elijah ben Benjamin HALEVI, Meir KATZENELLENBOGEN of Padua, and DAVID IBN ABI ZIMRA make mention of these two scholars, who had laid disputes before them. Joseph Solomon Delmedigo was a great-grandson of Judah.

DELUKTAS, SAMUEL BEN MOSES. See DLUGOSZ, SAMUEL BEN MOSES.

DELVAILLE, ALBERT: French dramatic author; born at Neuilly-sur-Seine May 30, 1870. He studied at the Ecole Monge (afterward the Ecole Carnot), and then joined his father, who was a dealer in colonial wares. He soon, however, turned to writing dramas, under the pseudonym "Trebla." Among his plays, some of which are collaborations, are the following: "Par-çi, par-là," "L'Indécolable," "La Confession Naïve," "Le Harem de Pontarlier" (1896); "Vive la Femme," "A Nous la Chanson," "Voyez Terrasse" (1897); "Chez la Couturière," "Le Pierrot Bleu," "Elle" (1898); "Personne," "Vénus Cantonnière," "Pierrot aux Manœuvres," a ballet (1899); "Napolégon," "Nostalgie" (1901). The latter play was prohibited by the authorities. He also published, in 1898, a collection of dialogues entitled "L'Amour en Fantaisies." He has contributed to "La Plume," "Le Grelot," "Le Courrier National," "Fin de Siècle," "Gil Blas," and other periodicals.

Chofnajim," Berlin, 1840), with a German translation, one of Delmedigo's letters to Zerah ben Nathan.

Despite Delmedigo's scientific attainments, he is to be blamed for deriding the Cabala in private and defending it in public, even if Michael's supposition be correct that the letter addressed to Zerah contains interpolations by Karaites, among whom it was found. Evidently ashamed of his

His Insincerity. "Mazref le-Hokmah," he asserted that it was written at the request of an influential personage in Hamburg who wished to defend philosophy, and that an author is not bound to state his private belief in such cases. His lack of sincerity is also seen in some evidently false statements; for instance, regarding the miracles worked by Nahmanides and

DEMAI (דמאי, "doubtful"; something which may still contain the elements of דמיון, "things holy"): 1. Agricultural produce, the owner of which was not trusted with regard to the correct separation of the tithes. The tribe of Levi, having been excluded from participating in the division of the land, obtained as compensation a share in its produce (Num. xviii. 24). As the tribe included two elements, priests and Levites, the compensation was given in two forms: "terumah" (heave-offering) and "ma'aser" (tithe) for the Levites; and the latter gave the tenth part of the tithe to the priests as "terumat ma'aser" (heave-offering; *ib.* 26). In addition, a second tithe had to be separated from the produce in the first, second, fourth, and fifth years of the year-week. This tithe had to be taken to Jerusalem and consumed there, in accordance with certain regulations; while in the third and sixth years it was given to the poor. In the former case it was called "ma'aser sheni" (second tithe); in the latter "ma'aser 'ani" (the tithe for the poor). The produce of the seventh year was free from all these dues.

The heave-offerings, both terumah and terumat ma'aser, could not be eaten by non-priests; the second tithe, unless redeemed with "silver," which was to be spent on food in Jerusalem, could not be eaten outside that city; while the first tithe

Terumah and the tithe for the poor were not subject to any restrictions. Conscientious Jews would not partake of the produce of the land unless they had first satisfied themselves that the heave-offering and tithes had been duly separated. The owners of land in Palestine were divided into three classes: (1) non-Jews, to whom the Jewish laws about tithes did not apply; (2) the trustworthy Jews ("ne'emanim" or "haberim"), who were sure to separate from the produce all that was due according to the Law; and (3) the 'AM HA-AREZ, who was suspected of neglecting these laws. Produce bought of any person of the first class was considered as unprepared—*i. e.*, as produce from which heave-offering and tithes had not been separated; that bought of the second class was "metukkan" (prepared); and that bought of the third class was "demai" (doubtful, or suspected).

The conscientious never partook of demai without first separating the tithes due thereon. It was not necessary, however, to separate all the dues enumerated above, as no one was suspected with regard to the heave-offering, for two reasons: first, it was not burdensome, as the minimum quantity satisfied the Law (Hul. 137b); and, secondly, the offense of neglecting it was considered very serious (Sanh. 88a). It was therefore only necessary to mark out the first tithe and the second. Of the former, one-tenth was separated as "the heave-offering of the tithe," and the remaining nine-tenths were re-

Ma'aser tained by the owner, as the Levite was unable to prove his claim. The second tithe could be redeemed without

the addition of one-fifth of its value (Lev. xxvii. 31). These regulations concerning demai are ascribed to Johanan, the high priest (John Hyrcanus, son of Simeon), who inquired into the matter and discovered the fact that most people only separated the heave-offering and neglected the tithes (Soṭah 48).

2. The third treatise of the first section of the Mishnah, containing the regulations relating to demai. They concern chiefly the haberim, an association of trusted persons who rigidly observed the laws of terumah and ma'aser, and acted on the presumption that a haber would not permit anything to pass out of his hands which was not ritually qualified for immediate eating ('Ab. Zarah 41a). Without attempting to give a definition of "demai," the meaning of which is assumed to be well understood, the author of the Mishnah at once proceeds to discuss the laws of demai in seven chapters, whose contents may be summarized as follows:

I. Cases in which the law of demai is not rigidly applied; *e. g.*, fruit or vegetables which are found as "hefker" (unclaimed property), hefker being exempt from ma'aser.

II. Produce of Palestine, even when bought outside Palestine, is demai if bought of an 'am ha-arez. The conditions of a haber involve certain restrictions, which are reduced or removed in favor of a haber baker or shopkeeper.

III. A haber must not cause others to partake of demai.

IV. The 'am ha-arez is exceptionally trusted with regard to ma'aser on Sabbath and concerning holy things—*e. g.*, "hallah" sacrifices—because the awe-inspiring character of Sabbath and holy things ("emat shabbat" and "emat ha-kodesh") deters people from uttering falsehood.

V. If demai is bought of several persons, each lot must be tithed separately.

VI. A haber farmer is responsible for the proper tithing of the share of an 'am ha-arez landlord.

VII. Regulations for facilitating the tithing of demai on urgent occasions.

The Tosefta has a few modifications and additions. Dividing ch. ii. into two parts, it has eight chapters instead of the seven of the Mishnah; and the eighth paragraph of the sixth chapter of the Mishnah corresponds to the beginning of the eighth chapter of the Tosefta.

There is no Babylonian Gemara on the treatise "Demai," which found no practical application in Babylon; but the Jerusalem Gemara is very rich

in information concerning the produce of Palestine. There occur many **Demai** and **Metukkan**. names of fruits and vegetables in addition to those mentioned in the Mishnah; names of places in and outside Palestine; and information about the markets. There seem to have been inspectors, who distinguished between that which was metukkan and the demai; there were also appointed officers who watched the sale of articles of food and kept the prices low.

A few haggadic passages are interspersed. Thus, the conscientiousness of R. Phinehas, son of Jair, with regard to the laws of tithes is fully described; and with it other acts of piety by the same rabbi are related. Among the latter is the following: Two poor men left with R. Phinehas two seah of barley. He sowed the barley and gathered in the harvest. After a time the men came back and asked for their barley, when they found that through the action of the rabbi the two seah had increased to several camel-loads.

Noteworthy is the fact that a haber on being appointed tax-gatherer lost his status as haber.

M. F.

DEMANDS: In law the rights which a person has to recover money or things of value from others, whether by contract or for wrongs sustained. In the Bible נִשָּׂא is applied to the debit as well as to the credit. The Mishnah, when speaking of demands as a kind of property, generally names שְׂטָרוֹת ("bonds") as being the most valuable; and a single demand is often called מְלוּחַ ("a loan").

The incidents of demands are these: (1) Can they be transferred? If so, how and with what effect? (2) To whom do they pass at the owner's death? Do they survive him? (3) Do they survive against the debtor's or wrong-doer's heirs? (4) How are they extinguished without satisfaction?

1. The first question is answered under **ALIENATION**. It may be added that though the sages have found means to bring about the transfer of contractual demands, the Talmud nowhere alludes to the assignment of claims arising from torts to either person or property. Where the demand savors of tort, an attorney to bring suit ("mursheh") could not be appointed, even in later times, when

Trans- the leave to appoint attorneys had
ference of been extended; for the letter of attor-
Demand. ney took the form of a partial assign-
ment. The claim for an admitted de-
posit could be assigned, the thing deposited itself
being assigned (B. K. 70a; "Yad," Sheluhin, iii. 6,
7; Shulhan 'Aruk, Hoshen Mishpat, 123, 1).

2. At the owner's death his estate, both landed and movable, together with his demands, goes to his heirs; and they may sue for and collect all demands. The debtor, or person bound by a wrongful act, must pay them. This applies to the value of goods taken by force or embezzlement, and to the one-fifth in addition due under some circumstances by way of atonement (B. K. ix. 5), and to the double or greater compensation due by the thief or faithless depositary ("Yad," Genebah, ii. 6). Likewise the party who has made himself liable for injury to property must, if the owner die before recovery of damages, pay his heirs, as the injured person is considered in the light of a creditor ("Yad," Nizke Mamon, viii. 11).

3. It has been shown under the head of **DEBTS OF DECEDENTS** how far the assets left by a debtor are subjected to his obligations. It is shown under **ROBBERY** how such assets are liable for the value of goods taken by force. They would in like manner be bound for the single value of goods stolen; also

for all damages to property, whether done wilfully or by negligence (*ib.* viii. 11, 12). Neither Talmud nor **On Estate of a Deceased Person.** either of the codes mentions the liability of heirs for injuries to the person committed by their ancestor; but it may be inferred, from the enumeration of the differences between injuries to property and injuries to the person (B. K. viii. 7; "Yad," Hovel, v. 9, 11), in

which there is no mention of injuries arising from the death of the wrong-doer, that here also the heirs are bound to the extent of assets left.

As shown under **DEBTS OF DECEDENTS**, the procedure against the heirs is clogged with many hindrances; but, in theory, it seems that all demands survive against the heirs of the party under obligation.

4. A demand can not be extinguished by mere lapse of time. There is no statute of limitations, except the Scriptural law of the year of release, which was never in force outside the Holy Land, and even there was practically abrogated in the days of Hillel. The **HAZAKAH** is nothing but a presumption arising from lapse of time, always subject to rebuttal. Any demand may, however, be extinguished by a voluntary release (**מְחִילָה**); and, as a rule, this act does not need a formal transfer of title (**קִנְיָן**), though in many places it was customary to clothe it in such forms ("Yad," Mekirah, v. 11, 12). Compare **ROBBERY**.

The liability of the heirs for personal damages—or the survival of such demands against the tortfeasor's heirs—was hardly ever a practical question; because the liability of the heirs for anything but the bond debts (what the common law calls "specialty debts") of the ancestor was established only a short time before the Jewish courts, for lack of ordained judges, lost their jurisdiction in actions for personal injury. See **DEBTS OF DECEDENTS**, *sub fine*.

L. G.

L. N. D.

DEMBITZ, LEWIS NAPHTALI: American lawyer, scholar, and author; born Feb. 3, 1833, at Zirke, in the province of Posen, Prussia; educated at the gymnasia of Frankfort-on-the-Oder, Sagan, and Glogau, in Prussia, and attended the law course for one semester in Prague. He then studied American law in offices at Cincinnati, Ohio, and Madison, Ind. After doing journalistic work for a time, he began in 1853 the practise of law at the bar of Kentucky, in Louisville, which practise he has continued uninterruptedly ever since. Dembitz was a delegate to the National Republican Convention of 1860, assistant city attorney of Louisville, 1884–88, and is (1901) a commissioner for Kentucky to the Conference for the Uniformity of State Laws.

In 1888 Dembitz drafted the first Australian ballot law ever adopted in the United States, to govern elections in Louisville. His legal works include: "Kentucky Jurisprudence," 1890; "Law Language for Shorthand Writers," 1892; and "Land Titles in the United States," 2 vols., 1895. He is the author of "The Question of Silver Coinage," in the "Present Problem Series," 1896, No. 1; and has written a number of book-reviews for "The Nation," 1888–97, besides articles in other magazines and in newspapers.

Dembitz was strongly attached to conservative Judaism. He was one of the early members of the executive board of the Union of American Hebrew Congregations, and in 1878 a member of the commission on the plan of study for the Hebrew Union College. In 1898 he acted as chairman at a convention of Orthodox congregations, and was elected a vice-president of the Orthodox Jewish Congregational Union of America. In addition to memoirs,

articles, and addresses which have appeared in Jewish papers, he published "Jewish Services in Synagogue and Home," 1898; "The Lost Tribes," in the "Andover Review," Aug., 1889; and revised Exodus and Leviticus for the new translation of the Bible to be issued by the Jewish Publication Society of America. He died March 11, 1907. A.

DEMBITZER, HAYYIM NATHAN: Galician rabbi and historian; born in Cracow June 29, 1820; died there Nov. 20, 1892. His father, Jekuthiel Solomon, a scholarly merchant who claimed he was a descendant of R. Moses Isserles, died in 1833, aged forty-one. While diligently occupied with his Talmudical studies, he came across the "Zemah Dawid," a chronological work by David Gans, which aroused his interest in Jewish biography and history. He received his ordination as rabbi from Solomon Kluger, Hirsch Chajes, and Berish Meisels, the last-named of whom was rabbi of Cracow until 1854. Dembitzer sided nevertheless with Meisel's rival, Saul Landau, in the quarrel about the rabbinate of Cracow. In 1856 Dembitzer became a dayyan in his native city, and was, like his older brother Jacob, advanced to the position of rosh bet din, which he held till his death. In 1874 he visited Germany and made the acquaintance of Zunz and other Jewish scholars, with whom he corresponded on historical subjects.

Dembitzer's earlier works were all on halakic subjects, on which he was a recognized authority. His "Maginne Erez Yisrael" (responsa, Lemberg, 1852); "Dibre Hen," which appeared as a supplement to Solomon Kluger's "Abodat ha-Kodesh" (Zolkiev, 1863); and "Liwyat Hen" (Cracow, 1882) belong to that class. But the last-named, a critical commentary on the work "RABYH" of ELIEZER B. JOEL HA-LEVI, which Dembitzer published from a manuscript, contains much valuable material for the history of the Tosafists, which is interspersed among the pilpulistic arguments of the main subject. His chief historical work, "Kelilat Yofi," of which the first part, containing biographies of the rabbis of Lemberg and of other Polish communities, appeared in 1888, and the second part, also biographical and historical, in 1893 (Cracow), is an important contribution to the science of Judaism. He is also the author of "Miktebe Bikoret," a valuable correspondence with the historian Grätz about the Council of Four Lands ("Ozar ha-Sifrut," iv. 193-243; also published separately, Cracow, 1892), and of a biography of the Tosafist Joseph Porat, which appeared posthumously in "Ha-Hoker," ii. 48-59. The "Mappelet 'Ir ha-Zedek" (1878), a severe and vindictive criticism of J. M. Zunz's "'Ir ha-Zedek" on the rabbis of Cracow, was likewise written by him, although the name of Joel Dembitzer, his younger brother, appears on the title-page as the nominal author.

P. Wt.

DEMBO, ISAAC: Russian physician; born at Poneviesh, government of Kovno, in 1846. Dembo studied Hebrew and rabbinical literature under the

direction of Samuel Salant and other Talmudic authorities until the age of fourteen, when he devoted himself to secular studies, and in 1870 graduated as M.D. from the University of St. Petersburg. He served as physician in several hospitals, and in 1877, on the outbreak of the Russo-Turkish war, enlisted in the medical department of the army. He was awarded a medal for his services. In 1881-82 he traveled in Germany and France, and on his return to St. Petersburg was appointed physician to the Alexandrowski Hospital. In 1888 the government bestowed upon him the title of "privy counselor."

Dembo turned his attention to the scientific study of the slaughtering of animals according to the Jewish rite. In Switzerland and in Germany attempts had been made to secure the prohibition of the Jewish method, on the plea that it caused the animals unnecessary pain. After investigating the matter and studying all the current methods of slaughtering in Russia and abroad, Dembo arrived at the conclusion that the Jewish method caused less pain than any other. He communicated his results to the leading scientists (who agreed with him on the matter) and to the governments interested. Dembo published two works on this subject; namely, "Anatomisch-Physiologische Grundlagen der Verschiedenen Methoden des Viehschlachtens," Leipsic, 1894; and "Das Schlachten im Vergleich mit Anderen Schlachtmethoden vom Standpunkte der Humanität und Hygiene," *ib.* 1894. The latter work was translated into Hebrew under the title "Ha-Shehitah weha-Bedikah," Warsaw, 1896. He died May 23, 1906.

DEMBOWSKI, NICOLAS. See BARUCH YAVAN; FRANKISTS; KAMENETZ-PODOLSK.

DEMETRIUS: Son-in-law of King Agrippa I. When Mariamne II., daughter of Agrippa I. and sister of Agrippa II., had put away Archelaus, the son of Chelcias, she married Demetrius, who was by birth and wealth among the foremost Jews of Alexandria, and held the office of alabarch about the year 49 C.E. By him Mariamne had a son, Agrippinus. The assumption that Demetrius was the son of Alexander, and hence the brother of the apostate Tiberius Alexander, is unfounded, and is not supported by Josephus. He probably belonged to the priestly family of Onias.

BIBLIOGRAPHY: Josephus, *Ant.* xix. 9, § 1; xx. 7, § 3; Brüll, in Geiger, *Jüdische Zeitschrift*, iii. 279; Grätz, *Monatsschrift*, 1876, 217; Schürer, iii. 88.

E. N.

DEMETRIUS: Chronicler; supposed to have lived at Alexandria in the third century B.C. In a work entitled *Περί 'Ιουδαίων* ("About Jews"), containing extracts from foreign authors, Alexander Polyhistor (80-40 B.C.) quotes fragments of Demetrius' chronicles; and these were inserted by Eusebius in his "Præparatio Evangelica" (ix. 17-39).

The first excerpt deals with the history of Jacob from the time of his emigration to Mesopotamia till his death. Demetrius endeavors to establish the Biblical chronology and gives the date of every incident in Jacob's life, even fixing the year and month in which each of Jacob's children was born. The ex-

cerpt concludes with the genealogy of Levi back to the birth of Aaron and Moses.

The second fragment is an extract from the history of Moses, laying stress on the genealogy of Jethro in order to demonstrate that Zipporah, the wife of Moses, was a descendant of Abraham and Keturah.

The third excerpt gives an account of the sweetening of the water of Marah (Ex. xv. 23).

Another fragment was preserved by Clemens Alexandrinus ("Stromata," i. 21, 141), who gives the title of Demetrius' chronicles as *Περὶ τῶν ἐν τῇ Ἰουδαίᾳ Βασιλευν*. This fragment endeavors to determine exactly the period of the exile of the Ten Tribes, and that of the tribes of Judah and Benjamin till Ptolemy IV. (222-205 B.C.), in whose reign the chronicler evidently lived.

From the orthography of proper names, and from various expressions used, it is evident that Demetrius used the Septuagint, not the Hebrew Bible. For the determination of certain dates he relied on the Biblical exegesis in use among the Palestinian Jews. Josephus used Demetrius' chronicles for his "Antiquities," and adopted his chronological system.

I. BR.

DEMETRIUS I. SOTER: King of Syria 162-150 B.C.; son of Seleucus IV. Philopator. He was sent by his father as a hostage to Rome in place of Antiochus Epiphanes, after whose death he demanded in vain of the Senate that he be acknowledged as his father's successor. Later he again demanded the throne; and, being met with a refusal, he fled with the aid of Polybius to Tripoli, where he was given a cordial reception. He soon obtained possession of Antioch, but could not win the sympathies of the Romans. On the contrary, the Roman Senate permitted the satrap Timarchus to assume the kingly title. Timarchus succeeded, with the aid of Artaxias of Armenia, in conquering the whole of Babylonia, ruling it in a cruel manner. At length he was defeated by Demetrius, whom the Babylonians on that account called "Soter" (Redeemer).

In 162 Demetrius appointed Alcimus high priest of the Jews, and, after the expulsion of the latter, endeavored to have him reinstated; but Nicanor, the general sent for this purpose, was killed in battle (161). Another of Demetrius' generals, Bacchides, succeeded in vanquishing Judas Maccabeus in 160; Jonathan, however, was able to stand his ground, and in 157 he made peace with Bacchides, although he was compelled to tolerate Syrian garrisons in Jerusalem and other places.

Owing to his pride and severity, Demetrius was much hated by the Syrians. He was greatly addicted to drink, and Josephus reproaches him with frivolity and laziness. In 153 Alexander Balas, recognized and supported by the Senate, and aided by Attalus II. and Ptolemy Philometor, appeared with an army in Syria, and captured Ptolemais through treason. Demetrius' own men deserted him; and the Jews, too, whom Alexander Balas had won over with

IV.—33

large presents, withdrew their allegiance. Demetrius was compelled to withdraw the troops from the Jewish localities, with the exception of Jerusalem and Beth-Zur, and to concentrate his forces against Balas. In the decisive battle Demetrius fell.

DEMETRIUS II. NICATOR: King of Syria; son of Demetrius Soter. He was sent to Rome by his father as hostage for his fidelity. It was intended that he should work there against Alexander Balas, whose cause was promoted by Heraclides. He could achieve nothing, however. After the death of his father he set out in 147 with an army of mercenaries against Balas, who fled to Antioch. He was aided in this by Appolonius, the governor of Cœle-Syria, against whom, however, the high priest Jonathan made successful war. In the decisive battle at Antiochia on the Ainoparus (146), Alexander Balas was defeated by Demetrius and his own father-in-law, Ptolemy Philometor, who had become reconciled with Demetrius. Balas was killed during his flight, and Ptolemy Philometor died of a wound received in the battle. Demetrius now assumed the surname "Nicator." He confirmed the high priest Jonathan, on the payment of a tribute of 300 talents, in his dignity, and in the possession of the three districts of Lydda, Ephraim, and Ramatnaim, which had been severed from Samaria. Nor had he cause to regret the act; for when the disbanded native soldiers rose in revolt against Demetrius, Jonathan sent to his aid an army of 3,000 Jews. With this army and his own mercenaries, Demetrius suppressed the dangerous uprising.

Demetrius, however, did not fulfil his promise to withdraw the Syrian garrisons from the fortresses in Judea; on the contrary, he demanded of Jonathan the payment of all the tributes which had been due to his predecessors, but which had not been paid. Under these circumstances, the uprising which was kindled by Diodotus on behalf of the young son of Alexander Balas, Antiochus VI. Dionysus, and which was provoked by the barbarities of Demetrius, came very opportunely. Demetrius was defeated; but found refuge in Seleucia, which remained faithful to him at all times. In the mean time Jonathan stood his ground against the generals of Demetrius, and in conjunction with Simon conquered southern Syria. After the murder of Jonathan, in which Diodotus shared, the fortunes of Demetrius improved. The Jews deserted Diodotus, who had forfeited their sympathies not only by this murder, but also because he had removed Antiochus VI. and had usurped the throne under the name of "Tryphon." Demetrius recognized Simon as high priest and ethnarch.

Soon afterward Demetrius commenced a war against the Parthians, but after several victories was finally defeated and taken prisoner by a Parthian general of Mithridates I. (140). He was released only after his younger brother, Antiochus Sidetes, fought a successful battle against the Parthian.

Upon the death of Antiochus, Demetrius again became ruler; and he had begun planning a fresh subjugation of the Jews, when he decided to make war on Ptolemy Euergetes II. of Egypt. He marched as far as Pelusium, but turned back, because, being without confidence in his army, he did not dare to engage in battle. In revenge Ptolemy set up Alexander Zabina against Demetrius (128), and several Syrian cities thereupon freed themselves from Demetrius' control. In 125 he was defeated near Damascus, and was killed at the instigation of his first wife, Cleopatra, who hated him because, during his Parthian captivity, he had married a daughter of the Parthian king.

DEMETRIUS III. EUCERUS: King of Syria; son of Antiochus Grypus. He was pretender to the throne of Antiochus X., whom he supplanted in 95 B.C. after a severe struggle. He divided the authority with his brother Philip, keeping to himself apparently Cœle-Syria. In the year 88 the Jews appealed to him for aid against their king, Alexander Jannæus, who was subsequently defeated. But thousands of Jews renewed their allegiance to their defeated king, probably out of a well-founded apprehension that Demetrius would again subject them to the Syrian rule. Demetrius was taken prisoner in a battle against his brother Philip, and died in captivity.

G. H. BL.

DEMIDOV, PAVEL PAVLOVICH: Prince of San-Donato, Russian jurist, and philanthropist; born in 1839; died in 1885. He was a member of a well-known Russian family of nobles whose pedigree is traced as far back as 1672. Soon after his graduation from the faculty of jurisprudence of the University of St. Petersburg, he was attached to the Russian embassy at Paris, and later to the embassy at Vienna. From 1871 to 1876 he served as mayor of Kiev.

During the Russo-Turkish war (1877-78) Demidov chose to follow the army as the authorized agent of the Society of the Red Cross, rather than to be a leader of soldiers with more warlike purposes. Of a peaceful and peace-loving disposition, and with a pronounced predilection for literary work, he cared for achievements foreign to those of the ambitious belligerents, and his name is accordingly associated with deeds of philanthropy. Through these years he remained unknown beyond the narrow circle of family, relatives, and personal acquaintances. In 1883, two years before his untimely death, he came suddenly into prominence by the publication of his work, "The Jewish Question in Russia," which was well received. In addition to a very sympathetic though somewhat cursory review of the history of the Jews in Russia, beginning with the first division

of Poland, it contains an able analysis of the political and social status of the Jew and of his economic condition and statutory rights, or, more precisely, absence of rights. This analysis proved not only that the author was sufficiently broad-minded and large-hearted to free himself of all popular prejudices, but that he had both the will and the ability to dig deep, reaching here and there the very roots of this social evil. Demidov's solution of the vexed question may be expressed in the demand of equal rights for the Jews and the reorganization and increase of their educational facilities. The abolition of the "Pale of Settlement," the right to live and do as it is accorded to all other Russian subjects, the right to attend any public school upon the same basis as the Christian population, and other privileges, are demanded by the author on the ground of the central idea which he so ably maintains; namely, that the Jew is a desirable and able citizen, all claims to the contrary notwithstanding. He asserts that the peculiarly Jewish exploitation is a fiction; that the exclusiveness of the Jew is as hateful to the Jew himself as is any form of bondage to man; that his commercial ability is useful to the buyer in the Pale of Settlement, as it reduces by sharp competition the profit of the seller, thus on the whole benefiting the public; and, finally, that the much-bewailed baneful influence exerted by the Jew on the Christian poor by his selling intoxicants to the latter, has been exaggerated out of all proportion, as is demonstrated by an array of facts and statistics bearing upon the question and establishing that, beyond all possible doubt, the curse of intemperance is felt considerably more outside the Pale than within it.

DEMONIACS IN BIBLE AND TALMUD.

See EXORCISM.

DEMONOLOGY.—Biblical and Post-Biblical Data: Systematic knowledge concerning demons or evil spirits. Demons (Greek, *δαίμονες* or *δαμόνια*; Hebrew, *שְׁרִימ* [Deut. xxxii. 17; Ps. cvi. 37] and *שְׁעִירִים* [Lev. xvii. 7; II Chron. xi. 15; A. V. "devils"; Luther, "Feldgeister" and "Feldteufel"]; Aramaic, or rabbinical, *מַחֲשֵׁי* and *רוּחַן* (*כִּישֵׁן*), as spirits animating all elements of life and inhabiting all parts of the world, have their place in the primitive belief of all tribes and races. When certain deities rose to be the objects of regular worship and became the rulers of the powers of life, demons, or spirits, were subordinated to them. But inasmuch as they were still feared and occasionally worshiped by the populace, they became the objects of popular superstition. Jewish demonology can at no time be viewed as the outcome of an antecedent Hebrew belief. While the nomadic Hebrews had much in common with the Arabian Bedouins in their belief in spirits (see Wellhausen, "Reste Arabischen Heidenthums: Skizzen und Vorarbeiten," 1887, iii. 135 *et seq.*; Smith, "Rel. of Sem." 1889, pp. 112-125, 422 *et seq.*), Canaanite practise and belief were greatly influenced by ancient Chaldea, whose demonology

is in the main pre-Semitic (see Lenormant, "Chaldean Magic," 1877, pp. 23-38; German transl., 1878, pp. 22-41; Jastrow, "Religion of Babylonia and Assyria," pp. 260 *et seq.*; Zimmern, in Schrader's "K. A. T." 1902, ii. 458-464). In Babylonia the Jews came under the influence of both the Chaldean and the Persian belief in good and in evil spirits, and this dualistic system became a dominant factor of Jewish demonology and ANGELOLOGY. In Europe, Teutonic, Celtic, and Slavonic demonology in the form of superstition permeated Jewish practise and belief. See SUPERSTITION.

The demons mentioned in the Bible are of two classes, the "se'irim" and the "shedim." The se'irim ("hairy beings"), to which the Israelites sacrificed in the open fields (Lev. xvii. 7; A. V. "devils"; R. V., incorrectly, "he-goats"), are satyr-like demons, described as dancing in the wilderness (Isa. xiii. 21, xxxiv. 14; compare Maimonides, "Moreh," iii. 46; Vergil's "Eclogues," v. 73, "saltantessatyri"), and are identical with the jinn of the Arabian woods and deserts (see Wellhausen, *l.c.*, and Smith, *l.c.*). To the same class belongs AZAZEL, the goat-like demon of the wilderness (Lev. xvi. 10 *et seq.*), probably the chief of the se'irim, and LILITH (Isa. xxxiv. 14). Possibly "the roes and hinds of the field," by which Shulamit

conjures the daughters of Jerusalem to bring her back to her lover (Cant. ii. 7, iii. 5), are faun-like spirits similar to the se'irim, though of a harmless nature. The **demons in the Bible.** אבני השרה (Job v. 23, A. V. "stones of the field"), with which the righteous are said to be in league—obviously identical with, if not a corruption of, the ארני השרה (Mishnah Kil. viii. 5), explained in Yer. Kil. 31c as נשור, "a fabulous mountain-man drawing nourishment from the ground" (see Jastrow, "Dict.," and Levy, "Neuhebr. Wörterb." s.v. ארני)—seem to be field-demons of the same nature. The wilderness as the home of demons was regarded as the place whence such diseases as leprosy issued, and in cases of leprosy one of the birds set apart to be offered as an expiatory sacrifice was released that it might carry the disease back to the desert (Lev. xiv. 7, 52; compare a similar rite in Sayce, "Hibbert Lectures," 1887, p. 461, and "Zeit. für Assy." 1902, p. 149).

The Israelites also offered sacrifices to the shedim

(Deut. xxxii. 17; Ps. cvi. 37). The name שֵׁד (believed by Hoffmann, "Hiob," 1891, to occur in Job v. 21), for a long time erroneously connected with "the Almighty" (שֵׁדִי), denotes a storm-demon (from שֹׁד, Isa. xiii. 6; A. V. "destruction"; compare Ps. xci. 6, שֹׁד, "that stormeth about"; A. V. "that wasteth"). In Chaldean mythology the seven evil deities were known as "shedim," storm-demons, represented in ox-like form; and because these ox-colossi representing evil demons were, by a peculiar law of contrast, used also as protective genii of royal palaces and the like, the name "shed" assumed also the meaning of a propitious genius in Babylonian magic literature (see Delitzsch, "Assyrisches Handwörterb." pp. 60, 253, 261, 646; Jensen, "Assyr.-Babyl. Mythen und Epen," 1900, p. 453; Sayce, *l.c.* pp. 441, 450, 463; Lenormant, *l.c.* pp. 48-51). It was from Chaldea that the name "shedim" = evil demons

came to the Israelites, and so the sacred writers intentionally applied the word in a dyslogistic sense to the Canaanite deities in the two passages quoted. But they also spoke of "the destroyer" (הַמְשַׁחֵת) Ex. xii. 23) as a demon whose malignant effect upon the houses of the Israelites was to be ward off by the blood of the paschal sacrifice sprinkled upon the lintel and the door-post (a corresponding pagan talisman

The Nether World in the Clutches of a Demon.
(From an Assyrian bronze tablet in the collection of M. de Clercq.)

is mentioned in Isa. lvii. 8; In II Sam. xxiv. 16 and II Chron. xxi. 15 the pestilence-dealing demon is called מַלְאֲךְ הַמְשַׁחֵת = "the destroying angel" (compare "the angel of the Lord" in II Kings xix. 35; Isa. xxxvii. 36), because, although they are demons, these "evil messengers" (Ps. lxxviii. 49; A. V. "evil angels") do only the bidding of God, their Master; they are the agents of His divine wrath.

But there are many indications that popular Hebrew mythology ascribed to the demons a certain independence, a malevolent character of their own, because they are believed to come forth, not from the heavenly abode of יְהוָה, but from the nether world (compare Isa. xxxviii. 11 with Job xiv. 13; Ps. xvi. 10, xlix. 16, cxxxix. 8). "The first-born of Death who devours the members of his [man's] body" and causes him to be brought "to the king of terrors" (Job xviii. 13, 14, Hebr.), is undoubtedly one of the terrible hawk-like demons portrayed in the Babylonian Hades-picture (see illustra-

tion above, and Roscher, "Lexikon der Griechischen und Römischen Mythologie," s. v. "Nergal"), and the "messengers of death" (Prov. xvi. 14) are identical with the "servants of Nergal," the King of Hades and god of pestilence and fever in Chaldean mythology (see Jeremias, "Die Babylonisch-Assyrischen Vorstellungen vom Leben nach dem Tode," 1887, pp. 71 *et seq.*; Zimmern, *l.c.* pp. 412 *et seq.*; Jensen, *l.c.* pp. 478, 557).

'Alukah (Prov. xxx. 15; A. V. "horseleech"), the bloodsucker or vampire, whose two daughters cry "Give! Give!" is none other than the flesh-devouring ghoul of the Arabs, called by them "aluk" (Wellhausen, *l.c.* pp. 135-137). She has been rendered in Jewish mythology the demon of the nether world (= נִיְהִנָּם; see 'Ab. Zarah 17a), and the names of her two daughters have in all probability, as familiar names of dreaded diseases, been dropped (compare Ewald, Delitzsch, and Wilderboer's commentaries, *ad loc.*, and the description of the demon "Labartu" in "Zeit. für Assyriol." 1902, pp. 148 *et seq.*). Deber ("pestilence"), originally the death-dealing sting of the midsummer sun-god Nergal (see Roscher, *l.c.* iii. 257), and Keṭeb

Other Demons. ("smiter"), the deadly hot wind (Deut. xxxii. 24; Isa. xxviii. 2; A. V. "destruction," "destroying"), are demons,

the one walking in darkness, the other storming along in midday (A. V. "that wasteth at noonday"), against which God's protection is invoked in the incantatory psalm "Shir shel Pega'im," ascribed to Moses by the Rabbis (Ps. xci. 5, 6; compare Midr. Teh. *ad loc.*; Tan., Naso, ed. Buber, 39; Num. R. xii.). Possibly the evil spirit that troubled Saul (I Sam. xvi. 14 *et seq.*) was originally a demon (compare Josephus, "Ant." vi. 8, § 2), turned into an evil spirit coming from יְהוָה in the amended Masoretic text (see Smith, Commentary, *ad loc.*). None of these demons, however, has actually a place in the system of Biblical theology; it is the Lord who sends pestilence and death (Ex. ix. 3, xii. 29); Deber and Reshef ("the fiery bolt") are His heralds (Hab. iii. 5). The shedim are "not-gods" (Deut. xxxii. 17); there is no supernatural power beyond יְהוָה (Deut. iv. 35; compare Sanh. 67b). It is possible, however, that, as at a later stage in the development of Judaism the idols were regarded as demons, so the Canaanite deities were, either in disparagement, or as powers seducing men to idolatry, called "shedim" by the sacred writers (Deut. xxxii. 17; Ps. cv. 37); all the more so as the latter ascribed a certain reality to the idols (Ex. xii. 12; Isa. xix. 1, xxiv. 21; see Baudissin, "Studien zur Semitischen Religionsgesch." 1876, i. 130).

—**In Rabbinical Literature:** It was the primitive demonology of Babylonia which peopled the world of the Jews with beings of a semi-celestial and semi-infernal nature. Only afterward did the division of the world between Ahriman and Ormuzd in the Mazdean system give rise to the Jewish division of life between the kingdom of heaven and the kingdom of evil. Rabbinical demonology has, like the Chaldean, three classes of demons, though they are scarcely separable one from another. There were the "shedim," the "mazziḳim" (harmers), and the "ruḥin" or "ruḥot ra'ot" (evil spirits). Besides these

there were "lilin" (night spirits), "ṭelane" (shade, or evening, spirits), "ṭiharire" (midday spirits), and "zafrire" (morning spirits), as well as the "demons that bring famine" and "such as cause storm and earthquake" (Targ. Yer. to Deut. xxxii. 24 and Num. vi. 24; Targ. to Cant. iii. 8, iv. 6; Eccl. ii. 5; Ps. xci. 5, 6; compare Ps. lxx. and Is. xxxiv. 14). Occasionally they are called "mal'ake habbalah" (angels of destruction) (Ber. 51a; Ket. 104a; Sanh. 106b). "They surround man on all sides as the earth does the roots of the vine"; "a thousand are on his left, and ten thousand on his right side" (compare Ps. xci. 7); if a man could see them he would lack the strength to face them, though he can see them by casting the ashes of the fetus of a black cat about his eyes, or by sprinkling ashes around his bed he can trace their cock-like footprints in the morning (Ber. 6a). They hover around the house and the

field (Gen. R. xx.), particularly in the lower regions of the air (Num. R. xii.; Tan., Mishpatim, ed. Vienna, 99a; compare Diogenes Laertius, viii. 32, ix. 7). Their main abode is in the northern part of the earth (Pirke R. El. iii., after Jer. i. 14). Their sporting-places are caper-bushes and spearworts, where they dwell in groups of sixty; nut-trees, where they form in groups of nine; shady spots on moonlight nights, especially the roofs of houses, under gutters, or near ruins; cemeteries and privies (there is a special demon of the privy, "shed shel bet ha-kisse"); water, oil, and bread-crumbs cast on the ground; and they harm persons and things coming near them (Pes. 3b; Ber. 3a, 62b; Shab. 67a; Giṭ. 70a; Ḥul. 105; Sanh. 65b).

R. Johanan knew of 300 kinds of shedim living near the town of Shilḥin (Giṭ. 68a). It is dangerous to walk between two palm-trees (Pes. 111a). Demons are particularly hurtful at night. It is unsafe to salute a person in the dark, for he might be a demon (Meg. 3a); to sleep alone in a house, as Lilith may seize one (Shab. 151b); to walk alone in the night or in the morning before cockcrow (Ber. 43a; Yoma 21a; compare Cock); to take water from one whose hands have not been washed in the morning (Ber. 51a). Especially dangerous are the eves of Wednesday and of the Sabbath, for then Agrat bat Maḥlat, "the dancing roof-demon" (Yalkut Ḥadash, Keshafim, 56), haunts the air with her train of eighteen myriads of messengers of destruction, "every one of whom has the power of doing harm" (Pes. 112b). On those nights one should not drink water except out of white vessels and after having recited Ps. xxix. 3-9 (the verses mentioning seven times "the voice of the Lord") or other magic formulas (Pes. 3a). Another perilous season is midsummer noon from the 17th of Tammuz to the 9th of Ab. Then the demon Keṭeb Meriri reigns from ten in the forenoon to three in the afternoon. He has the head of a calf, with one revolving horn in the middle, and an eye on the breast, and his whole body is covered with scales and hair and eyes; and whosoever sees him, man or beast, falls down and expires (Pes. 3b; Lam. R. i. 3; Midr. Teh. to Ps. xci. 3; Num. R. xii.). Demons assume the shape of men, but have no shadow (Yeb. 122a; Giṭ. 66a; Yoma 75a). At

times they are black goat-like beings (שְׂעִירִים; Kid. 72a); at other times, seven-headed dragons (Kid. 29a). "Like angels, they have wings and fly from one end of the world to the other, and know the future; and like men they eat, propagate, and die" (Hag. 16b; Ab. R. N. xxxvii.). They cause the faintness of students and the wear and tear of their dress in the schoolhouses and assemblies of the learned (Ber. 6a). But they are not always malign spirits. As they, by virtue of their semi-celestial nature, can overhear the decrees of heaven, they may be consulted by men as to the future; this can be done by means of oil and eggshells; only on Sabbath is this forbidden (Shab. 101a). Hillel and Johanan ben Zakkai understood their talk just as King Solomon did (Mas. Soferim, xvi. 9; B. B. 134a; Suk. 28a; Git. 68b; Ker. 5b; Pesik., ed. Buber, 45b).

The saint Abba Jose of Zaitor saved his town from harm, when informed by a water-demon living near by that a harmful fellow demon made his dwelling there, by causing the inhabitants to go down to the water's edge at dawn, equipped with iron rods and spits, and beat the intruder to death; blood marked the spot where he was killed (Lev. R. xxiv.). The magicians in Egypt made use of demons to perform their miracles, as all witchcraft is the work of demons (Sanh. 67b; 'Er. 18b; Ex. R. ix.), though demons can not create, but only transform existing things (Sanh. 67b). Egypt was considered the stronghold of such witchcraft as worked by means of demons (Kid. 49b; Shab. 104b; Men. 85a; Tan., Wayera, ed. Buber, 17, 27; Tosef., Shab. xi. 15; compare Friedländer, "Sittengesch. Roms," i. 362, iii. 517). Some of the Babylonian amoraim employed shedim as friendly spirits, and received useful instruction from them, calling them by familiar names, such as "Joseph" or "Jonathan" (Pes. 110a; Hul. 105b; Yeb. 122a; 'Er. 43a; regarding יִנְחָן see Schorr in "He-Ḥaluz," 1865, p. 18). Demons were regarded by antiquity as beings endowed with higher intelligence (see Friedländer, *l.c.* iii. 562). They were said to have been created at the twilight of the Sabbath (Abot v. 9); "after the souls were created the Sabbath set in, and so they remained without bodies" (Gen. R. vii.).

In the main demons were workers of harm. To them were ascribed the various diseases, particularly such as affect the brain and the inner parts (compare Rhode, "Psyche," 1894, p. 358). Hence there was a constant fear of "Shabriri" (lit. "dazzling glare"), the demon of blindness, who rests on uncovered water at night and strikes those with blindness who drink of it (Pes. 112a; 'Ab. Zarah 12b); "ruah zeradah," the spirit of catalepsy, and "ruah zelahta," also "ruah palga," the

Nature of Demons. spirit of headache (megrin or meningitis?), hovering on palm-trees (Pes. 111b; Hul. 105b; Git. 68b); "ben neflim," the demon of epilepsy, and "ruah kezarit," the spirit of nightmare (Bek. 44b; Tosef., Bek. v. 3; Schorr, in "He-Ḥaluz," 1869, p. 15); "ruah tezazit," the spirit of delirious fever and madness, befalling man and beast (Pesik., Parah, 40a; Yer. Yoma viii. 45b; Yoma 83b; Gen. R. xii.; see Aruch and Dictionaries, s.v. רִחוּ; "ruah zara'at," the spirit of leprosy (Ket. 61b); "ruah karde-yakos," the spirit of melancholy (καρδιακός; Git. vii. 1, p. 67b; Yer. Git. 48c); "shibbeta," a female demon, bringing croup to persons, especially children, who leave their hands unwashed in the morning (Hul. 107b; Ta'an. 20b; Yoma 77b), probably identical with the "bush-asp," the Parsee demon "with long hands," who lulls men to sleep and attacks them ("Vendidad," xviii. 38; "Bundahish," xxviii. 26); "bat horin" (daughter of freedom; possibly a play on "hiwar," a euphemistic expression for blindness), a demon bringing a disease of the eye to one who fails to wash his hands after meals (see Brüll's "Jahrb."

i. 157); "kuda," a demon of disease which attacks women in childbirth ('Ab. Zarah 29a); "eshshata," the demon of fever, (*ib.* 28a; Shab. 66b); "ruah zenunim," the spirit of sexual desire (Pes. 111a); "she'iyah," an ox-like demon dwelling in desolate houses (B. K. 21a, after Isa. xxiv. 12); and many others mentioned in Rabbinical lore, only part of which has been preserved in Shab. 66 *et seq.*, 109 *et seq.*; Pes. 109-113; Git. 68-70; Sanh. 67 *et seq.*; see Brüll, *l.c.* i. 154 *et seq.*, who refers also to "puta" or "pura," the spirit of forgetfulness, mentioned in Siddur Rab Amram, i. 31b; see also Blau, "Das Altjüdische Zaubrewesen," 1898, pp. 71-85. On the demon "ben temalyon" (probably a euphemism for St. Vitus' dance) see BEN TEMALION; EXORCISM.

These demons were supposed to enter the body and cause the disease while overwhelming ("kefa'o shed," R. H. 28a; Sifre, Debarim, 318) or "seizing" the victim ("ahazo," Shab. 151b; Yoma 83a, 84a); hence the usual name for "epileptic" is "nik-peh" (Bek. 44b; Yeb. 64b; Ket. 60b; Pes. 112b). The Greek word is *δαιμονίζεσθαι*, meaning the condition of being in the power of a demon. To cure such diseases it was necessary to draw out the evil demons by certain incantations and talismanic performances, in which the Essenes excelled. Josephus, who speaks of demons as "spirits of the wicked which enter into men that are alive and kill them," but which can be driven out by a certain root ("B. J." vii. 6, § 3), witnessed such a performance in the presence of the emperor Vespasian ("Ant." viii. 2, § 5), and ascribed its origin to King Solomon.

In the Book of Wisdom, Solomon claims to have received from God power over the demons (Wisdom vii. 20). The same power of curing by exorcism such diseases as dumbness, blindness, epilepsy, mania, and fever was exercised by Jesus and his disciples (Matt. viii. 16, ix. 32, xi. 18, xii. 22; Mark i. 25; v. 2 *et seq.*; vii. 32 *et seq.*; ix. 17, 27; Luke iv. 33, 39 *et seq.*; viii. 27; ix. 39; xi. 14; xiii. 11; Acts xvi. 16), as also by their Jewish contemporaries (Acts xix. 13 *et seq.*). It remained for a long time a practise among the early Christians (see Irenæus, "Hæreses," ii. 4, 32; Origen, "Contra Celsum," iii. 24; Friedländer, *l.c.* iii. 572, 634).

The demons were believed to be under the dominion of a king or chief, either Ashmodai (Targ. to Eccl. i. 13; Pes. 110a; Yer. Shek. 49b; Lev. R. v., where שִׁירָא is a corruption of אֲשִׁמְדַּאי) or, in the older Haggadah, Samael ("the angel of death"), who kills people by his deadly

King and Queen of Demons. poison ("sam ha-mawet"), and is called "head of the devils" ("rosh saṭanim";

Deut. R. xi.; Pirke R. El. xiii.). Occasionally a demon is called "saṭan": "Stand not in the way of an ox when coming from the pasture, for Satan dances between his horns" (Pes. 112b; compare B. K. 21a). The name "mashhit" ("destroyer," Ex. xii. 23) seems to refer to the head of the demons in the sentence: "When permission is given to the destroyer to do harm, he no longer discriminates between the righteous and the wicked" (Mek., Bo, 11; B. K. 60a).

The queen of demons is LILITH, pictured with wings and long flowing hair, and called the "mother of Ahriman" (הוֹרִימָן B. B. 73b; 'Er. 100b; Nid. 24b). "When Adam, doing penance for his sin, separated from Eve for 130 years, he, by impure desire, caused the earth to be filled with demons, or shedim, lilin, and evil spirits" (Gen. R. xx.; 'Er. 18b), and according to Pseudo-Sirach ("Alphabetum Siracidis," ed. Steinschneider, p. 23) it was Lilith, as Adam's concubine, who bore them (compare "Chronicles of Jerahmeel," ed. Gaster, xxiii. 1). Whether identical with Lilith or not, a more familiar personage, as queen of the demons, is Igarat bat Mahlat (Num. R. xii.; Pes. 112b), with her

chariot and her train of eighteen myriads of demons. According to Yalkuṭ, Ḥadash, Keshafim, 56, she dances at the head of 478 (= מֵחַלְלִים), and Lilith howls at the head of 480 (= לִילִיתִים), companies of demons. The cabalists have as a third queen of the demons and wife of Samael, "Na'amah," the sister of Tubal Cain and the "mother of Ashmodai" (Gen. iv. 27; see Behai's commentary, and Yalkuṭ, Reubeni, *ad loc.*). Agrat bat Mahlat seems to be "the mistress of the sorceresses" who communicated magic secrets to Amemar (compare Pes. 110a, 112b). Yohane bat Reṭibi, who, according to Soṭah 22a, prevented women by witchcraft from giving birth to their children, seems to be the same mythical person mentioned by Pliny as "Iotape" or "Lotape" in "Historia Naturalis" (xxx. 1, 2), together with Jannes (Jambres) and Moses (see Reinach, "Texte d'Auteurs Grecs et Romains," 1895, p. 282).

Upon pre-Talmudic demonology new light has been thrown by the "Testament of Solomon," translated by Conybeare in "Jew. Quart. Rev." (1898, xi. 1-45), a work which, notwithstanding many Christian interpolations, is of ancient Jewish origin and related to the "Book of

Pre-Talmudic De-
monology. Healing" ("Sefer Refu'ot") ascribed to King Solomon (see Pes. iv. 9; Josephus, *l.c.*; Schürer, "Gesch." iii. 300). In this "Testament" it is told

that by the help of a magic ring with the seal of Pentalpha, Lilith-like vampires, Beelzebub, and all kinds of demons and unclean spirits were brought before Solomon, to whom they disclosed their secrets and told how they could be mastered (see SOLOMON, TESTAMENT OF). It contains incantations against certain diseases, and specifies the task allotted to each of the chief demons in the erection of the Temple. The latter was a favorite theme of the Haggadists (Pesik. R. vi.; Soṭah 48b; Giṭ. 68a). The later Haggadah ascribed to Moses this power to make the demons work at the erection of the Sanctuary (Pesik. R. iv. 6b; Num. R. xii.); and Solomon's "sword against the fear of the spirits at night" (Cant. R. to iii. 8) was transformed into the magic "sword of Moses" (Pesik. 140a; Pesik. R. 15; Cant. R. iii. 7; Num. R. xi., xii.). Henceforth the magic books of Moses and the "Sword of Moses" (see Dieterich, "Abraxas," 1891, pp. 155, 169 *et seq.*; Gaster, "Sword of Moses," London, 1896) took the place of "Solomon's Testament" in the magic lore of the Jews.

In the main, demonology among the Jews preserved its simple character as a popular belief, the demons being regarded as mischievous, but not as diabolical or as agencies of a power antagonistic to God. Even Ashmodai, or Asmodeus, the king of demons (Tobit iii. 8, vi. 14, Aramaic version), who kills the seven successive bridegrooms of Sara before

their marital union, is but a personification of lust and murder; but there **Cosmic Demons.** is nothing Satanic—that is, of the spirit of rebellion against God—in him; he is driven out by the recipe prescribed by the angel Raphael, and sent to Egypt and bound by Raphael (Tobit viii. 3). It was only at a certain period and within a certain circle that demonology received its specific character as part of the cosmic power of

evil, and in opposition to angelology as part of the cosmic power of good.

Babylonian cosmogony describes the combat of Bel-Marduk with the chaos-monster Tiamat, the sea-dragon, the power of darkness whose defeat is the beginning of the world of light and order. The same monster appears in various Biblical passages as RAHAB, the sea-monster; Tannin, the dragon of the sea; and Leviathan, the "crooked serpent" slain by YHWH "with his sure and great and strong sword" (Isa. xxvii. 1, li. 9; Ps. lxxxix. 10, 11; Job xxvi. 12; Gunkel, "Schöpfung und Chaos," 1895, pp. 30-46 *et seq.*). While this mythological figure became in the course of time a metaphor symbolizing nations like Egypt (Ezek. xxix. 3; Ps. lxxxvii. 4), the monster remained a real being in the popular belief; and inasmuch as this conflicted with the monotheistic system, the battle of God or His angel Gabriel with Leviathan and Behemoth was transformed into a great eschatological drama which ended in the perfect triumph of divine justice (B. B. 75b). The Babylonian Tiamat, as Behemoth and Leviathan, became on the one hand infernal monsters devouring the wicked, and on the other food and cover for the righteous in heaven (see LEVIATHAN). Nevertheless, the Mandæan and Gnostic heresies maintained the belief in these cosmic monsters (Brandt, "Mandäische Schriften," 1893, pp. 144 *et seq.*), and many descriptions of Gehenna in Jewish and Christian literature preserve traces of these "Tartarus-holding" or "watching" demons of the lower regions (see Dieterich, *l.c.* pp. 35, 76 *et seq.*; ESCHATOLOGY; GEHENNA). In fact, the hosts of demons punishing the wicked in Gehenna are in the service of angels of divine justice, and though called "saṭanim" (Enoch xl. 7 *et al.*), belong to the category of angels rather than of demons. According to the Book of Jubilees, Noah learned from the angels (Raphael) the remedies against these diseases, and wrote them in a "Book of Healing" similar to the one ascribed to King Solomon (x. 5-12; Jellinek, "B. H." iii. 155 *et seq.*, xxx. *et seq.*). The host of demons under Satan's direction accordingly seduce all heathen people to idolatry (Jubilees, vii. 27, x. 1, xi. 5, xv. 20, xxii. 17), but the end of Satan will be the healing and resurrection of the servants of the Lord (xxiii. 30).

The speculation regarding the nature and origin of these demons and their leaders led as early as the second pre-Christian century, in those fragments preserved under the name of the Book of Enoch, to the story of the fall of the angels (Enoch, vii.-viii.; lxix.). Like Beelzebub, or Lucifer (Isa. xiv. 12; compare Slavonic Enoch, xxix. 4), two hundred 'Irin or "watchers" fell, attracted by the beauty of the daughters of men (Gen. vi. 4); only tradition obviously differed as to the leader of the rebellious host, whether it was Azazel or Shamḥazai. At any rate, they acknowledged the supremacy of Satan (liii. 3, liv. 6), though occasionally many satans are mentioned (xl. 7 *et al.*), and these fallen angels became "the evil spirits" (xv. 8, xix. 19) who taught mankind all the arts of deception, witchcraft, and sin (vii.-viii., lxix.). But their children, the offspring of this mixture of an earthly and a celestial race, became, when slain, the hybrid race of disembodied

spirits or demons doing the work of destruction until the Day of Judgment (xvi. 1). Belial is another name for Satan found in the Book of Jubilees (xv. 33), in Sibyllines (iii. 63), and in Ascension of Isaiah (ii. 4), where he is also called "the prince of injustice" (Sar ha-Masṭemah), who rules over this world. Belial (or Beliar) occurs most frequently in the Testaments of the Twelve Patriarchs. He has "seven spirits of deception" in his service (Reuben, 2), and as author of all evil, "the spirit of hatred, darkness, deception, and error," he is the opponent of God, the "Father of Light," and of His Law (Simeon, 5; Levi, 19; Issachar, 6; Dan, 5; Zebulun, 9; Naphtali, 8; Gad, 4; Joseph, 20), and when "he and his evil spirits are crushed the heathen world will be converted to the belief in the Lord" (Simeon, 7; Zebulun, 9). Under this aspect the world appeared as the arena in which Satan contends with the Lord, the God of life everlasting, until "the great dragon, the old serpent, he that is called Devil and Satan, the deceiver of the whole world, shall be cast down and his angels with him" (Suk. 52a; Assumptio Mosis, xi.; Matt. xxv. 41; Rev. xii. 9).

The whole Jewish and pagan world at the beginning of the Christian era believed in those magic formulas by which the evil powers of the demons could be subdued, and the Jewish exorcists found a fertile soil everywhere for the cultivation of their Essene notions and their magic. This was the at-

New Testament Demonology. The atmosphere in which Christianity arose with the claim of "healing all that were oppressed of the devil" (Acts x. 38), enforcing the recognition by the unclean spirits themselves of the Son of David as the vanquisher of the demons (Mark i. 27, iii. 11). The name of Jesus became the power by which the host of Satan was to be overcome, as Jesus himself had seen "Satan as lightning fall from heaven" (Mark ix. 38, xvi. 17; Matt. xii. 28; Luke x. 18). But there was danger lest the exorcism practised by Gentiles and Jews alike (see Conybeare, "J. Q. R." ix. 88 *et seq.*) should engender the spirit of impurity underlying all magic, the dividing line between legitimate and illegitimate magic being anything but sharply drawn (see Book of Jubilees, viii. 2; Sanh. 91a: "Abraham handed the name of unclean witchcraft to the sons of Keturah"; compare Blau, "Das Jüdische Zauberwesen," pp. 15, 23, 41 *et seq.*). It was, therefore, not hostility which prompted the Pharisees to accuse Jesus and his disciples of "casting out devils by the power of Beelzebub, the prince of devils" (Matt. xii. 24; compare Ben Stada, Shab. 104b). The more devils cast out, the more appeared (Luke xi. 26). The cure offered to an age in constant dread of demons (Acts v. 16, viii. 7, xvi. 16, xix. 12-20) only aggravated the disease; nor did Paul's system (see Everling, "Die Paulinische Angelologie und Dämonologie," 1888) spiritualize the idea of Satan as the Testaments of the Patriarchs endeavored to do, in order to remove the fear of demons (see Eph. vi. 12; Gal. iv. 3, 9).

Pharisaism diagnosed the disease of the age differently, and therefore insisted that the observance of the Law was the best prophylactic against demons. The wearing of the Tefillin, the Greek name of

which, *φύλακτῆρια*, indicates that they were regarded by the Hellenistic Jews as amulets (comp. Targ. Cant. viii. 3; Gen. R. xxxv.; Men. 33b), the fixing of the MEZUZAH at the door, the reading of the *Shema* with the name of God in the first verse, and the putting on of the ZIZIT, while direct observances of the Law (Deut. vi. 4-9, Num. xvi. 38), were also regarded by the Rabbis as a safeguard against all evil powers (Ber. 5a; Num. 48b). The recital of the set prayers each morning and evening (Ber. 9b), the observance of the commandment of the Sukkah (Pesik. 187b), protect against evil powers. In fact, "the wicked are accompanied by the angels of Satan; the righteous by the angels of God" (Tosef.,

Shab. xvii. 2-3; compare Book of Jubilees, x. 6). For each commandment observed by man becomes an angel "to guard him against demons" (Ex. R. xxxii. and Tan. *ad loc.*). "Every observance of the Law is a protection" (Soṭah 21a), and those bent upon

doing some sacred work ("sheluḥe miṣwah") need fear no evil powers (Pes. 8b). The priest's blessing also is a protection against malign influences (Num. R. xi.). And as in the Passover night, "the night of watching," Satan was bound and prevented from doing harm to Israel (Book of Jubilees, xlviii. 15; Pes. 109b), so is "the left hand when adorned with the tefillin surrounded with thousands, and the right hand performing acts of religion surrounded with myriads, of guardian angels" (Midr. Teh. to Ps. xci. 4). "Every limb engaged in the fulfillment of a divine commandment is protected against the 'Strong One'" (Pesik. R. ix.; Midr. Teh. to Ps. xxxv.). Thus Pharisaism, while increasing the yoke of ceremonial laws for the sake of love of God, showed a way to overcome the fear of demons. Belief in the power of the Law became the antidote against what may be termed "Satanophobia," and against the spirit of pessimism and asceticism which was fostered by the Essenes and by their Christian heirs.

Though the belief in demons was greatly encouraged and enlarged in Babylonia under the influence of Parsee notions, demonology never became an essential feature of Jewish theology. The reality of demons was never questioned by the Talmudists and casuists; therefore the Halakah accepted it as a fact (see Shulḥan 'Aruk, Oraḥ Ḥayyim, 4, 2 *et seq.*; 90, 6; 181, 2; Yoreh De'ah, 116, 5; 179, 16, 19; Eben ha-'Ezer, 17, 10; based upon Shab. 101a, 109a; Hul. 105a; Ber. 3a; Pes. 112a; Meg. 3a; Pes. 109b; Yeb. 122a). Nor did most of the medieval thinkers question their reality (see Nahmanides on Lev. xvii. 7; "Cuzari," v. 14; Crescas, "Or Adonai," iv. 6; Solomon b. Adret, Responsa, i. 413; Moses Tachau, in "Ketab Tamim"; "Ozar Neḥmad," iii.

The Philosophers. 97). Only Maimonides, when ignoring or circumscribing the rabbinical references to the demons (see "Yad," Rozeah, xii. 5; Gerushin, ii. 13 *et seq.*; compare "Moreh," i. 7, the commentary to Mishnah Pes. iv. 11, and Abot v. 6), and Ibn Ezra, on Lev. xvii. 7, denied their existence.

The cabalists, on the other hand, not only took up all the ideas expressed in Enoch and Pirke R. El.

xxxiv., regarding the demons as the spirits of the men of the Flood and as the result of the union of Adam and Lilith, but they made demons form part of the cosmic design in the emanistic system in which the right and the left are the opposite currents of pure and impure powers filling the world and dividing it between the Holy One and the serpent Samael (see Zohar, Bereshit, 47b, 53 *et seq.*, 169b *et seq.*, 174b, and CABALA). But while the malign powers became agencies of the spirit of impurity working in men and nations, there goes along with this view the popular conception of demons as spirits of the dead roaming about as specters and vampires. This latter view is especially prominent in the school of R. Judah of Regensburg, and is dwelt upon in the Book of Razi'el and the "Sefer Hasidim," 172, 326 *et seq.* Nevertheless, while the number of the demons of diseases increases (see Güdemann, "Gesch. des Erziehungswesens," 1880, i. 205; Yalk., H'adash, Mita, 149), and the belief in the efficacy of incantations is firmly adhered to, these writers repeatedly urge their readers not to resort

The to any conjuration or magic practises,
Cabalists. but to have perfect confidence only in prayer and in the power of God. "No one who indulges in such practise will see good results for himself and his house" ("Sefer Hasidim," ed. Wistinetzki, Nos. 211 *et seq.*, 1448-57; Güdemann, *l.c.* 207).

Notwithstanding this closing admonition of the "Sefer Hasidim," many prayers for the warding off of demonic influences have found a place in the Jewish liturgy and the Shulhan 'Aruk. The privies

Prayers having been in Talmudic times isolated spots which filled the imagination with specters of fear, a special
Against incantation is prescribed invoking the
Demons. protection of guardian angels against the evil spirits haunting these places (see Ber. 60b; compare Ber. 62a and Oraḥ Hayyim, 13, 1). Most of the prayers to be recited before retiring to bed are intended to guard the sleeper against demons (compare Ber. 4a; Shebu. 15b). At the close of the Sabbath, when the angel Dumah calls all spirits of the wicked back to their place of torment after their Sabbath respite, the evil spirits are supposed to swarm everywhere, poisoning the wells and doing harm in many ways; wherefore Psalm xci. is recited (see Pesik. R. xxiii.; Sheeltot, Bereshit; Tanya, xxi.; Ha-Manhig, Shabbat, 65; Solomon b. Adret, Responsa, 1119; Kol Bo, xli.). See DUMAH.

As early as geonic times there was a special incantatory formula, to be recited before drinking from the cup of the H'ABDALAH wine, against "the demon Puta, the prince of forgetfulness," that "by the power of the holy names of the angels Arimaz, Arimas [Ahuramazda?], Ansisel, and Petahel, he may be cast upon the high mountains [Alburz]" ("Seder Rab Amram," i. 31). To this Isaac Luria added new features in the form of incantations against all the demons, and instead of "Putā" he read "Purah," connecting it with Isa. lxiii. 1 as the name of Esau-Samael (see Isaac Luria, "Tikkune Shabbat," and Kizzur Shelah, "Moze'e Shabbat"; compare M. Brück, "Pharisäische Volkssitten," 1840, p. 121; Brüll, *l.c.*).

Death at all times impressed people with the fear of evil spirits. Many rites and prayer-formulas were introduced to avert their malign influence, and special formulas for the dying were prescribed by the cabalists, by which all the demons—the shedim, ruḥin, lilin, mazziḳim, etc.—that may have been created by the impure thoughts and deeds of the departing, are adjured, by the Holy Decrees, the Powers of Heaven, and the anathemas of men, not to follow the dead nor injure him, nor in any way, direct or indirect, to cause injury to any person through him (see "Ma'abar Yabbok," ed. Landshut, pp. 30-33, Berlin, 1857, and introduction, where the literature is given; AMULET; CHILDBIRTH; INCANTATIONS). Customs are sometimes explained by the superstitious as being based upon belief in demons; for instance, the one prohibiting women from going to a cemetery because demons are fond of following her who yielded to the temptation of the serpent and thus caused death to come into the world, or the custom of blowing the shofar at funerals to ward off the shedim (see Yalk., H'adash, *l.c.* 47).

—**In Arabic Literature:** * Ante-Islamic mythology does not discriminate between gods and demons. The jinn are considered as divinities of inferior rank, having many human attributes: they eat, drink, and procreate their kind (compare Hag. 16a, where a similar belief is expressed), sometimes in conjunction with human beings; in which latter case the offspring shares the natures of both parents. The jinn smell and lick things, and have a liking for remnants of food. In eating they use the left hand ("Manaqib Al-Ansar," No. 32). Usually they haunt waste and deserted places, especially the thickets where wild beasts gather. Cemeteries and dirty places are also favorite abodes (compare Shab. 67a; Ber. 62b; Mark v. 5). In appearing to man they assume sometimes the forms of beasts and sometimes those of men; but they always have some animal characteristic, such as a paw in place of a hand (Darimi, "Kitab al-Sunnah," ii. 213). Eccentric movements of the dust-whirlwind ("zawabi") are taken to be the visible signs of a battle between two clans of jinn (Yakut, iii. 478).

Under the influence of Jewish and Christian demonology in post-Islamic times, the only animals directly identified with the jinn are snakes and other obnoxious creeping things (compare Pes. 112a). When Mohammed was on his way to Tabuk, it is said that a swarm of jinn, assuming the form of serpents, approached him and stood still for a long while.

Generally jinn are peaceable and well disposed toward men. Many an ante-Islamic poet was believed to have been inspired by good jinn; and Mohammed himself was accused by his adversaries of having been inspired by jinn ("majnun"). But there are

* This article treats only of parallels to Jewish demonology found in Arabic literature.

also evil jinn, who contrive to injure men. Among these are specially conspicuous the three female demons named "Ghul" (corresponding to the Talmudical *לילית*), "Si'lat," and "Aluk" or "Aulak" (compare Prov. xxx. 15), and the four male demons "Afrit," "Azabab," "Aziab," and "Ezb." Ghul is especially harmful to new-born children, and in order to keep her away their heads are rubbed with the gum of an acacia (Zamakhshari, "Asas," s.v. "ḥaiḍ").

Islam recognized the existence of all the pagan demons, good and evil, protesting only against their being considered gods. It divides the

Demons evil demons into five species: "jann," **in Islam.** "jinn," "shaitans," "afrits," and "marids." Mohammed frequently refers in the Koran to the shaitans, of whom Iblis is the chief. Iblis, probably a corruption of the name "Diabolos" = Satan, is said to have been deprived of authority over the animal and spirit kingdoms, and sentenced to death, when he refused, at the creation of Adam, to prostrate himself before him (Koran, vii. 13). The shaitans are the children of Iblis, and are to die when their father dies; whereas the others, though they may live many centuries, must die before him. A popular belief says that Iblis and other evil demons are to survive mankind, though they will die before the general resurrection; the last to die being 'Azaril, the angel of death.

Tradition attributes to Mohammed the statement that every man has an angel and a demon appointed to attend him. The former guides him toward goodness, while the latter leads him to evil ("Mishkat," i. ch. 3). The shaitans, being the enemies of Allah, strive to disturb worshippers. Mohammed, it is said, prefaced his prayers with "O God! In Thee I am seeking for a refuge from the attacks of the shaitan and his witchcraft" (Hamzah, vii. 293). Among the evil jinn are distinguished the five sons of Iblis: "Ṭir," who brings about calamities and injuries; "Al-A'war," who encourages debauchery; "Suṭ," who suggests lies; "Dasim," who causes hatred between man and wife; and "Zalambur," who presides over places of traffic. It was in order to keep them away that the faithful were commanded the cleansings and fumigations which are unbearable to the shaitans, who delight in dirt and filth (Wakidi, ii. 178). The pronouncing of the "takbir" formula ("Allah akbar" = Allah is very great) is also a means of driving them away. Mohammed, it is said, pronounced it in his travels whenever the appearance of the region changed, lest it might be enchanted. In later times amulets were invented to which were ascribed the virtue of protecting their bearers from the attacks of demons.

As in cabalistic literature, the cat plays a great part in Islamic demonology. A demon assuming the form of a cat is said to have presented himself to Mohammed while he was praying (Darimi, l.c. ii. 449). The demons called "Ḳuṭrus" usually assumed the form of cats (Mas'udi, "Muruj al-Dhahab," iii. 321). As to the good jinn, there are some among them who profess Islamism, and Mohammed pretended that many of them had listened to his sermons (Koran, sura lxxii.).

Interesting are the accounts given in the Koran of the power of Solomon over the shaitans, which accounts parallel the legends found in Talmud and Midrashim, and of which the following are examples:

"And we [subjected] to Solomon sundry devils to dive for him, and do other works; and we watched over them" (sura xxi. 81, 82). "And we tried Solomon, and we placed upon his throne a counterfeit body. . . . So we subjected unto him the wind, which moved gently at his command whithersoever he desired; and the devils also—every builder and diver bound in chains" (sura xxxviii. 33-37). "And of the jinn were those who worked in his presence by the will of the Lord; and such of them as swerved from our command we caused to taste of the punishment of hell. They made for him whatever he pleased of lofty halls and images, and dishes large as tanks for watering camels" (sura xxxiv. 11-12).

In the tradition it is said that Solomon possessed power over the demons by virtue of a talisman, which consisted of a signet-ring of brass, upon which was engraved the most great name of God.

DENARIUS (Greek, *δηνάριον*): Roman silver coin, which derived its name from its being at first equal to ten asses; later this number was increased to sixteen. From the second century B.C. it was the chief silver coin of the commonwealth, and under the empire it is probable that it held a similar position up to the fall of Jerusalem. Its normal value was one twenty-fifth of the imperial aureus.

In the English versions the word is rendered "penny"; and it was in this coin that payment was made by the Jews of the civil tribute to the Roman emperors. The coin bore the effigies and titles of the reigning monarch; hence the reply of Jesus to the Pharisees (Matt. xxii. 17-21).

In the Talmud the denarius is identified with the zuz and reckoned to be worth one-fourth of the holy shekel, or a half of the ordinary one, and equivalent to 4 common selas, 4 sesterces, 6 obols, 24 asses, or 192 perutas or widow's mites. See also **MONEY**; **NUMISMATICS**.

DENIS (DIONIS), ALBERTUS: One of the first members of the Portuguese community in Hamburg. On May 31, 1611, he with two others signed the agreement which assured to the community its cemetery in Altona. In 1612 he was with others

formally admitted to the town by the Senate and the aldermen. He was banker to Count Ernest of Schauenburg, the reigning prince of the county of Pinneberg in southern Holstein, whom he supplied with silver bullion for his mint. In consequence of his confidential relations with the count, he came into collision with the Hamburg authorities, who accused him of buying up reichsthalers coined in Hamburg to melt down in Altona. The Senate of Hamburg ordered him put into prison, but he escaped to Altona and settled there, protected by the count against the Senate of Hamburg and the hostile population of Altona. Christian IV. of Denmark committed to him (1619) the administration of the royal mint in the newly founded town of Glückstadt. He continued to be a member of the Hamburg Portuguese community, and in 1637 interceded as its representative with Count Otto of Schauenburg for the renewal of the cemetery privileges.

DENMARK: A kingdom of northwestern Europe. The first mention of the Danes in Jewish literature occurs in the "Yosippon" (ed. Breithaupt, pp. 8, 547; compare Jerahmeel, transl. Gaster, p. 68), where the Dodanim mentioned in the Bible (Gen. x. 4) are identified with the Danes, and where they are described as a valiant people who fled to northern shores in order to escape from the Romans, though the latter reached them even there, and overcame their resistance. The last-named detail probably owes its origin to an Italian source, in which may have been recounted, although inaccurately, the wars of the Christian emperors of Rome with the Danish kings. The identification with the Dodanim is, of course, based only on the partial consonance of the names.

It is very doubtful whether Jews were found even sporadically in Denmark in the Middle Ages. Although a "Deulacresse of Danemarcia" is mentioned in connection with the English money-broker AARON OF LINCOLN, in an English "sheṭar" of 1176 (the first sheṭar bearing a date, according to Jacobs in "Jews of Angevin England," pp. 58, 59), the designation "Danemarcia" can hardly refer to Denmark proper, but rather to a territory in Normandy subject to the Danes.

The Jews first appeared in the region of Holstein, which belonged formerly to Denmark. In a letter dated Nov. 25, 1622, King Christian IV. (1588-1648) invited the Portuguese Jews of Amsterdam to settle in Glückstadt, where, among other privileges, the free exercise of their religion would be granted them. Though the history of the Jews in the territories of Sleswick-Holstein does not belong to this article, it must be noted that the Danish kings were invariably friendly to their Jewish subjects in these provinces, and that the Jews in Denmark proper were for a long time intimately connected with Altona, inasmuch as the chief rabbi of Altona, Hamburg, and Wandsbeck also exercised civil jurisdiction over the Jews settled in the Danish city Fredericia until Sleswick and Holstein in 1864 were severed from the Danish monarchy. The assistant rabbi of Fredericia was subject to the chief rabbi of

Altona until 1812. The first Jews probably came to Denmark by way of Sleswick and Holstein during the reign of the above-mentioned Christian IV. His successor, Frederick III. (1648-70), was not so favorably disposed toward the Jews, for in a rescript of Feb. 6, 1651, he says: "Jews have stolen into Denmark contrary to long-standing custom, [since the days of the Reformation, the Lutheran creed had, according to the laws of Denmark, been compulsory throughout the kingdom], and have dared to traffic with jewels and the like." Accordingly, he ordered that no Jew should enter Denmark without a special passport ("Geleitsbrief"), and that those who were already in the country should

be heavily fined if they did not leave within fourteen days. A few years later, however, the tables were turned. Frederick III., being in need of funds for his wars, borrowed money from the Jew Abraham (or Diego) Teixeira de Mattos of Hamburg (known through his relations with the Swedish queen Christina), and gave as security crownlands in Jutland. Teixeira thereupon made such good use of his influence with the Danish king that, as early as Jan. 19, 1657, "the Portuguese professing the Hebrew religion" were permitted to travel everywhere within the kingdom, and to trade and traffic within the limit of the law. Teixeira himself gained little by his transaction with the Danish monarch. As his loan was not returned, he took instead the estates he held as security, selling them later at a great loss. The king acted similarly in his dealings with the De Lima family, who were in possession of the Hald estate from 1660 to 1703.

The first Jewish congregation was formed in the capital, COPENHAGEN, but other congregations were soon founded in some of the provincial cities; for example, in the Laaland town Nakskov (1667). In Ribe, Jutland, there were Jews as early as 1680, although the first synagogue in Jutland, that of Fredericia, was not built until 1719 (rebuilt in 1814). The privilege of 1657 was specially ratified in an open letter of Dec. 14, 1670, at the instance of Gabriel Gomez, who was in the service of the king. Nevertheless, a rescript of April 16, 1681, repeated that Jews were not to come into Denmark without a special Geleitsbrief; and the "Danish Law" (1683) of Christian V. (1670-99), a remarkable production which is still authoritative in Danish jurisprudence, in so far as it has not been expressly abrogated by later laws, classed Jews with Gipsies, and in general breathed the same spirit as the law of 1651. But as early as July 30, 1684, a rescript addressed to the above-mentioned Diego Teixeira declared that the Geleitsbrief was not to be demanded of the Portuguese Jews, and it is probable that the law was not always strictly enforced against German Jews. Religious services were permitted in COPENHAGEN in 1684.

So far as is known, the only "blood accusation" ever made in Denmark was brought against the court jeweler Meyer Goldschmidt, an elder of the synagogue already mentioned. A poor woman came to him, asking him to buy her child. She said she had been told that rich Jews bought children in

order to suck their blood, and she wished to give up her child to him, since she could not feed it. Meyer Goldschmidt immediately notified the authorities, and the woman was sentenced to be whipped, but was let off with imprisonment.

At the end of the seventeenth and in the course of the eighteenth century, German as well as Sephardic Jews continued to come into Denmark, although in small numbers. The government was on the whole not unfavorably disposed toward the Jews, although it was often obliged to listen to the complaints of the merchants with whom the Jews competed. The subordinate officials

Contrast of were not generally as friendly as the
Portuguese government; they probably had much
and trouble with traveling Jews, whose
German speech they hardly understood. It was
Jews. not easy, of course, for every police
official to find out whether the Jew

before him was a Portuguese and therefore enjoyed the general privileges, or whether he was to be accounted a German Jew (as were all who were not Sephardim), in which latter case the legality of his passport required demonstration. Probably the German Jews often assumed Portuguese names, and then joined the Portuguese congregation in Copenhagen in order to enjoy their privileges. What the government feared was that Jewish beggars and vagabonds might tramp about the country without definite means of support. An account of the baptism of a Polish Jew in 1620 leads to the conclusion that even then Jews who were worthless as subjects crossed the frontier and accepted baptism as a means of escaping punishment. To obtain a passport it was necessary to demonstrate the possession of money, or of means in some form for carrying on business, as well as some special technical skill; for in former centuries Denmark endeavored to open up all branches of industry by artificial means, the country until then having been almost entirely dependent upon agriculture and commerce. The Jews promoted the commercial interests of Denmark in relation to both the cloth and the tobacco industry. An agreement to build a house in any city that needed buildings was also a means of gaining an entry into Denmark. This is set forth as early as Sept. 2, 1726, in a rescript for Copenhagen; and earlier still (March 31, 1688) in one for Christianshavn, a suburb of Copenhagen on the island of Amager, where the German Jews received the privilege of carrying on the tobacco industry, but only on condition that they would build houses in that part of the city. Marrying into a Dano-Jewish family often conferred citizenship. It must be added, in explanation of all these privileges and rescripts, that, beginning with 1660, the Danish king was absolute sovereign and sole ruler of the country. He could at his pleasure appoint any Jew to a royal office, as was done in the instance of Aron Goldzieher, customs collector. Although this sovereignty was on the whole very mildly and wisely used, it is easy to see how important personal influence must have been in the direction of government. There were several rescripts against immigration before the middle of the eighteenth century, but none in the following decades of the century.

Denmark was strictly Protestant. Naturally, anything that wore the appearance of an attempt to proselytize would be resented. Danger therefore threatened the Jews when Holger PAULI (d. 1714), a half-crazy merchant, announced

Jews and himself as the Messiah and king of
Christians. the Jews. Equally pregnant with possibilities of trouble was the case of

Jens Gedelöcke. He was a lawyer who evinced a marked inclination for Judaism, and it became evident at his death (1729) that at heart he had been more Jew than Christian, and, according to the information of some of his Jewish friends, had practised Jewish rites. The Jews were thereupon compelled to remove his body from the Christian cemetery and to inter him in the Jewish cemetery; but as he had not formally embraced Judaism, they soon afterward decided not to permit the body to remain among them, and it was removed again. The chief of police of Copenhagen, who had not a very good reputation, endeavored to magnify the incident into an offense against the state; but the threatened storm soon blew over. At one time the Jews were forbidden to keep Christian servants (Jan., 1725); after two months, however, the ordinance was modified, and soon fell into disuse. The Jews were encouraged to embrace Christianity, but the converts made in that century were not of the best repute.

The Mendelssohn movement soon found adherents in Denmark. It is well known that Mendelssohn's friend, the Danish councilor of state, August v. Hennings, induced the minister to place the name of the insane king, Christian VII. (1736-1808), on

Influence the subscription list of Mendelssohn's
of Mendels- edition of the Pentateuch, thereby
sohn making it impossible for Raphael
Movement. Cohen, the rabbi of Altona, to put the book under ban (see COPENHAGEN).

The crown prince (later Frederick VI.), who was for a long time regent in the name of his sick father, was interested in the progress of his Jewish subjects, and after several commissions had made reports, he issued a comprehensive order (March 29, 1814) granting to the Jews full civil liberty, and placing them in general on an equal standing with the Christian population. They were, however, still debarred from government positions. The fact that they enjoyed no political rights is of no importance, since their Danish fellow subjects were in the same position, owing to the absolute sovereignty of the king. The government at this time was more favorably disposed toward the Jews than were the people. Business rivalry was frequently bitter, and the anti-Jewish movement which spread over Germany in the beginning of the nineteenth century invaded Denmark also. A poet, Th. Thaarup (1746-1821), was the chief assailant, while another poet, Jens Baggesen (1749-1826), was among the defenders; the Jews, however, were well able to take care of themselves. In 1819 Denmark became infected with German anti-Semitism, and the political opposition took this opportunity of attacking the Jews, in order thereby to strike a blow at the government, their protector. But Frederick VI. (1808-39), who was otherwise a most peaceable

man, did not allow himself to be trifled with, and suppressed the movement with unusual rigor.

In the royal ordinance of 1814 the Jews were enjoined to provide religious instruction in the Danish language for their children, and the congregations to provide Danish preachers in the synagogues. But such preachers were not readily found, and although Copenhagen was soon supplied, it was some time before the most important provincial congregations could secure so-called "kateketer," who, when secured, were placed in charge of the spiritual needs of the various church districts, and whose special duty it was to confirm children. A Danish

Internal Shalom COHEN, was authorized by the
Organiza- government, whereby at least a mini-
tion. mum of religious knowledge was provided for the children. As the word "Jew" had formerly been used as an opprobrious epithet in Denmark, the terms "Mosaites" and "Mosaik religious community" ("Mosaik Troessamfund") became the official designation for Jews and their congregations.

The Jews distinguished themselves as physicians, jurists, manufacturers, and especially as able and upright merchants, not only in Copenhagen, but also in the provincial towns. Therefore many Christians were willing to concede political equality to them in the third decade of the last century, when the political freedom of the country was inaugurated by the creation of deliberative assemblies. The Jews, however, received the right to vote without the right of election to Parliament, though they were, even then, chosen as members of the communal councils in Copenhagen, as well as in provincial cities. Not until the adoption of the constitution of June 5, 1849, under Frederick VII. (1848-63), were the last restrictions removed. From this period onward the Jews of Denmark are unknown to political history. The constitution, in which civil and political rights are made independent of religious creeds, so long as religious views and acts do not conflict with the accepted code of morals, was carried out to the letter. The Jews have contributed in various ways to the development of their country, and have distinguished themselves in the most diverse fields. A few names are mentioned under COPENHAGEN. Since the middle of the century the Jews have concentrated themselves more and more in the capital.

In 1860-70 there were in Denmark (irrespective of Sleswick-Holstein) about 6,000 Jews, of whom 2,500 lived in Copenhagen, the remainder, with the exception of the few living in the open country, residing in the provincial towns. According to the census of 1893 there were 3,500 Jews in Copenhagen and its neighborhood, and only about 500 in the provincial towns. These figures show that the Jewish population of Denmark remained stationary in the latter half of the nineteenth century. While in 1860 the Jews constituted about .4 per cent of the entire population, they now number barely .2 per cent. On the one hand the favorable social conditions under which the Jews are living have promoted mixed marriages, and on the other hand the immigration of many Russian and Polish Jews into neighbor-

ing Scandinavian countries within the last decades could not be diverted into Denmark, since house-to-house peddling, by which most of them must support themselves, at least in the beginning, is not permitted in Denmark. In conformity with the decrease of the Jews in the provincial towns, the number of communal officials with fixed positions has also naturally decreased. In Aarhus, Jutland, where the merchant Hartvig Philip Ree introduced the first modern regular Jewish service in Denmark, there is no longer a congregation. In Aalborg, too, where S. A. Mielziner, the brother of Professor Mielziner of Cincinnati, officiated for some time as preacher, there are now very few Jews. In Hørsens the Levy family built a fine synagogue about the middle of the last century, and made the condition that, when services could no longer be held, the synagogue should be transformed into a philanthropic institution for the community. This condition has already been complied with. In Naskov and Fredericia, whose communities are among the oldest in the country, there are still synagogues, but very few Jews. This is also the case in Faaborg, where a preacher is still appointed; while in Randers, which has the last provincial congregation worthy of the name, there are still a preacher and another official; the congregation is, however, near its dissolution. Jews are found only here and there in the other towns and villages of the country. Some are engaged in agriculture, partly as landed proprietors, and partly as peasants in the strict sense of the word. For additional information concerning the Jews in Denmark, see COPENHAGEN.

DEPPING, GEORGES BERNARD: German-French historian; born in Münster, Germany, May 11, 1784; died in Paris Sept. 5, 1853. He went to Paris in 1803, where he lived as teacher and writer. Besides other historical works, he wrote: "Les Juifs dans le Moyen Age, Essai Historique sur Leur Etat Civil, Commercial et Littéraire," Paris, 1834; 2d ed., 1844; German transl., Stuttgart, 1834. Depping was especially attracted to the history of the Jews in Europe during the Middle Ages by "its wealth of instruction for us; one can see from this history how fanaticism has been able to root out kindness and neighborly love, . . . and what misfortunes met those exiles who in barbaric times wished to preserve their national customs and a religion offensive to those among whom they lived." The book owed its origin to the offer of a prize, in 1821, by the Royal Academy for a work describing the condition of the Jews in France during the medieval period. Depping's work was given honorable mention, but did not win the prize. He later enlarged the work, ex-

tending its scope to the general history of the Jews in Europe. The medieval Christian sources—documents, letters, chronicles, and histories, especially those dealing with the history of the Jews in France—were studied by Depping with great diligence and not without critical acumen. This fact gives importance to the book. But it is to be regretted that those rabbinical sources which were not accessible in the form of translations were but seldom consulted. As a consequence the few passages relating to the literature of the Jews are of no value (compare, especially on Rashi, pp. 113 *et seq.*; Zunz, "Z. G." pp. 151, 446). The Introduction (pp. v.-xxiv.) contains a short but valueless review of the history of the Jews up to their appearance in Europe. Depping's style is pleasing.

DERASHA. See **HERMENEUTICS**; **HOMILETICS**; **MIDRASH**.

DERAZHNYA: Village in the government of Podolia, Russia. In 1898 it had a population of 6,118, of which 5,230 were Jews. Handicrafts constitute the most important sources of income, 518 persons being occupied by them. About 25 families are engaged in dairy-farming, 17 families in raising tobacco, and others in market-gardening and fruit-growing. Some find employment in factories and workshops, and 165 work as day-laborers. The village has a *Linat ha-Zedek*, a *Parnasat 'Aniyyim*, a *Bikkur Holim*, etc. There are a *Talmud Torah* with 20 pupils, a private Jewish girls' school with 17 pupils, and 17 *hadarim* for boys and girls, with 436 pupils.

H. R.

S. J.

DERBENT (called by the Arabs **Bab al-Abwab** ["Main Gate"], or **Bab al-Khadid** ["Iron Gate"]): A fortified seaport in the Russian province of Daghestan (Caucasus), on the western shore of the Caspian Sea, and at the entrance of a defile known to the ancients as the "Albanian Gates." The city of Derbent was founded by the Persian king Khobad at the beginning of the sixth century, to protect the Persian possessions against the attacks of the Chazars; but a fortified settlement existed there long before that time. The Jewish population of Derbent and its neighborhood are probably the descendants of the military colony which Anushirwan (530-578) established there. The suggestion of Joseph Schwarz that Derbent is the "Terbent" mentioned in the Talmud (Yer. Meg. iv. 75), is therefore without foundation. With the extension of the Chazar kingdom the Jewish community in Derbent increased rapidly, so that in the eighth century it probably had a larger population than it has to-day.

The Jewish community of Derbent was of some importance during the period of the Chazar kingdom. Ibn Haukal tells of a thriving slave-market in Derbent, where merchants of all nationalities met. The place was then much larger than Tiflis. When the Russians devastated the Chazar city Semender, the surviving inhabitants of that city, with those of Atel (capital of the Chazars), among them being

many Jews, fled to Derbent (Harkavy, "Skazanie Musulmanskikh Pisatellei o Slavyanakh i Russkikh," p. 220). Derbent was annexed by Russia in 1806. Wilhelmus de Rubruquis in describing the walls of Derbent (1254) relates that the whole country was largely inhabited by Jews (G. de Roubrouck, "Récit de Son Voyage," p. 280, Paris, 1877).

According to Anisimov, the Jewish population in 1888 was 1,671; they had 220 houses, 160 gardens, 19 shops, 1,020 deciatines (about 2,754 acres) of land, 4 synagogues, 6 rabbis, and 8 schools with 95 pupils. The Jewish population in 1891 was 2,490 in a total of 15,265. The Jewish quarter is south of the city and outside the wall.

Some of the Jewish customs of Derbent are noteworthy. A woman during her confinement kneels down, and the midwife receives the child and deposits it in a wooden vessel. She then pours salt over the child, cleans it, and puts it without bandages in a cradle. On the eighth day the people gather in the synagogue, and the "shammash" (sexton) takes the child to the synagogue for circumcision. The honor of holding the children is sold for the whole year on the Festival of the Rejoicing of the Law (*Simhat Torah*) to the highest bidder. The money goes to the rabbi. Except the midwife and the nearest female relative of the

Birth

Customs. mother, nobody is allowed in the birth-chamber for seven weeks after the birth. The father is not permitted to bathe or to write for seven weeks from the day of the birth. During this period no one is allowed to go on the roof of the house, and it sometimes happens that serious assaults result from people not obeying these laws. If the child is a female, the old women gather in the house of the mother and choose its name, not even informing the rabbi. During these seven weeks it is permissible neither to take fire from the house nor to borrow any utensils.

The children are allowed to grow up very wild, and are far from cleanly. The boys are taught to ride horseback and to handle arms, and boys of not more than fourteen years frequently kill one another in quarrels or fights. In the shabby, filthy, low-ceilinged school buildings forty pupils are sometimes huddled together without order. They sit with crossed legs and study the alphabet, the prayer-book, and the Pentateuch in the Tat language. There are many, however, who receive no education at all.

When a young man is about to select a wife, he is expected first to negotiate a settlement with the parents of the girl, and in such a case the oldest brother of the girl is the spokesman. If this brother sanctions the marriage, then the mother of the young man begins to bargain about the price to be paid for the bride, which must not be less than sixty rubles. Feasts are arranged for the day after the conclusion of the bargain, first in the

Prelimi- house of the girl, and then in the house
naries to of the young man. On the second day
Marriage. the fathers of both parties conclude the bargain in the house of the rabbi, with whom the contract of engagement ("tenaim") is deposited. Sometimes very young girls are promised in marriage, and as the marriage can not by law

take place before the girl has reached the age of thirteen, the young man is obliged to clothe her and send her presents. In case the contract is broken by the girl, she must return all the presents. In Derbent there is no law of engagement ("erusin"), as in Kuba and other places in the Caucasus, where a regular betrothal ceremony takes place, the young man uttering the words "Hare-at," etc., during the betrothal. The betrothed man is not allowed to enter the house of his prospective bride until the day of the wedding. The marriage ceremony must take place on Wednesday or on Thursday. The wedding-feast lasts for many days. See Chorny, "Sefer ha-Masa'ot," pp. 298-310.

DERCETO: A goddess of the Syrians. 1. Derceto is mentioned indirectly in II Macc. xii. 26, where it is related that Judas in his expeditions came *ἐπὶ τὸ Καρβίον καὶ τὸ Ἀταργατεῖον*, or *Ἀτεργατίον*. This latter word designates the sanctuary of the goddess Ἀταργάτις, and an abridged form of the name is *Δερκετώ*, which is used by Diodorus ("Sicily," ii. 4) and by Lucian ("De Syria Dea," xiv.). The same name is mentioned in the Talmud ('Ab. Zarah 11b, line 28) in the form *תרעתה* (Tar'atah). It is true that some have connected this Talmudical form with the Aramaic *תרע* ("door"), and have therefore supposed that it contained a reference to the female pudenda. But although Hesychius gives the equivalent *Σαλαμβω*, derived from *σαλαμβω* ("hole"; Hitzig, "Bibl. Theol. des Alt. Test." 1880, p. 20; but compare Hoffmann in "Zeit. für Assyriol." 1896, p. 245), it must be remembered that the consonant *y* had also the sound of *y*, as may be seen in *עזה* ('Azzah = Gāza, Gaza). Consequently the Talmudic "Tar'atah" (for "Targatah") might be an apocopated form of Ἀταργάτις. The full form, "Tar'atah," has recently been found.

2. *עתרעתה* (Atar'ateh) has been proved to be the name of a goddess in a bilingual Palmyrene inscription (De Vogüé, "Syrie Centrale," 1868, iii. 4) of the year 140, (Ἀταργατες being there used as the Greek equivalent. The same name, *עתרעתה*, is found on coins, probably minted in the Syrian city Hierapolis. Hence this name is composed of the following two parts: (1) *עתר* = *עתר* ('Athtar), as the goddess of fecundity and of wells is called in the South Arabian inscriptions (compare Robertson Smith, "Rel. of Sem." i. 97, note; Winand Fell, in "Z. D. M. G." 1900, pp. 245 *et seq.*); (2) *ערה*, probably signifying "time" (compare *עת*), perhaps more definitely "favorable time," "favorable circumstances," or "favorable destiny." When combined the two names may signify "Atar, the daughter of 'Ate," or "Atar, the mother of 'Ate," for 'Athtar is the all-producing divine power, and a son of Atargatis is mentioned by Athenæus (see Baudissin in Herzog-Hauck, "Real-Encyc." i. 173).

Hoffmann's assertion (in "Zeit. für Assyriol." 1896,

p. 249) that "'Ateh" is a diminutive of "'Atar" is not demonstrable.

3. "Atargates" may perhaps be compared with "Ashteroth" of Karnaim ("Ashteroth of the Double Horn"; Gen. xiv. 5), whose temple is mentioned as late as I Macc. v. 43 (τὸ τεμενος ἐν Καρναι); for the τὸ Ἀταργατεῖον of II Macc. xii. 26 is also mentioned in connection with τὸ Καρνίον. Lucian ("De Syria Dea," xiv.) says: "Many people are of the opinion that Semiramis the Babylonian, of whom there are many memorials in Asia, also founded the sanctuary of Hierapolis in Syria, but dedicated it not to Juno, but to her mother, Derceto." Lucian himself doubts this, however, for he continues: "I have seen the image of Derceto in Phœnicia: a strange sight! The upper half represents a woman; the lower half, from the hips down, the tail of a fish. The goddess at Hierapolis, however, is entirely a woman." Nevertheless, the goddess worshiped in Hierapolis was probably identical, in idea if not in form, with Derceto, who had a temple in Askalon (Philistia).

The people of Hierapolis avoided eating fish, "and they do that, according to their belief, for the sake of Derceto." Though Lucian says "There are people in Egypt who eat no fish, yet not to please Derceto," it is doubtful if this is decisive. In 'Ab. Zarah 11b, also, "Tar'atah shebe-Mapeg" ("Mabug" = Hierapolis) is combined with "Zerifah shebe-Ashkelon." Finally, the fish may have been made the symbol of the goddess Derceto on account of its fecundity. A calendar preserved in the Louvre represents the lower half of Derceto's body in the shape of a fish. An excellent copy is to be found in Vigouroux, "La Bible et les Découvertes Modernes," iii. 355.

E. K.

DERECHIN: Town in the government of Grodno, Russia. According to the census of 1897 it has a population of 2,289, of whom 1,573 are Jews. The main sources of income are in trade and handicrafts. There are 227 artisans. Shoemaking is the most important industry, affording occupation for 71 persons. The industrial output of the town is sold at the annual fairs. There are 46 Jewish day-laborers, 28 factory employees, and 6 families are engaged in truck-farming. Near the town is situated the agricultural colony of Sinaiskaya, where 30 families are engaged in agriculture. In all they own 187 deciatines of land. The charitable institutions are: Gemilut Hasadim, Somek Nofim, Malbish 'Arummim, Linat ha-Zedek, Haknasat Orhim, and Bikkur Holim. The town has a Talmud Torah with 50 pupils, and 15 hadarim with 150 pupils.

DEREK EREZ, *i.e.*, good behavior. See *ETIQUETTE*.

DEREK EREZ RABBAH (דרך ארץ רבה = "way of the world"; "deportment"): One of the small treatises (מסכתות קטנות) of the Talmud. In the editions of the latter the treatise Derek Erez consists of three divisions: (1) Derek Erez Rabbah (Large Derek Erez); (2) Derek Erez Zufa ("Small Derek Erez"); (3) "Perek ha-Shalom (Section on Peace)". This division is correct in that there are really three different works, but the designations

"Rabbah" and "Zuṭa" are misleading, since the divisions so designated are not longer and shorter divisions of one work, but are, in spite of their relationship, independent of each other. The ancient authorities, who have different designations for this treatise, know nothing of the division into "Rabbah" and "Zuṭa"; the "Halakot Gedolot" (ed. Hildesheimer, p. 647) even includes a large part of the Derek Erez Zuṭa under the title "Rabbah."

According to the usual division, Derek Erez R. consists of eleven sections ("perakim"). It begins with a halakic section on forbidden marriages ("ʿarayot"), to which are appended some ethical maxims on marriage. The second section consists of two entirely different parts, the first of which contains reflections on twenty-four classes of people—twelve bad and twelve good—with an appropriate Bible verse for each class; while the second enumerates the sins that bring about eclipses of the sun and moon, as well as other misfortunes, the whole ending with some mystic remarks concerning God and the 390 heavens. The section "Ben ʿAzzai," as the ancients called the third perek, contains some moral reflections on the origin and destiny of man. Sections iv. and v., each beginning with the word "Le-ʾolam" (Forever), contain rules of conduct for sages and their disciples, the respective rules being illustrated by Biblical events and occurrences of the time of the Tannaim. Sections vi. and vii., which seem to have been originally one section, illustrate, by means of several stories, the correctness of the rule of conduct, never, in society or at table, to act differently from others that are present.

Summary of Contents. Sections viii. and ix. also treat of rules of conduct during eating and drinking, especially in society; and it must be noted that sections vi. and viii. begin with the same word "Ha-niknas." Section x., on correct behavior in the bath, also begins with the same word, showing that all these sections, although they differ in content, were composed after one pattern. The last section begins with the enumeration of different things that are dangerous to life, and continues with the enumeration of actions and customs that are very dangerous to the soul.

This short summary of the contents shows that the work is of very diverse origin and that each section has its own history. It is clear that the first section can not, in view of its halakic content, belong with the rest of the treatise, which deals exclusively with morals and customs. Elijah of Wilna was therefore undoubtedly right in assigning this section to the treatise Kallah, which precedes the Derek Erez and deals entirely with marriage and the rules connected with it. The whole section is merely a later compilation, although some of its passages can not be traced back to the Talmudim and the Midrashim, as, for instance, the interesting parody on the hermeneutic rule of "kal we-homer" (compare Joseph b. Tadaï).

Entirely different in origin is the first part of the second section, drawn undoubtedly from an old tannaitic source. Four sentences of this section are cited in the Talmud as being taken from a Baraita (B. B. 90b; Sanh. 76b; Shab. 88b), and one in the

name of Abba Arika (Sanh. *l.c.*), who often quoted old sentences and maxims ('Er. 54a). The composition shows that this section is not taken from the Talmud, for the division into

Composition and Component Parts. twelve good and twelve bad classes of men is not found in the latter. The other half of this section, however, is probably a later interpolation, belonging properly to the third section. For

this section begins with a saying of Ben ʿAzzai concerning four things the contemplation of which would keep men from sin: hence the four classes of four things each that are enumerated in the second section.

Ben ʿAzzai mentioned four things in connection with the four sayings. They are drawn from the Talmud (Suk. 29). The third section seems to have been in ancient times the beginning of Derek Erez R. (Rashi on Ber. 22a; Pes. 86b; Tosef. 'Er. 53b), for which reason the old writers called the whole treatise "Perek ben ʿAzzai." Yet it is difficult to understand how this section came to be taken as the introduction to the treatise, which otherwise, beginning with the fourth section, forms a connected whole, and has totally different contents from the Perek ben ʿAzzai.

Therefore, as regards date and composition, only sections iv.-xi. need be considered, since the first three sections were not originally integral parts of the treatise. Sections iv.-xi. are not only similar in content, in that both set forth rules of behavior for different walks of life, and illustrate their meaning by examples from history, but their whole arrangement and composition also show the hand of the same author. Although the name of

Date of Composition. this author is not known, his date can be fixed approximately. Among the sixteen authorities quoted in the part which has been designated above as the treatise Derek Erez R. proper, there is not one who belongs to a later time than Rabbi, the redactor of the Mishnah. The Yerushalmi quotes a sentence, found in the Derek Erez R., with the formula "Tene be-Derek ha-Erez" (Shab. vi. p. 8a, bottom); from this it appears that in the time of the Amoraim a tannaitic collection of the name "Derek Erez" was known, and there is absolutely no reason for considering the present as a different treatise from the Derek Erez quoted in Yerushalmi. Nor is there any cogent reason for not considering this treatise as the source of the many quotations from Baraitas in Babli, which are found in Derek Erez R. also (compare Isaiah Berlin's glosses to the treatise), although it must be admitted that a great many of the quotations existed in different collections of Baraitas, and that the Talmud drew sometimes from one source and sometimes from another.

A contemporary of Rabbi, therefore (about 160-220)—hardly Rabbi himself—may have been the author of the Derek Erez R., the first three sections being added much later. A collection known as "Hilkot Derek Erez" existed even in the school of Akiba (Ber. 22a); but, as the term "Hilkot" indicates, it was composed entirely of short sentences and rules of behavior and custom, without any references to Scripture and tradition. It is even

highly probable that the treatise was based on the older collection, and that the work of the later editors consisted merely in the addition to the old rules of illustrations from the Bible and from history. For example, in the old collection there was a rule, "No one must enter the house of another without due announcement." This sentence was amplified by a later editor, who added: "This rule of behavior is taught out of the mouth of God Himself, who stood at the gate of paradise and called to Adam, 'Where art thou?'" (Gen. iii. 9); and to this is added the story of a journey of Jewish scholars to Rome, and how they comported themselves there (section v.).

It is characteristic of this treatise that in order to emphasize its rules, it relates many stories of the private life of the Tannaim. A most interesting one

is the following, which is used as an

Stories. illustration to the rule, always to be friendly and obliging: "Once Simon ben Eleazar [probably more correctly Eleazar b. Simon; compare Ta'an. 20a] met a very ugly man, and could not help exclaiming: 'How ugly are the children of our father Abraham!' The man answered: 'What can I do about it? Will you go and tell the Master who has created me?' Then Simon b. Eleazar fell down at the man's feet, asking his forgiveness. But the latter said: 'I will not forgive you until you have gone to the Master who has created me, and have said to Him, "How ugly is the creature which you have created!"' Only after much beseeching would the man forgive him; and on the same day Simon pronounced these words in the schoolhouse: 'Be always pliable as the reed, and not hard as the cedar. Although the reed bends to the gentlest wind, it resists the fiercest storm; but the cedar, at first proud and inflexible, in the end yields to the wind, and is uprooted.' " Stories of this nature lend a peculiar charm to the Derek Erez Rabbah.

The version of the treatise found in the Maḥzor Vitry (pp. 724 *et seq.*) is different from that in the editions of the Talmud. Instead of the first part of the second section, there is in the former version a collection of sentences and reflections on various subjects, arranged according to numbers. The version of the treatise Kallah, in Coronel's "Ḥamishah Kuntresim," Vienna, 1864, contains the greater portion of the Derek Erez R.; namely, the whole of sections iii., iv., v., and parts of the following sections. Aside from the variants found here, Coronel's version has also a kind of Gemara to the text. This Gemara, however, is of very late origin, being in all probability a product of the tenth century, although it contains matter of great value and of very ancient (Essene or Hasidean) origin. The Gemara, which is quoted by Isaac Aboab in "Menorat ha-Ma'or," is printed in the Wilna edition of the Talmud (Romm, 1889).

BIBLIOGRAPHY: The treatise *Derek Erez R.* was printed for the first time in the third Venetian edition of the Talmud (1546-1551); see also Goldberg, *Der Talmud. Tractat Derek Erez Rabbah*, Breslau, 1888, which contains a critical edition and a German translation; Krauss, in *Rev. Etudes Juives*, xxxvi. 27-43, 205-221; xxxvii. 45-64; Weiss, *Dor Dor we-Dorshave*, ii. 249-250; Zunz, *Gottesdienstliche Vorträge der Juden*, 2d ed., pp. 116-118.

DEREK EREZ ZUṬA (דרך ארץ זוטא, lit. "etiquette, small [treatise]"): An uncanonical treatise of the Babylonian Talmud. The name is misleading in more than one respect; the word "zuṭa" (small) would seem to indicate that it is a shorter version of the treatise "Derek Erez Rabbah," which is not the case, the two having little in common. "Derek Erez," moreover, is a very unsuitable name for a collection of ethical teachings such as form the substance of the treatise. Even Rashi, however (Ber. 4a), knows the treatise under this name, calling it "Masseket Derek Erez," while the Tosafists likewise call it "Hilkot Derek Erez" (Bek. 44b). The designation "zuṭa" is probably of later origin.

In the Talmud editions the treatise consists of nine sections ("perakim"), to which the Section on Peace ("Perek ha-Shalom") is added as a supplement. The Halakot Gedolot (ed. Hildesheimer, pp. 644-653) gives another version; here the same material is in two parts—(1) "Derek Erez Zuṭa," corresponding to sections v.-viii., and (2) "Derek Erez Rabbah," containing sections i.-iv. and ix. There are two manuscript copies with this division in the Bodleian (Nos. 120 and 380 in Neubauer's catalogue), as well as a genizah fragment ("Jew. Quart. Rev." x. 660); but in the latter the first four sections are under the title "Yir'at Heṭ." The Karaite Kirḳisani (tenth century) cites a passage from the fourth section under that title ("Jew. Quart. Rev." vii. 698). A third version is that in the Maḥzor Vitry (ed. Horwitz, pp. 721-723), where the first part of the eighth and the whole of the ninth section are given under the title "Hilkot Darkan shel Talmide Ḥakamim." It is noteworthy that in the Talmud editions sections iv.-viii. are marked as having been taken from the Maḥzor Vitry. It should also be mentioned that the "Siddur Rab Amram" (AMRAM BEN SHESHNA) gives only the first and fourth sections, which is probably due to the fact that the second and third were not included in the ritual.

Apart from this external evidence, a closer examination shows that the work consists of three different collections: (1) i.-iv., (2) v.-viii.,

Summary (3) ix., though it has a certain unity in that it consists almost exclusively

Contents. of exhortations to self-examination and meekness and of rules of conduct, and

urges temperance, resignation, gentleness, patience, respect for age, readiness to forgive, and, finally, the moral and social duties of a "disciple of the wise" ("talmid ḥakam"). It is written in the form of separate, short maxims arranged as in the Abot, but differing in that they are anonymous. The compiler attempted to arrange the maxims according to external characteristics, the order followed being determined by the initial word, and by the number of maxims. Several precepts which begin with the same word are put together even when they are not at all related in subject-matter (compare "The Wisdom of Ben Sira," ed. Schechter, vi. 1-20, where twenty sayings begin with שמע); especially are they thus combined into groups of four, five, or seven maxims, numbers which serve to aid in memorizing the passages. How far the compiler was able to carry out his principle can not be judged from the text in its present condition; and to ascertain the original form of the treatise it is necessary critically

to reconstruct the text. The following analysis of contents is based on such a reconstruction.

The first section begins with introductory remarks on the duties and proper conduct of a "disciple of the wise"; then follow seven sentences, each a precept in four parts, which, however, are often confused in the text as it now exists. The order is: (1) **הוי**; (2) **אל**—which sentence is to be read according to Ab. R. N., ed. Schechter, xxvi. 88; (3) **אם**; (4) **אל** (the following saying, beginning with **אם**, belongs to No. 3, while the next **אל** sentence is the fourth part of No. 4); (5) **העבר** (the two missing parts to be supplied from Abot ii. 4); (6) **אהוב** and its opposite **הרחק**; (7) **אל**—originally four sentences as shown by the Vatican MSS. in Goldberg and Coronel's version and as confirmed by the parallels in Ab. R. N., ed. Schechter, xxvi. 82, xxxiii. 36; the concluding **הרחק** sentence belongs to No. 6. The three haggadic utterances which form the conclusion of the first section are a later addition.

The second section begins like the first, emphasizing particularly the duties of the "disciple of the wise." After a series of admonitions concerning only the student, there follow, to the end of the section, maxims of a general nature for people in the most varied walks of life. These are also arranged in seven sentences, each beginning with the word **הוי**, which word also comes before **למור להיות נומל במוכה** (compare Ab. R. N. xli.). Then follow seven beginning with **אל**, and seven with **אם**.

In the third section the regular arrangement can be recognized beginning with the maxim **אם רפית**. There are three sentences each with **אם** and **הוי**; and as many with **תחלת** and **אם**. The following sentences probably belong to section four, and concern only the conduct of the student. The paragraph beginning with the words **אל האמר איש**, which, as is to be seen from the "Siddur Rab Amram," consists of four parts, concludes the fourth section, which is the end of the "Yir'at Heṭ."

From the fourth section to the eighth is a collection of maxims arranged on the same plan. The eighth section contains eight maxims beginning with **כל**, but the initial and concluding maxims are not relevant to the proper matter of the section. The ninth section is a well-ordered collection of twenty-eight maxims arranged in four paragraphs; seven of these maxims begin with **אהוב**, seven with **הוי**, and fourteen with **אם**.

The date of composition can only be conjectured. It is almost certain that sections v.-viii. are the work of one editor, who lived after the

Date of completion of the Babylonian Talmud.
Composi- One needs only to compare the maxim
tion. **לעולם** (v. 2) with Sanh. 23a and Mek. Mishpaṭim 20 to see that the compiler

had the Talmud before him. The next maxim is a combination of 'Er. 65b and Ab. R. N., ed. Schechter, xxxii. 68. Ab. R. N. viii., **כל המתנבל** (ed. Schechter, xxii. 46), Midr. Mishle ix. 9, Pesik. viii., **כל זמן** (ed. Buber, 44b), and probably Derek Erez Rabbah were also used. As already mentioned, the Spanish version of the Halakot Gedolot, probably made about 1000, adopted these four sections as a complete treatise; hence one would not be far wrong in setting the

IV.—34

ninth century as the date of composition. The first four sections date from a much earlier period. From their contents they may even have been an independent collection already in existence at the time of the Tannaim. At any rate this collection contains much that is old, even if it can not be proved that the "Megillat Ḥasidim," which is cited in Abot de-Rabbi Nathan (ed. Schechter, xxvi. 52), is identical with the treatise under discussion.

The ninth section, originally, perhaps, a small collection of maxims, is more modern than the first and older than the second part of the treatise. The conclusion of the ninth chapter, which treats of peace, caused the insertion in the Talmud of a Section on Peace ("Perek ha-Shalom"), in which various sayings concerning peace, taken from different Midrashim, especially from the Midrash to Num. vi. 26, are placed together. This tenth (supplementary) section is comparatively a very late product, and is not found in Maḥzor Vitry, in Halakot Gedolot, nor in the MSS.

The Abot excepted, this treatise is the only collection of precepts from the period of the Talmud and the Midrashim, and is therefore of great importance in any estimate of the earliest ethical views of the old rabbis.

Treatise. Zunz appropriately characterizes the treatise: "The Derek Erez Zuta, which is meant to be a mirror for scholars, is full of high moral teachings and pithy worldly wisdom which philosophers of to-day could study to advantage." The treatise deals mainly with man's relation to man, and is moral rather than religious in nature. A few quotations from it will illustrate its character: "If others speak evil of thee let the greatest thing seem unimportant in thy eyes; but if thou hast spoken evil of others, let the least word seem important" (i.). "If thou hast done much good let it seem little in thy eyes, and say: 'Not of mine own have I done this, but of that good which has come to me through others'; but let a small kindness done to thee appear great" (ii.).

The treatise was much read, and the fact that it went through so many hands partly accounts for the chaotic condition of the text. Scholars of the eighteenth century did much, by means of their glosses and commentaries, toward making possible an understanding of the text, but a critical edition is still needed.

DERELICTS: Things that have been abandoned ("res nullius" in the Roman law). The Talmud treats of four kinds of things that have no owner: (1) Seas, rivers, brooks, the desert (which can not be subjected to ownership), and all they contain; also wild beasts wherever found. (2) Things declared by the owner to be derelict (**הפקר**). (3) The property of a convert who dies without leaving issue "begotten in holiness." (4) Land sold by a

Gentile to an Israelite, for which he has been paid, but for which he has not executed a deed (this last class is questioned).

He who devotes anything as a derelict can not put any limitations upon it. Like the fruits of the seventh year, it must be as free to the rich as to the poor. And as long as no one has, by occupation, made the derelict his own, the former owner can recover it (Ned. 44a).

The fourth kind is a subject of dispute in the Talmud. It originated in the Persian law, which recognized no transference of immovable property without a deed; which practise became recognized in Jewish law. It was argued: "The law of the kingdom is law"; the Gentile has conveyed no title to the Israelite purchaser, but as he has been paid for his land, his own title is gone; the land is therefore derelict. Hence the first Israelite who can acquire it by occupancy will be recognized as its owner. However, this very maxim, "The law of the kingdom is law," seems to have been quoted on the other side of the question (B. B. 54b). It must also be observed that, according to some interpreters of the Talmud, the third owner could not make his claim valid before he paid to the Israelite who had bought the land from the Gentile all of the money which he had expended.

Seas and rivers excepted, anything, whether movable or immovable, coming within these four classifications may be acquired by occupancy, and not otherwise. The lawfulness of fishing and hunting rests on the position that fish in open waters, and wild beasts or fowl everywhere, are "res nullius," and as such belong to the first occupant. But fish in an artificial pond ("bibarin"; Latin, "vivarium") are private property; to take them without the consent of the owner is robbery; and it is robbery likewise to take game out of a net or trap which has been set by another, even if it be in the desert (B. K. 81a).

To hunt upon the field of another may be morally wrong, and the hunter is responsible for all damage done; but the wild beasts he catches or kills belong to him (compare, however, FINDER OF PROPERTY). Fish that jump from the water into a ship or boat belong to the owner thereof (B. M. 9b). Other ownerless movable things, including tame beasts, belong to him who takes possession in a way that would give title to a purchaser, according to the nature of the thing to be acquired (see ALIENATION AND ACQUISITION).

When a debt or a deposit has for any reason become ownerless, the debtor or depositary is freed from all liability, being naturally the first occupant. For a like reason bondmen or bondwomen declared by their owners as derelict become their own masters—that is, they become free; but if under age, they become the property of the first occupant, like goods or tame beasts.

The occupation of derelict land must have the same character in each of the three cases. To seize a deed for the land gives no title except to the parchment on which it is written. Such occupation of land as is defined under ALIENATION is generally good enough; but where a field or other parcel of land is separated from other parts of the same estate,

even by a foot-path, the actual occupation of one can not by a declaration in words be extended to the other. The mere perceiving of fruits, or the taking of fallen trees, is not deemed occupancy of the soil. Plowing, or sticking a spade or pick into the ground, or sowing seed and covering it with earth, is effective. To erect posts or doors on the ground gives title; living in a house, or building something in the house above the ground, does not. The reason for these technical distinctions is this: that there is no contract, written or oral, to impress a meaning on the acts of occupation; hence they can not be extended beyond the very thing which they touch (B. B. 54a, b).

Issur, the convert, father of Rab Mare, a Babylonian teacher, is an example of a convert having no son "begotten in holiness." The difficulty with which he transmitted to his son money on deposit is described in B. K. 87a.

DERENBURG (DERENBOURG): A Franco-German family of Orientalists. Their original home was Derenburg, a town near Halberstadt, Saxony, whence they moved successively to Offenbach, Frankfort-on-the-Main, and Mayence. Concerning **Jacob Derenburg**, the first known member of the family, nothing is ascertainable. His son, **Hartwig (Zebi-Hirsch) Derenburg**, was the author of a comedy, "Yoshebe Tebel" (Inhabitants of the Universe), written in imitation of the "La-Yesharim Tehillah" of Moses Hayyim Luzzatto, and published in Offenbach in 1789. He moved to Mayence about this time, as is shown by the fact that he calls himself in his preface "tutor in the family of Mdm. Brendeli, widow of Beer Hamburg, in Mayence." The play was dedicated to "the philanthropist and scholar Solomon Fürth of Frankfort-on-the-Main," of whose son Derenburg had been teacher. Derenburg was buried in Mayence, but his tombstone gives no information regarding the date of his death.

The "Yoshebe Tebel" consists of a dialogue in which eight characters hold converse with one another, each of them in turn representing one of the capital sins, which the adjuster of wrongs, the "Prince of Peace" ("Sar Shalom"), representing the pastor of the community, condemns. Hartwig Derenburg abstains from mentioning names, as, in 1803, did Goethe in his "Natürliche Tochter." But as, in the case of Goethe, the originals of the characters which he put upon the stage under the veil of anonymity could be identified, so the contemporaries of Derenburg must have recognized the members of the Jewish congregation in Mayence to whom the "Prince of Peace" (R. Noah Hayyim Hirsch) had addressed a well-deserved rebuke. The "Yoshebe Tebel" was the author's sole production of this nature.

Hartwig's eldest son, **Jacob Derenburg**, born at Mayence in 1794, was a lawyer; his youngest son was the French Orientalist **Joseph (Naftali) Derenburg**, born at Mayence, France, Aug. 21, 1811; died at Bad-Ems, Germany, July 29, 1895. To the age of thirteen Joseph's education was confined exclusively to rabbinical studies. When sufficiently prepared, Joseph entered the gymnasium

in Mayence, and then attended lectures in the University of Giessen, and afterward in that of Bonn, where he studied Arabic under Freytag. It was principally due to his intimate friendship with Abraham Geiger that he did not entirely drift into the domain of Semitic philology, but remained faithful to Jewish science.

Abandoning the idea of becoming a rabbi, and having obtained his Ph.D. degree, Joseph in 1834 left Bonn for Amsterdam, where he accepted a position as tutor with the Bischoffsheim family. When in 1838 his pupil Raphael Louis BISCHOFFSHEIM went to Paris to study at the Ecole Centrale, Joseph accompanied him, and took up his abode

Joseph Derenbourg.

in Paris. In 1841 he became associate proprietor of the Pension Coutant, and directed the religious and moral instruction of the Jewish pupils. A few months after his marriage (1843) he regained his French nationality, and, having previously spelled his name "Derenburg" (and later "Dernburg"), he called himself thenceforth Joseph Derenbourg. After teaching German at the Lycée Henri IV. in 1851, he was appointed proof-reader of Oriental texts at the Imprimerie Impériale (1852). In 1857 he established a private college, and remained at its head until 1864. In 1869 he became chevalier of the Legion of Honor, and was elected (Dec. 22, 1871) member of the Académie des Inscriptions et Belles-Lettres. If nominally he was the successor to Caussin de Perceval, his former teacher of Arabic, in reality he was called to fill the place left vacant by the death of Salomon MUNK (Feb. 7, 1867). He had already (May 3, 1868) succeeded the latter, who had been an intimate friend of his, as member of the central committee of the Alliance Israélite Universelle, of which he later became a vice-president. From 1869 to 1872 he was a member of the Consistoire Israélite de Paris. In 1877 an eye affection compelled him to resign his position at the Imprimerie Nationale; but immediately after this he was appointed professor of rabbinical Hebrew at the Ecole des Hautes Etudes.

The following are Joseph Derenbourg's principal works, no mention being made of a number of articles which appeared in the "Comptes Rendus de l'Académie des Inscriptions et Belles-Lettres," the "Journal Asiatique," the "Revue Critique," Geiger's "Jüdische Zeitschrift," the "Revue des Etudes Juives," Grätz's "Monatsschrift," etc.:

- "Maimonides," in Geiger's "Wiss. Zeit. Jüd. Theol." i. (1835).
- "Sur le Dernier Repas Pascal de Jesus," in "Orientalia," i., Amsterdam, 1840.
- "Les Séances de Hariri," with a commentary by Silvestre de Sacy; 2d ed. revised and supplemented with historical and explanatory notes, Paris, 1847-51, preface by Reinaud.

- "Les Fables de Loqman le Sage," Berlin and London, 1850.
 - "Les Inscriptions de l'Alhambra," appendix to Girault de Prangey's "Essai sur l'Architecture des Arabes et des Maures en Espagne," Paris, 1851.
 - "Essai sur l'Histoire et la Géographie de la Palestine d'Après les Thalmuds et les Autres Sources Rabbiniques: I., Histoire de la Palestine," Paris, 1867.
 - "Manuel du Lecteur, d'un Auteur Inconnu," reprinted from "Journal Asiatique," 1870.
 - "Opusculs et Traités d'Aboû l-Walid Merwan ibn Djanâh de Cordoue" (with Hartwig Derenbourg), Paris, 1880.
 - "Deux Versions Hébraïques du Livre de Kalilah et Dimnah," Paris, 1881.
 - "Talmud," in the "Encyclopédie des Sciences Religieuses," by Lichtenberger, xii., Paris, 1882.
 - "Etudes sur l'Epigraphie du Yémen" (with Hartwig Derenbourg), in the "Journal Asiatique" for 1882-84.
 - "Les Monuments Sabéens et Himyarites du Louvre" (with Hartwig Derenbourg), Paris, 1885.
 - "Les Inscriptions Phéniciennes du Temple de Seti à Abydos" (with Hartwig Derenbourg), Paris, 1885.
 - "Le Livre des Parterres Fleuris," Hebrew grammar in Arabic, by Abu al-Walid Merwan ibn Janah, Paris, 1886, the text published in anonymous conjunction with W. Bacher.

S. R. D.

Derenbourg, Hartwig: French Orientalist; son of Joseph Derenbourg; born in Paris June 17, 1844. He attended the lycées Charlemagne and Bonaparte (now Condorcet). He studied Hebrew, Arabic, and other Semitic languages under Reinaud, Ullmann, chief rabbi of France, and his father, in Paris; under Ewald, Bertheau, and Wüstenfeld, in Göttingen; under Fleischer and Krehl, in Leipsic. In 1866, after taking his degree in Göttingen, he was engaged at the Bibliothèque Impériale, continuing the preparation of the catalogue of Arabic manuscripts, discontinued since 1859. His father-in-law, Hermann Joseph Baer, the well-known bookseller of Frankfort-on-the-Main, placed him in 1871 at the head of the Paris branch of his house. In 1875 he received two almost simultaneous calls: one as professor of Arabic and

Hartwig Derenbourg.

Semitic languages to the Jewish Theological Seminary of Paris, and the other as instructor in Arabic grammar to the Ecole Speciale des Langues Orientales Vivantes. In April, 1879, he was called to occupy, at the latter institution, the chair of literary Arabic, which had been vacant since Reinaud's death in 1867.

In 1880 the minister of public instruction entrusted him with the investigation of the Arabic manuscripts in the Escorial and in the other libraries of Spain. On his return Ernest Renan had Derenbourg made assistant to the commission upon Semitic inscriptions at the Académie des Inscriptions et Belles-Lettres, being especially entrusted, under the direction of his father, Joseph Derenbourg, with the Himyaritic and Sabeian section. In 1884 he was appointed professor of Arabic at the Ecole des Hautes-Etudes, and in 1885 professor of Islamism and of the religions of Arabia in the religious section of the same school.

In Feb., 1897, he was decorated with the cross of the Legion of Honor, and in June, 1900, he was elected member of the Institute (Académie des Inscriptions et Belles-Lettres). He was also honorary member of the Academy of History in Madrid, of the Institut Egyptien in Cairo, of the Society of Biblical Archeology in London, and a member of many other scientific societies.

Hartwig Derenbourg took a lively interest in Jewish affairs. He was a member of the central committee of the Alliance Israélite Universelle and of the council of the Société des Etudes Juives, having become its president in 1890; and continual vice-president of the administrative board of the Ecole de Travail Israélite. He was, further, one of the founders and directors of the Grand Encyclopédie.

The following is a list of his principal works:

- "De Plurilibus Linguae Arabicæ," Göttingen, 1867.
- "Quelques Observations sur l'Antiquité de la Déclinaison dans les Langues Sémitiques," Paris, 1868.
- "Le Divân de Nâbîga Dholiyânî," Paris, 1869.
- "Catalogue des Manuscrits Arabes de la Bibliothèque Impériale," 4 vols., 1866-70.
- "Notes sur la Grammaire Arabe," Paris, 1869-71.
- "Histoire Littéraire de l'Ancien Testament," translated from the German of Nöldeke in collab. with Jules Soury, Paris, 1873.
- "Le Livre de Sibawaihi," 2 vols., Paris, 1881-89.
- "Les Manuscrits Arabes de l'Escorial," i., Paris, 1884; ii., Part I., *ib.*, 1899.
- "Chrestomathie Élémentaire de l'Arabe Littéral" (with Jean Spiro), Paris, 1885; 2d ed., Paris, 1892.
- "La Science des Religions et l'Islamisme," Paris, 1886.
- "Ousâma Ibn Mounkidh," the Arabic text of his "Autobiography," Paris, 1886, French transl. 1895.
- "Souvenirs Historiques et Récits de Chasse" (French translation of Ousâma's "Autobiography"), Paris, 1895.
- "Silvestre de Sacy, Une Esquisse Biographique," Leipsic, 1886; Paris, 1892 and 1895; Cairo, 1903.
- "Yemen Inscriptions," the Glaser collection in the British Museum, London, 1888.
- "Catalogue des Manuscrits Judaïques Entrés au British Museum de 1867 à 1890," Paris, 1891.
- "Les Monuments Sabéens et Himyarites de la Bibliothèque Nationale, Cabinet des Médailles et Antiques," Paris, 1891.
- "Une Epitaphe Minéene d'Egypte," two memoirs, Paris, 1893 and 1895.
- "Ibn Khâlawaihi, Livre Intitulé Lalsa," in "Hebraica," 1894-1901 (unfinished).
- "Al-Fakhri d'Ibn Tiktakâ," a new edition of the Arabic text, Paris, 1895.
- "Les Croisades d'Après le Dictionnaire Géographique de Yakout," Paris, 1895.
- "Oumâra du Yémen, Sa Vie et Son Œuvre," Paris, 1897-1903.

"Les Monuments Sabéens et Himyarites du Musée d'Archéologie de Marseille," Paris, 1899.

"Corpus Inscriptionum Semiticarum; Pars Quarta, Inscriptiones Himyariticas et Sabæas Continentes," iii., Paris, 1900.

"Les Manuscrits Arabes de la Collection Schefer à la Bibliothèque Nationale," Paris, 1901.

"Notice sur la Vie et les Travaux de Maximin Deloche," Paris, 1901; 2d ed., Tulle, 1902.

"Michele Amari, la Vie d'un Historien et Orientaliste Italien," Paris, 1902.

"Nouvelles Inscriptions Yéménites Inédites," Paris, 1902.

To this list must be added numerous articles which appeared in the "Journal des Savants," the "Journal Asiatique," the "Revue Critique," the "Revue des Etudes Juives," the "Revue d'Assyriologie et Archéologie Orientale," the "Revue de l'Histoire des Religions," etc. He died April 12, 1908.

S.

DERNBURG, HEINRICH: German jurist; born at Mayence March 3, 1829; brother of Friedrich Dernburg. The Dernburgs are related to the French family of Derenbourg, which, before its settlement in France, was called "Dernburg" (see DERENBURG). Dernburg was educated at the gymnasium of Mayence and the universities of Gießen and Berlin, graduating from the latter in 1851. In the same year he became privat-docent of the juridical faculty of the University of Heidelberg. In 1852 he was called to Zurich as assistant professor, and was appointed professor in 1855. In 1862 he accepted a similar position in the University of Halle, which he represented in the Prussian Herrenhaus (Upper House) from 1866 to 1873, when he became professor of Roman and Prussian law in the University of Berlin. He reentered the Herrenhaus in 1873. With Brinckmann and others he founded in 1851 the "Kritische Zeitschrift für die Gesamte Rechtswissenschaft."

Among his works may be mentioned: "Geschichte und Theorie der Kompensation," Heidelberg, 1854; 2d ed., 1868; "Das Pfandrecht," Leipsic, 1860-64; "Die Institutionen des Gaius, ein Kollegienheft aus dem Jahre 161 nach Christi Geburt," Halle, 1869; "Lehrbuch des Preussischen Privatrechts und die Privatrechnormen des Reiches," *ib.* 1871-80; "Das Vormundschaftsrecht der Preussischen Monarchie," Berlin, 1875; 3d ed., edited by Schultzenstein, 1886; "Das Preussische Hypothekenrecht" (with Hinrichs), Leipsic, 1877-91; "Pandekten," *ib.* 1884-87; 6th ed., 1900-01; "Die Königliche Friedrich-Wilhelms-Universität Berlin in Ihrem Personalbestande seit Ihrer Einrichtung bis 1885," *ib.* 1885; "Das Bürgerliche Recht des Deutschen Reiches und Preussen," Halle, 1898-1900.

The father of Dernburg and his whole family became Christians.

DERUSH. See HOMILETICS and MIDRASH.

DERZHAVIN, GAVRIIL ROMANOVICH: Russian poet and senator; born at Kazan July 15, 1743; died at Zvanka, government of Novgorod, July 20, 1816. In 1799 Derzhavin was commissioned by Emperor Paul to investigate a complaint made by the Jews of Shklov against General Zorich, the

owner of that town. The latter was accused by them of oppression and extortion; and it became the duty of Derzhavin to assume the guardianship of Zorich's estate, and to sift the matter thoroughly. During his stay in Shklov the dissensions between the sects of Mitnagdim and Hasidim were very bitter, passions rose high, and unfounded accusations were made. Under such conditions much transpired that was not creditable to the Jewish community, and undoubtedly Derzhavin noted it. The Jews were encouraged in their complaint by Kutaisov, a favorite of the czar. Kutaisov desired to get possession of Zorich's estate; and he knew that by proving the accusations against Zorich the estate would be confiscated and sold at auction. Derzhavin realized this; but, although on terms of friendship with Kutaisov, he was loath to become the means of helping him. Derzhavin's scruples combined with the dissensions among the Jews prejudiced the poet against them; and notwithstanding the evident abuse by Zorich of his prerogative, and in spite of the undoubted truth of many accusations against Zorich, Derzhavin reported in his favor, and he was acquitted.

In the following year Derzhavin was again sent to White Russia, in order to investigate the causes of a famine there, and to formulate a plan for aiding the starving peasants. He was commissioned at the same time to study the economic condition of the Jews in that region, and to present a report on the subject, with suggestions as to the measures to be taken

Report on Jews of White Russia in order to eliminate the supposed harmful influence exerted by their "unscrupulous dealings" on the lower

classes of the population. Derzhavin, in collecting the materials for his report, made an extended journey through the province. In a comparatively short time he obtained from various sources—sources occasionally of doubtful value—a considerable mass of data bearing directly not only on the economic condition of the Jews of White Russia, but also on their social, communal, and religious life. In Sept., 1800, Derzhavin prepared in Vitebsk his celebrated "Mnenie ob Otvrashchenii v Byelorussii Goloda i Ustroistvye byta Yevreyev" (Opinion as to the Protection of White Russia from Famine, and on the Organization of the Status of the Jews). Looking carefully into the condition of the Jews, Derzhavin saw clearly that temporary measures would not be sufficient to remedy existing evils. The Jews of Russia were in an anomalous and unnatural condition: for the old Polish laws and those of Lithuania were defective and equivocal. When, therefore, a commission was appointed in 1804 by Alexander I. to consider remedial legislation, Derzhavin's "Opinion" had great weight with it.

Derzhavin's plan called for the creation of a protectorate over the Jews; the protector to advise the czar personally as to the best measures

Derzhavin's Opinion. to be taken for the moral uplifting of the Jew, so that he might in time be considered worthy to become a subject. Notwithstanding the more liberal attitude of Speranski, Derzhavin's "Opinion" decidedly influenced the commission. In his report

Derzhavin's prejudice against the Jews is very manifest, and is often carried to ludicrous extremes. Thus he concludes, from the custom of the Orthodox Jews of keeping their heads covered, that the Jews consider themselves "of all peoples the most excellent." He associates the frequent occurrence of certain names, such as Moses, Abraham, etc., to a desire on the part of their owners to conceal their individual identity, and states that the Jew hoards money for no other purpose than to rebuild the Temple in Palestine, whither he ever expects to return. One of the redeeming features of the "Opinion" is its recommendation of the establishment of schools for the Jews in order to facilitate their education; but even here Derzhavin insists that corporal punishment should be inflicted on the delinquents of that "stubborn race."

Nathan Nata (Notkin), a merchant of Shklov, supplied Derzhavin with much valuable information on the economic and moral condition of the Jews of White Russia, and suggested methods by which they might be made more useful citizens; e.g., by teaching them agricultural and industrial pursuits (see AGRICULTURAL COLONIES IN RUSSIA).

While Derzhavin adopted Notkin's suggestions and embodied them in his report, he nevertheless couched the whole in terms decidedly unfair to the Jews; as a result he and Notkin became estranged. That the enactment of Dec. 9, 1804, was, nevertheless, favorable to the Jews (see ALEXANDER I., PAVLOVICH), was due to Notkin's exertions. Notkin's opposition angered Derzhavin to such an extent that he called his former protégé "the Jew Notka," and even asserted that Notkin had attempted to bribe him.

DESCENT, LAW OF. See AGNATES.

DESECRATION: The act of diverting from a sacred to a common use. It was forbidden, as being an act of desecration, to use the anointing-oil of the sanctuary for common purposes, or even to prepare oil like it, or to prepare for common use incense similar to that used in the sanctuary. The punishment for any of these transgressions was excision from the people of Israel ("karet," Ex. xxx. 33, 38). All objects used in connection with the Temple service—as the utensils employed in the ritual—the sacrifices, the clothing of the attendant priests, and the building itself were considered sacred, and their use for common purposes was therefore prohibited. Any one who knowingly appropriated any of these objects for his own use was liable to the penalty of stripes; if the act was committed unwittingly, he was required to bring a sacrifice, and to pay one-fifth more than the value of the object misused (Lev. v. 14; Maimonides, "Yad," Me'ilah, i. 1, 2).

Not only could no sacred object be diverted to a common use, but it could not even be exchanged. If a man consecrated an animal that could be used as a sacrifice and then exchanged it for another, he suffered the punishment of stripes, and both animals remained sacred. It made no difference whether

the exchange was for a better or for a worse animal; the holy object could in neither case be desecrated, nor could it be used for another purpose equally sacred (Tem. 32a; Maimonides, *l.c.* iv. 11). If, however, the animal was such as could not be offered on the altar, the owner might redeem it by paying the value of the animal and an additional fifth. The same law applied to all other objects which were not of immediate use in the Temple service (Lev. xxvii. 9; "Yad," Temurah, i. 1 *et seq.*).

With regard to the use of the synagogue and its appurtenances, the Rabbis laid down the following general rule: "We may ascend with holy things, but not descend"—that is, holy objects may be used for a holier purpose, but not for one less holy (Shab. 21b). On this principle, objects used in worship were classified and graded according to their sanctity. A community might sell its synagogue and use the money in building an academy, but not the reverse. The appurtenances of the synagogue were graded as follows: the scroll of the Law; other sacred books; the mantle of the scroll; the Ark, where the scroll is deposited; the table upon which it is placed while being read; the synagogue itself being the least sacred. The money realized from the sale of a synagogue may be used in buying an Ark or a table, and so on; but the reverse is forbidden (Meg. 26a; "Yad," Tefillah, xi. 14; Shulhan 'Aruk, Oraḥ Hayyim, 153, 1). The scroll of the Law must never be sold, and when it becomes old and unfit for use, it must be placed in an earthen vessel and buried near the tomb of a scholar. Torn books or pages of books of the Scriptures, and all the accessories of holy objects, as the mantle of the scroll, the sheath of the

Worn-Out Objects to be Buried. mezuzah, the straps of the tefillin, and so forth, must not be diverted to any common use, but must be buried (see GENIZAH). Objects which are used in the performance of certain commandments, as the "sukkah" (booth), "lulab" (palm-branch), "shofar" (ram's horn), "zizit" (fringes), etc., may be thrown away after they have become useless. It is not permitted to make any use of the light of the Hanukkah candles, even for such a holy use as studying the Law (Meg. 26b; "Yad," Sefer Torah, x. 3; Oraḥ Hayyim, 154, 673, 1).

The Rabbis permitted an individual to sell the scroll of the Law only when he needed the money for the purpose of studying the Law or for the purpose of marrying; otherwise the possessor of a copy of the scroll of the Law must never sell it, even when he needs the money for the necessities of life (Meg. 27a; "Yad," Sefer Torah, x. 2; "Kesef Mishneh" *ad loc.*; Shulhan 'Aruk, Yoreh De'ah, 270, 1).

J. H. G.

DESERT. See WILDERNESS.

DESERTION: Leaving husband or wife with the intention of not returning. It must be premised that, if the husband deserted his wife and went beyond the jurisdiction of the court, he could not be compelled to give her a bill of divorce; and if he remained away and was never heard of again, the wife was never free from the bond of matrimony (see 'AGUNAH), because it was always the husband

who was presumed to grant a divorce, even though at the suit of the wife, under the order of the court.

There is no proceeding known in Jewish law analogous to a modern suit for divorce on the ground of the husband's desertion, in which the divorce is granted judicially in the absence of the husband and without his consent. Further, in Jewish law there is no presumption of death from absence. Therefore the woman who was deserted by her husband remained his wife until she received a bill of divorce from him, or until his death was legally proved.

There are cases in Jewish law which may technically be deemed cases of desertion, in which the wife was entitled to receive a bill of divorce from her husband *before* he left the jurisdiction of the court. If a wife living in a foreign country desired to remove to Palestine, or if, living in Palestine, she desired to remove to the city of Jeru-

Change of Residence. salem, and if her husband refused to accompany her or to allow her to remove, he was at her instance compelled by the court to give her a bill of divorce. If she was living in Jerusalem and he desired her to remove to a foreign country or even some other city in Palestine, or, if living elsewhere in Palestine, he desired her to remove to some foreign country, she had a right to refuse to accompany him, because she was not obliged to expatriate herself (Ket. 110b; compare DOMICIL). If she feared that he would then desert her, she could appeal to the court, and her husband would be compelled before leaving to give her a bill of divorce for the time being (Shulhan 'Aruk, Eben ha-'Ezer, 154, 8).

This divorce for desertion was granted only in the above cases, and did not apply to countries other than Palestine or to cities other than Jerusalem; and the reason for this is to be found in the special favor with which the people looked upon the Holy Land and the Holy City. They were deemed to be dwelling-places par excellence of the Jews, and this fact established the right of the wife to refuse to follow her husband in case he desired her to remove. Many authorities are therefore of the opinion that these rules did not apply after the destruction of the Temple (compare Asher ben Jehiel to Ket. 110b).

Under the later law the principle was extended; and if a man was about to leave the jurisdiction of the court of any country to go to another country, he was either placed under oath not to desert his wife, or, if he insisted upon going, was compelled to grant her a bill of divorce (Shulhan 'Aruk, Eben ha-'Ezer, 154, 8, 9).

Desertion by the wife occurred either if she actually abandoned her husband's domicile, or if she refused to follow her husband to another domicile. She was obliged to follow him only from one place to another in the same country, or from any other country into Palestine, or to Jerusalem from any other place in Palestine. For such desertion the husband could give her a bill of divorce, and she lost all of her property rights under the marriage contract (Ket. 110b).

An exception to this rule may be noted. If a man dwelling in one country married a woman dwelling in another, she was obliged to follow him to his

domicil; for that was an implied condition of the marriage, or perhaps may have been an expressed condition in the marriage contract. In case of her refusal to follow him, she was technically deemed guilty of desertion; and her husband could divorce her, she losing her property rights under the marriage contract. Compare DOMICIL.

D. W. A.

DESSAU: Chief town of the duchy of Anhalt, North Germany, on the left bank of the Mulde. The settlement of Jews here dates from 1621. The introduction of debased coins had ruined the finances of the duchy, and Duke Johann Casimir permitted Jews to settle at Dessau as purveyors of silver to the mint. They were forbidden to export money, and had to prevent its exportation by others. The permit was, however, of short duration. The calamities consequent upon the Thirty Years' war made it impossible to reestablish the finances of the duchy. The Jews were therefore banished. In 1672 Duke Johann Georg readmitted them; and some Jews settled at Dessau. In 1685 there were only 26 families. Moses Wulff, a descendant of Moses Isserles, banished from Berlin at the instigation of his powerful enemy, Jost Liebmann, the court factor, settled with his family at Dessau and became court

factor of Johann Georg II. Combining learning with philanthropy, and being of a religious turn of mind, he exerted his great influence for the welfare of the newly established community, which soon became a center of scientific activity. A bet ha-midrash was founded by the Wulff family. At its head was Rabbi Benjamin Wolf, author of "Ir Binjamin," who was succeeded by Isaac Itzig Gerson, or, as he later called himself, Joseph Isaac Gerson (1708-35).

After the death of Moses Wulff (1729) the material prosperity of the community (which had increased to about 700 persons) diminished. His son Elijah succeeded him in the office of court factor; but the family had become impoverished, and with it the community also declined. Still, enlightened rabbis and scholars like David Hirshel Fränkel, the rosh ha-yeshibah Hirsh, Moses Fränkel, and others, made it a center of learning; and from Dessau came Moses Mendelssohn. A source of intellectual development

for the first half of the nineteenth century was the Franzschule. Founded in 1799 as a primary school for poor children, five years later it was transformed, with the sanction of the government, into a Jewish high school. For sixty years it enjoyed the highest reputation throughout Germany. Its director, David Fränkel, and such teachers as Joseph Wolf, Gotthold Solomon, and Moses Philippson, attracted pupils from far and near.

The community of Dessau led in the struggle for the emancipation of the German Jews. A German monthly entitled "Sulamith," devoted to Jewish interests and culture, was published for eight years (1806-14) by David Fränkel and Joseph Wolf. But the Dessau-Anhalt government continued until 1848 to consider the Jews as "Schutzjuden." No foreign Jew was allowed to settle in the town without a special permit, and the Dessau Jews were restricted

to a special quarter. Even after 1848 the government endeavored to limit the right of the Jews to election to the Parliament, and maintained for a long time the oath "more Judaico." It was probably on this account that between 1850 and 1895 the Jewish population of Dessau fell from about 1,000 to 406.

During the greater part of the nineteenth century the rabbinat of Dessau was in an ex-

tremely chaotic state. Rabbi succeeded a rabbi with extraordinary rapidity; for many years the post was vacant, and the duties of the rabbinate were partially performed by the teachers of the Franzschule. The rabbis since 1870 have been: Dr. Saalfeld (1870-81); Schönberger (1881-84); Dr. Samson Weisse (1884-1893); Dr. Max Freudenthal (1893-1900); Dr. Isidor Walter (1900). In 1886 the government issued regulations concerning Jewish worship, according to which a chief rabbi for Anhalt, with his seat at Dessau, was to be nominated and supported by the government.

Dessau possesses an imposing synagogue in the Oriental style (restored in 1861), and a monument to Moses Mendelssohn erected on the centenary of his death.

—**Typography**: A Hebrew printing-office was established at Dessau in 1694 by court factor Moses Benjamin Wulff. The privilege obtained for this purpose included both Hebrew and German, but Wulff availed himself only of the former, the enterprise not being undertaken with a desire for gain, but to conserve and advance Jewish learning. The first work published by him (1696) was a ritual entitled "Tefillah le-Mosheh," to which were appended prayers for women in Judæo-German, entitled "Min-hat 'Ani." The type for the Judæo-German was set up by a girl of nine years—Ellah, daughter of Moses of Holland. In 1704 the work of the press was suspended, owing to the great losses Wulff had sustained in his transactions with the court of Gotha. His son Elijah reestablished the office in 1742, but discontinued it in 1743. The first work issued by the latter was the Sifra with a commentary, "Korban Aharon," by Aaron ben Hayyim; the last was the "Korban ha-'Edah," on the Jerusalem Talmud, by David Fränkel. In 1783 another office was established by C. Schilder, which continued into the second half of the nineteenth century.

DESSAU, MOSES. See MENDELSSOHN, MOSES.

DESSAU, MOSES B. MICHAEL: Talmudist of the eighteenth century; called "Dessau" after the town in which he lived. He is the author of (1) novellæ published in 1724—haggadic annotations to the Talmudic tractates Berakot, Shabbat, and Kidushin, and halakic novellæ to Pesahim and Ketubot; and (2) "Zikron Mosheh" (Memorial of Moses), published in 1765—novellæ on various haggadic and halakic subjects. He also edited and annotated "Sha'are Dura" (Gates of Dueren), by Isaac b. Meir of Dueren.

DESSAU, WOLF. See WOLF B. JOSEPH OF DESSAU.

DESSAUER, FERDINAND (DESSOIR, FERDINAND AUGUST): German actor; son of Leopold DESSAUER; born at Breslau Jan. 29, 1836; died in Dresden April 15, 1892. He was trained for the stage by Werner Mannheim, and made his début in 1852 as the *Prince* in "Dorf und Stadt." In the following year he went to Mayence, where he remained until 1855, when he appeared at Heidelberg. Vienna was his next engagement, in 1856; followed in 1857 by Stettin; 1857–61, Leipzig; 1861–63, Bremen; 1863–64, Weimar. From 1864 to 1867 he played at the Hoftheater, Berlin; after which he returned to Weimar, in 1868. He next went to the Lobetheater, Breslau, in 1868–69. The following seven years were spent at the Hoftheater, Dresden; from 1877 to 1878 at the Thalia Theater, Hamburg; from 1878 to 1879 at the Residenz Theater, Dresden; and in 1880 he played at Prague.

Dessauer became insane during a performance, and never acted again. His principal rôles were *Kaufmann Bloom*, *Mephisto*, *Falstaff*, *Muley Hassan*, *Riccaut*, *Chalisac*, and *Hans Lange*.

DESSAUER, GABRIEL L.: Hungarian rabbi and author; born at Neutra, Hungary, in 1805; died June 1, 1878. He became a pupil of R. Moses Sopher (Schreiber) at Presburg, and was for forty years rabbi at Balaton-Kojár, on the Plattensee, where he died. He published the following works: "Das Buch Hiob: Uebersetzt und Commentirt," Presburg, 1838; "Yad Gabriel" (Gabriel's Hand), novellæ about the slaughtering of animals as contained in the ritual codex in Shulhan 'Aruk, Yoreh De'ah, *ib.* 1838; "Ha-Ariel," a commentary on the Talmudic utterances of R. bar bar Hana, Budapest, 1859; "Shire Zimrah," to a part of Genesis, an appendix to Hartwig Wessely's "Shire-Tif'eret," with a commentary entitled "Degel ha-Lewi"; finally, "Homiletische Skizzen," Ofen, 1862.

M. K.

DESSAUER, JOSEF: German composer; born at Prague May 28, 1798; died at Mödling, near Vienna, July 8, 1876; a pupil of Tomaczek (piano) and Dionys Weber (composition). In compliance with the wishes of his parents, Dessauer first devoted himself to a mercantile career. At the age of twenty-three, upon one of his commercial tours, he visited Italy, where his musical bent received a powerful stimulus.

In 1821, owing to the favorable reception accorded at Naples to several of his canzonettas and other vocal compositions, Dessauer determined to devote himself exclusively to composition. He settled in Vienna, from which city he made numerous European tours to introduce his compositions; and his songs, which were distinguished by considerable melodic beauty, soon secured for him international fame. In the "Hofmeister Catalogue" for 1844 nearly seventy of these canzonettas, ariettas, etc., are enumerated.

Less successful were his operas, "Lidwinna" (Prague, 1836), "Ein Besuch in Saint-Cyr" (Dresden, 1838), "Paquita" (Vienna, 1851), "Domingo" (1860), and "Oberon" (not performed). Neither these nor his instrumental works are now performed; only a few of his songs, such as the well-known air "Scheiden und Meiden," having maintained their popularity and being still reprinted. The Schlesingers of Berlin, who included most of these compositions in their catalogue for 1900, publish the following list: "3 Slavische Lieder"; "9 Wanderlieder von Umland" ("Lebewohl," "Scheiden und Meiden," "In der Ferne," "Morgenlied," "Nachtreise," "Winterreise," "Abreise," "Einkehr," "Heimkehr"); and two song collections of ten numbers each, including "Verschwiegenheit," "Das Gebet," "Wie glücklich," "Am Strande," "Ich Denke Dein," "Das Zerbrochene Ringlein."

DESSAUER, JULIUS: Hungarian writer; son of Gabriel L. Dessauer; born at Neutra 1832. He was for some years rabbi at Ujpest. He has published the following works: "Die Fünf Bücher Moses. Nebst dem Raschi-Commentar, Punktirt, Leichtfasslich Uebersetzt und mit Anmerkungen versehen," Budapest, 1863; 2d ed., 1887; "Schulchan Aruch, Orach Hayyim, Deutsch Bearbeitet," in two parts, *ib.* 1868; "Spruch-Lexikon des Talmud und Midrash," *ib.* 1876; "Schlüssel zum Gebetbuche," *ib.* 1878; "Perlenschatz: Philosophische Sentenzen in Alphabetischer Reihenfolge," *ib.* 1880; "Der Jüdische Humorist," *ib.* 1899.

M. K.

DESSAUER, LEOPOLD (DESSOIR, LUDWIG): German actor; born at Posen Dec. 15, 1810; died Dec. 30, 1874, in Berlin. Dessauer, who was known during his stage career as "Dessoir," was the son of a Jewish merchant. He made his début in the theater of his native town in 1825, playing *Nanky* in Körner's "Toni." Then he traveled about the country, appearing at Coburg, Schönebeck, Wriezen, Krossen, Wiesbaden, and Mayence, eventually playing *Tell* at Potsdam. This was the real beginning of his career, and in 1834 he went to the Stadttheater, Leipsic, where, in the following year, he married the leading woman, Theresa Reimann. The union proved an unhappy one, and in 1836 Dessauer obtained a divorce and left Leipsic for the Stadttheater, Breslau, where he remained until 1837. Two years of starring followed at Prague, Brünn, Vienna (Burgtheater), and Budapest, after which he succeeded Devrient at Karlsruhe. In 1847 he went to Berlin, where he played, with few interruptions, until July 10, 1872. In 1853 he appeared in London.

Dessauer was by many considered a greater artist than Dawison, whose most serious rival he was. The former, it is true, was handicapped by lack of figure, looks, and, to some extent, voice; yet so considerable was his talent that he was among the foremost Shakespearian actors. His *Othello*—first played at Berlin Oct. 6, 1849—*Lear*, *Shylock*, *Hamlet*, *Antony*, *Brutus*, *Coriolanus*, *King John*, *Macduff*, and *Iachimo* were classical creations. Scarcely less clever were his *Bolingbroke*, *Uriel Acosta*, *Faust*, *Tasso*, *Alba*, *Gessler*, *Narciss*, *Caligula* ("Fechter von Ravenna"); *Louis XI.* ("Gringoire"), *Perin* ("Donna Diana"), and *Marinelli* ("Emilia Galotti").

Dessauer's life was greatly embittered by his marital misfortunes, for his second wife, Helene Pfeffer, whom he married in 1844, became insane on the death of their child.

DESSAUER, MORITZ: German rabbi and author; son of Gabriel L. Dessauer; born at Balaton-Kojár, Hungary, May 24, 1842; died April 17, 1895, at Meiningen. He pursued his Talmudic studies at Vár-Palota and Stuhlweissenburg, and attended subsequently the rabbinical seminary and the university at Breslau. In 1871 he went as preacher to Köthen, becoming, in 1881, district rabbi at Meiningen. He published the following works: "Spi-

noza und Hobbes: Begründung Ihrer Staats- und Religionstheorien Durch Ihre Philosophischen Systeme," Breslau, 1868; "Daniel, in Sieben Kanzelreden für das Neujahrs- und Versöhnungsfest," *ib.* 1875; "Der Sokrates der Neuzeit und Sein Gedankenschatz: Sämmtliche Schriften Spinozas Gemeinverständlich und Kurz Gefasst," Köthen, 1878; "Der Deutsche Plato: Erinnerungsschrift zu Moses Mendelssohn's 150jährigem Geburtstage," Berlin, 1879; "Blüthen und Knospen der Humanität aus der Zeit von Reuchlin bis Lessing," Zurich, 1881; "Humanität und Judenthum," Leipsic, 1885.

DESSOFF, FELIX OTTO: German conductor and composer; born Jan. 14, 1835, in Leipsic; died Oct. 28, 1891, at Frankfort-on-the-Main; studied with Moscheles, Plaidy (piano), Hauptmann (composition), and Reitz (instrumentation) at the Leipsic Conservatory (1851-54). Graduating with high honors, he first became musical director of the Actien-theater at Chemnitz, and during the following six years successively conducted opera-orchestras in Altenburg, Düsseldorf, Cassel, Aix-la-Chapelle, and Magdeburg. In 1860, when only twenty-five years of age, he was appointed leader of the orchestra at the Imperial Opera at Vienna, and in the same year he was elected director of the famous Philharmonic concerts. Several months later he received an appointment as teacher of thorough-bass and composition in the Vienna Conservatory. From 1875 to 1881 he was court kapellmeister at Karlsruhe, and then became the first kapellmeister at the Stadttheater, Frankfort.

Dessoff was at one time perhaps the leading conductor of his day. Although not a strict adherent of the Mendelssohn school, his virtuosity, technical finish, and careful attention to detail stamped his performances as models. His influence upon the development of the Philharmonic Society can scarcely be overestimated; and it was largely due to his initiative that this important musical institution of Vienna was placed upon a secure financial and artistic basis.

DETMOLD. See LIPPE.

DETMOLD, JOHANN HERMANN: German diplomat; born at Hanover July 24, 1807; died there March 17, 1856. He was the son of Detmold, the court physician at Hanover, who, with his whole family, joined the Christian Church. Detmold received his education at the universities of Göttingen and Heidelberg. Admitted to the bar, he established himself as a lawyer in his native town in 1830. He took an active interest in politics as a Conservative, and in 1838 was elected a member of

the Hanoverian Diet. His opposition to the new constitution and his attacks upon the government, both in the Chamber and in the press, led to a brief imprisonment. In 1848 he was elected to the German Parliament sitting at Frankfort-on-the-Main, where he allied himself with the deputies of the Right. He remained an uncompromising reactionist. In 1848, after the refusal of Frederick William IV. to accept the German crown, he became secretary of justice, and soon afterward was appointed secretary of the interior in the short-lived German government. When the "Reichsverweser" in 1849 dismissed the government, Detmold returned to Hanover, but was again sent to Frankfort, this time as representative of the King of Hanover, with the title of "Legationsrat." He held the position until 1851, when he was recalled. The last years of his life were spent in Hanover.

During his juridical and diplomatic career Detmold found time for the cultivation of the arts, the last five years of his life being especially devoted to artistic interests. He was a fluent speaker and writer, and his political controversies developed a considerable power of satire and invective.

Detmold is the author of "Anleitung zur Kunstkennerschaft," Hanover, 1833; 2d ed., 1845—an incisive and witty criticism of artistic conditions in Hanover; "Randzeichnungen," Brunswick, 1843—a political essay; "Thaten und Meinungen des Herrn Piepmeyer," Frankfort-on-the-Main, 1849—a satirical pamphlet on the politics of the Frankfort Parliament.

DETMOLD, SAMUEL: Austrian educator and translator; lived at the end of the eighteenth and in the first half of the nineteenth century. He was one of the collaborators on the German translation of the Bible which was published by a number of the "Meassefim," Breslau, 1822-27. Detmold translated the books of Daniel, Ezra, Nehemiah, and the Chronicles. He is also the author of a Hebrew primer with the title "Moreh Derek" (Guide of the Road), Vienna, 1815.

DETROIT: Largest city in the state of Michigan. No authentic records of the settlement of Jews in the vicinity of Detroit, or in the state of Michigan, are found earlier than the middle of the nineteenth century. Even then the settlers were few in number and to a great extent interrelated. Most of them were of Bavarian stock. Among the earliest are found the names of Silberman, Hirsch, Cohen, Schloss, Bendit, Sloman, Heineman, and Kanter.

The first organization of Jews in Detroit was effected during the summer of 1850, when the Beth El Society, from which a few years later sprang Congregation Beth El, was established. Like all congregations of that period this one was Orthodox in its ritual, but it was not long before the Reform

spirit began to create divisions in the community. In 1861 a large number of the members withdrew because of the introduction of an organ and a mixed choir into the synagogue, and formed the Sha'are Zedek congregation, which is to-day the leading organization of the Orthodox Jews of the city. The pulpit of congregation Beth El has been occupied by a number of well-known rabbis, including Lieberman Adler, Isidore Kalisch, Kaufmann Kohler, Henry Zirndorf, and Louis Grossman. This congregation brought Kohler and Zirndorf to America. The present (1902) rabbi is Leo M. Franklin.

In a total population of 300,000 there are about 12,000 Jews, of whom 60 per cent are (1902) of Russian and Polish origin. Besides Temple Beth El, which is now the home of a Reform congregation, there are in the city the congregations Sha'are Zedek, Beth Jacob, Beth David, and Benai Israel, all of which worship in their own synagogues and according to the Orthodox ritual. A number of Hebrews assemble only on the holidays. Each congregation has its own cemetery. The Orthodox Jews maintain a Talmud Torah, and have recently dedicated a modern and commodious school building for that purpose.

Until the fall of 1899 there were not less than nine Jewish charitable institutions in Detroit, but at that time all except one were federated under the title "Union of Jewish Charities." This organization, with headquarters in its own building, carries on practically every branch of educational, philanthropic, and relief work. Most of the Jewish secret orders have lodges in Detroit, and there are three Jewish social clubs, the Phoenix, the Fellowship, and the Standard. The Jewish Woman's Club, with a membership of 250, does excellent educational work. The city supports a Jewish weekly, "The Jewish American," which is the organ of Temple Beth El and other congregations.

A. L. M. F.

DEUTERONOMIST: The name given by critics to the author of the discourses in Deuteronomy. See DEUTERONOMY.

DEUTERONOMY (דְּבָרִים): The fifth book of the Pentateuch, called in Hebrew "Debarim" (Words), from the opening phrase "Eleh ha-debarim"; in Rabbinical Hebrew it is known also as "Mishneh Torah." The English appellation is derived from the name which the book bears in the Septuagint (*Δευτερονόμιον*) and in the Vulgate (*Deuteronomium*); and this is based upon the erroneous Septuagint rendering of "mishneh ha-torah ha-zot" (xvii. 18), which grammatically can mean only "a repetition [that is, a copy] of this law," but which is rendered by the Septuagint *τὸ Δευτερονόμιον τοῦτο*, as though the expression meant "this repetition of the law." While, however, the name is thus a mistranslation, it is not inappropriate; for the book does include, by the side of much new matter, a repetition or reformulation of a large part of the laws found in the non-priestly sections (known as "JE") of Exodus.

—**Biblical Data**: The book of Deuteronomy consists in the main of the discourses which Moses is represented as having delivered, immediately before his death (i. 3), on the other side of Jordan for the purpose of teaching the Israelites the laws which they

were to obey, and the spirit in which they were to obey them, when they should be settled in the Promised Land. Disregarding introductions and other subsidiary matter, the contents of the book may be summarized as follows:

Ch. i. 6-iv. 40: Moses' first discourse, consisting (i.-iii.) of a review of the providential guidance of the Israelites through the wilderness to the border of the Promised Land, and concluding (iv.) with an eloquent appeal not to forget the great truths, especially the spirituality of their God, impressed upon them at Horeb.

Ch. v.-xxvi., xxviii. 1-xxix. 1: Moses' second discourse, containing the exposition of the Deuteronomic law, and forming the central and most characteristic portion of the book. It consists of two parts: (1) ch. v.-xi., a hortatory introduction, developing the first commandment of the Decalogue, and inculcating the general theocratic principles by which Israel, as a nation, is to be governed; (2) ch. xii.-xxvi., the code of special laws, followed (xxviii. 1-xxix. 1) by a solemn rehearsal of the blessings and curses attached respectively to the observance and neglect of the Deuteronomic law.

[Ch. xxvii. consists of instructions (interrupting the discourse of Moses, and narrated in the third person) relative to a ceremony by which the nation, after entering Canaan, is to symbolize its ratification of the preceding code; see Josh. viii. 30-35.]

Ch. xxix. 2-xxx. 20: Moses' third discourse, emphasizing afresh the fundamental duty of loyalty to YHWH and the dangers of apostasy.

Ch. xxxi.-xxxiv.: Moses' last words of encouragement addressed to the people and to Joshua; his song (xxxii. 1-43) and blessing (xxxiii.); the account of his death (xxxiv.).

It is characteristic of the discourses of Deuteronomy that the writer's aim is throughout parenetic: both in the two historical retrospects (i.-iii., ix. 9-x. 11), and in passing allusions elsewhere (as xi. 2-6; xxiii. 4, 5; xxiv. 9), he appeals to history for the sake of the lessons deducible from it; and in his treatment of the laws, he does not merely collect or repeat a series of legal enactments, but he "expounds" them (i. 5); that is, he develops them with reference to the moral and religious purposes which they subserve, and to the motives from which the Israelite ought to obey them. It is a further characteristic of the discourses that they are, in both the historical and the legal parts, dependent upon the narrative and laws, respectively, of JE in Exodus and Numbers; entire phrases from the earlier document being frequently embedded in them (compare Deut. i. 53, 35, 36 with Ex. xiii. 21, and Num. xiv. 23, 24 respectively; and Deut. xvi. 16, 19 with Ex. xxiii. 6, 8, 17).

The following is an outline of the laws in Deuteronomy, the asterisk (*) denoting those laws which are peculiar to Deuteronomy, and the

The Laws dagger († or ‡) those which differ more or less materially in their provisions in Deuteronomy from those in JE and P respectively.

For a more complete synoptical table see Driver's "Introduction to the Literature of the O. T." 7th ed., pp. 73 *et seq.*, or his Commentary on Deuteronomy, pp. iv. *et seq.*

i. Religious Observances:

1. Law of single sanctuary, xii. 1-28* (burnt offerings, sacrifices [i.e., peace-offerings], tithes, heave-offerings [first-fruits and other offerings from the produce of the soil], vows, free-will offerings, and firstlings, all to be offered at the central sanctuary).
2. Laws against the worship of "other gods," xii. 29-31, xiii*.
3. Sanctity of the laity, xiv. 1-21 (person not to be disfigured in mourning, xiv. 1-2; law of clean and unclean animals, xiv. 3-20; flesh of animals dying a natural death not to be eaten, xiv. 21).

4. Laws tending to ameliorate the condition of the poor, xiv. 22-xv. 18 (disposition of the charitable tithe, xiv. 22-29*; relief secured to debtors every seventh year, xv. 1-11*†; law of slavery, xv. 12-18*†).

a. Offerings and festivals (firstling males to be offered to YHWH, xv. 19-23*; regulations respecting the observance of the three annual pilgrimages, xvi. 1-17*).

ii. The Office-Bearers of the Theocracy:

1. Judges to be appointed in every city, xvi. 18*; and judgment to be impartial, xvi. 19, 20.
[Ch. xvi. 21-22, asherahs and "pillars" prohibited; xvii. 1, sacrifices to be without blemish; xvii. 2-7, an Israelite convicted of idolatry to be stoned to death*.]
2. The supreme central tribunal, xvii. 8-13*.
3. The king, xvii. 14-20 (theocratic conditions which the monarchy is to satisfy*).
4. Rights and revenues of the priestly tribe, xviii. 1-8*.
5. The prophet, xviii. 9-22* (verses 10, 11 against different forms of magic and divination—expansion of Ex. xxii. 18).

iii. Criminal Law:

1. Manslaughter and murder, xix. 1-13 (cities of refuge*).
2. Against removal of boundary-stones, xix. 14*.
3. Law of witness, xix. 15-21 (compare xvii. 6).
[Four laws designed to secure self-control and forbearance in the conduct of war, xx.* and xxi. 10-14*; compare xxiv. 5*.]

iv. Miscellaneous Laws Relating Chiefly to Civil and Domestic Life:

Symbolical rite of expiation for an untraced murder, xxi. 1-9*; primogeniture, xxi. 15-17*; treatment of an undutiful son, xxi. 18-21*; treatment of the body of a malefactor, xxi. 22-23*; lost cattle or other property to be restored to owner, xxii. 1-4; sexes not to interchange garments, xxii. 5*; mother-bird not to be taken with nest, xxii. 6, 7*; parapets on roofs, xxii. 8*; prohibition of non-natural mixtures and combinations, xxii. 9-11; law of fringes, xxii. 12; slander against a newly married maiden, xxii. 13-21*; adultery and seduction, xxii. 22-29; prohibition of marriage with stepmother, xxii. 30; conditions of admittance into the theocratic community, xxiii. 1-8*; cleanliness in the camp, xxiii. 9-14*; humanity to escaped slave, xxiii. 15-16*; religious prostitution forbidden, xxiii. 17-18*; usury (interest), xxiii. 19-20; vows, xxiii. 21-23; regard for neighbor's crops, xxiii. 24-25*; divorce, xxiv. 1-4*; pledges, xxiv. 6, 10-13; man-stealing, xxiv. 7; leprosy, xxiv. 8-9; wages of hired servant not to be detained, xxiv. 14-15; criminal's family not to be punished with him, xxiv. 16*; justice toward "stranger" (i.e., resident foreigner), widow, and orphan, xxiv. 17-18; gleanings, xxiv. 19-22; limit to stripes, xxv. 1-3*; ox not to be muzzled while threshing, xxv. 4*; levirate marriage, xxv. 5-10*; modesty in women, xxv. 11, 12*; just weights and measures, xxv. 13-16; liturgical directions for the offering of first-fruits and of the triennial tithe, xxvi. 1-15*.

The moral and religious duties which form the subject of the imprecations in xxvii. 15-26 should likewise be noted, as also the injunctions occurring in other parts of the book, or introduced more or less incidentally in xii.-xxvi.—as v. 6-21 (the Decalogue, repeated, with variations in the subordinate clauses, from Ex. xx. 2-17); vi. 8 and xl. 18 (the law of frontlets); vi. 14 and xl. 16 (against "other gods"); xii. 16, 23-25, and xv. 23 (blood not to be eaten); xix. 21 ("the lex talionis").

—**Critical View: I.** If the Deuteronomic laws are compared carefully with the three codes contained in Exodus and Numbers, it will be apparent that they stand in a different relation to each:

(1) The laws in JE—namely, Ex. xx.-xxiii. (repeated partially in Ex. xxxiv. 10-26), and the kindred section, Ex. xiii. 3-16—form the *foundation of the Deuteronomic legislation*. This is evident partly from the numerous verbal coincidences referred to above—whole clauses, and sometimes even an entire law, being repeated verbatim—and partly from the fact that frequently a law in Deuteronomy consists of an expansion, or application to particular cases, of a principle laid down more briefly in Exodus (compare, for instance, Deut. xiii., xvii. 2-7, with

Ex. xxii. 20; Deut. xvi. 1-17 with Ex. xxiii. 14-17; and Deut. xviii. 10, 11 with Ex. xxii. 18). The civil and social enactments which are new in Deuteronomy make provision chiefly for cases likely to arise in a more highly organized community than is contemplated in the legislation of Ex. xx.-xxiii.

(2) With the laws contained principally in Lev. xvii.-xxvi. (the law of holiness, known as "H"), there are parallels in Deuteronomy (chiefly moral injunctions); but though in such cases the substance is often similar, the expression is nearly always different (compare, for instance, Deut. xiv. 1 with Lev. xix. 28; Deut. xvi. 19, 20 with Lev. xix. 15; Deut. xxiv. 19-22 with Lev. xix. 9, 10); and it can not be said that the legislation of Deuteronomy is in any sense an expansion or development of that in Lev. xvii.-xxvi. The one exception is the description of clean and unclean animals in xiv. 4a, 6-19a, which agrees in the main verbally with Lev. xi. 2b-20.

(3) With the ceremonial laws contained in the other parts of Leviticus, and in Numbers (P), Deuteronomy is only remotely related: there are no verbal parallels. Some of the institutions and observances codified in P are indeed mentioned, as, for instance, burnt and peace-offerings, fire-sacrifices, heave-offerings, the distinction between clean and unclean, a Torah for leprosy (xxiv. 8);

Relation to but they are destitute of the central
Other significance which they hold in the
Codes. system of P; while many of the fundamental institutions of P—as the distinction between the priests and the common Levites; the Levitical cities and the year of jubilee; the cereal-offering; the guilt- and sin-offering; the great Day of Atonement—are not referred to in Deuteronomy at all; and in the laws which do touch common ground, great, and, indeed, in some cases, irreconcilable, discrepancies frequently display themselves. Thus the Deuteronomic legislation may be termed an expansion of the body of laws contained in JE; it is, in several features, parallel to that contained in H; it contains allusions to laws similar to—it can not be said identical with—those codified in some parts of P; while its provisions sometimes differ widely from those found in other parts of P.

The Deuteronomic discourses may be said to comprise three elements—a historical, a legislative, and a parenetic. Of these the parenetic element is both the most characteristic and the most important; for it is devoted to the inculcation of certain fundamental religious and moral principles upon which the writer lays great stress. The historical element is subservient to the parenetic, the references to history, as has been already remarked, having nearly always a didactic aim. The legislative element, though obviously, in many of its features, tending directly to secure the national well-being, and possessing consequently an independent value of its own, is by the writer of Deuteronomy viewed primarily as a vehicle for exemplifying the principles which it is the main object of his book to enforce. The author wrote, it is evident, under a keen sense of the perils of idolatry; and to guard Israel against this, by insisting earnestly on the debt of gratitude and obedience which

it owes to its sovereign Lord, is the fundamental teaching of his book. Accordingly the truths on which he loves to dwell are the sole godhead of YHWH, His spirituality (Deut. iv.), His choice of Israel, and the love and faithfulness which He has manifested toward it; from which are deduced the great practical duties of loyal and loving devotion to Him, an absolute and uncompromising repudiation of all false gods, a warm and spontaneous obedience to His will, and a large-hearted and generous attitude toward men.

The central and principal discourse (v.-xxvi., xxviii.) opens with the Decalogue; and the first commandment, "Thou shalt have no other gods before me," may be said to be the text which in the rest of ch. v.-xi. is eloquently and movingly expanded. YHWH is, moreover, a spiritual being; hence no sensible representation can be framed of Him. Still less should Israel's devotions be paid to any other material object (iv. 12, 15-19). YHWH has chosen Israel; and, in fulfilment of the promises given to its forefathers, has wonderfully delivered it from its bondage in Egypt, and assigned it a home in a bounteous and fertile land, to take possession of which it is now on the point of crossing the Jordan (vi. 10, 11; viii. 7-10). In return for all these benefits it is the Israelite's duty to fear and to love YHWH—to fear Him as the great and mighty God, whose judgments strike terror into all beholders (iv. 32-36, xi. 2-7); and to love Him on account of the affection and constancy with which, even as a father, He has ever dealt with Israel. The love of God, an all-absorbing sense of personal devotion to Him, is propounded in Deuteronomy as the primary spring of human duty (vi. 5); it is the duty which is the direct corollary of the character of God and

The Love of Israel's relation to Him: the Israel-
of God. ite is to love Him with undivided affection ("with all thine heart, and with all thy soul," vi. 5; xiii. 3; xxx. 6; and elsewhere—an expression characteristic of Deuteronomy), renouncing everything that is in any degree inconsistent with loyalty to Him.

This brings with it, on the one hand, an earnest and entire repudiation of all false gods, and of every rite or practise connected with idolatry; and, on the other hand, a cheerful and ready acquiescence in the positive commandments which He has laid down. Of nothing is the Israelite more repeatedly and emphatically warned in Deuteronomy than of the temptations to idolatry, and of the perils of yielding to them. The heathen populations of Canaan are to be exterminated; no intermarriage, or other intercourse with them, is to be permitted; and their places of worship and religious symbols are to be ruthlessly destroyed (vii. 2-5; xii. 2, 3). Israel must ever remember that it is "holy" to YHWH (vii. 6; xiv. 2, 21; xxvi. 19; xxviii. 9). Canaanitish forms of divination and magic are not to be tolerated; an authorized order of prophets is to supply in Israel, so far as YHWH permits it, the information and counsel for which other nations resorted to augurs and soothsayers (xviii. 9-19). Local shrines and altars, even though ostensibly dedicated to the worship of the true God, were liable to contamination, on the part of the unspiritual Israelites, by the ad-

mixture of heathen rites; accordingly, the three great annual feasts are to be observed, and all sacrifices and other religious dues are to be rendered, it is repeatedly and strongly insisted, at a single central sanctuary, "the place which YHWH shall choose . . . to set his name there" (xii. 5-7, 11, 14, 18, 26, and elsewhere). Obedience to these commands, if it come from the heart and be sincere, will bring with it the blessing of YHWH: disobedience will end in national disaster and exile (vi. 14-15, vii. 12-16, viii. 19, and especially xxviii.).

The practical form which devotion to YHWH is to take is not, however, to be confined to religious duties, strictly so called. It is to embrace also the Israelite's social and domestic life, and it is to determine his attitude toward the moral and civil ordinances prescribed to him. The individual laws contained in ch. xii.-xxvi. are designed for the moral and social well-being of the nation; and it is the Israelite's duty to obey them accordingly. Love of God involves the love of one's neighbor, and the avoidance of any act which may be detrimental to a neighbors' welfare. The Israelite must comport himself accordingly. Duties involving directly the application of a moral principle are especially insisted on, particularly justice, integrity, equity, philanthropy, and generosity; and the laws embodying such principles are manifestly of paramount importance in the writer's eyes. Judges are to be appointed in every city, who are to administer justice with the strictest impartiality (xvi.

Love of 18-20). Fathers are not to be con-
Neighbors. demned judicially for the crimes of their children; nor children for the crimes of their fathers (xxiv. 16). Just weights and measures are to be used in all commercial transactions (xxv. 13-16); grave moral offenses are punished severely; death is the penalty not only for murder, but also for incorrigible behavior in a son, for unchastity, for adultery, and for man-stealing (xxi. 18-21, xxii. 20-27, xxiv. 7).

But the author's ruling motive is humanity, wherever considerations of religion or morality do not force him to repress it. Thus philanthropy, promptitude, and liberality are to be shown toward those in difficulty and want—as the indigent in need of a loan (xv. 7-11); a slave at the time of his manumission (xv. 13-15); a fugitive (xxiii. 15, 16); a hired servant (xxiv. 14, 15); the "stranger [*i.e.*, resident foreigner], the fatherless, and the widow" (xiv. 29, and frequently elsewhere). Gratitude and a sense of sympathy, evoked by the recollection of Israel's own past, are frequently appealed to as the motives by which the Israelite should in such cases be actuated (x. 19, "For ye were strangers in the land of Egypt"; xv. 15; xvi. 12; xxiv. 18, 22, "and thou shalt remember that thou wast a bondman in the land of Egypt"). A spirit of forbearance, equity, and regard for the feelings or welfare of others underlies also many of the other regulations of Deuteronomy. Nowhere else in the Old Testament does there breathe such an atmosphere of generous devotion to God and of large-hearted benevolence toward men; nowhere else are duties and motives set forth with deeper feeling or with more moving eloquence; and nowhere else is it shown so fully how high and

noble principles may be made to elevate and refine the entire life of the community.

The Song of Moses, contained in chap. xxxii. 1-34, is a didactic poem, the aim of which (verses 4-6) is to exemplify the rectitude and faithfulness of YHWH as manifested in His dealings with a corrupt and ungrateful nation. Looking back upon the past, the poet, after the exordium (verses 1-3), describes, first, the providence that had brought Israel safely through the wilderness, and planted it in a land blessed abundantly by the goodness of YHWH (verses 7-14); secondly, Israel's ingratitude and lapse into idolatry (verses 15-18), which had obliged YHWH to threaten it with national disaster, and to bring it almost to the verge of ruin (verses 19-30); and thirdly, YHWH's determination not to allow an unworthy foe to triumph over His people, but by speaking to them through the extremity of their need to bring them to a better mind, and so to make it

Song and possible for Himself to interpose and
Blessing of save them (verses 31-43). The thought
Moses. underlying the poem is thus the rescue of the people, by an act of grace, at the moment when annihilation seems imminent. The author develops this theme with a glow of impassioned earnestness, and also with great literary and artistic skill.

Chap. xxxiii. contains the "Blessing of Moses," consisting of a series of benedictions, or eulogies, pronounced upon the different tribes (Simeon excepted), with an exordium (verses 2-5) and a conclusion (verses 26-29). The method of the author is to signalize some distinctive feature in the character, or occupation, or geographical situation of each tribe, with allusion, by preference, to the theocratic function discharged by it, and at the same time to celebrate the felicity, material and spiritual, of the nation as a whole, secured to it originally by YHWH's goodness in the wilderness (verses 2-5), and maintained afterward, through the continuance of his protecting care, in Canaan (verses 26-29). In general character it resembles the blessing of Jacob (Gen. xlix. 1-27); but if the two be compared attentively, there will be seen to be some noticeable points of difference. The most salient features in Deut. xxxiii. are the isolation and depression of Judah (verse 7; contrast the warm eulogy in Gen. xlix. 8-12), the honor and respect with which Levi is viewed (verses 8-11; contrast the unfavorable terms of Gen. xlix. 5-7), the strength and splendor of the double tribe of Joseph (verses 13-17; compare Gen. xlix. 22-26, with which there are some verbal resemblances), and the burst of grateful enthusiasm with which the poet celebrates the fortune of his nation, settled and secure, with the aid of its God, in its promised home. The tone of the blessing is very different from that of the song (xxxii.): the one reflects national happiness; the other, national disaster. The two, it is evident, must have been composed at times in which the circumstances of the nation were very different.

It is the unanimous opinion of modern critics that Deuteronomy is not the work of Moses, but that it was, in its main parts, written in the seventh century B.C., either during the reign of Manasseh, or during that of Josiah (but before his eighteenth year, the Book of the Law found in that year in the

Temple [see II Kings xxii.-xxiii.] clearly containing Deuteronomy, if indeed it included anything more).

The reasons for this conclusion, stated here in the briefest outline, are as follows: (1) Even upon the assumption that JE in Exodus and Numbers is Mosaic, the historical discrepancies in Deut. i.-iv. and ix.-x., and the terms in which incidents belonging to the fortieth year of the Exodus are referred to, preclude the possibility of Deuteronomy being Mosaic likewise; while the use of the expression "beyond Jordan" in i. 1, 5; iii. 8; iv. 41, 46, 47, 49, for eastern Palestine, implies that the author was a resident in western Palestine. (2) The same conclusion follows, a fortiori, for those who allow that JE is a post-Mosaic document, from the fact, noticed above, that JE itself, both in the narrative parts and in the laws, is repeatedly quoted in Deuteronomy. (3) In Deuteronomy it is strictly laid down that sacrifice is to be offered at a single central sanctuary (xii. 5, 11, 14, etc.); whereas in Joshua to I Kings vi. sacrifices are frequently described as offered in various parts of the land (in accordance with the law of Ex. xx. 24), without any indication on the part of either the actor or the narrator that a law such as that of Deuteronomy is being infringed. (4) The other differences between the legislation of Deuteronomy and that of Ex. xxi.-xxiii. point with some cogency to the conclusion that the laws of Deuteronomy originated in a later and more highly developed stage of society than the laws of Exodus. (5) The law of the kingdom (xvii. 14-20) is colored by reminiscences of the monarchy of Solomon. (6) The forms of idolatry referred to—especially the worship of the "host of heaven" (iv. 19, xvii. 7)—point to a date not earlier than the reign of Ahaz, and more probably to one in the seventh century B.C. (7) The influence of Deuteronomy upon subsequent writers is clear and indisputable. It is remarkable that Amos, Hosea, and the

Influence on Subsequent Writers. undisputed portions of Isaiah show no certain traces of this influence, while Jeremiah exhibits marks of it on nearly every page. If Deuteronomy had been composed between Isaiah and Jeremiah, these facts would be exactly accounted for. (8) The language and style of Deuteronomy—clear and flowing, free from archaisms, but purer than that of Jeremiah—would suit the same period. (9) The prophetic teachings of Deuteronomy—the leading theological ideas and the principles which the author seeks to inculcate—exhibit many points of contact with that of Jeremiah and Ezekiel, and especially with the characteristic principles of the compiler of the Book of Kings (who must have lived in the same age).

Upon these grounds (which, when studied in detail, are seen to possess far greater cogency than can be conveyed by a mere summary) it is concluded by modern critics that Deuteronomy is in reality a work of the seventh century B.C. It is not difficult to realize the significance which the book must have had if it were written at this time. It was a great protest against the prevalent tendencies of the age. It laid down the lines of a great religious reform.

The century was one in which—as Jeremiah and the Books of Kings sufficiently testify—heathenism was making serious encroachments in Judah. The Book of Deuteronomy was an endeavor by means of a dramatic use of the last words of Moses—based, not improbably, upon an actual tradition of a concluding address delivered by the great leader to his people—to reaffirm the fundamental principles of Israel's religion (namely, loyalty to YHWH and the repudiation of all false gods) and to recall the people to a holier life and to a purer service of YHWH. So far as its more distinctively legal parts are concerned, Deuteronomy may be described as the *prophetic re-formulation and adaptation to new needs of an older legislation* (namely, the laws contained in JE). It is essentially the work not of a jurist or statesman, but of a prophet; a system of wise laws (iv. 6-8), consistently obeyed, is indeed, as explained above, a condition of the welfare of the community; but the points of view from which these laws are presented, the principles which the author evidently has at heart, the oratorical treatment, and the warm parenthetic tone, are all characteristic of the prophet, and are all the creation of the prophetic spirit.

[For reasons which can not be here developed, the discourses of Deuteronomy do not appear to be all from the same hand. The kernel of the book consists of ch. v.-xxvi. and xxviii.; and this, no doubt, constituted the book found in the Temple by Hilkiah. It was probably preceded by ch. i.-iv. (with the exception of a few verses here and there which seem to be of later origin), though most modern critics are of opinion that these chapters were prefixed to it afterward. Some little time after the kernel of Deuteronomy was composed, it appears to have been enlarged by a second Deuteronomic writer (D²), who supplemented the work of his predecessor (D¹) by adding ch. xxvii., xxix. 10-29, xxx. 1-10, and some other short passages in xxix.-xxxiv., together with the song (xxxii. 1-43) and the historical notices belonging to it (xxx. 16-22, xxxii. 44). Finally, at a still later date, the whole thus formed was brought formally into relation with the literary framework of the Hexateuch as an entirety by the addition of some brief extracts from P (i. 3, xxxiv. 1 and 5 [partly], 7-9). At what stage in the history of the text the blessing (xxxiii.) was introduced is uncertain. The song was probably written in the age of Jeremiah; the blessing is earlier, being assigned by most critics to the reign of Jeroboam II.]

The style of the Deuteronomic discourses is very marked. Not only do particular words and expressions, embodying often the writer's characteristic thoughts, recur with remarkable frequency, giving a distinctive coloring to every part of his work, but the long and rolling periods in which the author expresses himself—which have the effect of carrying the reader with them and holding

him enthralled by their oratorical power—are a new feature in Hebrew literature. The author has a wonderful command of Hebrew style. His practical aims, and the parenthetic treatment which as a rule his subject demands, oblige him naturally to expand and reiterate more than is usually the case with Hebrew writers; nevertheless, his discourse, while never (in the bad sense of the term) rhetorical, always maintains its freshness, and is never monotonous or prolix.

The influence of Deuteronomy upon the later literature of the Old Testament is very perceptible. Upon its promulgation it speedily became the book which both gave the religious ideals of the age and

molded the phraseology in which these ideals were expressed. The style of Deuteronomy, when once it had been found, lent itself readily to adoption; and thus a school of writers, imbued with its spirit, quickly arose, who have stamped their mark upon many parts of the Old Testament. As has been just remarked, even the original Deuteronomy itself seems in places to have received expansion at the hands of a Deuteronomic editor (or editors). In the historical books, especially Joshua, Judges, and Kings, passages—consisting usually of speeches, or additions to speeches, placed in the mouths of prominent historical characters, or of reflections upon the religious aspects of the history—constantly recur, distinguished from the general current of the narrative by their strongly marked Deuteronomic phraseology, and evidently either composed entirely, or expanded from a narrative originally brief, by a distinct writer; namely, the Deuteronomic compiler or editor. Among the Prophets, Jeremiah, especially in his prose passages, shows most conspicuously the influence of Deuteronomy; but it is also perceptible in many later writings, as in parts of Chronicles, and in the prayers in Neh. i., ix., and Dan. ix.

BIBLIOGRAPHY: Of recent commentaries reference may be made to those of Dillmann (1886), Driver (1895; 2d ed., 1896), Steuernagel (1898), and Bertholet (1899); and with reference to sources, the *Oxford Hexateuch* (1900), i. 70-97, 200 *et seq.*, ii. 246 *et seq.*, may be mentioned.

S. R. D.

—**Critical View: II.** Scientific criticism denies both the unity and the authenticity of Deuteronomy, and brings forward definite theories regarding its composition, date of writing, and place in the development of law and religion. The critical problems presented by this book are especially difficult, and the way in which they are solved is decisive not only for the criticism of the whole of the Pentateuch, but for the total conception of the religion of the O. T. and its development. The book is divided on the whole as follows: the Deuteronomic law proper, xii.-xxvi.; the parenetic introduction, v.-xi., and peroration, xxvii.(xxviii.)-xxx.; and the historical setting; that is, the introduction, i.-iv., and the peroration to the whole book, xxxi. to end.

Nearly all critics agree that the introduction, i.-iv. 40 (43), can not be the work of the author of v.-xi., or v.-xxvi., as (1) it contains contra-

Analysis of Sources. 14 (also i. 35-39) to v. 3 (also vii. 19-ix. 2-23, xi. 2), ii. 29 to xxiii. 5, and iv. 41-43 to xix. 2; (2) iv. 45-49, the superscription, is incompatible with that in i. 5; (3) the introduction i.-iv. is different in motive, being historic and not parenetic. This historical introduction was written by a Deuteronomist (D¹); that is, an author writing in the style and spirit of Deuteronomy at a time when the Jahvist-Elohistic narrative (JE) of the preceding books, Exodus-Numbers, was not yet united with Deuteronomy (Reuss, Hollenberg, Kuenen, Wellhausen, Cornill, Steuernagel, etc.). But as, after the combination of JE with Deuteronomy the narrative portion in the latter was duplicated, the original narrative, which also included iv. 41-43 and ix. 25-x. 11, was, according to Dillmann, changed by the Deuteronomic editor (Rd) into a speech by Moses, excepting the passages ii. 10-12, 20-23; iii. 9, 11, 14; iv.

41-43; x. 6, 7, which were not suited for the purpose. Therefore i.-iii. are by the author of Deuteronomy and iv. 1-40 was added by Rd in order to give a parenetic ending to his speech of Moses. Horst also separates i.-iii. from iv. 1-40. Portions from ch. ix. and x. also belong to i.-iii., in the following sequence: ix. 9b, 11, 12-14, 25-29, 15, 16, 21, 18-20; x. 1-5, 10, 11; then followed i. 6-iii. 29, i. 6-8 preceding i. 9-18. Ch. ii. 10-12, 20-23; iii. 9, 11b, 13b-14; x. 6-9 are marginal notes by a learned reader. Ch. iii. 29 is followed by xxxi. 1-8, and ch. xxxiv. constitutes the end. Horst, in other words, constructs from the historical notes in i.-xi. a chronological account of the events in the wilderness after the Law had been promulgated. Steuernagel, finally, considers all the passages with the address in the singular (i. 21, 31a; ii. 7, etc.) as later interpolations.

All these source-analyses, and the separation of i.-iv. from the rest of the book, to which only Hoonacker has hitherto objected, are inadmissible, for (1) the supposed contradictions do not exist; (2) i. 5 is no superscription, while i. 1 is an epilogue to Num. (Knobel, Herxheimer, Klostermann); and (3) all the critics have misunderstood the import of the introduction, ch. i.-iv., which is not a historical or chronological account, but in its general character and in its details a single and continuous reproof based upon Israel's guilt contrasted with God's manifold mercies, and therefore as clearly of a parenetic nature as are the other parts of the book.

Ch. v.-xi.: Wellhausen holds that this passage does not belong to the original Deuteronomy as it is too long for an introduction: "Moses is forever trying to get at his point, but never gets to it." Wellhausen is followed by Valetton, who designates v. 5, vii. 17-26, ix. 18-20, 22, 23, x. 1-10a, 18-20, xi. 13-21 as interpolations, and by Cornill, who considers only x. 1-9 as such, and designates this parenetic introduction as Dp in contrast to the historical i.-iv., Dh.; D'Eichthal, on the other hand, distinguishes three documents: (1) a glorification of God and Israel—v. 1-3, 29 *et seq.*; vi. 1-25; vii. 7-24, 1-6, 25, 26; (2) exhortations to humility—viii. 1-20; ix. 1-8, 22-24; (3) a further glorification of Israel—x. 21 *et seq.*; xi. 1-28, 32. According to Horst, the Law begins in ch. v., into which parenetic insertions (vii. 6b-10, 17-24; viii.; ix. 1-9a, 10, 22-24; x. 12-xi. 12, 22-25 [26-32]) have been forced. Steuernagel distinguishes in v.-xi. two combined introductions to the Law—namely, one with the plural form of address: v. 1-4, 20-28; ix. 9, 11, 13-17, 21, 25-29; x. 1-5, 11, 16, 17; xi. 2-5, 7, 16-17, 22-28; and another with the singular form of address: vi. 4-5, 10-13,

Variations of 15; vii. 1-4a, 6, 9, 12b-16a, 17-21, 23-24; viii. 2-5, 7-14, 17-18; ix. 1-4a,

Analysis. 5-7a; x. 12, 14-15, 21 (22?); xi. 10-12, 14-15. Kuenen, Oettli, König, and Strack ("Einleitung," 4th ed., p. 42) object to the separation of v.-xi., which is in fact entirely unnecessary, and makes of xii.-xxvi. a fragment, this splitting up into fragments resting on no other foundation than the fiction that a briefer original Deuteronomy had been in existence to accommodate an impatient reader limited in time.

Ch. xii.-xxvi.: Since the assertion of Wellhausen ("Composition des Hexateuchs," p. 194), that the

main division of the book has also been worked over, sources, interpolations, etc., have likewise been discovered within this part. In ch. xii. Vater had already assumed two duplicates—verses 5-7 parallel to 11, 12, and 15-19 parallel to 20-28—this opinion being shared by Cornill and in part by Stade ("Gesch. Israels," i. 658). Steinthal even distinguishes seven fragments in this chapter: (1) 1-7; (2) 8-12; (3) 13-16; (4) 17-19; (5) 20, 26-28; (6) 21-25; (7) 29-31 and xiii. 1. Nearly the same is assumed by Stärk. D'Eichthal divides xii. into two documents: (1) 1-3, 29-31; (2) 4-28. Horst thinks that 4-28 is a combination of four different texts. Steuernagel divides the chapter thus: (1) 1; (2) 2-12, subdivided into (3) 2; (4) 4-7; (5) 8-10; (6) 13-27, subdivided into (7) 15, 16; (8) 22-25; and (9) 28. Underlying all these efforts to split its chapters into fragments and parts of fragments is a misconception of the style of Deuteronomy.

The following, among other criticisms, may be mentioned: Beginning with Wellhausen, almost all critics consider xv. 4, 5 as a gloss or correction to xv. 7, 11, because they do not take into account the meaning and connection. The passage xvi. 21-xvii. 7 is in the wrong place, according to Wellhausen, Cornill, Stärk, and others, while Valetton and Kuenen admit this only of xvi. 21-xvii. 1. Wellhausen, Stade, Cornill, and others do not include the "king's law," xvii. 4-20, in Deuteronomy. In ch. xxiii. verses 3-9 have been objected to by Geiger, Wellhausen, Stade, and Valetton, while Kuenen rejects their criticism. D'Eichthal finds contradictions between xxvi. 3, 4 and xxvi. 11; Horst, between xxvi. 1-15 and xiv. 22-29. The latest critics, Stärk and Steuernagel, have gone furthest in rearranging and cutting up the text. Starting with the twofold mode of address—singular and plural—both assume that two works were combined, each of which again, according to Steuernagel, was based on a number of different sources. These and other critics (1) forget that the categories of the critic are not necessarily those of the author; (2) fail to explain how the present discrepancies were derived from a previous orderly arrangement, for in view of the continual change of address a separation of passages based on it can be effected only by resorting to violence; (3) should first have examined whether the noteworthy changes in the forms of address have no internal warrant. While it is possible that xii.-xxvi. has been subjected to many revisions, changes, and interpolations, as a legal code naturally would be, nothing to that effect can be proved.

Ch. xxvii.-xxx.: Kuenen criticizes xxvii. as follows: Not attributable to the Deuteronomist are: (1) 1-8, because they include an earlier account—5-7a; and (2) 11-13, because they refer back to xi. 29-30, although misunderstanding the

Supposed passage. Verses 14-26 constitute a **Sources of** later interpolation; hence only 9, 10 **xxvii.-xxx.** remain for D¹. This opinion is shared by Ewald, Kleinert, Kayser, Dillmann.

According to Wellhausen, xxviii. does not agree with xxvii.: xxviii.-xxx. are parallel to xxvii., each being a different conclusion to two different editions of the chief part, xii.-xxvi. corresponding to the two prefaces i.-iv. and v.-xi. Ch. xxviii. itself lacks unity.

Valetton ascribes only 1-6, 15-19 to the author of the hortatory v.-xi., considering all else as later expansions. Kleinert considers 28-37 and 49-57 as later interpolations. Dillmann also assumes numerous interpolations by a later editor. In the two following chapters Kleinert considers xxix. 21-27 and xxx. 1-10 as interpolations. Kuenen ascribes both chapters to another author.

Ch. xxi.-xxxiv.: Not only the critics but also the apologists refuse to consider these closing chapters, wholly or in part, as due to the author of Deuteronomy proper. (1) xxxi. 1-8, parallel to Num. xxvii. 15-23, is a continuation of iii. 28 *et seq.*, by the same author; xxxi. 9-13 forms the close of the law-book, xxx. 20; (2) xxxi. 14-30 serves as introduction to the song of Moses, belonging with it to the passages incorporated later in Deuteronomy; ch. xxxii. 44-47 is the ending to the song, and to xxxi. 15-29; 48-52 are taken from the Priestly Code (P); (3) xxxiii. is an old document incorporated by the editor; (4) xxxiv., Moses' death, is combined from different accounts; the following verses are taken from P: 1a and 5 (revised), 7-9 (Dillmann); 1-7a, 8, 9 (Wellhausen); 1a, 8, 9, 1a, 7a, 8, 9 (Kuenen); 1a, 8, 9 (Cornill). To J belong: 1b, 4 (Dillmann); 1b-7 (Cornill). To JE belong: 10 (Dillmann); 2-7, 10-12 (Wellhausen; revised); 1b-3, 5-7b, 10 (Kuenen). To D belong: 1a β 6 (revised), 11, 12 (Dillmann); and 1b β 2-3, an interpolation. According to Wellhausen, 2-7, 10-12, Kuenen 4-6, 7a, 11-12, Cornill 10-12, are editorial interpolations.

Ranke, Hävernicks, Hengstenberg, Baumgarten, Fr. W. Schultz, Keil, Köhler, Bissel, and other apologists ascribe the book to Moses. This view is criticized on the following grounds: (1) The account of the discourses of Moses, their writing and transmission (xxx. 9, 24-26; xxviii. 58, 61; xxix. 19, 20, 26; xxx. 11; xvii. 18 *et seq.*), can not be by

Date and Moses. (2) Moses can not possibly **Tendency.** have written the story of his death, nor compared himself with later prophets (ch. xxxiv.). (3) A later time is indicated by ii. 12 ("as Israel did"), by iii. 9-11, 14 ("unto this day"; comp. Judges x. 4 and i. 44 with i. 17); and by xix. 14 ("of old time"). (4) The writer speaks of the country east of the Jordan as "on this side" (i. 1, 5; iv. 41-49), though referring in the speeches to the western country (iii. 20, 25; xi. 30: in iii. 8 vice versa); therefore, he is in Palestine. (5) Although Israel is represented as about to enter Canaan, the language necessitates the inference that Israel is already settled in that country, engaged in agriculture or living in cities, under an organized government. (6) The book assumes a long period of development as regards politics and the state ("king's law": supreme court, religion (allusions to fundamental religious principles and the law of the Prophets; emphasis on the centralization of worship), and worship (position of the priests and Levites; gifts to the sanctuary). (7) The book uses sources that can be proved to be post-Mosaic. The precise dates given, however, vary.

Kleinert is of the opinion that the book was composed about the end of the period of the Judges, perhaps even by Samuel or by a contemporary of Samuel, and certainly in a truly Mosaic spirit. The

legislation occupies a middle ground in relation to that of the earlier books. As pre-Deuteronomic may be proved: Ex. xx.-xxiii., xxxiv. 11-26, xix. 5 *et seq.*, xiii. 1-13; Lev. xvii. 18 *et seq.*; Num. xxxiii. 50 *et seq.*, iii. 12 *et seq.*; the principal enactments in Lev. xviii.-xx.; the content of Ex. xii. 1-14, 21-23, 43-50; Lev. xiii. xiv. Post-Deuteronomic: Lev. xi., xv. 16 *et seq.*, xvii. 15 *et seq.*, xxii. 17 *et seq.*, xxiii., xxv. 39 *et seq.*, xxvii. 26-30 *et seq.*; Num. xv. 37 *et seq.*; xviii. 15, 21 *et seq.*; xxviii., xxix. Moses' blessing, xxxiii., dates from the early time of the Judges. Ch. xxxi. 14-29, xxxii. 1-43, 48-52, xxxiv. must be separated as non-Deuteronomic.

The book is assumed to have been composed during the earlier, but post-Solomonic, time of the Kings, by Delitzsch and Oettli; under Hezekiah, by Vaihinger and König; under Manasseh, by

Different Dates Assigned. Ewald, Riehm, W. R. Smith, Wildeboer, Kautzsch, Kittel, Dernier, Valtou; under Josiah, by De Wette, Bleek, George, Vatke, Graf, Wellhausen, Kuenen, Dillmann, Cornill, Stade, Reuss, and nearly all critics since Graf-Wellhausen. Gesenius and the more recent French critics, as D'Eichthal, Havet, Vernes, Horst, have assumed a date during, or later than, the Exile.

The assumption that the book was composed under Hezekiah, Manasseh, or Josiah is based on the hypothesis that the law-book which was discovered in the Temple by the priest Hilkiah in the eighteenth year of the reign of King Josiah, 621 B.C., as narrated in II Kings xxii. *et seq.*, was virtually the present Deuteronomy, the only difference of opinion being as to how long it had been composed. Most of the advocates of the Josianic period even say that the book was composed and hidden with the definite intention that it should be brought to light in that way. This hypothesis is difficult to maintain, for a number of improbabilities must be assumed in order to prove that the code found at the time of Josiah was Deuteronomy. All that can be claimed is that the narrator of the story of the finding and of the reforms attendant upon it adopts in part the language of Deut. This view is exposed to the insuperable objection that the religion which brought truth into the world can not have been founded upon a deception. That this fundamental book of religion, containing such a free and pure stream of truth, could be pseudographic, and that the whole nation should have considered as of Mosaic origin and of divine authority, and have adopted at once, without objection or criticism, a book which was a forgery, of the existence of which no one knew anything before that time, and which demanded radical modifications of the religious life, and especially of worship, is inconceivable.

Those critics who recognize these objections, but for critical reasons hesitate to take Moses as the author, assert, therefore, that the book is in its essentials a faithful reproduction of the teaching of Moses, filling in the outlines given by the latter; and that there are no objections to assuming that inspired men, working in the spirit of Moses, and sustaining to him the uninterrupted relation of spiritual succession, should feel justified in rendering his teaching and his law comprehensible for their own

time, supplementing and developing them, and that the book thus composed is none the less Mosaic in spirit. Modern criticism holds that the book was prepared for the purpose of realizing the ideals of the Prophets in the national life of Israel. It is the summary of the prophetic deliverances of the eighth and seventh centuries, though not altogether free from impairments of the prophetic ideals. Some critics (Cheyne, "Jeremiah," pp. 65 *et seq.*) consider it as a product of the priestly-prophetic circles, an assumption that is certainly correct (comp. xvii. 9 *et seq.*, xxiv. 8).

Although the place assigned traditionally to Deut. as containing the end of the Mosaic legislation, and as presupposing the existence of Ex.-Num., is disputed by modern criticism, yet all critics agree that it is based on previous sources that have in part been preserved. This applies certainly to J and to E, both in the narrative and the legal portions. J in the narrative: i. 8, comp. Gen. xv. 18; i. 45, comp. Num. xiv. 16; iii. 15 *et seq.*, comp. Num. xxxii.

Sources and Redaction. 29; otherwise the story is recapitulated from E. In the Law the close relation and connection with the Book of the Covenant contained in E (Ex. xx. 24-

xxiii. 19) is most noticeable, Steuernagel being the only one to dispute this, and the so-called DECALOGUE in J (Ex. xxxiv.). It is a matter of dispute whether the author of Deuteronomy knew J and E as separate works, or after they had been united into JE and incorporated into the Tetrateuch. The priority of the Decalogue of Ex. xx. or that of Deut. v. is also a much disputed question. Deuteronomy takes a very independent stand toward its sources, the reproduction being a free modification or enlargement. Wellhausen and Stade have therefore assumed it to be an enlarged edition of the old Book of the Covenant, and Kuenen, followed especially by Cornill, has brought forward the hypothesis that Deut. supplanted the Book of the Covenant.

It is a very important question under discussion, whether the author of Deuteronomy was acquainted with P; whether, therefore, the latter was the earlier book, if not in its present codification, at least in content. P is asserted to be older by Dillmann, Delitzsch, Oettli, and, of course, by the traditionalists. As regards history they quote iv. 3 = Num. xxv. (leading astray of the Israelites); i. 37, iii. 26, iv. 21 (Aaron and Moses forbidden to enter Canaan) = Num. xx. 12, 24, xxvii. 14; i. 23 (number of the spies) = Num. xiii. 1 *et seq.*; x. 3 (the Ark of shittim-wood) = Ex. xxxvii. 1; x. 22 (the number "70") = Gen. xlv. 27; xxxi. 2, xxxiv. 7 (the age of Moses) = Ex. vii. 7. In the Law the many allusions to the law of holiness belonging to P (Lev. xvii.-xxvi.), the assumption of several "torot," and especially Deut. xiv. in comparison with Lev. xi., confirm this view. According to other critics the historical references are derived from notes in JE, no longer extant, and as regards the Law they reverse the relation in every case. P presupposes Deut.; so that, for instance, Lev. xi. was modeled upon Deut. xiv.

The redaction of Deut. passed, according to Wellhausen, through three stages: (1) the original Deut. —xii.-xxvi.; (2) two enlarged editions independent

of each other—i.-iv., xii.-xxvi., xvii., and v.-xi., xii.-xxvi., xxviii.-xxx.; (3) combination of the two editions and incorporation of the work so formed into the Hexateuchic code. Deuteronomy was in the first place combined only with JE; a later editor combined this work with P after the component parts of the latter had been put together. Dillmann assumes the following three stages of redaction down to Ezra: (1) Pg + E + J; (2) PgEJ + D; (3) PgEJD + Ph (law of holiness). The views in regard to the redaction depend on what is considered as the original Deut. and into what and how many parts it is divided.

According to the Graf-Wellhausen theory of the relation of Deut. to the Prophets, and its priority to P, the book marks a radical change in the Israelitic religion. Through the centralization of worship the popular exercise of religion, closely connected with the daily life, the home, and the house, is uprooted and all the sacred poetry of life destroyed. Worship is separated from life, and the sharp contrast of holy and profane arises between the two. The idea of the Church comes into existence; then a separate profession, that of the clergy, is created; and by transferring the priestly ideal to the whole people the way is prepared for the exclusive and particularistic character of later Judaism. As the prophetic ideas are formulated into concrete laws, religion is externalized and becomes a religion of law, an *opus operatum*. The people now know exactly what they have to do, for "it is written." Deuteronomy marks the beginning of the canon; religion becomes a book religion, an object of study, a theology. The people know what they may expect if they keep the Law. Religion assumes the nature of a covenant, a contract, and the doctrine of retribution becomes paramount. Further conclusions are then drawn by P as to post-exilic Judaism, Pharisaism, the Talmud, Rabbinism.

This whole conception is based on literary and religio-historical assumptions that are either wrong or doubtful. The doctrines and demands of Deut. have always been fundamental in Israel's religion. The book condemns and abolishes paganism. The alleged legitimacy of the decentralization and popularization of worship is based entirely upon a wrong interpretation of Ex. xx. 24. Centralization is the necessary consequence of monotheism and of the actual or ideal unity of the people. Law and prophecy are closely connected from the foundation of Judaism, beginning with Moses. The regulation of life according to divine law, the contrast between holy and profane, the rise of a canon and a theology, are incidental to the development of every religion that has ever controlled and modified the life of a people.

DEUTERONOMY RABBAH. See DEBARIM RABBAH.

DEUTSCH, ALEXANDER: French financier; died April 18, 1889. He was head of the firm of A. Deutsch & Sons, of Paris, and was one of the most prominent financiers in that city, his firm taking the lead in the organization of the mineral-light ("éclairage minéral") industry. He was also prominent in other industries, and his exertions in the industrial

interests of France won for him the ribbon of the Legion of Honor. Deutsch took an active part in Jewish affairs, and contributed liberally to the charitable institutions of Paris.

A. R.

DEUTSCH, ANTON: Hungarian journalist and politico-economic writer; born at Budapest Oct. 21, 1848. He studied in Budapest and Paris. Since 1870 he has worked with the "Pester Lloyd," the economic articles in which come from his pen. His most important writings are: "Fünfundzwanzig Jahre Ungarischer Volkswirtschaft und Finanzen" and "Magyar Vásárok Története" (History of the Hungarian Fairs).

M. W.

DEUTSCH, CAROLINE: German novelist; born at Namesto, a small Hungarian village, Feb. 23, 1846. Her father, a rabbi, was German in culture, and the German language and spirit prevailed in the family. While still very young, Caroline began to write verse, some appearing in Berlin newspapers. In 1870 she graduated as a public teacher, obtaining at the same time a permanent position on the "Jüdische Presse" of Berlin. Several novelettes from her pen were published in the Berlin "Volkszeitung."

In recent years she has written chiefly for the "Hamburger Nachrichten." The scenes of her novels are mostly laid in Hungary, and she vividly describes the life of the Hungarian peasant and small tradesman. In 1875 she married, and although her legal name was Caroline Weiss, she still wrote under her former name. Of her writings may be mentioned: "Ueber Klippen," a novel, in 2 vols., Dresden, 1894; "Aus Drang und Not," Prague, 1897; "Besiegt," "Die Tochter des Hirten," and "Ilonka," published in 2 vols., Hamburg; "In Letzter Stunde," Leipzig, 1897.

M. Z.

DEUTSCH, DAVID: German rabbi; born at Zülz, Silesia, 1810; died at Sohrau, Silesia, July 31, 1873. He was brought up by his relative Menahem Deutsch, at Breslau. He studied Talmud under Mordecai Benet at Nikolsburg, and under Moses Sofer at Presburg. Deutsch was called to the rabbinate of Myslowitz, Prussia, in 1838, and that of Sohrau in 1845. David Deutsch, like his older brother Israel Deutsch, was a champion of Orthodoxy, and led the protest against the nomination of Abraham Geiger as rabbi of Breslau. Deutsch contributed articles to most of the Jewish periodicals. The following are his works: "Habakkuk Meturgam u-Me bo'ar" (Habakkuk Translated and Explained), a German translation with notes (Breslau, 1837); "Rücksprache mit Allen Gläubigen des Rabbinischen Judenthums" (Breslau, 1843), a reply, written in collaboration with his brother Israel Deutsch, to Abraham Geiger's pamphlet "Ansprache an Meine Gemeinde"; "Asof Asefah" (The Gathering of an Assembly), a protest against the rabbinical conferences at Brunswick in 1844 and at Frankfort in 1845 (Breslau, 1846);

"Die Orgel in der Synagoge," a refutation of the arguments of S. Löw in favor of the use of the organ in the synagogue; a German translation of Isaac Troki's "Hizzuk Emunah," with critical notes (Breslau, 1865). Deutsch's sermons had a felicitous combination of the older style with modern rhetoric, and some of those delivered on public occasions were published.

M. SEL.

DEUTSCH (AARON), DAVID: Hungarian rabbi and Talmudic author; born in Raudnitz, Bohemia, about 1812; died at Balassa-Gyarmath, Hungary, April 26, 1878. He received his early education under his grandfather, Joseph Deutsch, who was rabbi in Raudnitz, and then frequented the yeshivot of Prague and Presburg, being one of the favored disciples of Moses Sofer. He lived subsequently in Irsa, where he married, and after the death of his wife moved to Budapest, where he lectured on Talmud to a small society. In 1846 he was called as rabbi to Sebes and in 1851 to Balassa-Gyarmath, where he officiated till his death.

In the Reform movement, which began with the Hungarian Jewish Congress of 1868, Deutsch was one of the most uncompromising leaders of Orthodoxy; and to his efforts the legal recognition of the autonomy of the Orthodox congregations in Hungary was largely due. He was a great ascetic, and was in sympathy with the Hasidim, although he did not adopt all their tenets. As typical of his views may be quoted the facts that he declared it sinful to pray in a synagogue in which the almemar was not in the center, and that he prohibited the winding up and setting of an alarm-clock on Friday so that it should ring on Saturday.

Of his works a collection of responsa, under the title "Goren Dawid" (David's Threshing-Floor), was published after his death by his sons (Pacs, 1885).

BIBLIOGRAPHY: Preface to *Goren Dawid*.

D.

DEUTSCH, DAVID B. MENAHEM MANDEL: Hungarian rabbi and Talmudist; born about 1760; died in 1830 at Novo Mesto (Waag-Neustadt), Hungary. He officiated first at Szerdahely, and subsequently, after 1810, at Waag-Neustadt. One of the most prominent Hungarian rabbinical authorities of the early part of the nineteenth century, he was distinguished for his nobility of character. Stories on his high views of life are still current in many districts of Hungary. He was classed among the foremost of Jewish philanthropists. Deutsch often gave a poor applicant money without counting or even looking at it; and, if his purse was exhausted, he would give him any object of value that happened to be at hand. Deutsch was also celebrated for his wit and humor, of which he often made effective use in his capacity as preacher. His piety was such that he never raised his head, regarding it as inconsistent with true humility and the fear of God; and he never looked beyond his immediate surroundings—"the four cubits."

Deutsch was the author of the following works: (1) "Ohel Dawid" (Tent of David), Vienna, 1819-25,

novellæ, in two volumes, to several Talmudic treatises, some of which appeared under the same title in 1822; (2) "Ohel Dawid," Presburg, 1836, novellæ to the treatises Shebu'ot and Yebamot; (3) halakic discussions in Aryeh Judah b. Samuel Zebi's "Helek Rishon mi-She'elot u-Teshubot ha-Geonim Bata'e," Prague, 1861; (4) halakic discussions in Wolf b. Löb Lasch's "Kedushat Yisrael II." (Vienna, 1829). Eleazar Shemen Rokeah, an old friend of Deutsch, collected posthumously all the responsa which the latter had addressed to him in the course of many years, printing them as a memorial to his friend. It may be noted as a bibliographical peculiarity of the "Ohel Dawid" that all the copies contain manuscript glosses by the author. Deutsch revised his book after it had been printed, and noted the corrections on the margins before the book left his hands.

L. G.

DEUTSCH, EMANUEL OSCAR MENAHEM: Orientalist; born at Neisse, in Silesia, Oct. 28, 1829; died at Alexandria, Egypt, May 12, 1873. His early training was conducted by his uncle, David Deutsch of Myslowitz, to whom he owed his wide acquaintance with Hebrew literature. His education was completed at the University of Berlin, where, under Boeckh and Meineke, he became an accurate classical scholar. From Berlin he went to London to accept an appointment in the British Museum, to which he had been recommended by Asher Asher. Thenceforward he was known for his labors in the British Museum and for the efforts he made to promote Semitic studies in the outside world. His work in the library is, of course, not on record in a separate form; and his best official monument is to be found in the "Phœnician Inscriptions" published by the trustees, in which the editor, W. S. A. Vaux, received invaluable aid from him.

Deutsch's literary work outside the museum was of two kinds: either purely scientific essays, acute in criticism and lucid in statement—like the article on the Targumim and on the Samaritan Pentateuch in Smith's "Dictionary of the Bible"—or brilliant popular expositions of some learned work, like his famous essay on the Talmud in the "Quarterly Review" for Oct., 1867. This created probably a greater sensation than any other review article in England dealing with a purely literary subject, and caused that number of the "Quarterly" to be repeatedly reprinted. The article itself was translated into several languages, and contributed to create an interest in the Talmud wherever the essay was read. Though there was little that was new in the facts adduced—the literary history being derived from Wolf and the wise and witty sayings from Dukes—yet the skill with which the pertinent topics were grouped, the brilliancy of the style, and the underlying enthusiasm of the writer made it a striking performance. Some of its effect was due to the implied suggestion that the key to the life of the founder of Christianity was to be sought for in the surrounding ideas in Palestine. The renewed attention given to the Talmud in Christian circles, at any rate in England, was undoubtedly due to the article. The ambition

of his life to produce a more exhaustive work on the Talmud was thus shadowed forth; but the failure of his health compelled him to abandon the project.

This famous essay was succeeded some time afterward by an article in the "Quarterly Review" on "Islam," which was not so successful because not dealing with so novel a subject and because Deutsch was not a special student of Arabic. He also contributed the article on "Versions" to Smith's "Dictionary of the Bible," and besides wrote more than 190 articles for "Chambers's Cyclopædia." Deutsch had an excellent faculty, cultivated by practise, of deciphering inscriptions. His letters to the "Times" respecting the discovery and contents of the Moabite Stone aroused considerable attention.

During the sittings of the Ecumenical Council at the Vatican, 1869-70, Deutsch acted as special correspondent of the "Times," and wrote a number of incisive letters on its deliberations.

G. L.—J.

DEUTSCH, GOTTHARD: Theologian; born at Kanitz, Austria, Jan. 31, 1859. The descendant of a rabbinical family (see BRAUNSCHWEIG, JACOB ELIEZER) and the son of a Talmudist, he received an early training in rabbinical literature while he attended the school of his native city. In 1868 he entered the gymnasium of Nikolsburg, continuing his studies at home, and graduated in 1876. He subsequently attended the rabbinical seminary and the University of Breslau, where he remained until the year 1879. Continuing his studies in Vienna, he graduated from the university in 1881, receiving his rabbinical diploma from I. H. Weiss. Immediately thereafter he was called to teach the religious school of the congregation of Brünn, and upon the death of Daniel Ehrmann (1882) he was appointed by the state as teacher of religion in the German high schools of the Moravian capital. In 1887, simultaneously invited to the rabbinates of Boskowitz and Brüx, he chose the latter position, which he resigned in 1891 to accept the professorship of Jewish history and philosophy of religion in the Hebrew Union College of Cincinnati, which position he still (1903) occupies.

Deutsch has been a frequent contributor to the Jewish and to the secular press. Articles from his pen have appeared in "Allgemeine Zeitung des Judenthums," "Israelitische Wochenschrift," "Jüdisches Literaturblatt," and a great number of American periodicals, notably "Deborah," "American Israelite," "The Reform Advocate," "Jewish Comment," "The American Journal of Theology," "The New World," "The Yearbook of the Central Conference of American Rabbis," "New-Yorker Staatszeitung," and others. He has further published: "Symbolik in Cultus und Dichtung bei den Hebräern," Brünn, 1886; "Paradigmentafeln zur Hebräischen Grammatik," Brünn, 1886; "Gedenkrede an dem Sarge des Verewigten Dr. Aron Bärwald," Brüx, 1891; "Epochs of Jewish History," New York, 1894; "Theory of Oral Tradition," Cincinnati, 1896; "Philosophy of Jewish History,"

Cincinnati, 1897; "Andere Zeiten," a novel, Berlin, 1898; "Unlösare Fesseln," a novel. He was the editor of the "Deborah," a German monthly, from the death of its founder, Isaac M. Wise, until the paper ceased publication (1903). S.

DEUTSCH DE HATVAN, ALEXANDER:

Hungarian merchant and financier; born at Arad Nov. 17, 1852. He was educated in Budapest and Berlin. As the head of the firm of Ignatz Deutsch & Sons, he rendered great service to the sugar industry in Hungary, establishing beet-sugar factories at Nagy Surany, Hatvan, and Garamvölgye. In recognition of his services his family was raised to the nobility in 1879.

DEUTSCH, HEINRICH: Hungarian educator; born at Trencsen-Bán June 12, 1819; died at Budapest Dec. 18, 1889. After teaching in the elementary schools of the provincial communities of Lovasberény and Kecskemét, he was called to the Talmud Torah school of Budapest in 1859. Enjoying a high reputation as an educator and a scholar by virtue of his attainments in Jewish science and his literary activity, he was appointed in 1868 director of the reorganized Jewish Teachers' College, and in 1876 professor of the Bible and Talmud in the lower division of the newly founded Rabbinical Seminary. Deutsch was the first in Hungary to lecture in the Hungarian language on the Talmud.

His chief works are: "A Hebrew Grammar" (in Hungarian, 1859); Hungarian translation of the prayer-book (seven editions since 1864); "Beleuchtung der Dogmentheorie Leopold Löw," Leipsic, 1871 (under the pseudonym "David Nieto Redivivus"); "Me'kor Hayyim," text-book of the Jewish religion, in four parts, Budapest, 1878; Hungarian translation of the Pentateuch with comments, 1887-1890.

DEUTSCH, ISRAEL: German rabbi; born in Zülz, Prussian Silesia, April 2, 1800; died in Beuthen June 7, 1853. From 1829 until his death he officiated as rabbi in Beuthen, achieving distinction as a preacher, Talmudist, and Hebraist. In the two treatises "Rücksprache mit Allen Gläubigen des Rabbinischen Judenthums, etc." (written in conjunction with his brother, David Deutsch), Breslau, 1843, and "Zur Würdigung der Braunschweiger Rabbinerversammlung," *ib.* 1845, he vigorously opposed the Reform movement. After his death his two brothers, Abraham, rabbi of Gleiwitz, and David, rabbi of Sohrau, published "Proben aus dem Literarischen Nachlasse des Israel Deutsch," Gleiwitz, 1855.

DEUTSCH, JOEL: Hebraist and teacher of deaf-mutes; born in Nikolsburg, Moravia, March 20, 1813; died in Vienna May 1, 1899. Deutsch is remembered as a close student of rabbinical literature, and was an energetic collector of Hebrew books. He took great interest in the instruction of deaf-mutes; and when the "Allgemeines Oesterreichisch-

Israelitisches Taubstummen-Institut" was founded at Nikolsburg in 1844, he entered it as teacher. In 1852 this institution was moved to Vienna, and Deutsch became director, retiring in 1888. In 1859 he was decorated with the "Goldene Verdienstkrantz," and in 1869 received the title "Kaiserlicher Rath." Pupils of Deutsch have been called to become teachers in the asylums of New York, London, and Budapest.

He was author of the following works: "Religionslehre für Israel. Taubstumme," Vienna, 1863; "Biblische Geschichte für Israel. Taubstumme," *ib.* 1863; "Wörtersammlung zur Gedächtnissübung für den Ersten Anschauungsunterricht Taubstummer Kinder," *ib.* 1881; "Wörter- und Aufgabensammlung für den Ersten Unterricht Taubstummer Kinder," *ib.* 1881; "Vorlege-Blätter zur Einleitung der Unentbehrlichsten Grammatischen Formen," Teplitz, 1877.

DEUTSCH, SIMON: Austrian Hebraist and revolutionist; died at Constantinople March 24, 1877. As a young man he devoted himself to Hebrew studies in Vienna, and catalogued in collaboration with A. Kraft the Hebrew manuscripts in the possession of the Vienna Imperial Library. In 1848 he sided with the revolution, escaping after its collapse to France. In Paris, through the assistance of Mme. Strauss, the friend of Börne, he entered upon a business career, in which he was successful. After the fall of the Commune Deutsch was denounced to the government as a Communist. He was arrested and thrown into the "Orangerie" prison of Versailles, and only the efforts of the Austrian ambassador saved his life. He died in Constantinople while there on business, but was interred in Paris.

DEUTZ, EMMANUEL (Menahem): Chief rabbi of the Central Consistory of the Jews of France; born at Coblenz, in Rhenish Prussia, 1763; died Jan. 31, 1842. After studying for some years at the yeshibah at Mayence, he was appointed rabbi in his native town. He was a member of the assemblies of 1806 and 1807 (see SANHEDRIN), and, in conformity with the organization instituted by Napoleon I., he took his place in the Central Consistory beside David Sinzheim and Abraham de Cologne. From 1822 he was the only chief rabbi of the Consistory. He was a preacher of the old school, for, although he knew French, he never used it in the pulpit. His life was saddened by domestic sorrows, especially by his son's apostasy and unfortunate political rôle.

S. J.

DEVIL. See DEMONOLOGY and SATAN.

DEVOTION (כונה): The state of religious consecration. It is the most essential element in worship; so that a divine service without it is "like to a body without a soul." To such as pray to God without the spirit of fervent devotion, the stern sentence is applicable: "With their mouth and their lips they honored me, but their heart they removed far from me" (Isa. xxix. 13). Devotion is the entire dedication of the worshiper to the service of God, the banishment of all other thoughts from the mind and heart, so that the whole inner life centers in the one idea of God's greatness and goodness (Ber. 29b, 30a; Maimonides, "Yad," Tefillah, iv. 16). Every fulfilment of a divine commandment ("mizwah") requires devotion or consecration of mind and heart to the sacred work to be done ("mizvot zerikot kawwanah"; Ber. 13a, b; Meg. 20a; Hul. 31a, b; Yer. Yeb. viii., 9a). Hence the cabalists enjoined men, before fulfilling any commandment, to expressly consecrate the mind to the work by certain formulas (see KAWWANAH; LORIA, ISAAC).

The term "devotion" is also used for prayer itself, especially for the extra and occasional prayers added to the regular service (תחנון and בקשה, "supplication" and "petition"). Among pious Jewish people there is a strong craving for frequent communion with the Creator; the fixed and regular prayers and services can not satisfy such craving, and the recommendation of Rabbi Simeon (Abot ii. 18), "When thou prayest, do not make thy prayer a fixed reading, but let it be an appeal for divine mercy and grace," is understood to refer to this kind of devotion. Prayers are frequently compared to sacrifices (Ber. 26b), and as there were two kinds of sacrifices, "qorban

hobah" (obligatory sacrifice) and "korban nedabah" (voluntary or free-will sacrifice), so also prayers are of two kinds, "tefillat hobah" (obligatory prayer) and "tefillat nedabah" (voluntary prayer; compare "Yad," Tefillah, i. 9). The ancient Ḥasidim are said to have spent in silent meditation a short time before and after the service (*ib.* 32b).

M. F.

DEVOTIONAL LITERATURE: Aside from the regular prayers, which are treated under LITURGY, there exists a literature of private devotions, prayers offered on special occasions. Such devotions are strongly recommended in the Talmud, where private prayers composed by individuals on various occasions are to be found. R. Eliezer (Ber. iv. 4) says: "He who makes his prayer a fixed form [“ke-ba”] has no true devotion.” “This,” say Rabbah and R. Joseph, “is because he fails to add thoughts or expressions of his own” (Ber. 29b). [Compare the so-called “Lord’s Prayer,” taught by Jesus (Luke xi. 2-4; Matt. vi. 9-13), and the parallels given in C. Taylor’s “Sayings of the Jewish Fathers,” pp. 128-129.—K.] Talmudic devotional prayers may be classified as: (1) general, (2) for forgiveness of sin, (3) when studying the Torah, (4) for the restoration of the Holy Temple. The following are examples of the several kinds:

1. R. Eliezer said: “May it be Thy will, O Lord our God, and God of our fathers, that no personal enmity or envy enter my heart or the hearts of others. May the Law be our occupation through the days of our life, and may our words of devotion come before Thee.” R. Hiyyah b. Abba added: “May our hearts cleave to Thy Name in reverence. Keep us from things Thou hatest and bring us nearer to those that Thou lovest. O favor us for Thy Name’s sake” (Yer. Ber. iv. 2).

2. “Lord of the worlds, Thou well knowest that our aim is to do Thy will. But what interferes? The leaven in the dough [bad inclinations] and the servitude of the ruling government. O may it be Thy will to save us from these, that we may do Thy will with a true heart.”

3. R. Saphra: “O let peace reign between the heavenly and the earthly households, and between those who study the Torah for its own sake and those who study it for reward” (*ib.*).

4. “O let Him reveal and show His kingdom over us speedily. O let Him build His house in our days. O let Him grace the remnant of His people Israel with peace, loving-kindness, and mercy. For the sake of His great Name” (Massek. Soferim, xiv. 12). The morning devotion of the house of R. Jannai was as follows: “May it please Thee, O Lord my God, to grant me a good heart, a good lot, a good companion, a good name, a good [unbegrudging] eye, a humble soul, and a devout spirit. May Thy Name not be profaned through us, and let us not be a byword among the people. Let not our remainder be destroyed, nor our hope shattered. Let us not be under obligation to a human being, whose gift is insignificant and its humiliation great. Let our lot be with the Law and among those who do Thy will. O build Thy Holy City and Temple speedily in our days” (Yer. Ber. iv. 2, 7d).

Devotional prayers from various rabbis (*ib.* pp. 16, 17, 29, 60) are copied in the prayer-book, including a prayer against bad dreams, that they may presage good results (Ber. 55b), which was inserted in congregational responses to the priest’s blessing on holidays.

In the geonic period private devotional prayers developed side by side with the liturgy; and private prayers were inserted in the prayer-book of Amram Gaon (846 c.e.), as well as in the siddur of Saadia Gaon. One of these is quoted in the collection of private prayers, “Keri’ah Ne’emanah,” by Samuel David Ottolengi (Venice, 1715), which contains also a prayer composed by R. Nissim to be recited before the morning prayer of Yom Kippur. Judah ha-Ḥasid and his pupil, Eliezer of Worms,

composed devotional prayers which were published under the titles “Tefillot R. Jehudah Ḥasid” and “Yoreh Ḥaṭṭaim.”

Regarding the midnight prayer, **ḤAZOT**, for the restoration of the Jewish state and the rebuilding of the Temple (see Zohar, Wa-Yaḥel;

Midnight Devotion. Shulhan ‘Aruk, Oraḥ Ḥayyim, 1), re-

cited especially in the sixteenth, seventeenth, and eighteenth centuries, see **ḤAZOT**. Collections of such prayers were made by Zebi b. Ḥayyim of Wilmersdorf under the title “Liḳḳuṭe Zebi,” Sulzbach, 1797; by David Tevele Posner, Hamburg, 1715; and by Aaron Berechiah Modena, author of the collection of devotional prayers for various occasions entitled “Ma’abar Yabbok,” and of “Seder Ashmurat ha-Boker” (matins) for the society known as “Me’ire Shaḥar” (Early Risers or Vigilants). Mantua, 1624. This, under the title “Shomerim la-Boker,” was translated by Mrs. Ellusch in 1724. Joseph Jedidiah Carmi is the author of “Kenaf Renanin” (The Singers’ Wing; Venice, 1626), containing devotions and hymns for every day in the week and for holidays.

From a literary point of view, Carmi’s devotions have no equal among the Hebrew collections, and yet, while they were approved by the Rabbis and adopted by several Early Risers’ societies in Italy, they were contested as an innovation and a superfluity before a council of rabbis, who finally decided to allow them, not as an addition to the prayer-book but as an adjunct for voluntary devotionalists (see decisions in the Preface, 6a, 12b).

Some devotions are composed of words all of which begin with the same letter. Thus, **א** in the prayer “Elef Alefim” (A Thousand Alefs) by Joseph b. Sheshet Latimi, first published with the “Iggeret” of Isaac Akriṣh, Constantinople, 1570; a similar one by Moses Zacuto in his “Iggeret,” Leghorn, 1870; the letter **ה** in the prayer “Baḳkashat ha-Hehin” by David Ulma (Benjacob, “Ozar ha-Seferim,” pp. 82, 329); **י** in a prayer composed of Biblical verses beginning with “Lord” (“Siddur” of Amram, ii. 3a); **ש** in the “Baḳkashat ha-Lamedin” of Meir Hesse, Altona, 1829; **נ** in the “Baḳkashat ha-Memin” of Jedaiah Bedersi, published with his “Beḥinat ‘Olam,” Mantua, 1556 (see “Ha-Sharon” to “Ha-Karmel,” i., No. 42); **ע** in Aaron Volterra’s “Baḳkashah Ḥadashah” (A New Petition) or **ע”ש** (“300 Words Beginning with ע”), Leghorn, 1740. Some parts of these alphabetical devotions are in pure and fluent Hebrew, while the style of the others is cramped and forced.

Divers devotional prayers were composed for Friday night and for Saturday, day and night. They are known as “Zemirot.” Regarding the Tashlik prayer on New-Year’s Day, see TASHLIK; and for a prayer on entering the sukkah on the Feast of Tabernacles, see TABERNACLES, FEAST OF.

A petition before saying the Psalms reads: “May Thy mercy attend us in reading the Psalms, as if David himself—peace be to him!—had uttered them; to cleanse us of sin and to forgive us as even Thou hast forgiven David,” etc.

There are prayers by Nahmanides on crossing the sea, and for children (“Liḳḳuṭe Zebi,” p. 97b, Wilna, 1817) and by Abraham Galicchi against epidemics

("Moshia' Hosim," p. 33b, Venice, 1587). The "Ma'aneh Lashon," by Jacob ben Solomon Darshan, published first at Prague, 1615, is a collection of prayers to be recited for the sick, also on visiting cemeteries, and on similar occasions, which is very popular in Russia and Poland. Among other devotional prayers mention may be made of the following: Moses Rieti, "Ma'on ha-Sho'alim," Venice, 1550; Isaiah Hurwitz, "Refu'at ha-Nefesh," Amsterdam, 1672; "Yoreh Ha'ta'im"; Pinchas Monselice, "Magen Hayyim," Mantua, 1657; Nathan Nata' Hanover, "Sha'are Ziyon," 1662.

Raphael Solomon's prayer against an epidemic among cattle in Italy in 1712 is found in the collection of Matthew Levi ("Zebah Todah," Leghorn, 1829). Others are: by Leon Modena, for a prisoner, in David Sabibi, "Mazzil Nefashot," Venice, 1743; by Moses Zacuto, the poor man's devotion, in Nathan Benjamin of Gaza, "Hemdat ha-Yamim," v. 29a, Leghorn, 1764; by David b. Hassin, "Tefillah le-David," hymns 4, 7, Amsterdam, 1807; by Abraham Danzig, "Tefillah Zakkah," on the eve of the Day of Atonement; Nahman Breslov, "Likku'te Tefillot," Warsaw, 1873.

Eliezer Papu's "Bet Tefillah" (Hebrew and Ladin, Belgrade, 1860) includes the following prayers: by a learned man for those who support him; for a bar mizwah; for a matrimonial suitor; on the marriage day; at a circumcision; for a teacher; for a sholet; for a preacher to be able to deliver his sermons fluently and to please his audience. The prayers in a collection by Nahman of Horodek ("Likku'tim," Korzec, 1809), all beginning with the words "Rab shel 'Olam" (Master of the World), are composed especially for Hasidim.

A modern Hebrew hymnal, "Zimrat Yah," by Moses Zele, Hamburg, 1857, intended to replace the old devotions, "which tend to degrade us in the eyes of the non-Jewish world," did not find recognition among the Jewish people, and is hardly known in devotional literature.

In the Vernacular: For those who could not read Hebrew, devotional works were composed in the vernacular. In the geonic period the Aramaic was the substitute (see Ber. 3a, Tosef.). A few of the Aramaic devotions are still in use in the selihot, such as "Ra'mana Eddekar Lanu," "May the Merciful remember us of the covenant of Abraham, the beloved," etc.; and the soliloquy "Maran de-bashamaya," "Our Master in heaven, to Thee we beg, even like a captive to his master. All captives are ransomed with money; but Thy people Israel, with mercy and supplication. O grant us our request and prayer, and let us not return from Thy presence in vain."

Most of the vernacular devotions are in the Judæo-German dialect, beginning with the seventeenth century, and were written mostly by women to supply the religious needs of their sex on various occasions. The earliest, "Tehinnot u-Bakkashot" (Devotions and Petitions) was published at Basel in 1609 (Zedner, "Cat. Hebr. Books Brit. Mus." p. 448). A German pastor, Willemer of Gelnhausen, translated the "Tehinnah," published at Amsterdam in 1650. The "Seder Tehinnot," for week-days and holidays, published at Frankfort-on-the-Main in 1723, contains

also prayers for removing the priests' share of the dough ("hallah"; p. 5); for baking the Sabbath cakes; for putting on Sabbath garments; before the immersion ("tebilah"); for the state of pregnancy, and before childbirth; for a rich woman seeking divine guidance in disposing of her fortune in good deeds (p. 12). Another tehinnah, of Sulzbach, 1733, includes a petition for pious and scholarly children (p. 17b). A "Tehinnah for Jewish Women," Vienna, 1838, for Sabbaths and holidays, includes a prayer to be recited on lighting the Sabbath candles, and a blessing on occasion of the approaching new moon.

The tehinnot written in Yiddish are of late origin, and most of them have been published at Wilna from 1870 to date. The popular ones are:

Yiddish Tehinnot. (1) "Tehinnot Immahot" (The Mothers — Sarah, Rebekah, Rachel, and Leah), to be said during the month of Elul, composed by Seril, daughter of Jacob Dubno and wife of Mordecai Rapoport, Wilna, 1873. (2) "Tehinnot Sheloshah She'arim" (Three Gates), by Sarah, daughter of Mordecai, former rabbi of Brest, Russia, for the following occasions: first gate, the precepts of *תענית*, abbreviation of "hallah," "niddah," "hadlakah," for giving the priests' share of the dough, for observing the period of menstruation, and for lighting the Sabbath candles; second gate, for blessing the coming new moon; third gate, for the Penitential Days ("Yamim Nora'im"). The author's account of herself on the title-page reads: "Ich, Soreh, bass tovim, tuhes dem lieben Gott, boruch-hu wegen," etc. (I, Sarah, daughter of a good man, do this for the sake of the loving God, blessed be He) Wilna, 1873). (3) "Tehinnot Sha'are Teshubah" (Gates of Penitence), for the month of Elul, by Mrs. Shifra, daughter of Judah Leib, rabbi of Lublin, Wilna, 1875. (4) "Erez Yisrael" Tehinnah, Wilna, 1875, credited to Deborah, wife of R. Naphtali, formerly chief (nasi) of Palestine. In other editions it is called "The Jerusalem Tehinnot at the Wailing Wall."

The names of the authors are nearly all fictitious and high-sounding, and have been affixed in order to make the tehinnot salable. It is known that some of the tehinnot were written by indigent students of the Rabbinical Seminary of Wilna or Jitomir (among others, Naphtali Maskil le-Ethon), and by Selekowitz, for nominal sums, and that the publishers stipulated that the writers should fashion the composition in tearful and heart-rending phrases to suit the taste of the women readers. This forced cultivation of devotional feeling rendered the tehinnot exaggerated and over-colored, and this did not escape the criticism and ridicule of the men against the women who were such devotees of the tehinnot.

The first attempt made to edit the tehinnot in a modern language was by Joshua Heshel Miro in his collection "Gebetsbuch für Gebildete Frauenzimmer Mosaischer Religion," Breslau, 1833. This was in Hebrew characters; a later edition was transliterated into German type by S. Blogg.

Letteris' "Tahnune Bat Yehudah," translated from the German into Dutch ("Gebeden voor Israëlitische Vrouwen," Amsterdam, 1853), was dedicated to Lady Judith Montefiore. S. Baer published "Kol Bat Ziyon" (The Voice of the Daughter of Zion), Rüdellheim, 1856, prayers for every day in the

year and for all circumstances of life, for married and unmarried women. Devotions in Hungarian have been written by Immanuel Löw, M. Stern, and A. Kiss.

A very popular compilation is that of Fanny Neuda (*née* Schmiedel), "Stunden der Andacht," Brunn, 1859, for girls and young women. It was translated into English by M. Mayer and published by L. H. Frank, New York, 1866. The best-known compilations in English are Ascher, "Book of Life," London, 1861; Bresslau, "Devotions for the Daughters of Israel," *ib.* 1861; Cohen, "Prayers for Family Use," *ib.* 1884; Miss Montagu, "Prayers for Jewish Working Girls"; Baroness L. D. Rothschild, "Prayers and Meditations," *ib.* 1869; Alice Lucas, "The Jewish Year," *ib.* 1898, 1903; Gustav Gottheil, "Sun and Shield," New York, 1898, taken chiefly from non-Jewish sources; Annie Josephine Levi, "Meditation of the Heart," New York, 1900 (also drawn from non-Jewish sources), with introduction by Gustav Gottheil.

DEW (טל).—**Biblical Data:** Moisture condensed from the atmosphere and gathered in small drops, specially upon the upper surface of plants. In Palestine dew "falls" in cloudless nights during the summer, and refreshes the vegetation, which without it would suffer. The westerly windssweeping across the sea in the late summer months deposit this moisture in the form of mist like fine spray upon the summer crops; hence, "the dew of Hermon that cometh down upon the mountains of Zion" (Ps. cxxxiii. 2, Hebr.). Dew and rain are closely related to each other in Hebrew literature as sources of fertility and of regeneration of life (Micah v. 6 [7]). In the rainless season "the dew assuages the heat" (Ecclus. [Sirach] xviii. 16, xliii. 22); it is therefore as precious as rain (Gen. xxvii. 28; Deut. xxxiii. 13, 28; Zech. viii. 12), and the withholding of it, as of rain, is a curse (II Sam. i. 21; I Kings xvii. 1; Hag. i. 10). The summer dew is so copious as to saturate the fleece of wool (Judges vi. 37 *et seq.*) or the hair of the wanderer (Cant. v. 2). Suddenly it falls (II Sam. xvii. 12), and gently (Deut. xxxii. 2; Prov. xix. 12); it lies all night (Job xxix. 19), and rises and disappears in the morning (Ex. xvi. 14; Hos. vi. 4). Dew as the vivifying power is used as a simile of God (Hos. xiv. 6 [5]); it also symbolizes freshness (Ps. cx. 3: "the dew of thy youth") and resurrection: "A dew of herbs is thy dew, and the earth shall cast off the spirits of the dead" (Isa. xxvi. 19, Hebr.).

—**In Post-Biblical Literature:** According to Enoch lx. 20, "the spirit of the dew dwells at the ends of the heaven, close to the chambers of the rain, and its course is in winter and in summer." Winds coming from the middle of the twelve portals bring

beneficial dew of prosperity; from other portals, hurtful dew accompanied by locusts and other calamities (Enoch lxxvi. 8 *et seq.*). This is also in accordance with rabbinical tradition: "In the sixth heaven, Makon, there are treasures of hurtful dews and of beneficial dewdrops" (עליית טללים רעים וע' אנלים; Hag. 12b). "Between Pesah and Shabu'ot a prayer is offered that God may preserve the people from the hurtful dews" (Lev. R. xxviii., with reference to Jer. v. 24). The two loaves of bread offered on Shabu'ot are waved to and fro in symbolical petition to the Ruler of heaven and earth and of the four winds to keep off the unpropitious winds and dews (Suk. 37b; Lev. R. l.c.).

Only on account of Israel does dew come as a blessing upon the world: on account of Jacob, who studied the Torah, or for the sake of Job, whose doors were kept wide open for the needy (Gen. R. lxvi.). "God promised Abraham under an oath never to let dew cease to bless his descendants, and therefore Elijah could not stop its fall by his words" (Yer. Ta'an. i. 63d; compare Bab. 3a, b). According to Samuel bar Nahmani, dew comes as a heavenly gift and by the merit of no man (Yer. Ta'an. l.c.; Ber. v. 9b, after Micah vi. 6). On the other hand, the opinion is expressed that since the destruction of the Temple no dew of unmixed blessing falls (Soṭah ix. 12), and this on account of the cessation of the heave-offering and the tithes (Shab. 32b).

But the "dew of the Resurrection" is also stored up in 'Arabot, the highest heaven (Hag. 12b). By this dew the dead are revived (Yer.

Dew of the Resurrection. Ber. v. 9b; Yer. Ta'an. i. 63d, with reference to Isa. xxvi. 19). In Hag. 12b, Ps. lxviii. 10 (9) is referred to:

"Thou didst send a plentiful rain to revive thine inheritance" (Hebr.). This verse is construed to allude to an incident at the giving of the Law on Mount Sinai. "When God appeared amidst the trembling of the earth on Sinai, life fled from the people of Israel and from all the living people in the land of Israel; and the angels said: 'Dost Thou desire to give Thy Law unto the dead or unto the living?' Then God dropped the dew of Resurrection upon all, and they revived." Regarding the Prayer for Dew and the liturgical poetry of Kalir for the first day of Passover, which contains many allusions to the dew of Resurrection, see TAL, PRAYER FOR.

DEW, THE PRAYER FOR. See TAL.

DEZA, DIEGO DE: Second inquisitor-general; Bishop of Salamanca, and professor of theology at the university of that city; subsequently Archbishop of Seville, in which city he died 1506; friend and protector of Christopher Columbus. After Tomas de Torquemada's death Deza was appointed inquisitor-general of all Spain (Sept. 1, 1499). While he held office, 1,664 persons were burned alive, and various penances and punishments were inflicted upon 52,456 persons. Deza was of Jewish descent, and in spite of the cruelty with which he persecuted his kindred, the Maranos, he was, toward the end of his life, publicly accused of being a Jew at heart.

He was buried in Seville Cathedral. Compare INQUISITION.

D. M. K.

DHU NUWAS, ZUR'AH YUSUF IBN TUBAN AS'AD ABI KARIB: Jewish King of Yemen, 515-525. According to the Arabian historians the name "Dhu Nuwas" was given him on account of his curly hair (Ibn Khaldun, "Prolegomena," p. 311; Hamzah of Ispahan, "Annals," i. 133). Von Kremer connects the name with a fortress "Nuwash" in southern Arabia ("Süd-Arab. Sage," p. 90); but the Arabic derivation is substantiated by the name "Masruk," given him in the Syriac translation of John Psaltes. In Greek sources he is known as *Δουναάν* (acc.) or *Δουναός* (nom.); while the name **דְּחֻ נֻוַּאס** found in John of Ephesus has been explained by Von Gutschmid as the Greek *τῶν ἐξω Ἰουδαίων*. In Ethiopic accounts he is called "Phineas." If the contradictory and sometimes legendary accounts of the personality of Dhu Nuwas given by the Arabian writers can be trusted, he was not a Jew by birth, but embraced Judaism

after ascending the throne, taking the name of "Joseph." Having killed the debauched usurper Khani'ah Yanuf Dhu Shanatir, who endeavored to maltreat him, Dhu Nuwas successfully propagated Judaism in Yemen.

His zeal for Judaism brought about his fall. Having heard of the persecutions of the Jews by the Byzantine emperors, he retaliated by putting to death some Byzantine merchants who were traveling on business through Himyara. This destroyed the trade of Yemen with Europe and involved Dhu Nuwas in a war with the heathen king Aidug, whose commercial interests were injured thereby. Dhu Nuwas was defeated (521), but succeeded in reestablishing his kingdom. Soon, however, he entangled himself in a new difficulty. He made war against the Christian city Najran, in Yemen, which was a dependency of his kingdom; and on its capitulation, in spite, it is said, of his promise of immunity from punishment, he offered the citizens the alternative of embracing Judaism or being put to death. As they refused to renounce their faith, he executed their chief, Harith (Aretas) ibn Kaleb, and three hundred and forty chosen men.

This event caused a great stir among the Christians; and the Roman emperor Justin I. requested the Negus Elezbaa of Ethiopia to

Attacked from Abyssinia. march against the Jewish king. Accordingly an Ethiopian army crossed the Red Sea to Yemen. Dhu Nuwas endeavored unsuccessfully to prevent its landing. The ensuing engagement terminated disastrously for Dhu Nuwas. His city of Zafora (Thafar), together with his queen and the treasure, fell into the hands of the enemy. Preferring death to capture, Dhu Nuwas rode into the sea and was drowned.

The chief authority for these facts is the Syriac letter of Simeon of Bet-Arsham, which is found in the histories of John of Asia, Pseudo-Denys of Telmahre, and Zacharias, the best edition of which is that of Guidi ("Reale Acad. dei Lincei," 1881). Grätz, Pretorius (1870), George (1883), Halévy, and

Pereira have thrown doubts upon the authenticity of the narrative, which has also found its way into the "Martyrium Arethæ." Halévy, especially, has tried to prove the apocryphal character of this letter, because of certain contradictions which it contains, and has endeavored to show that it was written at the time of Justinian and not of Justin. The consolatory epistle written in 519 to the Himyaritic Christians by Jacob of Serug ("Z. D. M. G." xxxi. 402 *et seq.*) merely speaks of their persecution, and says nothing about the conversion of the king. John Psaltes, Abbot of Beth Afthonius (d. 538), wrote a Greek hymn, which was afterward translated into Syriac, in which he speaks of the persecutions, but does not in any way mention the Jews. Neither Cosmas Indicopleustes, who was at Adulis when the Christian King of Aksum, Elezbaa, was preparing his expedition against the Himyarites, nor Procopius, the historian of Justinian's wars (d. 565), mentions the events at all. L. Duchesne, while accepting Halévy's criticism of the letter of Simeon, still holds to the historicity of the general facts, as do also Nöldeke and Dillmann. Glaser ("Skizze," p. 534) suspects that the stories told in regard to Dhu Nuwas' cruelties are pure fictions. Mohammed knew the story (sura 85); it is mentioned in the celebrated South Arabian "Kasidah" (see the ed. of Von Kremer, p. 20, Leipzig, 1865), and by the Himyarite Nashwan ibn Sa'id in his "Shams al-'Ulum" (D. H. Müller, "Süd-Arab. Studien," p. 8, Vienna, 1877). The unanimity of Arabian tradition, and the presence of Jews in Yemen as attested by the Jewish inscriptions found there by Glaser, lead to the belief that the account of the Jewish king may be in the main historical, though the particulars regarding his cruelty toward the Christians are probably largely exaggerated.

M. FR.

DIABETES MELLITUS: A constitutional disorder of nutrition, characterized by the persistent elimination of grape-sugar in the urine. It is considered to be a disease of the wealthier classes, and is more common in cities than in the country. Dr.

Bertillon has demonstrated that the

A Disease mortality from diabetes is higher in all of Civ- the wealthy districts. Persons of a ilization. nervous temperament are very often affected, and it is not uncommon to find a history of insanity, consumption, and gout among the relatives of diabetics. Sudden emotional excitement, grief, terror, worry, and anx-

ity may each and all be followed so closely by diabetes that there is no room for doubt as to their having occasioned it. It is well known as a result of commercial disaster. "When stocks fall, diabetes rises in Wall Street," says Dr. Kleer. It has also been noticed that engine-drivers are especially subject to this disease; this fact is presumably due to the excessively anxious nature of their occupation.

Diabetes is met with, in varying degrees of frequency, in every country. It is stated to be extremely common among the educated classes of natives in India and Ceylon. The disease is almost unknown among the Chinese, the Japanese, and the negroes of Africa; but many cases have been observed among negroes in the United States. Many competent and reliable observers show that diabetes is more common among the Jews than among any other European races; and statistics prove conclusively that the disease occurs among Jews from two to six times as frequently as it does among non-Jews, as can be seen from an examination of the following tables:

653 suffered from diabetes—289 Christians and 364 Jews. Of his entire clientele 13.8 per cent were diabetics, and there were 124 diabetic Christians per 1,000, as against 155 per 1,000 of Jewish origin. The slight relative excess of the Jewish diabetics is, according to Pollatschek, only apparent. He believes that the circumstance that Jews apply oftener than Christians to the sanitariums for treatment is due to their greater wealth, and that, consequently, as a bath physician in Carlsbad, he saw more patients of Jewish origin. He finally draws attention to the fact that the mortality from diabetes in England is quite high, although there are comparatively few Jews there, and claims that it is questionable whether Thomas, Willis, Dobson, and Rollo, who first observed and described diabetes, had Jewish material for their researches.

Both of these views—(1) that the Jews suffer more frequently from diabetes than other races, and (2) that they are not more often affected—are probably well founded. It is only a question of the nativity of the Jews: the Jews in Germany, for example, are decidedly more diabetic than those in Russia, England, and France, and the difference of opinion

Jews are attracted to these resorts in relatively greater numbers than other races, because they more often seek relief of celebrated physicians and specialists. Thus, Dr. Arnold Pollatschek ("Zur Aetiologie des Diabetes Mellitus," in "Zeitschrift für Klinische Medizin," xxxii. 478-482, Berlin, 1901) shows that in the course of ten years (1891-1900) he treated 4,719 persons, of whom 2,381 were Christians, 2,333 Jews, and 5 Mohammedans. Of these patients

From this table it is evident that the mortality from diabetes of the Jews in New York is relatively more than double that of the rest of the population of the city.

The morbidity of New York Jews from this disease has been investigated by Dr. Julius Rudisch ("Mount Sinai Hospital Report," 1898-99, pp. 26-29); and the following table gives his statistics of the cases of diabetes which were treated in Mount

Sinai Hospital during the years 1890-1900, compared with those of four other New York hospitals for the same period:

the total number of patients were Jews, we find that 20,500 were treated. The whole number of diabetics was 196, and of these 86 were Hebrews—a matter of 43 per cent. If we now assume 20,500 as the total number of Jewish patients, we find that diabetes is nearly three times as prevalent among Hebrews as among any other race or creed.”

It has been observed by many clinicians that the Jews bear diabetes better than other races; thus, Van Noorden (*l.c.* p. 176) states that it is remarkable how some patients will endure glycosuria for years without much discomfort, succumbing at last—perhaps after decades—to what is supposed to be heart failure. This peculiar type of diabetes, and this remarkable endurance by the human body of the anomalous metabolism of diabetes, are more frequently met with among women than among men, and almost exclusively among Jews.

Dr. Stern has pointed out another peculiarity; viz., that Jews dying of diabetes succumb through coma more frequently than non-Jews. Thus, while the ratio of fatal coma cases occurring in New York city in 1899 to the total mortality from diabetes was as 60 to 202, or 29 per cent, coma occurred in 43 per cent of the cases of diabetes among Jews.

It has also been shown that diabetes is not a racial disease of the Jews. Sée has observed that it is no more frequent among the Jews in

France than among the rest of the population of that country. Rudisch says that while the total number of patients admitted into the Mount Sinai Hospital in New York is three times as large as that of patients who are natives of Germany, the striking feature is that the diabetic patients among the latter outnumber in the proportion of 6 to 1 those among the patients who are Russians. He attributes this to the circumstance that the Russo-Jewish patients of the hospital belong to the poorer laboring classes and are insufficiently nourished, whereas the major-

ity of the German Jews represent the better classes of workmen as well as persons engaged in mercantile and professional pursuits.

The Russian and Polish Jews in New York show a lower mortality from diabetes than many of their non-Jewish neighbors. Of the 54 Jewish diabetics who died in that city during 1899, as shown by Stern (*l.c.*), 17, or 31.48 per cent, were born in Russia; and it is well known that at least 65 per cent of the Jews in New York are natives of Russia or of Poland. These data tend to show that diabetes is most frequently met with among German Jews, and that Jews from other countries are not more liable to contract the disease than are the other inhabitants of the city.

Many reasons have been given for the excessive predisposition of Jews to diabetes. Consanguineous marriages, more frequent among the Jews than among most other races (see **Reasons Given.** ANTHROPOLOGY and CONSANGUINITY), have been thought by some (Van Noorden, Stern, Frerich, and many others) to be the cause. Van Noorden (“Ueber Diabetes Mellitus,” in “Berliner Klinische Wochenschrift,” 1900, p. 1117) even thinks that the frequent intermixture of Jewish with Indo-Germanic blood has a great deal to do with the frequency of diabetes among Jews. These views are, however, untenable, because most modern authorities deny that consanguineous marriages, provided they are contracted between healthy individuals, are in any way detrimental to the offspring; and it is not known that racial intermixtures, which are frequent in modern civilized countries, have any etiological relation to the disease.

The alleged sedentary habits of the Jews are assigned by some authors (Saundby, Kleen, and others) as a predisposing cause. Diabetes is a disease brought about by high living, overfeeding, lack of proper exercise, etc., and most of the rich Jews who apply to the sanitariums for treatment are precisely of the class among which these conditions are most prevalent. This is disproved by Stern’s statistics of the mortality from diabetes in New York city during the year 1899, which conclusively show that nearly 70 per cent of the deaths from that disease

occurred in tenement-houses, 15 per cent in coroners' cases, and only 15 per cent in private houses, which would indicate that high living has practically little to do with diabetes (Stern, in "Jour. Am. Medical Assoc." Jan. 26, 1901).

With the present knowledge of the pathogenesis of diabetes, the only reasonable explanation of the frequency of the disease among Jews is their extreme nervousness, the Jews being known as the most nervous of civilized peoples.

It remains to be mentioned that throughout the world the Jews are principally town-dwellers, two-thirds of them living in large centers of population; and that diabetes seeks most of its victims among the people who live under the strain, hurry, and bustle of modern city life. "The Jews are the children and grandchildren of town-dwellers," says Bouchard. "In the long run the unfavorable hereditary influences are not rectified for them by the frequent intermarriage of the urban with the country people, as is the case with the rest of the population. The Jews marry exclusively among themselves; first cousins from the paternal or maternal side find no barrier to marriage, and immediately on being born the young Israelite receives the accumulated unfavorable (hereditary) influences, which he further develops during his lifetime, and which tend to the diseases that are generated by disturbed nutrition, particularly diabetes" ("Leç. sur les Maladies par Ralentissement de la Nutrition," Paris, 1892).

DIADEM. See CROWN.

DIAL: Device for displaying the time by means of the shadow of a gnomon or style thrown by the rays of the sun on a graduated disk. It is generally agreed that by the "steps of Ahaz" (II Kings xxi. 9, 10; Isa. xxxviii. 8, Hebr.) some device for measuring time, in the form of a sun-clock, is intended. The expression was so understood by some of the old versions (Targ. אֲבָן שְׁעִיָּא; Sym. ὡρολόγιον; Vulg. "horologium"); but there are no means of determining with certainty the nature, shape, and construction of the contrivance. The view that a dial in the stricter sense of the term—that is, a plane with a graduated scale and a vertical style or gnomon—is meant, is not supported by the text, since the usual and natural meaning of מַעְלֹת is "steps," not "degrees."

Following the literal and usual meaning of the words, most exegetes assume that the מַעְלֹת were actual steps; that is, a circular staircase leading up to a column or obelisk, the shadow of which, falling on a greater or smaller number of the steps, according as the sun was low or high, indicated the position of the sun, and thus the time of day. Such an obelisk was erected during the reign of Augustus, on the Campus Martius in Rome. As, according to the account in II Kings, the shadow could go forward or recede ten steps, the step-clock of Ahaz must have had at least twenty steps, each of which, therefore, did not mark a full hour of the day, but some

smaller period of time. Herodotus (ii. 109) ascribes to the Babylonians the invention of the pole (i.e., the concave dial) and the gnomon, and the division of the day into twelve parts. As Ahaz had intercourse with the Assyrians (compare II Kings xvi. 10), it is likely that he obtained from them a Babylonian model for his clock.

In 'Eduy. iii. 8 the stone-clock and its style (properly "nail") are mentioned (מַסְמַר שֶׁל אֲבָן שְׁעִיָּא). Maimonides, in his commentary, describes it as a circle on a broad, smooth stone set into the ground, and marked with straight lines, which bore the numbers of the hours. The style, the height of which was usually less than one-fourth the diameter of the disk, cast a shadow upon the lines and indicated the number of hours passed.

DIALECTIC, THE. See PERIODICALS.

DIALECTICS, RABBINICAL. See PILPUL.

DIALECTS: Under this heading are considered the various forms of those languages, other than Hebrew, which have been spoken or written by the Jews, and which have been modified by them, either through the introduction of Hebrew words, usages, and syntax, or by the conservation of older forms of speech which have gone out of use in the lands where the languages to which they belong were originally spoken. When the Jews lost their home and became a race without a country, they were naturally forced to adopt the languages of the peoples among whom they came to dwell; but Hebrew continued to be their language of prayer and of literary composition. They started out almost as bilingualists; for Aramaic is found not only in the Bible, but also in many of the oldest prayers (compare the use of the expressions "leshon hedyoṭ" [B. M. 104a] and "leshon ḥol" [Ber. 40b] to denote "Aramaic"). In a short time they became polyglots, while Hebrew, because of the Bible and their ritual, remained their holy language. Thus Judah ha-Levi refers to Abraham as using Hebrew as a sacred language and Aramaic as a profane tongue ("Cuzari," ed. Cassel, p. 175).

According to Abraham Abulafia, the Jews of Sicily used not only Italian and Greek, but also Arabic, which language they had adopted at the time when that island was under the dominion of the Arabs ("Rev. Etudes Juives," ix. 149). The first Jewish settlers in Corfu came from Greece: to these were added emigrants from Apulia, and in the fifteenth and sixteenth centuries others from Portugal; so that in the synagogues of Corfu the hymns are sung in Hebrew, Greek, Italian, and Portuguese ("Abhandl. des Fünften Intern. Orient.-Congresses," p. 228, Berlin, 1882).

Benfey's dictum, "The Jews have always spoken a jargon" ("Z. D. M. G." xxxvii. 606); Nöldeke's remark that wherever Jews live together in large

numbers they peculiarly color the language they speak ("Alttest. Lit." p. 248); and Wellhausen's saying in regard to the Jews of northern Arabia, "The Jews spoke among themselves a gibberish which the Arabs found it difficult to understand" ("Skizzen," iv. 13), are only partially true, as in many communities in Europe Hebrew was spoken down to the eleventh century (Zunz, "Z. G." p. 187). And where the Jews of Europe wrote the languages spoken in the countries in which they dwelt, they wrote them, up to the fifteenth century, with remarkable exactness, though often using Hebrew characters (Abrahams, "Jewish Life in the Middle Ages," p. 359). Curious instances of what Steinschneider calls the "linguistically amphibious life of the Jews" ("Monatsschrift," xlii. 34) are: the macaronic verses written in Hebrew and Arabic by such South Arabian poets as Shibzi; some poems of Leo de Modena, veritable "tours de force," which can be read either as Hebrew or as Italian; the Hebrew-Arabic-Romance glossaries called "Makre Dardeke" (Schwab, in "Rev. Etudes Juives," xvi. 253 *et seq.*); and the Hebrew-English-Spanish "Vocabulary" by Jacob and Hayyim Moreira (Perles, "Beiträge zur Geschichte der Hebräischen und Aramäischen Studien," p. 143).

Jewish dialects are characterized by foreign words treated as Hebrew; or by Hebrew words treated as foreign words; or by the use of words which have long since disappeared from the ordinary speech of the country; or by the retention of the ancient pronunciation of the language. Any one of these peculiarities will give a definite character to a Jewish dialect without its becoming of necessity a jargon, though some of the later developments of Judæo-German almost deserve that name. The Hebrew words introduced into the newly acquired language came largely from the Bible (which was the starting-point and foundation of all Jewish studies), from the liturgy as used in the synagogue and the home, and from peculiar Jewish social customs.

The earliest non-Hebrew language with which the Jews became acquainted was the Aramaic; but there is no information as to how far they modified that language in the course of time. The Aramaic portions of the Old Testament show some peculiarities, which are possibly due to the Masorites. The Aramaic which the Jews spoke in Babylon, and which Arabic writers are wont to call "Nabataean" ("Jew. Quart. Rev." xii. 517), is proved by the Mandaean dialect to have been similar to the language spoken by other peoples in that neighborhood; and the later development of a distinct Western Judæo-Aramaic in Palestine and Syria was due largely to the rivalry between Church and Synagogue. The Aramaic spoken by the Jews in New Testament times, as well as the dialect represented in the Palestinian Talmud and in some of the Targumim, probably differed little from the language of the non-Jewish population. How small these differences were, may be gaged from a study of the modern Aramaic dialects spoken in northern Mesopotamia. The Jews living near Lake Urmi, in western Persia, and even those across the Turkish border, still speak a form of Aramaic which is only differentiated from the

other modern Aramaic dialects by the introduction of Hebrew words and phrases. This dialect is called by the Jews "Lishanah shel Ibrani" (Hebrew Tongue), or "Lishanat Jabali" (Mountain Tongue), or "Leshon Galut" (Tongue of the Exile; see Gottheil in "Jour. Amer. Or. Soc." xv. 297 *et seq.*). The language written and spoken by the Samaritans around Nablus, formerly believed to be a mixture of Aramaic and Hebrew, has been proved by later investigation to be a Western Aramaic dialect interspersed with a number of Hebrew words (compare Nöldeke in Cheyne and Black, "Encyclopædia Biblica," i. 284b).

From the time of Alexander the Great the Jews came largely under the influence of Hellenism, which affected not only the thought and the practises, but also the language of the Jews; and many Greek words and phrases found entrance into their vocabulary. In how far the Jews adopted

Use of Greek by Jews. Greek speech in the mother country, it is difficult to say; but in the Greek cities along the coast they must have

heard that language spoken and must in many cases have used it. In the Diaspora, however, Greek soon succeeded in ousting Hebrew and Aramaic, and it became the vernacular of the Egyptian Jews. In former times it was held that Hellenistic Greek, which lived down to about the year 600, was the dialect of the Greek-speaking Jews in the Orient; but the study of Greek dialectology and the numerous finds of papyri and ostraka within recent years have convinced scholars that the Greek spoken by the Jews in Egypt and found in their literary productions is part and parcel of the general Hellenistic *κοινή*. Philo and the Jewish Alexandrian philosophers and poets differ as little in point of language from their non-Jewish neighbors as does Josephus from the other historians of his time who wrote in Greek. Even the translation of the Old Testament into Greek does not represent any special Jewish dialect of this *κοινή*. It is, of course, full of Hebrew words, expressions, and syntactical constructions; but these new elements are due, in the largest measure, to the attempt of the translators to adhere slavishly to the original Hebrew; and Blass is probably right in asserting that "no one ever spoke in this manner, not even the Jewish translators" ("Grammatik des Neutestamentlichen Griechisch," p. 2, Göttingen, 1902).

This is true of the New Testament also. Though Jewish theological ideas and even individual expressions have left their mark on the Greek where in some cases the books were translated from a Hebrew or Aramaic original, the language has in no measure the character of a Jewish dialect. Blass (*ib.* p. 3) calls it a moderated Attic Greek. Deissmann has very properly pointed out that the difference between a translation and an original in this Hellenistic Greek may be seen if the prologue to the Greek Book of Ecclesiasticus be compared with the body of the book itself (Herzog-Hauck, "Real-Encyc." vii. 638). It is therefore entirely wrong to speak of a Biblical Greek, a Septuagint Greek, a New Testament Greek, or a Judæo-Greek dialect. The same is true of later times, when Jews settled again in Greece and Constantinople. The Greek found in the

Bible translations published during the sixteenth century (see *JEW. ENCYC.* iii. 185-197), though written in Hebrew letters, does not differ from the ordinary spoken Greek of the day (*"Hebr. Bibl."* xv. 40; *"Rev. Etudes Juives,"* xxii. 258; *"Jew. Chron."* July 26, 1901, p. 25).

When the Jews came under the influence of Arabic culture, they readily accepted the language of their masters, and, from Morocco in the west to Bagdad in the east, they spoke and wrote Arabic in all its various forms. The language of the old Jewish poets in Arabia differs in no respect from that of their heathen and Mohammedan contemporaries. But in course of time Arabic became a second mother tongue to the Jews of the Orient, such as

only the Judæo-German became for the Jews in eastern Europe. In con-
Use
of Arabic. tradistinction to the latter, however, Arabic was also the literary language of the Oriental Jews; into which they not only translated their theological and religious books, but in which they also wrote upon all conceivable topics. It might, therefore, be proper to speak rather of Judæo-Arabic dialects than of one particular dialect. The term must not, however, be misunderstood. Saadia, in his Bible translation, uses many Arabic words in the sense of their Hebrew equivalents; but this is no criterion. In his philosophical work he writes, as did Judah ha-Levi, Maimonides, Ibn Ezra, and others, a pure Arabic; a degree more "vulgar" than that of his Mohammedan neighbors, but "Jewish" only in the introduction of Hebrew technical terms and Hebrew quotations (Friedländer, *"Sprachgebrauch des Maimonides,"* p. x., Frankfurt, 1902).

It has been customary to look down upon Judæo-Arabic as merely the "Middle Arabic" of the day interspersed with Hebrew words and phrases. But here again, as is the case with Judæo-German, many of the peculiarities observed are survivals of older forms of the spoken Arabic dialects (see Kampffmeyer in *"W. Z. K. M."* xiii. 247). Thus some of the peculiarities in the Arabic dialect of the Moroccan Jews may be survivals of the Arabic spoken in Spain, which the Jews carried with them at various times when they were banished from the peninsula; and this may explain what Talcott-Williams says of this dialect, that it "comes near being the worst and most obscure patois spoken anywhere and dignified by the name of Arabic" (*"Beiträge zur Assyriologie,"* iii. 572).

The Jews in Persia also have developed a distinct form of Judæo-Persian. Wilhelm Geiger speaks of it as "jargon used as a vernacular" (*"Grundriss der Iranischen Philologie,"* i. 408); but here again, although Hebrew theological and religious terms have crept in, older forms of Persian have been preserved which make the dialect an interesting one. It is in reality only a development of the New High Persian with local dialectic peculiarities. It occasionally shows striking coincidences with the Pazend; and Horn thinks that some of the translations of the Biblical books which have come down were made in neighborhoods in which Parsees lived.

Thanks to the labors of Bacher, Horn, Salemann, and others, renewed attention has of late years been

paid to the Judæo-Persian. There are even various subdialects to be recognized. The mountain Jews in the Caucasus speak what they them-

Judæo- selves call "Farsi-Tat," which differs
Persian. in few respects from the Tat spoken in the province of Baku and the peninsula of Apsheron (see "Seventh Report of the Thirteenth International Oriental Congress," p. 12). The language of the Jews of Bokhara, which is also spoken by the Bokharan Jews in Jerusalem, has its origin in the Tadshiki spoken by the Iranians in central Asia. Quite an extensive literature exists in Judæo-Bokharan; and not a few books have been printed in this dialect. If Salemann is right (*"Litteraturblatt für Orientalische Philologie,"* i. 187), there are two dialects to be distinguished in Bokharan, because the Jews of that place came originally from Tus and from Meshed. Of the Judæo-Persian, Nöldeke says (*"Z. D. M. G."* li. 70) that "the imitation of Hebrew has caused the most barbaric distortion of the Persian." J. de Morgan speaks of the language of the Jews of Sihne (*"Jour. Asiatique,"* 8th series, xix. 197); but further details have not been published.

Of the European dialects, in addition to the Greek, spoken by the Jews, mention must first be made of Judæo-Spanish. It had its origin in the Spanish peninsula itself; for Francisco Fernandez y Gonzalez published in 1884 (*"Boletin Acad. Hist."* v. 299; compare *"Rev. Etudes Juives,"* x. 243) three letters written in Judæo-Spanish and in Hebrew characters by Jews living in Spain before the expulsion. As generally understood, however, the term signifies the Spanish language as used by the exiles from Spain in northern Africa, in the East, and in certain parts of Europe, where they settled. It is

called also "Ladino," "Espanol," and
Ladino. "Spaniolic." A very large literature has grown up in this dialect, which does not differ from the regular Spanish except in the fact that occasional Arabic words are to be found, and older forms which have gone out of use in the modern developments of the language in the peninsula. According to Ticknor, a modern Judæo-Spanish newspaper could be read with perfect ease by a Spaniard of the time of Alfonso the Wise. It is interesting to note that parallel to the Judæo-Spanish there is an Arabic-Spanish literature, that of the Moriscos, descendants of the former masters of Spain (Grünbaum, *"Neue Beiträge zur Semitischen Sagenkunde,"* p. 245; *idem*, *"Jüdisch-Spanische Chrestomathie,"* pp. 1 *et seq.*).

The Jews were driven out of France in 1306; but before that time they had settled in large numbers both in the north and in the south. It was especially in Provence that during the early Middle Ages they developed a large literature, and evidently adopted the Provençal dialect which they heard spoken around them. Remnants of this Provençal are to be found not only in the 2,500 glosses in the commentaries of Rashi, Joseph Caro, Samuel ben Meïr, Eleazar of Beaugency, and the Tosafists (Schwab, *"La Transcript. des Mots Europ. en Lettres Hebr."* in *"Mélanges Havet,"* p. 317, Paris, 1895), but also in original poems (*e.g.*, "The History of Esther" by Israel Caslari of Avignon, which was

read on the Feast of Purim; "Romania," 1892) and in prose works and liturgies (*e.g.*, the elegy on the auto da fé at Troyes, 1288, by Jacob ben Judah of Lorraine; "Romania," iii.; "Rev. Etudes Juives," i.). These Provençal works are written in Hebrew script; and the Judæo-Provençal represented in such writings is a faithful reproduction of the Provençal language of the time, modified by the introduction of Hebrew words and by its transliteration into Hebrew characters (see Güdemann, "Geschichte des Erziehungswesens," i. 26, Vienna, 1880; Oesterreicher, "Beiträge zur Geschichte der Jüdisch-Französischen Sprache im Mittelalter," Czernowitz, 1896).

Strange to say, there are no traces of a Judæo-Italian dialect, even though some macaronic poems, as mentioned above, may be read as either Hebrew or Italian. The Jews in Italy very seldom wrote Italian in Hebrew characters; the "Tefillot Latine," Morucci Dato's sermons, and Moses Catalano's poem being among the few cases in which they did (comp. "Rev. Et. Juives," x. 137). Italian literature began with Dante in the thirteenth century; and as it grew up under their very eyes, the Jews soon took part in its development, and did not mix the language with Hebrew (see Steinschneider, in "Monatsschrift," xlii. 116, 420; Güdemann, "Geschichte des Erziehungswesens . . . der Juden in Italien," p. 207).

The most important Jewish dialect is of course the Judæo-German. The name by which it was formerly known, "Iwri-Teitsch," shows

Judæo-German. at once that it is a more mixed dialect than any of those already mentioned.

The Jews in the Rhine provinces originally used French for their daily intercourse (Güdemann, "Geschichte des Erziehungswesens . . . in Frankreich," pp. 114, 275). Whatever the character of this French may have been, it certainly influenced the German that was spoken by them during the period from the eleventh to the fourteenth century; for the frontier between France and Germany was open, and the persecution in the former country drove many to seek homes across the Rhine. With the exception of this French influence, the German Jews in the early Middle Ages were characterized by the purity of the German they spoke and wrote, though they transcribed it in Hebrew characters. This transcription arose from the desire to make it possible for women, young people, and the unlettered to read and enjoy literary productions ("Hebr. Bibl." viii. 15). The Hebrew script used for this purpose was the same as that employed for the commentaries on the Bible; and from the name of the chief commentator it soon became known as the "Rashi script."

This Middle High German of the Rhine provinces was carried eastward, especially into Poland, when the Jews were driven into the Slavonic lands after the Black Death (fourteenth century). The Jews came to Poland from all parts of Germany; and though High German was at the base of the language which they carried with them, there were also introduced many peculiarities of other dialects, both northern and southern. In Poland the Jews preserved their German dialect; and when they re-

turned to Germany in the seventeenth and eighteenth centuries they brought with them their old Middle High German, modified not only by other German dialects, but also by a surprisingly large element of Hebrew. During the last two centuries Judæo-German has been carried over the world wherever the movement out of eastern Europe has brought the Jews from Slavonic lands. In its journey over the globe Judæo-German has suffered changes in various ways: in Poland, Polish words were incorporated; in Holland, Dutch words; in Turkey, Turkish; and, lastly, in English-speaking countries many English words have found their way into the vocabulary.

The introduction of words and phrases from so many different tongues makes Judæo-German appear to the superficial observer to be a language which knows neither grammatical rules nor lexicographic standards. It has therefore been customary to speak of it as "Mauschel-Deutsch," and those who use it have contributed to this misunderstanding by adopting the appellation "jargon" in place of the more correct and modern term, "Yiddish." See JUDÆO-GERMAN; JUDÆO-SPANISH.

DIASPORA:* The Jews in their dispersion through the Greco-Roman world. In the present article the Jewish race is considered in its relations to the Hellenic and the Roman peoples. The geographical distribution of the race; the civil government to which it was subjected; its juridical system; the social and economic condition of its communities; the success of its propagandistic efforts,

*The present article has been adapted from the author's paper "Judæi" in the "Dictionnaire des Antiquités," by kind permission of the publishers, Messrs. Hachette & Co.

which prepared the way for Christianity; and, finally, the first effect upon its legal situation of the triumph of the new religion—these are the points to be summarily dealt with.

I. The first and most remarkable phenomenon presented by Judaism during the Greco-Roman period is its dispersion along the shores of the Mediterranean. This dispersion of the Jews was due to numerous causes, and those in part obscure; but one of the most important must be sought in the many vicissitudes, crowned by a final catastrophe, which Judaism encountered in the country of its origin.

After the overthrow in 588 B.C. of the kingdom of Judah by the Chaldeans, and the deportation of a considerable portion of its inhabitants to the valley of the Euphrates, the Jews had two principal rallying-points; viz., Babylonia and Palestine. But though a majority of the Jewish race—especially the wealthy families—were to be found in Babylonia, the existence it led there, under the successive rules of the Achæmenidæ, the Seleucids, the Parthians, and the Neo-Persians, or Sassanians, was obscure and devoid of political influence. The poorest but most fervent element among the exiles returned to Palestine during the reigns of the first Achæmenidæ. There, with the reconstructed Temple at Jerusalem as its center, it organized itself into a community, animated by a remarkable religious ardor and a tenacious attachment to the Bible, which thenceforth constituted the palladium of its nationality, and it enjoyed, under the direction of its high priests, a tolerably broad autonomy.

No sooner had this little nucleus increased in numbers with the accession of recruits from various quarters, than it awoke to a consciousness of itself, and strove for political enfranchisement. A tentative effort in this direction, under Artaxerxes Ochus, led to fresh deportations. In South Syria, however, the rule of the Persians passed first to the Macedonians (332 B.C.), who were succeeded by the Ptolemies in the third century B.C.—a period in which Syria was the theater of incessant wars—and finally, in the second century, by the Seleucids. The Ptolemies treated the sentiments and customs of the Jews with the same delicacy and consideration that they showed toward those of their other subjects. Thanks to their tolerance, the Hellenic civilization took root in Judea, and made there considerable advances. The Seleucids, on the contrary, under Antiochus Epiphanes, wished to force prematurely upon the Jews a transformation which could be achieved only in the course of centuries. Their ill-advised policy gave rise to violent reactions, both religious and political, culminating in the revolt of the Maccabees (167 B.C.).

The Maccabees. After numerous vicissitudes, and especially owing to internal dissensions in the Seleucid dynasty, on the one hand, and to the interested support of the Romans, on the other, the cause of Jewish independence finally triumphed. Under the Hasmonæan princes, who were at first high priests and then kings, the Jewish state displayed even a certain luster, and annexed several territories. Soon, however, discord in the royal family, and the growing disaffection of the pious, the soul of the nation, toward rulers who no longer evinced any appreciation of the real aspirations of their subjects, made the Jewish nation an easy prey to the ambition of the Romans, the successors of the Seleucids. In 63 B.C. Pompey invaded Jerusalem, and Gabinius subjected the Jewish people to tribute.

Many years, however, passed before Judea became definitely incorporated into the Roman empire. In Judea the Romans pursued the same vacillating and changeful policy as throughout the Orient. First they granted the Jews an ethnarch; then a king—a foreigner, it is true—the Idumean Herod, under whose rule the Jewish state attained its greatest material prosperity. After the death of Herod (4 B.C.), the dissolution of his dynasty, and the deposition of his son Archelaus (6 C.E.), Judea proper became a mere department of the province of Syria, governed by a special procurator residing in Cæsarea.

Vicissitudes of Roman Rule. During this period the Jewish community possessed special privileges, both religious and juridical: in short, it constituted, as under the Achæmenidæ and the Lagides, a hierocracy under the protection of a foreign master. This régime, interrupted for several years (41-44) by the restoration of the Herodian dynasty in favor of Herod Agrippa, could be upheld only by dint of tact and precaution. The agents of

Rome, like the Seleucids before them, were unable to satisfy a people at once so impressionable and turbulent. Repeated blunders brought about the formidable insurrection of 66-70, terminating in the capture of Jerusalem and the destruction of the Temple, the center of the national and religious life of the Jews throughout the world.

After this catastrophe, Judea formed a separate Roman province, governed by a legate, at first "pro prætor," and later, "pro consule," who was also the commander of the army of occupation. The complete destruction of the Holy City, and the settlement of several Grecian and Roman colonies in Judea, indicated the express intention of the Roman government to prevent the political regeneration of the Jewish nation. Nevertheless, forty years later the Jews put forth efforts to recover their former freedom. With Palestine exhausted, they strove, in the first place, to establish upon the ruins of Hellenism actual commonwealths in Cyrene, Cyprus, Egypt, and Mesopotamia. These efforts, resolute but unwise, were suppressed by Trajan (115-117); and under Hadrian the same fate befell the last and glorious attempt of the Jews of Palestine to regain their independence (132-135). From this time on, in spite of unimportant movements under Antoninus, Marcus Aurelius, and Severus, the Jews of Palestine, reduced in numbers, destitute, and crushed, lost their preponderance in the Jewish world. The Jews no longer had reason to cling to a soil where the recollection of their past grandeur only helped to render more bitter the spectacle of their present humiliation, where their metropolis had become, under the name "Ælia Capitolina," a Roman colony, a city entirely pagan, to enter which was forbidden the Jews, under pain of death.

II. The vicissitudes just described exerted a decisive influence upon the dispersion of the Jewish people throughout the world. Successive revolutions in Cœle-Syria had caused, century after century, the emigration of Jews in great

Dispersion. numbers, who, having combined with one of the competitors, chose to follow him in his retreat rather than to expose

themselves to the vengeance of the conqueror. Thus, as far back as Jeremiah, a small diaspora was formed in Egypt (Jer. xxiv. 8, xxvi. 22, xlii.-xliv.). When Ptolemy I. evacuated Syria many of the Jews voluntarily followed him to his kingdom (Hecataeus, of Abdera, 14, cited by Josephus, "Contra Ap." i. 22; *idem*, "Ant." xii. 1). A similar thing occurred in 198 (Jerome, "Ad Dan." xi. 708); and under Ptolemy VI. Philometor, the son of the high priest Onias, disappointed in his expectations, betook himself with a considerable number of followers to Egypt, and there set up a rival temple to that of Jerusalem ("Ant." xiii. 3). On the other hand, during the wars of the third and second centuries B.C., thousands of Jews were made captives and reduced to slavery, passing from owner to owner and from land to land until their enfranchisement. This enfranchisement indeed usually occurred very soon, it being precipitated by the fact that, through their unswerving attachment to their customs, they proved inefficient servants. Besides, owing to the close solidarity which is one of the lasting traits of the Jewish race, they had no difficulty in finding coreligionists who were willing to pay the amount of their ransom. The inscriptions of Delphi have preserved an instance of these enfranchisements of Jewish slaves by payment of money (Collitz, "Griech. Dialekt-inschr." ii. 2029; the amount paid was 4 minas, or about \$80). The celebrated rhetorician Cecilius of Calacte was originally a Jewish slave (Suidas, *s.v.*); he was confounded by Plutarch with the questor of Verres, Cecilius Niger, who was perhaps his patron.

The Jews thus freed, instead of returning to Palestine, usually remained in the land of their former slavery, and there, in conjunction with their brethren

ren in faith, established communities. According to the formal testimony of Philo ("Legatio ad Caium," § 23), the Jewish community in Rome owed its origin to released prisoners of war. The political importance which it had already acquired in the proceedings against Flaccus (59 B.C.) shows that it did not consist merely of a few captives brought by Pompey (63 B.C.), but rather of prisoners made in earlier wars—in Asia Minor, for instance. The great Jewish insurrections under Vespasian, Trajan, and Hadrian, terminating, as they did, so disastrously, threw upon the market myriads of Jewish captives. Transported to the West, they became the nuclei of communities in Italy, Spain, Gaul, etc. Among these captives was the historian of the Jewish people, Flavius Josephus. Under Domitian the Jewish slaves in Rome were sold at very low prices. Even the poet Martial, whose purse was never well filled, possessed one ("Epig." vii. 35; the interpretation, however, is uncertain). The names of many Jews found in the tumular inscriptions in Rome betray their servile origin. To these sales of prisoners of war must be added, as further sources of the Diaspora, the deportations, more or less voluntary, effected by the various governments, either to chastise the rebels or to populate the uninhabited parts of their territories. Not to mention the great

Babylonian exile, and the transportation of Jews to Hyrcania by Ochus (Syncellus, i. 486; Orosius, iii. 7), Ptolemy I., according to tradition, took with him to Egypt 30,000 (?) Jews, in order to garrison the frontiers (Pseudo-Aristæus, ed. Schmidt, p. 255; "Ant." xii. 1). The same king compelled Jews to settle in Cyrenaica ("Contra Ap." ii. 4). Antiochus the Great, it is said, transferred to the sparsely populated districts of Phrygia and Lydia 2,000 Jewish families drawn from Mesopotamia ("Ant." xii. 3, § 4). Tiberius sent 4,000 Jews of Rome to wage a war in Sardinia (Tacitus, "Annales," ii. 85), many of whom perished, while the survivors must have formed the nucleus of a Jewish community in that country. Many rulers, without resorting to violent measures, made successful efforts to attract Jewish colonists to the newly founded cities by conceding to them important privileges. Such was the policy, if not of Alexander, at any rate of Seleucus Nicator, Ptolemy Philadelphus, the successors of Antiochus Epiphanes (in Antioch), etc.

Nor must it be forgotten that the Jews were a prolific race. Their law made it their duty to rear all their children. Judea, a land by

Fecundity no means fertile, must quickly have **of the Jews.** become overpopulated. The need thus arose of spreading to the adjacent districts (Galilee, Peræa), which soon became Judaized; then to the neighboring countries (Egypt, Syria); and, finally, to places beyond the sea, and this upon the slightest hope of meeting there with coreligionists. This phenomenon is not a characteristic of the Jews alone; it is seen in the colonies of Egyptians, Syrians, and Phenicians in Greece, in Rome, and in the important commercial centers of Italy; and they, like the Jews, spread their national cults. But the Jew emigrates more readily, since his creed is linked to a book, not to a place.

IV.—36

Besides, owing to the barrier which their deeply rooted religious observances formed around them, the Jews never became absorbed in the surrounding populations. On the contrary, an active religious propaganda, to be treated more fully later on, caused each small group of Jewish families to become the center around which numerous proselytes of other races clustered. Many of these adherents afterward fully embraced the Jewish faith. It may be said that if proselytism was not the conscious design of the Diaspora, it at all events powerfully contributed toward its consolidation and expansion.

Thus, as early as the middle of the second century B.C. the Jewish author of the third book of the Oracula Sibyllina, addressing the "chosen people," says: "Every land is full of thee and every sea" (Sibyllines, iii. 271; compare I Macc. 15); and if these words contained some exaggeration, the prophecy became true in the subsequent century. The most diverse witnesses, such as Strabo, Philo, Seneca, the author of the Acts of the Apostles, and Josephus, all bear testimony to the fact that the Jewish race was disseminated over the whole civilized world (Strabo, frag. 6, cited by Josephus, "Ant." xiv. 7, § 2; Philo, "In Flaccum," 7; Seneca, frag. 41-43, in Augustine, "Civ. Dei," vi. 10; Acts ii. 9-11; Josephus, "B. J." ii. 16, § 4; vii. 3, § 3). King Agrippa, in a letter to Caligula, enumerates among the provinces of the Jewish Diaspora almost all the Hellenized and non-Hellenized countries of the Orient (Philo, "Legatio ad Caium," § 36); and this enumeration is far from being complete, as Italy and Cyrene are not included. The epigraphic discoveries from year to year augment the number of known Jewish communities.

The following table, which is doubtless incomplete, attempts to summarize modern knowledge concerning the geography of the Diaspora, according to the literary texts and the inscriptions:

ASIA.

Palestine: Ascalon, etc. *Arabia*: Yemen, Island Iotaba (Procopius, "Pers." i. 19). *Phenicia*: Aradus, Berytus (Le Bas-Waddington, No. 1854C). *Cale-Syria*: Damascus (Josephus, "B. J." ii. 20, § 2; vii. 8, § 7). *Syria*: Antioch ("B. J." vii. 3, §§ 3 et seq.), Palmyra ("C. I. G." No. 4486; Le Bas-Waddington, Nos. 2619 et seq.), Tadas ("Bull. Corr. Hell." 1897, p. 47). *Mesopotamia*: Nisibis ("Ant." xviii. 9, § 1), Callinicum (Ambrosius, "Ep." xl.). *Babylonia*: Sura, Pumbedita, Nehardea ("Ant." xviii. 9, § 1), Seleucia (ib. xviii. 9, § 9), Ctesiphon (ib.). *Elam (Susiana)* (Acts ii. 9-11). *Parthia*. *Hyrcania* (Syncellus, i. 486; Orosius, iii. 7). *Media*. *Armenia* (Faustus of Byzantium, ed. Langlois, iv. 55).

ASIA MINOR.

Pontus (Philo, "Legatio ad Caium," § 36; Acts ii. 9-11, xviii. 2). *Bithynia* (ib.). *Mysia*: Adramyttium (Cicero, "Pro Flacco," 28), Pergamos (ib.; "Ant." xiv. 10, § 22), Parium (?) (ib. xiv. 10, § 8; read Παριανοί, not Παριος). *Ionis*: Smyrna ("C. I. G." No. 9897; "Vita Polycarpi," 12 et seq.; "Rev. Etudes Juives," vii. 161), Ephesus ("Ant." xiv. 10, §§ 25 et seq.; Acts xviii. 19 et seq.), Phocæa ("Bull. Corr. Hell." x. 327 = "Rev. Etudes Juives," xii. 236), Miletus ("Ant." xiv. 10, § 21), Samos (I Macc. xv.). *Lydia*: Sardes ("Ant." xiv. 10, §§ 17 et seq.), Thyatira ("C. I. G." No. 3509 [doubtful]; Acts xvi. 14; compare Schürer, "Abhandlungen . . . Weizsäcker," pp. 39 et seq.), Tralles ("Ant." xiv. 10, § 21), Hypæpa ("Rev. Etudes Juives," x. 74), Magnesia of Sipylus (ib. 76), Nysa ("Ath. Mitth." xxii. 484). *Caria*: Jasus (Le Bas-Waddington, No. 294), Halicarnassus ("Ant." xiv. 10, § 23), Cos (I Macc. xv.; "Ant." xiv. 7, § 2; 10, § 5), Myndos (I Macc. xv.; inscription in "Rev. Etudes Juives," xlii. 1), Cnidus (ib.), Rhodes (ib.). *Phrygia*: Apamea ("Pro

Flacco," 28; Ramsay, "Cities," i. 538, No. 399a; coins symbolizing the Ark of Noah, Laodicea ("Pro Flacc." 28; "Ant." xiv. 10, § 20), Amonia (Ramsay, "Cities," i. 649 *et seq.*), Hierapolis (Ramsay, *ib.* i. 545, Nos. 411, 118, 28 [?]), Eumeneia (Ramsay, *ib.* i. No. 232, p. 386 [doubtful]). *Lycia*: Limyra ("Reisen in Lykien," ii. 66), Tlos ("Eranos Vindob." 99), Phaselis (I Macc. xv. 23), Corcyus ("Rev. Etudes Juives," x. 75). *Pisidia*: Antioch (Acts xiii. 14). *Pamphylia*: Side (I Macc. xv. 23). *Galatia*: Germa ("Bull. Corr. Hell." vii. 24 = "Rev. Etudes Juives," x. 77). *Lycania*: Iconium (Acts xiv. 1), Lystra (*ib.* xvi. 1). *Cappadocia*: Mazaca (Caesarea). *Cilicia*: Tarsus, Elaioussa (?) ("Jour. Hell. Stud." xii. 234 [College of Σάββατος-ται?]). *Cyprus*: Salamis (Acts xiii. 5), Paphos (*ib.* verse 6).

EUROPE.

Cimmerian Bosphorus: Panticapeum (Latyschew, "Inscr. Euxini," Nos. 52, 53), Gorgippia (*ib.* Nos. 400, 401; a combination of pagan and Jewish formulas), Tanais (*ib.* Nos. 449, 450, 452, 456 *et seq.*; fraternities of ἀδελφοὶ σεβόμενοι θεὸν ὑψίστον). *Scythia*: Olbia (Stephani, in "Bull. Acad. Petersb." 1890, i. 246; "C. I. G." No. 2079?). *Thrace*: Constantinople ("Rev. Etudes Juives," xxvi. 167 *et seq.*), Philippi (Acts xvi. 13). *Macedonia*: Thessalonica (Acts xvii. 2; "Rev. Etudes Juives," x. 78), Berea (Acts xvii. 10). *Continental Greece*: Thessalia (Philo, "Legatio ad Calum," § 36; Acts xviii. 1 *et seq.*), Etolia (*ib.*), Boeotia (*ib.*), Athens (Acts xvii. 17; "C. I. A." iii. 2, Nos. 3545-3547), Corinth (Philo, *l.c.* § 36; Acts xviii. 1), Argos (*ib.*), Laconia ("Inscr. Brit. Mus." No. 149 = "Rev. Etudes Juives," x. 77), Mantinea ("Bull. Corr. Hell." 1896, p. 159, No. 27 = "Rev. Etudes Juives," xxiv. 148), Patras ("C. I. G." No. 9896). *Archipelago*: Euboea (Philo, *l.c.* § 36; Acts xviii. 1), Ægina ("C. I. G." No. 9894), Syros (De Rossi, in "Bull. Crist." 1876, p. 116), Melos ("Ant." xvii. 12, § 1), Delos (*ib.* xiv. 10, § 14). *Crete*: Gortyna (I Macc. xv. 23). *Sicily*: Syracuse ("C. I. G." No. 9895), Messina (Gregory the Great, "Letters"), Agrigentum (*ib.*), Panormus (*ib.*). *Italy (South)*: Apulia and Calabria ("Cod. Theod." xii. 1, 157), Venusia ("C. I. L." ix. 6195 *et seq.*, and Ascoli's monograph), Tarentum ("C. I. L." ix. 6400-6402), Fundi (*ib.* x. 6299), Capua (*ib.* 3905), Naples (*ib.* 1971). *Italy (Central)*: Rome, Terracina (Gregory the Great, *l.c.*), Faleria (Rutilius Namatianus, v. 377 *et seq.*). *Italy (North, and Istria)*: Ravenna (Anon. "Val." 81), Bologna (Ambrose, "Exh. Virgin." 1), Milan (Cassiodorus, "Var." v. 37; "Rev. Archéologique," 1860, p. 348), Brescia ("C. I. L." v. 1, 4411), Genoa (Cassiodorus, *l.c.* ii. 27), Aquileia (Garrucci, "Cim. Randanini," p. 62), Pola ("C. I. L." v. 1, 88; a "metuens"). *Pannonia* ("C. I. L." iii. 1, 3688; "Eph. Epigr." ii. No. 593). *Gaul* (first mentioned in "Vita Hilarii" [d. 366]; Sidonius Apollinaris, iii. 4). *Germany*: Colonia Agrippina ("Cod. Theod." xvi. 8, 4). *Spain* ("Concil. Ilib. Can." 49, 50, 78): Adra ("C. I. L." ii. 1982), Minorca ("Epist. Severiani," in ed. Migne, xx. 730), Tortosa ("Inscr. Trilingual," in Chwolson, "C. I. H." No. 83).

AFRICA.

Egypt: Alexandria, Leontopolis, Athribis ("Bull. Corr. Hell." xiii. 178 = "Rev. Etudes Juives," xvii. 235), Arsinoite Nome ("Rev. Etudes Juives," xxxvii. 220), Oxyrhynchus (*ib.*), Thebaid. *Ethiopia*. *Cyrenaica*: Cyrene, Berenice ("C. I. G." No. 5361), Boreum (Procopius, "De Edif." vi. 2). *Proconsular Africa* (Zeugitana, Byzacum, Tripolitane [Monceaux, in "Rev. Etudes Juives," xiv. 1 *et seq.*]): Carthage (Tertullian, "Adv. Jud. Init.," p. Delattre, "Gamart ou la Necropole Juive de Carthage"; "C. I. L." viii. 1091 [Addit. p. 929], Suppl. 14,097-14,114), Naro (Hammam Lif; "C. I. L." viii., Suppl. 12,511), Utica (*ib.* viii. 1205 [Addit. p. 931]), Simittae (Shemton; "Migne Patrologia," xlv. 881), Gæa (Tripolis; Augustine, "Epist." 71, 3, 5), Locus Judæorum Augusti (Iscina, "Medinat al-Sultan" [Tab. Penting.]). *Numidia*: Hippo Regius (Augustine, "Serm." 196, 4), Cirta ("C. I. L." Nos. 7150, 7153, 7330 [Addit. p. 965], 7719), Henshir Fuara (*ib.* viii., Suppl. 1670; a "metuens," viii. 4321 [Addit. p. 956]). *Mauretania*: Sitifis ("C. I. L." viii. 8423, 8499), Casarea ("Acta Marcellanæ," 4), Tipasa ("Passio Sanctæ Salsæ," 3), Volubilis (Berger, "Bull. Arch. Com. Trav. Hist." 1892, p. 94), Auzia ("C. I. L." viii., Suppl. 20,760).

There is only scant information of a precise character concerning the numerical significance of these diverse Jewish conglomerations; and this must be used with caution. After Palestine and Babylonia, it was in Syria, according to Josephus, that the Jewish population was densest; particularly in Antioch, and then in Damascus, in which latter place,

at the time of the great insurrection, 10,000 (according to another version 18,000) Jews were massacred ("B. J." ii. 20, § 2; vii. 8, § 7). Philo

Compara- ("In Flaccum," § 6) gives the num-
tive ber of Jewish inhabitants in Egypt as
Density of 1,000,000; one-eighth of the population.
Jewish Alexandria was by far the most impor-
Pop- tant Jewish community, the Jews in
ulations. Philo's time inhabiting two of the five
quarters of the city (*ib.* § 8). To judge

by the accounts of wholesale massacres in 115, the number of Jewish residents in Cyrenaica, at Cyprus, and in Mesopotamia must also have been large. In Rome itself, at the commencement of the reign of Augustus, there were over 8,000 Jews: this is the number that escorted the envoys who came to demand the deposition of Archelaus. Finally, if the sums confiscated by the propretor Flaccus in 63 represented actually the tax of a didrachma per head for a single year, the inference may be safely drawn that in Asia Minor the Jewish population numbered 45,000 males, or a total of at least 180,000 persons (Cicero, "Pro Flacco," 28, § 68 [the sums confiscated amounted to more than 120 pounds of gold]).

III. This diffusion of Judaism throughout the Greco-Roman world could not but call forth vigorous resistance, especially in those parts where the Greek language and Greek civilization prevailed. Speaking broadly, the middle classes in the Greek cities were not favorably disposed toward the Jews.

Their religious and racial peculiarities; **Unfriendly** their undisguised contempt of the
Attitude Hellenic cults, pageants, and gym-
of Greeks. nastic displays—in short, of all that constituted the very essence of a Grecian city; perhaps, also, a secret apprehension that they might develop into commercial competitors; and, finally, the efficacy of their religious propagandism—all contributed toward the unpopularity of these newcomers. In certain cities, such as Parium and Tralles, the exercise of the Jewish cult and rites was prohibited by express decrees ("Ant." xiv. 10, § 8 [not "Paros"]). The cities of Ionia were several times on the point of expelling the Jewish inhabitants. At Seleucia in Babylonia, on one occasion, the Greeks together with the Syrians massacred more than 50,000 Jews (*ib.* xviii. 9, § 9). Throughout Syria they were attacked by the Greeks from the beginning of the war of 66; and when the war was terminated Antioch demanded their banishment.

The butcheries that almost at the same moment were perpetrated under Trajan in Mesopotamia, Cyprus, and Cyrene, show the high pitch to which the antagonism between the races had risen. In Cyprus especially it was simply a war of extermination; the Jews massacred all the Greek inhabitants of Salamis; and when the uprising was suppressed, residence on the island was forbidden to Jews under pain of death (Dio Cassius, lxviii. 32). Nor were the relations more amicable in Alexandria, although Josephus maintains that they became strained only after the Grecian and Macedonian element of the middle class had been supplanted by the native. At times it was a silent rivalry and a desperate literary combat; at times a redoubtable popular outburst

that caused blood to flow in torrents, as in the days of Caligula, Nero, and Trajan. As a result of one of these conflicts, the Roman prefect of Egypt, in conjunction with the leading Alexandrians, decided to shut off the Jews in a ghetto admitting of easy surveillance, "whence they could not burst forth suddenly, and fling themselves upon the illustrious city and make war upon it" (Louvre Papyrus, No. 2376 bis, col. vi. 15).

Against this attitude of revengeful intolerance on the part of the Greek middle class, the Jews found

effective supporters, first in the Macedonian monarchs, and then in the Romans. It may be said that, without the **Attitude of the Rulers.** broad and cosmopolitan views of the diadochi who favored, in the interest of their own power, the mingling and amalgamation of the various races, the Jewish Diaspora could neither have originated nor maintained itself. Apart from a few exceptions (Antiochus Epiphanes, Ptolemy Physcon), the Seleucids and the Lagids pursued a friendly policy toward the Jews, and met with a grateful attachment in return. Thus Seleucus Nicator granted them the privilege of settling in all his new colonies, with the rights of citizens; Ptolemy Soter entrusted them with the charge of the custom-house on the Nile; and Antiochus the Great installed them as planters and tax-gatherers in Lydia and Phrygia, while granting to them the free exercise of their customs ("Ant." xii. 3, § 4 [doubtful]). There is reason to believe that the kings of Pergamos were actuated by similar principles; otherwise it would be hard to account for the rapid growth of the Jewish communities in the cities of Ionia.

At first the Romans showed little disposition to receive the Jews among them. In 139, at the time of their first appearance, they were expelled by the pretor Hispanus. In order to check their proselytizing endeavors (Val. Max. i. 32). Eighty years later, however, Rome possessed a large Jewish colony. Julius Cæsar, who prohibited foreign "collegia" in Rome, made a distinct exception in favor of the Jews, to whom he felt indebted ("Ant." xiv. 10, § 8), and who sincerely lamented his death. Augustus showed them similar good-will. Under Tiberius, in consequence of various scandals that attracted the attention of Sejanus, the Jews in 19 were expelled from Rome ("Ant." xviii. 3, § 5); while a "senatus consultum" ordered them to evacuate

Roman Attitude. Italy if within a stated time they had not abjured their rites (Tacitus, "Annales," ii. 85; Suetonius, "Tiberius," 36); and, under the pretext of military service, 4,000 Jews were deported to the deadly climate of Sardinia. The edict of expulsion, however, was not long enforced: and after the death of Sejanus the Jews reappeared in Rome. Under Caligula these disgraces were wiped out. Claudius used the disorders occasioned by a certain Chrestos as a pretext for interdicting Jewish gatherings in Rome (Dio Cassius, ix. 6). It may indeed be the case that the whole account is inaccurate, and that a simple police measure is here represented as an edict of expulsion (Acts xviii. 2; Suetonius, "Claudius," 25; Orosius, vii. 6, 15). From that time on, the legal status of the Jews of Rome was never again disturbed, even at the

height of the terrible insurrections under Vespasian, Trajan, and Hadrian.

At every period the Roman government kept their anti-Judaism for "home consumption." As far back as 161 B.C. (?) Rome formed an alliance with the Jews of Palestine—the first made by it with Orientals—and by virtue of this alliance, renewed several times and maintained at great cost, it incurred the moral obligation to defend the religious liberty of all the Jewish emigrants wherever it possessed influence. As early as 139 a circular note of the Roman government was issued to the friendly monarchies and republics on behalf of their new allies (I Macc. xxv. 16-24).

With the inheritance of Macedonia and Pergamos from the Seleucids and the Lagids, the duty devolved upon Rome of protecting the Jews, scattered in the various Greek cities now passing under its domination, against the malevolence of their inhabitants. It was, in particular, after Julius Cæsar that Rome took this duty to heart. Though undoubtedly the services which John Hyrcanus and Antipater rendered to the dictator during his campaign had something to do with his friendly attitude toward the Jews, still the latter was largely the result of his broad and humanitarian views rising above all distinctions of race and religion.

His successors were actuated by similar sentiments; and as soon as an organized Jewish state came into existence, its rulers, Hyrcan, the Herods, and the Agrippas—personal

Influence of Cæsar. friends of the triumvirate and of the successive emperors—were enabled to intercede successfully on behalf of their persecuted coreligionists. Thus it was that, upon the "invitation" of the Roman governors or emperors, several cities of Asia Minor (Laodicea, Miletus, Halicarnassus, Sardes, and Ephesus) issued decrees in behalf of the Jews, which Josephus has preserved ("Ant." xiv. 10); and thus, too, it was that Alexandria was compelled to perpetuate their rights by means of a bronze stele (Josephus, "Contra Ap." ii. 4; "Ant." xiv. 10, § 1). When, under Augustus, the cities of Ionia wished to expel the Jews on account of their refusal to abandon their rites, Agrippa, chosen as arbiter, gave a decision in favor of the latter ("Ant." xii. 3, § 2; xvi. 2, §§ 3-5).

Tiberius himself issued a circular letter to the local authorities (Philo, *l.c.* § 24); and, after the momentary crisis provoked by the monomania of Caligula, Claudius, immediately upon his accession, vouchsafed to the Jews a writ of tolerance covering the whole empire, which thenceforth constituted the unassailable charter of their privileges. It had only one condition attached to it; namely, that they should content themselves with exercising their own rites without showing contempt for those of others ("Ant." xix. 5, §§ 2-3). Even after the great insurrection of 66-70 the imperial government persevered in its policy of toleration, and turned a deaf ear to the supplications of the Greeks in Alexandria and Antioch, who demanded the expulsion of the Jews, or, at least, the abolition of their privileges. These were, on the contrary, formally confirmed by Alexander Severus ("Vita," xxii.). Altogether, Judaism, during the entire duration of the Roman

empire, remained a recognized religion ("religio licita"); and, what is more, as will shortly be seen, a religion exceptionally privileged.

IV. These privileges were as follows:

1. From localities where they were legally established, the Jews could not be expelled except by means of a formal decision issued by the supreme authority (king or emperor)—a procedure followed under Tiberius with

Right of Residence. regard to Rome, under Trajan with regard to Cyprus, and under Hadrian with regard to Ælia. Occasionally at the time of their establishment in a city the Jews had special quarters assigned to them; thus, in Alexandria, the quarter called the "Delta," situated near the royal palace ("B. J." ii. 18, § 7; "Ant." xiv. 7, § 2; in Sardis, *ib.* 10, § 24); and, in Rome, the quarter "Trastevere." It does not appear, however, that their confinement to special quarters was strictly enforced; and there is evidence that in Alexandria—at all events up to the reign of Hadrian—they moved about freely.

2. In the quarters inhabited by them the Jews possessed the privilege of erecting association halls for purposes of common worship and for the reading of the Law. These halls were, in fact, their synagogues, also termed *προσευχαί* and *σάββατα* (the word *ἀνδρών* seems to denote a sort of synagogue reserved exclusively for the males; "Ant." xvi. 16, § 4), for the principal day of meeting was the Sabbath. The pagans, under certain conditions, could obtain admission to those halls (Acts xiii. 44; "Ant." xix. 6, § 3). The synagogues served also for purposes of manumission, or enfranchisement of slaves (Latyschew, ii., No. 52); and it is this fact that gave birth to the "manumissio in ecclesia" ("Cod. Theod." iv. 7). Each Jewish community of any importance whatever had its synagogue: some, as Damascus, Salamis in Cyprus, and Alexandria, had several. The synagogue in Antioch eclipsed all others by its magnificence ("B. J." vii. 3, § 3). Rome appears to have had as many synagogues as Jewish communities (viz., eight), all of which—at least up to the third century—were located outside of the "pomœrium." At times the authorities themselves designated the plot on which the synagogue was to be

erected, in which cases the ground was doubtless given gratuitously (in Sardis, for instance, "Ant." x. 10, § 24). In maritime cities the custom seems to have been to build the synagogues near the sea (as in Halicarnassus, *ib.* § 23: *τὰς προσευχὰς ποιεῖσθαι πρὸς τῆς θαλάττης κατὰ τὸ πάτριον ἔθος*).

Certain synagogues are said to have had the right of sanctuary, like that which has been recently discovered in Lower Egypt. In this case the right granted by one of the Ptolemies (Euergetes, I. or II.) had been ratified by Zenobia ("C. I. L." iii., Suppl., 6583; compare Derenbourg in "Jour. Asiatique," 1869, p. 373; "Eph. Epig." iv. 26, No. 33). The synagogues were places of assembly and of prayer (as well as libraries; Jerome, "Epistolæ," 36), but not of sacrifice, as is erroneously stated in the decree of the Sardians. With the exception of Jerusalem, the sacrificial cult obtained only in the temple of Leontopolis in Lower Egypt, founded under Ptol-

emy Philometor (about 160 B.C.), and destroyed in 73 C.E. The cult there was conducted by priests who had emigrated from Palestine, and was always looked upon with suspicion by the orthodox.

Besides their synagogues, the ruins of some of which still exist, notably that of Hammam Lif, Tunis ("Rev. Et. Juives," xiii. 48), with its beautiful mosaic (see, also, the curious inscription of Phocæa [*ib.* xii. 237], and Renan, "Mission de Phénicie," p. 761), the Jews had special cemeteries, built in the same style as the Christian catacombs. The best known are those of Venusia in Apulia, of Gamart near Carthage, and the five cemeteries in Rome: three in the vicinity of the Via Appia (Vigna Randanini, discovered in 1859, inscriptions published in 1862 by Garrucci; Vigna Cimarra, discovered in 1867, inscriptions published by Rossi and Berliner; Vigna Pignatelli, discovered in 1855

Cemeteries. by N. Müller, "Römische Mittheilungen," i. 49 *et seq.*); one in the Via Labicana for the Suburan quarter (discovered in 1883, inscriptions published in 1887 by Marucchi); and one, the earliest discovered (by Bossio in 1602), but lost to sight again a century ago, outside the Porta Portuensis, for the Jews of Trastevere. To these must be added the cemetery in Portus. The Jewish graves are of extreme simplicity, and contain nothing but lamps and a few vases of gilded glass. Some more elaborate sepulchers ("cubicula") are decorated with paintings, from which the figures of animals are not always excluded (cemetery of the Vigna Randanini, cemetery of Carthage). There are also some sculptured sarcophagi. The epitaphs, usually in faulty Greek, are accompanied by characteristic symbols; e.g., chandelier with seven arms, palm and citron, oil-vases, trumpet ("shofar"), etc.

Both the synagogues and the cemeteries were placed under the protection of the laws. The synagogues, after the prevalence of Christianity, were frequently in danger from incendiaries, and energetic penal measures were needed to preserve them. An edict of Augustus places a theft of the sacred books of the Jews in the class of sacrilegious offenses. As for the graves, the Jews, in certain countries, borrowed from the pagans an efficacious device to protect them: an inscription apprised the violator that a heavy fine would be imposed upon him, to be paid altogether or in part either to the municipal or to the imperial treasury.

3. The cult, besides the daily meetings in the synagogue, embraced the celebration of the Sabbath and the other festal days, some of which

The Jewish Cult. latter were attended by banquets; the observance of the dietary laws and the laws of chastity; the rite of circum-

cision—in short, all that constituted "the customs of the fathers." The free exercise of these customs was legally assured to the Jews. In Halicarnassus, a decree, while recognizing the community, fixed a fine for any attempt, private or municipal, to obstruct the course of the law ("Ant." xiv. 10, § 23). For a deed of this character in Rome, the future pope, Calixtus, was condemned by the prefect of the city to forced labor in the Sardinian mines (Hippolytus, "Philosophumena," ix. 12). The observance of only one custom, circumcision, was for a

short time prohibited by Hadrian; and this prohibition was one of the causes of the revolt in 132 (Spartian, "Hadrian," 14). To the period of this interdiction the Smyrniot inscription, "C. I. G." No. 3148, may be assigned, where the Jews participating in a subscription term themselves (l. 30) *οἱ ποτὲ Ἰουδαῖοι*. Later the interdiction was confined to the circumcision of non-Jews—a measure that was the outcome of another order of ideas. To the guarantees surrounding the religious liberty of the Jews may be added exemption from the worship of the emperors—which exemption was seriously menaced only under Caligula—and certain special decisions destined to reconcile their interest with their "superstition." Thus, Augustus decided that, in case the distributions of grain and money in which the Jews participated should fall on a Sabbath, their shares should be distributed among them on the following day (Philo, *l.c.* § 23). Likewise, in cities where the inhabitants were entitled to rations of oil—Antioch, for instance—the Jews received money instead, as the use of pagan oil was unlawful to them ("Ant." xii. 3, § 1).

4. Every Jewish community was authorized, at least tacitly, to form for itself an autonomous organization, administrative, financial, and judicial. From this, however, it must not be hastily concluded, as has sometimes been done, that in Greek countries the Jewish agglomerations were on the same level with the pagan religious associations (*θίασοι*, *ἐρανοί*), which enjoyed important juridical privileges. These privileges resembled those possessed in certain commercial centers by corporations of Oriental merchants—Egyptians, Sidonians, Tyrians, and Syrians—grouped around a national cult; but there was a great difference between this cult, associated closely with those in Greece and Rome, and the exclusive cult of the God of Israel. No official document furnishes the slightest ground for the assumption that, in Greek territories, the Jewish communities were classed with the *thiasi*. At the best this designation might be extended to those fraternities devoted to the cult of the *Θεὸς ὑψιστος*, in the Cimmerian Bosphorus (notably in Tanais) and elsewhere—fraternities some of which seem to have been disguised synagogues, and some pagan "sodalicia" more or less impregnated with Jewish elements (Schürer, "Die Juden im Bosphorischen Reiche," in "Sitzungsber. Akad." xiii., Berlin, 1897; compare Cumont, "Hypsistos," in "Rev. de l'Instruction Publique en Belgique," 1897, Supplement).

These *thiasi* were the predecessors of the Judæo-pagan sect of the Hypsistarians, who were spread over Cappadocia in the fourth century (Greg. Naz. "Or." xviii. 5). But in many localities, even outside of Syria, *Θεὸς ὑψιστος* did not mean *Υἱὸς*; the name designated rather Helios or the Phrygian Sabazios, whom the Romans for a long time confounded with the God of the Jews (Valerius Maximus, i. 3, 2; Lydus, "De Mens." iv. 38). The status of the recognized Jewish colonies in Greek countries was comparable rather to that of groups of Roman citizens in Greek cities, in that they formed a small state within the state, and had their own constitution, laws, assemblies, and special magistrates, while enjoying the protection of the general laws. In this

way the community in Alexandria is designated *πολιτεία αὐτοτελὴς*, while the Jews of Berenice (Cyrenaica) called themselves a *πολίτευμα*. Only one text, of Roman origin, seems to refer to the Jewish communities as "*thiasi*"; but here the word stands for the Latin "*collegia*" ("Ant." xiv. 10, § 8). Even so, they were but imperfect *collegia*, enjoying neither a corporate personality nor, in consequence, the privilege of possessing capital or real estate. A rescript of Caracalla declared void a legacy bequeathed to the "*universitas*" of the Jews of Antioch ("Cod. Just." i. 9, 1; compare i. 20, "Dig." xxxiv. 5).

The internal organization of these little Jewish colonies was modeled upon that of the Greek *communes*, and it remained faithful to the type, at least in appearance, even after the catastrophe of 70 c.e. had destroyed the national existence of the Jews.

The influence of this catastrophe upon the autonomy of the Jewish communities has been exaggerated (Momm-
Interior Or-
ganization. sen, in "Historische Zeitschrift," 1890, pp. 424 *et seq.*). It could have been

only temporary, like that exerted by the edicts of Hadrian. Almost everywhere existed, side by side with the general assembly of the faithful ones (*σίνδος*, *σύλλογος*, *συναγωγὴ*), which was often of a periodic character, a council of elders (*γερονσία*, *γέροντες*, *πρεσβύτεροι*). At Hypæra there were *Ἰουδαῖοι νεώτεροι* ("R. E. J.," x. 74). The president of the council of elders was called *γερονσιάρχης*, *γερονσιάρχων*, in one instance even *ἐπιστάτης τῶν παλαιῶν* (*ib.* xxvi. 168, Constantinople; the meaning is contested). The number of the elders was proportioned to the importance of the community; at Alexandria they numbered at least 38 (Philo, "In Flaccum," § 10).

At the head of the administration was a single *ἄρχων* (at Antioch, for instance, "B. J." vii. 3, § 3), or an assembly of *ἄρχοντες*; at Berenice these officials numbered nine ("C. I. G." No. 5361). The community of Alexandria had for a long time a single chief, styled the "ethnarch" or "genarch," who united the functions of supreme judge and administrator (Strabo, cited in "Ant." xiv. 7, § 2). Beginning with Augustus, these functions were divided between a *gerusia* and a committee of archons (Philo, "In Flaccum," §§ 10, 14; compare "Ant." xix. 5, § 2). Only in Rome, and probably as a simple police regulation, the Jewish population was broken up into a number of small communities or synagogues named after their patrons, or their quarters, or the native place of their members, etc. Of such communities eight are known: *Αἰγυονστήσιοι*, *Ἀγριππήσιοι*, *Βολύμνιοι* (after Volumnius, prefect of Syria under Augustus?), *Καμπήσιοι* (from the Field of Mars), *Σιβουρήσιοι* (Subura), *Ἑβραῖοι* (Samaritans? Palestinians?), *Ἑλαίας* (Velia? Elea?), *Καρκαρήσιοι*, to which must perhaps be added the synagogue of the Rhodians (inscription in Garrucci, "Diss. Arch."

Synagogue ii. 185, No. 37). Juvenal, in a celebrated passage (iii. 10 *et seq.*), seems to allude to a synagogue situated in the wood of Egeria, outside the gate of Capene. Each of these little communities had its *gerusia*, its *γερονσιάρχης*, its archons, one or more. The *γερονσία* is not mentioned in the inscriptions, but its existence is implied in that of the *γερονσιάρχης*, who

must not be taken as the head of the "assembly of archons." The language of the inscriptions would seem to favor the hypothesis that each community had one archon. At all events, it would hardly be safe to generalize the words of St. Chrysostom ("Hom. in S. Joh. Natal.") on the election of the archons in September and the annual duration of their functions. With reference to the nomination of the archons, the statement of the "Vita Alex. Sev." 45 is perhaps trustworthy; namely, that the names of the candidates were publicly posted, to invite objections. As a rule, the archon was not elected for life, as is shown in the mention of *δὲ ἀρχων* in the funeral inscriptions. This title was sometimes honorary, and extended to the children (*νήπιος ἀρχων, μελλάρχων*). Nevertheless, the *διὰ βίου* seems to have meant an archon for life.

Associated with the archon, chief of the administration, one finds in many communities one or probably several *ἀρχισυνάγωγοι*, chiefs of the synagogue (rabbi?). Sometimes the same person combined the functions of archon and archisynagogue ("C. I. L." x. 1893). The archisynagogue preached on the Sabbath (Justin, "Dial. cum Tryph." cxxxvii.). This title, however, did not always indicate an actual office-holder: in Smyrna and Myndus it was borne by a woman. The *ὑπερέτης* (hazzan) was an employee of the synagogue. The designation *γραμματεὺς* was that of the official clerk; but occasionally this title, which was the equivalent of the Hebrew "sofer," seems to have been a merely honorary one. Persons versed in the Law were called *διδάσκαλος, νομομαθής, μαθητὴς σοφῶν*, etc. Probably these also were but honorary appellations, like the titles of *προστάτης, πατήρ λαοῦ*, "pater" and "mater synagogæ" or "patressa." A certain woman in Rome was "mater" of two synagogues. Another, in Phocæa, obtained the privilege of *προεδρία*, that is, of sitting on the foremost bench ("Bull. Corr. Hell." x. 327; "R. E. J.," xii. 237).

The large number of scattered Jewish communities were unconnected by any hieratic or administrative bond, unless the collecting of the didrachma (to be mentioned later) and the moral protectorate exercised over the Diaspora by the representatives of the Jewish state, as long as that was in existence, be so considered. After the dissolution of the commonwealth and the destruction of the Temple, the moral center of Judaism, the need was felt of a new center, at least for the maintenance of religious solidarity and of uniformity of legal practises. Such a center was the patriarchate of Tiberias, which was established toward the end of the second century, and became hereditary among the descendants of Hillel. Origen, with manifest exaggeration, compares the patriarch to a king ("Ep. ad Afric." 14). It would seem that in the fourth century, besides the patriarch of Palestine, there were in the Diaspora other dignitaries bearing the same title (compare, for example, "Cod. Theod." xvi. 8. 1, 2, where the plural is otherwise inexplicable; in *ib.* xvi. 8. 29, if the text is correct, there is mention of Occidental patriarchs). During the same period there are found religious functionaries designated "hiereis," whose precise functions are not known. In the inscription "C. I. G." No. 9906, the title *ἱερεὺς* is equivalent to

"kohen": the deceased was an "Aaronide." In a general way the propounders of the Law and the dignitaries of the Jewish cult bore the official appellations of "primates," "maiores," or "proceres."

5. The Jewish communities possessed the right to levy taxes upon their members (this is the meaning of the word *αὐτοτελής* as applied to the Jewry in Alexandria) to defray the common expenses, especially in connection with the maintenance of the synagogue. Details as to

"Fiscus Judaicus." the character of these taxes are wanting; but they seem to a large extent

to have served the purpose of supplementing the voluntary contributions, as is attested by numerous inscriptions. The principal levy, dictated by the demands of the community, was that of the didrachma, an annual poll-tax of a Tyrian half-shekel (=2 Greek drachmas), payable by each adult male member, and destined to sustain the treasury of the Temple in Jerusalem. The amounts collected from the several communities were then combined, and, through special confidential envoys, were sent, either in the original coins or in a converted form, to Jerusalem (Philo, "Legatio ad Caium," § 23). This practise, which in time involved a considerable export of gold to Palestine, met with a vigorous opposition on the part of the Greek cities; while the Roman government also at first assumed a hostile attitude toward it. Under the republic the Senate, alarmed at the annual amount of gold sent by the Italian communities, several times prohibited all exportation of this metal, and the propretor Flaccus confiscated the sums collected in Asia Minor for the Temple (Cicero, "Pro Flacco," xxviii.). Later, edicts of Caesar, confirmed by Augustus, again authorized the practise, both as to Rome and the provinces; and when the cities of Asia Minor and of Cyrene attempted to oppose it, Agrippa intervened in favor of the Jews, while a series of edicts broke the resistance of the Greek cities (14 B.C.; "Ant." xiv. 6, §§ 2-7; Philo, *l.c.* § 40).

After the fall of the Temple (70), the Roman government, instead of simply abolishing a tax which had no further object, decided to impose it for the benefit of the treasury of Jupiter Capitolinus in Rome ("B. J." vii. 6, § 6; Dio Cassius, lxi. 7). This was the origin of the "fiscus Judaicus," a tax doubly irksome to the Jews; and the collection of which by the procurators *ad hoc* ("procuratores ad capitularia Judæorum"), according to the registers containing the names of those circumcised, was accompanied by the most odious vexations, notably under Domitian (Suetonius, "Domitian," 12). Nerva abolished the abuses and delations (there are still extant bronzes bearing the legend FISCUS IVDAICI CALVMNIA SVBLATA), but not the tax itself, which was still collected in the time of Origen ("Epistola ad Afric." 14). There is reason to believe that it was gradually replaced by indefinite exactions, often levied without notice—a system of assessment which was finally abolished by Julian (Julian, Ep. 25; the text is obscure and doubtful). On this occasion, Julian destroyed the fiscal registers in which the names of the Jews were inscribed.

6. The Jewish communities possessed the privilege of settling their own legal affairs: they had

their own judges and their own code. This code—which was simply the Mosaic law, sedulously commented on by the Rabbis—was the sole study of the Jews and the Judaizers, to the exclusion of the Roman law—a fact mentioned with indignation by Juvenal ("Sat." xiv. 100 *et seq.*). In Alexandria the Jewish tribunal consisted for a long time of a single supreme judge, the ethnarch (Strabo, in "Ant." xiv. 7, § 2, *διατὴ κρίσις καὶ συμβολαίων ἐπιμελείται*). In Sardis, at the order of the Roman proquestor, the Jews were granted a court of their own (*ib.* xiv. 10, § 17). All these are but special instances of a general fact (Sanh. 32).

Autonomy. In civil suits the autonomy of the Jewish courts applied only in cases where both parties were Jews; otherwise, even if the defendant was a Jew, the general local tribunal was alone competent, as is evident from the edict of Augustus restraining any court from ordering Jewish litigants to appear before it on the Sabbath ("Ant." xvi. 6, § 2). In penal cases, at the commencement of the common era, the Jewish magistrates exercised a wide disciplinary jurisdiction, including the right of incarcerating and flogging (Acts ix. 2, xviii. 12-17, xxii. 19, xxvi. 11; II Cor. xi. 24). It does not appear, however, that their jurisdiction extended to offenses against the common law: at any rate they did not have the right to inflict capital punishment.

The judicial autonomy of the Rabbis was kept up even after the admission of the Jews as Roman citizens. It was at this time that the supreme jurisdiction of the patriarch of Tiberias was at its height. Origen affirms that he pronounced death-sentences and had them executed ("Epistola ad Afric." 14); but such decisions, of course, had no legal force; and if they were carried out, it was in secret, like the decisions of the Vehmgericht in the Middle Ages. Origen himself avers that in Judea the criminal jurisdiction had passed into the hands of the Romans ("C. Cels." ed. Spencer, vii. 349). The "Theodosian Code" made of the rabbinical tribunals little more than courts of voluntary arbitration ("Codex. Theod." ii. 1, 10).

7. The Hellenistic monarchies had compelled the Jews to perform military service; and this measure was productive of good results. Service in the field, however, was not compatible with a rigorous observance of the dietary laws and the Sabbath rest. On the Sabbath, according to the interpretation of the scholars, the faithful could neither carry arms nor traverse a distance of more than

Exemption from Military Service. 2,000 ells (1,200 meters). Hence inconveniences frequently arose; as when the army of Antiochus Sidetes, which contained a contingent of Jewish soldiers, had to rest for two days because

the festival of Pentecost fell on a Sunday (Nicolaus of Damascus, cited in "Ant." xiii. 8, § 4). Accordingly, the Romans, notwithstanding the effectual assistance which Cæsar obtained from the Jews, exempted them from military service, possibly in consideration of the payment of a pecuniary indemnity. This principle was proclaimed by the Pompeians in the year 49. At the commencement of the civil war, when the consul Lentulus raised two legions of Roman citizens in Asia, the Jews, at their own request, were exempted from the conscription; and

instructions to this effect were forwarded to the local authorities ("Ant." xiv. 10, §§ 13 *et seq.*). In 43 Dola-bella, proconsul of Asia, decided to the same effect; and his decisions were thereafter looked upon as precedents. The only levy of Jewish soldiers effected under the Roman empire was one under Tiberius, and that had a penal character (Suetonius, "Tiberius," 36).

V. Such, then, in their essential provisions, were the privileges granted to the Jews in the Greco-

Roman world—privileges important enough to induce more than one Christian to embrace the Jewish faith in order to shield himself in times of persecution. Nevertheless, the medal had its reverse. If the Jews were privileged "peregrini," they were still "peregrini"; that is to say, they were deprived of all the rights and honors to which a citizen, in the cities of Greece and in the Roman state, was entitled. Furthermore, besides the regular taxes, the Jews were subjected to the payment of special taxes, from which the citizens were exempt. Mention has already been made of the didrachma. Besides this tax, the Jews of Palestine had to pay a very heavy land-tax (Appian, Syr. 50; text obscure and probably corrupted), against which they vainly made complaints to Emperor Nigra ("Vita," ch. vii.). Very likely, too, in the Greek cities they were required, as a matter of principle, to pay a tax imposed upon foreign residents, the *μετοίκιον* (a Jew is expressly classed among the *μετοικοὶ* in the inscription of Iasus; Le Bas-Waddington, No. 294). All these encumbrances naturally inspired the Jews with the ambition of obtaining the privilege of citizenship, which alone could assure to them equality of treatment. This pretension, however, involved a contradiction: not that people in ancient times doubted that a man could be a citizen of two states at the same time, but because the Jews wished to combine the right of citizenship with the maintenance of their special prerogatives, their fiscal and judicial autonomy, their exemption from military service, etc. Moreover, the corporate life of the city in those days reposed essentially upon the worship of the deities common to all the inhabitants; and to this the Jews manifestly could not consent without surrendering their *raison d'être*.

In the Greek cities possessing republican institutions—and these were the only places where the right of citizenship had any value—the aspirations of the Jews remained unsuccessful—at any rate up to the time of the Roman conquest. The contrary assertions of Jewish historians have to be received with extreme caution. A typical instance of the kind is the affirmation of the Jews of Ionia, in the days of Augustus, that they had been granted by the diadochi the right of citizenship in the cities which Antiochus Theos (261-246) had enfranchised ("Contra Ap." ii. 4). It is true that the Jews won before Agrippa the case against the municipalities that wished to expel them; but, although they succeeded in having their right of residence and their other liberties recognized, this does not furnish any evidence that they possessed citizen's rights, nor even those of "indigeni" (native-born; "Ant." xii. 3, § 2; xvi. 2, §§ 3-5). The words *οἱ κατοικοῦντες ἐν τῇ πόλει Ἰουδαίου* [?] *πολιταί* in the decree issued at

Sardis in the time of Cæsar (*ib.* xiv. 10, § 24), must not be taken to mean that the Jewish residents of Sardis were considered citizens of that place, but only of Judea.

Likewise in Cyrene the Jews affirmed that they had obtained the "isonomia" of the Ptolemies ("Ant." xvi. 5, § 1); but this vague term must

Right of Citizen-ship. be construed in the sense of "isoteleia"; that is, equality in matters of taxation, which privilege had, in point of fact, been assured to them by Agrippa (*ib.*

6, § 5). The term certainly could not have indicated the right of citizenship in the proper sense. Strabo, in enumerating the four classes of inhabitants of the country, expressly separates the Jews from the citizens ("Ant." xiv. 7, § 2). There is more likelihood in the assertion of Josephus that Seleucus Nicator, in the cities founded by him, Antioch included, had granted to the Jews the rights of citizenship (*πολιτεία*) and social equality (*ἰσοτιμία*) along with the Greeks and the Macedonians ("Ant." xii. 3, § 1; "Contra Ap." ii. 4, § 39). However, as far as Antioch is concerned, this assertion is elsewhere qualified by Josephus himself, to the effect that it was only the successors of Antiochus Epiphanes who permitted to the Jews of Antioch *ἐξ ἰσού τῆς πόλεως τοῖς Ἑλλήσι μετέχειν* ("B. J." vii. 3, § 3).

The privileges of the Jews of Antioch were engraved upon bronze steles, which Titus refused to destroy (*ib.* vii. 5, § 2); and the Jews continued to designate themselves as *Ἀντιοχείς* ("Contra Ap." *l.c.*). The question concerning the *Ἀντιοχείς* of Jerusalem under Antiochus Epiphanes (II Macc. iv. 9) is still unsettled. Be this as it may, these privileges do not seem to have included a participation in the government of the city—supposing that Antioch did actually have free institutions. The same assumption applies to the other foundations of Seleucus. So, likewise, in Alexandria, the fact that the Jews, with the express authorization of the Ptolemies, called themselves "Macedonians" and "Alexandrians" ("Contra Ap." ii. 4; "B. J." ii. 18, § 7; "Ant." xix. 5, § 2), does not imply the possession of the right of citizenship (a right which, in a city not having an elective assembly and council, was of little advantage), but simply testifies to the equality of the Jews with the Greeks before the courts, the boards of taxation, etc.—an equality formally confirmed by Cæsar (Josephus, "Contra Ap." *l.c.*; "Ant." xiv. 10, § 1) and then by Claudius ("Ant." xix. 5, § 2).

In short, the Jews in a certain number of Greek cities, particularly in those founded by the king, had been placed upon a footing of perfect equality with the Greeks in matters of taxation, the exercise of civil rights, the participation in the distributions, etc.; without, at the same time, possessing the privilege of full citizenship. Philo, with an affectation easily understood, declares that the Jews consider as their "real fatherland" the country they inhabit ("In Flaccum," 7); and it is possible that the rights of citizenship were accorded to individual Jews—St. Paul, for example, called himself a citizen of Tarsus (Acts xxi. 39 [the text is doubtful])—but no instance is known of a collective grant of this character.

In default of the right of Greek citizenship, the Jews fell back upon their right of Roman citizen-

ship, which carried with it, even in Greek cities, numerous advantages. Altogether, in Roman cities they fared much better. From the time

Roman Citizen-ship. of Cicero there had been in Rome a compact group of Jewish citizens and electors. These were, no doubt, an-

cient slaves, enfranchised by one of those solemn ceremonials which conferred upon them the rights of citizenship in its plenitude (Philo, "Legatio ad Caium," § 23; Cicero, "Pro Flacco," 28; the *ἡβερτίνοι* of Jerusalem [Acts vi. 9] belong doubtless to the same category). In the same period there were in Ephesus, Sardis, and throughout Asia Minor, a considerable number of Jews who possessed the rights of Roman citizenship. By what means they obtained it is not known ("Ant." xiv. 10, §§ 13, 14, 16-19). In Tarsus, Paul was both a Roman citizen and a citizen of the town (Acts xvi. 37-39). In Jerusalem, in 66 c.e., there were Jews who were Roman knights ("B. J." ii. 14, § 9). The number of Jews admitted into Rome during the first two centuries of the empire can not be estimated; but it must have been considerable in view of the number of Jewish slaves that passed through Roman hands as the result of the three great insurrections. Still, the Jew who had become a Roman citizen does not appear to have possessed the "jus honorum," unless, indeed, he abjured, like Tiberius Alexander, nephew of Philo, his national customs; and the same thing held good of a Roman who embraced the Jewish faith. The law was not modified in this respect except by the constitution of Severus and Caracalla, which imposed upon the Jews certain contributions in forced labor ("necessitates") of a kind and degree compatible with their creed. From this time on the idea of local citizenship became greatly eclipsed by the wider conception of a Roman nationality—somewhat corresponding to a citizenship of the empire (Ulpian, *L. 3, Dig. L. 2, § 3*). Not long after this Caracalla's constitution made its appearance, which, for financial reasons, forced Roman citizenship upon all the subjects of the empire (*L. 17, Dig. i. 5*). By virtue of this constitution, the Jews obtained thereafter without difficulty the "jus honorum," and the exercise of all civil rights, "connubium, commercium, testamenti factio," and even the guardianship of non-Jews (Modestin, *L. 15, § 6, Dig. xxvii. 1*). Nevertheless, as formerly they had been privileged "peregrini," they were now in certain respects privileged "cives": they had all the rights of citizens, but they exercised only those which did not conflict with their religious liberties. This may be inferred especially from the text already cited, according to which Alexander Severus "confirmed the privileges of the Jews." Among these privileges there was for some time, besides the exemption from military service, relief from service, more burdensome than honorary, to the curia.

VI. Having thus sketched the legal position of the Jews in the Greek states and in the Roman em-

Social Condition. pire, it remains now to describe their social and economic condition, their occupations, and their relations with the pagans. On all these points save those which relate to Palestine and Babylonia and which do not come within the scope of the present

article, information is singularly defective, even as regards the two most important communities, those of Alexandria and Rome.

In nearly every part of the Diaspora the Jews lived clustered together in the cities. They doubtless possessed farms and orchards in the suburbs; but agriculture was no longer, as in Judea, their almost exclusive occupation. In Alexandria they were engaged in commerce and navigation (compare a Jewish horse-dealer, Danouil, mentioned in one of the Grenfell papyri from Fayum), and especially in the mechanical trades (Philo, "In Flaccum," *passim*). At the gatherings in the synagogue it was by their respective handicrafts that the faithful were grouped. In Rome the Jewish population, mostly of slavish origin and living in wretched quarters, followed the humblest callings, which drew upon them the sarcasm of the satiric poets. These overdrawn pictures, however, should not lead to the belief that all the Jews of Italy and Greece were mendicants (Martial, xii. 57; compare Cleomedes, "Theor. Cycl." ii. 1; but the expression "Bohemian Jews" is derived only from a false interpretation of Juvenal, iii. 10 *et seq.*; compare Rönsch, "Neue Jahrbücher," 1881, p. 692, and 1885, p. 552), or fortune-tellers (Juvenal, vi. 542; compare Procopius, "Bell. Goth." i. 9), or venders of matches (Martial, i. 41; interpretation doubtful). The texts and the inscriptions refer to weavers, tent-makers, dealers in purple, butchers (Garrucci, "Cimitero Randanini," No. 44), tavern-keepers (Ambrose, "De Fide," iii. 10, 65), singers, comedians (Josephus, "Vita," § 3; Martial, vii. 82; sarcophagus of Faustina [Munk, in Breslauer's "Jahrbuch für Israeliten," ii. 85]), painters (Garrucci, "Diss. Arch." ii. 154), jewelers ("Rev. Etudes Juives," xiii. 57 [Naron]), physicians (Celsus, "De Medic." v. 19, 22; "C. I. L." ix. 6213 [Venusia]), and even poets (Martial, xi. 94) and men of letters (Cecilius, Josephus), without

counting the preachers, lawyers, and theologians (Mattathias ben Heresh, etc.). At the end of the fourth century, in certain provinces of southern Italy, the "ordo" (highest class of citizens) of some cities seems to have been composed entirely, or at least principally, of Jews, a proof of their prosperity ("Cod. Theod." xii. 1, 158). In Egypt under the Ptolemies, from the ranks of the Jews came forth soldiers, farmers of the revenue (not only the famous Tobiad Joseph, but a certain Simon, son of Eleazar, mentioned on an ostrakon of Thebes [Willrich, "Jud. und Griech." p. 151]), civil functionaries (as the alabarchs Alexander and Demetrius), and generals (Onias, Desitheus, Helcias, Ananias). Later, however, Hadrian could or, perhaps, would find among them only "astrologers, soothsayers, and charlatans" ("Vita Saturnini," viii.). The days of glory for Judaism in Alexandria, which produced a Philo and indirectly a Josephus, were past (but compare Hippolytus, "Philosoph." ix. 12). It is worthy of remark that scarcely ever before the Middle Ages are the Jews referred to as money-lenders, bankers, or usurers. These, their imputed callings, seem to have been forced upon them much later by circumstances and as a result of special legislation.

VII. Theoretically the intercourse of the Jews

with the pagans was confined to commercial relations merely, and even these were greatly trammelled through the "laws of purity." The Jews lived apart, most frequently in separate quarters, grouped around their synagogues. The pious Jew could neither dine at the table of a pagan nor receive him at his own table. He was not permitted to frequent the theaters, the circuses, the gymnasia, nor even to read a secular book, "unless it be at twilight." Mixed marriages were prohibited under severe penalties. These rules were not, however, always and everywhere observed with the same rigor. Evidence of this fact appears in the Judæo-Alexandrian literature with its strong Hellenic infusion; in some of the professions pursued by the Jews; in the general and almost exclusive employment of Greek by the Jews of the Diaspora, even for religious services. In Rome the tumulary inscriptions are first in Greek—faulty enough, it is true—then in Latin. The Hebrew words are limited to a few hallowed formulas; almost all the proper names are Greek or Latin. But above all it is by the activity of the religious propagandism that the intimate contact and the reciprocal penetration of the two civilizations manifest themselves.

The fervor of proselytism was indeed one of the most distinctive traits of Judaism during the Greco-Roman epoch—a trait which it never possessed in the same degree either before or since. This zeal to make converts, which at first sight seems to be incompatible with the pride of the "chosen people" and with the contempt which the orthodox Jew professed for the foreigner, is attested by numerous documents (Esther viii. 17; Judith xiv. 10; Matt. xxiii. 15; Horace, "Sat." i. 4, 142), and, better still, by facts themselves. Various methods were employed to increase the flock of Israel. The most brutal was that of forced conversion—that is to say, circumcision—such as had been imposed by John Hyrcanus on the Idumeans ("Ant." xiii. 9, § 1; "B. J." i. 2, § 6; Ammonius, *s.v.* "Ἰδουμαῖοι"), and by Aristobulus upon a portion of the Itureans (Galileans) ("Ant." xiii. 11, § 3). Next was the conversion of slaves owned by Jews as their individual property (Yer. Yeb. viii. 1). But it was especially the moral propaganda, by word, example, and book, which was most productive of success throughout the whole extent of the Diaspora. It must be admitted that Judaism lacked certain of those attractive features which drew the multitude to the cult of Mithras and of the Egyptian deities. Its physical exactions repulsed those wanting in stout courage; its cult, devoid of imagery and sensuous rites, presented only an austere poesy separating its adepts from the world, and cutting them off to some extent from communion with the cultured. But the practical and legal character of its doctrine, furnishing a rule of life for every occasion, could not but appeal to a disorganized society. The purity and simplicity of its theology captivated the high-minded; while the mystery and quaintness of its customs, the welcome Sabbath rest, the privileges enjoyed at the hand of the public authorities, recommended the Jewish faith to those more materialistically inclined. More-

over, it knew how to insinuate itself by a very clever literature, in part pseudopigraphic, in part apologetic, claiming as its allies and forerunners the greatest geniuses of ancient Greece, the poets, the thinkers, and the sibyls. It also called into play the famous oracles (Oracle of Claros, in Macrobius, "Sat." i. 18, 19 *et seq.*), and took on a Grecian aspect, while extenuating or concealing under the mantle of allegory and symbol those dogmas and observances that were shocking to rationalism. In brief, it was a religion essentially supple and elastic under an appearance of rigidity, and one which knew how to be at once authoritative and liberal, idealistic and materialistic, a philosophy for the strong, a superstition for the weak, and a hope of salvation for all.

Finally, Judaism possessed the prudence and tact not to exact from its adepts at the outset full and complete adoption of the Jewish Law.

Grades of Proselytes. The neophyte was at first simply a "friend" to the Jewish customs, observing the least enthralling ones—

the Sabbath and the lighting of a fire on the previous evening; certain fast-days; abstention from pork. His sons frequented the synagogues and deserted the temples, studied the Law, and contributed their oboli to the treasury of Jerusalem. By degrees habit accomplished the rest. At last the proselyte took the decisive step: he received the rite of circumcision, took the bath of purity (Arian, "Diss. Epict." ii. 9), and offered, doubtless in money, the sacrifice which signalized his definitive entrance into the bosom of Israel. Occasionally, in order to accentuate his conversion, he even adopted a Hebraic name ("Veturia Paula . . . proselita ann. XVI. nomine Sara," Orell. 2522 ["C. I. L." vi. 29,756]; she was converted at the age of seventy). In the third generation, according to Deut. xxiii. 8, there existed no distinction between the Jew by race and the Jew by adoption, unless the latter belonged to one of the accursed races; before the period now under discussion, however, these had long been extinct. AQUILA, whose Greek translation of the Bible superseded in the synagogues that of the Septuagint, and Bar Giora, chief of the insurgents in Jerusalem, were proselytes or sons of proselytes.

This gradual entrance into the fold of Judaism must have been a frequent occurrence in the first and second centuries. Juvenal refers to it in his famous words: "Quidam sortiti metuentem sabbata patrem. Nil præter nubes et cæli numen adorant," etc. ("Sat." xiv. 96 *et seq.*; compare Persius, v. 179; Tertullian, "Ad Nat." i. 13). The term "metuens" itself is technical, being a translation of the Greek *φοβούμενοι*, *σεβόμενοι* (*i. e.*, τὸν θεόν), by which the Greek texts usually designate the proselytes (Acts xiii. 16, 26, 43; xvii. 4; "Ant." xiv. 7, § 2; compare "Eph. Epigr." iv., No. 838, and Schürer, "Juden im Bosphorischen Reiche," p. 20). Efforts have been made to establish a sharp distinction between the *σεβόμενοι* or *φοβούμενοι* and the proselytes proper, the "gerim" of the Hebrew texts (in this sense so early as II Chron. xxx. 25). It would seem more accurate to consider all these terms as synonymous, while admitting various degrees in proselytism. The simple Judaizers (*Ἰουδαίζοντες*, "B. J." ii. 18, § 2; in Phœnicia and in Palestine some autonomous com-

munities of *θεοσεβείς* organized themselves [Cyril of Alexandria, in "Patrologiæ," lxxviii. 282]; the "cælicolæ" of the fourth century are of the same class), the "improphi" (Suetonius, "Domit." 12), were naturally more numerous than the newly circumcised inscribed upon the register. The number of female proselytes by far exceeded that of the males, a circumstance which is sufficiently accounted for by the fear of circumcision on the part of the latter.

It can not be doubted that Judaism in this way made numerous converts during two or three centuries; but the statements of Josephus, Philo, and even of Seneca, who represent the whole world as rushing toward Jewish observances, must be regarded as fanciful exaggerations ("Contra Ap." ii. 39; Seneca, in "Aug. Civ. Dei," vi. 11; Philo, "De Vita Moysis," § 2 [ed. Mangey, ii. 137]). At the same time, it is an indisputable fact that proselytes were found in large numbers in every country of the Diaspora. The pagan authors, struck by this phenomenon, carefully distinguish the Jews by race from the Jews by adoption (Suetonius, "Tib." 36; "gentis eiusdem vel similia sectantes"; Dio Cassius, xxxvii. 17). In Antioch a large portion of the Greek population Judaized in the time of Josephus ("B. J." vii. 3, § 3); and although they turned

Christians in the days of Chrysostom, they had not forgotten the way to the synagogues. The same holds true of certain districts in Spain. In Damascus "almost all the women" observed the Jewish usages (*ib.* i. 20, § 2). Paul met with proselytes in Antioch of Pisidia, in Thyatira, in Thessalonica, and in Athens. The coins of Apamea representing the Ark of Noah, and the numerous associations of *σεβόμενοι θεόν ὑψίστου*, attest the diffusion of Jewish ideas and legends in Asia Minor. These associations (as in Gorgippia) may even represent veritable synagogues under a pagan mask, assumed for prudence' sake. In Rome, where the Jewish propaganda had taken the first step at the time of the embassy of Numenius (139 B. C.), its efforts and successes are indicated by Horace, Persius, and Juvenal.

The enormous growth of the Jewish nation in Egypt, Cyprus, and Cyrene can not be accounted for without supposing an abundant infusion of Gentile blood. Proselytism swayed alike the upper and the lower classes of society. The great number of Jews passing through the state of slavery must, of course, have catechized their comrades rather than their masters. Yet one hears also of distinguished recruits, and even illustrious ones: in the Orient, the chamberlain of Queen Candace (Acts viii. 26), the royal family of Adiabene, and the kings of Emesa (Azizus) and of Cilicia (Polemo), united by marriage with the family of Herod ("Ant." xx. 7, §§ 1, 3); in Rome, the patrician Fulvia ("Ant." xviii. 3, § 5), Flavius Clemens and Flavia Domitilla, cousins of Domitian (Dio Cassius, lxxvii. 14; the text, read without preconception, leaves no doubt as to their conversion), and a page of Caracalla (Josephus, "Vita," § 1). The empress Poppea herself is termed *θεοσεβής* ("Ant." xx. 8, § 11); and if Heliogabalus was not a Jew, he had at least adopted several Jewish usages, and intended to include Judaism in that strange amal-

gam in which he said all the existing cults should be reconciled under the auspices of the deity of Emesa.

The Jewish propaganda in the East did not meet with any other resistance than the attachment of the populations to their national religions. Thus Syllaëus, minister of Obodas, king of the Nabateans, when pressed to become a convert, declared that the Arabians would stone him ("Ant." xvi. 7, § 6). No Greek law can be cited designed to repress Jewish proselytism; but the Roman government showed less indulgence, especially after the great uprisings which laid bare the implacable hatred of the Jews toward their conquerors. While the religious liberty and the national customs of the Jews were scrupulously respected, severe measures were taken to prevent them from securing recruits, whom the Romans, in their patriotism, looked upon as real deserters. Under Domitian the crime of Judaizing, held to be identical with that of impiety or atheism, occasioned numerous forfeitures and condemnations to death or exile (Dio Cassius, lxvii. 14).

Nerva put an end to these proceedings, which often occasioned scandal (*ib.* lxviii. 1); but though thereafter a partial adoption of Jewish customs was overlooked, a complete conversion continued to be prohibited. A rescript of Antoninus Pius, modifying a too general order of Hadrian, au-

Prohibition of Circumcision. authorized the Jews to circumcise none except their own sons. The circumcision of a non-Jew, even if a slave, was punished with the same penalty as castration (L. ii. pr. Dig. xlviii. 8 [Modestinus]); namely, death for the "humiliores," deportation to an island for the "honestiores," and confiscation for all (L. iii. § 5, iv. § 2; Paulus, "Sent." v. 22, § 4). Both the Roman citizen who submitted himself or who submitted his slave to this operation, and the surgeon who performed the operation, were punished: the one with deportation and confiscation; the other with death (Paulus, *ib.* § 3). This relentless legislation was again enforced by Septimius Severus ("Vita," ch. xvii.), and was maintained in full vigor up to the time of Origen ("Contra Cels." ii. 13).

The effect of these laws was far-reaching, but in a direction different from that purposed by their authors. It is true the increase of the Jewish sect was checked; all the more so since in Talmudic circles the tendencies hostile to proselytism gained decidedly the upper hand. The enfeebling of Judaism, however, did not work to the profit of the pagan religions, which no longer had any hold upon the population. The half-proselytes, having no chance of becoming complete Jews, lent a readier ear to the evangelical preaching; and it was among these that Christianity made its first and its most numerous conquests (as early as the time of Paul; Acts xvii. 17).

The manifest success of the Jewish propaganda, and the stringent laws which were necessary to check it, biased the judgments of the ancient writers upon the Jews. To read them one would believe that Judaism had been to nearly all antiquity simply an object of horror and contempt. Its religious particularism, represented as atheism; its social particularism, represented as unsociability (*ἀνισία*), and

even as a hatred of mankind; its origin, disfigured by absurd legends; its creed and usages, placed in a most malevolent light, often highly mendacious—all this presents a picture in which the ridiculous and the odious vie with each other. At the most, a few philosophic minds showed admiration for the monotheism of Israel, its rejection of idols, and its family virtues (see Reinach, "Textes d'Auteurs Grecs et Romains Relatifs au Judaïsme," Paris, 1895, especially the Preface; and CLASSICAL WRITERS AND THE JEWS). On closer examination it becomes clear that this opinion of men of letters, almost unanimously unfavorable, derived its origin mainly from the Alexandrian controversy; and that the Alexandrian pamphleteers themselves were to a large extent under the influence of their Egyptian environment, where the hatred of the Jew had become a secular tradition. The truth is that, if Judaism lived in a continual antagonism to the champions of ultra-Hellenism and those of the old-school Romanism, it met, on the other hand, with wide-spread sympathy on the part of the masses, and of those of the élite who were free from national prejudices. It would have found even more appreciation if it had divested itself of its purely ethnic spirit; had sacrificed the accessory element (the manifold and vexatious usages) to the essential element (the religious and moral instruction); and had consummated at the proper time the transformation from a race to a religion—a transformation which is at once the program of its history and the problem of its destiny.

VIII. Failing to follow resolutely in this direction, Judaism did not succeed, any more than the religions sprung from Persia, Syria, and Egypt, in gathering up within itself the heritage of pagan classicism. Refusing to be absorbed in the new creed that sprang out of its own loins (the Romans perceived clearly this filiation from the time of Tacitus [in "Sulpicius Severus," ii. 30] up to that of Rutilius Namatianus [i. 389]), Judaism found itself, after the recent triumph of Christianity, in the precarious situation of a minority not yielding to coercion while suspected of a spirit of propagandism. The ancient exclusions based upon national differences were not resuscitated against Judaism. A century after the edict of Caracalla, there could be no question of diverse nationalities in the face of the all-embracing unity of the "orbis Romanus." The Jews were simply considered as a dissident sect, and classed in the same category as the heretics, the "cælicolæ," and even the pagans themselves. Such being the case in a society founded in an increasing degree upon the union of the Catholic Church with the state, Judaism could not fail to be the object of severe restrictions at the hands of the legislators. The progressive course of this severity can be traced through the numerous constitutions issued by the Christian emperors and preserved by the codes of Theodosius and Justinian; from the constitutions of Constantine, which still bear the imprint of a genuine spirit of tolerance and religious neutrality, to the measures, almost Draconian, of the sons and grandsons of Theodosius.

Popular Views About the Jews.

Naturally, account must also be taken of the individual dispositions of the emperors. Thus, against the attitude of the sons of Constantine must be set the humanity of Jovian and of Valentinian, not to mention Julian. The language went through the same process of evolution as the thought: it took on a tone increasingly contemptuous. Soon the very name of Judaism was not pronounced without the accompaniment of the most insulting epithets. The Jews were described as a sect which was baleful, disreputable, sacrilegious, perverse, abominable, whose assemblies were lacking in piety, etc. Only in rare instances was the word "sect" replaced by "nation"—an interesting proof that in the fourth century Judaism was on the point of putting off its national character, which it has only gradually reassumed under the pressure of restrictive legislation.

There is no need to enter into the details of this legislation, many points of which would call for an elaborate critical discussion, and which, moreover, no longer belong strictly to the period sketched in this article. A recapitulation of its principal provisions will suffice, grouped under three heads:

1. Measures Destined to Protect the Jewish Religion and Its Clergy: Judaism was a recognized religion ("Codex Theodosianus," xvi. 8, 9). Starting from this principle, which was never called

Protection of Judaism. least tolerant, ordered that Judaism be respected, and strove to shield its followers from insults on the part of the fanatics, particularly converts from Judaism, the most intractable of all. Of course, the Jews, in their turn, were required to respect the Christian religion and not to turn it into ridicule, even by indirect reference or by symbol—as, for example, at the Purim festival by burning a picture of Jesus under the name of Haman (*ib.* xvi. 8, 18 [in 408]; compare 21 [in 412]). On this condition the Jews could freely celebrate their festivals and Sabbaths. On these days they could not be made to appear in court; nor, conversely, could they require Christians to do so (Constitutions of the years 400 ["Codex Justinianus," i. 9, 13] and 412 ["Cod. Theod." xvi. 21]; compare "Codex Theodos." viii. 8, 8 and 20). Their assemblies were not to be disturbed (Law of 393, "Cod. Theod." xvi. 8, 9), nor their houses and synagogues pillaged and burned. The frequent renewal of this prohibition (*ib.* xvi. 8, 12 [in 397], 20 [in 412], 21, 25, 26) shows how laxly it was observed. This was the period when the Greeks, fanaticized by the bishop Cyril, drove the Jews out of Alexandria; when the violent actions of the Roman garrisons, under Constantius, provoked an alarming revolt in Palestine; and when Severus, Bishop of Minorca, forcibly converted the Jews of his diocese (418). Valentinian I. and Valens expressly conceded to the synagogues the character of "loca religiosa," and declared them exempt from military billeting (Law of 365, "Cod. Just." i. 9, 4 = "Cod. Theod." xvi. 8, 11).

The complement of these protective measures was the privileged situation accorded to the dignitaries and the employees of the synagogues. Placed on the same level with the members of the Catholic clergy, they were exempted from all burdensome

services, from all contributions of forced labor, and particularly from the heavy responsibilities of the curia (Law of 397, "Cod. Theod." xvi. 8, 13). Their right to expel from their communities the "false brothers" who did them the most harm, was acknowledged (Law of 392, *ib.* xvi. 8, 8, and that of 416, *ib.* 23).

The patriarchate, particularly, was the object of most deferential treatment, the patriarch receiving a rank in the official hierarchy as "vir spectabilis." Insults addressed to him were severely punished (Law of 396, *ib.* xvi. 8, 11). For a long time he was authorized to collect through special envoys (APOSTOLI) a tax of "joyous accession" ("aurum coronarium"), which enabled him to display an almost royal pomp. However, the APOSTOLÉ, as the tax was called, already disadvised by Julian ("Epistola," xxv.), was interdicted, and its proceeds confiscated for the benefit of the imperial treasury by Arcadius and Honorius, in 399 ("Cod. Theod." xvi. 8, 24). It was reinstituted in 404 (*ib.* 17; in the same year the privileges of the Jewish dignitaries were again confirmed [ch. xv.]), but not for long.

The arrogance of the patriarch Gamaliel dealt a fatal blow to the institution of the patriarchate. In 415 Gamaliel was deprived of his rank and honors (*ib.* 22); and not long after—at his death, doubtless—the patriarchate was abolished. The apostolé, however, was continued; but in 429 it was converted into a tax for the benefit of the public treasury (*ib.* 29). Its history, it will be observed, strangely resembles that of the didrachma.

2. Civil and Political Status: After being for a long time privileged "peregrini," the Jews, by an edict of Caracalla, had become "cives," enjoying all the rights attaching to this title, and, in addition, certain special privileges by virtue of their religion.

The Christian emperors respected this status in principle, opposing, for instance, the local attempts to impose special "governors" and a system of fixed sale-prices upon the Jewish merchants (Law of 396, "Cod. Theod." xvi. 8, 101), and likewise the attempts to compel the Jews of Rome to enter en bloc the burdensome corporation of the "navicularii" (*ib.* xiii. 5, 18; in the year 390).

But although no injury was done to the civil rights of the Jews—except, as will presently be seen, in regard to slavery and matrimony—the same was not the case with their political rights. The idea that Jews could legally give orders to Christians—that they could hold a particle of the sacred authority of the emperor—soon came to be intolerable. As early as the year 404 it had been decided that Jews could not be employed as "agentes in rebus"; that is to say, as functionaries of the police and of the treasury (*ib.* xvi.; the word "militia" in this text has been misunderstood: it in no way designates the military career, which never had been open to the Jews). In 418, in a general manner, they were shut out from all public employments ("Cod. Theod." xvi. 8, 24; compare "Constitutio Sirm." 6), while at the same time permitted to become advocates (this until the year 425 only) or decurions. This interdiction was renewed in a more explicit fashion

in 438, and was extended to the judiciary offices and to the municipal dignities, particularly that of "defensor civitatis" ("Nov. Theod." ii. 3, 2="Cod. Just." i. 9, 19).

Moreover, the Jews were required to hold curial offices, more onerous than honorable, and which, in the pagan epoch, had been considered incompatible with their religion. This last measure, already attempted by Septimius Severus, met, it appears, with vigorous resistance. Beginning with the year 321, Constantine ordered that all the municipal councils could press into this service those Jews whose fortunes rendered them liable, excepting "two or three" in each community, "ad solacium pristinae observationis" ("Cod. Theod." xvi. 8, 3). Later constitutions stated this exemption more precisely, while at the same time extending its range

Liability to to priests, archisynagogues, chiefs, **the Curia.** and functionaries of the Jewish synagogues (*ib.* xvi. 8, 2 [in the year 330], 4, 13; xii. 1, 99; "Cod. Just." i. 9, 5). But a law promulgated in the Orient—the date and author of which are unknown—reconsidered the reform, and exempted once again all the Jews from the curia. This law, in its turn, was abrogated, at least for the Occident, in 398 ("Cod. Theod." xii. 1, 158; compare "Cod. Just." i. 9, 5, as regards the first abrogation, in 383). The property of the Jews liable to the curia was formally alienated to the curia ("Cod. Just." i. 9, 10 [in 403]). It is worthy of note that even the curial Jews were considered as people of the lowest condition (*ib.* i. 9, 19). It is hard to explain, therefore, that in the time of Pope Gelasius (492–496) there were still Jewish "clarissimi" (Mansi, "Concil." viii. 131). Judicial autonomy disappeared at the same time as the curial privilege.

As early as the year 393, the Jews were required to conform in their marriages to the Roman laws, and polygamy was forbidden ("Cod. Just." i. 9, 7). A law in 398 ordained that in all matters not strictly religious in character the Jews were amenable thereafter to the Roman law and to the judge of the common law. No doubt the parties concerned were also entitled to submit their case to the decision of their rabbi, if they wished to do so; but this decision, in case it conflicted with that of the governor, the superior judge, had only the value of a simple arbitrament ("Cod. Theod." ii. 1, 10; this constitution is reproduced in "Cod. Just." i. 9, 8, with an omission, which seems to have attributed to the Roman judge jurisdiction even in litigations of a religious nature; but this omission can not be considered intentional). It must be assumed that, either through superstition or through respect for the judicial knowledge of the rabbis, many Christians in litigation with Jews consented to submit their contentions to the Jewish elders. This practise was forbidden by a constitution of 418 ("Cod. Just." i. 9, 15).

3. Measures of Defense and Attack of a Religious Character: Two principles are here dominant: (1) the prevention of the Jews from spreading their religion, especially to the detriment of Christianity; and (2) the encouragement of apostasy. To the first category belong the prohibition, under a penalty of a fine of 50 pounds in gold, of the erection of new synagogues, the preservation and maintenance of

the old ones being, however, permitted ("Cod. Theod." xvi. 8, 25 [in 423], 27; "Nov. Theod." ii. 3, 3; "Cod. Just." i. 9, 19); the prohibition, under the death-penalty, of marriage with Christian women ("Cod. Just." i. 9, 6 [in 388]; "Cod. Theod." iii. 7, 2; ix. 7, 5), or even of having any contact with the women of the imperial gynaeceum ("Cod. Theod." xvi. 8, 6 [in 339]; the sense is somewhat doubtful); and, finally, the prohibition, also under penalty of death, aggravated by confiscation, of the conversion of free Christians to the Jewish religion ("Cod. Just." i. 9, 16, 19 [in 439]; the convert, also, was punished with confiscation, "Cod. Theod." xvi. 8, 7 [in 357]; compare *ib.* xvi. 8, 1 [the date 315 is inaccurate]). A very delicate question, and one in regard to which legislation varied, concerned the detention by Jews of non-Jewish, espe-

Converts cially Christian, slaves. Here the danger of seduction, or even of forcible circumcision, was a thing which was regarded as particularly to be dreaded. At first it was thought sufficient to renew the ancient law of Antoninus prohibiting the circumcision of even pagan slaves ("Const. Sirm." 4 [in 335], a renewal of a former constitution). The penalty for the master, it would appear, was only his loss of the slave, who was set free. But soon after, the emperor Constantius added thereto the death-penalty for the master, and in a general way forbade even the acquisition by Jews of slaves of another religion, under the penalty of their confiscation for the benefit of the treasury. In cases where the slaves were Christians, the confiscation of the owner's entire fortune was ordered ("Cod. Theod." xvi. 9, 2 [in 339]). This law, truly exorbitant, although renewed in 384, could not be enforced (*ib.* iii. 1, 5).

In 415 the Jews were formally authorized to own Christian slaves on the condition of not converting them (*ib.* xvi. 9, 3); but in 417 the influence of the clergy led—at least in the future—to the abrogation of this indulgent law. Christian slaves in actual detention by Jews could be retained by the latter, the death-penalty being applied to cases of attempted circumcision only (*ib.* 4; confirmed in 423 [*ib.* 5]); but even this provision was modified in 439 to exile and confiscation ("Cod. Just." i. 9, 16).

In the same manner that the legislation opposed all expansion of the Jewish religion, it encouraged, and no less energetically, the conversion of the Jews to Christianity. The Church, however, had no right to receive such apostates as desired, in invoking its right of asylum, simply to escape the payment of their debts ("Cod. Theod." ix. 45, 2 [in 397]). In the first place, of course, the newly converted were protected with the whole rigor of the law against the malice and cruelty of their former coreligionists ("Const. Sirm." 4; "Cod. Theod." xvi. 8, 1; "Cod. Just." i. 9, 3; this constitution, the date of which as handed down [315] is certainly false, threatens delinquents with the penalty of being burned alive). Still worse, the converted Jewish child could not be disinherited by its parents, nor even be curtailed in its portion; while a provision singularly odious was added, viz., the fourth part of the residue was assured to it, even though it might have been convicted of a capital crime

French writers like Charcot, Lancereaux, and Féré have said that rheumatic and gouty diathesis is more wide-spread among Jews than among any other European race. The groups of diseases recognized by the French under the names "arthritis" and "herpetism" are by some writers said to be common among the Jews. By "arthritis" they understand a certain group of diseases, usually due

DIBBUKIM: Transmigrated souls. "Dibbuk" (lit. "something that cleaves unto something else") is a colloquial equivalent, common among the superstitious Jews in eastern European countries, for a migrant soul. It represents the latest phase in the development of the belief in the transmigration of souls; namely, that the soul of a man who has lived a wicked life will enter the body of a living person and refuse to leave it. The exorciser, in such a case a "ba'al shem," or a wonder-working rabbi, is alone

able to cast out this evil spirit, which usually goes out through the small toe, where a little orifice from which blood oozes marks the exact point of its exit. Full descriptions of such successful acts of exorcism, where, however, the dibbuk is still called by its older name "ruah," are given in Manasseh b. Israel's "Nishmat Hayyim" (part iii., ch. 14; part iv., ch. 20). Another detailed description of a similar incident is reproduced in "Ha-Shaḥar" (vi. 459, 697) from Moses Prager's (Graf) "Zera' Kodesh" (Fürth, 1696), and is curious from the fact that R. David Oppenheim, the celebrated book-collector, who was then rabbi of Nikolsburg, Moravia, is one of the signatories to the narrative.

The first who wrote of the dibbuk under that name in modern Hebrew literature was P. Ruderman, but his "Ha-Dibbuk," of which the German title is "Uebersicht über die Idee der Seelenwanderung" (Warsaw, 1878), is of little value. The most interesting part of the book is the description of one of the dibbukim, which, according to his statement, were very common in Poland in those days. It proves that the manifestations of the dibbuk, and the belief in the power of practical cabalists to exorcise it, have undergone little change in the two centuries which have elapsed since the Nikolsburg incident referred to above. Dr. S. Rubin, in his "Gilgul Neshamot," the German title of which is "Die Metempsychose in Mythos und Kultur Aller Völker" (Cracow, 1898), points out the connection between the ancient belief in the transmigration of souls and in possession by evil spirits, and that in the dibbukim of modern times. He says at the end of his work (p. 29) that the belief in the wanderings of the soul "has come down to our time among the ṣad-dikim and saints of the Ḥasidim, who cast out 'gilgulim' and 'dibbukim' from insane people." See EXORCISM; METEMPSYCHOSIS.

DIBLAH: According to the Masorah and Septuagint, which the R. V. follows, "Diblah" is the name of a place mentioned in Ezek. vi. 14. No place of this name corresponding with the requirements of the passage is known. J. D. Michaelis conjectured that it was a misreading for "Riblah," since in Jer. lii. 10 the Septuagint has the same misreading, though the Masorah is there correct. See RIBLAH.

G. A. B.

DIBON (דִּבּוֹן): 1. A very ancient town, situated from three to five miles (Baedeker, "Palestine," p. 193) north of the River Arnon (Tristram, "The Land of Moab," pp. 132 *et seq.*). The true pronunciation seems to be "Daibon" (according to the Greek transliterations, Δαῖβον, Δαῖβον; see Dillmann, on Num. xxi. 30, and Mayer, "Z. A. T. W." i. 128, note 2). It is the modern Diban, where in 1868 the Mesha Inscription was found, upon which the name of the town itself occurs (lines 21, 28). It is from Dibon that King Mesha derives his epithet דִּבְנִי ("the Dibonite"; Mesha Inscription, line 1).

The town, originally under the dominion of Moab, was conquered by Sihon, king of the Amorites (Num. xxi. 27-30), but then wrested from his control by the Israelites. It appears to have been fortified by Gad (Num. xxxii. 3, 34); hence its descrip-

tion as "Dibon-gad" in Num. xxxiii. 45, 46, though it is possible that the second part of this compound refers to a local deity only. It was assigned to Reuben (Josh. xiii. 9, 17). In the tenth pre-Christian century it is again found under Moabite domination, and as the residence of King Mesha. According to his inscription the Moabites called it "Ḳarḥa," meaning a bald (untimbered) plateau. This was

PLAN OF ANCIENT DIBON.
(After Schick, in "Zeit. Deut. Pal. Ver.")

due to the fact that the town occupied two elevations; the higher one, this Ḳarḥa, had been surrounded by a wall, and constituted the "new city," containing a water reservoir and many cisterns, as well as the royal palace and a "height" ("bamah") for the god Chemosh. In Isaiah's prophecies (Isa. xv. 2) it is menaced as a Moabitish city before other towns, the writer playing upon the name "Dibon" (= "Dimon," from "dam" = blood; Isa. xv. 9; "Madmen" in Jer. xlviii. 2 is a variant, if not a corruption) to predict its bloody fate. Dillmann, Duhm, and others reject the identification. Cheyne makes "Dimon" a corruption of "Nimrim" (compare "Zeitschrift des Deutsch. Palästina Vereins," ii. 8). Eusebius calls it a "large market-place" ("Onomasticon," 249, 43); but it is not mentioned by later medieval writers. Even now fragments of columns and ornaments strewn about witness to the town's former importance.

2. A settlement of returning exiles in the Negeb (the South), in the tribal territory of Judah (Neh. xi. 25), in all likelihood identical with "Dimonah" in Josh. xv. 22, and represented by the modern Al-Dib (or Al-Dhaib); according to Robinson, Al-Daib; see Buhl, "Geographie des Alten Palästina," p. 182).

DICE. See GAMBLING.

DICK, ISAAC MAYER: Russian Hebraist and novelist; born in Wilna 1808 (of the various dates the one given by "Ahtiasaf" is probably most nearly correct); died there Jan. 24, 1893. His father, who was a hazzan, gave him the usual Talmudical education, and he was also instructed in the Bible and Hebrew. He married when very young, and while living with his wife's parents in Nishvezh, near Wilna, became acquainted with a Catholic priest who clandestinely taught him the German language. He also acquired a knowledge of Russian and Polish, and on his return to Wilna acted as private teacher of Hebrew and German, having for one of his pupils Mattathias Strashun, who remained his lifelong friend. In 1841 Dick became teacher of Hebrew in the newly founded government school for Jewish boys in Wilna.

The visit of Sir Moses Montefiore to Wilna in 1846 was the occasion of a great outburst of literary productions in his honor. Dick described the visit in "Ha-Oreal" (The Guest), published at Königsberg 1860. He was one of the founders and for many years the "shammash" of the Synagogue Tohorat ha-Kodesh, modeled after the Shohare ha-Tob of Berlin of Mendelssohn's time, and known in Wilna as "Berliner Schul," because it dared introduce some slight reforms in accordance with the ideas of the Mendelssohnian "maskilim," who were called "Berliner." He was interested in the uplifting of the Jews of Russia by various means, and corresponded on that subject with Count Oubaroff, minister of education under Nicholas I. Dick declared himself in favor of enforcing the ordinance compelling the Jews of Lithuania to dress in German or European fashion, though in his own dress and manners he remained an old-style Jew to the last, believing that he could thus do more good than if he broke with old associations and boldly joined the new generation.

Dick was a most pleasant conversationalist, his fame as a wit spreading far outside of Wilna, and innumerable humorous anecdotes being told in his name and about him to this day. In later years he was employed by the publishing house of Romm at a small weekly salary to write Yiddish stories; and his productions of that nature, of various sizes, are said to number nearly three hundred. In the chaotic condition of the Yiddish publishing trade in Russia, even an approach to a bibliography of works of that nature is an absolute impossibility. In his old age Dick lived comfortably, and was one of the most respected and popular men in the community.

In addition to that mentioned above, Dick wrote three Hebrew works: "Mahazeh Mul Mahazeh," a Purim story (Warsaw, 1861); "Siprono," a description of Jewish life in small cities (Wilna, 1868); and "Masseket 'Aniyyut" (Tractate Poverty), considered one of the best Talmudical parodies ever written. But his fame rests on his Yiddish novels, a field in which he was the first professional and the founder of a school. As he himself asserted many times, he wrote only for the purpose of spreading knowledge and morality among his readers, and in many cases he permitted this purpose to overshadow the story. Most of the modern critics condemn his style: his constant use of High-German words, explained, often

wrongly, in parenthesis: his quotations from the Talmud and Midrashim with his own commentaries, retarding the flow of the narrative; and his pausing at a dialogue or other interesting point to insert a long sermon on the moral lesson to be drawn from incidents described in the story. But in spite of all verbosity and deviation, Dick was an excellent storyteller, having a power of description, an insight into human character, and a sympathetic humor which are given to few. His longer works are chiefly translations, and are the least worthy of his writings; but among the shorter ones are many original stories, some of which, if divested of superfluous matter, could well bear an English translation. "Der Yiddischer Posliannik" (The Jewish Ambassador), Wilna, 1880; "Note Ganaf" (Life of Nathan the Thief), *ib.* 1887; and "Die Schöne Minka," *ib.* 1886, have considerable merit; while some of his characters, such as "Shemaya Gut Yom-Tob Bitter" (the holiday visitor), "Chaitzikel Allein," or "Der Moiziter Bachur," rank among the best efforts of the present Yiddish writers.

DICK, LEOPOLD: German artist and professor of engraving; born 1817; died June 23, 1854. He studied art at the Royal Academy of Munich, and became well known through his lithographic illustrations of the Old Testament after Raphael. In 1848 he was appointed professor of the art of engraving at the Royal District Industrial School of Kaiserslautern in the Palatinate. He taught with great success, and was highly spoken of by the board of examiners in their annual reports.

DICKENS, CHARLES: English novelist; born Feb. 7, 1812, at 387 Mile End Terrace, Commercial Road, Landport, Portsea; died June 9, 1870, at Gadshill, near Rochester, Kent. Dickens is of interest to the Jewish world principally through two of his novels: "Oliver Twist" (Jan., 1837 to March, 1839) and "Our Mutual Friend" (May, 1864 to Nov., 1865). These two works are characterized by a decided difference in the attitude of Dickens toward Jews. Few Jews in fiction are blacker and more repugnant in body and soul than *Fagin*, the thief, the coward, the all but murderer, and few bits of descriptive writing are more graphic than the narration of *Fagin's* last night on earth and his well-deserved punishment. Yet the name was derived from a Christian friend of Dickens' youth, the whole character from a well-known Christian "fence" of the period.

Fagin became the generally accepted type of the Jew; and "Oliver Twist" was considered as a direct hit at the Jew. Dickens evidently realized this, either through criticism or from personal contact with the real Jew; for when next he made use of a Hebrew in fiction, he drew *Riah* in "Our Mutual Friend," a character at the other extreme—almost

impossibly, certainly improbably, good. In both "Oliver Twist" and "Our Mutual Friend" Dickens displays a lack of knowledge of the real characteristics of Jews.

DICTIONARIES, BIBLE: Collections of articles in alphabetical order treating of the various biographical, archeological, geographical, and other subjects of the Bible. Up to within quite recent times Jews have taken very little part in such work. The earliest attempt at anything like a Bible dictionary is the work of Eusebius, Bishop of Cæsarea (d. 340), on the geographical names mentioned in the Old and New Testaments, entitled *Περὶ τῶν Τοπικῶν ὀνομάτων τῶν ἐν τῇ Θείᾳ Γραφῇ* (ed. Lagarde, in "Onomastica Sacra," 2d ed., 1887; republished by Klostermann in "Texte und Uebersetz." viii. 2). To this must be added the "Onomasticon" of Biblical proper names in Greek, also published by Lagarde. Jerome's "Liber Interpretationis Hebraicorum Nominum" and "De Situ et Nominibus Locorum Hebraicorum Liber" (ed. Lagarde, *l.c.*) are based on the work of Eusebius. The work of the Spanish priest Arias Montanus, entitled "Communes et Familiares Hebraicæ Linguae," etc. (Antwerp, 1572), contains a large amount of material which, if put in alphabetical sequence, might have made a Biblical dictionary. Even the interest aroused in the Bible by the Reformation and the Humanist development (see HUMANISTS) was largely philological in character; but the works of learned French, Dutch, and English Orientalists had brought out a large amount of material dealing with the social life of the Israelites, and the travels of some of them had increased the interest in the East as the best aid to an exposition of Biblical times. The first successful attempt to compile a dictionary of the Bible was made by the polyhistor and Protestant theologian Johann Heinrich Alsted (1588-1638), who wrote a universal encyclopedia and a "Triumphus Bibliorum Sacrorum seu Encyclopædia Biblica," Frankfort, 1625. Not many years later P. Ravenilli published his "Bibliotheca Sacra seu Thesaurus Scripturæ Canonica" (Geneva, 1650; 2d ed., 1660), which is in the proper form of a dictionary. This work might rather be called a dictionary to the Vulgate, just as the extract made of it in English, "A Complete Christian Dictionary of the O. and N. Test.," by Thomas Wilson, John Bagwell, and Andrew Simon (London, 1661), is rather a concordance to the English Bible. In 1693 J. Simon published at Lyons a "Dictionarium Biblicum," which was reprinted several times, the last in 1717. Simon, however, was ignorant of Hebrew, and it was for the purpose of correcting the many mistakes in his dictionary that the epoch-making

Calmet's Dictionary. work of Augustin Calmet, "La Sainte Bible en Latin et en François avec un Commentaire Littéral et Critique" (23 vols., Paris, 1707), was published. See CALMET, AUGUSTIN.

Calmet's dictionary, translated into English by D'Oyley and Colson (1732), was republished with many additions by Charles Taylor (London, 1793), but with the omission of all the rabbinic and Cath-

IV.—37

olic material; and it reached an eighth edition in 1841. In a condensed form it was edited by Edward Robinson (7th ed., Boston, Mass., 1832-35). Calmet's dictionary was incorporated in the series of theological encyclopedias edited by Abbé Migne; and not only the text, but the illustrations also have served until quite recently to illustrate books dealing with the Bible or with the Jews. Upon Calmet is based also Daniel Schneider's "Allg. Bibl. Lexikon" (3 vols., Frankfort, 1728-31), containing much material from Geiers, Carpzov, Buxtorf, Borchart, Lightfoot, Selden, and Vitringa. Though very diffuse, this represents the first German attempt at a Bible dictionary, some of the articles being of special Jewish interest; *e.g.*, "Falsche Messias," "Falsche Christen," and "Gebot," in which last Schneider has added an incomplete list in German of the 613 commandments. W. F. Hezel's "Bibl. Reallexikon" (3 vols., Leipsic, 1783-85) also depends upon Calmet.

The rise of the critical school, especially as represented at Halle by the two Michaelis, Semler, Eichhorn, etc., finds its expression in the "Biblische Encyclopædie," published at Gotha (1793-98) by a company of learned scholars, which work, however, was never finished. The Gotha encyclopedia was completely overshadowed by G. B. Winer's "Biblisches Realwörterbuch" (2 vols., Leipsic, 1820, 1833, 1847), which has remained a standard work almost down to the present day. A number of popular presentations appeared in Germany during the first half of the nineteenth century; for example:

1829. Wörlein.—Encyk. Wörterbuch der Bibl. Grund-Realien. Nuremberg.

1836. Allgem. Wörterb. der Heil. Schrift. (Catholic). Regensburg.

1837. Gemmerli and Löhn.—Encyk. der Bibelkunde. Leipsic. 1846-50. Von Hoffmann and Redslob.—Allg. Volksbibellexikon. *Ib.*

1849. F. C. Oettinger.—Bibl. Wörterb. (purely theological). Stuttgart.

1856. H. Zeller.—Bibl. Wörterb. 2d ed. 1866; 3d ed. 1884.

The last-named was a protest against the rationalism of Winer and of Redslob (who followed Vatke's Biblical criticism). It was, however, fast becoming apparent that no more than an encyclopedia, could a real Bible dictionary be compiled by one man. The "Real-Encyklopædie für Protestantische Theologie und Kirche," edited by Herzog and a number of leading German scholars (Stuttgart, 1852-62; 2d ed., by Herzog and Plitt, 1877-88; 3d

Johann ed., by A. Hauck, 1896 et seq.), while Herzog. not strictly a Bible dictionary, contains many valuable articles dealing with Biblical subjects and personages. Germany has, in modern times, published two Bible dictionaries in condensed form; namely, those of Schenkel and C. A. Riehm. Schenkel's "Bibel-Lexikon" (5 vols., 1869-75) was written in large part by Diestel, Dillmann, Hitzig, Holtzman, Merx, Nöldeke, Graf, Reuss, and Schrader. It omits subjects which are of minor importance. Riehm was assisted in his "Handwörterb. des Bibl. Alterthums" (2 vols., 1874) by Beischlag, Delitzsch, Ebers, Diestel, Kautzsch, Schrader, and others (2d ed., by F. Baethgen, 1894). Of other and more popular dictionaries published in Germany may be cited the following:

1714. Ad. Rechenberg.—*Hierolexicon Reale Collectum*. 2 vols. Leipsic and Frankfurt.
 1776. J. A. Dalmasius.—*Dict. Manuale Biblicum*. 2 vols. Augsburg.
 1793-96. G. L. Gebhardt.—*Bibl. Wörterb.* 3 vols. Lemgo.
 1820-27. C. G. Haupt.—*Bibl. Real und Verbal Encyk.* 3 vols. Quedlinburg.
 1823. C. A. Wahl.—*Bibl. Handwörterb.* 2 vols. Leipsic.
 1837. C. L. Walbrecht.—*Bibl. Wörterb.* Göttingen.
 1842. A. C. Hoffmann.—*Allgem. Volksbibellexikon*. Leipsic.
 1866. H. Besser.—*Bibl. Wörterb.* Gotha.

The first to break away from Calmet in England was John Kitto. He recast the whole work, being assisted by such scholars as Hävernicks, Tholuck, Reginald Stuart Poole, and William Wright, and published "A Cyclopædia of Biblical Literature" (Edinburgh, 1843-45; 2d ed. by Burgess). The whole was rewritten for the third edition by William Lindsay Alexander (Philadelphia, 1865), with especial reference to the religion, literature, and archeology of the Hebrews. For the first time the scope of such dictionaries was enlarged by the addition of lives of prominent Biblical scholars and of articles upon distinctively Jewish subjects (*e.g.*, "Elijah Levita," "Jewish Printers," "Albelda," "Dunash," "Yosippon," "Tanhuma," "Talmud," "Satanow," "Rashbam"). Among those contributing to this work were Bialloblotzky, Cairns, Samuel Davidson, Emanuel Deutsch, Farrar, Geikie, and D. Ginsburg. Potter's "Complete Bible Encyclopedia" (ed. William Blackwood, 3 vols., Philadelphia, 1875) was based upon Kitto and Ayre (see list). It is a Church dictionary as well as a Biblical one. J. A. Bartow's "Biblical Dict." (2 vols., London, 1845) was popular in character, but did not go further than the letter "L."

Much more scholarly than Kitto's dictionary is the "Dict. of the Bible," published by W. Smith and Aldis Wright (London, 1860). This was frankly stated to be not a dictionary of theology, but a Bible dictionary according to the Authorized Version. It was non-controversial; in certain cases it has several articles treating one and the same subject from different points of view. It was the first dictionary to contain a complete list of proper names in the Old and New Testaments and the Apocrypha. The first volume was republished in two parts (1893) with the help of Driver, Naville, Westcott, Ryle, Tristram, Wilson, etc. The first edition was republished in Boston (1863), and again by H. B. Hackett and Ezra Abbot in New York (1871). An abridgment, made by Smith himself, appeared at Hartford (1868). P. Fairbairn's "Imperial Bible Dict." (Edinb., 1865) is more popular in character and more theological. McClintock and Strong's "Cyclopædia of Biblical, Theological, and Ecclesiastical Literature" (12 vols., New York, 1867-87; rev. ed., 1895) has justly had a great vogue in the United States. It contains nearly all the material to be found in previous dictionaries, and a large number of articles dealing with rabbinical theology and rabbinical writers. Philip Schaff's name is connected with two Bible dictionaries: one published in Philadelphia and New York in 1880 (Italian translation by Enrico Meille, Florence, 1891), and a larger "Religious Encyclopædia: or Dictionary of Biblical, Historical, Doctrinal, and Practical Theology," based

largely upon Herzog and Plitt's "Real-Encyc." To this he added an "Encyclopedia of Living Divines," the whole being published in a third edition (4 vols.) by Funk & Wagnalls, New York, 1891.

Mention should be made here of the ninth edition of the "Encyclopædia Britannica." With Robertson Smith as editor, it is natural that it should contain a large number of articles dealing with the Bible, and largely written by Smith Robertson himself (see "Encyc. Bibl." Preface, Smith, p. vii.). The articles on Jewish literature were written by S. M. Schiller-Szinessy. It was Smith's intention to republish the Biblical articles, and, with the help of other scholars, to form an "Encyclopedia Biblica." The immense mass of archeological and critical material gathered since the appearance of the "Britannica" made this impossible; but the project paved the way for the "Encyc. Bibl." of T. K. Cheyne and T. S. Black (4 vols., New York and London, 1899 *et seq.*). All the leading Biblical scholars are contributors to this work, which reaches the highest standard of accuracy and completeness; but it has one great drawback in that it gives too much attention to conjectural Biblical criticism. The "Dict. of the Bible," published at the same time by J. Hastings in conjunction with John A. Selbie, A. B. Davidson, S. R. Driver, and H. B. Swete (4 vols., New York, 1898-1902), is meant for intelligent laymen as well as for scholars, and therefore contains much less purely technical matter. It contains also articles on specifically Jewish subjects written by W. Bacher and other Jewish scholars.

By the side of these works must be placed the "Dict. de la Bible," now in course of publication by F. Vigouroux (Paris, 1895 *et seq.*). Containing the work of a number of Catholic scholars and prefaced by an encyclical of Pope Leo XIII., this dictionary is an authoritative Catholic presentation. It embraces a number of subjects dealing with the theology and history of the Church; and it endeavors to combat from the Catholic standpoint modern Biblical criticism. The care employed in its compilation and the richness of its illustrations make it a valuable addition to the list of Biblical reference-books.

There are only three dictionaries by Jewish scholars to be recorded here. Ezekiel b. Joseph Mandelstamm compiled ("Sefer ha-Shemot," Warsaw, 1889) an alphabetic account in Hebrew of all persons and places mentioned in the Bible. In 1896 A. H. Rosenberg commenced the publication of a Bible dictionary in Hebrew, "Ozar ha-Shemot." No topics or general subjects were treated, but only proper names and words occurring in the Hebrew text. The publication ceased after two parts had been issued (New York, 1896-99). A far more ambitious attempt is the "Real-Encyc. des Judenthums, Wörterb. für Gemeinde, Schule und Haus," of J. Hamburger, the first part of which (Strelitz, 1874) is devoted to the Bible. Hamburger attempts to treat the Biblical subjects entirely from a Jewish point of view, and with continual reference to the Talmud and Midrash, often with a practical end in view, as many of the topics treated were the subject of controversy within the Jewish body. Unfortunately, his references are not exact.

Quite different in character from all those above mentioned is James Inglis' "Bible Text Cyclopædia" (Philadelphia, 1877). This is a topical classification of Bible texts, the wording of which is given in full. A shorter work, but upon similar lines, is the "Bible Text-Book," published by the American Tract Society (n.d.). The following list comprises the chief Bible dictionaries published in modern times for more general use:

1769. J. Brown.—Diet. of the Holy Bible. 2 vols. London.
 1779. A. Macbean.—Diet. of the Bible. *Ib.*
 1784. P. Oliver.—Scripture Lexicon. Birmingham; London, 1843.
 1793-98. F. G. Lenn.—Bibl. Encyc. 4 vols. Gotha.
 1815-35. J. Robinson.—Theological, Biblical, and Ecclesiastical Diet. London.
 1816. J. Brown.—Diet. of the Holy Bible. 2 vols., Albany; 1 vol., New York, 1846.
 1829. W. Gurney.—Pocket Diet. of the Holy Bible. London.
 1831. W. Jones.—Bibl. Cyc. 2 vols. *Ib.*
 1831. R. Watson.—Bibl. and Theol. Diet. London.
 1839, 1855. F. A. P.—Union Bible Diet. Philadelphia.
 1840, 1860. S. Green.—Bibl. and Theol. Diet. London.
 1848, 1849, 1853. J. Eadie.—Bibl. Cyc. London; Philadelphia, 1902.
 1849. J. G. Lawson.—Bibl. Cyc. 3 vols. London.
 1850. Alfred Jones.—Proper Names of the O. T. Scriptures Expounded and Illustrated. London.
 1852. J. Farrar.—Bibl. and Theol. Diet. London.
 1854. H. Malcolm.—Diet. of the Bible. *Ib.*
 1859, 1886. Diet. of the Holy Bible for General Use. American Tract Soc., New York
 1863. G. S. Bowen.—Manual of Illustrations Gathered from Scriptural Figures, etc. New York.
 1865. J. A. Bost.—Diet. de la Bible. Paris.
 1866. J. Ayre.—Treasury of Bible Knowledge. London.
 1877. James Inglis.—Bible Text Cyc. Philadelphia.
 1880. Manrique Alonzo Lallave.—Diccionario Biblico. Part I. Seville, [phia.
 1893. Edwin N. Rice.—People's Diet. of the Bible. Philadel-
 1903. H. Guthe.—Kurzes Bibl. Wörterb. Tübingen and Leipsic.
 n.d. W. Goodhue and W. C. Taylor.—Pictorial Diet. of the Holy Bible. [Philadelphia.
 n.d. Index to the Holy Bible. American Sunday School Union.
 n.d. Bible Text-Book. American Tract Soc.
 1909. James Hastings.—Dictionary of the Bible.
 1909. M. W. Jacobus and others.—A Standard Bible Dict.

DICTIONARIES, HEBREW: The earliest known work giving a lexical survey of part of the Hebrew language, with comments, is the dictionary of Biblical proper names (*Ἑρμηνεία Ἑβραϊκῶν ὀνομάτων*) ascribed to Philo of Alexandria, and in any case the work of a Greek Jew. Origen, in the third century, enlarged it, and Jerome, at the end of the fourth century, worked it over in Latin (P. de Lagarde, "Onomastica Sacra," 2d ed., 1887; Schürer, "Geschichte," 3d ed., iii. 540). Aside from these first lexical works on the Bible, which have been preserved only within the Christian Church, there are no traces of a similar attempt in pre-geonic times. The manner in which the Bible was expounded and its language handed down by tradition in the Jewish schools of Palestine and Babylon, precluded the need of lexical aids. Traditional literature, beginning with the tannaitic Midrash, contains, of course, numerous lexical comments on the words of the Bible; and this literature, including the old Bible translations, must be regarded as the earliest and most important source of Hebrew lexicology.

The first lexicon mentioned in Hebrew literature deals not with the Bible, but with the Talmud. Gaon Zemah b. Paltoi of Pumbedita (last quarter of the ninth century) wrote a lexicon

Talmudic Lexicons. for the Babylonian Talmud, of which, however, only small fragments have been preserved in quotations (see Kohut, "Aruch Completum," Introduction, pp. xviii. *et seq.*). Perhaps Zemah himself designated his work by the name 'ARUKH (ערך), which word (derived from the verb ערך, Job xxxii. 14) is the earliest term in Jewish literature for a lexicon, though it gained currency only through Nathan b. Jehiel's work (see below) of that title. The first known Hebrew lexicon is called "Agron" (אגרון, pronounced also "Igron"), meaning "a collection of words," from אגר, "to collect." It is a youthful work of Saadia, gaon of Sura, and was written in 913. It was intended, as Saadia says in the introduction (still extant), not only to promote the knowledge of the pure Biblical language, but also as an aid to writing poetry. Hence Saadia's "Agron" was a double lexicon, arranged, as were most of the original Arabic lexicons, according to the alphabetical sequence of the first and final letters of the roots and words, corresponding to the two formal requirements of the Hebrew versification of that time, acrostic and rime. Saadia, who originally had supplemented each word by only a Biblical passage in which it occurred, made a second, enlarged edition of the "Agron," in which he gave the Arabic equivalents for the words, besides also chapters in Arabic on various subjects useful for poets. He also changed the name of the work to "Book of Poetry," or "Book on the Principles of Poetry" (for the extant fragments see Harkavy, "Studien und Mittheilungen," v.). A smaller but likewise epoch-making work of Saadia's was his explanation, from the language of the Mishnah and Talmud, of 70 (or rather 90) words occurring seldom or only once in the Bible. This has been edited many times.

Saadia's elder contemporary, Judah ibn Koraish of Tahart, North Africa, composed a larger work along the lines of Saadia's small list of **Judah ibn Koraish.** Biblical words. This work, which is still extant, was written in the form of a letter ("risalah") to the community of Fas (Fez), and has three chief divisions in lexical arrangement, containing comparisons of Hebrew words with (1) New-Hebrew words of the Mishnah, (2) Aramaic words, and (3) Arabic words. This is the first work on Semitic comparative linguistics, and it has held a permanent place in Hebrew philology (ed. Bargès and Goldberg, Paris, 1857). The third part, containing comparisons of Hebrew and Arabic words, was known separately as "Sefer ha-Yahas," or "Sefer Ab wa-Em," according to the initial words (Ibn Ezra, Introduction to his "M'oznayim"; Ibn Ezra's contemporary, Isaac b. Samuel, quotes "Agron Ab wa-Em"; see "Jew. Quart. Rev." x. 729). Ibn Koraish also began a larger lexicon, which, however, was not carried beyond the roots beginning with alef (see Bacher, "Die Anfänge der Hebräischen Grammatik," p. 69; "Jew. Quart. Rev." *l.c.*). This work, which Menahem b. Saruk quotes as "Sefer Pitronim" (Book of Expla-

nations), was, like Saadia's "Agron," doubtless written in Arabic, as was the "risalah."

What Ibn Koraish's lexicon would have been may be seen from that of David b. Abraham (tenth century), which has been preserved in an almost complete state. The latter author, called also Abu Sulaiman of Fas (Fez), belonged to the Karaite sect, and was probably stimulated by Ibn Koraish's writings to undertake his own work, which, also, contained many Hebrew-Arabic comparisons. Like Saadia, the only author to whom he refers by name, David b. Abraham calls his lexicon (written in Arabic) "Agron," which he renders in Arabic by "Jami' al-Alfaz" (Collector of Words). Through him the Karaites came to prefer the word "agron" as a term for "lexicon." An author belonging to

David ben Abraham. that sect, writing in Arabic in the beginning of the eleventh century, calls

David b. Abraham's work "the chief representative of the Agron literature" (see "Rev. Etudes Juives," xxx. 252); and Judah Hadassi (twelfth century) mentions the "Agronot" or "Sifre ha-Agron" ("Monatsschrift," xl. 125). David b. Abraham also produced an abridgment of his lexicon, as did Levi b. Japheth later, whose work was made the basis of Ali b. Sulaiman's "Agron," written in the first half of the eleventh century (Pinsker, "Liḳḳuṭe Qadmuniyyot," i. 117, 183; "Rev. Etudes Juives," xxx. 125). Extracts from David b. Abraham's work, which was the only original contribution of the Karaites to Hebrew lexicography, have been published by Pinsker (*l.c.* pp. 117-162, 206-216; see also Neubauer, "Notice sur la Lexicographie Hébraïque," pp. 25-155). After David b. Abraham, Abu al-Faraj Harun only is to be mentioned: he is none other than the anonymous grammarian of Jerusalem mentioned by Ibn Ezra in the introduction to the "M'oznayim." The seventh part of his "Al-Mushtamil," completed in 1026, is a kind of root-lexicon, in which the triconsonantal roots are so treated that all the roots formed by combinations of the same three letters are arranged in one group; for example, all roots containing the letters ע, פ, and ר—namely, עפר, רעף, פרע, פער—are treated under ערף (see "Rev. Etudes Juives," xxx. 247 *et seq.*, xxxiii. 20 *et seq.*). A similar arrangement was also adopted about the same time by the leading rabbinical authority of the East, the gaon Hai, in his lexicon "Kitab al-Hawi" (Hebr. "Sefer ha-Me'assef," or "Sefer ha-Kolel"), of which only quotations and fragments are extant (see "Z. D. M. G." lv. 129 *et seq.*, 597 *et seq.*).

Long before Hai Gaon's time (d. 1038) a lexicon had inaugurated in the West a period of literary activity that made Spain the real home of Hebrew philology. About 960 Menahem ben Saruḳ wrote his "Maḥberet" (name derived from Ex. xxvi. 4), the first complete lexical treatment in the Hebrew language of the words in the Bible. In the arrangement of his lexicon Menahem rigidly adheres to the theory of roots current at that time. He includes roots of one and two letters, and adds a lengthy grammatical introduction together with longer and shorter excursions. On account of its Hebrew form this lexicon (ed. Filipowski, London, 1854) was for a long time the generally accepted lexical aid to Bible study in

European countries where Arabic did not prevail; while in Spain itself it at first gave rise to lively polemics in the works of Dunash b. Labraṭ and of Menahem's and Dunasch's pupils. It was soon superseded, however, in the new era of Hebrew philology inaugurated by Menahem's pupil Judah b. David Hayyuj.

Hayyuj (end of the tenth century) set forth his theory of roots and his fundamental view of verbal inflection in two works, in which the weak radicals and the radicals in which the second letter is doubled are grouped together in lexicographical order. The same arrangement obtains in the first work of Hayyuj's eminent successor, the "Kitab al-Mustalḥak" (Hebr. "Sefer ha-Hassagah"), a critical supplement to Hayyuj's works by Abu al-Walid Merwan ibn Janah. The chief work of Abu al-Walid (called R. Jonah in Hebrew; lived in the first half of the eleventh century) is divided into a grammar and a lexicon. The latter, entitled "Kitab al-Uṣul" ("Sefer ha-Shorashim"), is the high-water mark of the

Abu al-Walid ibn Janah. lexical activity of the Middle Ages, and is remarkable for the value of its contents as well as for the methodical arrangement of the material. Especially noteworthy are the comparative definitions of the words and the large number of Bible-exegetical details. This lexicon influenced directly or indirectly the entire later Hebrew lexicography: the Arabic original was edited by Neubauer (Oxford, 1875); and Bacher edited the Hebrew translation of Judah ibn Tibbon (Berlin, 1896).

Mention should be made here of the following works pertaining to the subject, and written in Arabic by Spanish Jews of the eleventh and twelfth centuries: Judah ibn Balaam's small treatises on the homonyms and particles; Abu Ibrahim ibn Barun's monograph "Kitab al-Muwazanah," on the relation of Hebrew to Arabic (edited, as far as extant, by Kokowzoff, St. Petersburg, 1894); "Kitab al-Kamil" (in Hebrew "Sefer ha-Shalem"), including a grammar and lexicon, by Jacob b. Eleazar of Toledo, known only through extracts.

Outside the domain of Arabic culture the first great lexicon to traditional literature (Talmud, Midrash, and Targum) was contributed by Italy, the old seat of Talmudic scholarship. This work is the "Aruk" of Nathan b. Jehiel of Rome, which was finished about 1100, and has remained up to the present time the most important lexical aid to Talmudic study. Nathan arranged the roots according to the early system followed by Menahem, and paid particular attention to rare expressions and borrowed words, following largely the Talmud exegesis handed down by the Geonim (first ed.

The in Italy before 1480; latest ed. by "Aruk." Kohut, 1878-92, 8 vols.). With the exception of Gaon Zemah's "Aruk," referred to above, the only work of this kind mentioned as preceding Nathan's is the "Alphabeton," a kind of glossary by Makir, the brother of Rabbeni Gershom (first half of the eleventh century; see Rapoport's biography of Nathan, note 12). Samuel b. Jacob Jam'a of North Africa made important additions to Nathan's "Aruk" in the twelfth century ("Grätz Jubelschrift," Hebrew part, pp. 1-47).

The glossaries by the geonim Sherira and Hai accompanying the texts of certain Talmudic treatises do not come within the scope of this article (see Bacher, "Leben und Werke des Abulwalid," pp. 84 *et seq.*).

Half a century after Nathan b. Jehiel, Menahem b. Solomon, also of Rome, wrote a lexicon with the evident intention of upholding Ibn Saruk's reputation in the face of the system founded by the Spanish school, and at that time (1143) propagated in Italy by Abraham ibn Ezra. Menahem b. Solomon's lexicon is the chief part of his manual of Bible study, "Eben Boḥan" (Touchstone; see Bacher in "Grätz Jubelschrift," pp. 104-115). While this lexicon had little influence, that of

Menahem Solomon ibn Parḥon, "Mahberet he-ben 'Aruk" (ed. S. G. Stern, Presburg, 1844), written somewhat later (1160)

at Salerno, achieved a wide reputation. This work was in the main an enlarged extract from Abu al-Walid's lexicon, of which it has erroneously been regarded as a translation (see Bacher in Stade's "Zeitschrift," x. 120-150, xi. 35-99). Two other lexicons from two countries that otherwise have contributed little or nothing to the literature of Hebrew philology must also be mentioned. The first of these works, both of which drew upon Ibn Parḥon's lexicon, is the "Sefer ha-Shoham" (Onyx Book), written by Moses b. Isaac of London (end of the twelfth century), the beginning of which was edited by Collins, London, 1882. The author has been identified as the well-known punctator Moses ha-Nakdan. The second work is the lexicon of the German Shimshon, who often defines the words also in German (see Geiger's "Wiss. Zeit. Jüd. Theol." v. 419-430).

Southern France began to take the lead in Jewish literature in the second half of the twelfth century. About 1150 Joseph Kimḥi of Narbonne wrote the "Sefer ha-Galui" (Book of the Revelation; edited by Mathews, Berlin, 1887), containing chiefly lexical matter and a criticism of Menahem's lexicon. His son, David Kimḥi (1160-1235), wrote the "Miklol," which contained a grammar and a lexicon supplementary to Abu al-Walid's chief work, but revealed, especially in its method, a remarkable independence. The lexicon, "Sefer ha-Shorashim" (printed

before the grammar, in Italy prior to 1480; also Naples, 1490, 1491; Constantinople, 1513; Venice, 1529; new ed., Berlin, 1847), is much superior to

Abu al-Walid's lexicon, and was for centuries the standard work of Hebrew lexicography. In the latter half of the thirteenth century Abraham Bedersi of Bezières wrote the first book of Hebrew synonymy, "Hotem Toknit" (see Ezek. xxviii. 12), a large and valuable work, arranged in alphabetical order (edited by G. E. Polak, Amsterdam, 1865). In the first third of the fourteenth century the many-sided Joseph ibn Kaspi also wrote a lexicon, "Shor-shot Kesef" (see Ex. xxviii. 22), in which he endeavored to deduce the secondary meanings from the general primary meaning of the root (see "Orient. Lit." viii., ix.; Neubauer, "Notice sur la Lexicogr. Hébraïque," pp. 208-211). "Menorat ha-Ma'or," the work of a Greek Jew, Joseph b. David ha-Yewani,

of which only a fragment is extant in a single manuscript, dates from about the same time (see Neubauer, *l.c.* p. 207). The first Hebrew concordance, also a kind of lexicon (see CONCORDANCE), was produced in the first half of the fifteenth century by a Jew of southern France.

In Italy, where the scientific spirit among the Jews was especially active in the fifteenth century, Solomon b. Abraham of Urbino wrote (1480) a book of synonyms entitled "Ohel Mo'ed," Venice, 1548 (edited by Willheimer, Vienna, 1881), entirely

In Italy, different in character from Abraham **Spain, and** Bedersi's work. In Spain, just before **the East.** the expulsion of 1492, a Hebrew lexicon was written in Arabic by the learned rabbi of Granada, Saadia b. Maimun ibn Danan ("Rev. Et. Juives," xli. 268).

In the East the study of Maimonides' epoch-making work in the second half of the thirteenth century resulted in Tanḥum b. Joseph Yerushalmi's lexicon, "Al-Murshid al-Kafi" (The Sufficient Guide), written in Arabic. This work deals especially with Maimonides' "Mishneh Torah," but includes also some of the words of the Mishnah. A lexicon by Solomon b. Samuel of Gurganj (Urgenj, central Asia), completed in 1339, is a remarkable example of intellectual activity and wide literary knowledge from a region which is not otherwise mentioned in the history of Jewish literature. It presents in uniform alphabetical arrangement the vocabulary of the Bible, the Targum, the Talmudic-Midrashic literature, and some later works, in about 18,000 articles, most of which are very short. The author called his work "Sefer ha-Melizah," and sometimes "Agron" (see Bacher, "Ein Hebräisch-Persisches Wörterbuch aus dem 14. Jahrhundert," Strasburg, 1900). A century later Moses Shirwani of northern Persia completed (1459) a Hebrew-Persian lexicon which he called "Agron" (see Bacher in Stade's "Zeitschrift," xvi. 201-247). This is a popular aid to Bible study, as is also the "Maḳre Dardeke," a Hebrew-Arabic-Romanic (Italian, French, Provençal) glossary to the Bible which was produced about the same time in western Europe (printed at Naples about 1488).

At the beginning of the sixteenth century a great and decisive change occurred in the history of Hebrew philology. From that time this science, hitherto cultivated exclusively by the Jews, took rank in the large circle of scientific activities inaugurated by the new humanism; and it soon became a mighty factor in the religious movement that revolutionized Germany. Protestantism, going back directly to the Bible, took up the study of the Hebrew language, which henceforth became an integral part of Protestant theology. But in Judaism itself the period beginning with this century was one of intellectual stagnation. The old classical literature of the preceding periods was more and more

Elijah Levita. forgotten, and the one-sided study of the Talmud gradually displaced the study of the Bible and its language,

rendering the literary productions in this field utterly unimportant. The beginning of this epoch of decadence was marked, however, by Elijah Levita's activity, with which the creative period of Hebrew

philological literature within Judaism was worthily closed. His works include: "Sefer Zikronot," a Masoretic lexicon or, rather, a Masoretic concordance to the Bible, still in manuscript; "Tishbi," a small lexicon of 712 articles (published in 1541 *et seq.*), containing mostly New-Hebrew words; and "Meturgeman," the first lexicon to the Targumim (1541). Abraham de Balme did not finish the lexicon of roots to which he refers several times in his grammar.

The paucity of production in the field of lexicography during the three centuries of Jewish literature from 1500 to 1800 may be seen in the following chronological lists of works issued during this period, which are short and served chiefly practical purposes. These, as well as the following lists, have been made with the help of Steinschneider's "Bibliographisches Handbuch" (compare the corrections and additions by Steinschneider and Porges in "Centralblatt für Bibliothekswesen," xiii., xv.):

- Anshel, *ספר הכשרה*, Cracow, 1534; reprinted under the title "Sefer Anshel," Cracow, 1584.
 Anshel, *ספר הכשרה*, "Libro de Ladinos de los Verbos Caros di Toda la Mikra," Venice, 1588 and 1617.
 David b. Abraham Modena, *ספר הכשרה*, Hebrew-Italian glossary, Venice, 1596 and 1606.
 Judah Leon di Modena, *ספר הכשרה*, "Novo Dittionario Hebr. e Ital.," Venice, 1612; Padua, 1640.
 Solomon b. David Oliveyra, *ספר הכשרה*, Hebrew-Portuguese lexicon, Amsterdam, 1682; *ספר הכשרה*, Portuguese-Hebrew vocabulary, Amsterdam, 1683.
 Judah b. Zebi Hirsch, *ספר הכשרה* (dealing especially with proper names), Jessnitz, 1719; *ספר הכשרה*, "Compend. Concordanz," Offenbach, 1732.
 Eleazar Soesman, *ספר הכשרה*, part 1, grammar; part 2, Dutch-Hebrew dictionary; part 3, Hebrew-Dutch dictionary, Amsterdam, 1741; "Nomenclator op Hebr. en Nederd. Naamwoordenboek," *ib.* 1744.
 Judah b. Joel Minden, *ספר הכשרה*, Hebrew lexicon, chiefly following Kimhi, with High-German notes, Berlin, 1759-60.
 Abraham b. Menahem Schwab, *ספר הכשרה*, Hebrew-German lexicon to the same author's *ספר הכשרה*, Amsterdam, 1767.
 Phoebeus b. Aryeh, *ספר הכשרה*, Hebrew-German lexicon, Dyhernfurth, 1773.
 Jacob Rodriguez Moreira, *ספר הכשרה*, "Vocabulary of Words in the Hebrew Language . . . Done into English and Spanish," London, 1773.
 Isaac b. Moses Satanow, *ספר הכשרה*, Hebrew-German lexicon, Berlin, 1787; Prague, 1804.
 David Levi, "Lingua Sacra," in three parts, grammar and Hebrew-English and English-Hebrew lexicons, London, 1785-89, 1803.

The following lexicographic works to the Talmud must be added:

- Anonymous, *ספר הכשרה*, Constantinople, 1511; Cracow, 1591; Prague, 1707.
 David b. Isaac de Pomis, *ספר הכשרה*, "Lexicon Hebr. et Chald. Linguae, Lat. et Ital. Expositum," Venice, 1587.
 Menahem Lonsano, *ספר הכשרה*, explanations of difficult and foreign words in the Talmud (in the *ספר הכשרה*), Venice, 1618.
 Benjamin Mussaphia, *ספר הכשרה*, additions to the "Aruk in the Amsterdam ed. of 1655.
 David Cohen b. Isaac de Lara, *ספר הכשרה*, "De Convenientia Vocabulorum Rabbinicorum cum Graecis et Quibusdam Aliis Linguis," Amsterdam, 1638; *ספר הכשרה*, "De Convenientia Vocabulorum Talmudicorum et Rabbinicorum," etc., Hamburg, 1668.
 Benjamin b. David, *ספר הכשרה*, Hebrew-rabbinical lexicon, Zolkiev, 1752.
 Benjamin b. Isaac Levi Leitmeritz, *ספר הכשרה*, an alphabetical glossary to the Zohar, Lublin, 1845.

During the same period (1500-1800) the need of lexical aids felt by Christians studying Hebrew called forth a large number of lexicons, the list of which is as follows:

- Johannes Reuchlin, "Rudimenta Linguae Hebraicae una cum Lexico," Pforzheim, 1506; Basel, 1537.
 Alfonsus Zamorensis (ex-Judeus), "Vocabularium Hebr. et Chald. V. T." (in vol. vi. of Complutensian Polyglot, 1515).
Christian Lexicographers. Theodoricus Martinus (Dirck Martens), "Dictionarium Hebraicum," Louvain, c. 1520.
 Sebastian Münster, "Dictionarium Hebraicum," Basel, 1523, 1525, 1535, 1539, 1548, 1564.
 Sanctus (Xantes) Pagninus, "Thesaurus Linguae Sanctae," Leyden, 1529; ed. Rob. Stephanus, Paris, 1548; Leyden, 1575, 1577; Geneva, 1614.
 Sebastian Münster, "Dictionarium Trilingue" (Latin, Greek, Hebrew), Basel, 1530, 1535, 1543, 1562.
 Ant. Reuchlin, "Lexicon Hebr. Linguae," Basel, 1556, 1569.
 Jo. Förster (Forster, Vorstheimer), "Dictionarium Hebr. Novum," Basel, 1557, 1564.
 Jo. Avenarius (Habermann), "Liber Radicum, seu Lexicon Hebr.," Wittenberg, 1568, 1589.
 Sanctus Pagninus, "Epitome Thesauri Linguae Sanctae," Antwerp, 1570, 1572, 1578, 1588, 1599, 1609, 1616, 1670.
 Ambrosius Calepinus, "Dictionarium Septem Linguarum," Geneva, 1578; Basel, 1584; "Diet. Undecim Linguarum," Basel, 1590, 1598, 1605, 1616.
 El. Hutter, "Cubus Alphabeticus Sanctae Hebraicae Linguae," Hamburg, 1586, 1588, 1603.
 Marcus Marinus, "Arca Noe, sive Thesaurus Linguae Sanctae Novus," Venice, 1593.
 Johann Buxtorf the Elder, "Lexicon Hebr.-Chald.," Basel, 1607, 1615, 1621, 1631, 1645, 1646, 1654, 1655, 1663, 1667, 1676, 1689, 1698, 1710, 1735; "Manuale Hebr.-Chald.," Basel, 1612, 1619, 1630, 1631, 1634, 1658.
 Valentine Schindler, "Lexicon Pentaglotton, Hebr., Chald., Syr., Talmudico-Rabbin., et Arab.," Frankfurt-on-the-Main, 1612, 1649, 1653, 1695.
 Jos. Abudacnus (Barbatus), "Lexicon Hebr.," Louvain, 1615.
 Marius de Calasius, "Dictionarium Hebr.," Rome, 1617.
 Joh. Meelführer, "Manuale Lexici Hebr.," Leipzig, 1617, 1657.
 Chr. Helvicus, "Lexicon Hebr. Didacticum," Giessen, 1620.
 Sixtus ab Amama, Hebrew lexicon (Dutch), Franeker, 1628.
 Daniel Schwenterus, "Manipulus Linguae Sanctae, sive Lex. Hebr. ad Formam Cubi Hutteriani," Nuremberg, 1628, 1638; Leipzig, 1668.
 Philip Aquinas (ex-Jud.), "Dictionarium Abso-lutissimum Hebr., Chald., et Talm.-Rabbin.," Paris, 1629.
 Gregorius Francus (Franke), "Lexicon Sacrum," Hanover, 1634.
 William Alabaster, "Spiraculum Tubarum . . . seu Schindleri Lexicon Pentaglotton in Compend. Redact.," London, 1635.
 Edward Leigh, "Critica Sacra," in two parts: (i.) observations on all the radical or primitive Hebrew words in the O. T. in alphabetical order, London, 1639, 1650, 1662; Latin, Amsterdam, 1678, 1688, 1696, 1706; French, *ib.* 1712.
 Jo. Plantavitus, "Thesaurus Synonymicus Hebr.-Chald.-Rabbin.," Lodève, 1644-45.
 Sebastian Curtius, "Radices Linguae S. Hebr.," Geismar, 1645, 1648, 1649; Amsterdam, 1652.
 William Robertson, "The Second Gate. . . a Compendious Hebr. Lexicon or Dictionary," London, 1654.
 H. Hottinger, "Etymologicum Orientale, s. Lexicon Harmonicum Heptaglotton," Frankfurt, 1661 (also "Talmud.-Rabbin.,").

To this list must be added the following lexicons on the language of the Talmud, written by Christians:

- Sebastian Münster, "Dictionarium Chaldaicum, non tam ad Chald. Interpretes, quam Rabbinorum Intelligenda Commentaria Necessarium," Basel, 1527.
 Johann Buxtorf the Elder, "Lexicon Chaldaicum Talmudicum," ed. Jo. Buxtorf the Younger, Basel, 1639.
 Joh. Henr. Otho, "Lex. Rabbin.-Philologicum," Geneva, 1675.
 Ant. Zanolini, "Lexicon Chaldaico-Rabbinicum," Padua, 1747.
 Bon. Grandeau, S. J., "Dictionarium Hebraicum, Chaldaicum, et Rabbinicum," Paris, 1778.

Among the seventy or more lexicons above enumerated that were called forth by the study of Hebrew among the Christian theologians down to the end of the eighteenth century, the following may be noted for the number of editions through which they have passed: the works of Sebastian Münster, S. Pagninus, Buxtorf, Coccejus, Reineccius, Simonis. Most of the lexicons deal also with the Aramaic portions of the Bible, the designation "Chaldaic" for this language having become current since Sebastian Münster's time, though even Dunash ibn

The Most Popular Dictionaries. Labrat calls the Aramaic לשון כשרי in his polemic against Saadia, No. 6. The comparison of Hebrew with its kindred languages, already indicated by William Postellus in the first half of the sixteenth century, and by Guichard, "L'Harmonie Etymologique des Langues Hébr.," etc., Paris, 1660, was first carried out lexically by Schindler, then by Hottinger, and more completely and on a more solid basis by Castelli. But it remained for Albert Schultens (died 1750), an eminent member of the distinguished Dutch school, to place the comparison of Hebrew with the Arabic on a more solid

scientific foundation, the achievements of the Jewish philologists of the preceding centuries having been forgotten. Schultens himself compiled no dictionary; but his contributions to Hebrew lexicography are found in many treatises and commentaries. Attempts to translate the Hebrew into the vernacular instead of into Latin were first made in Dutch, then in English, Flemish, German, and French.

The rapid development of philology in all its branches during the first decades of the nineteenth century also extended to Hebrew, which gradually occupied a position independent of theology. The labors of Wilhelm Gesenius marked a new epoch in grammar and lexicography. His lexicon, in the enlarged and modified later editions, has

Gesenius. remained down to the present day the lexical manual most in demand for the study of the Bible—a proof of its excellence that was apparent even in the earlier editions. In its first form (Leipsic, 1810, 1812) it bore the title "Hebr.-Deutsches Handwörterbuch über die Schriften des A. T." This book became the basis for the large "Thesaurus Philolog.-Criticus," 1829-42, the last fasciculi of which were completed after Gesenius' death (in 1842) by Rödiger, 1853-1858. An abbreviated edition of the "Handwörterbuch" was issued under the title "Neues Hebr.-Deutsches Handwörterbuch," 1815; and this became the basis for the later editions, which, beginning with the second thoroughly revised edition (1825), bore the title "Hebr. und Chaldäisches Wörterbuch." Gesenius himself issued the third and fourth editions, 1828, 1834. The editors of the later editions were: Dietrich, 1857, 1863, 1868; Mühlau and Volck, 1883, 1886, 1890; F. Buhl, 1895, 1899. Gesenius also issued the third edition in Latin, under the title "Lexicon Manuale," Leipsic, 1832-33. An English translation of the first "Handwörterbuch" of 1810 was issued by Christ. Leo, Cambridge, 1825-28; the new "Handwörterbuch" of 1815 was issued in English by J. W. Gibbs, Andover, 1824; other editions, London, 1827, 1832; the "Lexicon Manuale" was translated into English by Edw. Robinson, Boston, 1836 (last ed., 1854); and by Tregellas, 1859. This is the basis of the Oxford lexicon, appearing since 1892 under the title of "A Hebrew and English Lexicon of the Old Testament," edited by Francis Brown, with the cooperation of S. R. Driver and Charles A. Briggs. The *Λεξικον Εβραιο-Νεοελλην. της Παλαιας Διαθκης*, Malta, 1842, is also based on Gesenius' work, of which a Swedish translation appeared at Upsala in 1829-32.

Other lexicons appeared in the course of the nineteenth century, of which the following is a list, Steinschneider's "Handbuch" furnishing the material down to 1859:

- Th. Imm. Dindorf, "Novum Lex. Linguae Hebr. et Chald." Leipsic, 1801, 1804.
 Samuel Pike, "A Comparative Hebrew Lex." Glasgow, 1802.
 Evr. Scheidius, "Lex. Hebr. et Chald. Man." Utrecht, 1805, 1810.
 Aug. Fried. Pfeiffer, "Man. Bibl. Hebr. et Chald." Erlangen, 1809.
 Chr. Gottlieb Elwert, "Deutsch-Hebr. Wörterbuch," Reutlingen, 1822.
 E. F. C. Rosenmüller, "Vocabularium V. T. Hebr. et Chald." Halle, 1822, 1827.
 James Andrew, "Hebrew Dict. and Grammar," London, 1823.

Jo. Fried. Schroeder, "Deutsch-Hebr. Wörterb." Leipsic, 1823.
Franc. Fontanella, "Vocabulario Ebreo-Ital. et Ital.-Ebreo," Venice, 1824.
L'Abbé Giraud, "Vocabulaire Hébr.-Français," Wilna, 1825.
J. B. Glaire, "Lex. Manuale Hebr. et Chald." Paris, 1830, 1843.
Joh. Ev. Stadler, "Lex. Manuale Hebr.-Latin," Munich, 1831.
Em. Fried. Leopold, "Lex. Hebr. et Chald." Leipsic, 1832.
J. H. L. Biesenthal, "Hebr. und Chald. Schulwörterbuch," Berlin, 1835-37.
W. L. Roy, "A Complete Hebrew and English Dictionary," New York, 1838.
Samuel Lee, "A Lex. Hebr., Chald., and English," London, 1840, 1844.
William Wallace Duncan, "A New Hebrew-English and English-Hebrew Lex." *ib.*, 1841.
Ernst Meier, "Hebr. Wurzelwörterbuch," Mannheim, 1845.
Fr. Nork, "Vollständiges Hebr.-Chald.-Rabbinisches Wörterbuch," Grimma, 1842.
Fred. Bialloblotzky, "Lexicon Radicum Hebr." London, 1843.
William Osborn, "A New Hebrew-English Lexicon," *ib.*, 1845.
B. Davidson, "The Analytical Hebrew and Chaldee Lexicon," *ib.*, 1848.
Fr. J. V. D. Maurer, "Kurzgefasstes Hebr. und Chald. Handwörterbuch," Stuttgart, 1851.
G. Stier, "Hebräisches Vocabularium," Leipsic, 1857, 1859.
Benj. Davies, "Hebrew Lexicon," 2d ed., London, 1876.

A new arrangement of lexical matter is found in Carl Siegfried and B. Stade's "Hebräisches Wörterbuch zum Alten Testament," Leipsic, 1893, in which the comparison of the kindred languages is excluded, the etymology made secondary, and the introduction of so-called primary meanings avoided, while the vocabulary and idioms are given as completely as possible. Friedrich Delitzsch advocates the free use of Assyrian in his work, "Prolegomena eines Neuen Hebr.-Aram. Wörterbuches zum A. T." Leipsic, 1886 (see Nöldeke's exhaustive discussion in "Z. D. M. G." xl. 718-748).

The new stimulus given to the study of the Bible among the European Jews by Moses Mendelssohn and his followers was evident also in the demands for lexical aids to that study. The Hebrew lexicons written by Jews in the last decades of the eighteenth century have already been mentioned. J. Ben-Ze'eb's "Ozar ha-Shorashim" (Treasury of Roots), Vienna, 1807, was very popular down to the second half of the century, and did good work in purifying the language in eastern Europe. The second edition appeared in 1816; the third, edited by Letteris, in 1839-1844; the fourth, in 1862-64. Jewish learning, which was developed to an unexpected degree by the generation of Jewish scholars following Mendelssohn's school, brought to light especially the works of classical scholars dealing with Hebrew philology and Bible exegesis, advancing thereby also modern Hebrew philology. The Hebrew lexicons of the

Jewish Lexicographers of the Nineteenth Century. Julius Fürst was most active as lexicographer, publishing a new edition of the Bible concordance. In 1842 he issued a Hebrew-Chaldee school lexicon; and in 1869 a Hebrew pocket-dictionary to the Old Testament. His "Hebräisch und Chaldäisches Handwörterbuch über das A. T." Leipsic, 1857-61 (2d ed., 1863; 3d ed., by Ryssel, 1876), "marked a great advance, evincing an assiduous and scholarly use of the many products of Old Testament exegesis" (Diestel). The work was translated into English by Davidson, the fifth edition appearing in 1885.

Following is a list of other Hebrew lexicons to the Bible which were written by Jews:

Hananiah Coen, "מנחת חיים," Vocabulario Compendioso Ebraico-Italiano," Reggio, 1811-12.
W. Heinemann, "ראשית חיים," Vocabulary Hebrew and English, London, 1823.
Van Embden, "Prospectus eines Hebr.-Deutschen und Deutsch-Hebr. Wörterbuches," Hamburg, 1823.
Judah Laz. Kron, "דרך כליל," Hebr.-Deutsches Wörterbuch, Wilna, 1826.
D. Luzzatto, "Dizionario Compendiato Ebraico-Chald., Latino et Italiano," part i., Florence, 1827.
Marchand d'Ennery, "Hebr.-Franz. Wörterbuch," 1827.
Jos. Hirschfeld, "שמות הנרדפים," Neues Synonymisches Handwörterbuch zur Beförderung der Hebräischen Sprache, Frankfurt-on-the-Oder, 1818, 1830.
Moses Lemans and Y. J. Mulder, "Hebr.-Nederduitsch Handwoordenboek," Amsterdam, 1829-31.
Abraham Buchner, "אוצר לשון הקודש," grammar and lex., Warsaw, 1830.
M. I. Benlevi, "בזרה שרש העבר," Tabellarisches Hebr.-Deutsches Wörterbuch, Hanover, 1833.
Selig Newmann, "Hebrew and English Lexicon," London, 1834; "English and Hebrew Lexicon," *ib.*, 1832.
Michael Josephs, "בריש כלים," An English and Hebrew Lexicon, *ib.*, 1834.
Simha b. Ephraim, "מי כליל," Hebr. Lx. nach Neuer Methode, part i., Warsaw, 1839.
Joseph Johlsohn, "ערך כלים," Biblisch-Hebr. Wörterbuch, Frankfurt-on-the-Main, 1840.
Isaac Nordheimer, "A Complete Hebrew and Chaldean Concordance to the O. T." part i., New York, 1842.
S. E. Heigmans, "רברי קדש," Hebr. en Nederduitsch Woordenboekje, Amsterdam, 1845.
Abigail Lindo, "A Hebrew-English and English-Hebrew Dictionary," London, 1846.
Emanuel Recanati, "Dizionario Ebr.-Chald. ed. Italiano," Verona, 1854-56.
W. G. Schauffler, "אוצר רברי לשון הקודש," "Dizionario della Lingua Santa" (Ladino), Constantinople, 1855.
A. Luzzatto, "להם לפי דק," Vocabulario Italiano Hebr. Verona, 1856.
E. Bardach, "מקריק המערכה," ed. Letteris, Vienna, 1868.
David Cassel, "Hebr.-Deutsches Wörterbuch," Berlin, 1871, 1885, 1886, 1889, 1896.
M. E. Stern, "אוצר שפת הקודש," Vienna, 1871.
Ch. Pollak, "Héber-Magyar Teljes Szótár," Budapest, 1881.
J. Steinberg, "אוצר המלים," Hebr.-Deutsch-Russisches Wörterbuch, Wilna, 1897.

Jewish learning of the nineteenth century has produced important works in the field of Talmudic lexicography, the most important of which are Jacob Levy's "Neuhebräisches und Chaldäisches Wörterbuch über die Talmudim und Midraschim," with additions by H. L. Fleischer, Leipsic, 1876-89; and his "Chaldäisches Wörterbuch über die Targumim," *ib.*, 1886. M. Jastrow's work, "Dictionary of the Targumim, the Talmud Babli and Yerushalmi, and the Midrashic Literature," London and New York, 1886 *et seq.*, the

concluding portion of which will shortly appear, is also of independent value. Alexander Kohut's edition of the 'Aruk, mentioned above, assumed the shape of an independent lexicon by reason of its size and wealth of material. J. M. Landau's edition of the 'Aruk, Prague, 1819-24, also containing many additions, was used for a long time. The foreign words, more especially of the Talmud, are explained in S. and M. Bondi's "אור אסתר," Dessau, 1812; in J. B. Schönhak's "Ha-Mashbir," Warsaw, 1858; by A. Brüll in "Fremdsprachliche Redensarten in Talm. und Midr.," Leipsic, 1869; and in J. Fürst's "Glossarium Græco-Hebraicum. oder der Griechische Wortschatz der Jüdischen Midraschwerke," Strasburg,

1890. An important supplement to the Talmudic lexicons, including the whole material, is S. Krauss's "Griechische und Lateinische Lehnwörter im Talmud, Midrasch, und Targum," with notes by Immanuel Löw, Berlin, 1898, 1899. Among other works on Talmudic lexicography, the following may be mentioned on account of their lexical form:

Isaiah Berlin, *הפלאה שבפירוש*, glossary to the 'Aruk: i., Breslau, 1830; ii., Vienna, 1859.

M. Lattes, additions to Levy's lexicon, Milan, 1878, 1881; "Miscellanea Postuma," 1884, 1885.

J. H. Dessauer, *לישון רבנן*, short lexicons to the Talmud, Erlangen, 1839.

M. E. Stern, *אוצר המלון*, Vienna, 1863.

G. H. Dalman, *קרוך החרש*, "Aram.-Neuhebr. Wörterbuch zu Targum, Talmud, und Midrasch," Frankfurt-on-the-Main, 1897, 1901, a very useful work.

No special lexical treatment of the Neo-Hebrew of the Midrashim has yet been undertaken, though a beginning is found in Hananiah Coen's *שפת אמת*, Reggio, 1822, and Geiger's glossary to his "Lehr- und Lesebuch der Sprache der Mischna," Breslau, 1845. Mention should also be made of the work of the non-Jewish scholar A. Th. Hartmann, "Thesaurus Linguae Hebr. e Mischna Augendus," Rostock, 1825, 1826. David Löwy's lexicon, *לשון חכמים*, Prague, 1845, 1847, containing Hebrew words and idioms found in the Talmud, is carried only as far as the root נון. W. Bacher's "Die Aelteste Terminologie der Jüdischen Schriftauslegung. Ein Wörterbuch der Bibellexegetischen Kunstsprache der Tannaiten," Leipzig, 1899, is confined to one special field.

There is as yet no lexicon of the later form of Hebrew in post-Talmudic times, when the vocabulary was strongly influenced and enriched by the various sciences treated in the Hebrew language and by the translations from the Arabic. Jac. Goldenthal issued his "Grundzüge und Beiträge zu Einem Sprachvergleichenden Rabbinisch-Philologischen Wörterbuch," in the "Abhandlungen der Kais. Akademie der Wissenschaften," Vienna, 1849. Zunz, who included very instructive lists of words in his works on synagogal poetry, expressed in 1856 a "wish for a lexicon of the Hebrew language" (in "Z. D. M. G." x. 501-512; "Gesammelte Schriften," iii. 14-30); but this wish has not yet been fulfilled. See also Steinschneider, "Fremdsprachliche Elemente im Neuhebräischen," Prague, 1845.

In the last few decades the vocabulary of the Hebrew language, which is used in Russia and Poland as a literary language, and in certain regions of Palestine and the East as vernacular, has been materially increased, in many cases at the sacrifice of the models set by Biblical purity and historic tradition. This is

due to the fact that it is used in journals and scientific works, so that modern objects and ideas must be expressed in the ancient language. The unscientific arbitrariness thus arising would be checked by a dictionary including the different phases of the development of the Hebrew language, in which the Hebrew of the Bible, of the Mishnah, of the medieval scientific and poetic literature, and, finally, the modern revived Hebrew should each be treated, and those words definitely adopted and standing the test of scientific investigation be lexically determined. The publication of two such lexicons has recently been un-

dertaken, partly with scientific ends in view, partly to answer the practical needs of those writing in Hebrew; namely, S. I. Fuenn's "Ha-Ozar," Warsaw (as far as the letter ת), and Ben Judah's "Ha-Millon," Jerusalem (only two fasciculi so far).

G.

W. B.

DIDACHE, or **The Teaching of the Twelve Apostles** (*Διδαχή τῶν Δώδεκα Ἀποστόλων*): A manual of instruction for proselytes, adopted from the Synagogue by early Christianity, and transformed by alteration and amplification into a Church manual. Discovered among a collection of ancient Christian manuscripts in Constantinople by Bryennios in 1873, and published by him in 1883, it aroused great interest among scholars. The book, mentioned by Eusebius ("Hist. Eccl." iii. 25) and Athanasius ("Festal Letters," 39) in the fourth century, had apparently been lost since the ninth century. The most acceptable theory among the many proposed on the character and composition of the "Didache" is that proposed by Charles Taylor in 1886, and accepted in 1895 by A. Harnack (who in 1884 had most vigorously maintained its Christian origin)—that the first part of the "Didache," the teaching concerning the "Two Ways" ("Didache," ch. i.-vi.), was originally a manual of instruction used for the initiation of proselytes in the Synagogue, and was converted later into a Christian manual and ascribed to Jesus and the Apostles. To it were added rules concerning baptism, fasting, and prayer, the benedictions over the wine and the bread and after the communion meal, and regulations regarding the Christian community (ch. vii.-xvi.). The Jewish student is concerned chiefly with the first part, the title and contents of which are discussed here.

The composite character of the "Didache" is shown by the double title or heading. The first words, "Teaching of the Twelve Apostles,"

Title of the Book. need not now be considered. But of the second heading, which refers to

the original book, ch. i.-vi., only the words "Teaching of the Lord to the Gentiles" (*Διδαχή Κυρίου τοῖς ἔθνεσσιν*) are genuinely Jewish; the words "through the Twelve Apostles," which assume that the word "Lord" refers to Jesus, are a Christian interpolation. The book known to Christians as the "Teaching of the Two Ways" corresponded probably with the "Hilkot Gerim" (Rules Regarding Proselytes) referred to in Ruth R. i. 7 and 16 as having been studied by Ruth under the direction of Naomi, the words *דרך* ("way") and *הלך* ("walk") in both verses being taken as indications that the necessary instruction in the "Two Ways" had been duly given to Ruth (compare Baraita Yeb. 47a, and Massek. Gerim, the abrupt beginning of which gives evidence of the existence of other rules concerning the admission of proselytes during the Temple time).

The whole teaching is summarized in the first two verses (ch. i. 1-2): "There are two ways, one of life and one of death, and wide is the dif-

Contents of the "Didache." ference between. The way of life is this: First, thou shalt love God thy Maker [after Deut. vi. 5]; second, thou shalt love thy neighbor as thyself [after Lev. xix. 18]. Now the teaching of these two

words is this: 'Whatsoever thou wouldst not have done unto thee, neither do thou to another.'

Here is a great lacuna, nothing being said about what love of God implies; and what follows is only very loosely connected with the preceding verses. Whether taken from an old Essene document (see Hippolytus, "Refutatio Hæresium," ix. 23 [18]) or from some Christian collection of "Sayings" older than Matt. v. 39-48 and Luke vi. 27-39, verses 3-4 are certainly out of place; they interrupt the order. So do verses 4-5, in which "the commandment of charity" is treated from the Jewish point of view, though they have parallels in Matt. v. 26; Acts xx. 35.

Ch. ii. 1 begins as if the first part of the Decalogue, comprising the law of the love of God, had been treated in the preceding chapter: "And the second commandment of the Teaching [that is, love of our fellow man] is: Thou shalt not kill" (Ex. xx. 13; see verse 2).

2: "Thou shalt not commit adultery" (Ex. xx. 14). (This includes: "Thou shalt not commit sodomy nor fornication.") "Thou shalt not steal" (Ex. xx. 15). . . . "Thou shalt not use witchcraft nor practise sorcery" (Ex. xxii. 18; Lev. xix. 26). (This belongs obviously to the eliminated first part comprising the duties toward God.) "Thou shalt not procure abortion, nor shalt thou kill the new-born child" (compare Wisdom xii. 5). (This is the amplification of Ex. xx. 13, and belongs to verse 1.) "Thou shalt not covet thy neighbor's goods" (Ex. xx. 17; see verse 6).

3-5: "Thou shalt not forswear thyself." . . . (This again belongs to the eliminated first part.) "Thou shalt not bear false witness" (Ex. xx. 16). "Thou shalt not speak evil nor bear malice. Thou shalt not be doubled-minded nor double-tongued, for duplicity of tongue is a snare of death. Thy speech shall not be false nor vain, but filled with deed."

6: "Thou shalt not be covetous nor rapacious [amplification of Ex. xx. 17], nor a hypocrite, nor malignant, nor haughty. Thou shalt not take evil counsel against thy neighbor" (amplification of Ex. xx. 16).

7: "Thou shalt not hate any one; but some thou shalt rebuke [Lev. xix. 17], and for some thou shalt pray [compare Tosef., B. k. ix. 29 with reference to Job xlii. 8; Gen. xx. 17; see Matt. v. 44], and some thou shalt love above thine own soul" (compare "Epistle of Barnabas," xix. 11, and another "Didache" version, Harnack and Gebhard, "Texte u. Untersuchungen," xiii. i. 7 *et seq.*). (This is the interpretation of Lev. xix. 18; compare above, i. 3.)

Ch. iii. 1 dwells on lighter sins, and begins by laying down the following principle: "My child, flee from every evil and from whatsoever is similar to it." This well-known maxim, רָעוּלִים יֵרָא אֶרֶב בּוֹרָה בֶּן הַכִּיעוּר וּמִן הָרוּמָה לִכְעוּר, is ascribed in Tosef., Hul. ii. 24 to R. Eliezer of the second Christian century, and in Ab. R. N. ii. (ed. Schechter, pp. 8, 9) to Job, and is explained: "Avoid light sins in order to escape grosser sins" (compare also Hul. 44b; Derek Erez Zuta, viii.; 1 Thess. v. 22; and Bacher, "Die Agada der Tannaiten," i. 113, 281). In this sense are the commandments of the Decalogue further amplified:

2 warns against anger and contention as leading to murder.

3, against lust, lascivious speeches and looks as leading to fornication and adultery.

4, against divination, astrology, and other heathen practises as leading to idolatry.

5, against lying, avarice, and vanity as leading to theft.

6-9, against an irreverential and presumptuous attitude toward God as leading to blasphemy.

10, enjoining the disciple to accept every seemingly evil happening as good because coming from God.

Ch. iv. 1-13 refers again to the duty toward God, stating that the honor of God includes the study of His Word; the honor of the teacher, the support of the students and practisers of the Law; the honor of the father, the support of the household; and after having positively enjoined hatred of hypocrisy and of whatever is evil (see Ab. R. N. xvi. [ed. Schechter, p. 64]), it declares in a genuinely Jewish spirit that "the commandments of the Lord should all be kept; none to be added, and none to be taken away" (compare Deut. iv. 2, xiii. 1 [xii. 32]).

Ch. v. recapitulates the prohibitory laws under the heading "This is the Way of Death"; the enumeration, however, shows lack of order.

Ch. vi. contains a warning against false teachers, and addressing the proselyte in verse 2, it says: "If thou art able to bear the whole yoke of the Lord, thou wilt be perfect; if not, do what thou canst." This is obviously an allusion to the two classes of proselytes Judaism recognized: the full proselyte,

who accepted all the laws of the Torah, including circumcision, Sabbath, and the dietary laws; and the semi-proselyte, who accepted only the Noachian laws as binding. For the latter verse 3 contains the warning not to eat meat which has been offered to idols, which is forbidden also to the Noachidæ.

As a matter of course, this Jewish manual could not be used in its entirety by the Church from the moment when she deviated from Jewish practises and views. Just as the Shema' Yisrael in the saying of Jesus (Mark xii. 29) was dropped by the other Gospel writers, so was the whole first part of the "Didache," dealing with monotheism, tampered with by the Christian editor. The whole book has fallen into disorder, and much of it is misunderstood and misinterpreted by Christian scholars, who judge it only from the point of view of the Church.

The "Two Ways." The fundamental ideas of the "Didache" are indisputably Jewish. The teaching of the "Two Ways," the

one of life and the other of death, runs as a leading thought throughout Jewish literature. Just as Moses set before the people of Israel "life and good, death and evil" (Deut. xxx. 15-19; Jer. xxi. 8), so is the choice between the two roads to be made ever anew (Ps. i. 6; Prov. ii. 12-20, vi. 23; Ecclus. [Sirach] xv. 17; Slavonic Enoch, xxx. 15; IV Ezra iii. 7, iv. 4; Pirke R. El. xv.; Gen. R. viii., ix., xxi.; Targum to Gen. iii. 22; Enoch, xciv. 2 *et seq.*; Baruch iv. 2; Apoc. Baruch, xlii. 5 *et seq.*, lxxxv. 13; Book of Jubilees, xxii. 17-29; Testaments of the Twelve Patriarchs, Asher, 1; Abot R. N. xv.; Ber. 28b; Sifre, Debarim, 43, 54, based on דֶּרֶךְ ["the way"]; Deut. xi. 28; Gen. R. lxx. to Gen. xxviii. 20 [דֶּרֶךְ = see Targum]; Ex. R. xxx.; Deut. R. iv.; Midrash, Tehillim to Ps. ii. 3, with reference to דֶּרֶךְ; Isa. ii. 3; Ps. xxvi. 5, xxxix. 2, xl. 2, lxviii. 21, cxix. 9, cxlvi. 9; Midrash Prov. i. 15 [דֶּרֶךְ]). This twofold way was especially emphasized in the preaching to the Gentiles, who were to be won over to the right way (Sibyllines, Proœmium 24; iii. 11, 233, 721; viii. 399). And a faint reminiscence of the twofold way appears to be preserved in the later Halakah insisting that the applicant for admission into Judaism be informed of the death-penalties attached to certain transgressions (see Yeb. 47a, b; compare Ruth R. i. 17 with reference to the Biblical words "Where thou diest will I die"). Another leading idea of the "Didache" is the twofold duty: love of God and love of man; both being prefaced by the word וְאֵהַבְתָּ = "And thou shalt love" (Deut. vi. 4; Lev. xix. 18; see Sifre, Debarim, 32; Ab. R. N. xvi. [ed. Schechter, p. 64]; Gen. R. xxiv, end). Upon God as "the Maker of man" rests the claim of the fellow man to love (Job xxxi. 15).

It is noteworthy that the "golden rule" is given in the "Didache" according to the traditional Jewish interpretation—negatively: מִה דַּעְלָךְ סָנִי לְחֵבְרֶךָ (see Targ. to Lev. xix. 18; Tobit iv. 15; Philo in Eusebius, "Præparatio Evangelica," viii. 7; "Apostolic Constitutions," i. 1; see DIDASCALIA; compare Taylor, "Sayings of the Jewish Fathers," 2d ed., p. 142), exactly as Hillel and Akiba taught it when instructing the proselyte regarding the chief commandment of the Law (Shab. 31b; Ab. R. N., B. xxvi. [ed. Schechter, p. 53]). On the other hand, the New Testament (Matt. vii. 12; Luke vi. 31) has

it in a positive form (compare Matt. xxii. 35-40 and Mark xii. 29-31, which discussion is based on the "Didache," not vice versa).

A third characteristic of the teaching is the use of the Decalogue as the exponent of ethics in its twofold aspect: duty to God, and duty to man (compare

Taylor, *l.c.* pp. 216 *et seq.*). Evidently the original "Didache" contained a systematic exposition of the Ten Commandments, whereas the "Didache" in its present shape has preserved only fragments, and these in great disorder. Thus, for instance, iv. 9-11, and possibly iv. 1, 2, dwelling on the relations of the members of the household to one another, refers to the fifth commandment, nor is it likely that the Sabbath commandment was omitted (compare xiv. 1, where the Christian Sabbath is referred to). The Decalogue and the Shema', as fundamental elements of Judaism, were recited every morning in the Temple (Tamid v. 1), and only because the early Judæo-Christians (Minim; see Irenæus, "Adversus Hæreses," iv. 16) claimed divine revelation exclusively for the Ten Commandments, discarding the other Mosaic laws as temporary enactments, was the recital of the DECALOGUE in the daily morning liturgy afterward abolished (Yer. Ber. i. 3c). Philo still regarded the Decalogue as fundamental ("De Decem Oraculis"; compare Pes. R. xxi.-xxiv.; Num. R. xiii. 15). The later Halakah insists that the proselyte should be acquainted instead with the 613 commandments of the Law (Yeb. 47b), whereas the Christian Apostles laid all the greater stress on the second part of the Decalogue (Rom. xiii. 9).

A fourth distinguishing feature of the "Didache" is the accentuation of the lighter sins and lighter duties as leading to graver ones: "Flee from every evil and from whatsoever is similar to it" (iii. 1). This is not a proof of "the superiority of the Gospel ethics over the law" (Schaff, note *ad loc.*), but the very essence of the Pharisaic interpretation of the Law. The same idea is expressed in Ab. R. N. ii. (ed. Schechter, pp. 8, 9, 12; comp. Ab. i. 1): "Make a fence around the Law"; (Schaff, note *ad loc.*), and in the adage "Go around the vineyard, they say to the Nazirite, but dare not to enter it" (Shab. 13a). Upon this principle the whole rabbinical code of ethics is built up, of which the Sermon on the Mount is only the echo (see Ab. R. N. *l.c.*, and Ethics; compare Taylor, "The Teaching of the Twelve Apostles," pp. 24 *et seq.*). The later Halakah also sets down the rule that the proselyte has to be made acquainted with some of the lighter and some of the graver commandments—**מקצת מצות המורח** (Yeb. 47a).

It must accordingly have been simply in imitation of the Jewish example which was offered by the "Didache" that the epistles of Paul, of Peter, and of John were made to close with moral exhortations, all of which point to a common source or archetype. Familiarity with the "Two Ways" of the "Didache" furthermore accounts for the term "way" or "way of God" given to the Christian religion as preached to Gentiles (Acts ix. 2; xviii. 25, 26; xix. 9, 23; xxii. 4; xxiv. 14, 22); and the expression "I am the Way and the Life" (John xiv. 6); also "the way of truth" and "the right way" (II Peter ii. 2, 15). Finally, the

"Didache," after adaptation to Christian use, circulated in different versions. It was attached to the "Epistle of Barnabas" (xviii.-xx.); it was worked into the form of "Sayings of the Twelve Apostles" (*Κάνονες Ἐκκλησιαστικοὶ τῶν Ἀγίων Ἀποστόλων*), and as such propagated in the various churches of the East. An older version is attached to the "Didascalia" as the beginning of the seventh book of the "Apostolic Constitutions." Whether the latter part was also worked out after a Jewish model, or whether the whole Jewish "Didache" did not originally also contain rules concerning baptism, prayer, and thanksgiving similar to those of the Church

Dependence upon Jewish Custom. manual, is difficult to say. Much speaks in favor of this hypothesis: on the one hand, the antagonistic spirit which transferred the Hebrew Ma'amadot fasts from Monday and Thursday, and on the other hand, the expression "Take the first-fruit and give according to the commandment" (xiii. 5, 7). But the dependence upon Jewish custom is especially indicated by the following thanksgiving formulas:

(1) Over the cup: "We give thanks to Thee, our Father, for the holy wine of David Thy servant which Thou hast made known to us through Jesus Thy servant." This strange formula is the Jewish benediction over the wine, "Blessed be Thou who hast created the fruit of the vine" Christianized (compare Ps. lxxx. 15, Targum; exvi. 13 refers to David at the banquet of the future life; Pes. 119b; John xv. 1; compare Taylor, *l.c.* pp. 69, 129). (2) Over the broken bread: "We give thanks to Thee, our Father, for the life and knowledge which Thou hast made known to us through Jesus Thy servant. As this broken bread, scattered upon the mountains and gathered together, became one, so let Thy Church be gathered together from the ends of the earth into Thy Kingdom!" (compare the benediction "Rahem" according to Rab Nahman, which contains a reference to Ps. cxlvii. 2; Ber. 49a). (3) Over the meal: "We thank Thee, O holy Father, for Thy holy name, which Thou hast caused to dwell [*κατεσκήνωσας*, reference to the Shekinah] in our hearts, and for the knowledge and faith and immortality which Thou hast made known to us through Jesus Thy servant. Thou, Almighty Lord, didst make all things for Thy name's sake; Thou gavest food and drink to men for enjoyment that they might give thanks to Thee, but to us Thou didst freely give spiritual food and drink and life eternal through Thy servant. . . . Remember, O Lord, Thy Church to deliver her from all evil and to perfect her in love of Thee, and gather her together from the four winds, sanctified for Thy Kingdom which Thou didst prepare for her. Let grace come and let this world pass away! Hosanna to the Son of David" (ix.-x. 6).

The original Jewish benediction over the meal was a thanksgiving for the food and for the Word of God, the Torah as the spiritual nurture, and a prayer for the restitution of the kingdom of David. The Church transformed the Logos into the incarnated son of God, while expressing the wish for His speedy return to the united congregation (the Church). It is the prayer of the Judæo-Christian community of the first century, and this casts light upon the whole Christianized "Didache." As to the relation of the "Didache" to Phokylides, see PSEUDO-PHOCYLIDES; see also DIDASCALIA.

DIDASCALI. See CATECHUMENS, HOUSE OF.

DIDASCALIA (*Διδασκαλία* = "Instruction"):

A Greek work, in eight books, containing regulations of Church life, better known under the name of "Apostolic Constitutions," the full title being "Constitutions of the Holy Apostles [composed] by Clemens, Bishop and Citizen of Rome—Catholic Didascalia." Claiming to have been written by the Apostles, the work proves on closer examination to be based, like the *DIDACHE*, upon an original Jewish work, transformed by extensive interpolations and slight alterations into a Christian document of great authority. There exists another version, bearing the name "Didascalia," in Syriac, Coptic, Ethiopic, Arabic, and (incomplete) in Latin, which, since the appearance of Lagarde's edition of the Syriac "Didascalia" in 1854, most modern scholars consider to be the original work. On the other hand, Bickell ("Gesch. des Kirchenrechts," 1843, pp. 148-177) has given convincing proofs that the "Apostolic Constitutions" is the original work, and the so-called "Didascalia" a mere condensation. In the latter the Jewish elements are to a large extent eliminated, and the Christian character is more pronounced.

Only the first six books of the "Apostolic Constitutions," which correspond with the "Didascalia"—the latter consists of twenty-six chapters and is not divided into books—form the original work; the last two, which contain, besides a remodeled version of the "Didache," many liturgical pieces

of very ancient character and indisputably of Jewish origin, are later additions, but seem to have belonged in part to the older Jewish original. The work is of very great value to the student of Jewish and Church history, as it contains a large amount of haggadic and halakic material derived from unknown Jewish sources, and casts a flood of light upon Talmudic and New Testament literature. The original writer quotes the Scripture after the Septuagint version, and many apocryphal verses from unknown works; and, as will be shown farther on, he furnished to Paul and to other New Testament writers the source for many of their dicta. His style is fresh and vigorous, bearing striking resemblance to that of the "Didache." The Christian interpolator, on the other hand, is easily recognized by interruptions of the context, by ill-fitting New Testament references, and by occasional outbursts of Jew-hatred in glaring contrast to the Jewish spirit of the main work. The name "God" was frequently changed by copyists into "Christ," as was occasionally noticed by Lagarde; at times "Christ" is used for "Logos" (the Word).

The name "Didascalia" (given in the Preface and found in ii. 39, 55; vi. 14, 18; vii. 36) was borrowed from the Jewish original, the introductory sentence of which, greatly amplified in the "Apostolic Constitutions" and still more in the Syriac "Didascalia," seems to have read as follows:

"The plantation of God and His elect vineyard, those who believe in His unerring worship and hope to partake of His

kingdom, sharing in His power and in the communion of His Holy Spirit . . . barken to His holy 'Instruction.' Take care, ye children of God, to do all things in obedience to God and to be agreeable in all things to the Lord our God. For if any man follow unrighteousness and act contrarily to the will of God, such a one will be regarded by God as a lawless heathen [*ὡς παράνομον ἔθνος* = גוי רשע]."

Book I.: Dealing with the conduct of individuals, this book begins with a warning against the lighter transgressions (*מִצְוֹת קְלִיָּוִת*; see *DIDACHE*), e.g., covetousness (Ex. xx. 17), as coming from the Evil One (Test. Patr., Simeon, 3); the argument, based on the Targumic interpretation of Lev. xix. 18, as in the "Didache" (not the positive "golden rule" of the New Testament), has its exact parallel in Ab. R. N. xv.-xvi. (ed. Schechter, pp. 60, 62, 65). The monition in ch. ii. to bless him who curses is based on Num. xxiv. 9 and Prov. xx. 22; Luke vi. 28 and Matt. v. 44, 45 being obviously later interpolations. The warning against lascivious conduct of men, "which may cause the stumbling of women," is based on Ex. xx. 14, 17 (without reference to Matt. xviii. 7); and rules regarding modesty in the dressing of hair and beard, on Deut. xxii. 5 and Lev. xix. 27 (compare Sifra, Ahare Mot, ix. 13). Ch. iv.-vi. recommend a useful occupation and the study of the Scriptures (Josh. i. 8; Deut. iv. 7; and verses from Wisdom and Proverbs), and warn against heathen and diabolical books. Ch. viii.-x. contain rules of conduct for women, beginning with a sentence of which Paul's dictum, I Cor. xi. 3, is evidently the copy, not the source (the interpolation made here disturbing the sense). The sentence is as follows:

"Let the wife subordinate herself to her husband; for the head of the woman is the man, and of the man who walks in the way of righteousness, God, his Father, who is over all [compare "Didache," iv. 10]; therefore, next to God, O wife, fear and reverence thy husband."

With copious references to Proverbs, woman is warned not to cause men to "stumble" by her enticing attire. She is admonished to go about with covered head in the street; not to paint her face, as "all frivolous adornment of what God Himself made beautiful is an affront to the bounty of the Creator"; to walk with downward look and be veiled; to bathe only in places and at times reserved exclusively for women; and, finally, to conduct herself so as not to cause her husband to stumble. All these teachings may be termed "Hilkot Zeni'ut" (Rules of Modesty), and having many parallels in Massek. Kallah, ed. Coronel, Vienna, 1864, and in Massek. Derek 'Erez, were conspicuous features in the life of the Essenes or Zenu'im (Ber. 62a, b; Shab. 118b, 140b; Ta'an. 21b, 22a; Meg. 12b; B. K. 82a).

Book II.: Dwells on the functions and powers of the head of the congregation, called "episcopus" = "overseer," the Christian "bishop."

Origin of the Institution of Bishops. the *ἐπίσκοπος* (= *ἐπίσκοπος* or *προνοήτης*) of rabbinical literature (Sifre, Bemidbar, 139; compare *προνοίαν ποιούμενος* in "Apost. Const." III. iii.). It begins with the rule: "The shepherd who is

ordained overseer must be without blemish and not under fifty years of age" (compare Philo, "De Profugis," vi.; Hag. 14a; Sanh. 17a). The modification of this rule for small parishes, which follows, betrays the hand of Christian interpolators.

The qualities necessary for an overseer (based on Ex. xviii. 21; compare Mek., Yitro, *ad loc.*; Sifre, Bemidbar, 92; Debarim, 15; Sanh. 17a) are enumerated in ch. ii., and repeated in I Tim. iii. 2-7. One of these is that he should not be a proselyte (*περόπτος* = גר; compare Kid. 76b; A. V. "novice," I Tim. iii. 6, is incorrect). From Lev. xxi. 17 (compare Sanh. 36b) is derived the rule in ch. iii. that the overseer must be examined in order that it may be ascertained whether he is free from blemish; but chief stress is laid upon his being a compassionate friend of the widow and the stranger, eager and capable to administer to the poor, this being his principal task (ch. iv.).

In order to fulfil well his other task, that of instructing the people in the Law, he must (ch. v.-viii.) always be sober-minded (compare Sifra to Lev. x. 8; Sanh. 42a; 'Er. 64b); show no greediness, especially in dealing with Gentiles (the latter words are omitted in I Tim. iii. 3; compare, however, Yer. B. M. ii. 8c); suffer rather than inflict injury (compare Shab. 88b, *הנעלבין ואיני עולבין*); shun heathen festivals and heathen lusts; and as a good shepherd lead his flock by a good example (after Lev. xv. 31, LXX.; Hosea iv. 9, LXX.).

The name "episcopus," taken as "watchman" ("The shepherds should be good watchmen"; compare Jer. vi. 17, LXX., and Ezek. xxxiii. 6), is dwelt upon as enjoining him to expel bad sheep from the flock (ch. ix.-x., with references to Achan and Gehazi, but without mention of Ananias and Sapphira, Acts v. 1-10). Ch. xvi.-xix.: "One scabbed sheep, if not separated, infects the rest with disease"; "A little leaven infects the whole lump" (hence, also, Gal. v. 9); therefore sinners should be separated, like Miriam (Num. xii. 14; compare Sifre *ad loc.*, נזיפה), for longer or shorter periods, and avoid

Episcopal Powers. "the wrath of divine judgment pronounced by the overseer, the watchman of righteousness," who has the power of binding and loosing; who is like Moses and Aaron, being made to bear the sins of all (Num. xviii. 1); and who, as shepherd, is held to account for every single sheep of his flock (Ezek. xxxiv.). The whole disciplinary system in use among the Essenes and the Pharisees as well as among the early Christians (see ANATHEMA; EXCOMMUNICATION) is here (ch. xlii.-xliii. and xlvii.) fully presented, the excommunicated being characteristically called *ἀποσυνάγωγος* = "expelled from the synagogue" (ch. lxiii., p. 71, line 5, ed. Lagarde [compare p. 72, line 8]; book III., ch. viii., *id.*, p. 105, line 6; book IV., ch. viii., *id.*, p. 119, line 23).

The overseer also offers remission of sins to the transgressor who repents, exactly as, when David confessed his sin before God, the Holy Spirit answered (II Sam. xii. 13, LXX.): "The Lord also hath put away thy sin; be of good cheer, thou shalt not die" (ch. xviii. and xxii.). Moreover, "he who does not receive the penitent is a murderer of his brother, like Cain" (ch. xxi.). The sinner's claim upon compassion is especially illustrated by a remarkable portion of a Midrash relating more elaborately than in any other work the story of Manasseh's idolatry and repentance, Manasseh's prayer forming an integral part of the whole haggadic

legend, while the fruitlessness of hypocritical repentance is illustrated by the singular story of Amon (see AMON; MANASSEH). Ch. xxii.-xxiv.: The weak, malapropos Apostolic testimony here added by the Christian redactor only serves to establish the Jewish character of the remainder.

Still more remarkable are ch. xii.-xv., which, dwelling upon the proper treatment of the penitent sinner, refer to Ezek. xxxiii. 11 *et seq.* Ch. xiv. and xviii. contain arguments in favor of mingling with the wicked in order to win them over to righteousness and to obtain God's pardon for them, without even a reference to the life-work of Jesus—a fact which excludes the very possibility of a Christian authorship of the book. On the contrary, remonstrating against those "relentless" fanatics who would let the wicked perish in their sin, the author says (ch. xiv.):

"The lovers of God who commune with the sinners are not guilty of sin, but are imitators of their Father in heaven, who maketh His sun rise on the righteous and on the wicked, and sendeth His rain alike upon the evil and the good. [Compare Agadat Shir ha-Shirim, ed. Schechter, p. 4. This is the source also of Matt. v. 45 and of II Tim. ii. 5.] Victors and vanquished are in the same arena, and only those are crowned who have nobly striven." "Nor is the teacher defiled by coming nigh to the sinners [compare the controversy between the Shammaites and the Hillelites in Ab. R. N. iii. (ed. Schechter, p. 14), and Ber. 22a]. The sinners should be offered comfort and hope [Isa. xl. 1, LXX.]; and Noah, Lot, and Rahab are given as instances that conversation and association with the unrighteous do not condemn the righteous."

Likewise is the picture of the good shepherd, who "strengthens the weak, heals the sick, and seeks that which is lost" (derived from Ezek. xxxiv.), elaborately described in ch. xviii.-xx.; accounting for the New Testament similes (Luke xv. 4 and Matt. x. 6), as well as for the haggadic pictures of Moses and David (Ex. R. ii.; Tan., Shemot, ed. Buber, p. 6; Midr. Teh. to Ps. lxxviii. 71). "Like the gentle shepherd [Isa. xlii.], the overseer should endeavor to save all the members of

The Good Shepherd. his flock, and say to the sinner, 'Do thou but return, and I will accept death for thee.' " This is the original of "the good shepherd" who "giveth his life for the sheep" (John x. 11-13, quoted in the interpolated passage). "Like a father he should love them as his children, and rear them as the hen rears her chickens" (hence Matt. xxiii. 32).

A genuine piece of halakic legislation occurs in ch. xxiv.-xxv. concerning the use of charity-offerings: "The overseer should not use the godly things [הקדש] as if they were profane [חולין = ἀλλότρητα], but with restraint;" he may, as "a man of God" (compare II Kings iv. 42; Ket. 105b; "Didache," xiii. 3-6), use as godly things the tithes, first-fruits, and all the freewill offerings brought in for the poor, the orphan, the widow, the sick, and the stranger, but may not misuse them in selfish greed. Here follows, with references to Num. xxxii. 22 (compare Yer. Shek. iii. 47c), Ezek. xxxiv. 3, Isa. v. 8, and Lev. xix. 18 (34?), the passage which is obviously the source of Paul in I Cor. ix. 7-9. Referring to Deut. xxv. 4, it says:

"In the same manner as the ox that labors on the threshing-floor without a muzzle eats indeed, but does not eat it all up, so do you who labor for the threshing-floor [גורן; compare Hul. 5a]—that is, for the congregation of God—eat of the congregation.

In the same manner as the Levites who served in the Tabernacle partook of the things offered to God [Num. xviii.], should the administrators of charity be supported out of the charity gifts."

In the following passage, beneath "the Church of Jesus the Savior" (יהושע), there is discernible "the congregation of God that escaped the Ten Plagues and received the Ten Commandments, and has yod (=ten) as its first letter, while named after God (יהוה), whose first letter is also yod (=ten)." Here the overseer is recommended to the people's love and reverence as their high priest, as "the father ["abba"; see Kohler in "Jew. Quart. Rev." xiii. 567 *et seq.*] who caused you to be born anew as God's children through baptism and the Holy Spirit" (see ESSENEs), and as "the earthly god," after Ps. lxxxii. 6; Ex. xxii. 27. As without the priest no one could approach the altar, so the means of support for the widows and orphans, which is a type of the altar of burnt offering, may not be offered without the overseer, lest punishment, as in I Sam. xiii. 13, II Chron. xxii. 16, and Num. xvi., follow (ch. xxv.-xxvii.). Ch. xxxii.: "The overseer, who adopts thee as God's child, is thy father, and his right hand, with which he imbues thee with the Holy Spirit, thy mother; so honor them as thy spiritual parents" (Ex. xx. 12; comp. B. M. ii. 11).

Great stress is laid in ch. xlv. *et seq.* upon the avoidance of heathen courts of justice for the adjustment of differences (comp. Tan. Yelamdenu to Deut. xvi. 18; Yalk. to Ps. cxlvii., ערכאות של נכרים). On Sabbath no judicial debates should take place; peace only is to prevail; wherefore the court sessions should be on the second (and the fifth [?]) day of the Sabbaths, so that the controversy

Jewish Courts of Justice. may be settled in the interval, and the contestants may have peace again on the Lord's Day (see Syriac "Didascalia," xi.; Ket. i. 1; Bezah v. 2; compare "Didache," viii. 11 against the Jewish "Ma'amadot"). According to ch. lxvii., the assistants ("diacones") and elders give their votes as "men of God," and the overseer decides; God, whose Shekinah (the text has *Χρίστος*) is present, confirming the judgment (after Ps. lxxxii. 1; compare Midr. Teh. *ad loc.*).

"Even the heathen judge, before passing the final decree of capital punishment, lifts his hand toward the sun and swears that he is innocent of the blood of the culprit; so much the more should your verdict be given only after careful investigation."

"Be, therefore, righteous judges, peacemakers, and free from anger. If it happen that by some evil influence you become angry at anybody, let not the sun go down upon your wrath; for, says David, 'Be angry, and sin not' [Ps. iv. 4, LXX.]; that is, 'Be soon reconciled, lest your wrath, lasting long, become hatred and work sin.' For 'The souls of those that bear a settled hatred are to death,' says Solomon [Prov. xii. 28, LXX.]. It is plain that Eph. iv. 26 is based upon this passage (compare Resch, "Agrapha," p. 210, Leipsic, 1890).

"Wherefore, brethren, it is your duty to pray continually and to remove enmity. God hears not those who are at enmity with their brethren on account of unjust anger" (compare Ber. 19a).

"Before the prayer which follows the reading from the Law and the psalm-singing and the instruction ["didascalia"] out of the Scriptures ["Haftarah"], should the assistant [deacon = *קרי*], while standing near you, say with a loud voice: 'Let no one have a quarrel with another. Let none come in hypocrisy!' For the greeting of peace [Isa. lvii.], offered on entering private houses, is all the more applicable to those that enter the congregation of God, as the name 'bet ha-keneset' ["synagogue"] indicates the gathering of all who belong to the Lord and the augmentation of the number of those 'saved by concord'" (ch. lv.).

Divine service, under the direction of the overseer, "as the commander of a great ship" (compare Clement's Epistle to James xiv.-xv.; B. B. 91b; Ber. 28a; Levy, "Neuhebr. Wörterb." s. v. קברניט), and under the supervision of the deacons (חזנים), begins with the reading of the two lessons from the Torah and the Prophets, while "all stand in silence" (according to Deut. v. 28 [A. V. 31], xxvii. 9). This is followed by expositions by the seven elders, and finally by the overseer ("maftir"); then prayer is offered for the land and its produce, for the high priest and the king, and for the peace of the universe, the faces of all being turned eastward "toward the site of Paradise"; and the overseer then gives the closing benediction (ch. lvii.).

Ch. lviii. states that the overseer should enjoin the people to attend the service regularly, and not by their absence to cause the body of the divine glory, Shekinah (text, "Christ"), to lose a member (compare מבעט השכינה and Yeb. 64a; Ber. 6a, 8a); especially on the Sabbath day, on which "we pray thrice standing, in memory of the exodus from Egypt and the manna, and on which the reading of the Prophets takes place" (ch. lix.; see further regarding the Sabbath prayer). In ch. lx. it is stated that the people should emulate the heathen, who rally in the theaters, as in a synagogue, for "things that do not profit," while deprived of the power of the Word and of the power of the name "Judah," which is interpreted "confession" (יהודה; Ezek. v. 6, 7; xvi. 47; Jer. ii. 10, 11).

According to ch. lxii., the people should pursue their trades as by-work (מפל) and the worship of God as their main work (עקר), avoiding the shows and theaters of the Hellenes and the Hellenic oracles, and adhering to the congregation of the Lord, "the daughter of the Highest" (Ps. xxvi. 4, 5; l. 1, 2; Jer. xv. 17, LXX.; Job xxxi. 5, 6; compare 'Ab. Zarah 18b). They should also avoid the indecent spectacles, the sports, and the feasts of the heathen (Num. xxiii. 23; II Sam. xv. 23, LXX.; Lev. xix. 26; Jer. ix. 2). "There is no fellowship between God and Satan" (hence Cor. vi. 14, 15). Only for the sake of redeeming a captive and saving a soul (פדיון נפש) and other necessary objects may such places be visited (compare Shab. 150a).

"The younger men of the congregation should work for their own support and for that of the needy [Prov. vi. 6, LXX., xii. 11, xix. 24;

Work. Eccl. x. 18]: 'And if any one will not work, neither shall he eat among you,' for the Lord our God hateth the slothful. For no one of those who are dedicated to God [מתנדבים]; Targ. to Judges v. 9; I Macc. ii. 42; see DEBORAH IN RABBINICAL LITERATURE] ought to be idle." Here again Paul (II Thess. iii. 10) copies from the "Didascalia."

Books III. and IV.: These, as well as part of Book V., contain regulations concerning the support of widows, orphans, and other persons in distress; but the order in which they are presented is scarcely the original one. The fundamental idea underlying the book which deals with widows as a special class, or holy order, is that they are "types of the altar of God" (Book III., ch. vi., vii., xiv.; compare Book II.,

ch. xxvi., and ALTAR); they pray for him who gives alms (Book III., ch. xiii., xiv.).

The institution of pious widows spending their time in prayer goes back to pre-Christian times, and can not but be of Essene or Hasidic origin (see Luke ii. 36-38; ANNA and SERAH BAT ASHER); the Therapeutes had their class of aged women who led a holy life, and who were regarded as virgins because they would not marry a second time (Philo, "De Vita Contemplativa," § 8; see especially Conybeare in his edition, pp. 305 and 353; compare Kohler, "Testament of Job," in Kohut Memorial Volume, pp. 287-292). These "virgin

widows," whose type was Judith (see Judith xi. 17, xii. 6-8, xvi. 22), are called "the pious women" (נְשִׁים צַדִּיקוֹת) that "save their generation" (Ex. R. i.; Num. R. xxi.; Targ. Yer. to Ex. xxxviii. 8; Soṭah 12a). These widows had to be sixty years of age (זְקֵנוֹת; compare Abot v. 21) before they were admitted into the order of women (hence I Tim. v. 9; the Syriac "Didascalia" has "sixty" changed into "fifty"). On entering the order they had to take the vow of virginity—that is, that they would not marry again; wherefore they were to be of an age when remarrying was no longer thought of. Exceptionally young widows after a brief marriage were admitted when they had an "especial gift of widowhood," to be blessed like (? Judith and) the widow of Sarepta mentioned in I Kings xvii. 9 (Book III., ch. i.). Widows not belonging to the order might marry a second time, lest they be ensnared by Satan (*ib.* ch. ii.). "The widows who are supported as consecrated to God must be sober, chaste, faithful, and pious; they must have been married only once, have brought up their children well, and have entertained strangers without blemish" (ch. iii.). The widow "should be meek and not hasty of speech, and leave to the rulers doctrinal questions to be answered for the young applicants. Only the unity of God she should defend against polytheistic errors, but in regard to the mysteries of the Shekinah [the text has "Christ"] she must use caution in order not to blaspheme God" (Isa. lii. 5, LXX.). "She should not teach in the assembly, but pray, and listen to those that teach" (hence Paul in I Cor. xiv. 34). "Being the altar of God, she should go to the houses of the faithful to obtain alms, not to the houses of strangers [Syriac "Didascalia": "to become a stumbling-block to men"]. Nor should she indulge in foolish prattle instead of going to the synagogue on the Day of the Lord for rest and watchfulness like the angels ["watchers"]. Nor should she, dissatisfied with her support by the congregation, be solicitous about mammon and make her bag her God, 'worshiping mammon instead of God' [hence Matt. vi. 24; compare Sifre to Deut. vi. 5]; but, like Judith, she should pray unceasingly for the congregation, remaining in her house, singing psalms, reading the Scripture, holding vigils and fasts, communing with God continually in songs and hymns; and let her take wool for work to help others, but not for her own use" (ch. vi.-vii.). "As little as the priests were allowed to accept free-will offerings from a rapacious person or a harlot [Deut. xxiii. 18; Mal. i. 13, 14], is the widow allowed to accept any gift from im-

proper sources, nor indeed from any one who has been excommunicated from the Synagogue; for prayer ought not to be offered by the recipient for such a one, this being an offense against the Holy Spirit [the text has "Christ"]" (ch. viii.). "Any widow who fosters strife acts like Cain, and will be cast out of the kingdom of God and delivered to eternal punishment as doing the work of Satan" (ch. ix.). "It is by appointment of God that the overseer distributes the gifts among the widows, and they have to pray both for him and for the giver" (ch. xiii.-xiv.). In ch. iii.-iv. it is stated to be the overseer's duty, as the steward of God, to provide for the wants of all the needy, the widows and orphans, the friendless and the afflicted, without any partiality, and to mention the name of the giver so that the recipients may be able to pray for him (Isa. lviii. 7; Dan. iv. 27; Ps. xli. 2 [A. V. 1], cxii. 9; Prov. xvi. 6, xix. 17, xxi. 13). Also those who assist the overseer in the administration of the needy (שְׂמוֹשֵׁי אֲוֵרָה; compare Kohler, "Testament of Job," in *l.c.* p. 318; hence "diacones" = "deacons") are required to be spotless like him and still more energetic (זְרִיזִים), ever ready to travel, to carry messages, and to minister to the needy. Women should attend to women in need. They should not be ashamed to attend to those in want, but, if needs be, should lay down their lives for a brother, imitating the Lord of heaven and earth (compare Targ. Yer. Gen. xxxv. 9), acting only for His name's sake. They should visit all who are in need of visitation, and report to the overseer (ch. xix.).

Of Book IV. the earlier chapters treat mainly of orphans:

"When the son or daughter of any brother [the Christianized text has "Christian"] becomes an orphan, some one of the brethren should adopt the same, and, if feasible, marry the girl to his son. They who do so, perform a great work [בְּעֵינֵי נְיוּלָה] and will receive reward from God; and if, because such orphans are poor, he, being rich, is ashamed to do so, the Father of the fatherless and the 'judge of the widows' [Ps. lxxviii. 6 (A. V. 5)] will provide for these, while the fortune of such a one will be spent by prodigal heirs" (Lev. xxvi. 16 or Eccl. vi. 2, according to Midrashic interpretation; Isa. i. 7).

"While the overseers have, like husbands, to provide for the widows [compare Sirach (Ecclesi.) iv. 10, Hebrew text]; to give work to the mechanics; to show compassion to the feeble; to give shelter to the strangers, food to the hungry, drink to the thirsty, clothing to the naked, visitation to the sick [בְּקִיר חַיִּים], rescue to the imprisoned [פְּרִיִן שְׁבוּיָה], they must take especial care of the orphans, give the marriageable maiden in marriage to a brother, and cause the young man to learn a trade [אֲמִנָּה] in order to become self-supporting [see concerning the bringing up of orphans, מְגִדְלֵי יְתוּמִים, Ex. R. xlv.; Sanh. 19b]. Both widows and orphans receiving gifts shall give thanks to the Lord who giveth food to the hungry" (Ps. civ. 14-15; cxlv. 15-16; Eccl. ii. 25, LXX.; Zech. ix. 17).

Peculiarly instructive are the regulations concerning the acceptance of charitable offerings. Being considered as holy sacrifices for the altar of God, the Law (Deut. xviii. 12, xxiii. 19 [A. V. 18]; Prov. xvii. 12) was applied, and no gift was to be received from unjust dealers in merchandise (קְפִילָא; Ecclesi. [Sirach] xxvi. 29; Isa. i. 22, 23), from fornicators or such as abuse their own female servants (נְהוּמִים הִיתֵר בִּשְׁפֹחוֹת, Lev. R. xxv.), from sodomites, idol-makers, blasphemers, thieves, publicans, informers, any subverter of justice, usurer, or from any one acting against the will of God. Acceptance of gifts from any of the foregoing would

evoke divine punishment, as in the case of the prophet (I Kings xiii. 1-5); and the prayer of those who received such gifts would not be

Forbidden heard (Jer. vii. 16, xv. 1). "Neither **Charitable** did Elisha accept gifts from Hazael **Gifts**.

nor Abijah from Jeroboam's wife" (II Kings viii. 10; I Kings xiv. 3). "Ye have received the gifts of the Levites and should not receive from the wicked. It is better to perish from want than to accept from the enemies of God" (Ps. cxiv. 5). "Receive only from such as are found, on examination, to walk in holiness, and not from those who are expelled from the Synagogue." "The Lord is honored only out of righteous labor" (Prov. iii. 9, LXX.). "Only righteous money is to be used for the ransom of captives and imprisoned ones" (Prov. xxiv. 11). "Should, however, the acceptance of money from ungodly persons be enforced upon any, it is to be used only for fuel, like the forbidden holy thing [פְּנוּל] which is to be consumed with fire, being evil not by nature, but only in the minds of those that offer it" (Lev. xix. 7; compare Sifra thereto). Compare with these regulations those regarding "zedakah" practised by the Jewish charity administrators (נְבָאֵי צְדָקָה; Tosef., B. K. xi. 6-9; Sanh. 26b; B. B. 10b; see also CHARITY); the interpretation of the Law, אֲהֲנָן זִנְהָ (Deut. xxiii. 19), with reference to charity, was a matter of controversy between the Christian Jacob the Gnostic, and the Rabbis ('Ab. Zarah 17a).

Of the four chapters which close Book IV., only partly preserved in the Syrian "Didascalia," the eleventh is, with the exception only of the words "and our divine words," certainly Jewish. It enjoins parents to train their children well, have them learn useful trades, familiarize them with holy Scripture, guard them against bad company, and, finally, to join them in wedlock in due time (compare Kid. 29a; Tosef., Kid. i. 11; Yeb. 62b).

Book V.: This book, treating of martyrdom, resurrection, heathenism, and the feast- and fast-days, rests, in spite of the pronounced Christian character which it now has, upon a Jewish substratum, "Christ" having often, and at times very awkwardly, been substituted for "God." The idea presented in ch. i.-iv. is that "he who is condemned by the heathen to the games and the beasts for the name of the Lord God is a holy martyr, the son of the Highest, and a vessel of the Holy Spirit" (compare the expression כְּלִי לְרִבְרוּת in the Midr. ha-Gadol, quoted by I. Lewy in his "Ein Wort Ueber die 'Mehilta des R. Simon,'" p. 38, note), and "whosoever aids or rescues these martyrs by means of his work shares in their glorious martyrdom." "He who denies being God's in order not to be hated by men, loving his own life more than he does the Lord in whose hand his breath is held, is wretched, an enemy of God, who has his portion with the accursed and not with the saints, and inherits the eternal fire prepared for Satan and his angels, instead of the reward of the blessed" (compare Sifre, Debarim, 32; Philo, "Quod Omnis Probus Liber," xiii.; Wisdom iii. 11-19; Bousset, "Die Religion des Judenthums," 1902, p. 168).

The Essene principle is set forth in ch. vi.-vii.:

"Let us then renounce our parents, kinsmen, and friends, wife and children, all possessions and enjoyments of life, if they become an impediment to piety [compare Philo, "De Vita Contemplativa," § 2, and parallels in Conybeare's ed., p. 49]. For while it behooves us to pray that He may not lead us into temptation [Ber. 60b; Matt. vi. 13], yet when we are called upon to give testimony [as martyrs; compare LXX. to Isa. xlii. 10-12], while confessing His precious name with defiance [קִרְיָהּ; Sifra, Emor, 9], let us rejoice, hastening toward immortality. And when persecuted, let us not be perplexed and let us love neither this world nor the praise of men nor the glory and honor of rulers; but let him who has been deemed worthy of martyrdom rejoice in the joy of the Lord as obtaining thereby a great crown, and ending life with a confession [שִׁבְחָהּ יִשְׂרָאֵל; compare Sifre, Deut., 32; Ber. 61b]. For the Almighty God will Himself raise us up, according to His infallible promise, and grant us a resurrection with all those that have slept from the beginning of the world [לִישְׁנֵי עַד in the Eighteen Benedictions], whether we die in the sea, are scattered on earth, or torn to pieces by wild beasts or birds. He will raise us by His own power [compare נִבְרִיחַ in Eighteen Benedictions], for the whole world is held together by the hand of God." Here references are made to Dan. xii. 2-3; Eccl. xii. 14; Ezek. xxvii. 11; Isa. xxvi. 19, lxvi. 24; then to Enoch and Elisha, to the raising of the dead by Elijah and Elisha; to Jonah (ii. 11), to Daniel and his three youths (Dan. ii.-iii.), and finally, to convince heathen readers, to the Sibylline Oracles (iv. 178-190), and to the mythical phoenix.

"In this hope we undergo stripes, persecutions, and deaths. Just as God by His will made heaven and earth [Gen. i. 1; Jer. i. 5; Zech. xii. 1; Job. x. 10; Ps. ciii. 14; cxix. 73; cxxxix. 5, 16], so will He raise all men by His will either to crown them or to punish them [Dan. xii. 3], man being His workmanship made by His word [Gen. i. 26 *et seq.*; text has "Christ"], just as He raises the wheat out of the ground [compare Sanh. 90b] and as He made Aaron's dry rod put forth buds [Num. xvii. 8]."

Martyrs should be held in honor, according to Ps. cxvi. 15; Prov. x. 7; Isa. lvii. 1, lxx. "A faithful martyr ["witness"] is he who strove by his own blood for the cause of faith" (ch. viii.-ix.).

On Sabbath and holy days, which are days of joy (Isa. lviii. 13), all obscene talk and song should be avoided, according to Ps. ii. 11: "Rejoice with trembling." Names of heathen gods are not to be mentioned, nor should one swear by any of the luminaries or elements (ch. x.-xi.).

Book VI.: Ch. i.-iv. warn against heresies and schisms, dwelling at great length on the sedition of Dathan and Abiram against Moses—who "exhibited the Law of God in **On Heresies.** the perfect number of Ten Commandments," and of whom God said: "There arose not a prophet like unto Moses" (Deut. xxxiv. 10; no Christian could without considerable modification have written of Moses all that is stated here)—and on Sheba the son of Bichri (the name is twice misspelled almost beyond recognition); and on Joshua the son of Josedeck, who also was tempted by Satan (Zech. iii. 1). In ch. vi. the Sadducees and Dosithaeans seem to have originally been characterized as heretics among the Jewish people. The present text enumerates all the Jewish sects, and what follows to the end of the book—with the exception of some parts of ch. xxvii.-xxix., which dwell on Levitical impurity in connection with prayer and the Holy Spirit (Ber. iii. 5; compare Kayser, "Die Canones Jacob's von Edessa," 1886, pp. 12, 81)—is altogether of Christian origin and anti-Jewish in character.

Books VII. and VIII.: These contain, besides third-century Church canons and the like, diverse subject-matter—probably thrown out by the late Christian redactor of the "Didascalia" on account of its Judæo-Christian character. The first thirty-two chapters of Book VII. contain a version of the "Di-

dache," which, while betraying, like the rest of the "Didascalia," the hand of a Christian redactor, rests nevertheless upon a more complete Jewish original than the one discovered by Bryennios. Its whole tenor is characteristically Jewish in so far as it has each single precept or sentence based upon some Scriptural verse; and its mode of teaching, like any haggadic or halakic work, is argumentative. It begins the "Two Ways" with an apt reference to Deut. xxx. 15 and I Kings xviii. 21; the reference to Matt. vi. 24 is manifestly an interpolation. In ch. ii. the verse "Love the Lord thy God" (Deut. vi. 5) is given (compare Iselin's [Coptic] "Apostellehre," p. 6, Leipsic, 1895). The rule, "Love

The
"Didache"
those that hate you, and ye shall have
in an Older
Form.
no enemy," in itself decidedly Jewish in tone (see Bousset, *l.c.* p. 393), is derived from Deut. xxiii. 7: "Thou shalt

not hate any man, Egyptian or Edomite, as they all are the works of God" (כִּי אֱהִיָּהּ הוּא; compare "Apost. Const." II. xxxvi., V. vii.). Likewise is the precept "If any one give thee a stroke on the right cheek, turn to him the other also" based upon the argument "Not that revenge is evil, but that patience is more honorable"; and Ps. vii. 5 (A. V. 4) is referred to. This proves that Matt. v. 39 is not the source. Old Testament quotations and specific references to the Law are frequent throughout ch. vi.

The principle "Flee from all evil and whatever is similar to it" (הֲרַחֵק מִן הַבִּיעוּר וּמִן הַדּוּמָה לוֹ) is derived from Isa. liv. 14: רַחֵק מֵעֵשֶׂק ("Abstain from injustice"), and the warning against anger and envy is illustrated by the fate of Cain, Saul, and Joab (ch. v.). The lesson of submission to God's decree is aptly illustrated by the example of Job—and very inaptly by the interpolator's reference to Lazarus (ch. viii.). In ch. ix. honor for the teacher is required, because "where there is teaching concerning God, there God is present" (Abot iii. 3; compare Matt. xviii. 20). The sedition of Korah is to warn man against making schisms; and the examples of Elijah Micaiah, Ebed-melech the Ethiopian, and Nathan, against taking presents from sinners that are to be reproved (ch. x.). Ch. xvii. contains as the last rule: "Thou shalt not proceed to thy house of prayer on a day of thy misfortune before thou hast laid aside thy bitterness"—a decidedly Jewish precept (Ber. 31a).

A striking parallel to the Mishnaic statement, "The ancient Hasidim used to spend a full hour in silent meditation before prayer in order to turn their hearts in true devotion to their Father in heaven" (Ber. v. 1), is preserved in ch. xxiv.: "Pray thrice a day, preparing yourselves beforehand that ye may be worthy of being received as children by the Father, lest, when you call Him 'Father' unworthily, you be reproached by Him, like Israel, 'If I be a Father, where is My glory? And if I be a Lord, where is My fear?'" (Mal. i. 6).

Irrefutable proof of the Jewish provenience of the "Didache" and, as will be seen, of the whole "Didascalia," is given in the words "O God of our holy and perfect fathers Abraham, Isaac, and Jacob, Thy faithful servants," preserved in the thanksgiving prayer after a meal (ch. xxvi.), which also contains a thanksgiving "for the Law which Thou hast planted in our souls" (compare שלמדתנו ועל תורתך שלמדתנו). The same characteristic is the grace after meals. The same characteristic

IV.—38

words, "The God of our holy and perfect forefathers, the God of Abraham, Isaac, and Jacob" (אֱלֹהֵי אֲבוֹתֵינוּ) (הַקְרוּשִׁים וְהַתְּמִימִים אֱלֹהֵי אַבְרָהָם אִשָּׂאק וְיַעֲקֹב), occur also in the prayer which follows in ch. xxxiii. This prayer is an older version of the first of the Eighteen (or Seven) Benedictions, called by the Rabbis אַבּוֹת, and, with a few omissions, it reads as follows:

"Our eternal Savior, King of the godly beings, who alone art the Almighty and Lord, God of all things, God of our holy and perfect forefathers, God of Abraham, Isaac, and Jacob, merciful and compassionate, long-suffering and abundant in mercy, to whom every heart is naked and every secret thought revealed, to Thee the souls of the righteous cry aloud; upon Thee do the hopes of the holy ones rest in confidence, Thou Father of the perfect, who hearest the prayer of those that call upon Thee in uprightness and knowest the supplication unuttered. . . . Thou hast made this world a place of combat for righteousness and hast opened to all the gate of mercy [מִפְתִּיחַ שַׁעַר רַחֲמִים], having shown to each man by the knowledge implanted [יָרַעַה], by natural judgment [בִּינָה], and by the admonition of the Law [חֻמֶּה], that riches, beauty, and strength vanish and only the guileless conscience of faith [אֱמוּנָה] abides throughout the heavens, and walking with truth receives the right hand of victory, exulting in hope before even the world is regenerated. For Thou didst guide our forefather Abraham when he found the way of truth, and didst teach him in a vision what this world is, faith preceding his knowledge [פְּסָחוֹס]; and the covenant was the consequence of his faith [Gen. xv. 6, xxii. 17]. And when Thou gavest him Isaac as son, Thou saidst, 'I will be a God to thee' [Gen. xxvi. 3], and when our father Jacob was sent to Mesopotamia Thou showedst him the Word [text: "Christ"], and through him spakest, 'Behold I am with thee' [Gen. xxviii. 15]. And so spakest Thou to Moses, Thy faithful and holy servant, at the vision of the bush: 'I am He that is' [Ex. iii. 14, 15]. O Thou shield of the posterity of Abraham, be blessed forever" (= בְּאֵי כֹחַ אַבְרָהָם; compare Midr. Teh to Ps. i., ed. Buber, p. 5).

The prayer which follows in ch. xxxiv. is the second of the Seven Benedictions; it has not been preserved intact. It begins as follows:

"Blessed art Thou, O Lord, King of the worlds, who by the word [בְּמַאֲמָר] text has "Christ" hast made the universe and by the same hast brought order into chaos." Here follows an enumeration of the whole work of Creation (בְּרֵאשִׁית), after Gen. i., closing with the formation by the divine Wisdom of man as "the citizen of the world," "the cosmos ["ornament"] of the cosmos" (κόσμος καὶ κόσμος); his body being formed of the four bodily elements, his soul endowed with five senses as a new creation out of nothing, and his mind being the charioteer of the soul. The closing sentence reads: "When man was disobedient Thou didst not destroy him forever, but laidst him to sleep for a time, and by an oath didst promise him resurrection and didst loose the bond of death. Blessed be Thou, O Reviver of the Dead" (בְּחַיַּת הַמֵּתִים; "through Jesus Christ our hope" is the Christian addition).

The prayer in ch. xxxv. begins, "Great art Thou, O Lord Almighty, and great is Thy power," exactly as the second of the Seven Benedictions in the Jewish ritual (אַתָּה גָּבוֹר לְעוֹלָם יי), and enumerates the wondrous works of God's power—נִבְרֹת (Ta'an. i. 1; Ber. v. 2)—also characteristic of the same benediction. So this part evidently belongs to the preceding prayer. But it also contains, in an elaborate form, those portions which constitute the third benediction (קְדוּשָׁה). It describes the sanctification of God by the hosts of celestial beings—the holy seraphim and the six-winged cherubim, the angels and archangels; the thrones ("ofannim"), dominions, principalities, authorities, and powers—citing Isa. vi. 3; Dan. viii. 13; Ezek. iii. 12 (see FALASHAS); and then speaks of Israel as "Thy congregation selected from the nations on

earth, emulating the heavenly powers night and day, and singing with a full heart and soul" (Ps. lxxviii. 18 [A. V. 17]). After quotations from Deut. iv. 39; I Sam. ii. 2-4; and Deut. xxxiv. 2, the benediction closes thus:

"Thou art glorious and highly exalted, invisible and unsearchable; Thy life without want; Thy operation without toil; Thy work without assistance; Thy dominion unchangeable; Thy monarchy without succession; Thy kingdom without end; Thy strength irresistible; Thine army very numerous. Thou art the Father of Wisdom, the Creator of Creation, the Bestower of Providence, the Giver of Laws, the Supplier of Wants, the Punisher of the Ungodly, and the Rewarder of the Righteous, the God and Father [here "Christ" is interpolated] and Lord of those that worship Him whose promise is infallible, . . . whose thanksgiving is everlasting, to whom adoration is due from every rational and holy creature." Here the blessing formula, *הואוּל הַקָּדוֹשׁ*, is omitted.

Ch. xxxvi. contains the following portions of the original Jewish prayers for Sabbath and festivals:

"O Lord Almighty, Thou hast created the world by Thy Word [text: "Christ"], and hast appointed the Sabbath as a memorial thereof, because on that day Thou hast made us rest from our works that we may meditate upon Thy laws.

"Thou hast appointed festivals for the rejoicing of our souls, that we may remember the Wisdom created by Thee. . . .

Wherefore we assemble on the Day of the Lord and rejoice with Thy Word which has lit up Sabbath and life and immortality. For through it Thou hast made Israel, the God-beloved, Thy peculiar people. For Thou, O Lord, didst bring our fathers out of the land of Egypt and didst deliver them out of the iron furnace, from brick-making, and didst redeem them out of the hands of Pharaoh and those under him, and didst lead them through the sea as through dry land, and feed them in the wilderness with all kinds of good things.

"Thou didst give them the Law, the Ten Words pronounced by Thy voice and written with Thy hand. Thou didst enjoin them to observe the Sabbath not for the sake of affording them an occasion of idleness, but as an opportunity of piety that they might learn to know Thy power; having, in order to prevent them from evil things, kept them as within a holy circuit [*הַקָּדוֹשׁ*] for the sake of instruction that they might rejoice in the number seven (for there are the seventh day and the seven weeks and the seven months and the seventh year and the jubilee year for remission) [a marginal note probably: compare Philo, "De Septennario," §§ 7-8], so that men might have no cause for pretending ignorance. Wherefore, He permitted men to rest every Sabbath so that no one should send forth one word in anger on the Sabbath day; for the Sabbath is the cessation of the creation, the completion of the world, [given for] the study of the Law, and the thanksgiving hymn to God for the blessings bestowed upon men. As the Mediator, Provider, and Lawgiver of all this, does the Lord's Day hold forth the word of God as the first-born of the entire creation, so that the Lord's Day commands us to offer unto Thee, O Lord, thanksgiving for all."

Obviously the fourth benediction, *מקדש השבת*, has here assumed an Essene, or Gnostic, character, without, however, obscuring the features of the typical synagogue formula.

Ch. xxxvii., xxxviii., and Book VIII., ch. xxxvii., have preserved portions of the last three benedictions recited both in the synagogue and in the Temple, the *עבודה*, and *הודאה*, and *ברכת כהנים*.

The first commences: "Thou who hast fulfilled Thy promise made by the prophets, and hast had mercy on Jerusalem by exalting the throne of David Thy servant, do Thou now, O Lord God, accept the prayers of Thy people who call upon Thee in truth as Thou didst accept of the gifts of the righteous in their generations. [Here follows an enumeration of all the righteous men from Abel to Mattathias and his sons.] So receive Thou the prayers of Thy people, offered to Thee with knowledge [the phrase "through Christ" is a Christian addition; there is no mention of Christ in the prayer itself] in the Spirit."

The Modim prayer begins exactly like the Jewish benediction: "We give thanks to Thee for all things, O Lord Almighty, that Thou hast not taken away Thy mercies and loving-kind-

nesses from us, but generation after generation dost Thou save, deliver, assist, and protect. Thou didst assist in the days of Enos and Enoch, of Moses and Joshua, of Samuel

The Last Three Temple Benedictions. and Elijah, of David and the Kings, of Esther and Judith, and of Judas Maccabeus and his brethren ["Christ" very inappropriately interpolated here]. For He has delivered us from

the sword and from famine, from sickness and from an evil tongue. . . . For all these things do we give Thee thanks [compare *לְכָל כִּי*]. Here follows a special thanksgiving for the wonderful creation of man, for the immortal soul, and for the laws given to him, and for the promise of resurrection. The closing sentences are as follows: "What life is sufficient—what length of ages will be long enough for men to be thankful! For Thou hast delivered us from the impiety of polytheism. [Then follows a Christian addition quite characteristic, "and from the heresy of the murderers of Christ!"]. Thou hast delivered us from error and ignorance. Thou hast set angels over us, and hast put Satan to shame. Thou hast created us and provided for us. Thou measurest out life to us, and afforest us nourishment, and hast provided repentance. Glory and worship to Thee for all these things for ever and aye."

Of the closing benediction only the following portion has been preserved as the bishop's benediction:

"O God of our fathers, Lord of mercy, who didst form man by Thy Wisdom, . . . look down. O Lord Almighty, and cause Thy face to shine upon Thy people and bless them by Thy Word [text: "Christ"], through which Thou hast enlightened us with the light of Thy knowledge, and hast revealed Thyself unto us. Adoration is due to Thee from every rational and holy creature forever."

As all these prayers go back to pre-Christian times, they are of incalculable importance to the student of Jewish and Christian liturgy. Here is also the origin of such names as "the Lord's Day" for Sabbath (Sunday).

There are a number of other benediction formulas given in Books VII. and VIII. which betray an adaptation from Jewish prayers and anthems. Especially is the "Trisagion," or "Thrice Holy," in Book VIII., ch. xii.—which has, in more or less modified form, been universally adopted in the various churches—based on a somewhat older form of the Jewish sanctification than the one in ch. xxxv. of Book VII., mentioned above; while the prayers for penitents and for the various classes of people (Book VIII., ch. ix. and x.) have striking parallels in the older portion of the Jewish litanies (see *SELIHOT*). See also *ESSENES*; *GNOSTICISM*; *LITURGY*; *SABBATH*.

K.

DIDEROT, DENIS: French philosopher and encyclopedist; born at Langres Oct. 5, 1713; died at Paris July 30, 1784. Although, like all the French encyclopedists, an apostle of tolerance, Diderot does not seem to have had much sympathy with the Jews and Judaism. He wrote the bright and interesting article on Jewish philosophy for the "Encyclopédie," but it shows a superficial acquaintance with the subject, and is not free from errors. The same criticism applies to a brilliant passage on the Jews of Amsterdam in his "Voyage en Hollande" (xvii. 431-433, ed. Assezat and Tournoux, Paris, 1875-79). In his "Neveu de Rameau" (v. 454, 479) there are two anecdotes, the heroes of which are Jews. The first refers to a renegade who abuses the confidence of a rich Jew of Avignon in order to rob him and denounce him to the Inquisition. The second, which is somewhat licentious, narrates the story of an

Orthodox Jew of Utrecht who signs a note in an infamous bargain. The first anecdote is improbable, for the Inquisition never forbade the Jews of the Comtat to follow their religion. The second anecdote, still more improbable, is also found in the "Voyage en Hollande," where the personages are Dutch citizens, and by substituting different names Diderot simply intended to make a striking antithesis between the piety of the Jew and his amorous escapades. This literary trifle must not be taken seriously; it shows only that Diderot was subject to the common prejudice against the Jews.

DIDRACHMA. See NUMISMATICS and WEIGHTS AND MEASURES.

DIEGO DE VALENCIA: Spanish troubadour of the fifteenth century; born of Jewish parentage at Valencia de Don Juan, in the kingdom of Leon. After his conversion to Christianity he became a Franciscan monk; and receiving the degree of doctor of theology, was known among his contemporaries as a very learned physician, astrologer, and master of sciences ("gran letrado, físico, astrologo, é mecanico"). He was one of the leading Valencian poets, and most of his poems are contained in the "Cancionero de Baena." He did not consider it beneath his dignity to speak openly, in a number of flippant songs, of his intimacy with various classes of courtezans, nor did he hesitate, in his satirical poems on Jews and Maranos, to make use of Hebrew and rabbinic terms, though he thereby derided himself. Diego chose as the special target of his scoffings a certain Juan de España, who was considered an accomplished Talmudist, and who, after accepting baptism in 1413, wrote a short work on his conversion. The following lines may serve as specimens of Diego's satire:

"Johan de España, muy gran saña
Fué aquesta de Adonay,
Pues la aljama se derrama
Por culpa de Barcelay.
Todos fuemos espantados,
Maestros, rabies, cohenim,
Ca les fueron sus pecados
De este sofarahenim
Pues quien non tiene heçim,
Quiso infinita faser,
Hora finque por mansel
Pues tan mal pertrecho tray."

DIENA (DAYYENA), AZRIEL BEN SOLOMON: Rabbi at Sabbionetta; died 1536. He was a disciple of Nathaniel Trabotto, and is mentioned with respect by R. Meïr Katzenellenbogen. Azulai claims to have seen two volumes of his responsa—perhaps those referred to in "Magazin," ii. 16. MS. 911 in the Bodleian collection contains Diena's notes on הלכות טרפה according to the Roman rite (Neubauer, "Cat." col. 196); and MS. 948 contains some of his letters (*ib.* col. 205). MSS. 48, 135, 153, 166 of the Friedland collection in St. Petersburg contain some of Diena's decisions. He seems to have possessed valuable manuscripts: the 1550 ed. of Maimonides' "Yad" having followed his copy (Conforte,

"Kore ha-Dorot," p. 34b). Diena became known by his opposition to the adventurer David Reubeni. Being of a positive and practical disposition, opposed to the current Messianic vagaries, Diena was alive to the danger resulting therefrom, and he decided to act against Reubeni. When the latter, after the execution of Molko, had increased his influence to such an extent that the Italian rabbis began to take his pretensions seriously, Diena called to his aid Abraham b. Moses Cohen, rabbi of Bologna, and both unmasked the impostor.

The veneration in which Diena was held may be seen from the elegies published at his death, one of which was by Abraham of Pisa, and two others by Samuel b. Moses Anav. His son's name was David (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 75).

DIENA (DAYYENA), DAVID: Italian rabbi; he lived at Rovigo at the end of the seventeenth century. He was consulted on Talmudic matters by R. Nathaniel Segre; and his responsa appeared first in the collection "Afar Ya'akov," from which it was copied by Isaac Lampronti into his "Pahad Yizhak." David, in his responsa, mentions Azriel Diena as his grandfather. There is much confusion concerning his father. Ghirondi calls him David b. Azriel Diena, while Mortara speaks of two Davids, one being a grandson and the other a son of Azriel Diena. He was the grandfather of David Hayyim Diena, chief rabbi of Rovigo.

DIENESOHN, JACOB: Yiddish novelist; born in Zagory (Zagaren), Russia, in 1859. He is one of the most popular Yiddish novelists of the latter half of the nineteenth century. He began to write in 1877, when he published a story called "Ha-Ne'ehabim weha-Ne'imim" or "Der Schwartzter Junger Mantshik" (The Dark Young Man). Since then Dienesohn has written many novels, almost all of which have been widely read. Among the best known of his works is his "Eben Negef" (Stumbling-Stone). In his books Dienesohn pictures the struggle among the Jews of the older and the younger generation—between the "haskalah" and hasidism. He knew well the public for which he was writing, and avoided all violent expressions in denouncing fanaticism, describing merely the sufferings of the Maskilin. His later novels treat of the same themes, but are rather sketches from Jewish life than romantic stories. Dienesohn is also the author of the "Welt-Geschichte," in Yiddish. He has in addition contributed many articles to Yiddish periodicals, and is a good Hebrew writer, his contributions to "Ha-Shahar" having won him the favorable criticism even of such writers as Smolenskin.

DIESSENHOFEN: City in the Swiss canton of Thurgau, connected by a bridge with the village of Gaillingen in Baden. It attracted the Jews in early times by its favorable position. In 1348 the Jews here were accused of having poisoned the wells; their houses were plundered by the mob, and some of the Jews were burned at the stake. Over three hundred sought refuge in the fortress of Kyburg, where they were protected by the Austrian governor; but when he himself was threatened by the cities of Diessenhofen and Winterthur, the fugitives were either expelled and left to the mercy of their persecutors, or, as other authorities state, were burned by the governor on Sept. 18, 1349, to save the "innocent ones" from the fury of the mob (Pupikofer, "Gesch. des Thurgaus," i. 204; manuscript material in Löwenstein, "Gesch. der Juden am Bodensee," p. 81).

Jews settled in Diessenhofen again within half a century; but in 1401 a false accusation again gave rise to butcheries. The outrider of the governor had murdered Konrad, the four-year-old son of Councilor Hermann Lory of Diessenhofen. To save himself the man said that the Jew Michael Vinelmann (Veitelmann), who, with his son Gütleb, had been admitted in 1396 on the condition of paying a yearly tax of eight gulden, had instigated the murder, and had promised three gulden "for the hot blood of the Christian child." The outrider was broken on the wheel; the Jew was burned alive without any examination; and little Konrad was sainted. On this occasion Jews at Schaffhausen, Winterthur, and other places were either burned or forced to accept baptism.

Contrary to all expectation Jews soon returned to Diessenhofen. As early as 1426, when its citizens "were in great debt and obliged to admit Jews and other people in order to better bear the great yearly tax," as one may read in the "ainunge" (town records) of Diessenhofen (Pupikofer, *l.c.* p. 63), a Jew was admitted as citizen, notwithstanding the objection of Junker Molli of Diessenhofen, an evil-minded person who had voted for the burning of Huss at the Council of Constance. The number of Jews in the city increased gradually. In 1453 the Jews Triefus (Dreifus) and Mennlis paid a tax of two pounds of heller each; the latter, who was in 1479 granted a safe-conduct for two years, settled in 1481 at Thiengen. As early as 1482 attempts were made to expel the Jews from Thurgau, but fortunately for them the governors were open to bribery. In 1489 the Jews of Diessenhofen were granted protection for three years, but in 1494 they had to leave the place with the other Jews of the canton.

Nothing is known of the religious condition of the Jews of Diessenhofen, except that they were forbidden to sell meat slaughtered according to ritual on the ordinary meat-stalls. The synagogue is said to have stood on the site now occupied by the house "Zum Erker." For several centuries no Jews lived here. Those that came from Gaillingen on business had to pay the so-called Jews' tax, or Jews' stake-money, of from three to five batzen. Even toward the end of the eighteenth century the Jews were forbidden to pass across the Rheinbrücke on Sundays, except to the physician, apothecary, or mid-

wife. In 1865 a Jew was granted the privilege of settling at Diessenhofen. In 1902 about twenty Jewish families were living in the city.

DIETARY LAWS (מאכלות אסורות): Biblical and rabbinical regulations concerning forbidden food.

A. The ancient Israelites lived chiefly on vegetable food and fruit, upon which the Bible places no restrictions (Gen. i. 29). With the development of the sacrificial system certain restric-

Vegetable Food. tions were placed on the use of the portions belonging to the priest, the Levite, and the poor (see **PRIESTLY CODE**; **CHARITY**). Besides these there were also some laws concerning vegetable and tree growths.

(1) "Orlah": The fruit of a tree was forbidden during the first three years after its planting (Lev. xix. 23-25). In the fourth year the fruit was brought to Jerusalem and eaten there amid songs of thanksgiving ("neṭa' reba'i"). Those who lived at a distance from Jerusalem might redeem the fruit and bring the money to Jerusalem, and spend it in a similar manner. The law of 'orlah applied to all times and places ('Orlah iii. 9; *Kid.* 38b *et seq.*; Maimonides, "Yad," Ma'akalot Asurot, x. 9-18; Shulḥan 'Aruk, Yoreh De'ah, 294). See **'ORLAH**.

(2) "Ḥadash": The eating of new corn was forbidden until the second day of Passover, when the "omer" was offered in the Temple (Lev. xxiii. 9-14). This prohibition also was extended to all times and places (*Kid. l.c.*; Men. 70a; Maimonides, *l.c.* 2-5; Yoreh De'ah, 293).

The reason for these laws seems to be contained in the sentence "The first of the first-fruits of thy land thou shalt bring into the house of the Lord thy God" (Ex. xxiii. 19).

(3) The use for any purpose whatever of the produce of two species of corn or of other vegetables sown in a vineyard was forbidden (Deut. xxii. 9). The sowing of mixed seed in gardens or in fields was also prohibited (Lev. xix. 19); but, if so sown, the produce was only forbidden in the case of a vineyard ("kile ha-kerem"). This prohibition applied originally only to Palestine, but was later extended by the Rabbis to all lands and times (*Kid.* 39a; Maimonides, *l.c.* 6-8; Yoreh De'ah, 295-297).

B. Among the early Hebrews animal food was partaken of by the common people only on festive occasions, usually in connection with sacrifices. The permission given to Noah and to his children to eat animal food (Gen. ix. 2, 3) was conditioned upon the abstinence from blood (see **BLOOD**). Some of the Tannaim were of the opinion that during their journey through the wilderness the Israelites were per-

Animal Food. mitted to eat the meat only of such animals as had previously been sacrificed, some portions of which had been burned on the altar, and some given to the priests; others thought differently (*Hul.* 17a; compare Ex. xvi. 3).

I. The Bible, in its legislative portions, makes explicit provisions for the distinction between clean and unclean animals mentioned earlier in connec-

tion with the Flood (Gen. vii. 2, 8). See CLEAN AND UNCLEAN ANIMALS.

II. Forbidden as being unclean is also that which comes out of the unclean (Bek. 5b). This principle applies not only to the young, but to all animal products.

(1) It is therefore forbidden to use the milk of unclean animals or of animals which suffer from some visible malady which causes them to be legally unfit ("terefah") for food. When, after the ritual slaughtering, an animal, apparently sound during its life, is found to have been diseased, its milk, or cheese made of its milk, is forbidden as food.

An adult may not suckle from the breasts of a woman, although, if placed in a vessel, woman's milk is not forbidden. A child may suckle until the end of its fourth year if healthy, or until the end of its fifth year if sickly. If, however, it was interrupted after the second year for three consecutive days with the intention of weaning it, it is not permitted to suckle again (Ket. 60a; Bek. 6a; Hul. 112b; Maimonides, *l.c.* 3; Yoreh De'ah, 81).

(2) Eggs of unclean birds, or of birds suffering from a visible sickness, which makes them terefah, are forbidden. The following signs were laid down by the Rabbis, by which eggs of clean birds could be distinguished from those of unclean. If both ends of the egg are sharp or round, or if the yolk is outside and the white inside, it is of an unclean bird. If one end is sharp and the other round, and the white is outside and the yolk inside, reliance

may be placed on the testimony of the seller, who must say of what species of birds it comes. As a rule, however, since most eggs sold are those of chickens, ducks, or geese, no questions need be asked (Hul. 64a; Maimonides, *l.c.* 7-11; Yoreh De'ah, 86).

A drop of blood found on the yolk of an egg is considered an indication that the process of hatching has already begun, and the egg is therefore forbidden. It is not necessary, however, to examine eggs before using them to see whether they contain any blood (Yoreh De'ah, 66, 2-8).

(3) The roe of unclean fishes is also forbidden. Pickled fish may be eaten, though preserved together with unclean fish ('Ab. Zarah 40a; Maimonides, *l.c.* 20-24; Yoreh De'ah, 83, 5-10).

(4) The honey of bees is permitted, since it is merely the secretion of the flower gathered by the bee and then discharged, and contains no portion of the insect. There is, however, a difference of opinion regarding honey produced by other insects (Bek. 7b; Maimonides, *l.c.* 3; Yoreh De'ah, 81, 8, 9).

III. The ancient Israelites looked with horror upon the custom prevalent among the surrounding nations of cutting off a limb or a piece of flesh from a living animal and eating it. Its prohibition is one of the seven Noachian laws (Sanh. 56a). If the limb was still partly attached to the body, but could never grow again, and the animal was legally slaughtered, this limb had to be thrown away (Hul. 101b; Maimonides, *l.c.* 5; Yoreh De'ah, 62; see also CRUELTY TO ANIMALS).

IV. An animal that has died a natural death, or has been killed in any way other than that prescribed by the law of שְׁחִיטָה, is called "nebe-

lah," and makes impure all persons or things that it touches (Deut. xiv. 21). One torn by beasts (Ex. xxii. 30 [A. V. 31]) or subject to some mortal disease is called terefah. Both of these are forbidden as food; "for thou art a holy people to the Lord thy God." The laws of terefah are given in Hul. iii.; Maimonides, *l.c.* 5-11; Yoreh De'ah, 29-60. See CARCASS and TEREFAH.

V. Blood, which is supposed to contain the vital element (Gen. ix. 4), is repeatedly prohibited in the Bible (Lev. xvii. 11; Deut. xii. 16). It must not be eaten by Jews at any time or place (Lev. iii. 17).

Not only blood itself, but flesh containing blood is also forbidden (Gen. ix. 4; see BLOOD). For the laws of blood see Hul. 111a, 117a; Ker. 2a, 20b; "Yad," Ma'akatot Asurot, vi.; Yoreh De'ah, 66-78.

This prohibition applies only to the blood of mammals or of birds, not to the blood of fishes or of locusts. Only the blood which is contained in the veins, or congealed on the surface of the meat, or which has begun to flow from the meat, is forbidden; as long as it is a part of the meat it may be eaten. See מְלִיחָה.

VI. The fat ("heleb") of ox, sheep, or goat is forbidden (Lev. vii. 23-25). The punishment decreed for transgression of this law is "karet." The fat of birds or of permitted wild animals is not forbidden. The fat of the young found within the womb of the mother after the latter has been legally killed, and its sinew "that shrank," are permitted. See FAT.

VII. The custom of refraining from eating the sinews of the hind legs of an animal arose, according to the Biblical narrative (Gen. xxxii. 32), from the incident of Jacob's wrestling with the angel, through which the patriarch became lame. It is not put in the form of a prohibition in the legal portions of the Bible, although the Rabbis considered it of Mosaic origin (Hul. 100b). Birds are excluded from this law.

C. The threefold repetition of the commandment prohibiting the seething of a kid in its mother's milk (Ex. xxiii. 19, xxxiv. 26; Deut. xiv.

Seething 21) is explained by the Rabbis as referring to three distinct prohibitions: **Kid in** cooking meat and milk together; **Mother's** eating such mixture; and deriving any **Milk.** benefit from such a mixture (Hul. 115b). See MILK.

D. In almost all cases of forbidden food, the transgressor was liable to punishment only when the portion which he ate was at least as large as an olive. The prohibition, however, extends at times farther than that (Yoma 73b, 80a), in some cases even to the taste and the odor. Hence, if a forbidden object falls into a boiling pot of permitted food, all the food contained in the pot is forbidden, unless no taste of the forbidden object can be detected in the food of the pot.

E. It is forbidden to derive any benefit from objects used for idolatrous purposes. Meat consecrated to an idol, wine of libation, spices, or anything else used in the idol's service is prohibited ('Ab. Zarah 29b); in fact, any animal slaughtered or wine touched by an idolater was prohibited to the Israelite, because it was supposed to be consecrated to his idol; and these

prohibitions applied not only to eating or to drinking, but to any benefit derived from it. Even after the practise of idolatry lapsed, these prohibitions remained in force as rabbinic institutions; wherefore the wine of a non-Jew is forbidden.

On account of the apprehension of intermarriage, the Rabbis also prohibited eating the bread of a non-Jew, or a dish cooked by a non-Jew ('Ab. Zarah 35b, 38a). It is permitted, however, to buy bread of a non-Jewish baker. If part of the cooking was done by an Israelite, the dish may be eaten. Non-Jewish servants may cook for the families which they serve, for since they are in the house of the Jew, it is assumed that one of the household gives occasional assistance. Some authorities, however, object to permitting non-Jewish servants to cook (Yoreh De'ah, 113, 4, Isserles' gloss; compare "Sifte Kohen" and "Ture Zahab," *ad loc.*).

The non-Jew's testimony regarding these matters can not be relied upon, since he does not know the import of these laws to the Jew; wherefore not only meat, but also milk and cheese bought of a non-Jew are forbidden, because it is assumed that, by some carelessness or by a desire to improve, the milk may have been mixed with some forbidden ingredient. A Jew is therefore required to be present at the milking, and at the preparation of the cheese. Different customs prevail regarding butter bought of a non-Jew; and in regard to milk and cheese the later authorities are more lenient ('Ab. Zarah ii.; Maimonides, *l.c.* iii, 13, xi.-xiii., xvii. 9-26; Yoreh De'ah, 112-115, 123-138).

F. "Sakkanah," or danger to life, is given by the Rabbis as a reason for a number of prohibitions included in the dietary laws. An animal that ate poison is forbidden on account of sakkanah (Hul. 58b). Meat and fish should not be cooked or eaten together; for such a mixture is supposed to cause leprosy. It is therefore the custom to wash the mouth between eating a dish containing fish and one containing meat (Pes. 66b; Yoreh De'ah, 117, 2, 3). Water that was left uncovered overnight was not permitted as drink in olden times, because of the apprehension that a serpent might have left its venom in it. Where serpents are not found this prohibition does not exist (Jer. viii. 4; Yoreh De'ah, *l.c.* 1).

Regarding the custom to refrain from meat and wine during the first nine days of the month of Ab or from the seventeenth day of Tammuz till the tenth of Ab, see **FAST-DAYS**; see also **PASSOVER**.

J. H. G.

—**From the Traditional Point of View:** From the point of view of traditional or conservative Judaism, the dietary laws are divinely ordained, and the rejection of the yoke of these laws is tantamount to a rejection of the belief in Israel's redemption from Egypt (Sifra, Shemini, xii., based upon Lev. xi. 44-45). To eat pork was, therefore, considered as equivalent to apostasy in the Maccabean time and later (II Macc. vii. 1 *et seq.*; IV Macc. v.; Philo, "In Flaccum," § 11). One should abstain

from it not only from personal aversion, but because "our Father in heaven has decreed that we should abstain from it" (Sifra, Kedoshim, xi.). "God showed to Moses the different species of animals, and said: 'These may ye eat, and these not'" (Sifra, Shemini, ii.; Hul. 42a). "The many rules regulating the Jew's diet are intended to test his piety and love for God" (Tan., Shemini, ed. Buber, 12, 13). "There is no other reason for all the dietary laws than that God gave them" (Samson Raphael Hirsch, "Horeb," 1837, p. 433). Thus says Lasch ("Die Goettlichen Gesetze," 1857, p. 173) in regard to the dietary laws: "He who truly fears God will observe His laws without inquiring into the reasons for them." Any question regarding the historical development of these laws is obviously excluded from the standpoint of traditional Judaism. "The dietary laws," says M. Friedländer ("The Jewish Religion," p. 237, London, 1891), "are exactly the same now as they were in the days of Moses."

Nevertheless a rational interpretation of the Biblical and Mosaic laws has at all times endeavored to find the dietary laws prophylactic of diseases of both body and soul. Indeed, many statisticians have declared that the observance of the dietary laws has greatly contributed to the longevity and physical as well as moral power of the Jewish race (see H. Behrend, "Communicability of Diseases from Animals to Man," London, 1895).

On the other hand, the cabalists hold that whosoever eats of the forbidden food becomes imbued with the spirit of impurity and is cast out of the realm of divine holiness (see Zohar iii. 41b). As to the aversion of the Jew to the eating to pork see **SWINE**.

—**Considered Historically and from the Critical-Historical and Reform Point of View:**

According to Gen. i. 29, the human race was originally allowed to eat vegetable food only; after the Flood, however, animal food was permitted, but on condition that blood, which is the soul (Gen. ix. 3, 4), should not be partaken of. The people of Israel were forbidden to eat the flesh of beasts found torn or that had died a natural death, as well as all kinds of animals declared unclean; the stated reason being that Israel should be "a holy people unto the Lord," "distinguished from other nations by the avoidance of unclean and abominable things that defile them" (Ex. xxii. 30 [A. V.], 31; Deut. xiv. 3-21; Lev. xi. 43, xx. 24). Various other reasons have been alleged by ancient and by modern writers: (1) hygienic ("Moreh Nebukim," ii. 48; Samuel b. Meir on Lev. xi. 3; Michaelis, "Mosaisches Recht," iv. 202)—*e.g.*, the sturgeon and various scaleless fishes and the pig are instanced as producing diseases; (2) psychological, presupposing that the animals thus prohibited appeared loathsome; or that they, and more especially the carnivorous beasts and birds, beget a spirit of cruelty in persons that eat them (IV

Alleged Reasons for Laws. Macc. 5; Nahmanides on Lev. xi.); (3) dualistic, holding that, like the Persians, the Israelites ascribed all the unclean animals to an evil power (Origen, "Contra Celsum," iv. 93; Bohlen, "Genesis," p. 88; De Wette, "Hebräische Archäologie," p. 188; Lengerke, "Canaan," i. 379); (4) national, maintain-

ing simply that the Israelites should be secluded from all other nations (Spencer, "De Legibus Hebræorum," 1732, p. 121; Michaelis, *l.c.*). None of these alleged reasons, however, can be considered as Scriptural. Really, the animals forbidden in the Mosaic law are almost the same as are prohibited to the priests or saints in the ancient Hindu, Babylonian, and Egyptian laws.

In the "Laws of Manu," v. 7, 11-20 ("S. B. E." xxv. 171 *et seq.*) carnivorous birds—those that feed striking with their beaks, or that scratch with their toes, or live on fish or meat—fishes that eat any kind of flesh, five-toed animals, and strange beasts or birds are forbidden; domestic animals that have teeth in one jaw only, except the camel, are eatable; also the porcupine, hedgehog, rhinoceros, tortoise, and hare are allowed; the village cock is forbidden, as is the milk of one-hoofed animals. In the "Laws of Apastamba," i. 5, 29-39 (*ib. ii.* 64), one-hoofed animals, camels, village pigs, and cattle are forbidden; also carnivorous birds that scratch with their feet, or feed thrusting forward their beaks, and the cock. Five-toed animals (with the exception of the boar, porcupine, rhinoceros, and hare), and misshapen and snake-headed fish or such as live on flesh only, are prohibited. Similarly, the "Laws of Vasishtha," xiv. 38-48 (*ib. xiv.* 74), and those of Bandhayana, i. 5, 12 (*ib. xiv.* 184).

The Hæranians may eat all animals that chew the cud, with the exception of the camel, and, with the exception of doves, all birds that are not birds of prey (Chwolson, "Die Szabier," 1856, ii. 7, 102). The Egyptian priests abstained from eating fish, one-hoofed quadrupeds or such as had more than two divisions in their hoofs and no horns, and all carnivorous birds (Porphyrius, "De Abstinencia," iv. 7). The law of Zoroaster contained probably the same prohibitions as the Hindu law, but the books are lost; and the classification of animals in "Bundahish," ch. xiv. ("S. B. E." v. 47), has no bearing on forbidden food.

Of the theories suggested for these various prohibitions of animals (see Porphyrius, *l.c.* i. 14; Spencer, *l.c.* pp. 82-92; and Sommer, "Biblische Abhandlungen," 1846, pp. 271-322) only that proposed by W. Robertson Smith ("Kinship and Marriage in Early Arabia," 1885, p. 306; *idem*, "Rel. of Sem." p. 270) seems to offer a plausible explanation. In view of the fact that almost every primitive tribe holds certain animals to be tabooed, the contention is that the forbidden or tabooed animal was originally regarded and worshiped as the totem of the clan; but the facts adduced do not sufficiently support the theory, especially in regard to the Semites, to allow it to be more than an ingenious conjecture, though Stade, "Gesch. des Volkes Israel," i. 485; Benzinger, "Arch." 1894, p. 484; Jacobs, "Studies in Biblical Archaeology," p. 89; and Baentsch, "Exodus and Leviticus," 1900, p. 355, have adopted it (against Nöldeke, in "Z. D. M. G.," 1886, pp. 157 *et seq.*).

It is certain that the conception of clean and unclean animals did not originate with the Hebrew law-giver, but, in accordance with Bib-

Priestly Sanctity of the Nation. lical tradition, goes back to prehistoric times, the distinction being assumed as existing in the days of Noah. These unclean (or tabooed?) animals were to be avoided by all those persons who laid special claim to holiness; wherefore the priests and saints of all ancient nations were commanded to shun them. Samson's mother, when she was to give birth to a Nazarite, was warned against eating anything unclean (Judges xiii. 4, 7, 14). The idea that the people of Israel were "a kingdom of priests and a holy nation" (Ex. xix. 6) could not be more impressively set forth than by laws which extended the universal priestly prohibition of unclean food to the entire people. This priest-idea is the only possible mean-

ing of Lev. xx. 25, 26 (R. V.): "I have separated you from the peoples, that ye should be mine."

The precept given by the angel to Samson's mother shows, however, that the people in general did not heed the dietary laws. The same may be inferred from Ezekiel's words concerning himself as priest: "Ah, Lord God! behold my soul hath not been polluted: for from my youth up even till now have I not eaten of that which dieth of itself, or is torn of beasts; neither came there the flesh of a sacrificially loathsome thing [פְּנִיָּה; A. V. "abominable flesh"] into my mouth" (Ezek. iv. 14; compare Hul. 37b, where the rabbinical interpretation of the passage is given). In fact, Ezekiel desires the prohibition of NEBELAH and TEREFAH to be applied to priests only: "The priests shall not eat of anything that dieth of itself or is torn, whether it be fowl or beast" (Ezek. xlv. 31; see Men. 45a, "The prophet Elijah shall some day explain this problematic passage"). Thus it is simply an extension of the priestly law to the whole nation, as "holy to the Lord," which underlies the prohibition of nebelah and terefah (Ex. xxii. 30 [A. V.], 31; Deut. xiv. 21; Lev. xvii. 15, xxii. 8).

On the other hand, the prohibition of blood and fat (Lev. iii. 17, vii. 24-27, xvii. 10-14; compare Gen. ix. 4) rests on different grounds. Maimonides ("Moreh," part iii., ch. xlvi., xlviii.)

Blood, gives a rationalistic explanation. **Fat, etc.** "Blood and fat belong to God, and must be brought upon the altar"

(Targ. Yer. to Lev. iii. 17); they are divine property; neither Israelite nor non-Israelite is allowed to eat thereof; and the penalty for violation of this law is excision ("karet"). Therefore, the blood of every animal, even when it is unfit for the altar, must be "poured out . . . as water" (Deut. xii. 24), and the fat of the nebelah and terefah is forbidden (Lev. vii. 24). In Deuteronomy (xii. 23 and elsewhere), however, fat is not mentioned (see Geiger, "Urschrift," p. 467, and KARAITES). To the same category seems to belong also the ancient prohibition of the sciatic nerve, or rather the gluteal muscle ("sinew of the hip," נִיר הַנִּשְׁהָ, which is upon the hollow of the thigh (Gen. xxxii. 32, R. V.; see Gunkel's commentary to the passage). This part, as representing the locomotive and, therefore, vital power of the animal, could easily be regarded as sacred to the Deity, just as the brain and the heart, and other vital parts of animals, were avoided by the Greeks (see Sommer, *l.c.* pp. 348, 349). The prohibition of eating together meat and milk is probably older than the rabbinical interpretation of the law, "Thou shalt not seethe the kid [feeding] upon its mother's milk (so the Karaites, "Eshkol," p. 240; Geiger, "Gesammelte Schriften," iii. 305; and Luther; A. V. "in its mother's milk," Ex. xxiii. 19 and parallels; see Dillmann's commentary *ad loc.*). It seems to rest on Temple practise, which avoided the mixing of dishes that required a different treatment from the Levitical point of view (Men. 73a). Hence as early as the schools of Hillel and Shammai the question was discussed whether cheese and fowl might be brought together on one table (Hul. viii. 1; 'Eduy. v. 2; compare Pes. 30a, 36a).

All these dietary laws, however, intended to give to the Jew the character of priestly sanctity, were declared to be "hukkim" (divine statutes), to which "the evil spirit ["yezer ha-ra'"] and the heathen nations object" (Sifra, Ahare, 13). The allegorical interpretations followed by the Alexandrians (Aristeas' Letter, 140-170) are proof of a prevailing tendency to treat the dietary laws lightly; but the Maccabean reaction against Hellenism lent new importance to them (II Macc. vi. 18; IV Macc. *l.c.*; Sifra, Kedoshim, 11). At the same time, the view is expressed by the Rabbis that the forbidden meat shall again be allowed to Israel, as indeed it was believed to have been eaten by the Israelites before entering the Holy Land (see Midr. Teh. to Ps. cxlvi. 7; Lev. R. xiii.; Hul. 17a). The very fact that the whole list of forbidden animals is allegorized in the Midrash (Lev. R. xiii.) places the dietary laws in a peculiar light, and forcibly recalls their treatment in the patristic literature. See CLEAN AND UNCLEAN ANIMALS.

The Halakah recognized the maxim to abstain from whatever savored of any possible approach to the forbidden diet; the prohibitions became ever more numerous, so as to make the wall of separation between Jew and non-Jew well-nigh insurmountable. It is to be noted that those Jews who refused to accept these rabbinical prohibitions fled to the Samaritans (Josephus, "Ant." xi. 8, § 7). The rabbinical principle was consistent in so far as it tended to keep the Jew isolated from his idolatrous surroundings by prohibiting even the meal cooked by the heathen (בשול נכרים, 'Ab. Zarah 38a), as well as the wine served on the table (Shab. 17b; see HEATHENISM; WORSHIP, IDOL-), and eating at the same table with them (Book of Jubilees, xxii. 16). In this the Pharisees had the scrupulous piety of the Jewish woman as their main support (Josephus, *l.c.* xvii. 2, § 4).

In the Middle Ages the dietary laws became the chief mark of distinction between the Jew and the Christian, whose antinomic maxim was: "There is nothing from without the man that going into him can defile him: but the things which proceed out of the man are those that defile the man" (Mark vii. 15, R. V.; compare Matt. xv. 10-20; Acts x. 15; I Cor. viii. 8), in all probability borrowed from the Gnostic teaching: "We are as little defiled by meats as is the sea by tainted influxes" (Porphyrius, *l.c.* i. 42; Bernays, "Theophrast's Schrift über Frömmigkeit," pp. 15 *et seq.*).

Reform Judaism claims that those laws affect differently the social position of the modern Jews, living in a world which is no longer idolatrous or hostile as in former days. They are no longer regarded as a symbolical expression of his being the consecrated priest or Nazarite among the nations, since the priests and saints of no other nation observe these laws as in Mosaic times. On the contrary, they tend to keep him from associating with his fellow citizens with the view of presenting to them his religious truth as "the light" and "the covenant" of the nations. Whether justified in doing so or not, the great majority of West European Jews have broken

away from the dietary laws; and the question for the Reform rabbis of the nineteenth century was whether the religious consciousness of the modern Jew should be allowed to suffer from a continual transgression of these laws, or whether the laws themselves should be submitted to a careful scrutiny as to their meaning and purpose and be revised—that is, either modified or abrogated by the rabbinical authorities of the present time. A proposition to this effect was made at the Rabbinical Conference of Breslau (see CONFERENCES, RABBINICAL), and a committee consisting of Drs. Einhorn, Holdheim, A. Adler, S. Hirsch, and Herzfeld was appointed to report at the next conference, which, however, was never held. Dr. Einhorn's report, on behalf of the committee, was nevertheless published in "Sinai" (1859 and 1860). Its leading idea is that the dietary laws, with the exception of the prohibition of blood and of beasts that have died (or die) a natural death, are inseparably connected with the Levitical laws of purity and the priestly sacrificial laws, and are therefore of a mere temporary ceremonial character and not essentially religious or moral laws.

G. Wiener in an exhaustive work of 524 pages, M. Kalisch, and K. Kohler have pleaded for a revision of the dietary laws. S. R. Hirsch and M. Friedländer have written in favor of the full retention of the laws (see bibliography below). Sam Hirsch gives a symbolic and allegorical interpretation of these laws in his Catechism, 2d ed., pp. 55-64, Philadelphia, 1877. As a matter of course, this question of revising or abrogating Biblical and rabbinical laws has no bearing upon the majority of Jews, who believe in the immutability of the Law, both the written and the oral. See ABRIGATION OF LAWS; ARTICLES OF FAITH; REFORM JUDAISM.

DIETARY LAWS IN ISLAM: The Mohammedan dietary laws are neither as rigorous nor as numerous as in Judaism. They were not introduced into the religious code until the Medinian period of Mohammed's career. He probably found it unwise to force dietary restrictions on converts, mostly recruited from the poorer classes, who did not despise the meanest food, and he therefore deferred such legislation to a more propitious time. Certain restrictions, however, were already known, as ancient custom forbade, under certain circumstances, the eating of camels (Koran, sura v. 102, vi. 144), but they were ignored by Mohammed. Swine were probably also held in abhorrence. For definite rules concerning diet, Mohammed followed Biblical models: "He has only forbidden you the carrion, and the blood, and swine's flesh, and that which has been hallowed to any other deity. But he who is forced by necessity, not wilfully transgressing, commits no sin; behold, Allah is forgiving, merciful" (sura ii. 168; see also sura vi. 146; xvi. 115, 116).

No clean animal is lawful food unless the name of

Allah was pronounced while it was slaughtered. Mohammedans are therefore allowed to eat the flesh of animals killed after the Jewish fashion. Game is also lawful if killed under the same conditions (sura. v. 95, 97). Fish and locusts, however, are exempt from this rule as in Jewish law. The prohibition of wine was introduced gradually. Drinking and gaming being equally productive of mischief, they were discussed together. At first Mohammed was satisfied with simply discouraging drinking and gaming (sura ii. 216); but later in a (Deuteronomic) revelation he says (sura v. 92): "O believers, wine, dice, images, and divining arrows are an abomination of the works of Satan; therefore avoid them that you may prosper." "In those who believe and do good works it is no sin that they tasted wine and game before they were forbidden" (sura v. 94). All intoxicants are included in this prohibition, and some theologians even go so far as to prohibit coffee and tobacco.

DIGNE (Hebr. דִּינִיָּא): Capital of the department of Basses-Alpes, France. There was a Jewish community here as early as the thirteenth century. Salve, a Jew of Digne, with Rotelus of Olobrega (Israel of Valabrègue) and Bonfils of Beaucaire, was one of the commissioners appointed to apportion the tax which, in 1299, the Jews had promised to the Count of Provence, to whom Digne belonged. In 1305 Baruch of Digne, an eminent rabbi, had a heated controversy with his former teacher, Isaac Cohen of Manosque, and was excommunicated by him. Baruch, refusing to submit to this punishment, went to France. Several Jews whose names indicated a connection with the town of Digne were established at Carpentras in the seventeenth century ("Rev. Et. Juives," xii. 213, 217, 225). Another Jew, Samson of Digne, was living at Forcalquier in the beginning of the fourteenth century (*ib.* xli. 274). About 1669 Solomon ben Moses of Milhaud, in one of his letters published by D. Kaufmann, praised the generosity of a certain Isaac דִּינִיָּא—a word which probably means "of Digne" (*ib.* xviii. 133).

DIJON (Hebr. דִּינֹן): Chief town of the department of Côte-d'Or, France. Jews have been settled here from time immemorial. They occupied two special quarters: the first and most important comprised the whole Rue Buffon, a part of which bore, until the French Revolution, the name "Rue des Juifs"; the second, "La Petite Juiverie," comprised the Rue Piron, the lower part of the town, with a section of the Rue Amiral Roussin and of the Rue Charrue.

In 1196 Duke Eudes III. presented the Jews of the village of Fénay to the town of Dijon, and the same duke "gratified" a certain Vigier with the Jew Hélie and his family in 1197. In 1204 he ceded to the Jew Valin, his creditor, the use of certain revenues. A Jew of Dijon, Bandit, the son of Benion, was the creditor of Philippe, Abbot St. Loup of Troyes, in 1216; another Jew, Salamine, made important loans to the abbey of Sainte-Bénigne and Sainte-

Seine in 1223, for which, however, Duchess Alix of Vergy, widow of Eudes III., made him sign a bill of release. Eudes III. annulled a debt due to the Jew

Jessuel (1217), and Hugues IV. another, due to Dedone, "Judæus meus" (*ib.* 1217). **Before the Expulsion.** (1228). At the request of David Lévy and Joseph of St. Mihiel, Philip the Bold, Duke of Burgundy, permitted twelve Jewish families to settle in his duchy in 1374. In 1379 ten Jewish families settled at Dijon. The states of Burgundy demanded the expulsion of the Jews (1382-1384); but as the latter had lent to the duke 3,000 livres for the continuation of the war in Flanders, they were authorized to remain. The duke even conferred upon them certain privileges, in virtue of which fifty-two families were to be allowed to live in Burgundy during the following twelve years, provided they paid a certain sum annually. The leaders of the Jewish community at that time were Joseph of St. Mihiel and David and Solomon of Balme.

The Jews were not eager to avail themselves of the favors granted them by Duke Philip the Bold. In 1387 only fifteen families were living in Burgundy. Notwithstanding the exile of 1397, there were still some Jews at Dijon after that time: Solomon of Balme was living there as late as 1417. The

Parliament of Dijon in 1730 authorized **After the Expulsion.** Joseph Raphael of Lazia and other Jewish merchants of Bordeaux to trade for one month in every season of the year in all the towns in its jurisdiction; but the Council of State annulled the privilege in the following year. The present community of Dijon dates from 1789. It comprised 50 families in 1803, and about 400 individuals in 1902. Dijon belongs to the "Circonscription Consistoriale" of Lyons.

The ancient synagogue was situated in the Rue Buffon. In the third year of the French Revolution it was in Rue Maison-Rouge; in 1795, in Rue des Champs; in 1820, in Place d'Armes; in 1829, in a part of the apartments of the Prince of Condé; in 1841, on the ground floor of the Hôtel de Ville. The present temple, the corner-stone of which was laid Sept. 21, 1873, was dedicated Sept. 11, 1879. It is situated on the Boulevard Carnot, in one of the finest quarters of the city. In addition to the synagogue, the Jews of Dijon in the Middle Ages possessed a large schoolhouse in Rue Buffon.

The ancient cemetery was situated in the Rue du Grand-Patet, behind the Jewish quarter. In 1331 Duke Eudes IV. presented to the abbey of Bussière a part of this cemetery, valued at 400 livres, an enormous sum for that time. In 1320 the cemetery was on the route to Beaune, in a place called "Les Baraques de Gevrey." Philip the Bold, **Synagogue** in consideration of the sum of one and franc in gold per capita, authorized the **Cemetery.** Jews of Dijon to own a cemetery close to the city (1373). In 1789, on their return to Dijon, the Jews bought a plot on the Chemin de Fontaine, northwest of the city, which was transformed into a cemetery; but it has, for hygienic reasons, been closed for some years.

About 1160 the scholars of Dijon took part in the synod of Troyes. Among the residents of Dijon in the thirteenth century were Rabbi of Dijon (1250),

R. Simhah Hazzan (1260), Jacob of Dijon, and Eliab ha-Kohen.

DIKDUK. See GRAMMAR, HEBREW.

DIKLAH: A son of Joktan (Gen. x. 27, and the corresponding genealogical list, I Chron. i. 21). The names of the other sons of Joktan point clearly to an Arabic origin, and it is quite reasonable to suppose that Diklah also had an Arabic home. דקל in Arabic is a common word meaning "date-palm." An Assyrian origin is suggested by Hommel because of the similarity between "Diklah" and the name of the Tigris—"Diklath" in Aramaic, and "Idiklat" in Assyrian.

G. B. L.

DILLMANN, AUGUST: German theologian and Orientalist; born at Illingen, Württemberg, April 25, 1823; died at Berlin July 4, 1894. When Hengstenberg died in 1869, Dillmann was invited to Berlin as his successor. Besides preparing a catalogue of Ethiopic manuscripts for the British Museum and the Bodleian Library (1847-48), and an edition of the Ethiopic Old Testament, of which three volumes, Genesis to Ruth, Samuel and Kings (1853-71), and the Apocrypha have been published, he translated from the Ethiopic the Book of Enoch (1853), the Book of Jubilees (1859), and the Ascension of Isaiah (1877).

Dillmann is chiefly known among Old Testament students as the editor of several parts of the "Exegetisches Handbuch zum Alten Testament," the first part of which was issued in 1841. For this collection he prepared the third and fourth editions of the commentary on Job (1869-91); three editions on Genesis (1882-92; the last edition has been translated into English by W. B. Stevenson: "Genesis Critically and Exegetically Expounded," Edinburgh, 2 vols., 1897); Exodus and Leviticus (1880); Numbers, Deuteronomy, and Joshua (1886); Isaiah (1890). Dillmann's lectures on Old Testament theology were edited by Professor Kittel, and published posthumously in 1895. Dillmann's merit in the domain of Old Testament exegesis lay in the fact that he developed the results of Ewald's historical criticism while avoiding his arbitrariness. His position is especially conspicuous in Pentateuch criticism, though less in the separation than in the chronological assignment of the sources. But while he rejected the so-called Graf hypothesis, he still opposed the traditional treatment of the Scriptures. To him it is due that a healthy historical conception of the Old Testament has practically become the common property of the present generation of theologians. Dillmann was a member of the Royal Academy of Sciences at Berlin. His library forms a part of the Johns Hopkins University Library at Baltimore, Md.

B. P.

DILLON or DILLION, ELIEZER: Russian army contractor; born at Nesvizh, government of Minsk, in the second half of the eighteenth century; died at Wilna June 25, 1838. He received a good education, which was rather unusual among the Jews of Lithuania at that time, and mastered the Russian language, becoming later intimate with the higher government officials. During the Franco-Russian war (1812) Dillon was contractor for the Russian army. After the war, in which the Jews had repeatedly shown their patriotism, Dillon was honored by the gift of a gold medal from Emperor Alexander I. "for faithful and conscientious service" (Steinschneider, "Ir Wilna," i. 146), with a rescript dated Bruxel, France, June 29, 1814. When, by an edict of the same date, delegates were ordered to be chosen by the various Jewish communities to go to St. Petersburg and present there the various Jewish questions to the government, Dillon was elected a member of the delegation from Minsk (June 11, 1816). It appears, however, that the delegates did not go to St. Petersburg, probably for lack of funds. Two years later another ukase calling for the election of delegates was issued, and Dillon was again elected a representative from Minsk. See ALEXANDER I., PAVLOVICH.

Two letters sent by Dillon to his constituents throw some light on the history of the Russian Jews, particularly those of St. Petersburg. In the first letter, dated St. Petersburg, 21 Kislew, 1818, Dillon relates that on his arrival in St. Petersburg an order was issued by Governor Vismanov for the expulsion of Jews from the city, including even those who had secured credentials from Christian merchants. Among them were many artisans who had lived in the city for years. They were to be expelled on the following Friday, when Dillon intervened in their behalf. He showed Vismanov the emperor's rescript, and assured him that his Majesty was desirous of improving the unfortunate condition of his Jewish subjects. Dillon's plea delayed the expulsion.

In the second letter, signed by him and his fellow delegate, Judah Zundel (Sonnenberg), Dillon describes an audience granted him by the emperor, which lasted an hour and fifteen minutes. The deplorable condition of the Jews and the unfounded accusations often made against them were fully represented by Dillon, who carried away from the interview the impression that the emperor was animated by a sincere desire to improve the condition of his Jewish subjects, but that his advisers did not share his views.

Dillon's increasing wealth and influence brought him many enemies. Being accused of dishonesty in his dealings with the government, he was arrested, and his property was confiscated. The case was brought before the Senate, which ordered his release and the restitution of his property on the ground that he was known personally to the emperor, who appreciated his valuable services to the country during the French war. Toward the end of his life Dillon lost his fortune, and removed to Wilna, where he engaged in petty trading.

M. R.

DILLON, MARIA LVOVNA: Russian sculptress; born at St. Petersburg in 1859. She entered the Imperial Academy of Fine Arts at St. Petersburg in 1875, and was graduated thence in 1888 with a gold medal for her statue "Andromeda." After the completion of her academic course she went abroad, first to Paris, and then to Italy.

Of the works which she has placed on exhibition since 1888, the most important are "Nyega" (Indulgence), "Nevolnitsa" (The Slave), "Kapriznitsa" (Capricious Women), "Tatyana," "Ophelia," The Bacchante "Lily" (purchased by Emperor Nicholas II.). The grand duke Alexis secured her statue "Golovka" (Little Head), and the grand duke Serge her statue "Nyega."

In a competition by twenty-eight sculptors she received the first premium and a medal for a design for the commemoration of the 200th anniversary of the founding of St. Petersburg.

H. R.

DILLON, MARK LVOVICH: Russian jurist; born at Ponevyezhi Feb., 1843; educated at the yeshibah of Wilna, the gymnasium of his native town, and the University of Moscow, graduating from the last in 1867. From 1868 to 1874 he occupied in turn the positions of assistant secretary, secretary, and chief secretary of the Senate. Subsequently Dillon was appointed adviser to the senator empowered to supervise the courts in the government of Saratov, the services he rendered in that capacity winning for him the ribbon of the Order of Saint Stanislas. From 1874 to 1896 he occupied various judicial positions in the circuit courts of Perm, Simbirsk, and Kazan. In 1883 he was made a knight of the Order of Anna, and in 1893 state councillor, which title in Russia raises its holder to the rank of the hereditary nobility. Owing to his religion, however, Dillon was barred from advancement to any higher judicial post, and he resigned from the judiciary. When in 1896 a ukase refused admission to the bar to Jewish advocates, an exception was made in the case of Dillon; he then removed from Kazan to St. Petersburg, where he practised law for two years only. On June 16, 1898, while defending a case in the Supreme Court, he was stricken with paralysis. By the advice of his physicians he removed to Germany and later to Montreux, Switzerland. Dillon is a great-grandson of Eliezer Dillon, and his father, Lev Yakovlevich Dillon, was one of the leading progressionists in Ponevyezhi and a friend of the poet Leon Gordon.

H. R.

DIMI (also called **Abdimi** and **Abudimi**): Amora of the fourth century who often carried Palestinian doctrinal and exegetical remarks to the Babylonian schools, and Babylonian teachings to Palestine (see **ABDIMA NAHOTA**). In consequence of a decree of banishment issued by Constantius against the teachers of Judaism in Palestine, he finally settled in Babylonia (Hul. 106a; Grätz, "Gesch." 2d ed., iv. 338; against Grätz, however, see I. ha-Levi, "Dorot ha-Rishonim," ii. 468-473). Dimi was a perfect storehouse of diversified knowledge, which he diligently gathered and as freely disseminated; and he made the transmission of the teachings of his most prominent Palestinian predecessors his special mission. He reported in the

names of Jannai, Hanina, Joshua ben Levi, Simeon ben Lakish, Isaac, Eleazar, and, most frequently, R. Johanan; and almost as often he reported Palestinian observations with merely the introductory formula **במערבא אמרי** ("They say in the West"; Shab. 7a, 8b, 52a, 63b, 72a, 85b, 105a, 108b, 125b; 'Er. 3a; Yoma 55b; Ta'an. 10a; Hag. 15b; Meg. 18a; Yer. Ned. ix. 41b; B. K. 114b; B. M. 58b; B. B. 74b; Sanh. 7b, 56a, 63a; Men. 26b; Tem. 12b, 14a; 'Ar. 16a).

Abaye was the most appreciative recipient of Dimi's information, which ranged along the lines of the Halakah and the Haggadah, occasionally touching also physical geography, history, and ethics (Shab. 108a; Ket. 17a, 111b; Ber. 44a; Kid. 31a; 'Ab. Zarah 36b; B. M. 58b). When Abaye once inquired of him, "What do the Westerners [Palestinians] most strenuously avoid in their social intercourse?" Dimi replied, "Putting a neighbor to shame; for R. Hanina counts this sin among the three unpardonable ones" (the other two being adultery and calling nicknames) (B. M. 58b). Dimi was also opposed to the bestowal of overmuch praise, and thus illustrated the Biblical proverb (Prov. xxvii. 14), "He that blesseth his friend with a loud voice, rising early in the morning, it shall be counted a curse to him."

Usually Dimi communicated his knowledge personally; but where circumstances required it, he did so by messages. Thus, when on one occasion, having himself reported in Pumbedita a Halakah as construed by R. Johanan, he discovered on his arrival at Nehardea that he had been mistaken, he sent word to the misinformed, candidly confessing, "What I have told you is founded on an error" (Shab. 63b).

BIBLIOGRAPHY: Grätz, *Gesch.* 2d ed., iv., note 29; Bacher, *Ag. Pal. Amor.* iii. 691; Heilprin, *Seder ha-Dorot*, ii., s.v.

Dimi: Babylonian scholar of the fourth century; brother of Rab Saфра. According to the testimony of his contemporary, R. Abba, Dimi was not endowed with worldly goods (Ket. 85b), but was blessed with a clear conscience. In his last hours he was visited by his learned brother, to whom he remarked, "May it come home to me ["I deserve God's mercy," Jastrow, "Dict." p. 132a], because I have observed all the rules prescribed by the Rabbis"; and when asked, "Didst thou also refrain from sounding thy neighbor's praises, for in continually talking of one's virtues, a man incidentally refers to his vices?" he replied, "I have never heard of such a precept; and had I heard it, I should have followed it" ['Ar. 16a]. Another version makes Dimi himself the transmitter of that very rule (*ib.*; B. B. 164b; compare **Dimi**; "Semag," Prohibition 9; "Dikduke Soferim," in B. B. *l.c.*).

Dimi of Haifa (Meg. 29b; compare "Sheiltot Hanukkah," end): See **ABDIMA OF HAIFA**.

Dimi b. Hama: See **ABDIMA BAR HAMA**.

Dimi b. Hinena: Babylonian amora of the fourth century; contemporary of Rab Saфра ('Er. 61a) and of Hiyya b. Rabbah b. Nahmani (R. H. 34b); also of Raba, before whom he and his brother Rabbah (Rabbin) b. Hinena once appeared as litigants (B. B. 13b). That he was prominent among the scholars of his age may be assumed from the fact that Rab Hisda cites a halakic decision of his (Zeb. 86b).

Dimi b. Huna of Damharia: Babylonian halakist of the sixth amoraic generation (fifth century); contemporary of Rabbina III. (Sanh. 29b; Men. 81a).

Dimi b. Isaac: Babylonian amora of the fourth generation; junior of Rab Judah b. Ezekiel, who gave him some lessons in comparative anatomy (Hul. 45b). Introducing a lecture on the Book of Esther, Dimi cites Ezra ix. 9, "Our God hath not forsaken us in our bondage, but hath extended mercy unto us in the sight of the kings of Persia." "When?" he asks; and answers, "In the days of Haman" (Meg. 10b; the Talmud manuscript in the Munich Library reads "Abudimi b. Isaac"; and instead of "Haman," some versions have "Mordecai and Esther"; see "Dikduke Soferim" *ad loc.*).

Dimi b. Joseph: Babylonian scholar of the third amoraic generation (third century); disciple of Mar Samuel (Ket. 60a; Nid. 66a), and senior to Rab Hisha and Rab Sheshet (B. B. 53b). His sister sued him before Rab Nahman for the restoration of a parcel of land which she had legally transferred to him in her illness. Probably because of Dimi's age and professional status, he refused to obey Nahman's summons until he was threatened with excommunication (*ib.* 151a). When his son had the misfortune to lose a child within thirty days from its birth, and—contrary to the rabbinic rule, which does not impose mourning for an infant under thirty days of age—he had assumed ritualistic mourning, Dimi remonstrated with him, observing, "It is only because thou desirest to be regaled with delicacies that thou indulgest in ritualistic mourning for so young an infant" (Shab. 136a).

Dimi b. Levai: Babylonian scholar of the fourth century. On one occasion, the skies being overcast, he thought that the sun had set; and as the day was the eve of the Sabbath, he at once inaugurated the Sabbath. Subsequently the skies cleared, and he discovered his mistake. On his application for information on the law under such circumstances, Abaye declared that he might resume his daily occupations (Ber. 27b).

Dimi of Nehardea: Babylonian scholar of the fourth century; head of the Academy of Pumbedita (385–388). Prior to his elevation to the rectorate he was a produce-merchant; and the Talmud preserves an anecdote of that time which affords an insight into the economic laws of the age as well as an idea of Dimi's standing among the learned even in his youth. The law had provided that—except the dealer in spices or perfumes at any time, and the public generally while fairs were being held—no non-resident merchant might enter his wares in competition with local traders. A notable exception to this rule was the scholar. To him the market was always open; and to facilitate his sales and his return to study, the law gave him the rights of monopoly until he disposed of his goods. Now, Dimi once brought to Maḥuza a shipload of dried figs, when Raba was requested by the resh galuta (exilarch) "to tap Dimi's pitcher", *i. e.*, to examine him ascertaining whether he was a scholar and consequently entitled to the special market privileges. Raba deputed Adda b. Abba (Ahaba) to examine Dimi; and Adda propounded to the newcomer a supposititious ritualistic question. Dimi thought that his

interlocutor was Raba himself, and deferentially inquired, "Is not my master Raba?" The other, familiarly tapping him on the sandal, replied, "Between me and Raba there is a great difference. At any rate, I am thy superior, and Raba is thy superior's superior." The privileges of the market were not granted to Dimi, and eventually the figs spoiled. He then applied to Rab Joseph for redress; and the latter, provoked at the discomfiture of the scholar, exclaimed, "He who hath not failed to avenge the disgrace of the Edomite king [see II Kings iii. 27; Amos ii. 1] will not fail to avenge thy disgrace." It is added that shortly afterward Rab Adda died suddenly, and several rabbis, including Dimi, who had some grievances against him, reproached themselves with having been indirectly instrumental in his punishment (B. B. 22a).

As an educator Dimi acted on the maxim, "Rivalry among scholars advances scholarship"; therefore he approved Raba's rule not to remove a teacher because his rival makes better progress with his pupils, arguing that rivalry will induce more strenuous efforts and produce better results. On the other hand, Raba, believing that "mistakes will correct themselves," showed preference for the teacher that succeeded in imparting much knowledge, even if not very exact. Dimi opposed this with his maxim, "Where error has once crept in, it stays"; and he therefore looked for precision rather than for quantity (B. B. 21a).

Dimi seems to have confined himself to the cultivation of the Halakah; for in the comparatively few instances where he is cited in the Talmud (besides those quoted see M. K. 12a; Yeb. 121a; B. B. 138b; Men. 35a; Hul. 51b) he appears in connection with some Halakah, while no Haggadah appears to bear his name.

Dimi b. Nehemiah (Nahman) b. Joseph: Babylonian amora of uncertain age, and but rarely cited in rabbinical literature (Sanh. 23b, 24a). He is probably identical with Abdimi b. Nehuniah, by whom the Psalmist's effusion (Ps. cxxxix. 14), "I will praise thee; for I am fearfully and wonderfully made: marvelous are thy works; and that my soul knoweth right well," is illustrated thus: "Some things are beneficial to the liver and deleterious to the windpipe; others are beneficial to the latter and deleterious to the former. There are ten organs in man: the windpipe [larynx] produces voice; the gullet conducts the food; the liver is the seat of anger; the lungs promote thirst; the gall, jealousy; the stomach, sleep; the first stomach grinds the food; the spleen promotes laughter; the kidneys counsel; and the heart decides—therefore does David glorify, 'I will praise thee,' etc. Therefore, too, does he elsewhere [Ps. ciii. 1] exhort, 'Bless the Lord, O my soul: and all that is within me, bless his holy name'" (Midr. Teh. *ad loc.*; compare Eccl. R. vii. 19).

S. M.

DIN (from "dun," to argue, to judge; a synonym for "mishpat"): Signifies (1) argument; (2) judgment; (3) laws and rules which form the basis of arguments and judgments; (4) justice, the object of

the judgment; (5) punishment, the execution of the judgment. The term is generally used in connection with proceedings in a court of law. "Din" is declared by Rabbi Simon ben Gamaliel (Ab. i.) to be one of the three things to which "the world owes its stability": truth, judgment—that is, authority vested in a person or persons to decide litigation—and peace. The judge who performs his duties conscientiously and delivers "din emet" (true judgment) is as great as if he had taken part in the creation of the world (Shab. 10).

The first lesson taught by the men of the Great Synagogue was, "Be slow in din"; *i.e.*, do not hurry to decide a question before it has been fully considered (Ab. i. 1). But on the other hand, the Rabbis warn also against the opposite and not less serious evil of unnecessarily protracting the legal proceedings, or holding back the final decision, and denounce it as "innui ha-din" (suppression of judgment). Distinguished from "innui ha-din" is "iwut ha-din" (perversion of justice) (Ab. v. 11). The parties are recommended not to stand on their rights, and he is praised as a good person who keeps "lifnim mishurat ha-din" (within the line of the right)—that is, who resigns part of his right for the sake of peace.

There may, again, be cases in which strict adherence to the law entails undeserved hardships. Rabbi Eliezer holds in such cases, "yikqob ha-din et ha-har" (lit. "let the law pierce the mountain"): the law must be carried out whatever the consequences (Yeb. 92a). The legal proceedings differ according as the case is a mere question of property ("dine mammonot") or involves a criminal or even a capital charge ("dine kenasot" or "dine nefashot"). Cases of the latter kind are not tried outside Palestine, and not on Friday nor on the eve of a holy day. In "dine mammonot" the highest member, in "dine nefashot" the lowest member, of the court is first to give an opinion (Maimonides, "Mishneh Torah," xiv.; Sanh. xi., 1 *et seq.*).

s. s.

M. F.

DINA, GIACOMO: Italian deputy and journalist; born at Turin in 1824; died there July 16, 1879. The son of poor parents, he became a teacher early in life. In 1848 he founded the "Opinione," a journal which, under his tactful editorship, covering a period of thirty years, gained great political influence. He was chosen deputy of Imola, Bologna, by the Progressive-monarchical party in 1867; of Città di Castello in 1871 and 1874.

DINAH.—**Biblical Data:** "Dinah" (דִּינָה) is the name of Jacob's daughter by Leah (Gen. xxx. 21). Shechem, the son of Hamor the Hivite, seduces her while she is visiting "to see the daughters of the land" (Gen. xxxiv. 1-31). Though he is anxious to marry her, his outrage upon her induces her brothers, notably Simeon and Levi, to take most treacherous and cruel revenge. Apparently acquiescing in the proposed marriage upon due settlement of the dowry, they insist upon the Shechemites being circumcised as a prerequisite condition; but on the third day after the operation, when the people "were

sore," Simeon and Levi fall upon the defenseless city, killing Hamor and Shechem and despoiling the place. Jacob can not approve of their conduct, fearing it may bring evil results by causing the inhabitants of the land to act in concert against him. In Jacob's Blessing (Gen. xlix. 7) the dying patriarch censures the deed as cruel and inspired by fierce and unrighteous anger. Dinah is not mentioned again.

A late writer (Judith ix. 2 *et seq.*) praises God for having given Simeon strength to avenge the outrage done his virgin sister. Josephus omits all reference to the incident of the circumcision. Dinah having been attracted by a desire to see the "finery of the women" at a time when Shechem was keeping a festival, the brothers, described as "of one mother" with her, seized the opportunity presented by the fact that the inhabitants were engrossed in feasting, to despoil the city. God Himself allays Jacob's "astonishment" at the act. In the Test. Patr. (iii. 6-8) Levi consults his father and his brother Reuben, and they concoct the scheme to insist upon circumcision. Jacob, discovering that he has been duped, is wroth. Levi himself is taken sick, but learns that the destruction of Shechem was justified, since the people had been in the habit of outraging women. He also allays Jacob's apprehensions. Indeed, an angel had commanded Levi to avenge Dinah's wrongs (*ib.* iii. 5). In Gen. xlviii. 22 there seems to be an allusion to Jacob's own participation in the capturing of the city (see, however, Gunkel, "Genesis," p. 338). The Rabbis so construe it (Ber. R. to the passage; Midrash Hagadol, ed. Schechter, p. 527), and they also make the "holy spirit" (Midrash Hagadol, p. 525) urge the defilement of the girl, while God, as in Josephus, allays Jacob's apprehensions. See also **ASENATH**.

E. K.—E. G. H.

—**In Rabbinical Literature:** Dinah is blamed for the affair with Shechem because she "went out" (Gen. xxxiv. 1), and her brothers had to drag her away from Shechem by force (Eccl. R. x. 8; Gen. R. lxxx.). When Jacob went to meet Esau, he first locked Dinah in a box, for fear that Esau would wish to marry her. Such action of his brought out the rebuke from God: "If thou hadst married off thy daughter in time she would not have been tempted to sin, and might, moreover, have exerted a beneficial influence upon her husband" (Gen. R. lxxx.). Her brother Simeon promised to marry her; but she did not wish to leave, Shechem, fearing that after her disgrace no one would take her to wife (Gen. R. *l.c.*); she was later married to Job however (B. B. 16b; Gen. R. *l.c.*). When she died, Simeon buried her in the land of Canaan. She is therefore referred to as "the Canaanitish woman" (Gen. xlv. 10). Shaul (*ib.*) was her son by Shechem (Gen. R. *l.c.*).

C. L.

—**Critical View:** The narrative has been held to be unhistorical, and merely a reflection of old feuds arising from outrages committed against women; the story is valuable, therefore, for the light it throws upon primitive customs. The Dinah episode illustrates the custom which made it incumbent upon brothers to avenge any outrage perpetrated upon a

sister. This is still an unwritten law among the nomadic Bedouins (see Tuch, "Genesis," p. 407). Why Levi and Simeon alone undertook to requite the insult without the aid of her other brothers—a circumstance noted even by the Rabbis (see Midrash Hagadol, *l.c.*)—and why Jacob should under such circumstances have disapproved of the act, the theory fails to consider.

Gunkel ("Genesis," pp. 336 *et seq.*) holds that Gen. xxxiv. is composed of two distinct accounts of one event: (1) Dinah, after being outraged, is not retained in the house of Shechem; the son pleads with his father to get him the girl for a wife; Hamor negotiates with Jacob, offers a general intermarriage, and submits to circumcision; the city is attacked and looted; God (Gen. xxxv. 5) advises Jacob to move away. (2) Dinah is captured and retained by Shechem; to allay her uneasiness the son through his father enters into negotiations with Jacob; Jacob is promised rich gifts; he waits for his sons to return before he decides; most of them acquiesce, though Levi and Simeon refuse; they (Levi and Simeon) must cleanse their sister's honor with blood. The story is not complete. It must have told of the failure of Levi and Simeon, and of their being killed in the fray. Gen. xlix. 5-7 alludes to a third variation, in which Jacob is incensed at the conduct of his sons, and proves that the incident was fraught with fatal consequences for the brothers. The historical facts underlying this episode are these: Dinah represents a clan; Shechem is the well-known city. The tribe Dinah had been made captive by Shechem, and the closely consanguineous tribes of Levi and Simeon, in an attempt to capture the city and release the sister clan, came to ignominious grief. This feud did not take place in the Patriarchal period, but at the beginning of that of the Judges, shortly after the first invasion of Canaan.

DINAITES (דִּנְאִי; Septuagint, *Δειναῖοι*; Vulgate, "Dinæi"): A tribe mentioned in Ezra iv. 9 as having settled in Samaria, and as opposing and denouncing the efforts of the Jews to rebuild Jerusalem. The Dinaites have thus far not been positively identified.

κ.

B. P.

DINHABAH (דִּנְהַבָּה): City mentioned in the Old Testament as the capital of Idumea, and probably the birthplace of Bela, son of Beor, King of Edom (Gen. xxxvi. 32; I Chron. i. 43). The efforts at locating the Dinhabah of Scripture have thus far been unsuccessful.

κ.

B. P.

DINIZ (= **DENIS**): King of Portugal (1279-1325), and styled "the father of his country"; one of the most tolerant rulers of his time, and well disposed toward the Jews. He took care that the judges did not encroach on their rights, and did not admit unlawful witnesses. He did not compel Jews to wear special badges or to pay tithes to the Church, although the canonical law demanded both; and he particularly enjoined upon the authorities that all privileges granted the Jews by him or any preceding king should be recognized. Diniz granted special favors to individuals and to communities, as, for

instance, to Bragança. He in 1295 appointed Don Judah, the chief rabbi ("Arrabi Mor"), as his treasurer. Judah's son and successor, Don Gedaliah, treasurer to Queen Doña Britiz, enjoyed such favor with the king that the latter gave him two tracts of land (*terras*), or, according to another version, two towers (*torres*), in Beja. On account of such favors shown to the Jews the Portuguese clergy complained of the king to the pope, but without avail; for the king would not change his attitude.

DIOCÆSAREA. See SEPPHORIS.

DIOCLETIAN: Roman emperor (285-305). Although he was the son of Dalmatian slaves (Eutropius, ix. 19), he rose to the highest honors by virtue of his personal qualities. The rabbinical sources have amplified the account of his lowly origin by reporting that he was a swineherd in his youth, even his original name, Diocles, being mentioned in this connection (Yer. Ter. 46c; Gen. R. lxiii. 8). According to these sources, he spent his youth in Palestine, where he was mocked by the Jewish school-boys; and after he became emperor the Jews agreed that not even the most insignificant Roman ought to be derided (*ib.*). According to the Talmud Yerushalmi, Diocletian went to PANEAS in Palestine, where, not so much from cruelty as from a tyrannous impulse, he gave the patriarch Judah III. at Tiberias a command which was apparently impossible of fulfilment. Judah, however, succeeded in carrying it out, either through the cleverness of a servant or through magic (*ib.*).

Diocletian's presence in Palestine, which is often mentioned in rabbinical sources, is connected by Graetz with the Persian war of 297-298. This connection, however, is not necessary, for the fact is that Diocletian was in Palestine in 286, in the time of Judah III. (comp. Mommsen in "Verhandlungen der Berliner Akademie," 1860, pp. 417 *et seq.*). It is reported that he was at Cæsarea (Eusebius, "Vita Constantini," i. 19; compare Gen. R. lxiii. 8) and in the region of Tyre (Yer. Ber. 6a; Yer. Naz. 56a), which is not far distant from Paneas. At this last-named place, where Lake Phiala (Birkat-Ram) is situated, Diocletian built certain water-works, as may be inferred from the confused rabbinical notices (according to the correct reading in Yalk. to Ps. 697; compare Midr. Ps. xxiv. 6; Yer. Kil. 32c; Yer. Ket. 85b; B. B. 74b), and the lake may possibly have been called for a time "Lake of Diocletian."

His stay in Palestine is memorable for the edict issued by him that sacrifices should be offered everywhere to the national gods, the Jews alone being exempted, for even the Samaritans obeyed the edict (Yer. 'Ab. Zarah 44d). The Christians also suffered heavily (Eusebius, "De Martyribus Palestine," § 3); although the date 303-304, given by Eusebius for the issue of the edict, is different from that given by the Rabbis, who clearly assume that Diocletian was present in Palestine at the time. Diocletian endeavored to improve the pagan worship, as may be seen from an inscription preserved in the Talmud: "I, Emperor Diocletian, established this panegyric of

Tyrus lasting eight days to the genius of my brother Hercules." "Herculius" was the surname of Maximian, Diocletian's associate emperor; Diocletian's surname was "Jovius." This inscription is valuable and significant as regards not only Diocletian, but also as evidence of the conditions in Palestine (Yer. 'Ab. Zarah 39b; compare Rapoport, "Erek Millin," p. 230; I. Levi, in "Rev. Et. Juives," xliii. 196). It is also worthy of note that Diocletian led 120,000 men into Syria (Yer. Sheb. 34d), and that his measures were so severe that he drove the inhabitants of Paneas into exile, from which they returned after thirty years (Yer. Sheb. 38d). It is also said that Diocletian possessed a piece of virgin gold as large as a Gordianic denarius, and similar to that possessed by Hadrian (Num. R. xii. 4).

S. KR.

DIODATUS (surnamed **Trypho** = Debauchee): Ruler of Syria 141–138 B.C.; born at Kasiana near Apamea. Originally an officer in the army of Alexander Balas, he opposed the claims of Demetrius II., putting on the throne Antiochus, the young son of Alexander, who was still a minor, with the help of deserters from Demetrius. Diodatus took the city of Antioch; and Jonathan the Hasmonean was willing to throw in his lot with Antiochus. Diodatus, however, had other plans, and feared that Jonathan would stand in his way. He inveigled him from Bethshean to Ptolemais, and put him to death at Baskama or Baska (Josephus, "Ant." xiii. 6, § 6). From Ptolemais, Diodatus went to Judea against Simon Maccabeus, who had followed Jonathan as head of the Jewish forces. His real design now came to light; the young Antiochus was put to death, and Diodatus assumed "the crown of Asia." Simon turned to Demetrius for aid, and from him gained the independence of the Jewish state. Demetrius was taken prisoner in Persia; but his place was taken by another son of Demetrius I., Antiochus VII. (Sidetes), who marched against Trypho, and with the help of Simon shut him up in the city of Dora (Tantura, between Caesarea and Carmel). Diodatus fled to Orthosia (north of Tripoli), and was besieged by Antiochus in Apamea, where he took his own life.

DIOGO, JUSTINIANO ALVARES DA ANNUNCIACÃO: Archbishop of Cranganor; born at Lisbon in 1654; died at Evora Oct. 28, 1713. Doctor of theology and canon in ordinary, he was charged with a special mission at Rome. Dom Pedro II. rewarded his services by appointing him archbishop of the Indian town of Cranganor, then a Portuguese possession (1692). Diogo never occupied his archiepiscopal seat, and resigned it in 1695 to become coadjutor of the Archbishop of Evora. Besides writing several sermons and separate discourses, he was the author of "Trofeo Evangelico," a collection of sermons, Lisbon, 1693–1713. He left various works in manuscript, among them a work entitled "Turris Davidica Contra Judæos," in which

he seeks to demonstrate the coming of the Messiah. The sermon preached by Diogo on the occasion of the auto da fé in Lisbon, Sept. 6, 1705, caused an animated controversy. In 1709 there appeared in Portuguese under the title "Ante Exordio" a reply by an anonymous Jew, a work which must not be confounded with the "Respuesta" in Spanish, attributed to the habam David Nieto of London. The anonymous book, according to a note in the "Antiquities of Mexico," is said to be by Isaac Nieto. On the original copies the author is given as "Carlos Vero" (pseudonym), or as "the author of 'Noticias Reconditas.'"

The sermon and the *Respuesta* have been reprinted by Lord Kingsborough and A. Aglio, in *Antiquities of Mexico*, viii., Supplement, pp. 91, 117, London, 1848. They have also been translated into English by Moses Mocatta, under the title *The Inquisition and Judaism: A Sermon Addressed to Jewish Martyrs on the Occasion of an Auto da Fé at Lisbon, 1705, by the Archbishop of Cranganor*; and *A Reply to the Sermon by Carlo Vero*, 1845; reprinted in Philadelphia by [Isaac] L[eiser] 5620 (1860).

G.

C. DE B.

DION CASSIUS: Historian; born about 155 at Nicæa in Bithynia; held the highest offices of state in the Roman empire; became consul in 231; died about 240. He wrote an extended work in Greek which dealt with the entire history of Rome, and also included Jewish history. Only books lxi.–lxxx. have been preserved intact, in the extract made by Xiphilinus in the eleventh century, the remainder existing merely in fragments. Most important for Jewish history are the fragments of books lx.–lxix., which contain highly valuable information on matters that would otherwise be entirely unknown.

Dion's references to Jewish affairs may be divided into the three following groups:

1. Scattered notices, such as the order against religious assemblies at Rome, under CLAUDIUS (book lx. 6); the punishment of the consul Flavius Clemens and others, "who followed Jewish customs and laws" (lxvii. 13); and the references to the Jewish princess BERENICE (lxvi. 15).

2. Remarks on the Jewish war under Nero, Vespasian, and Titus (lxvi. 4–15). These because of their accuracy and impartiality, so far as such characteristics were possible in a Roman writing on Jewish matters, do not lose in value even when compared with the account of Josephus. Indeed, they are the only authentic notices of this important war besides Josephus' account, which is colored in favor of the Romans. Dion narrates, quite independently of Josephus, the difficulties of the besieging Romans in getting drinking-water, while the Jews had a plentiful supply. He also says that deserters from the Jewish camp poisoned the water of the Romans. As a similar statement is found in Sextus Julius Africanus (*Κεστοί*, § 3, in "Mathem. Veteres," p. 290), who probably drew his material from Justus of Tiberias, it is possible that Dion Cassius also used the work of the last-named historian.

Dion says, further, that Titus himself was wounded by a stone (a detail not mentioned by Josephus); that many Romans, believing the city to be impregnable, went over to the Jews; and that the Roman soldiers, because of the sanctity of the Temple, hesitated for days to enter it, even after a breach had been made. All these occurrences are materially toned down by Josephus. Dion describes how the people, the magistrates, and the priests were placed in defending the Temple; and he says that Jerusalem fell on a Sabbath (the Romans took the Sabbath to be a fast-day). In all these matters Dion shows that he had reliable and authentic information. Since Vespasian as well as Titus wrote "Recollections" of the Jewish war, Dion may have used them. Another of his sources is assumed to have been the account of Antoninus Julianus, a Roman general and rhetorician, who took an active part in the war.

3. For an account of the Jewish war under Trajan and Hadrian Dion is the most important source (lxviii. 32, lxix. 12-14), though his descriptions of the cruelties perpetrated by the Jews at Cyrene and on the island of Cyprus are probably exaggerated. While not free from errors, Dion's account is largely confirmed by the Rabbis and by the Church Fathers; and even the fifty walled cities with the capture of which he credits the Jews can be severally located. He is more accurate than Spartianus, one of the authors of the "Scriptores Historiæ Augustæ," who, like Dion, mentions the account of Emperor Hadrian; but of the two, Dion only seems to have taken the Jewish data directly from this authentic source.

BIBLIOGRAPHY: The text of Dion Cassius is reprinted in Th. Reinach, *Textes d'Auteurs Grecs Relatifs aux Juifs*, I; the passages referring to the Bar Kokba war, in Münter, *Der Jüd. Krieg Unter Trajan und Hadrian*, 1824, pp. 106-110. For an enumeration of the fifty cities, see S. Krauss, in *Magazin*, 1892, xix. 227. For the connection with Antoninus, see Schlatter, *Zur Topographie und Gesch. Palästina's*, 1893, pp. 397 et seq.; and for that with Justus, see Büchler, in *Kaufmann Gedenkbuch*, 1900, p. 18. On Hadrian as source, see Schürer, *Gesch.* 3d ed., 1901, I. 674, note 72.

S. KR.

DIONYSUS, FESTIVAL OF: Historic notices regarding a supposed festival of Dionysus in Judea do not antedate the time of the Maccabees. The general statement in I Maccabees (i. 51, 54, 55) that ANTIOCHUS EPIPHANES forced the Jews to sacrifice in the Greek fashion, is amplified in II Maccabees (vi. 7; compare III Macc. ii. 29) into the statement that the Jews were forced to take part in the festivals of Dionysus and to deck themselves with ivy (*κισσός*); hence Hippolytus ("De Antichristo," pp. 33-35, § 49), a Church father of the second century, regards Antiochus Epiphanes as the prototype of Antichrist. The entire story, however, is regarded as unhistorical. Even the account in

II Maccabees. III Maccabees, where Egyptian matters are referred to, is not plausible; for though Dionysus was the tutelary

deity of the Egyptian Ptolemies, whereas the Syrian Seleucids always worshiped Zeus (Willrich, "Judai-ca," p. 163, Göttingen, 1900), the Dionysia were celebrated in every country that had come under the influence of Greek culture. Antiochus XI. even bore the by-name "Dionysus" (Josephus, "Ant." xiii. 15, § 1; "B. J." i. 4, § 7); and NICANOR, the general of Demetrius, threatened to consecrate a Temple at Jerusalem to Dionysus unless Judas Maccabeus was

delivered to him (II Macc. xiv. 33). The Seleucids may therefore have forced the Jews to a similar worship.

It is certain (III Macc. ii. 29) that the Jews of Egypt were forced to worship Dionysus, although this religious persecution took place probably only within the nomos of Arsinoë. It is further said (*ib.* ii. 30): "Should any among them prefer to enter the community of those initiated into the mysteries, they shall receive the same civic rights as the Alexandrians." Hence the citizenship of the Egyptian Jews was dependent, under Ptolemy IV. Philopator, on their taking part in the worship of Dionysus (Lumbroso, "Ricerche Alessandrine," p. 49, Turin, 1871; Abrahams, in "Jew. Quart. Rev." ix. 56); and as the Jews could not accept this condition, they probably did not become full citizens under that king.

A myth of Dionysus is connected with the Palestinian city of Scythopolis. Pliny ("Historia Naturalis," v. 18, § 74) and Solinus (ed. Mommsen, ch. 36) derive the name of this city from the Scythians, who were settled on that spot by Dionysus in order to protect the tomb of his nurse who was buried there. The Greeks and the Romans

According to Plutarch. were firmly convinced that the Jews had a cult of Dionysus, basing this opinion on some external point of similarity. Plutarch thinks that the name

of the Jewish Sabbath is derived from *σάβας*, the cry of the ecstatic Bacchantes. More important still is his further statement that the Jewish Feast of Tabernacles, as celebrated in the Temple at Jerusalem, was really a form of Dionysus worship. He reasons as follows: "The Jews celebrate their most important feast in the time of the vintage; they heap all sorts of fruit on their tables, and they live in tents and huts made chiefly from branches of the vine and from ivy; the first day of this festival they call the Feast of Tabernacles. A few days later they celebrate another feast, invoking Bacchus no longer through symbols, but calling upon him directly by name. They, furthermore, have a festival during which they carry branches of the fig-tree and the thyrsus; they enter the Temple, where they probably celebrate Bacchanalia, for they use small trumpets; and some among them, the Levites, play on the cythara" ("Symposium," iv. 5, § 3). Plutarch evidently had certain ceremonies of the Feast of Sukkot in mind. See CROWN IN POST-BIBLICAL TIMES. The accusation of Tacitus ("Hist." v. 5) is similar:

"As their priests sing to the accompaniment of flutes and kettle-drums, and as they deck themselves with laurel, and as a golden vine was found in their Temple, many people believe that they worship Bacchus, the conqueror of the East; but the two cults have nothing in common, for Bacchus has established a brilliant and joyous ritual, while the customs of the Jews are bizarre and morose."

The artificial vine, which Herod presented to the Temple, is also mentioned by Josephus ("Ant." xv. 11, § 3); it still existed at the destruction of the Temple (Mid. iii. 8), and

Account of Tacitus. was carried off by Titus ("B. J." v. 5, § 4). The account of Tacitus is thus based on fact, the same as that of Plutarch in regard to the ritual of the Feast of Tabernacles. Plutarch, furthermore, deduces the Jewish

worship of Bacchus from the garment of the high priest, who wears bells on his mantle, like those that were used in the Bacchanalia at night; he refers also in ambiguous terms to a thyrsus and to drums (*τύμπα*) which the high priest wears in front (on the frontlet or on the breastplate?) (*ib.*). Grätz ("Gesch." 2d ed., ii. 254) assumes a barrel-opening festival (*πυθολία* = "vinalia"), which, however, can not be substantiated.

In describing the garment of the high priest, Plutarch purposely uses expressions reminiscent of the Dionysus worship, and it is probable that just such equivocal expressions, which he may have read in a Hellenistic work, led him to make the impossible assertion that the Jews had a cult of Dionysus. As a matter of fact the palm-branch prescribed for the Feast of Tabernacles was called by the Hellenists *θίπρος* (Josephus, "Ant." xiii. 13, § 5; II Macc. x. 7), which could easily remind a Greek of the Dionysia. He also intimates that he knew something about the "Feast of the Drawing of Water," which in its free joyousness resembled the Bacchanalia (Suk. v. 2; Tosef.: iv. 1-5; Bab. 51b; Yer. 55b). Neither the statements of Tacitus nor those of Plutarch lead to the conclusion, as some scholars assert, that they used as their sources anti-Jewish Alexandrian works, for their statements contain nothing that is hostile to the Jews. A Greek, on the contrary, would consider it a vindication for the Jews if he could derive ceremonies of the Jewish worship from pagan practises.

Dionysus is not mentioned as a god in the rabbinical writings; it is possible, however, that in Haman's fictitious genealogy (I Targ. Esth. v. In Talmud 1; II Targ. Esth. iii. 1) Dionysus figures as Haman's ancestor (Krauss, *Cabala*. "Lehnwörter," ii. 200, Berlin, 1899). Jastrow's statement ("Dict." p. 1306) that the "Dionysia" may be traced in an obscure Talmudic word can not be accepted. In some prayers of the cabalists the name of Dionysus appears, together with other mystic names ("Mitteil. der Gesell. für Jüd. Volkskunde," v. 31, 58, 71). See ASS-WORSHIP.

DIOSCORIDES, PEDACIUS or PEDANIUS: Greek physician of the first century. His "Materia Medica" is mentioned in a Hebrew medical work called "Midrash ha-Refu'ot," attributed to ASAF BEN BERECHIAH, but compiled from Syriac sources in the tenth or eleventh century. In the tenth century Hasdai ibn Shaprut, minister of finance to 'Abd al-Rahman III., assisted in the translation of the work into Arabic. But no Hebrew translation is known; the only quotations found being reproductions of quotations in other authors. An attempt was made in Salonica to translate into Hebrew Mathioli's commentary on Dioscorides.

Only one short work of Dioscorides has been translated into Hebrew, by a French Jew, Azariah Bonafoux. It is an alphabetical index of drugs which can be substituted one for another. The translator says that he found the manuscript under the Greek

title of *Ἀντιβαλλόμενον*, which he translated "Temu rat ha-Sammim."

DISABILITIES, LEGAL. See BLEMISH; EVIDENCE; LAW, CIVIL.

DISABILITIES.—In Europe: J. E. Scherer in his "Die Rechtsverhältnisse der Juden in den Deutsch-Oesterreichischen Ländern" (Leipsc, 1901) has well pointed out that legislation concerning the Jews during the Middle Ages may be divided into two groups, based upon two different views. The first comprises those laws which treat the Jews as belonging to an alien creed opposed to the established church of the state, against the development of which the latter must be protected in part by preventive, in part by repressive, measures. This legislation afforded the Jews in religious matters a limited sufferance; it protected their lives, liberty, and property, but seriously restricted Principles their civil rights. This principle, of traces of which are perceptible in Treatment. heathen Rome, permeates the Christian-Roman, Germanic-Christian, and Mohammedan systems of law. The second group of laws is based upon the view that the Jews are members of a foreign nation, and are accordingly to be treated as aliens. Early Teutonic law held that foreigners did not share in the rights accorded by the nation to its members; they might at any time be expelled from the country in which they had settled, and their property, which was regarded as belonging not to them, but to the sovereign, might be taken away from them. Rights were secured by them only through grants from the sovereign, and were limited by such grants. Such were the principles of law applied to the Jews in Germany, in the Carolingian empire, in most portions of Austria, and in Aragon, Castile, Portugal, England, France, and south Italy till the thirteenth or fourteenth century.

The disabilities which the Jews suffered prior to the common era in countries other than those dominated by Greece and Rome—of little direct importance in accounting for their legal status in the civilized world to-day—are treated in the articles on those countries. In regard to pre-Christian Greece and Rome it need only be remarked that their treatment of the Jews showed, though in a minor degree, traces of the antagonism toward aliens which was so common in primitive societies, and which in the case of the Jew the jealous precepts of Jewish monotheism tended to aggravate (see DIASPORA). Under Caracalla (211-217) the Jews became Roman citizens; as such they were entitled to all civil and political rights, including even the right to hold public office, though certain obligations, which were regarded as inconsistent with their religion, were not imposed upon them, such as military service and liability to certain Church impositions. These conditions continued for about a century, until the Roman empire

under the emperor Constantine began to yield to Christianizing influences. Some further immunities which they continued to enjoy under Caracalla and his successors carried with them features which may, in one way, be regarded as disabilities. The tax which the Jews in the Roman empire were allowed to collect for Palestine (see APOSTOLÉ) was at a later time appropriated by the government itself, and the tax therefore became increasingly hateful to the Jews. It was soon replaced by irregular exactions, until it was definitely abolished by Julian, and the registers were destroyed. There is reason to believe that other special Jewish taxes were occasionally levied, and that the exemption, or disqualification, from military service, dating from the Pompeys in 49 and Dolabella in 43, was connected with a special counterbalancing tax. However, this taxation can scarcely, in its origin, be regarded as of a discriminatory character.

The period that preceded Caracalla was, however, even less favorable for the Jew, both in the Greek and in the Roman dominions. The Greek cities, certainly at first, did not receive the Jews favorably; in many of them the observance of Jewish rites was absolutely forbidden; in others, like ALEXANDRIA, they were required to live in a special district of the city, though this had been originally granted as a privilege. The Jews acquired in general the good-will, first of the Greek, then of the Roman authorities; and this afforded them a protection against the jealousy and antagonism of the populace. Under the Greeks they did not enjoy exemption from military service. Their fortunes and the degree of their liberties varied from time to time in the Greek cities, never becoming quite as complete as they became under Caracalla, and, generally speaking, they were never collectively Greek citizens. Of course, in the conquered Greek territories they acquired the same rights of citizenship as were enjoyed by their coreligionists in other parts of the Roman empire. In Rome they met with occasional harsh treatment, though their legal status gradually improved till the constitution of Caracalla made them Roman citizens. Hadrian, temporarily, prohibited circumcision; but this was soon changed to apply only to non-Jews, as a check, in the interests of the state religion, to Jewish proselytism. Before Caracalla's reign they were not fully privileged citizens, but "peregrini," and were not, it seems, eligible to public office, but occupied a position in some respects less, in others more, favorable than that of full Roman citizenship.

From the advent of Constantine, Jewish rights became more and more limited, and their disabilities increased. The state became Christian in character, and legislation in support of the state Church and in opposition to the Jews, who would not accept the new religion, became common. The thought that Jews might lawfully give orders to Christians became hateful to the latter, and hence, beginning in 404, it was decided that Jews could not hold public office. Their judicial autonomy was also reduced. The law sought to prevent the Jews from spreading their religion

to the detriment of Christianity, by forbidding, under heavy penalties, the building of new synagogues; it forbade a Jew to marry a Christian woman, to convert free Christians, or to keep Christian slaves. The law also endeavored to encourage conversion from Judaism, particularly offensive being provisions forbidding Jewish parents to disinherit, in whole or in part, their converted children. Intercourse between Jew and Christian was also discouraged by law. Jews and heretics were made incompetent to testify against Christians, and offensive special Jewish oaths were prescribed.

In Teutonic lands Jews came to be regarded, in theory at least, as aliens outside the law of the various nations among whom they lived, and as such were entitled only to those rights which the king, by special grant, might choose to confer upon them, individually or collectively. Without such grants they were outside the law. No "Wehrgeld" could be exacted from the slayer when they were unlawfully killed, and the king could at any time lawfully appropriate their possessions. Accordingly they acquired from time to time special grants from the crown, some of which, dating back to the era of Charlemagne, have been handed down to us. In these, as a matter of favor merely, or in return for a consideration, they acquired rights which, in certain particulars, might be greater or less than those enjoyed by their non-Jewish compatriots. The practical application of the theory which denied to Jews all rights except such as the crown chose to confer upon them, is forcibly illustrated throughout the Middle Ages in the cancelation of debts owing to Jews without the consent of the creditors. Not only were the Jews the *servi camerae* of the emperor, but the rights over them of lesser princes and overlords became generally recognized when the emperors began to convey their own rights over the Jews to their vassals, in this way depriving the Jews of their principal protector. These lesser lords granted, withdrew, or withheld privileges at will.

It is, moreover, important to note that historical and economic conditions combined in the Middle Ages to curtail or to remove entirely any Jewish privileges or immunities which exceeded those enjoyed by non-Jews, the same causes frequently leading to extensions of their disabilities.

These conditions were largely due to the Crusades, which stimulated religious animosities and led to numerous popular anti-Jewish outbursts and even to massacres. The power of the crown, as against its greater vassals, becoming weaker, the Jews were also deprived of potential protectors against economic jealousy and mob violence. The economic conditions in question were due to the rise, after the pioneer work of the Jew had been performed, of rival traders, who organized themselves for self-protection into municipal corporations and trade-gilds, and secured anti-Jewish decrees when they were economically advanced enough to dispense, wholly or partially, with Jewish aid (see Roscher, "Die Juden im Mittelalter, Betrachtet vom Standpunkt der Allgemeinen Handelspolitik"). These decrees, in a measure at least, led to the exclusion of Jews from various industries and trades, the

list of excluded occupations varying in different communities, and being determined largely by the political influence of various non-Jewish competing interests. Frequently all occupations were barred against Jews, except money-lending and peddling—even these at times being prohibited. The number of Jews or Jewish families permitted to reside in different places was limited; they were concentrated in ghettos, and were not allowed to own land; and they were subjected to discriminatory taxes on entering cities or districts other than their own (see POLL-TAX).

With the acceptance of more modern economic ideas many of these restrictions disappeared. Holland led the way in abolishing Jewish disabilities, and England followed next, though both were more liberal in their treatment of the Jews in their American possessions than they were toward those at home. Germany and France took steps in the same direction even before the French Revolution, though that great movement, as well as its American predecessor, accelerated Jewish emancipation throughout the European continent. The oppressive and comprehensive character of Jewish disabilities as they existed in Europe as late as 1781 are ably described by Dohm in his "Ueber die Bürgerliche Verbesserung der Juden," pp. 6-12:

"In view of the energetic efforts of the nations to increase their population, it is strange that in most states an exception is still made with respect to a particular class of men. In nearly all the states of Europe the policy of the law and of the whole constitution of the state is directed to preventing as far as possible the increase in number of those unfortunate fugitives from Asia—the Jews. In several states their sojourn has been totally prohibited, and residence for a brief time (often for a night only) is permitted on condition of certain payments, and only to travelers enjoying privileges from the overlord. In most of the other states, the Jews have been received under the most burdensome conditions, not as citizens, but as inhabitants and dependents. The law generally permits that only a specified number of Jewish families shall settle in a country, and this permission is commonly limited to particular places and must be purchased from time to time by the payment of a considerable sum of money. In very many countries the possession of a fortune is an essential prerequisite for securing this necessary license. A large number of Jews find, accordingly, the portals of every city closed to them, are inhumanly turned back at every boundary, and nothing remains for them to do but to starve, or to still their hunger by the aid of crime. If a Jewish father have several sons, he will probably be able to relinquish to only one of them the license to sojourn in the country of his birth; the rest he is obliged to send away with a portion into foreign territory, where they must struggle with equal disabilities. Concerning his daughters, the question arises whether he will be fortunate enough to establish them in one of the families of his native place. Seldom, therefore, can a Jewish father enjoy the happiness of living among his children and grandchildren, or of establishing the fortunes of his family in a permanent manner. For even the wealthy are compelled to constantly divide their fortunes through the necessary separation from their children and the expense of their establishment in different places. If a Jew has acquired permission to remain in a country, he is obliged to repurchase the same annually by heavy payments; he is not permitted to marry without special permission, subject to peculiar conditions and heavy charges; every child increases the size of his tax, and almost all his dealings are thus affected. In every occupation in life the laws are directed against him with utmost rigor, and the mild treatment accorded to those among whom he is living makes his lot seem all the harsher. Besides all these varied imposts, the Jew's means of livelihood are restricted to the utmost. He is absolutely debarred from the honor of serving the state; the prime pursuit, agriculture, is closed to him, and scarcely anywhere may he own landed property in his own name. A guild would regard itself as disgraced if it received one of the circumcised into its membership, and for that reason

the Jew is wholly excluded in almost every land from manual and mechanical pursuits. But seldom, among so many disabilities, can sufficient courage and zeal be found surviving—so seldom that, in considering the whole race, individual cases should be wholly disregarded—to undertake the pursuit of the fine arts and of science, of which only geometry, natural science, and medicine remain open to the Hebrew as a means of livelihood. Even those few men who succeed in attaining a high rank in science and art, as well as those who confer honor upon mankind through unblemished righteousness of conduct, can acquire the esteem of but few noble beings; among the mighty ones even supreme merit of mind and heart is canceled by that unpardonable fault—the fault of being a Jew. For this unfortunate being, who is countryless, whose activities are everywhere circumscribed, who is nowhere permitted to exercise his talents untrammelled, in whose virtue no one places credence, for whom scarcely one attainable distinction exists—for him no path leads to the enjoyment of a dignified and independent existence, or even to self-support, other than the path of trade. But here also discriminatory limitations and imposts beset him, and but few of this people have sufficient property to engage in whole-sale trade. They are, therefore, mostly confined to a petty retail trade, in which only the constant duplication of small profits suffices to sustain a needy existence; or they are compelled to lend to others the money they can not employ themselves. But in what numerous ways is even this sole remaining pursuit restricted in nearly every country! Many kinds of trade are wholly closed to them; others are open only under legislative regulations concerning time, place, and person; the permitted trades are beset by so many imposts, hampered by so many investigations, and dependent on the caprices of so many petty officials, that the earnings of Jews are extremely small, and can attract only such as are accustomed to the most miserable existence. When in former days, because of such restrictions upon his own employment of his own property, it became necessary for the Jew to lend it to others, it was seen fit to declare such practise—which must, however, be regarded as the most natural consequence of these restrictions—as illegal; and to-day, also, lending money upon interest is scarcely regarded as an honest business. . . . And notwithstanding the fact that the lending of money has been forced upon the Jew, the law almost always favors the debtor, and the latter is compelled by his necessities only too often to drive the Jewish creditor to a violation of the law, and thus to expose him to incessant penalties."

As regards the present disabilities in Russia and Rumania, Leroy-Beaulieu says: "It is widely believed that almost all the Jews in the world, at any rate all European Jews, enjoy civil liberty and equality. This is a mistake. The Israelites who enjoy the rights of citizenship are probably still in the minority. A large number of the descendants of Abraham are still subject to special laws. There remain in Europe but two states (other than Spain and Portugal) which refuse to grant to the Jews the rights accorded to the Christians; but these two states, Russia and Rumania, contain more Jews than all the rest of Europe together. One of them, the Russian empire, holds perhaps fully one-half of all the Jews in the world" ("Israël Chez les Nations," pp. 4, 5). For detailed account of disabilities in Russia see RUSSIA.

G. *

—In Mohammedan Countries: The basis of Mohammedan legislation concerning Jews was, and still is, in some countries, the group of laws known as the "Pact of Omar," attributed to Omar, the second calif. In taking Jerusalem he is said to have granted protection to the capitulating Christians under certain conditions, which were extended to Jews. The main points of these conditions, according to later Arabic writers, were: that they should not build new houses of worship nor restore the old

ones; that they should admit the followers of Islam to their places of worship; that they should not pray aloud; that they should not teach their children the Koran; that they should entertain a traveling Mohammedan for three days; that they should not harbor a spy; that they should not hinder any one from embracing Islam; that they should show respect to Mohammedans whenever they met them; that their houses should not overtop the dwellings of the Mohammedans; that they should wear a distinct dress; that they should not drink wine in public, nor carry weapons, nor ride on horseback, nor make use of a signet-ring with Arabic inscriptions; that they should pay a poll-tax; that they could not hold public offices, nor have intercourse with Mohammedan women.

It is a matter of doubt whether all of these laws were enacted by Omar; for his subsequent bestowal of privileges upon the Babylonian Jews would have been an act of inconsistency which a man of his character would be very unlikely to commit. However that may have been, there is no trace of the enforcement of these enactments until Omar II. (717-720). This calif passed several restrictive laws similar to those contained in the "Pact of Omar." Only two califs of the Abbassid dynasty, Harun al-Rashid (786-809) and Mutawakkil (847-861), are known to have been guided by these laws with regard to both Jews and Christians, the former calif enforcing them partially, and the latter to their full extent. In Egypt, under the dynasty of the Fatimites, only Al-Hakim (996-1021) enforced them; he, however, not only enforced, but greatly amplified them. In Spain and Africa it was not until the time of the Almoravides that their observance became general. The last Mohammedan government to enforce, and the first to repeal, the "Pact of Omar" was the Sublime Porte.

Until the end of the seventeenth century the legal disabilities of the Jews in Turkey were but few.

They began to multiply only under

Dis- Mustafa II. (1695-1703), who compelled the Jews to wear black shoes

Turkey. and hats, in contrast to the yellow shoes and red head-gear of their Mohammedan compatriots. The testimony of Jews was not valid, and they were allowed to dwell only in specified districts. Residence in Jerusalem was practically rendered impossible by heavy taxes, which only the richest Jews were able to pay. Similar legislation prevailed in the Turkish possessions of Algeria and Tunis, where residence in certain cities, such as Kairwan, Hammamet, and Tunis, was forbidden to Jews. They were compelled to dress in black, and among other restrictions were forbidden the use of lanterns in the street. In passing before a mosque they had to take off their shoes.

The abolition of Jewish legal disabilities in Turkey was effected by 'Abd al-Majid in 1840; in Algeria, when it was conquered by France; in Tunis,

In 1857, when the bey was compelled to emancipate them. Morocco and Persia

Morocco. are now the only Mohammedan countries where Jews are still subject to barbarous discriminating legislation. Not only was the "Pact of Omar" adopted in these countries, but

it was used as a basis for new laws for the degradation of the Jews, who thereby became the prey of the mob and of every petty official. The following is a list of the principal disabilities still in force in Morocco: Where Mohammedans are concerned the testimony of a Jew is invalid. Jews can not reside outside the mellahs. They are not allowed to ride through any part of the town outside the mellah, on leaving which they are compelled to walk barefoot and to remove their head-dress. They are not allowed to carry a walking-stick, but the elderly and sick are permitted to use reeds as supports. In Moorish districts the Jew is not allowed to use the foot-paths, but must confine himself to the rougher parts of the highways. He is bound to pass the Moor on the left hand, and if he fail to do so he must retrace his steps. They are not allowed to build houses above a certain height, nor to own property outside the mellah. They are debarred from possessing stores or booths in the Moorish quarters. When government granaries or warehouses are overstocked, or their contents damaged, the Jews are forced to buy at the normal price of undamaged goods. Jews, with their wives and daughters, are compelled to work for any government official whenever ordered, even on Sabbaths and festivals, and to receive payment far below the market rates. They are compelled to do the work which the Moors refuse as degrading—cleaning sewers, carrying away carcasses from government stables, etc. When the heads of rebels or of criminals are to be exposed at the town gate, the Jews are made to salt them before they are exhibited. Jewish purveyors (butchers, grocers, bakers, etc.) are compelled to supply various functionaries gratuitously. A Jew can not appoint a Jewish attorney to plead before the *qadi* against a Moor. Neither is he allowed to act as attorney for a Moor.

Jews are not allowed to follow any of the liberal professions, and are disqualified for public offices or employments. They are required to wear a special costume, consisting of a black skull-cap and black shoes, and are not allowed to adopt any attire that might lead one to mistake them for Moors. They are not allowed to use the public baths, and are even denied the use of baths in the mellah; are not allowed to drink from the public fountains in Moorish quarters, nor to take water therefrom; and are not allowed to carry arms. A Jew's evidence is not admitted in a court of justice. A Jew's life, if taken by a Moor, is compensated by the payment of a sum equal to \$300.

A Jew condemned to imprisonment or to flogging must pay the fees of all officials concerned in his punishment. In the prisons and jails they are not allowed the use of the common rooms, but are invariably confined in privies, or the like. If a Jew is suspected of immoral intercourse with a Moorish woman (though she be a prostitute), he is liable to imprisonment for an indefinite period. If he confesses, even under torture, or if a witness establish the charge, he is punished by death. If Moors choose to assert that a Jew has abjured his faith, he is compelled to become a Moslem; and should he afterward attempt to conform to the Jewish ritual, he would be liable to be stoned or burned to death.

Almost all these disabilities are in force in Persia also. They have lately increased to such a degree in provinces distant from the capital, where the officials are not hindered from Jew-baiting by the protests of the ambassadors of European powers, that living under them is well-nigh impossible. As a specimen of these laws, the following, effective in Hamadan in 1892, may suffice: Jews may not leave their houses on rainy or snowy days (rain and snow are considered by Mohammedans as conductors of uncleanness). Jewish women are not allowed to show themselves in public places with their faces veiled. Their "izar" (cloak) must be of two colors. Jews are limited to blue cotton clothing. They are not allowed to wear comfortable shoes. Every Jew is compelled to wear a piece of red cloth on his breast. A Jew must not precede a Moslem in public places, neither may he speak to him in a loud voice. A Jewish creditor must prefer his claim to a Mohammedan debtor in a respectful manner. A Jew insulted by a Moslem must bow his head in silence. A Jew buying meat must keep it covered from the sight of Moslems. Jews are forbidden to erect good buildings; neither may their houses overtop those of their Moslem neighbors. They may not calcimine their rooms. The entrances of their houses must be low. They must not wrap themselves in their cloaks, but must be content with wearing them rolled back under their arms. They are forbidden to cut their beards. They are not allowed to leave town nor to walk in the environs. Jewish physicians are not allowed to ride on horses. A Jew suspected of having recently drunk brandy is not allowed in the streets; otherwise he is liable to the punishment of death. Jewish weddings must be celebrated secretly. Jews are not allowed to eat undamaged fruit.

DISINTERMENT: The act of exhumation, or taking out of the earth or the grave. The removal of dead bodies from one place of burial to another has been a subject of controversy among Jewish authorities, and in recent times has become a cause of litigation in the secular courts. In cases where the relatives desired to transfer their dead to a place designed to serve as the family plot, representative

leaders of Orthodox Judaism have forbidden the removal, while other rabbis have claimed that, according to the Jewish code of law, such procedure was not only permissible, but in a certain sense actually desirable. See **BURIAL**.

The question hinges upon the interpretation of the halakic rule which says: "It is unlawful to remove the body or the remnants of bones from one place to another, whether from an honorable place to an equally honorable one, or from a lowly place to one equally lowly, or even from a lowly place to an honorable one, not to speak of the reverse. It is, however, permissible to remove the same if the dead is to be reinterred among his own; for it is pleasant for a man to repose alongside of his fathers" (Shulhan 'Aruk, Yoreh De'ah, 362, 1, based upon Yer. M. K. ii. 81b; Massek. Semahot xiii.; Kol Bo cxiv.). Those rabbis who forbid the transfer of a body to unoccupied ground intended to serve as the family plot base their prohibition on the expression "ezel abotaw" (alongside of his fathers); insisting on the occupancy of the place by the remains of relatives who had died previously, and excluding, therefore, a case where a family plot is to be initiated by the burial of the body to be disinterred. They claim that the desire for repose among one's own is supposed to be cherished only with reference to past generations and not with reference to future ones.

Those who favor removal in such a case take the words "it is pleasant for a man to repose alongside of his fathers" in a larger sense, conveying the idea that to be buried in a family plot is presumably desirable to any man, and it matters not whether the family plot has been already brought into use or is to be consecrated for future time. In corroboration of this view they refer to the fact that the older Baraita in Massek. Semahot *l.c.*, as well as the Kol Bo, makes no mention of "alongside of his fathers"; the former simply stating as the reason that "it is conferring an honor upon the dead" ("she-zeh hu kebodo").

R. Moses Sofer, in a responsum ("Hatam Sofer," vi. 37), permits disinterment, and calls it a meritorious act in case it was the wish of the dead to be buried in the burial-place of his fathers; he refers to Mak. 11a, a passage which, however, implies the occupancy of the ground by the remains of relatives who had died previously.

In the case of Cohn versus the Shearith Israel congregation of New York, which came before the New York courts and was discussed

Cohn vs. Shearith Israel. in "The American Hebrew" and "Jewish Exponent" for March and April, 1902, Dr. H. P. Mendes, rabbi of the Shearith Israel congregation, opposed the grant by the court of a permit for disinterment, and sustained his opposition by responsa from Dr. H. Adler, chief rabbi of the United Hebrew Congregations of the British empire; Dr. Gaster, chief rabbi of the Spanish and Portuguese Jews of England; Dr. Klein, rabbi of the First Hungarian Congregation of New York; Dr. B. Drachman, rabbi of Congregation Zichom Ephraim of New York; and Rev. M. De Sola, minister of the Spanish and Portuguese congregations, Montreal, Canada—all of

whom declared that remains interred in a cemetery may not be removed for the purpose of reinterment in another cemetery in a plot which has been secured since the death of the deceased in question.

On the other hand, Dr. K. Kohler, rabbi of Temple Beth-El, New York, when consulted as to the view of the authorities of traditional (Orthodox) Judaism, declared that, inasmuch as the law excepts from the prohibition of disinterment every case in which the removal is a benefit to the dead and would be presumably desired by him, the transfer of the body to a family plot to be consecrated is just as lawful as its transfer to a family plot already occupied; the spirit and not the literal meaning of the words "alongside of his fathers" being the essential point. The courts, however, sustained the Congregation Shearith Israel, and the application for a permit for disinterment, contrary to the cemetery regulations of the congregation, was refused.

DISKIN, JOSHUA LÖB BEN BENJAMIN: Russian rabbi; born at Grodno, Russia, Dec. 10, 1818; died at Jerusalem Jan. 22, 1898. At thirteen he married Sarah, the daughter of a good family of Volkovisk, known later as "Die Brisker Rebitzin." Diskin obtained a rabbi's diploma at eighteen, and seven years later succeeded his father as rabbi of Lomza. He was successively rabbi at Meseritz, Minsk, Kovno, Sklow, and Brest-Litovsk, whence he was called "Der Brisker Rov." A profound and thorough student, he became a recognized authority on rabbinical law, his admirers comparing him to Akiba Eger. He was, if not aggressive, fearless when once convinced that a thing was right. Thus, when rabbi of Kovno, he insisted upon the dismissal of a meat-tax collector. The Russian government, however, did not share his views, but ordered him to leave the town within forty-eight hours. Again, in 1877, the last year of his rabbinical office at Brest-Litovsk, he gave a legacy decision against the civil authorities. Compelled again to leave the town, Diskin decided upon settling at Jerusalem. There, too, he became a center of controversy by forbidding in 1889, a Sabbatical year, the cultivation of land in Palestine, though several Russian rabbis, among whom was Isaac Elhanan Spector, had decided to the contrary. The statement that Diskin was opposed to colonization in Palestine is not correct; he was not opposed to those who went with sufficient capital to buy and till land. A tireless champion of Orthodox Judaism, he endeavored to counteract the influence of Jewish reformers and English missionaries. He founded at Jerusalem an orphan asylum in opposition to a similar institution established by the liberal Jews, prohibited the use of the English missionary hospital, and refused Jewish burial to patients who died there. He also founded the yeshibah Ohel Mosheh.

Diskin was once accused of having been guilty of actions unbecoming a rabbi, but the charges were groundless. The very men who had been accustomed to visit him, and in whom he had the greatest confidence, committed the deeds with which he was

charged. It should be said, furthermore, that his wife was prominent in all the struggles between him and his adversaries.

DISNA: Town in the government of Wilna, Russia. According to the census of 1897, it has a population of 6,739, about 5,600 being Jews. Most of these are traders. About 265 persons are employed as day-laborers. Truck-farming gives occupation to 8 families, working on 5 deciatines of rented land. About 437 deciatines in the vicinity of the town are owned and cultivated by Jews. There are the usual charitable institutions, and a Jewish public school for boys and girls, with a register of 170 pupils.

H. R.

S. J.

DISPECK, DAVID BEN JOEL: Talmudic scholar and homilist; born about the year 1744. He studied in the yeshibah under Joshua Cohen, among his companions being Joseph Steinhart and Jacob BERLIN. Later he was named dayyan of Fürth, and in 1771 he became rabbi of Mering (Bavaria) and the Schwarzwald. In 1778 he was invited to direct the yeshibah of Metz, and finally, in 1785, he became rabbi of Beyersdorf and Baireuth. At Beyersdorf he collected his homilies into one book, entitled "Pardes Dawid" (The Garden of David), and arranged in the order of the parashiyyot. Besides the homilies the book contains 365 solutions of difficult passages in Maimonides' "Yad ha-Hazakah" (Sulzbach, 1786). A responsum of his is found in Jacob Berlin's "Be'er Ya'akov," ch. xiv., § 117.

DISPUTATIONS (ויכוחים): Public debates on religious subjects between Jews and non-Jews. Religious differences have at all times induced serious-minded men to exchange their views in order to win opponents over to their own side by appeals to reason. Abraham is represented in the Midrash as holding a religious debate with Nimrod (see *Jew. Encyc.* i. 86). In Alexandria disputations between Jews and pagans were probably quite frequent. The first actual disputation before a worldly ruler took place at Alexandria about 150 B.C., under Ptolemy Philometor, between Andronicus ben Messalam (Meshullam), the Judean, and Sabbeus and Dositheus (Theodosius), Samaritans, with reference to the Scripture text which the Samaritans claimed had been omitted by the Jews in the Septuagint translations (Grätz, "Gesch." iii. 44, 650; compare Josephus, "Ant." xiii. 3, § 4). In the time of the emperor Caligula the first disputation between Jews and pagans before a ruling monarch took place at Rome, the erection of statues of Caligula in the synagogues of Alexandria having caused the Jews to send a deputation under Philo to the emperor, while the anti-Jewish party sent a deputation under Apion. It was typical of all later disputations, inasmuch as the defeat of the Jews was a foregone conclusion. Some of Philo's arguments are probably

preserved in part in his "Legatio ad Caium" (§§ 20-45). Papyri fragments discovered in recent years contain records of disputations held before Claudius and a later emperor ("Rev. Et. Juives," xxxvii. 218-223; Schürer, "Gesch." 3d ed., i. 65-70).

In 'Ab. Zarah iv. 7 and Baraita 'Ab. Zarah 54b is recorded a disputation held in Rome between pagan sages (פילוסופין) and four Jewish elders, whom Grätz properly identifies with Gamaliel II., Eleazar b. Azariah, Joshua b. Hananiah, and Akiba, who went to Rome to have Domitian's decree against the Jews withdrawn (Grätz, "Gesch." 3d ed., iv. 110). The following was the dialogue: "If your God hates idolatry, why, being omnipotent, does He not destroy it?" "Shall sun, moon, and stars, without which the world can not exist, be destroyed on account of the fools that worship them?" "But why are not other idols which are of no consequence destroyed?" "As well

Between the soil, or a child conceived in adul-
Jews and tery not be born. No; the world goes
Romans. on in its prescribed course, and the transgressors shall meet their retribution" (compare Bacher, "Ag. Tan." i. 84). According to Eccl. R. i. 9, R. Meir was delegated to represent the Jews at a public disputation with the government in Rome, the boar (חזיר), as the Roman emblem, being made the subject of the debate (compare Bacher, *l.c.* ii. 35 *et seq.*). R. Meir also had disputes with the Samaritans (Gen. R. iv.; Bacher, *l.c.* pp. 32 *et seq.*).

Of an altogether different nature were the disputations between Jews and Christians. At first these were bitter and sarcastic in tone, but, like quarrels between members of one household, harmless in their consequences. As they turned chiefly on Scripture interpretations, the Jew easily obtained the victory over his less skilled adversary.

Between A number are recorded in the
Jews and Talmud and Midrash between Chris-
Christians. tians called "minim" (heretics) or philosophers and R. Gamaliel II. (Yeb. 102b; Midr. Teh. to Ps. x.; Ex. R. xxx.; see Derenbourg, "Hist." 1867, p. 357; Bacher, *l.c.* i. 87) and R. Joshua b. Hananiah (Hag. 5b; see Bacher, *l.c.* i. 176). How prominent these disputations were in the early days of Christianity is shown by the number of fictitious dialogues written by Christians for apologetic purposes, and mainly copied one from the other, with references to the same Scriptural passages, and all of them ending in the same way: the Jew, who seldom knows how to answer, finally yields and embraces Christianity (see Origen, "Contra Celsum," iv. 52, where the disputation between Papiscus the Jew and Jason is referred to; Harnack, in "Texte und Untersuchungen," i. 1-3; Conybeare, "The Dialogues of Athanasius and Zaccheus and of Timothy and Aquila," Oxford, 1898; McGiffert, "A Dialogue Between a Christian and a Jew, Entitled 'Αντιβολή Παπίσκου καὶ Φιζωνος Ἰουδαίου πρὸς Μοναχόν τινα," New York, 1889). Most valuable as a characteristic example of such a disputation is Justin Martyr's "Dialogue with Tryphon the Jew." The author, who frequently calls himself "philosopher," took the famous R. Tarfon (also pronounced, probably, "Tryphon": Derenbourg, *l.c.* p. 376;

Grätz, *l.c.* iv. 58), noted for his fierce opposition to the Christian sect (Shab. 116a), as a typical representative of Jewish teaching, putting into his mouth rabbinical arguments for the sake of refuting them (see M. Friedländer, "Patristische und Talmudische Studien," pp. 20 *et seq.*, 80-137, Vienna, 1878; Goldfahn, "Justinus Martyr und die Agada," in "Monatsschrift," 1873, pp. 49, 104, 145, 194, 257). Often the Jew was horrified at the identification of "Christ" with the "Divine Shekinah," and termed it "blasphemy" (Friedländer, *l.c.* pp. 62 *et seq.*); and as the arguments taken from Gen. i. 26, and similar expressions regarding the Deity used in Scripture, were ever reiterated by these troublesome "heretics," he found these disputations "full of weariness" (Eccl. R. i. 9; compare Sanh. 38b, 105b; Yer. Ber. ix. 12d; Friedländer, *l.c.* pp. 62, 82). In the course of time, however, polemics became a fine art with some of the rabbis, Caesarea, a place where Christians and Jews constantly met, being the chief school of controversy (Bacher, "Ag. Pal. Amor." i. 92). R. Simlai and R. Abahu were known as keen debaters (Bacher, *l.c.* i. 555, ii. 115). On the fictitious disputation in Rome between Pope Sylvester (314-335) and twelve Pharisaic doctors before the emperor Constantine, see Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Italien," 1884, pp. 39, 295.

Learned disputations of a harmless nature took place frequently in Italy, and a controversial Jewish literature sprang up in the thirteenth century (see Güdemann, *l.c.* pp. 12, 24, 37, 39, 230) with the declared object of defending the truth without giving offense to the Christian Church (see POLEMICAL LITERATURE). Quite different was the tone of the disputations introduced in the Byzantine empire. Here Basil I., about 880, instituted such disputations, and the Jews

In tuted such disputations, and the Jews
the Middle were to be forced either to admit or
Ages. to disprove "that Jesus is the culmination of the Law and the Prophets" (Grätz, *l.c.* v. 229), the result being generally expulsion and persecution. In the West, Jews and Christians disputed freely and on terms of mutual good-will in spite of occasional hostile attacks (see "Rev. Et. Juives," v. 238 *et seq.*). The impression prevailed among Christians that they were no match for the learned and witty Jews, while the latter frequently challenged the former, openly and frankly criticizing the dogmas of the Church. Among these NATHAN L'OFFICIAL and his son in France obtained about the close of the twelfth century great renown as bold and skilful debaters, and the disputes they had with popes, archbishops, and other prelates have been partly preserved (Grätz, *l.c.* vi. 143, 366; Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Frankreich und Deutschland," 1880, pp. 18, 140 *et seq.*).

It was only after Pope Innocent III. had infused the spirit of the Inquisition into Christendom, and the Dominicans had begun their warfare against every dissenter, that the disputations became associated with relentless persecution of the Jewish faith. Being turned into great spectacles by the presence of the dignitaries of Church and state—mock controversial tournaments in which the Jews were bound

to suffer defeat—they became a direct menace to the literature and the very lives of the Jews. In order

to secure to the Church the semblance of a victory, Jewish apostates lent themselves to the task of bringing malicious charges against their former coreligionists, supporting these by ferreting out every weak and ambiguous point in the Talmud or the Jewish liturgy that might be construed as a "blasphemy" or as defamation of Jesus and Christian dogma.

The first of these famous disputations took place at the royal court of Louis IX. in Paris June 25–27, 1240, in the presence of the queen - mother Blanche and the prelates of Paris, the rabbis Jehiel of Paris, Moses of Coucy, Judah ben David of Melun, and Samuel ben Solomon of Châteaun-Thierry being ranged against Nicholas Donin, the Jewish apostate. The four rabbis were to defend the Talmud against the accusations of Donin, turning mainly upon two points: that the Talmud contains immoral sentiments and blasphemous expressions against the Deity, and that it speaks in an offensive manner of Jesus. R. Jehiel, timid at first, was encouraged by the

assurance of protection by the queen, and succeeded in refuting Donin's charges by proving that Jesus, the son of Panthera, can not be the Jesus of the New Testament; that the term "goy" in the Talmud does not refer to Christians; and that the MINIM who are made an object of execration in the Jewish liturgy are not born Christians, but only born Jews who have become sectaries or heretics. R. Jehiel's defense, however successful for the moment, did not save twenty-four cartloads of copies of the Talmud from

being consigned to the flames two years later in Paris (see Levin in "Monatsschrift," 1869, pp. 97 *et seq.*; Grätz, *l.c.* vii. 401; Loeb, in "Rev. Et. Juives," i. 247, ii. 248, iii. 39).

The second disputation took place at Barcelona on July 20, 1263, at the royal palace, in the presence of James I. of Aragon and his court, and of many prominent ecclesiastics and knights, between NAHMANIDES and Pablo CHRISTIANI, who, like Donin, was the accuser and the instigator. The debate turned on the questions whether the Messiah had appeared or not; whether, according to Scripture, the Messiah is a divine or a human being; and whether the Jews or the Christians held the true faith.

Differing from R. Jehiel of Paris, Nahmanides met his antagonist with fearless courage and with the dignity of a true Spaniard; and when Pablo undertook to prove from various haggadic passages the Messianic character of Jesus, Nahmanides frankly stated that he did not believe in all the haggadic passages of the Talmud, and he went so far as to declare that he had more regard for the Christian monarch than for the Messiah. As to the question whether the Messiah had come or

DISPUTATION BETWEEN JEWISH AND CHRISTIAN THEOLOGISTS.
(From Peter Schwarz, "Der Stern Messiah," 1477.)

not, he could not believe that he had come as long as the promised cessation of all warfare had not been realized. It was a triumph for the Jewish cause, yet all the more did both the Jewish and the Christian friends of Nahmanides warn him against the peril threatening his brethren from the terrible power of the Dominicans in case of defeat, and so, at his own request, the disputation was interrupted on the fourth day. But the enemies of the Jews were not set at rest. They claimed the victory, and when Nahma-

nides published the frank statements he had made, the king, who had dismissed him with presents and with expressions of his regard, could no longer protect him, and he had to leave the country. Again the Talmud was made the object of attack; but this time, instead of the whole Talmud being proscribed or burned, only the offending passages were singled out for erasure by a censorial committee appointed by the king (see Grätz, *l.c.* vii. 121-124).

Of literary rather than of historical importance are the public disputations held at Burgos and Avila in 1375 by Moses Cohen de Tordesillas with the apostates John of Valladolid and Abner of Burgos, and that held about the same time in Pampluna by Shem-Tob ben Isaac Shaprut of Tudela with Cardinal Don Pedro de Luna, afterward Pope Benedict XIII., the disputations being made the subjects of the books "Ezer ha-Emunah" (by Moses) and "Eben Bo-han" (by Shem-Tob; see POLEMICS AND POLEMICAL LITERATURE).

The most remarkable disputation in Jewish history, for the pomp and splendor accompanying it, the time it lasted, and the number of Jews that took part therein, is the one held at the summons of the anti-pope Benedict XIII. in Tortosa. It began in Feb., 1413, and ended Nov., 1414, and was presided over by the pope in state, surrounded by the cardinals and dignitaries of the Church who still retained allegiance to him, while hundreds of monks and knights and men of all degrees were among the audience. Joshua Lorqui (Geronimo de Santa Fé), the

apostate, was to prove from the Talmud that Jesus was the Messiah, and the twenty-two most distinguished rabbis and scholars of the kingdom of Aragon had the choice of refuting his arguments or—and this was the scarcely concealed purpose of the pope, anxious to regain power and prestige through the conversion of the Jews of Spain—espousing the Christian faith. To judge from the fragmentary records, there was no great erudition or acumen displayed either by the aggressor, who dwelt on a few haggadic passages concerning the Messiah, or by the defenders, who no longer possessed the courage and self-confidence shown by Nahmanides. The sixty-nine sessions passed without any other result than that neither the blandish-

ments nor the threats of the pope, nor the fierce attack on the Talmud made by Lorqui, the pope's physician and chief adviser, could induce the Jews to become traitors to their heritage. A papal bull (May, 1415) of eleven clauses, forbidding the study of the Talmud and inflicting all kinds of degradation upon the Jews, showed the spirit that had prompted the disputation (see Grätz, *l.c.* viii. 116, 406). Under James II. of Castile, about 1430, Joseph ben Shem-Tob and Hayyim ibn Musa held frequent disputations with learned Christians at the court of Granada, but henceforth disputations became rare and of no historical importance.

Belonging to the class of friendly disputations (*ib.*

viii. 417, note 4) are those, whether authentic or embellished by legend, mentioned in Solomon ibn Verga's "Shebet Yehudah": (1) Between Don Joseph ibn Yahya and King Alfonso V. of Portugal, (a) concerning Jesus' miraculous powers; (b) regarding the perpetual character of the Mosaic law; (c) as to the efficacy of the prayer of a non-Jew; (d) whether the hosts of angels are numerable or infinite; (e) why sorcery, being based on error, is so severely punished in Scripture. (2) Between three Jewish artisans taken from the street, and Don Joseph ibn Benveniste ha-Levi with Alfonso XI. of Castile, (a) on the qualities of God; (b) on the distance between earth and heaven; (c) on the sun's radiation of heat; (d) on the forbidden fat and blood of animals; (e) on the night's sleep; (f) on the immortality of the soul.

(3) Between Don Samuel Abrabalia and Don Solo-

mon ha-Levi and Pope Martin (Hebrew text has מרקי; see Grätz, *l.c.* viii. 128, note), (a) concerning the fierce words of Simon b. Yohai, "The best of the heathen deserves killing" (טוב Dis- שבניי הרון: Mek., Beshallah, i.; Yer. putations. Kid. iv. 66c; Massek., Soferim, xv. 9; see Müller's ed., note); (b) on Jer. l. 12 (Hebr.), "The end of the heathen is shame and desolation"; (c) on Simon b. Yohai's utterance, "You are called men, but the other nations are not called men" (B. M. 114b; Yeb. 61a; compare Lazarus, "Ethics of Judaism," i. 264, Philadelphia, 1900). (4) Between Don Pedro IV. of Aragon (1336-1387) and his physician, who, when asked why the Jews were not allowed to drink the wine touched by a Christian, had water brought to wash the king's

feet, of which he then drank to show that the fear of impurity was not the reason of the prohibition (Grätz, *l.c.* i. 12). (5) Between Don Abraham Benveniste, Don Joseph ha-Nasi (ben Abraham ibn Benveniste) and R. Samuel ibn Shoshan of Ecija, and Don Alfonso XI. on the social conduct of the Jews, their usury and avarice, their musical accomplishments, their luxury, the Jewish sages ascribing Jewish usury to Christian legislation; as regards the dishonest means by which the Jews were said to have obtained wealth, they remarked, "We Jews are treated like the mice: one mouse eats the cheese, and people say, 'The mice have done it.' For the wrong-doing of one the whole race is made responsible" (*ib.* viii. 25-27). (6) Between a Christian and a Jew, before Don Alfonso (V.?) of Portugal, on the Messianic passages in Ps. xxii., and on the hyperbolic haggadic passages in the Talmud. (7) The remarkable disputation of Ephraim ben (Don) Sango (Sancho? more probably identical with the famous poet Don Santo de Carrion; see "Orient, Lit." 1851, xii., though disputed by Kayserling, "Sephardim," p. 328, note) with Don Pedro IV. on the question, Which religion is the better, the Jewish or the Christian? the Jewish sage answering with the parable of the two precious jewels and the two sons, obviously the original of the parable of the three rings, taken from Boccaccio by Lessing for his "Nathan the Wise" (see Wünsche, in Lessing-Mendelssohn's "Gedenkbuch," 1879, pp. 329 *et seq.*). The story of a disputation on the question, Which is the best religion? is, however, very old. One is said to have taken place about 740, before Bulan, the king of the Chazars, who, uncertain whether to exchange his heathen religion, which he had come to abhor, for Mohammedanism or Christianity, summoned representatives of these two creeds, as well as of Judaism, for a disputation. None could convince him of the superiority of his faith, and Bulan resolved to espouse the Jewish, since both Christian and Mohammedan referred to it as the basis of their own, and each recognized it as superior to the others (see CHAZARS). Upon this story the religious disputations in Judah ha-Levi's "Cuzari" are based. The story of a disputation occurs in Russian legends regarding Vladimir's conversion, but with a different result (see Karamsin, "History of Russia," bk. i., ch. vii.).

In order to have a great spectacle to excite the passions of the ignorant masses, John Capistrano, the Franciscan Jew-baiter, arranged in 1450 a disputation at Rome with a certain Gamaliel called "Synagogæ Romanæ magister," but otherwise very little known (see Vogelstein and Rieger, "Gesch. der Juden in Rom," 1895, ii. 14). Disputations of a friendly character were held at the court of Ercole d'Este I. at Ferrara by Abraham FARISSOL with two learned monks, the one a Dominican, and the other a Franciscan, the matter of which is produced in Farissol's "Magen Abraham" and "Wikkuah ha-Dat" (see Grätz, *l.c.* ix. 45). In Germany it was the Jewish apostate Victor of CARBEN who, under the direction of Herrman, the Archbishop of Cologne, and in the presence of many courtiers, ecclesiastics, and

knights, held a disputation with some Jews of the Rhine provinces about 1500, accusing them of blasphemy against the Christian religion; the consequence of this disputation was that the Jews were expelled from the lower Rhine district (*ib.* lx. 70).

Quite different in tone and character were the disputations held by the Jews, both Rabbinites and Karaites, with Christians of various denominations in Poland at the close of the sixteenth century. Here the Jews, untrammelled by clerical or state despotism, freely criticized the various religious sects, and it was considered a difficult task for a Christian to convert a Jew (*ib.* ix. 456; see Isaac b. Abraham Troki). Occasionally disputations for conversionist purposes were arranged at German courts. One is reported to have taken place at the ducal court of Hanover, about 1700, in the presence of the duke, the dowager-duchess, the princes, clergy, and all the distinguished personages of the city, between Rabbi Joseph of Stadt-hagen and Eliezer Edzard, who had been the instigator of the disputation. It ended in the complete victory of the rabbi, who not only refuted all the arguments of his antagonist from Scripture and the Midrash, but under the full approval of the court declined to answer under oath the question as to which religion was the best. He said: "We condemn no creed based upon the belief in the Creator of heaven and earth. We believe what we have been taught; let the Christians adhere to what they have been taught" (Bloch in "Oesterreichische Wochenschrift," 1902, p. 785).

Regarding the disputations between the rabbis and the Frankists before Bishop Dembowski at Kamenetz in 1757, and before the canon Nikulski at Lemberg in 1759, see FRANK, JACOB. For others, see Steinschneider in "Monatsschrift," 1883, pp. 80 *et seq.*, and his "Uebersetzungen," pp. 305, 451.

K.

D'ISRAELI, BENJAMIN: 1. English merchant and financier; born in Venice Sept. 22, 1730; died at Stoke Newington, London, in 1816. He went to England in 1748, and settled there as a merchant, though he did not take out papers of denization till 1801.

Though a conforming Jew, and though contributing liberally toward the support of the synagogue, D'Israeli appears never to have cordially or intimately mixed with the community; only on one occasion did he serve in a minor office—that of inspector of charity schools in the year 1782.

2. Public notary in Dublin, Ireland, 1788-96; died at Beechey Park, county of Carlow, Aug. 9, 1814, and was buried in St. Peter's churchyard, Dublin.

BIBLIOGRAPHY: B. Disraeli, *Introduction to Isaac D'Israeli's Collected Works*, 1858; Picciotto, *Sketches of Anglo-Jewish History*; *Dict. National Biography*, s.v. *D'Israeli, Isaac*; *Jewish World*, April 22, 1881.

J.

G. L.

DISRAELI, BENJAMIN, EARL OF BEA-

CONSFIELD: English statesman; born at London, England, Dec. 21, 1804; died there April 19, 1881. The son of Isaac D'ISRAELI, he was descended from a wealthy Sephardic family of Venice, his grandfather having come to England to engage in commerce. He was educated at a private school, at which he used to "stand back" when Christian prayers were recited; but at the suggestion of the poet Rogers was baptized in 1817, immediately after the death of his grandfather, Benjamin D'Israeli. At the age of seventeen Disraeli was articled to Swain & Stevenson, solicitors, in the Old Jewry, and in 1824 entered Lincoln's Inn, but withdrew his name in 1831. At the age of twenty-two Disraeli wrote the novel "Vivian Grey," a political satire, and leaped into sudden notoriety. His health giving way, he spent the next three years traveling in the East. On this journey he visited Jerusalem, whence he derived the impressions which distinguish "Tancred," and probably those which afterward determined his philo-Turkish policy. Returning to England, he unsuccessfully contested High Wycombe (1834) and Taunton (1835). At Taunton he attacked the policy of O'Connell, the Irish patriot, who had written him a commendatory letter when he stood for Wycombe. O'Connell, replying, spoke of "the impenitent thief who died on the cross, and whose name, I verily believe, must have been Disraeli." Disraeli challenged the son of O'Connell to a duel on behalf of his father, but the affair came to nothing.

By this time Disraeli was well known. He had written in 1828 "The Infernal Marriage," "Ixion in Heaven," and "Popanilla," satirical burlesques. In 1836 his "Letters from Runnymede," directed against the government, caused considerable comment. Disraeli now mingled in the best society, though handicapped by a tendency to obtrude his personality. He adopted eccentricities of dress and opinion which nearly ruined his political prospects. Between 1831 and 1839 he wrote "The Young Duke," "Contarini Fleming," "The Wondrous Tale

of Alroy"—the only novel by him dealing entirely with a Jewish subject (see **ALROY**)—"The Rise of Iskander," "Vindication of the British Constitution," "The Revolutionary Epic," "Venetia," "Henrietta Temple," and "The Tragedy of Count Alarcos."

On the dissolution of 1837 Disraeli was returned for Maidstone with Mr. Wyndham Lewis. Disraeli's first speech in the House of Commons was a fiasco. His extraordinary appearance, his theatrical deliv-

ery, and above all the enmity of the O'Connell faction robbed him of the leniency usually shown to the maiden speeches of new members, and he was not allowed to finish; he sat down with the memorable prediction that the time would come when they would hear him. Sir Robert Peel, however, by no means acquiesced in the adverse judgment. In 1839 Disraeli married Mrs. Wyndham Lewis, the widow of his late colleague, and was thenceforth free from pecuniary cares. He now purchased the country estate of Hughenden, and in 1841 was returned for Shrewsbury as a follower of Peel. The alliance did not last long. Peel gradually turned toward free trade, though his party had been elected pledged to protection, Disraeli becoming the spokesman of the malcontents. About this time he published two remarkable novels, "Coningsby" and "Sybil." The main idea of "Coningsby" was that the crown, released by the Reform Bill from an aristocracy which had usurped its functions, might regain its sus-

pended powers, and thus solve many of the difficulties of the time. But "Coningsby" contains more than that. The most impressive character

Views on in the book is Sidonia, a Jew of im-
Judaism. mense wealth, through whom Disraeli expounds many of his views.

Disraeli was proud of his Hebrew descent. He regarded Christianity as developed Judaism. "One half the world worships a Jew and the other half a Jewess," he said. Disraeli classed the Jews among the Caucasian nations, and claimed that no amount of persecution could destroy an unmixed and splendidly organized race. The Jews, he claimed, were

(After the painting by Sir J. E. Millais.)

the aristocracy of nature. Disraeli did not plead for toleration, but for the admission of Jews to full privileges on account of their especial merits. "If the Jews had not prevailed upon the Romans to crucify our Lord, what would have become of the Atonement?" he asks in "Tancred." In "Coningsby" Sidonia says: "The Jews, independently of the capital qualities for citizenship which they possess, are a race essentially monarchical, deeply religious, and essentially Tories. The fact is, you can not crush a pure race of Caucasian organization. It is a physiological fact, a simple law of nature, which has baffled Egyptian and Assyrian kings, Roman emperors, and Christian inquisitors." He then remarks that the Jews lead all the intellectual movements in Europe, monopolize professorial chairs, and enter into political affairs. He, however, makes the blunder of classifying Soult and Masséna as Jews. Disraeli appears genuinely to have believed in Christianity as developed Judaism. He detested Colenso and the essayists of his school. In rejecting Darwinism he said: "I am on the side of the angels."

In his "Life of Lord George Bentinck" Disraeli devotes a chapter to a statement of the Jewish case. He begins by declaring that the Roman massacres, and the fact that the Diaspora had begun long before the death of Christ, make it impossible that the Jews of to-day can be descended from those who attended the crucifixion. Further, he says, the

theory that the Jews are now expiating their offense is not dogmatically sound. "The native tendency of the Jewish race," he continues, "is against the doctrine of the equality of man."

They have also another characteristic—the faculty of acquisition. Thus it will be seen that all the tendencies of the Jewish race are conservative. Their bias is to religion, property, and natural aristocracy, and it should be the interest of statesmen that . . . their energies and creative powers should be enlisted in the cause of existing society." Disraeli consistently and honorably supported all the bills for the removal of Jewish disabilities, and his conduct in this regard earned him the admiration of his great rival, Mr. Gladstone. "Sybil" deals with the squalor and wretchedness of the factory-workers. Here the Church is to play the part ascribed to the crown in "Coningsby." In 1847 "Tancred" appeared. In this book the hero, a duke's son, of course, goes to Jerusalem to seek inspiration, and Disraeli then describes the scenes which he had visited in early life.

He now bade farewell to literature for nearly five and twenty years. In 1848 Isaac D'Israeli died, and in the same year the death of Lord George Bentinck gave the Conservative leadership to Disraeli. During the next three years he reorganized the party, and won back the Peelites to Conservatism. In 1852 Lord Derby came into office and Disraeli became chancellor of the exchequer; but his budget was defeated in the first few months of the administration, and the Coalition Cabinet came into power. In 1852 he wrote the "Life of Lord George Bentinck," in which, besides his plea for the Jews, he gives a graphic account of the free-trade struggle.

During the war with Russia he loyally supported the Coalition, but when the Aberdeen ministry fell in consequence of the mismanagement of the war, Lord Derby refused to take office without the aid of Mr. Gladstone or Lord Palmerston. This scornful treatment of his own followers angered Disraeli exceedingly. Disraeli was then forty-five years of age; he had lost an opportunity which did not again come to him for many years. In 1858 he and Lord

Derby took office for a few months, but were beaten on their new Reform Bill. This year was distinguished by the admission of Jews to Parliament. The elections failed to give Lord Derby a clear majority, and the ministry was turned out of office on the ground of its failure to prevent the war between France and Austria. In 1863 Disraeli came into possession of the fortune of Mrs. Brydges Willyams, a lady of Jewish parentage who had taken great interest in him owing to his Jewish birth and connection with the De Laras, with whom her own family, the Mendez da Costas, had intermarried.

The great question which now agitated England was that of reform. In 1865 Lord Palmerston died, and the new premier, Lord John Russell, introduced a bill which was defeated on a matter of detail. He resigned, and Derby and Disraeli came into power. There had been some talk of ignoring Disraeli in favor of another leader, as he had made several tactical errors; but he had lived down his eccentricities and reconstructed his party, and though he had failed on the whole to win their confidence, he was too formidable to be overlooked. It was now that he made the celebrated "leap in the dark," which drew down upon him the wrath of Carlyle, who described him as "a superlative Hebrew conjurer, spellbinding all the great lords, great parties, great interests, of England." His new policy was bitterly denounced by many of his own party, but nevertheless restored the Conservatives to public confidence. Perceiving that reform was inevitable, he outbid the Whigs and introduced a bill of a far more radical nature than that proposed by his opponents. He lost three of his party in the process, Lord Cranborne (afterward Lord Salisbury), Lord Carnarvon, and General Peel; but the measure became law.

Lord Derby now retired from political life and Disraeli became premier. In 1869 the elections went against him, and he yielded office to Mr. Gladstone. Refusing a peerage on giving up office, he nevertheless had his wife created Viscountess of Beaconsfield in her own right; four years later she died. In 1874 he was once more returned to power. It was the first time there had been a clear Tory majority for more than thirty years; and since 1848 he had had no real chance to display his abilities. Now nearly seventy, he was compelled to exchange the House of Commons for the less strenuous atmosphere of the House of Lords, becoming Earl of Beaconsfield in 1876. At this time several Turkish provinces were in rebellion, and Russia, in defiance of treaty obligations, declared war upon the sultan. Public feeling was greatly excited against Turkey by the atrocities committed by the irregular troops in Bulgaria (which, however, were subsequently found to be greatly exaggerated), and Lord Beaconsfield was

THE BERLIN CONGRESS, 1878

BENJAMIN DISRAELI, EARL OF BEACONSFIELD IN CONFERENCE WITH PRINCE GORTSCHAKOFF

“

overruled in his desire to intervene on behalf of Turkey. His political enemies accused him of "Semitic instincts," though the Turks are not a Semitic race. But when Russia had practically effaced the Turkish empire in Europe by the treaty of San Stefano, Lord Beaconsfield sent the British fleet into the Dardanelles and brought Indian troops to Malta as an indication of the intentions of the British government. This latter act subjected him to the accusation of undermining the liberties of England by unconstitutional procedure.

At Berlin dures. Russia submitted, and agreed **Congress.** to the discussion of the whole affair at the Congress of Berlin. Lord Beaconsfield went as a delegate, accompanied by the Marquis of Salisbury, and succeeded in compelling Russia to modify materially the terms of the treaty. By this congress it was decreed that Rumania should grant full religious freedom to her subjects. Disraeli's public interference on behalf of the Jews of Rumania consisted in supporting M. Waddington, who introduced the subject on behalf of France; but it is believed that he was more active, and took the initiative behind the diplomatic scenes. His whole conduct of affairs at the congress extorted the admiration of the assembled diplomats of Europe, and he had reason to boast on his return that he had brought back "peace with honor" (see **BERLIN CONGRESS**).

Among the other acts of Lord Beaconsfield during his administration was the enactment of the law by which Queen Victoria was proclaimed Empress of India. He annexed Cyprus, and in return for it guaranteed the protection of the Turkish dominions in Asia Minor. By a clever piece of business foresight he purchased a number of shares in the Suez Canal, which have since increased in value to an enormous extent. This was done at his own personal initiative, acting on a hint of Mr. Greenwood, and was carried through with the aid of the Rothschilds, who took some risks in buying the shares before Parliament had ratified the sale. Disraeli was on familiar terms with the Rothschild family, and would often listen at their table to the Hebrew grace after meals intoned according to the usual cantillation. "I like to listen to the old tunes," he remarked on one occasion.

In 1880 Mr. Gladstone was again returned on questions of domestic legislation. Lord Beaconsfield had no prospects of surviving Gladstone's administration, but nevertheless continued to direct the affairs of his party until his death. During his later years he wrote two more novels: "Lothair" (1870) and "Endymion" (1880). The anniversary of his death is celebrated as "Primrose Day," and in connection with it a large Conservative organization has grown up, known as the "Primrose League."

J. V. E.

D'ISRAELI, ISAAC: English author; born at Enfield, Middlesex, May, 1766; died at Bradenham Jan. 19, 1848. He was the only son of Benjamin D'ISRAELI, and after completing his studies and travels, he first appeared in print (Dec., 1786) with a vindication of Dr. Johnson's character in the

"Gentleman's Magazine." In 1790 he published his first volume in verse, entitled "A Defense of Poetry." An attack on "Peter Pindar" (Dr. T. Wolcot) first drew attention to D'Israeli, and he soon obtained introductions to various literary men. Now finally adopting a literary career, the following twenty years of his life were spent in the production of a succession of literary works, which rapidly made his reputation and met with considerable success. In 1791 he issued anonymously a collection of an entitled "Curiosities of Literature," which had an immediate vogue. He added a second volume in 1793, a third in 1817, two more in 1823, and a sixth in 1834. "A Dissertation on Anecdotes" appeared in 1793, "An Essay on the Literary Character" in 1795, "Miscellanies of Literary Recollections" in 1796, "Calamities of Authors" in 1812-13, and "Quarrels of Authors" in 1814. These works con-

(From a drawing by Drummond, published in the "Monthly Mirror," 1797.)

tain a large amount of interesting matter, not always very reliable, on the lives of authors, and have formed a fund of anecdote from which succeeding writers have drawn copiously. Their accuracy was impugned by Bolton Corney, who opened with D'Israeli a fresh chapter of the "quarrels of authors" in 1837-38.

D'Israeli also tried his hand at romances; but these were never successful. In 1797 three were published—viz., "Vaurien: A Sketch of the Times"; "Flin-Flams, or the Life of My Uncle"; and "Mejnoun and Leila, the Arabian Petrarch and Laura," said to be the earliest Oriental romance in the English language and which was translated into German in 1804. D'Israeli's last novel, "Despotism, or the Fall of the Jesuits," appeared in 1811.

Meanwhile his reputation was growing apace. His article on Pope in the "Quarterly Review" for 1820 aroused a controversy in which Bowles, Byron,

Roscoe, and Campbell took part. Between 1828 and 1830 appeared in 5 vols. D'Israeli's "Commentary on the Life and Reign of Charles I.," based on original documents. In recognition of this production he was made a D.C.L. at Oxford in 1832. In 1833 he issued anonymously the "Genius of Judaism," in which he wrote enthusiastically of Israel's past history, but deplored its social exclusiveness in his own day. He had expressed similar views in his "Vaurien" (1797), and in an article on Moses Mendelssohn in the "Monthly Review" for July, 1798.

Religiously, Isaac D'Israeli was a man far in advance of his times, and was perhaps the first English Jew who took the modern attitude toward Jewish ceremonial. In 1813 D'Israeli was elected warden of the Bevis Marks Synagogue, to which both he and his father had been attached. This office he declined, expressing surprise that he should have been elected at so late a period in his life. No notice was taken of his communication; and in accordance with established usage the recalcitrant was fined £40. Some correspondence ensued, in which D'Israeli, after expressing his unwillingness to pay the fine, finally saying: "I am under the painful necessity of wishing that my name be erased from the list of your members of Yehedim." D'Israeli never returned to the Jewish fold, and his sons and connections embraced the Christian faith. D'Israeli himself did not, however, receive baptism, and never evinced any desire to exchange Judaism for Christianity. He attended the inauguration ceremonies of the Reformed Synagogue at Berkeley street, London.

Toward the close of 1839 D'Israeli suffered from paralysis of the optic nerve; and he was totally blind for the rest of his life. He managed, however, to complete his "Amenities of Literature" (1840), which was followed by a revised edition of the "Curiosities" (1841) and a paper in the "Gentleman's Magazine," his last work.

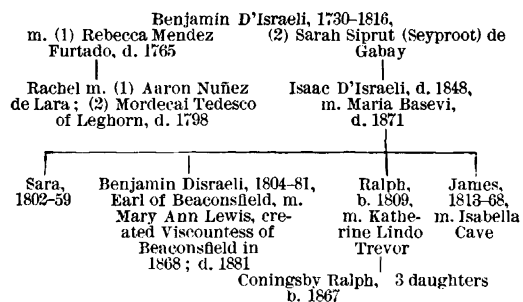

D'Israeli married Maria Basevi, sister of Joshua Basevi, and left as issue four sons and one daughter, of whom the best known was Benjamin DISRAELI, Earl of Beaconsfield.

DISRAELI PEDIGREE: The following is a genealogical tree of the Disraeli family:

Lord Beaconsfield could trace his ancestry only back to his grandfather of the same name, who arrived in England from Venice in 1759 (though he

himself dated his grandfather's arrival 1748). Benjamin Disraeli, however, claimed that the Disraelis were of Sephardic stock, exiled from Spain in 1492, and that they had settled in Venice for the intervening 250 years. As will be seen from the pedigree, the English branch intermarried with the families of Mendez Furtado, Nuñez de Lara, Tedesco, Siprut, Basevi, and Lindo. A Benjamin Disraeli of Dublin (d. 1814) was also probably a relation, though the connection has not been defined.

DISTAFF: A stick on which flax or wool was wound ready for hand-spinning before the spinning-wheel came into use. It was held under the left arm, or stuck in the girdle, of the spinner. The fibers were drawn from it and twisted by the thumb and forefinger of the right hand. The thread so spun was wound on an oval reel, generally provided at its thickest part with a ring hanging from the thread and turning with it during spinning in order to insure regularity of the movement. In Israel the use of the distaff was deemed the "wisdom" of women (אֵין חכמה לְאִשָּׁה אֵלָּא בַּפֶּלֶךְ, Yoma, 66b); and the articles manufactured were sold even in foreign countries (Pes. 50b; Ket. 106a; Prov. xxxi. 24). The spinning-women had a share in equipping the sanctuary (Ex. xxxv. 26). According to Parhōn, Prov. xxxi. 19 reads: "[The housewife] stretches her hands out to the distaff [כִּישוּר], and her fingers lay hold of the spindle [פֶּלֶךְ]"; but Kimḥi and Abū al-Walid invert the meanings, "kishar" being the spindle or ring, and "pelek" the distaff (compare II Sam. iii. 29, Hebr., "pelek" = staff).

In the Talmud the distaff is known as אֵימָה (עֵימָה) (Kel. xi. 6, xxi. 1) and as אֵוֶרְנָס or אֵוֶרְנָס, the Arabic "irnas" (Shab. 91b). An extended description of the spinning implements is given by Maimonides in his commentary on Parah xii. 8 (ed. Derenbourg, "Seder Ṭohorot," pp. 241 et seq., Berlin, 1889).

M. Sc.—E. G. H.

DITTEL, LEOPOLD RITTER VON: Austrian surgeon; born at Fulneck, Moravia, May 15, 1815; died at Vienna July 28, 1898. He was educated at the gymnasia of Troppau and Brünn, and at the University of Vienna, whence he was graduated as doctor of medicine in 1840.

After acting for a short time as assistant physician at the gymnastic-orthopedic institute of Zink in Vienna, he engaged in practice as a physician at Trentschin-Teplitz, Hungary. Being busy only during the summer months, he studied during the winter in Vienna under Skoda, Rokitansky, and Hebra, and in 1852 became assistant to Dlauhy in Vienna. From 1853 to 1857 he was assistant to Dumreicher and assistant surgeon at the hospital of the University of Vienna. In 1856 he became privat-docent at the university; in 1861 he was appointed surgeon-in-chief of the Allgemeine Krankenhaus, and in 1865 he was made assistant professor. Dittel was the founder (1864) and for a long time chief of the surgical-

anatomical institute of the university. Resigning his academic position in 1875, he refused in 1880 the appointment of professor at the university in succession to Dumreicher. Soon afterward he was ennobled.

Dittel made a special study of urinalogy, in which branch he was very eminent. In 1894 he made a report on 800 operations for stone performed by him. His greatest achievements were: the construction of a carrier for drugs for local treatment of the urethra; the endoscopic diagnosis, especially of tumors of the bladder; the electrical lamp instead of the platina wire on the end of the cystoscope; operations on the bladder through the rectum (see Albert's memorial speech on Dittel in "Wiener Klinische Wochenschrift," 1898, No. 42).

Dittel embraced the Catholic faith. He was a prolific writer. Of his many essays and works may be mentioned: "Ueber Klumpfuß," 1851; "Skoliöse," 1853; "Beiträge zur Pathologie und Therapie der Männlichen Geschlechtstheile," 1859; "Sekundäre Luxation des Hüftgelenkes," 1861; "Der Katheterismus," 1864; "Beitrag zur Lehre der Hypertrophie der Prostata," in "Oesterreichischer Medizinischer Jahrbuch," 1867; "Der Steinsauger," in "Allgemeine Wiener Medizinische Zeitung," 1870; "Die Stricturen der Harnröhre," in Pitha-Billroth's "Handbuch der Chirurgie," ii., part 2, 1872; "Zur Behandlung der Hypertrophie der Vorsteherdrüse," in "Wiener Medizinische Wochenschrift," 1876; "Operationen der Blasensteine," *ib.* 1880; "Nieren-calculose," *ib.* 1881.

F. T. H.

DIVEKAR, ABRAHAM SAMUEL: Beni-Israel soldier; born near Bombay about 1830. He enlisted in the Nineteenth Regiment native infantry March 1, 1851; was promoted to the rank of a jemadar Jan. 1, 1872; and was appointed subedar Sept. 10, 1878. Divekar was present at the battles of Multan, Gujarat, Punjab, and received a medal and two clasps. He was also in the Afghan war of 1878-80, where he lost his right arm in the battle of Deh-Khoja (Aug. 16, 1880), again obtaining a medal for bravery.

J.

J. Hy.

DIVEKAR, SAMUEL EZEKIEL (Samajee Hasajee): Soldier in the service of the East India Company and second founder of the Beni-Israel congregation of Bombay; born at Cochin in 1730; died there in 1797. He enlisted in the East India Company's army about 1760, and rose to the rank of native commandant in the Sixth Battalion. While serving in the second Mysore war, under General Matthews, he was taken prisoner with several other Beni-Israel by Tippu Sahib, and he and his companions were about to be executed; but when they stated that they were Beni-Israel the mother of Tippu Sahib, who was familiar with that name in the Koran, begged their lives; and Divekar and his companions were cast into prison. He made a vow that if he were released he would devote his life to reviving Judaism among the Beni-Israel of Bombay; and on escaping in 1795, he went to that city, and

by his exertions induced the Beni-Israel to build a synagogue and adopt the ritual and Jewish observances current in Cochin. A synagogue was erected in 1796; but Divekar died the following year in his native place, whither he had gone to obtain scrolls of the Law for the new congregation.

J.

DIVINATION: The forecasting of the future by certain signs or movements of external things, or by visions in certain ecstatic states of the soul (see DREAMS and PROPHECY). Divination rests on the belief that spirits inhabit the various elements of life and are able to impart the knowledge of the future to man, and it is, like all idolatrous practises, forbidden by the Law. "Neither shall ye use enchantments nor practise augury." "Turn ye not unto them that have familiar spirits nor unto the wizards" (Lev. xix. 26, 31, Hebr.). "There shall not be found with thee . . . one that uses divination, one that practiseth augury, or an enchanter, or a sorcerer, or a charmer, or a consulter with a familiar spirit, or a wizard, or a necromancer. For whosoever doeth these things is an abomination unto the Lord, and because of these abominations the Lord thy God doth drive them out from before thee" (Deut. xviii. 10, 11, Hebr.).

The general term for "divination" in Hebrew is **קסם** (Deut. l.c.; I Sam. vi. 2, xv. 23 [A. V. "witchcraft"], xxviii. 8: **קסמי נח לי באוב**, "divine unto me by the familiar spirit"; Ezek. xii. 24; Isa. iii. 2 [A. V. "prudent"]; Zech. x. 2; and elsewhere). Balaam used divination (Num. xxii. 7, xxiii. 22; Josh. xiii. 22 [A. V. "soothsayer"]). For the original meaning or etymology of **קסם** reference has been made to Ezek. xxi. 26 (21), where Nebuchadnezzar is represented as standing at the parting of the ways and shaking the arrows to and fro to determine which way he should go, whether to Jerusalem or to the capital of the Ammonites. Accordingly "kasam" is explained after the Arabic "istakṣam" (to obtain a divine decision), from "kasam" (distribute, or divide), as signifying the casting of lots by throwing the arrows from the quiver, a practise familiar to the Arab Bedouins (see Jerome to Ezek. l.c.; Herodotus, iv. 67; Gesenius, "Thesaurus," s.r.; W. R. Smith, in "Journal of Philology," xiii. 276; Wellhausen, "Skizzen und Vorarbeiten," 1887, pp. 126 *et seq.*).

Specific forms of divinations are mentioned in Lev. xix. 26 (**מעוין**, "enchantments"); Deut. xviii. 10, 14 (R. V. "augury"); Judges ix. 37 (Hebr. "the soothsayers' terebinth"); II Kings xxi. 6; Isa. ii. 6 ("the Philistines are filled with **מקרים** [probably to be emended to **מקסם** = "divination"] and soothsayers"); Isa. lvii. 3 (**בני עוניה**, A. V. "ye sons of the sorceress"); Jer. xxvii. 9; Micah v. 11 (12). The real meaning and etymology of the word are obscure. Smith (l.c.) explains it from the Arabic "ann" (to murmur, or hum hoarsely), this being the practise of the Arabic soothsayer. The explanation suggested by the Hebrew and adopted by most commentators and lexicographers is "the observation of the movements of the clouds" (**ענן**; compare Jer. x. 2; Josephus, "B. J." vi. 5, § 3). Lenormant

("Magie und Wahrsagekunst," p. 456), quoting a Babylonian rule, "When bluish dark clouds rise on the horizon the wind will blow during the day," and a divination from the movement of the clouds from the time of the Byzantine emperor Leo I. favors this explanation of **מעוֹן**, offered also by Ibn Ezra on Lev. *ad loc.* Also the "terebinth of the soothsayers" (Judges *l.c.*; compare II Sam. v. 24) indicates "the practise of divination from the movements of air-currents (see Baudissin, "Studien zur Deutschen Religionsgeschichte," 1878, ii. 226). Luther's translation, "Tageswächter" (Observer of Auspicious Times; see Rashi *ad loc.*), rests on an etymological combination with **עַתָּה**, **עוֹנָה** (= "time").

מַנְחֵשׁ (lit. "he that observes the movement or the hissing of the serpent," **נָחָשׁ**; see Baudissin, *l.c.* i. 287) is a term used in general for one who observes omens (Gen. xlv. 5, 15, A. V. "divineth"; Lev. xix. 26, A. V. "augury"; Num. xxiii. 23, xxiv. 1; II Kings xvii. 17, xxi. 6, A. V. "enchantments"; compare Gen. xxx. 27; I Kings xx. 33).

The term is applied in the story of Joseph (Gen. *l.c.*) to the observation of figures formed by water or oil in a cup, called by the Greeks "hydromancy." It was known also to the Romans, who ascribed its origin to the Persians, with whom the practise was especially in vogue, as may be learned from the cup of Jemshid in the Shah Nameh. But the Chaldeans and Arabians were also familiar with it (see Lenormant, *l.c.* pp. 463 *et seq.*; Lane, "Customs and Manners of the Modern Egyptians," ii. 362).

Another form of divination is the casting of rods (see Hosea iv. 6): "My people ask counsel at their stock, and their staff declareth unto them"—a practise called "rhabdomancy" or "xylomancy" by the Greeks, and similar to the casting of arrows mentioned above (see the commentaries *ad loc.* and Wellhausen, *l.c.*).

רֹאֵה בִכְבֶּד (Ezek. *l.c.*), "looking in the liver," is the Greek "hepatoscopy." (See Lenormant, *l.c.* p. 453, for the Chaldean, Phenician, Greek, and Roman practises.) The convulsive motions of the lung

and liver when taken from the sacrificial victim (the liver was regarded as the seat of life, Prov. vii. 23) were watched as a means of forecasting the future.

For other forms of divination and for divination in rabbinical literature see **ASTROLOGY**; **AUGURY**; **NECROMANCY**; **SUPERSTITION**; **WITCHCRAFT**.

DIVINE JUDGMENT. See **JUDGMENT**, **DIVINE**.

DIVINE SERVICE. See **LITURGY**.

DIVORCE: Dissolution of marriage. The origin of the Jewish law of divorce is found in the constitution of the patriarchal family. The fundamental principle of its government was the absolute

authority of the oldest male ascendent; hence the husband, as the head of the family, divorced the wife at his pleasure. The manner in which Hagar was dismissed by Abraham illustrates the exercise of this authority (Gen. xxi. 9-14). This ancient right of the husband to divorce his wife at his pleasure is the central thought in the entire system of Jewish divorce law. It was not set aside by the Rabbis, though its severity was tempered by numerous restrictive measures. It was not until the eleventh century that the absolute right of the husband to divorce his wife at will was formally abolished.

The earliest restrictions of this right are found in the Deuteronomic code. In two cases the law provided that the husband "shall not be at liberty to put her away all his days": (1) if he falsely accused her of antenuptial incontinence (Deut. xxii. 13-19); (2) if he had ravished her before marriage (Deut. xxii. 28, 29). In the Mishnaic period the theory of the law that the husband could divorce his wife at will was challenged by the school of Shammai. It interpreted the text of Deut. xxiv. 1 in such a

REVIEW OF DIVORCE, OR GEF, FROM THE CAIRO GENIZAH, DATED 1100
Seleucid Era = 1088 C.E.
(In the New York Public Library.)

manner as to reach the conclusion that the husband could not divorce his wife except for cause, and that the cause must be sexual immorality (Git. ix. 10; Yer. Soṭah i. 1, 16b). The school of Hillel, however, held that the husband need not assign any reason whatever; that any act on her part which displeased him entitled him to give her a bill of divorce (Git. *ib.*). The opinion of the school of Hillel prevailed. Philo of Alexandria ("Of Special Laws Relating to Adultery," etc., ch. v.; English ed., ii. 310, 311) and Josephus ("Ant." iv. 8) held this opinion. Jesus seems to have held the view of the school of Shammai (Matt. xix. 3-9).

Although not overthrown, the ancient theory of the husband's unrestricted right was still further modified by the Mishnah. To the two restrictions mentioned in Deuteronomy the Mishnah adds three others. It provides that the husband can not divorce his wife, (1) when she is insane (Yeb. xiv. 1), (2) when she is in captivity (Ket. iv. 9), or (3) when she is a minor, so young

as to be unable to understand or to take care of her get, or bill of divorce (*ib.*). The Mishnah furthermore modified the right of the husband indirectly by making the divorce procedure difficult, and bristling with formalities in ordering, writing, attesting, and delivering the get. The matter required the assistance of one learned in the law (Kid. 6a), whose duty it became to attempt to reconcile the parties, unless sufficient reason appeared for the divorce.

Another check on the exercise of the theoretical right of the husband to divorce his wife was the law compelling him to pay her the dowry or the amount of her KETUBAH. Rabban Gamaliel deprived the husband of the power to "annul" his get (see CANCELLATION OF DOCUMENTS) (Git. iv. 2). If the husband was insane, he could not divorce his wife; and if he was temporarily deranged or delirious, or intoxicated, he was for the time being incapable of performing this as well as other legal acts (Yeb.

xiv. 1; Git. vii. 1, 67b). A deaf-mute could not divorce his wife unless he had married her after he had become a deaf-mute (Yeb. xiv. 1). These many qualifications of the theoretical right of the husband to give a get to his wife at his pleasure, resulted in gradually eliminating from the popular mind the notion that such a right existed. The views of the moralists were opposed to divorce (Git. 90b), and finally (as stated above), in the eleventh

century, by a decree of Rabbi Gershon of Mayence, this theoretical right of the husband was formally declared to be at an end. The substance of this famous decree is thus stated (Responsa "Asheri," xlii. 1): "To assimilate the right of the woman to the right of the man, it is decreed that even as the man does not put away his wife except of his own free will, so shall the woman not be put away except by her own consent." Where either of the parties, however, shows good cause for divorce the marriage will be dissolved against the will of the guilty party (Shul-

Hebrew BILL OF DIVORCE, OR GET.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

han 'Aruk, Eben ha-'Ezer, 119, 6, gloss).

The wife's right to sue for divorce was unknown to the Biblical law. There is a germ of this right in Ex. xxi. 11, but it was not until the Mishnah that this right was established. The wife never obtained the right to give her husband a get, but when the court decided that she was entitled to be divorced from him, he was forced to give her a get. During the reign of the Herodians, under the influence of Roman practise, cases are recorded in which women sent bills of divorce to their husbands (Josephus, "Ant." xv. 11, xviii. 7). These were recognized as breaches of the law, and never became precedents. The following causes are recognized as entitling the wife to demand a bill of divorce from her husband: refusal of conjugal rights (Ket. v. 6); impotence (Ned. xi. 12); when the husband has some loathsome disease, or leprosy, or is engaged in some malodorous business (Ket. vii. 9); the husband's refusal to support her (Ket. 77a); cruel treatment and

deprivation of her lawful liberty of person (Ket. vii. 2-5, v. 5); wife-beating (Eben ha-'Ezer, 154, 3, gloss); the husband's apostasy (Maimonides, "Yad," Ishut, iv. 15)—in the last-named case the Jewish courts, having lost their authority over him, could appeal to the courts of the Gentiles to carry out their mandate ("Bet Joseph," 134); the husband's licentiousness (Eben ha-'Ezer, 154, 1, gloss).

After the parties had been divorced, the law favored their remarriage ('Eduy. iv. 7). But if the wife had married another man after her divorce, she could never be remarried to her first husband (Deut. xxiv. 1-5). To this Biblical law forbidding remar-

remarry her husband to enjoy the benefit of the fraud with him (B. B. x. 9); (5) if the husband has consecrated all his property to religious uses subject to his wife's ketubah ('Ar. vi. 2).

In some cases the courts will compel the separation of the husband and wife on grounds of public policy, against the will of both parties. Among these cases are the following: the marriage of persons within the prohibited degrees enumerated in Lev. xviii.; the marriage of a Jew and a non-Jew ('Ab. Zarah 36b); the marriage with a "mamzer" or a "natin" (Yeb. viii. 3); the marriage of an adulteress and her paramour (Soṭah v. 1; Yeb. ii. 8).

(From Kirchner, "Jüdisches Ceremoniel," 1726.)

riage of the parties, the Mishnah adds five other cases. They can not remarry after a divorce (1) if the woman has been divorced upon suspicion of adultery; (2) if she was divorced because she had subjected herself to the obligation of certain vows (Giṭ. iv. 7); (3) if she was divorced because of her barrenness (Giṭ. iv. 11); (4) if a third person had guaranteed the payment of her ketubah; the reason in this case being that a scheme to defraud might result through collusion of the husband and wife against the guarantor of the ketubah; she might receive the divorce, collect the amount of the ketubah from the guarantor, and then

**Re-
marriage
After
Divorce.**

The same rule applies if one of the parties becomes afflicted with leprosy (Ket. 77b); or if they have been married for ten years and no children are born to them (*ib.*), although the practise of enforcing separation in the latter case fell into abeyance (Eben ha-'Ezer 1, 3, gloss 154, 10).

The divorced woman was "sui juris," and could give herself in marriage to whom she pleased, with certain exceptions. She could not marry the man suspected of having committed adultery with her (Yeb. ii. 8), nor the messenger who brought her the get from her husband (*ib.* 9). She was not permitted to be remarried within three months after her divorce, in order that the paternity of the child with which

1. Writing the get. 2. Reading it aloud. 3. Throwing the get to the husband. 4. Husband throwing the get to the wife.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

she might be pregnant might not be in doubt (Yeb. iv. 10).

The children of the divorced woman remained in her custody; but the custody of the boys could be claimed by the father after their sixth year (Ket. 65b, 102b). According to later decisions, however, the court awarded the custody of the children according to its discretion (Eben ha-'Ezer, 82, 7, gloss).

For further information concerning the bill of divorce, its preparation, attestation, and delivery, see **GET**.

D. W. A.

DIZAHAB: Name occurring but once in the Bible—in the topographical description in Deut. i. 1. Its identity has not been successfully established. The context, locating it indefinitely in the trans-Jordanic region, and mentioning it among localities connected with similar difficulties, gives no clue. Inviting by its form etymological interpretations, the ancient versions have accordingly translated it *καταχρίσας*, "ubi auri est plurimum," and דִּי־זָהָב ("a sufficiency of gold"). Onkelos expands it into a Midrash (on account of the golden calf), and is followed in this by Rashi.

This idea is still more fully enlarged upon by Targ. Yerushalmi and pseudo-Jonathan; they also see in it an allusion to the golden calf, but hold that the sin thus committed was pardoned in consideration of Israel's having covered the Ark of the Covenant with "shining gold." Ibn Ezra simply suggests that it and the other *ἀπαξ λεγόμενα* in this passage may be unusual designations for places otherwise denoted by different names. According to the school of Rabbi Jannai, Moses in this verse refers to the golden calf, "to make which Israel was tempted by the superabundance of gold and silver poured out over them by God until they protested 'it is enough'" (Ber. 32a). Cheyne proposes to emend into "Me-zahab," which Sayce among others has urged as corresponding, in Gen. xxxvi. 39, to "Di-zahab" in Deut. i. 1. This "Me-zahab," however, Cheyne holds again to be a corruption of "Mizraim," the name for the northern Arabian land, Mizri or Mizrim, adjoining Edom. Burckhardt ("Travels in Syria," 1822, p. 523) suggests "Mina al-Dhahab" as its equivalent, but this view has been abandoned by modern commentators.

DLUGOSZ, JEAN. See **POLAND**.

DLUGOSZ (דלוגוס): not **De Lantes**), **SAMUEL B. MOSES:** Biblical commentator and poet of the seventeenth century; born in Grodno, Lithuania. He edited the Prophets and the Hagiographa in the Judæo-German translation of the Bible, "Ha-Maggid," to which he added a commentary on the Book of Judges entitled "Aguddat Shemuel" (Amsterdam, 1699; Wandsbeck, 1737). He was also a liturgical poet; to his translation of the Bible (1699) he added an Aramaic selihah in rime, and two dirges, which were reprinted entire in the "Tikkun Shabbatim" (Mantua, 1732) and elsewhere.

DOBRITZ: Town in Bulgaria, twenty-six miles north of Varna. It contains about 200 Jews in a total population of 14,000. This little community, which was founded in 1870, is administered by three of the leading Jews. It has a synagogue, erected in 1897, and a small mixed school. The Jews are occupied as ironmongers, tinsmiths, watchmakers, and small traders. Four or five Jewish families live at Baltchik, not far from Dobritz.

DOBROJE. See **MOHILEV GOVERNMENT**.

DOBROVELICHKOVKA. See **KHERSON**.

DOBRUSKA, MOSES: Austrian writer and poet; born July 12, 1753, in Brünn, Moravia; guillotined April 5, 1793, at Paris. The son of a wealthy Jew, Dobruska was originally destined for the career of a rabbi, and accordingly received a careful Talmudic education. Later the acquaintance of a Jew engaged in the study of Hebrew poetry, rhetoric, and Oriental languages induced him to give up theological subjects and to devote himself to the humanities, but not until after a painful struggle with his father, who protested against his plans being so radically brought to naught. Having overcome the paternal opposition, Dobruska eagerly began to study the old German classics and poets. Especially the idyls of Gessner made a deep impression upon him and instigated him to the further study of the German poets. In his ardent pursuit of literary occupations he even succeeded in persuading his father to allow him a considerable sum of money (1,500 florins) for the purchase of books. Besides German he also studied English, French, and Italian.

On Dec. 17, 1773, Dobruska embraced the Roman Catholic faith, and at his baptism in Prague assumed the name of Franz Thomas Schönfeld. Subsequently, together with his brothers, he was raised to the nobility (1778); and for some time he held the position of associate director of the famous Garelli Library in Vienna. Nothing is known in regard to the cause of Dobruska's execution.

Besides several posthumous poems that appeared in Becker's "Taschenbuch zum Geselligen Vergnügen," Dobruska published: "Etlche Gedichte zur Probe," Vienna, 1773; "Schäferspiele," Prague, 1774; "Theorie der Schönen Wissenschaften," Prague; "Ueber die Poesie der Alten Hebräer," *ib.*

"Ein Schäfergedicht in Hebräischer Sprache." *ib.*: "Eine Hebräische Poetische Uebersetzung des Pythagoras' Goldenen Sprüche," Prague, 1775; "Gebet oder Christliche Ode in Psalmen," Vienna; "David's Kriegsgesänge, Deutsch aus dem Grundtexte," Vienna and Leipsic, 1789.

DOBSEWITCH (DOBSEVAGE), ABRAHAM BAER B. JOSEPH EZRA: Russian Hebraist and exegete; born in Pinsk Oct. 17, 1843; died in New York Jan. 14, 1900. At the age of thirteen he had written a commentary to the Canticles. In 1861 he went to Yekaterinoslav, where he settled as teacher of Hebrew and contributed to various Hebrew periodicals. In 1874 he removed to Kiev, where he became private tutor to the sons of Brodski and of other wealthy families. He went to the United States in 1891, and lived in New York, leaving it only for a short time in 1895.

Dobsewitch's chief published work is "Ha-Mezaref" (The Refiner), a collection of rationalistic interpretations of various passages of the Aggadah, Odessa, 1870. Dobsewitch's two later works, "Be-Hada Maheta" (With One Sweep), a collection of articles, Cracow, 1888, and "Lo Dubbin we-lo Yu'ar" (Neither Bears nor Forest), Berdychev, 1890, as well as numerous articles in Hebrew periodicals, are devoted to criticisms directed against Shatzkes, Weissberg, and others. He continued his literary activity in the United States, and contributed to "Ha-Ibri," "Ner ha-Ma'arabi," and various Yiddish publications. Some of his correspondence was published in "Ha-Modi'a le-Hadashim," i., New York, 1900.

Dobsewitch left several works in manuscript, including one on the Masorah, one on the Samaritan text of the Pentateuch, and one on the wit and humor of ancient Jewish literature. Short extracts from the last-named work were published in the United States.

DÓCZY (DUX), LUDWIG: Hungarian poet; born at Sopron [Oedenburg], Hungary, Nov. 30, 1845. After finishing his preliminary education he studied law in Vienna, joining at the same time the staff of the "Presse." His political articles, which advocated the "Ausgleich" (agreement) with Austria, were very favorably received, and on the recommendation of Balthasar Horváth, then minister of justice, he was appointed (1868) clerk in the office of the prime minister. When Count Julius Andrássy became minister of foreign affairs (1872) Dóczy accompanied him to Vienna, and was soon appointed "Sectionsrath," and later "Hofrath," at the Foreign Office. In 1899 he was elevated to the rank of baron, and in 1902 retired from public life. He resides at present (1903) in Budapest.

Dóczy's reputation rests not on the services he rendered to the state, but on his achievements as a dramatic writer and as a translator. "Csók" (The

Kiss), his best-known comedy, which is played in German as well as in Hungarian theaters, gained the prize of the Hungarian Academy in 1871; the German translation was made by the author himself. Among his other plays are: "Utolsó Szerelm" (Last Love), 1879; "Széchy Mária," 1886; "Vegyes Párok" (Mixed Marriages), 1889; "Vera Grófnő," 1891; "Ellinor Királyleány," tragedy, 1897. Besides these he translated Schaufert's comedy "Schach dem König," 1873, and wrote the libretto to Goldmark's "Merlin" and to Strauss's "Ritter Pázmán." His Hungarian translation of Goethe's "Faust" and his German adaptation of Mádach's "Az Ember Tragédiája" were universally admired. His collected poems and novels appeared in 1890. His latest work is a Hungarian translation of Schiller's poems (1902). Dóczy is a convert to Christianity.

S. M.

DODANIM: Name of sons of Javan, brothers to Elishah, Tarshish, and the Kittim, in the ethnographic table in Genesis (x. 4). The ancestor being Javan (= Ionian), the Dodanim must represent also a Greek clan. This can not be Dodona in the interior of Epiros, as both the association with the Kittim (= Cyprians) and Gen. x. 5 indicate a people settled on the seashore. Dardanians (the northern Ionians) have been suggested, but it is not likely that the author of this list had such detailed knowledge of the subdivisions of the Greek population. In I Chron. i. 7 the reading is "Rodanim," as it is in the Samaritan, the Septuagint, and Jerome. In Gen. x. 4 these are the inhabitants of the island Rhodus, well known to the Phenicians of old (compare Homer's "Iliad," ii. 654). The only difficulty in the way of this identification is the long "o" in the Hebrew, where the Greek has the short sound. The modern commentators, Baentsch and Holzinger, accordingly change the ד (d) into a ר (r), and read "Rodanim."

E. G. H.

DODAVAH (R. V. Dodavahu, "loved of God"): The father of Eliezer of Mareslah (II Chron. xx. 37). The latter preached against the alliance between Jehoshaphat and Ahaziah, and saw in the wreck of the ships sent out by Jehoshaphat divine punishment for the alliance. The Septuagint reads the name Ωδεα. It is perhaps a corruption of "Dodayahu."

E. G. H.

G. B. L.

DODO (דודו): 1. The father of Eleazar, "one of the three mighty men with David, when they defied

the Philistines that were there gathered together to battle" (II Sam. xxiii. 9; R. V. "Dodai"). I Chron. xi. 12 reads "Dodo, the Ahohite," while in the Hebrew of the II Samuel passage he is termed "the son of an Ahohite." I Chron. xxvii. 4 gives "Dodai" as captain over a division of the army in service during the second month. These three passages seem to refer to one and the same person. The same name appears on the Moabite inscription, where it may be read either "Dodo" or "Dodah." The name "Dudu" is found on the Tell el-Amarna tablets as the name of an Egyptian official. 2. The father of Elhanan (II Sam. xxiii. 24), one of David's thirty mighty men. 3. Dodo, the father of Puah, the father of Tola, one of the judges of Israel (Judges x. 1).

I. M. P.

DOEG.—**Biblical Data:** An Edomite; chief of the herdsmen of Saul. When David, warned by Jonathan, fled from Saul to the priest Abimelech at Nob, he found Doeg there. On pretense of being on the king's service, David was hospitably entertained, received the sword of Goliath from Abimelech, and escaped (I Sam. xxi. 2-11). Saul, upon hearing of David's escape, accused his servants of aiding David, whereupon Doeg revealed what had taken place at Nob (*ib.* xxii. 6-10). Saul took Abimelech to task for what he had done (*ib.* 11-13), and ordered his runners to kill the priests of Nob (*ib.* 17); the runners refused to obey, and thereupon Doeg at Saul's command fell upon the priests, and also destroyed Nob (*ib.* 18, 19). Psalm lii., according to its introductory verse, is directed against Doeg.

J. JR.

C. J. M.

—**In Rabbinical Literature:** Doeg is the subject of many rabbinical legends, the origin of which is to be found in part in Psalm lii. Though he died at the early age of thirty-four years (Sanh. 69b), he is regarded by the rabbis as the greatest scholar of his time, the epithet אדומי being supposed to have been applied to him because he made every one with whom he disputed "blush" (Midr. Teh. lii. 4; ed. Buber, p. 284). He could bring forward 300 different questions with reference to one single ritual case (Hag. 15b). But he was lacking in inward piety, so that God was "anxious" (דואג) concerning his end, and "mourned" (דוהג) for him (Sanh. 106b). His most unfortunate qualities, however, were his malice, jealousy, and calumnious tongue. He sounded the praise of David before Saul (I Sam. xvi. 18) only in order to provoke his jealousy, ascribing to David qualities that Saul lacked (Sanh. 93b; compare Midr. Shemuel xix., end). He cherished a grudge against David, whose opinion prevailed over his own in determining the site for the Temple at Jerusalem (Zeb. 54b), and he had well-nigh succeeded in proving by his arguments that David, as a descendant of Ruth the Moabite, could not, according to the Law, belong to the congregation of Israel, when the prophet Samuel interposed in David's favor (Yeb. 76b, 77a; Midr. Shemuel xxii.). He also declared David's marriage with Michal to be invalid, and induced Saul to marry her to another.

Doeg not only disregarded the sanctity of marriage (התיר נלי עריות), but he also slew with his own hands the priests of Nob, after Abner and Amasa,

Saul's lieutenants, had refused to do so (Gen. R. xxxii.; Midr. Teh. lii. 4). As it often happens with those who strive for something to which they are not entitled, he lost that which he possessed (Gen. R. xx.). God sent the three "angels of destruction" (מלאכי הבלה) to Doeg; the first caused him to forget his learning, the second burned his soul, and the third scattered the ashes (Sanh. 106b; differently, Yer. Sanh. x. 29a). According to some he was slain by his own pupils when they found that he had forgotten his learning (Yalk., Sam. 131); others maintain that he was slain by David when he (Doeg) informed him of the death of Saul and of Jonathan (II Sam. i. 2; Pesik., ed. Buber, iii. 28b; Ginzberg, "Die Haggada bei den Kirchenvätern," i. 38).

According to another Midrash, Doeg tried to preserve the life of Agag, the king of the Amalekites-Edomites, by interpreting Lev. xxii. 28 into a prohibition against the destruction of both the old and the young in war (Midr. Teh. lii. 4). Doeg is among those who have forfeited their portion in the future world by their wickedness (Sanh. x. 1; compare *ib.* 109b). Doeg is an instance of the evil consequences of calumny, because by calumniating the priests of Nob he lost his own life, and caused the death of Saul, Abimelech, and Abner (Yer. Peah i. 16a; Midr. Teh. cxx. 9 [ed. Buber, p. 504]).

E. C.

L. G.

—**Critical View:** The Hebrew text of I Sam. xxi. 7 is difficult, and consequently the genuineness of that verse has been unnecessarily suspected; it is presupposed by xxii. 9 (see H. P. Smith, "Commentary on Samuel," p. 198). The designation, however, of Doeg as "mightiest of the shepherds" (הרעים) of Saul is unusual and unlikely. Budde ("S. B. O. T.") proposes "mightiest of the runners" (רצים) (after Grätz, "Gesch. der Juden," i. 183, note 4), while Lagarde ("Mittheilungen," iii. 350) reads "driver of the mules" (אוביל עירים)—a reading confirmed by xxii. 9 in Septuagint, and by Judges x. 4; I Sam. ix. 3; II Sam. xvi. 2; and I Chron. xxvii. 30. Doeg was probably detained at the sanctuary by a taboo when he saw David (compare W. R. Smith, "Religion of the Semites," 2d ed., p. 456). The mention of Doeg in the title of Ps. lii. is a late interpolation of no critical value.

J. JR.

G. A. B.

DOG (כלב).—**Biblical Data:** The dog referred to in the Bible is the semisavage species seen throughout the East, held in contempt for its fierce, unsympathetic habits, and not yet recognized for his nobler qualities as the faithful companion of man. He is used chiefly by shepherds or farmers to watch their sheep or their houses and tents, and to warn them by his loud barking of any possible danger (Job xxx. 1; Isa. lvi. 10). He lives in the streets, where he acts as scavenger, feeding on animal flesh unfit for man, and often devouring even human bodies (Ex. xxii. 31; I Kings xiv. 11. xvi. 4. xxi. 23; II Kings ix. 10, 36; Jer. xv. 3). At night he wanders in troops from place to place, filling the air with the noise of his barking (Ps. lix. 7-14; compare Ex. xi. 7), and it is dangerous to seize him by the ear in order to stop him (Prov. xxvi. 17). He is of a fierce disposition (Isa. lvi. 11; A. V. "greedy")

and therefore the type of violent men (Ps. xxii. 17 [A. V. 16], 21 [20]). Treacherous and filthy (Prov. xxvi. 11), his name is used as a term of reproach and self-humiliation in such expressions as: "What is thy servant, which is but a dog" (II Kings viii. 13, R. V.); or "Am I a dog's head?" (II

Term of Sam. iii. 8); or "After whom dost thou
Contempt. pursue? after a dead dog?" (I Sam. xxiv. 15 [A. V. 14]; compare II Sam. ix. 8, xvi. 9; Cheyne's emendation in "Encyc. Bibl." *s.v.* "Dog," seems unnecessary).

The dog known to the Hebrews in Biblical times was the so-called pariah dog, the shepherd-dog (Job xxx. 7) being the more ferocious species. The Assyrian hunter's dog was probably unknown. The A. V. translation of *רזרז מתנים* ("well girt in the loins") in Prov. xxx. 31 by "greyhound" is incorrect; R. V. (margin) has more correctly "war-horse" (see commentaries *ad loc.*).

The dog being an unclean animal, "the breaking of a dog's neck," mentioned as a sacrificial rite in Isa. lxvi. 3 (compare Ex. xiii. 13), indicates an ancient Canaanite practise (see W. R. Smith, "Rel. of Sem." p. 273). The shamelessness of the dog in regard to sexual life gave rise to the name כלב ("dog") for the class of priests in the service of Astarte who practised sodomy ("kedeshim," called also by the Greeks *κυναιδοι*, Deut. xxiii. 19 [A. V. 18]; compare *ib.* 18 [17] and Rev. xxii. 15; see Driver *ad loc.*), though כלבם as the regular name of priests attached to the temple of Ashtoret at Larnaca has been found on the monuments (see "C. I. S." i., No. 86).

—In Rabbinical Literature: Two different dogs are mentioned: the ordinary dog and the small Cyprian (not, as commonly explained, "the farmers' dog," כלב הכופר). The former species resembles the wolf; the latter the fox; and the crossing of these is forbidden as "kilayim" (mixture of species; Kil. i. 6; compare Aristotle, "Historia Animalium," viii. 27, 8, where the one species of dogs is declared to be a crossing of dogs and wolves, and the other [the Laconian] a crossing of dogs and foxes). While the ordinary dog is counted by R. Meir among domestic animals ("behemah"), the Cyprian dog is declared to be a wild animal ("hayyah"; Yer. Kil. 27a). In the dusk the former is difficult to distinguish from the wolf (Ber. 9b).

As a rule, the dog does not scratch and tear like beasts of prey (Hul. 53a), but when driven by hunger he tears and devours young lambs (B. K. 15b); he bites men, but does not break a bone (Pes. 49b). "With his sharp scent he smells the bread hidden three fists deep in the soil" (Pes. 31b). Shepherd-dogs are fed on bread made of flour and bran (Hal. i. 8). Two shepherd-dogs are required to save the flock from the attack of wolves (B. M. vii. 9). While dogs hate one another, they are ready to unite against the attacking wolf (Pes. 113b; Sanh. 105a). The dog depends chiefly on the nourishment furnished him by man, but is as a rule greatly neglected, wherefore God has provided him with the faculty of retaining his food in the stomach for three days (Shab. 154b; Bezah 21a). At times, however, he eats his excrement (B. K. 92b). The excrement of dogs is used for tanning (Ber. 25a; Ket. 77a).

The barking of dogs at midnight (Ber. 3a) gives

people a feeling of safety, wherefore the rule is given: "Dwell not in a town where no barking of dogs is heard" (Pes. 113a). "A dog in a strange city will not bark, and it takes him seven years to feel at home" ('Er. 61a).

The dog is the most shameless of animals (חצוץ בחיות, Ex. R. xlii.); he was one of those who would not abstain from cohabitation in the Ark (Gen. R. xxxvii.). The Mishnah (B. K. vii. 7) forbids the keeping of dogs unless they are chained; in cities,

near the seacoast or the frontier, they may for safety's sake be let loose at night (B. K. 83a). According to **The** Tosef., B. K. viii. 17, and B. K. 80b, **Keeping** the raising of small Cyprian dogs is **of Dogs.** allowed. These seem to be the little dogs (*κυνάρια*) that "eat of the crumbs which fall from their master's table" (Matt. xv. 26, 27).

In the time of the Amoraim the ordinary dog does not appear to have been regarded as ferocious; for it is said: "One should not raise a bad dog [כלב רע] in the house, this being a transgression of Deut. xxii. 8, 'Thou shalt not bring blood upon thine house'" (B. K. 16b, 46a; compare Shab. 63a; Yer. B. K. vii. 6a, with reference to Job vi. 14, Hebr., where לָמָס is interpreted as *λαμδς* = "dog"; see Krauss, "Lehnwörter," *s.v.*). "A dog before the house withholds kindness from one's neighbor, because no one can enter the house."

A wild dog (כלב אנריק = *ἄγριος*) is mentioned as dangerous to handle (Gen. R. lxxvii.), as is also a young dog ('Er. 86a). A mad dog is so dangerous that he may be killed even on Sabbath (Shab. 121b). Rabies is the effect of an evil spirit or of witchcraft; and its signs are: the dog keeps the mouth open; his saliva is constantly flowing; his ears hang down; his tail lies closely upon his loins; he walks on the sideways of the street, and does not bark (Yoma 83b). The cure for hydrophobia is the eating of a part of the dog's diaphragm (Yoma viii. 6; see FOLK-MEDICINE).

In the course of time a certain affection for the dog seems to have been developed among the Jews. In Hor. 13a the dog is said to be distinguished from the cat in that he recognizes his master while the latter does not. In the more recent versions of Tobit vi. 1 and xi. 4 (see Grimm's commentary *ad loc.*; but compare Abrahams in "Jew. Quart. Rev." i. 288) the dog follows Tobias on his journey from home and back. According to Rab. in Gen. R. xxii., the sign given by God to Cain (Gen. iv. 15) is to be explained that he was given a dog as companion or guardian. Idle housewives were known to play with dogs (Ket. 61b). "For his friendly conduct

at the exodus of the Hebrews when **The** he did not 'move his tongue against **Faithful** man or beast' (Ex. xi. 7), God compensated the dog by telling the people **Dog.** that the meat forbidden to them should be cast unto him" (Mek., Mishpatim, 20, on Ex. xxii. 30).

Especially noteworthy is the fact that the story of the faithful dog which Dunlop ("History of Prose Fiction," ch. vii.; see Index, *s.v.* "Gellert") and Ben-fey ("Panchatantra," 1859, i. 483) have traced through the various literatures of the East and the West, is

found for the first time in Yer. Ter. viii. 46a and Pesik. x. 79b as one of R. Meir's fables used as a haggadic illustration of Prov. xvi. 7. Some shepherds had curdled milk for a meal, when in their absence a serpent ate of it and thus (as was the belief) instilled poison into it. The dog, which had witnessed the act, began to bark when his masters, on their return, proceeded to eat it; but they would not heed his voice of warning. So he hastened to eat it all up and fell down dead, having thus saved his masters' lives. In gratitude, the shepherds reverently buried the faithful dog, and erected a monument to him which is still called "The Dog's Monument" (נפשא דכלבא).

The Jewish belief was that the howling of dogs (כלבים נוכים) betokened the presence of the angel of death, or death itself in the vicinity (compare Wuttke, "Der Deutsche Volksaberglaube," 1869, § 268); their cheerful (sportful) barking (כלבים משחקים), the presence of the prophet Elijah—that is, some joyful event (B. K. 60b). "If one goes out to select a wife for himself and hears the barking of dogs, he may divine in their voices an omen of good or of evil" (Gen. R. lix.; the reading, however, is doubtful).

The idol Nibhaz (II Kings xvii. 31; "Nibhan," נבהן, according to David Kimhi) was taken to have been the image of a dog (Sanh. 63b). The name of "Pene Melek" (Moloch's Face) was to be changed into "Pene Keleb" (Dog's Face; 'Ab.

Golden Dogs Barking. Zarah 40a). The Egyptian dog or jackal-god, as guardian of the dead, together with the two golden images of dogs (jackals) which were used as

symbols of the two hemispheres (Brugsch, "Religion und Mythologie der Alten Aegypter," 1888, p. 670), appears in the Haggadah in the following legendary form:

"The Egyptians, in order to prevent Joseph's body from being taken from them, had two dogs of gold [or brass] placed on his tomb and endowed with witchcraft with the power of frightening away every intruder by their loud barking. When Moses came to take the bones of Joseph the two dogs began to bark, but he addressed them, saying: 'You are the work of deceit, and you would not move your tongues if you were genuine dogs'" (according to Ex. xi. 7; Pesik. x. 86a; Ex. R. xx.; see Brüll's "Jahrb." i. 150; also p. 151, note, for cabalistic comments upon the passage).

"Dog" is also the synonym in rabbinical literature for shameless and relentless people, and therefore for wicked heathen. The time of general degeneracy is a time when "the generation will have the face of the dog" (Sotah ix. 15). R. Joshua ben Levi compares the righteous to the guests invited to the king's table, and the wicked heathen to the dogs who obtain the crumbs that fall therefrom (Midr. Teh. to Ps. iv. 8, based upon Isa. lvi. 10, 11). R. Ishmael b. R. Jose called the Samaritans dogs, as "being as adhesive to idolatrous customs as the dog is to the flesh of carcasses" (Gen. R. lxxxi.). Just as the dog must be beaten by the master, so must the wicked be smitten by God (Ex. R. ix., with reference to Ps. lix. 7; compare Sanh. 109a: "As the dog scents food from afar, so do the wicked scent the bones of the rich for pillage"). The epithet "dog" used for heathen in the New Testament (Matt. xv. 26; Phil. iii. 2) is explained hereby; but the statement of Eisenmenger, "Entdecktes Juden-

thum," i. 714-716, that the Jews call non-Jews (Christians) "dogs," repeated often and referred to in Meyer's commentaries to Matthew, *l.c.*, as well as the Talmudical quotations in Herzog-Hauck's "Real-Encyc." *s.v.* "Hund," and in Cheyne and Black, "Encyc. Bibl." *s.v.* "Dog" (obviously based on the misunderstood passage in Wünsche, "Neue Beiträge zur Erläuterung der Evangelien," 1878, p. 189), are altogether incorrect. The epithet "keleb" (dog) is given as a nickname to miserly Jews (see Tendler, "Sprichwörter und Redensarten," 1860, Nos. 270 and 909).

The dog is equally prominent in Jewish folk-lore and in Chaldean magic (see Lenormant, "Magic und Wahrsagekunst der Chaldäer," Jena, 1878, p. 471); being especially connected in mythology with death or the nether world (see the dogs of Hecate in Rhode, "Psyche," 1894, pp. 221, 363, 367, 375; the jackal dog-god Anubis in Egypt in Brugsch, *l.c.*, pp. 252, 670; Zend Avesta, Vendidad, v. 29, in "Sacred Books of the East," iv. 58; compare "Shayast la Shayast," ii. 1, x. 10; Nork, "Etymologisch-Symbolisch-Mythologisches Realwörterbuch," *s.v.* "Hund").

DOHM, CHRISTIAN WILHELM VON:

German historian and political writer; advocate of the Jews, and friend of Moses Mendelssohn; born in Lemgo Dec. 11, 1751; died on his estate near Nordhausen May 29, 1820. Dohm, who was deeply moved by the humanitarian ideals of the era of enlightenment, wrote a work in two volumes on Jewish emancipation in 1781. He did this at the suggestion of Mendelssohn, to whom the Alsatian Jews had appealed for aid, but who thought that such a work would produce a better effect if written by a Christian. Dohm's work dealt not only with French Jews, but with the condition of the Jews in the different stages of their history, and argued for their political equality on grounds of humanity and justice. The work appeared at Berlin under the title "Ueber die Bürgerliche Verbesserung der Juden," and passed rapidly through two editions. Dohm demanded that the Jews be treated as human beings, and declared that his work was no apology for them. Their religious convictions would not prevent their performance of the duties of citizenship. His book aroused wide interest, and he was even accused of standing in Jewish pay. He was fêted by the Jews, and the communities of Berlin, Halberstadt, and Surinam passed votes of thanks. The adverse criticisms of Dohm's work, moreover, drew Mendelssohn into the arena, and he expressed his views on Jewish emancipation in the preface to Marcus Herz's translation of Menasseh ben Israel's "Vindiciæ Judæorum." Mendelssohn criticized some of Dohm's contentions, especially those in which he sought to favor the legislation initiated by Frederick the Great. Dohm also wrote an article in French on the colony of Surinam.

DOKSHITZY: Town in the government of Minsk, Russia. The census of 1897 shows a population of 3,647 (other authorities place it at 5,720), of whom more than 3,000 are Jews; in 1860, according to Semenov, "Slovar Rossiskoi Imperii," there were only 790 Jews. The latter are engaged in commerce and trades. There are 368 artisans. Since 1893 the stocking-making industry has developed in the town. The remuneration of labor, particularly of female labor, is very low. For this reason merchants from Wilna find it profitable to supply Jewish girls with machinery and raw material for the making of stockings. The annual value of the stockings made there and sent to Wilna is 25,000 rubles. The abundance of flax in the district enables about 120 Jews to find employment in cleaning it, and there are about 207 day-laborers.

DOLAN BELLAN: French physician; lived at Carcassonne in the fourteenth century. He was a contemporary of the physician Jacob de Lunel, who removed from Carcassonne to Tarascon, where he practised in 1424. Dolan Bellan is probably identical with Maystre Bellant, a surgeon who, with Bénédict du Canet of Arles (Maestro Bendig) and Moses Marveaux or Marnan of Marseilles, was summoned to attend King Louis XI. in 1419-20. A Jew called "Bellan" was known in Carpentras in 1357 ("Rev. Et. Juives," xii. 193).

S. K.

DOLARO, SELINA: Anglo-American actress and singer; born at London in 1852; died in New York city Jan. 23, 1889. She studied music at the Paris Conservatoire under Auber, and made her début Jan. 20, 1870, as the Spanish princess in "Chilperic" at the Lyceum Theater, London. On account of her good voice she was selected to sing in the première of a production of "Carmen" in English, and subsequently as *Clarette* in "Mme. Angot," *Geneviève de Brabant*, and in an English version of "Les Dragons de Villars." Then she leased the Haymarket Theater, London, and produced Gilbert and Sullivan's "Trial by Jury." In 1877 she went to the United States as a member of Colonel Mapleson's Opera Company; but her voice lacking strength, she severed her connection with the impresario. In 1879 she appeared at the Folly Theater, New York, as the heroine in "The First Night." Four years later Mme. Dolaro appeared as *Olivette* in Planquette's opera of that name at the Bijou Theater. Her voice failing, she forsook opera and joined the company of Mrs. Fiske (then Minnie Maddern), supporting her in Sardou's "Agnes."

Mme. Dolaro wrote two plays, "Justice" and "Fashion"; a novel, "Bella Demonica"; and an autobiography under the rather startling title "Mes Amours."

DOLITZKI, MENAHEM MENDEL: Russian Hebrew poet; born in Byelostok April 3, 1856. He began to compose poetry and prose very early, often supplementing and spicing the quarrels of his schoolmates with lampoons in Biblical Hebrew. In 1880 Dolitzki left Byelostok, and after spending some time in Kiev settled as a teacher in Moscow. In 1892 he went to the United States, and settled in New York.

His first considerable work was the satirical poem "Likḳuy Shene ha-Meorot," which appeared in "Ha-Shahar" (ix.). It was afterward published separately (Vienna, 1879). His model letter-writer, "Shebet Sofer," was published in Vienna in 1883; and his "Betok Leba'im" (St. Petersburg, 1884), a novel, first appeared serially in "Ha-Meliz." Another novel, "Mi-Bayit umi-Hutz" (Wilna, 1891), describing the persecutions of the Jews in Rumania, is considered a masterpiece (see Perez in "Jüdische Bibliothek," ii. 69, Warsaw, 1892). His other model letter-writer, "Nib Sefatayim" (Wilna, 1892), has been reprinted many times. The first attempt to collect his poetical works was made in America, "Kol Shire Menaḥem" appearing in New York (1895), followed by "Shire Menaḥem" (*ib.*, 1899). They contain poems which have appeared in various Hebrew periodicals in America and abroad. In America Dolitzki also essayed works of fiction in Yiddish, and some of his novels, as "Der Gebildeter Merder" (Chicago, 1897), or "Shtarker von Eisen" (New York), attained popularity. He furthermore edited the Yiddish monthly magazine "Die Zeit," which appeared in New York from Dec., 1897, to Sept., 1898. The unfinished poem "Ha-Halom we-Shibro," which appeared in "Ha-Ibri," 1893, Nos. 8-19, and which describes the sufferings of a Jewish CANTONIST, is considered by him to be the best of his poems.

DOMAIN, PUBLIC (רשות הרבים), literally, "of the many"): As distinguished from private domain (ר' היחיד), public domain is prominent in many branches of rabbinic lore, especially in the law of Sabbath observance; for on the Sabbath it is forbidden to carry anything but one's clothing and ornaments from the private into the public domain, or vice versa; or from one man's private domain to that of another; or for a distance of four cubits within the public domain. But the character of the place, whether public or private, may also affect property rights, as is pointed out in the article ACCIDENT and ALIENATION, where it is shown that the "semita" (סיטמא), or sidewalk near the houses, which probably, along with its Latin name, came into vogue under the Roman occupation, has a character and effect of its own.

It appears from the whole tenor of the Mishnah (compare COMMUNITY, ORGANIZATION OF; COR-

PORATION) that in the cities of Palestine the smaller houses were grouped around an open place; this place, or the whole group of buildings with it, being known as a court (חצר), which had one covered entrance (מכני). A court having more than one entrance from the street, or even a house with more than one opening, seems to have been exceptional.

Besides the small houses thus grouped around an open court, mention is made of a many-roomed house (בירה, literally "a palace") corresponding to the "insula" of the Romans. Each of such houses had at its front from eight to twelve pillars, the space between which was part of the private domain. Between the pillars was the well for the house, so that water might lawfully be drawn from it and brought into the house on the Sabbath. Minute directions concerning both "courts" and "palaces" are given in the treatise 'Erubin (ch. i., ii.; houses with two openings are referred to in ix. 3), which directions must be followed to raise the desired character of privacy for Sabbatic purposes.

Speaking generally, the highways—that is, streets and public places in the town, and roads in the settled part of the country—are public domain. But the wilderness, or unsettled country, having generally no private owner, is preeminently "domain of the many" beyond any other spot; yet within the wilderness a private domain can be improvised by forming a corral of the wagons and other implements of a caravan (שיירה); this with the space enclosed is treated like a court within a town ('Er. i. 8).

A navigable body of water is public domain; but here the laws, either civil or ritual, are not fully applicable. A ship is for all purposes private domain. Compare SABBATH.

DOMBROVA. See GRODNO.

DOMBROVITZA: Town in the government of Volhynia, Russia. It has a total population of about 25,000, including 6,000 Jews, about 1,000 of whom are artisans. The most general occupations are tailoring and shoemaking, each employing about 195 persons. The manufacturing output of the town is sold at the neighboring fairs. There are about 600 day-laborers, who receive from fifteen to twenty cents a day as wages. Considerable attention is paid to the culture of tobacco, in which 260 Jews are engaged. There are 19 Jewish gardeners, 40 truck-farmers, and 27 dairy-farmers.

DOMEIER, ESTHER. See BERNARD, ESTHER.

DOMICIL: Place of abode; dwelling; the place where a man has his true, fixed, permanent home and principal establishment, and to which, whenever he is absent, he has the intention of returning.

The place in which a man establishes himself with the intention of remaining there permanently, becomes, according to Jewish law, his domicile for all purposes, civil as well as religious. This intention may be either avowed or implied. When the intention is avowed he is immediately considered in all respects a member of the locality in which he has settled, and he is obliged to follow all the laws and

customs peculiar to it. If the intention is not avowed it may be implied in different ways, as will be demonstrated.

One who had lived in a place for twelve months, or who had bought a dwelling-house for himself, was compelled to share in the taxes and all other imposts levied on the people of that place (see COMMUNITY, ORGANIZATION OF). If, however, he inherited a house, or a house was given to him in that town, it did not become his domicile, and he was exempt from the obligations placed on the citizens of the town. A residence of twelve months made the place his domicile only when he remained of his own free will. If he was compelled to stay there on account of sickness or the like, it was not considered his domicile (B. B. 7b; Maimonides, "Yad," Shekenim, vi. 5; Shulhan 'Aruk, Hoshen Mishpat, 163, 2, Isserles' gloss).

Regarding a man's obligation to contribute to the different charitable organizations of the town, the law varied. One who had lived in a

Regarding place for thirty days was compelled
Mem- to contribute to the free kitchen
bership of ("tamhuy"); for three months, also
Com- to the general charity; for six months,
munity. also to the funds for providing garments for the poor; for nine months,

also to the funds for defraying the funeral expenses of the poor; for twelve months, to all the expenses of the community (B. B. 8b; compare "Yad," Matenot 'Aniyim, ix. 12; Shulhan 'Aruk, Yoreh De'ah, 266, 5).

Two distinct classes of residents were recognized by the Rabbis: (a) the men of the town, comprising all those who had lived there more than twelve months, and (b) the inhabitants of the town, or all those who had lived there more than thirty days, but less than twelve months. Hence, one who vowed not to derive any benefit from the "inhabitants" of a certain place, included in his vow all the people that had lived there more than thirty days. But if he said in his vow "the men of the place," he might still derive benefits from all those who had lived there less than twelve months (Yer. Ned. iv. 5; Sanh. 112a; "Yad," Nedarim, ix. 17; Yoreh De'ah, 217, 32). If a man lived for thirty days in a place whose inhabitants turned to idolatry, and he joined in their worship of idols, he was killed by the sword, the punishment for communal apostasy, and not by stoning, the punishment for individual apostasy; the Biblical expression in that connection being (Deut. xiii. 16): "Thou shalt surely smite the *inhabitants* of that city with the edge of the sword" (Sanh. 112a; Maimonides, "Yad," 'Ab. Zarah, iv. 9).

A married woman was obliged to make her domicile with her husband; and if she refused to follow him he might divorce her and decline to pay the stipulated sum of her marriage contract ("ketubah").

Domicil He could not,
of Married however, compel her to change her
Women. domicile from a large to a small city,

or vice versa, or from a costly to a cheap house, or vice versa. If he wished to go to Palestine, she had to follow him under all circumstances, unless she pleaded the danger of travel on

certain roads (Ket. 110a; "Yad," Ishut, xiii. 17; Shulhan 'Aruk, Eben ha-'Ezer, 75).

The privacy of one's domicile could not be violated. Neither the creditor nor the court-messenger could enter one's house to take a pledge for a debt of money (Deut. xxiv. 10). If it was a debt of wages or of hire of any kind, the creditor might enter the debtor's house to take a pledge (B. M. 115a; compare Sifre, Deut. *ad loc.*). In all cases the house of the surety might be entered for the purpose of taking a pledge (B. M. 113a; "Yad," Malweh, iii. 4, 7; Hoshen Mishpat, 97, 6, 14).

On the Sabbath one might walk two thousand cubits on all sides from the place of his residence. By a legal fiction, the Rabbis decided that if before the Sabbath a man placed food for two meals in some safe place, such place became his domicile for that day, and he might walk two thousand cubits from that point on all four sides ("Erube Tehumim"; "Yad," Shabbat, xxvii.; Shulhan 'Aruk, Orah Hayim. 408 *et seq.*).

J. H. G.

DOMINICANS. See FRIARS.

DOMINICO IROSOLIMITANO or **HIEROSOLYMITANO** (דומיניקו ירושלמי): Talmudist, physician, author, and expurgator of Hebrew books; born in Safed, Palestine, about 1550; died in Italy about 1620. He was educated at the rabbinical college in his native city, studying not only Talmud, but also medicine. After having been granted the degree of doctor and the title of "Rab," he lectured on Talmudic law in Safed. His fame as a physician spread far and wide, and finally reached the ears of the Sultan of Turkey, who summoned him to Constantinople as court physician.

Yerushalmi subsequently became a convert to Christianity; he went to Rome, and was received at the College of the Neophytes, where he taught Hebrew. During the most active period of the expurgation of Hebrew books under the Inquisition in Italy Dominico's services were in great demand; and first in Venice (1578-92 ?), later as chief reviser of the censorship commission in Mantua (1595-97), he had opportunity for placing his signature in more books and manuscripts than any other of the Italian expurgators. His activity in this direction continued at intervals—in places, however, not yet identified—almost until his death.

Dominico's works included, according to his own statement, "Ma'ayan Gannim" (Fountain of the Gardens), on the fundamental principles of the Christian faith. He also translated into Hebrew the whole of the New Testament, and most of the Apocryphal books (1615-17). He was the compiler of the "Sefer ha-Zikkuk" (Book of Expurgation), still in manuscript, one copy of which (in the library of Cardinal Berberini, Rome) shows revision by him as late as 1619.

Bartolucci dates Dominico's conversion at the beginning of the seventeenth century, at about his fiftieth year. But even if it be assumed that the dates of his earliest censorship have been misread, it is certain that he acted as censor before 1595. Furthermore, Bartolucci and Wolf state that Nicolaus Mursius in his "Relatione della Città di Con-

stantinopoli" (Bologna, 1671) mentions as court physician of the Turkish sultan a Jew who later became converted under the name of "Dominico Ierosolymitano." Wolf holds that he is identical with the subject of this article; Bartolucci, on the other hand, states that Mursius speaks of one whom he (Mursius) had himself seen in his travels, and who was still living as a Christian in Constantinople in direst poverty, though as a Jew he had held, under the name of Pelaso, third place among the sultan's physicians.

W. P.

DOMITIAN (Titus Flavius Domitianus): Roman emperor 81-96; born in 51; assassinated in 96. In 69, when his father Vespasian was proclaimed emperor, Domitian was the center of the Flavian party in Rome. Succeeding his brother Titus in the government, he provoked the vigorous resistance of the aristocracy by his despotic measures, which aimed at the complete supersession of the powers of the Senate. His mistrust and financial embarrassment drove him, after a short period of moderation and good administration, to sanguinary measures. He maintained the pagan faith against the various dissenting sects; and twice (89 and 95) expelled the philosophers from Rome. He dealt most severely with converts to either Judaism or Christianity, the penalty being either death or confiscation of property. Even his cousin, the consul Flavius Clemens, was put to death for embracing the Jewish faith; while the latter's wife Domitilla was exiled to the isle of Pandataria (95). The severe measures projected at this time against the Jews, which occasioned the journey to Rome of R. Gamaliel and his colleagues, were frustrated probably by Domitian's assassination. During his reign the Jew-tax was collected in a most cruel manner. Characteristic of his distrust of Judaism and Christianity is the fact that he summoned the descendants of David to appear before him, and released them only after he had satisfied himself of their harmlessness.

DOMITILLA, FLAVIA. See FLAVIA DOMITILLA.

DOMNINUS or **DOMNUS:** Jewish philosopher; lived between 400 and 480. He was a native of Laodicea, or Larissa, in Syria; the pupil of Syrian, whom he perhaps succeeded as teacher of the Neoplatonic school at Athens. He was a contemporary of the philosopher Proclus, whose pupil Marinus often mentions Dominus. His own pupil Gesius, who supplanted him in his old age, is identical with the Jasius whom Arabian writers mention. The sources speak of him as a Jew, and Suidas relates that when Dominus was afflicted at Athens with "blood-spitting," he did not hesitate to eat

pork, while his companion Plutarchus, a pagan, who also was ill, refrained from that remedy. Suidas therefore does not consider Domninus as a true philosopher; he is credited with being a fine mathematician, but superficial in other branches of philosophy. A follower of Plato, and therefore attacked by Proclus, he defended himself in a work entitled *Καθαριστικὴ τῶν Δογματῶν Πλάτωνος* ("A Purge of Plato's Theories").

Not one of his works is extant. Like other Neoplatonists, Domninus practised theurgy. He died at an advanced age, probably at Athens.

DOMUS CONVERSORUM: House in London founded by order of Henry III. in the year 1232 to provide a home and free maintenance for Jews converted to Christianity. As, up to 1280, on conversion all their property was escheated to the king, they were left destitute. The buildings and the chapel attached to them were erected in Chancery Lane, London, on the site now occupied by the rolls office. The hope was entertained that by the establishment of this refuge there would result a conversion en masse of the English Jews. The conception of the scheme for the Domus originated

expulsion (1290), about a hundred Jews in all participated in the benefits of the institution—a small proportion of weaklings out of the 16,000 Jews in England. All the expenses of the Domus were borne by the royal treasury, while some of the bishops left bequests to augment its funds. In addition to these sources of income a poll-tax, called the "chevage," was levied upon all Jews above the age of twelve in support of their converted brethren. The treasury grant amounted annually to £202.0.4 (in present cur-

MONS CHAPEL, CHANCERY LANE, LONDON. FORMERLY SITE OF THE DOMUS CONVERSORUM.

rency about £4,000). At times this contribution was not forthcoming; and the "conversi" were reduced to sore straits of poverty. In 1271 the king addressed a letter to the mayor of London and to the warden of the Domus, complaining of numerous irregularities in the management of the house; and it was not until the year 1280, under the custos John de St. Denys, that definite regulations for the control of the institution were drafted. In 1281 a rabbi of Oxford, Belager by name, entered the home. Nine years later, when the expulsion of the English Jews took place, the number of converts stood at eighty.

The value of the history of the Domus after the year 1290 consists in the testimony that its records

afford of the steady stream of Jews **After the** into England in spite of the edict of **Expulsion.** expulsion. A few of these persons allowed themselves to be baptized, and accepted the shelter of the Domus. These people came from France, Spain, Portugal, Germany, and the Barbary states.

In 1305 there were twenty-three men and twenty-eight women, whose baptismal names are all known, residing in the Domus. From 1331 there exists a series of manuscripts in the rolls office giving valuable information upon the important subject of the presence of Jews in England from the reign of Edward I. to that of James I. These documents range themselves under three heads: (1) orders for the admission of a convert, frequently supplying personal details; (2) the statement of annual expenses of the warden, who from about the year 1330 also held the post of master of the rolls (in these returns the names of the converts are inserted); (3) a large number of receipts, some signed in Hebrew, given once a year by the converts.

In 1330 there still remained eight men and thirteen

DOMUS CONVERSORUM, LONDON.
(After a drawing by Matthew Paris.)

with the clergy, a similar institution on a much more modest scale having been commenced by the clergy of Southwark in 1213. A chaplain was appointed to instruct the converts, and a warden ("custos"; in Norman French, "le gardien") to attend to their temporal affairs. Each male inmate received 1½d., equal to about 2s. 6d. of the present currency, and each female 1d. During the fifty-eight years that elapsed from the time of the founding of the Domus until the year of the great

women from the pre-expulsion period. By the year 1353 the Domus possessed only one convert, a woman named Claricia of Exeter, who had been admitted several years before the expulsion. She died in 1356; and a month after her death a Spanish Jew, John of Castile, found his way to England and the Domus. From the year 1330 until 1393 eighteen men and two women were admitted. Two

of these, Aseti Briarti and Perota Briarti, of France, were husband and wife; while Thomas Levyn (Levi), of Spain, ran away suddenly after a stay of thirty-two days. In 1399 a woman named Elizabeth, described as the daughter of Rabbi Moses, "episcopus Judæorum," joined the converts. She remained for seventeen years, and married a London tailor named David Pole. In 1409 two women, a mother and her daughter, who had apparently been

mentioned in the records from the year 1492 to 1538, Edward Scales from 1503 to 1527, and Elizabeth Baptista from 1504 to 1532. In the latter year two women were admitted, and were given the names "Katherine Wheteley" and "Mary Cook." In 1506 Thomas Cromwell, the vicar-general of Henry VIII., who had been appointed master of the rolls and warden of the Domus Conversorum, lived in the home.

After 1551, in which year Mary Cook died, the Domus remained empty until 1578, when an interesting convert, Nathaniel Menda (formerly called Jehooda Menda), was admitted. He remained till 1608. This man had come from the Barbary states and had been publicly baptized in London by John Foxe, the author of the "Book of Martyrs." The receipts given by Menda for his annual pension are, with one exception, all signed in Hebrew characters.

RECEIPT FOR 40S. 7½D. PAID BY THE DOMUS CONVERSORUM OF LONDON TO JACOB WOLFGANG (1608).

living in Dartmouth for some time, were admitted into the Domus. There is no indication in the records of how they came to be in Dartmouth or of their native country. The mother, Johanna, died after a stay of forty years, and the daughter, Alice, after forty-five years. The longest period of residence was that of Martin, son of Henry of Woodstock (1413-68); while other converts who lived in the Domus for many years were John de Sancta Maria of Spain (1371-1405), Henry of Stratford (1416-41), John Durdragt of Dordrecht, Holland (1425-55), John Seyt (1448-88), Edward of Westminster (1461-1503), and John Fernando of Spain (1487-1503). In the year 1400 there were two inmates; by 1450 this number had grown to five; and in 1500 there were four converts. The expulsions from Spain and Portugal appear to have had little effect in increasing the number of residents of the Domus. A woman called Elizabeth Portingale (of Portugal) is men-

In 1581 Fortunati Massa (originally "Cooba," *i.e.*, Jacob, Massa) joined Menda until 1598. The presence of these two quondam Jews in the Chancery Lane home is coincident with the production of Marlowe's "Jew of Malta" and Shakespeare's "Merchant of Venice."

In 1598 Philip Ferdinandus, a learned Polish Jew, became a recipient of the benefits of the Domus.

This man had been professor of Hebrew at Oxford and Cambridge, and later on at Leyden University. He died in the Domus in 1600; and three years later there entered Elizabeth Ferdinando, perhaps the widow of Philip. In the year of the Gunpowder Plot, Arthur Antoe was admitted, and in the following year, Jacob Wolfgang, a German.

The records end at the year 1608; and summing up the results of these investigations it is found

that from the year 1331 to 1608 thirty-eight men and ten women entered the Domus Conversorum, while mention is made in the records of the period of four other converts of whom nothing is said in the archives of the Domus.

As late as the year 1717 a London converted Jew petitioned King George I. for a grant from the funds of the Domus. The buildings once occupied by the converts were later used as storehouses for the rolls of Chancery, and have since been demolished. It is a curious fact that in the year 1873 Sir George Jessel, a professing Jew, was appointed to the post of master of the rolls, which formerly was combined with the office of warden of the home for converted Jews. The last trace of the Domus was legally swept away by an act of the year 1891.

DONATH, EDUARD: Austrian chemist; born in Wsetin, Moravia, Dec. 8, 1848. He became assistant in Zinřek's chemical institute in Berlin, 1869; assistant at the technical high school in Brřnn, 1870; assistant agricultural chemist at the experiment station in Vienna, 1874; and associate at the Bergakademie in Leoben, 1875. At present he is professor at the technical high school in Brřnn. He embraced the Christian faith in 1876.

Besides papers in various chemical journals, he has published: "Monographie der Alkohol-Gärung als Einleitung in das Studium der Gärungstechnik," Brřnn, 1874; "Die Prüfung der Schmiermaterialien," Leoben, 1879; (with K. Pollak) "Neuerungen in der Chemie des Kohlenstoffes und Seiner Anorganischen Verbindungen," in "Sammlung Chemischer und Chemisch-Technischer Vorträge," Stuttgart, 1898; (with B. M. Margoscher) "Das Wollfett, Seine Gewinnung, Zusammensetzung," etc., *ib.* 1901.

DONATI, CESARE: Italian novelist; born at Lugo, Romagna, Sept. 21, 1826. Persecuted by the Austrian government for having taken part in the revolution of 1848, he left his home in Finale in 1849 and went with his family to Toscana. He completed the study of law at Pisa (1852), but on account of his father's death studied journalism in order to support his widowed mother and his brothers and

sisters. In 1859 he was received into the Ministry of Education, was afterward made director of museums and art galleries in Florence, and finally became chief of the department. He was also created a knight of the Cross of Merit of Savoy. Besides contributing to the "Spettatore," "Indicatore Letterario," "Nuova Antologia," and "L'Eco d'Europa," Donati wrote a collection of novels, "Foglie Secche," 2d ed., Florence, 1884; "Rivoluzione in Miniatura," his best work (1876); "Bozzetti Romani," Rome, 1884; "Storie Bizzarre," 1888. Donati now (1903) lives at Rome.

DONATI, MARCO: Italian lawyer; born in Padua Sept. 4, 1842; died at Terni June 11, 1901. Before he had completed his academic career he left the university in order to fight under Garibaldi. He served in the war with distinction, and on his return completed his law studies, and then opened an office at Padua, where he soon became one of the most popular lawyers. For many years he sat in the Italian Chamber, representing first Belluno and then Conegliano. For some years he was president of the Jewish community of Padua. He was created commander of the Order of the Crown of Italy.

Donati published a small volume on the art of advocacy and a memorial oration on King Humbert I.

DONATO D'ORVIETO. See NATHAN JEDIAH BEN ELIEZER.

DONIN, NICHOLAS, OF LA ROCHELLE: Jewish convert to Christianity; lived at Paris in the first half of the thirteenth century. Having expressed his doubts as to the value of the oral tradition, he was in 1235 excommunicated by R. Jehiel of Paris in the presence of the whole congregation and with the usual ceremonies. Having for ten years lived in the state of excommunication, though still clinging to Judaism, he became dissatisfied at last with his position, and embraced Christianity, probably under the influence of Christian propagandists, who saw the benefit they could derive from such a recruit, embittered as he was against his coreligionists. Donin joined the Franciscan order. His first act of retaliation was to stir up the Crusaders to the bloody persecutions in Brittany, Poitou, and Anjou, in which 3,000 Jews were killed, 500 accepting the alternative of baptism. In 1238 Donin went to Rome, presented himself before Pope Gregory IX., and denounced the Talmud. Thirty-five articles were drawn up, in which Donin stated his charges.

The pope was easily convinced of the truth of the accusation, and despatched to the authorities of the Church transcripts of the charges formulated by Donin, accompanied by an order to seize all copies of the Talmud and deposit them with the Dominicans and Franciscans. If an examination substantiated the charges of Donin, the books were to be burned. This order was generally disregarded, except in France, where the Jews were compelled under pain of death to surrender their Talmuds

(March, 1240). Louis IX. ordered four of the most distinguished rabbis of France—Jehiel of Paris, Moses of Coucy, Judah of Melun, and Samuel ben Solomon of Château-Thierry—to answer Donin in a public disputation. In vain did the rabbis disprove the charges of blasphemy and immorality which were the main points of Donin's arraignment. The commission condemned the Talmud to be burned.

I. BR.

DÖNMEH: A sect of crypto-Jews, descendants of the followers of Shabbethai Zebi, living to-day mostly in Salonica, European Turkey; the name (Turkish) signifies "apostates." The members call themselves "Ma'aminim" (Believers), "Haberim" (Associates), or "Ba'ale Milhamah" (Warriors); but at Adrianople they are known as "Sazanicos" (Little Carps)—a name derived either from the fish-market, near which their first mosque is supposed to have been situated, or because of a prophecy of Shabbethai that the Jews would be delivered under the zodiacal sign of the fish. The Dönmehe are said to have originated with Jacob Zebi Querido, who was believed to have been a reincarnation of Shabbethai.

The community is outwardly Mohammedan (following the example set by Shabbethai); but in secret observes certain Jewish rites, though in no way making common cause with the Jews, whom they call "koferim" (infidels). The Dönmehe are evidently descendants of Spanish exiles. Their prayers, as published by Danon, are partly in Hebrew (which few seem to understand) and partly in Ladino. They live in sets of houses which are contiguous, or which are secretly connected; and for each block of houses there is a secret meeting-place or "kal" ("kahal"), where the "payyetan" reads the prayers. Their houses are lit by green-shaded lamps to render them less conspicuous. The women wear the "yashmak" (veil); the men have two sets of names: a religious one, which they keep secret, and a secular one for purposes of commercial intercourse. They are assiduous in visiting the mosque and in fasting during Ramadhan, and at intervals they even send one of their number on the "hajj" (pilgrimage) to Mecca. But they do not intermarry with the Turks.

They are all well-to-do, and are prompt to help any unfortunate brother. They smoke openly on the Sabbath day, on which day they serve the other Jews, lighting their fires and cooking their food. They work for the Turks when a religious observance prevents other Jews from doing so, and for the Christians on Sunday. They are expert "katibs" or writers, and are employed as such in the bazaars and in the inferior government positions. They have the monopoly of the barber-shops. The Dönmehe are divided into three subsects, which, according to Bendt, are: the Ismirlis, or direct followers of Shabbethai Zebi of Smyrna, numbering 2,500; the Ya'kubis, or followers of Jacob Querido, brother-in-law of Shabbethai, who number 4,000; and the Kuniosos, or followers of Othman Baba, who lived in the middle of the eighteenth century. The last-named sect numbers 3,500. Each subsect has its own cemetery. Bendt says that the first shave the chin;

the second, the head; but the third allow the hair to grow upon both. Danon calls the first "Tarpushlis," those who wear a special form of turban; the second, "Cavalieros," who wear a peculiar pointed shoe; the third, "Honiosos" or "Camus," who can be distinguished by their flat noses.

The ordinances which govern the Dönmehe, as given by Grätz and Bendt, number sixteen; but as Danon has published them in Ladino, they number eighteen (אינקומי נראנסאם סדרים). These refer to the unity of God, to Shabbethai His Messiah, to abstinence from murder, to the reunion on the Sixteenth of Kislev to study the mysteries of the Messiah; they forbid fornication, false testimony, forced conversion, intermarriage with Mohammedans, and covetousness; and enjoin charity, daily reading of the Psalms in secret, observance of the new moon, Mohammedan usages, and circumcision. Danon also gives a list of their twelve festivals, the most sacred of which are the Ninth of Ab, the birthday of Shabbethai; and the Sixteenth of Kislev. The latter is preceded by a fast-day. During their festivals they transact their business as usual. It is only in the evening that, with lighted candles and closed doors, they rejoice. The Dönmehe communities are administered by rabbis appointed by the ab bet din. These rabbis are well versed in Holy Scripture, they know almost by heart the Zohar, and understand Judæo-Spanish, which they regard as a holy language. Children are left in ignorance of their true religion, and are not initiated therein, among the Ismirlis and the Kuniosos, till the age of thirteen, and among the Ya'kubis at marriage. Neither the Ismirlis nor the Ya'kubis believe in the death of their respective saints, and they are always awaiting their return. Every Saturday the Ya'kubis send a woman and her children to the seashore to inquire whether the ship which is to bring Jacob is sighted; and every morning the elders scrutinize the horizon for a similar purpose.

G.

DONNOLO (Δομνολος, diminutive of "Dominus"), or **Shabbethai b. Abraham b. Joel**: Italian physician, and writer on medicine and astrology; born at Oria, in 913; died after 982. When twelve years of age he was made prisoner by the Arabs under the leadership of the Fatimite Abu Ahmad Ja'far ibn 'Ubaid; but was ransomed by his relatives at Otranto, while the rest of his family was carried to Palermo and North Africa. He turned to medicine and astrology for a livelihood, studying the sciences of "the Greeks, Arabs, Babylonians, and Indians." As no Jews busied themselves with these subjects, he traveled in Italy in search of learned non-Jews. His especial teacher was an Arab from Bagdad. According to the biography of Nilus, abbot of Rossano, he practised medicine for some time in that city. The alleged grave-

stone of Donnolo, found by Firkovich in the Crimea, is evidently spurious.

Donnolo is the earliest Jewish writer on medicine, and one of the few Jewish scholars of South Italy at this early time. What remains of his medical work, "Sefer ha-Yakar" (Precious Book), was published by Steinschneider in 1867, from MS. 37, Plut. 88, in the Medicean Library at Florence, and contains an "antidotarium," or book of practical directions for preparing medicinal roots. Donnolo's medical science is based upon Greco-Latin sources; only one Arabic plant-name occurs. He cites ASAPH. In addition, he wrote a commentary to the "Sefer Yezirah," dealing almost wholly with astrology, and called "Hakemani" (in one manuscript, "Tahkemoni"; see II Sam. xxiii. 8; I Chron. xi. 11). At the end of the preface is a table giving the position of the heavenly bodies in Elul, 946. The treatise published by Neubauer ("Rev. Et. Juives," xxii. 214) is part of a religio-astrological commentary on Gen. i. 26 (written in 982), which probably formed a sort of introduction to the "Hakemani," in which the idea that man is a microcosm is worked out. Parts of this introduction are found word for word in the anonymous "Orhot Zaddikim" (or "Sefer Middot") and the "Shebet Musar" of Elijah Kohen. It was published separately by Jellinek ("Der Mensch als Ebenbild Gottes," Leipsic, 1845). The style of Donnolo is worthy of note; many Hebrew forms and words are here found for the first time. He uses the acrostic freely, giving his own name not only in the poetic mosaic of passages from the Book of Proverbs in the Bodleian fragment, but also in the rimed prose introduction to the "Hakemani." He is also the first to cite the Midrash Tillin. In the Pseudo-Saadia commentary to "Yezirah" there are many citations from Donnolo, notably from a lost commentary of his on the BARAITA OF SAMUEL. A. Epstein has shown that extensive extracts from Donnolo are also to be found in Eleazar Rokeah's "Yezirah" commentary (ed. Przemysl, 1889), even to the extent of the tables and illustrations. He is also mentioned by Rashi (to 'Er. 56a), by Samuel of Accho (who calls the "Hakemani" the "Sefer ha-Mazzalot"), and by Solomon b. Judah (1424) in his "Heshek Shelomoh" to Ha-Levi's "Cuzari."

DOOR AND DOOR-POST (דלת): Doors were suspended and moved by means of pivots of wood ("potot") which projected from the ends of the two folds above and below. The pivots were inserted in sockets ("zirim," Prov. xxvi. 14). Doors were fastened by a lock (מנעול, Cant. v. 5; Neh. iii. 3) or by a bar (בריה, Judges xvi. 3; Job xxxviii. 10), and were opened by a key, called "mafteah" (Judges

iii. 25), generally of wood. The rich and powerful probably used keys of metal, which may sometimes have been adorned with an ivory handle. Such a key may have been the one assigned to the steward of the royal palace as a mark of his office, and which he carried on his shoulder (Isa. xxii. 22).

The expression "door-post" occurs twice in the Old Testament, rendering two different terms; viz., "saf" (Ezek. xli. 16), "sill," or, as translated in Judges xix. 27, "threshold," and "mashkof" (Ex. xii. 7), also rendered (Ex. xii. 22, 23) as "lintel." In Ex. xii. 7, 22 the Israelites were commanded to sprinkle the blood of the Passover lamb on the lintel and side-posts of their houses; and in Deut. vi. 9 Moses enjoined the Israelites to write the divine commands "upon the posts ["mezuzot"] of thy house."

E. G. H.

B. P.

These injunctions prove that among the Hebrews, as among many other peoples, the door-posts were an important feature in the religious and superstitious rites, the purpose of which was to protect the house and its inmates against evil spirits and notably against the evil eye. The Deuteronomic law clearly presupposes the practise, and intends the replacing of obnoxious idolatrous inscriptions by the words here given. In modern Mohammedan countries it is still the custom to write over or on the door quotations from the Koran (Lane, "Modern Egyptians," 5th ed., 1871, i. 7, 319, quoted by Driver, "Deuteronomy," p. 93). A similar device to secure "a good abode" is reported of the ancient Egyptians (Wilkinson-Birch, "Ancient Egyptians," 2d ed., 1878, p. 361, in Driver, *l.c.*).

The nailing over the door of a horseshoe, or the hanging of a sprig with appropriate inscriptions, has been generally in vogue among the Teutonic races, and survived even after the introduction of Christianity. Of the Sephardic Jews in Palestine and Africa it is reported that they paint on their door in red a hand with five outspread fingers to secure immunity from the evil eye (Luncz, "Jerusalem," i. p. 19 of Hebrew part, Vienna, 1882). For the rabbinical interpretation of the Deuteronomic law see MEZUZAH.

E. G. H.

DORBOLO or **DURBAL** (דורבול, דורבאל), **ISAAC BEN**: Rabbi about 1150; he traveled much, and knew Poland, Russia, Bohemia, France, and Germany from his own observations. Some time after 1140 he visited R. Tam in Rameru. In Worms, where he remained for some time, he reports having seen a responsum from the rabbis of Palestine in answer to a question addressed to them in 960 (at the time of Otto I.) by the Rhenish rabbis concerning the reported appearance of the Messiah. Though this responsum is mentioned in different sources—the Bern MS. of the small 'Aruk ("Grätz Jubelschrift," p. 31) and Liwa Kirchheim's "Minhage Worms" ("Kaufmann Gedenkbuch," p. 297)—its historical character has been questioned (Brüll's "Jahrbuch," ii. 77; "Jubelschrift," *l.c.*; but see Rev. Et. Juives, xlv. 237). Several additions to the Mahzor Vitry are in the name of Isaac Dorbolo; he is not the compiler of the Mahzor, as C. Taylor supposes. They are indicated either by the author's full name or by a simple ת (= Tosefet). According to Zunz ("G.

S." ii. 32; Isaac's father is identical with the correspondent of Rashi and the martyr of the First Crusade of the same name; but this is chronologically impossible. Rapoport wrongly connected Isaac with R. Isaac of Ourville, author of the lost "Sefer ha-Menahel"; and Schiller-Szinessy, with Isaac of Russia.

Isaac is also mentioned in the "Sefer Asufot" (Berliner's "Magazin," x. 75), in "Shibbole ha-Leket," and in "Kol Bo" ("Monatsschrift," xli. 307).

I. E.—G.

DORIS: First wife of HEROD, whom he married about 45 B.C. The names of her parents are not mentioned, probably because they belonged to the masses, for Josephus says expressly ("Ant." xiv. 12, § 1) that Doris came from the people (*δημότης*) and that she was a Jewess (*ἐκ τοῦ ἔθνους*), this statement contradicting "B. J." i. 12, § 3, where it is said that she was not of mean origin (*οὐκ ἄσχημος*); she was a native of Jerusalem ("B. J." i. 22, § 1). After Herod came to the throne in 37 B.C., he put Doris, by whom he had his eldest son ANTIPATER, away, and married the princess MARIAMNE (*ib.*). But he preferred Antipater, and recalled Doris in order to humiliate Mariamne's sons ("Ant." xvi. 3, § 3; "B. J." i. 23, §§ 1, 2). Doris, as Antipater's mother, was now much honored at court ("B. J." i. 24, § 2), but she was the first to feel the king's wrath. Herod being aroused by a conspiracy, she was deprived of all her jewels, worth several talents, and was again put away (*ib.* i. 30, § 4); however, she still found means to warn her son against his father's anger (*ib.* i. 32, § 1). Her subsequent fate is unknown.

DORMIDO, DAVID ABRAVANEL (also known as **Manuel Martinez Dormido**): Warden of the Jewish communities at Amsterdam and London in the seventeenth century; born in one of the principal cities of Andalusia (Spain), where he held the offices of alderman and life-treasurer of the customs and of the royal revenues. He was, however, imprisoned for five years (1627–32) by the Inquisition, and tortured, together with his wife and sister. On his release he went to Bordeaux, and after staying there eight years went to Amsterdam (1640), where he engaged in Brazilian trade. The conquest of Pernambuco by the Portuguese in 1654 ruined him. At this time the question of the readmission of the Jews to England came up, and Dormido was entrusted with the negotiations by MANASSEH BEN ISRAEL. He went to London; and on Nov. 3, 1654, presented a petition to Cromwell, which the latter recommended to the Council. Cromwell also interceded with the King of Portugal for the restitution of Dormido's fortune. In 1663 Dormido settled in London, where he became president of the first synagogue. His son Solomon was allowed to become a broker of the city of London in 1657, without taking the usual Christological oath.

S. KR.

DORTMUND (Latin, **Tremonia**; Hebrew, **דִּירְמוֹנְיָה**): Capital of the circle of the same name, in the district of Arnsberg and the Prussian province of Westphalia, situated on the Emster. That there were Jews in Dortmund in the middle of the twelfth century is shown by the fact that several Jews living at Cologne at that time were designated as natives of Dortmund (compare Höninger, "Das Judenschreibbuch der Laurenzpfarre zu Köln," p. 9). A letter of protection was granted to the Jews of the city in 1250 by Archbishop Conrad of Cologne, Dortmund having been pledged to him in 1248 by King William of Holland. For this they were to pay 25 marks in Cologne pfennigs. They had also to pay to the king a tax of 84 marks sterling every eighteen months. About 1250 the municipality issued regulations concerning the form and ceremonial to be observed in administering an oath to Jews (see OATH).

The jurisdiction of the Archbishop of Cologne over the Dortmund Jews was confirmed by Albrecht I. in 1298. A year later, in consequence of extortions on the part of the followers of the Margrave of Mark, many Jews left the city. Albrecht rebuked the municipal authorities for having allowed these extortions, and ordered them to recall the Jews and give them adequate protection.

Like many other German communities, that of Dortmund was wiped out in 1349, at the time of the Black Death. But in 1372 Engelbert of Mark allowed the municipality to admit Jews. But every Jew who wished to settle at Dortmund had to conclude an agreement with the municipality, fixing the amount of his taxes. In 1596 the municipality decreed the banishment of the Jews. It is uncertain whether this decree was carried out; and if so, for how long a time. Jews lived at Dortmund at the beginning of the eighteenth century, as is shown by an edict of the municipality dated 1705, forbidding the Jews to trade in horses.

During the eighteenth century the municipality of Dortmund was remorselessly severe in enforcing the poll-tax; and on festivals and Sundays the city was closed to Jews.

During the first fifteen years of the nineteenth century the Dortmund Jews enjoyed the rights of French citizens. From 1815 the history of the community of Dortmund differs in no essential particular from that of other German communities. The Dortmund Jews in 1898 numbered 998 in a total population of 66,544; in 1901, 1,950 in a total of 142,418.

DOSA (or **DOSAI**; an abbreviated form of "Dosithai" or "Dositheos," Δοσίθεος): Father of the tannaite HANINA B. DOSA, famous for his piety.

S. S.

W. B.

DOSA (also known as **Dosai**): Palestinian amora, probably of the fourth century. The Jerusalem Talmud has preserved two of his halakic decisions, and Midrashic literature several of his haggadic utterances. Among the latter is the assertion that the dangerous "snare" from which God will protect man (Prov. iii. 26) is the function of judging in matters of religious law. Dosa died on the new moon of Nisan. This date was especially recorded, because on that occasion refreshments were offered to the mourners (Yer. Mek., end), a custom not usually observed on semi-holidays.

W. B.

DOSA BEN SAADIA: Son of Saadia Alfayyumi. Dosa was a Talmudic scholar and philosopher, but he did not succeed his father as gaon. A responsum by him has been preserved. According to Abraham ibn Daud's chronicle, he entered into correspondence with the nasi Hasdai ibn Shaprut of Spain, and Judah Almadari in his commentary on Alfasi includes him in the list of gaons; while in a glossary to Maimonides' "Moreh Nebukim" he is counted among the philosophers who combated the Greek conception of the eternity of the universe. Some scholars declare Dosa identical with David ben Saadia, who wrote a Talmudic work in Arabic (cited in Bezalel Ashkenazi's "Shiṭṭah Mekubbeẓet" to B. M. 104b) which concerns itself with the refutation of several decisions found in the "Halakot Gedolot," and which contains a reference to another work written by David in Arabic on oath-taking.

A. K.

DOSA B. ṬEBET: Palestinian amora of the fourth century, in whose name the following curious sentences on the two most dangerous instincts of man are handed down by the eminent haggadist Huna (Cant. R. vii. 8): "In His world God has created two instincts, that of idolatry and that of illicit love. The first one has long since been uprooted [in Israel]; the second still exists. 'Whomsoever,' says God, 'can resist this latter instinct I shall consider as having resisted both.'" The father's name, "Ṭebet," which does not occur elsewhere,

is an interesting example of the use of names of months as surnames.

W. B.

DOSETAI or **DOSITHEUS** (Δοσίθεος): A name, corresponding to the Hebrew "Mattaniah" or "Nethaneel," which seems to have been a favorite one both in Palestine and in Alexandria (Josephus, "Ant." xiii. 9, § 2; xiv. 10, § 18; xv. 6, § 2). It has been borne by the following:

Dosetai of Kefar-Yatma, a pupil of Shammai ('Orlah ii. 5). **Dosetai b. Matun**, a tannaite mentioned in a Baraita (Ber. 7b; Meg. 6b) as the author of a haggadic sentence, which in another place (Derek Erez, ii.) is ascribed to **Dosetai b. Judah**. According to Yoma 30b, an amora, Dosetai b. Matun, handed down a sentence of Johanan's; but the correct reading is "Justai b. Matun," which is found in the parallel passage, Zeb. 99a, and is confirmed by the Jerusalem Talmud (Yer. B. K. vii. 6a). On **Abba Jose b. Dosetai** see Bacher, "Ag. Tan." ii. 388.

Of those from the time of the Amoraim who have borne the name the following may be mentioned:

Dosetai, the father of Apotriki or Patriki. (Hul. 64b; compare B. M. 5a). He is perhaps the same Patriki or Patrik who is mentioned as the brother of Derosa (Yer. Yoma iv. 41d). **Dosetai the Elder** (Yer. Ned. x. 42b; Yer. Hag. i. 76d), mentioned with a younger Dosetai. He is probably the Dosetai frequently referred to in Midrashic literature as having handed down the sentences of Samuel b. Nahman and of Levi (Bacher, "Ag. Pal. Amor." i. 488, 492, 503; ii. 431; iii. 695).

Dosetai b. Jannai: Tanna of the latter half of the second century, known especially as having handed down sentences of the tannaim Meir, Jose b. Halaftha, and Eleazar b. Shammu'a. On a journey to Babylon he was ill-treated at Nehardea by the Jewish-Persian authorities, and took revenge by giving a satirical description of the latter. The account of the affair is preserved in two different versions (Git. 14a, b; Yer. Git. i. 43d; Yer. Kid. iii. 64a).

Examples of Dosetai's humor are to be found in his answers to his pupils' questions on the differences between man and woman (Niddah 31b), and in his reply to the question why Jerusalem did not have thermæ like Tiberias: "If Jerusalem had warm springs," he answered, "the pilgrims coming up for the feasts would have dwelt on the pleasures of the baths offered them, instead of considering how best to fulfil the regulations for the pilgrimage" (Pes. 8b). The words of Eccl. xi. 6 ("In the morning sow thy seed," etc.) he explained as a reminder to the farmer to be diligent in his sowing and planting (Ab. R. N. iii.). In another sentence (*ib.* xi.) he showed how the person who does not work during the six week-days will soon find himself compelled to work on the Sabbath. One of Dosetai's sermons praises almsgiving, interpreting Ps. xvii. 15 thus: "Through charity shall I see thy face, and enjoy thy sight on awakening" (B. B. 10a).

In a later Midrashic legend (Tan., Wayesheb. 2; Pirke R. El. xxxviii.) **Dosetai b. Jannai** is the name of one of the two teachers sent by the Assyrian king to convert the pagans who had settled in

Israel (later on, the Samaritans). The name was probably suggested by its similarity to that of the Samaritan sect of the Dositheans (Bacher, "Ag. Tan." ii. 385-387). Compare DOSITHEUS.

Dosetai b. Judah: Tanna of the latter half of the second century. He was the author of several halakic sentences (see B. K. 83b; Kid. 69a, and parallels) and transmitted those of Simon b. Johai. On one occasion Dosetai's opinion was opposed to that of Judah I., the patriarch ('Ar. 30a). Four interpretations of Deut. xxxii. bear his name (Sifre, Deut. 306, 309, 318, 320; comp. Bacher, "Ag. Tan." ii. 390 *et seq.*).

Dosetai of Biri: Palestinian amora of the early part of the fourth century. 'Ulla, a native of Biri in Galilee, once addressed a halakic question to him ('Ab. Zarah 40a). The Babylonian Talmud contains three interpretations of Scripture from Dosetai's sermons, which were perhaps handed down in the schools of Babylon by 'Ulla, who had come up from Palestine. One of these refers to Num. x. 36 (B. K. 88a; compare Sifre to Num. lxxxiv., and the Baraita, Yeb. 64a); another, to I Sam. xxii. 1 *et seq.* ('Er. 45a); while the third is an original exposition showing how David in Ps. xix. 13 *et seq.* gradually begs forgiveness for his sins, like a Samaritan pedler unfolding his wares one after the other (Sanh. 107a). Palestinian sources do not mention Dosetai of Biri (Bacher, "Ag. Pal. Amor." iii. 695; Krauss, in "Monatsschrift," xli. 561).

Dosetai of Kokaba: Contemporary of the tanna Meir. He asked the latter what was meant by the sentence, "The belly of the wicked shall want" (Prov. xiii. 25), and Meir answered by relating an incident characteristic of the pagan's vain and intemperate love of pleasure (Pesik. vi. 59b; Pesik. R. xxvi. 82b; Midr. Mishle xiii. 25 [where instead of Kokaba, Be-Yeshebab is mentioned as the home of Dosetai]; Tan., Pinhas, 13; Num. R. xxi.). According to another version of this story, Meir was the questioner and Dosetai the narrator. It is unnecessary to assume (compare Oppenheim in Berliner's "Magazin," i. 68, and Goldberg in "Ha-Maggid," xii. 62) that "Dosetai" is here a generic term, meaning a Dosithean (Bacher, "Ag. Tan." ii. 32).

J. SR.

W. B.

DOSITHEUS: Founder of a Samaritan sect; lived probably in the first century of the common era. According to Pseudo-Tertullian ("Adversus Omnes Hæreses," i.), he was the first to deny the Prophets—a heresy that gave rise to the party of the SADDUCEES. Jerome gives the same account ("Contra Luciferianos," xxiii.). Hippolytus I. begins his enumeration of the thirty-two heresies by mentioning Dositheus; hence this sect is made to appear older than the Sadducees (compare Clement of Rome, "Recognitiones," i. 54), and on this heresy is based the system of Philaster ("De Hæresibus," §§ 4, 5). The Samaritan chronicler Abu al-Fath of the fourteenth century, who used reliable native sources, places the origin of the Dosithean sect in the time before Alexander the Great (Abu al-Fath, "Annales," ed. E. Vilmar, 1865, p. 82). The rabbinical sources also (Tan., Wayesheb, 2; Pirke R. El. xxxviii.) contain obscure references to Dositheus and Sabbæus as the two founders respectively of the Samaritan sects of the

Dositheans and Sabuæans (compare Epiphanius, "Hæres." 11, 12, 13 [14]). These have been identified with the Samaritans Sabbæus and

Founder of the Dositheans. Theodosius, of whom Josephus relates ("Ant." xiii. 3, § 4; compare "Chronicon Paschale," in Migne, "Patrologie," Greek series, xcii. 441) that they defended before the Egyptian king Ptolemæus Philometor, against Andronicus, the advocate of the Jews, the sanctity of Mt. Gerizim (Grätz, "Gesch." 4th ed., iii. 45). The Samaritan chronicles (the Book of Joshua and Abu al-Fath's "Annales") recount a similar discussion between Zerubbabel and Sanballat. As Josephus says that the Samaritans had two advocates, he doubtless meant the two apostles Dositheus and Sabbæus, whose doctrine—including the sanctity of Mt. Gerizim, rejection of the prophetic books of the Old Testament, and denial of the resurrection—was on the whole identical with that of the Samaritans.

According to Hegesippus (Eusebius, "Hist. Eccl." iv. 22, § 5), Dositheus lived later than Simon Magus, the first heresiarch of the Church; other authors speak of him as the teacher of Simon (Clement of Rome, *l.c.* ii. 8; several passages in Origen; Epiphanius, *l.c.*), at the same time confounding him with Simon Magus, connecting his name with Helena, and stating that he was the "being" (εἶδος = "stans"). Origen says that Dositheus pretended to be the Christ (Messiah), applying Deut. xviii. 15 to himself, and he compares him with THEUDAS and JUDAS THE GALILEAN (see "Contra Celsum," i. 57, vi. 11; in Matth. Comm. ser. xxxiii.; "Homil." xxv. in Lucan; "De Principiis," iv. 17). Origen also says that Dositheus' disciples pretended to possess books by him, and related concerning him that he

A Samaritan Messiah. never suffered death, but was still alive ("In Joann." xiii. 27). To this must be compared the story of Epiphanius ("Hæres." 13) regarding his death by starvation in a cave. Epiphanius adds that while some of the Dositheans lead loose lives, others preserve a rigid morality, refrain from the use of meat, observe the rite of circumcision, and are very strict in keeping the Sabbath and in observing the laws of Levitical purity. These statements may, however, refer to another Dositheus, who belonged to the Encratites (Harnack, "Gesch. der Altchristlichen Litteratur bis Eusebius," i. 152, Leipsic, 1893).

Origen says ("Contra Celsum," vi. 11) that the Dositheans were never in a flourishing state, and that in his time they had almost entirely disappeared, scarcely thirty of them being left. The Midrash, however, speaks of Dositheans, with whom Rabbi Meir had dealings (Pesik., ed. Buber, 59b; Pesik. R. 16; Midr. Mishle xiii. 25, Yalkut § 950), and two names, "Dosion and Dosthion," are also mentioned (Ab. R. N., ed. Schechter, p. 37; compare "Shibbole ha-Lekef," ed. Buber, p. 266), which either refer to two Dosithean sectarians or form a double designation for the heretic Dositheus. Yet the fact that the patriarch Eulogius of Alexandria (who probably lived 582-603) disputed successfully against the Samaritan followers of Dostan (Δοσθῆν) or Dositheus, and wrote a work expressly against them (Photius, "Bibliotheca," cod. 230), shows that the

Dositheans existed and even exercised a certain power in the sixth century. Origen possibly refers to a Christian sect of the Dositheans, who in fact left no traces, while the Samaritan sect certainly continued to exist. In Egypt especially, this sect was probably numerous enough to induce the Christian patriarch of Alexandria to engage in polemics against it.

In Egypt the Arabic writers may have become acquainted with the Dositheans, though some may have survived also in Syria and Palestine, as is evident from the rabbinical sources. Mas'udi, of the tenth century, says that the Samaritans were divided into two sects—that of the Kushan, or ordinary Samaritans (= "Kuthim"), and that of the Dostan (Dositheans; compare Δοσιθηῖν). Shahrastani (ed. Cureton, i. 170; Haarbrücker's transl., i. 258) calls them "Kusaniyyah" and "Dusitaniyyah."

In Arabic Sources. Abu al-Fath (*l.c.*; compare p. 151, and "Chronique Samaritaine," ed. Neubauer, p. 21, Paris, 1873, דוסיתים, "Dosthis") says of the Dostan—*i.e.*, the Samaritan Dositheans—that they abolished the festivals instituted by the Mosaic law, as well as the astronomical tables, counting thirty days in every month, without variation. This reminds one of the Sadducees (A. Geiger, "Urschrift und Uebersetzungen der Bibel," p. 149; see Judah Hadassi, "Eshkol ha-Kofer," § 97), and is a further proof that the Dositheans were their spiritual predecessors. The statement that the festivals were abolished, probably means that the Dositheans celebrated them on other days than the Jews; but as, according to a trustworthy statement of Epiphanius, the Dositheans celebrated the festivals together with the Pharisaic Jews, an approximation may well be assumed toward the Karaites, a sect with which the Samaritans had much in common in later times. The determination of the months by means of the testimony of witnesses may also have been a Karaite custom, although that practise may go back to a time before the opposite view of the Pharisees existed. Under the Abbassid califs the Samaritans persecuted the Dositheans, although they themselves had to suffer much. Under Ibrahim (218–227 of the Hegira) the synagogue of the Samaritans and Dositheans at Nablus was burned by heretics, but it was subsequently rebuilt. Yusuf ibn Dasi, governor of Palestine, entirely forbade the worship of the Dositheans; and the sect may in consequence have been absorbed by the Samaritans.

K. S. KR.

DOSTOYEVSKI. See RUSSIA.

DOUGH. See HALLAH.

DOVE: One of the most familiar species of pigeon. The most common term for dove in the O. T. is "yonah," comprising the whole family of *Columbidae*, but in particular denoting the dove (*Columba*), as distinguished from the turtle-dove (*Turtur*), for which "tor" is used exclusively. The dove is first mentioned in the account of the Deluge (Gen. viii. 8–12) as one of the birds sent out from the Ark. In the sacrificial code the dove and turtle-dove were the only birds admitted as sacrifices (Lev. v. 8; xii. 6, 8; xiv. 5, 22; xv. 14, 29). The dove seems to have been early domesticated in Palestine (compare Isa. lx. 8, where the dove-cot ["arubbah"] is referred to). Four species of *Columba* and three of *Turtur* at present inhabit Palestine in large numbers (see Tristram, "The Natural History of the Bible," pp. 214, 216, London, 1889).

The Talmud mentions about ten species or varieties of *Columbidae*, among them being: "tasil" or "ta'zil" (Hul. 62a, 140b; B. B. 75a); "zulzalta" and "zilzela," abbreviated into "zuzla" (Sanh. 100a; Shab. 80b); "hamimta" (Git. 69b); "dazipe" and "kupshana," explained to be "turtles of the street" (Hul. 62a); "torin shel rehabah" (= half-tamed doves). The young dove is called "ben yonah" or "bar gozala" (Hul. 22a, 76b). More specific terms for the young of a dove are "pargeyot" and "peridah" (B. M. 24b, 84b; compare Rashi); "niful" denotes the unfledged dove, while "gozal" as in the Bible, indicates the young of any bird, and is even used of helpless babes (Pes. 49a). Of domesticated doves three varieties are mentioned: (1) those kept in the dove-cot ("shobak"); (2) those kept in the house (properly the attic, "aliyyah"); and (3) Herodian doves ("hordesi'ot"; Bezah 24a; Shab. 155b; Hul. 138b). The last variety is so named because Herod was accustomed to keep them in pigeon-towers in the gardens surrounding his palace (compare Josephus, "B. J." v. 4, § 4). For the regulations concerning the breeding and rearing of doves see B. K. 79b; B. B. 22b, 24b; Shab. 155b.

Betting on the swiftness and endurance of doves was well known in Talmudic times, and those who practised it ("mafrihe yonim") were placed in one category with gamblers and usurers, and were not admitted as witnesses in court (Sanh. 24b; R. H. 22a). According to Rashi to B. B. 80a, the dove begins to lay when it is two months old, and breeds every month, with the exception of the month of Adar (compare Cant. R. i. 15, iv. 1). For illustrations of the fertility of the dove see Ber. 44a; Lam. R. ii. 4; and Ker. 28a. Mustard is considered the favored food of doves (Shab. 128a). The Temple had a special officer to care for the doves ("kinnin") used for sacrifice (Yer. Shek. v. 1). Turtle-doves were preferred for sacrifices because mentioned in the first place in the sacrificial code (Ker. 28a).

The gentleness and grace of the dove make it a favorite simile for female beauty and tenderness (Cant. i. 15; iv. 1; v. 2, 12; vi. 9; compare Ber. 56b), and its faithfulness to its mate is a symbol of conjugal fidelity and devotion (Er. 100b). It is especially an emblem of unjustly persecuted Israel (Ps. lxxiv. 19; compare B. K. 93a), and its wings, iridescent with silver and gold (Ps. lxxiii. 18), are compared with the commandments which hedge around and protect Israel (Ber. 53b; Shab. 49a, 130a). For a detailed comparison of the dove with Israel see Cant. R. i. 15, iv. 1. It is often contrasted with the cunning

and treacherous raven (Git. 45a; Kid. 70b; compare Sanh. 100b). It is also an image of the Spirit of God (Hag. 15a; Targ. to Cant. ii. 12; Rashi to Gen. i. 2; compare Sanh. 108b).

The anecdote of the Samaritans having worshiped the image of a dove on Mt. Gerizim (Hul. 6a; compare Yer. 'Ab. Zarah v. 44d) probably arose from the fact that after Hadrian the Romans erected a brazen bird there (compare Jost, "Gesch. der Juden," i. 61, 75; Herzfeld, "Gesch. Israels," ii. 596).

E. G. H. I. M. C.

DOWRY (Aramaic, **Nedunya**): The portion or property which a wife brings to her husband in marriage. In patriarchal times the dowry was not known. As among all other nations of antiquity, in Israel the bridegroom named a price or ransom ("mohar") to the father of the bride (Gen. xxiv. 12; Ex. xxii. 17; compare Hos. iii. 2). It is, however, doubtful whether this mohar was given in the form of a ransom to the father or of a gift to the bride. Both cases are mentioned in the Bible: *e.g.*, Eliezer, the servant of Abraham, brought costly gifts to Rebekah when he betrothed her for his master's son; while Jacob served Laban for fourteen years for his two daughters (see **MARRIAGE**; compare Saalschütz, "Das Mosaische Recht," cii., § 3).

Besides this custom of the bridegroom making gifts to the bride or paying a ransom to her father the Bible also makes frequent mention of property which the woman brought to her husband at marriage. Rebekah brought to her new home female slaves from her father's household (Gen. xxiv. 59, 61). Laban made similar gifts to Leah and to Rachel (Gen. xxix. 24, 29). Othniel at marriage received from his father-in-law, Caleb,

Gifts to Daughters. a field of springs (Judges i. 15). Solomon received from Pharaoh, his father-in-law, a city as the portion ("shilluhim") of the princess (I Kings ix. 16). Later, the practise of giving a dowry to a daughter, as it is now understood, entirely superseded the gift or ransom given by the groom; so that in Talmudic times it ("nedunya") is spoken of as a long-established custom.

The Rabbis ordained that a man must give some of his property to his daughter when about to be married. The minimum amount was fifty zuzim (Ket. 67a); but every parent was obliged to give in proportion to his means. The minimum amount was paid to a poor girl out of the charity funds of the community, even when they were not in a flourishing condition. Although the court could compel a father to give his daughter in marriage, it could not compel him to pay a set dowry as long as he secured a husband for his daughter without it, or by paying a smaller sum (Shulhan 'Aruk, Eben ha-'Ezer, 71, 1, Isserles' gloss). If the groom agreed not to ask for the dowry, he was obliged—even while the bride was still in her father's house, in the period between betrothal and marriage—to provide her with all necessary garments (Ket. 67a). The dowry might be withheld by the bride's father if

the groom maltreated his bride during the period of betrothal. In such a case the money was deposited with a trustee until peace was established in the family (Shulhan 'Aruk, Hoshen Mishpat, 73, 8, Isserles' gloss, and "Sifte Kohen," *ad loc.*).

If, after the father's death, the heirs gave their minor sister in marriage, and paid her a dowry amounting to the minimum sum fixed by the Rabbis, she might, on attaining her majority, collect from the estate the balance due to her. The court usually estimated how much the father would have given to his daughter if he had been living, according to his position in society, or his generosity, or his action with regard to previous marriages of his daughters; and this sum was taken out of the estate (Ket. 68a). If there was nothing to guide the court in its estimate, the Rabbis ordained that a tenth of the estate be given to each daughter at her marriage, to be paid by the heirs in money or in valuables. If a number of daughters were about to be married at the same time, a sum made up of a tenth of the estate for the oldest, a tenth of the remainder for the second, and so on, was divided equally among them (Maimonides, "Yad," Ishut, xx. 4; Shulhan 'Aruk, Eben ha-'Ezer, 113, 4).

If the father was unable to pay the sum he had promised as a dowry to his daughter, the groom could not on that account postpone the marriage, but had either to marry or to divorce his bride. But if the promise was made by the bride herself and she was unable to fulfil it, the groom might let her "sit until her hair became gray"; that is, until she could pay the sum which she had promised (Ket. 109a). Insistence upon the payment of a dowry, however, was much decried by later authorities (Eben ha-'Ezer, 2, 1).

There is also frequent mention of the custom of the groom's father contributing to the dowry (Ket. 102b); and at present the custom prevails, in all cases where a dowry is agreed upon, that the groom's father subscribes a proportional sum to the dowry, usually much less than that given by the bride's father. If the bridegroom died after betrothal, and, according to the Mosaic law, the bride became betrothed to his brother (see **LEVIRATE**), her father need not pay to the latter the dowry promised to his brother (Ket. 66a).

The dowry that the woman brought to her husband, whether real estate, slaves, or movable property, was recorded in the marriage contract (**KETUBAH**). Custom decided whether the sum mentioned in the marriage contract should be exactly the same as the dowry was really worth, or more or less. In some places the custom prevailed of recording an amount one-third or one-fifth more than the value of the actual dowry; in others, less than the value of the dowry (*ib.*; Ishut, xxiii. 11; Eben ha-'Ezer, 66, 11). This sum then became a claim upon the husband's property equally with the ketubah itself; so that when he died or divorced her, the woman could collect from his estate both the sum stipulated in the marriage contract and the value of her dowry. During the husband's life, however, the dowry belonged to him, and he

might derive all benefits from it. He might even sell it for the period of his lifetime. The laws governing the relation of the husband to the dowry vary with the manner in which the woman has acquired that property.

"Nikse zon barzel" (the property of iron sheep) is the name applied to the dowry given to the woman at marriage by her father or

Kinds of Property. his heirs, and detailed in the marriage contract. All rents, fruits, and incre-

ments of this property belonged to the husband; and he became responsible for the principal in case of loss or damage. At his death, or in the case of divorce, the woman received the value of that property as estimated on her wedding-day. Like iron, it could not be destroyed or damaged, and like sheep, the husband might derive all profit (wool) from it.

"Nikse melug" (the property of plucking) is the term designating property which the woman obtained during her betrothal, by inheritance or by gift. The husband was entitled to all the fruits and profits thereof, although he was not held responsible for its loss or deterioration. He might "pluck" it (have the usufruct during his life), and need not answer for any damage that might occur to it.

The husband was made the usufructuary of the foregoing two classes of his wife's property by a decree of the Rabbis, in consideration of his being obliged to redeem his wife whenever she might be taken captive (Ket. 47b). The wife should not sell any part of her property while her husband was living, and if she did sell, he could collect from the buyer all the improvements or profits that the property bore during his life. If the husband became involved in a lawsuit regarding his wife's property, he needed a power of attorney from her to act in her name. When, however, the case also involved the profits of the property, he did not require a power of attorney; for, being entitled to the profit, he might also claim the property itself (Git. 48b; "Yad," Shulhan, iii. 4; Eben ha-'Ezer, 81, 4).

Property which the husband gave to his wife after marriage, or which a third person gave to her with the express understanding that it be used exclusively by her, or which she obtained by selling her marriage contract, was considered entirely beyond the husband's control. She could not, however, sell or give away the property given to her by her husband; while with the other kinds she might do as she desired (Eben ha-'Ezer, 85, 7).

According to the rabbinic law, the husband became the sole heir of his wife's property of all these three classes (see INHERITANCE). In regard to the dowry that the woman brought from her father's household, this law was modified by a decree of R. Jacob Tam (1100-1171 C.E.), who enacted that if the wife died childless within the first year after marriage, the whole amount of the dowry should be returned to her father or to his heirs. Subsequently this was still further modified by a decree of the rabbinical synod of the communities of Speyer, Worms, and Mayence ("Takkanat ShWM"), to the effect that if she died childless during the second year after marriage, one-half of the dowry should be returned to her father or to his heirs. This became the cus-

tom throughout Germany, and later was adopted by the Polish Jews also. In 1761, at a conference of rabbis held in Slutsk, Russia, this enactment was again modified to the disadvantage of the husband. As found in the records (§ 24) of the Grodno Jewish community, it reads as follows:

"Concerning the enactment of Speyer, Worms, and Mayence ('ShWM') in the case when the daughter died, we have established the following decree in accordance with the requirements of the time and of the place. If the wife dies within three years after marriage, everything should be returned to her relatives, even her garments. If she dies within five years of marriage, half of her dowry should be returned to her relatives. After that period the husband becomes the sole heir."

Only the first half of this decree has been accepted by all later authorities of Russia and Poland (Eben ha-'Ezer, 53, 4; Eisenstadt, "Pitḥe Teshubah," *ad loc.*).

DOXOLOGY. See LITURGY.

DRABKIN, ABRAHAM: Chief rabbi of St. Petersburg, Russia; born of an old-established family at Mohilev on the Dnieper in 1844. When only a boy he devoted himself to the study of the Talmud and of Jewish literature, attending the best Jewish schools of the time. He also received instruction in the Cabala from several Hasidic rabbis. Having graduated as rabbi from the rabbinical institute at Wilna, he acted as teacher there for some time. In 1871 the Society for the Promotion of Culture Among the Jews of Russia presented him with a scholarship, enabling him to continue his studies at Breslau. Here, at the rabbinical seminary, and at the university under Grätz, Frankel, and others, he acquired a knowledge of philosophy, history, theology, and Oriental learning. After attaining the degree of doctor in 1875, he returned to Russia.

He was chosen (1876) chief rabbi of the community at St. Petersburg. Both in this capacity and as a representative of the interests of Russian Judaism at the time when the anti-Semitic movement was developing, he had a difficult and responsible task. Through his forceful personal representations to the heads of the Russian government, through his interviews with Count Ignatiev during the anti-Jewish riots of 1882, and through his vehement pulpit declamations against anti-Semitism, the name of Drabkin became widely known.

Drabkin was one of the first Jewish rabbis to preach in Russian. To his initiative is due the establishment of a number of educational and charitable institutions by the community of St. Petersburg. He went with the deputations sent on various occasions by that community to wait upon Alexander III. and Nicholas II. At the latter's coronation in 1896 Drabkin, together with the rabbis of Moscow and Warsaw, was chosen by the government to represent the Jews of Russia, and was later decorated by the czar. He was a member of several commissions, including that appointed to consider the question of circumcision among the Jews (1892), and that organized under the chairmanship of Prince Oldenburgski to prevent the spread of the plague.

Drabkin is the author of "Die Russische Gesetzgebung in Bezug auf die Juden," in "Monatsschrift," July and Aug., 1875; and he has contributed to the Russian-Jewish magazines "Vestnik Russkikh Yevreyev" and "Razsvyet."

I. DR.

DRACH, DAVID PAUL: Librarian of the Propaganda in Rome; born at Strassburg March 6, 1791; died in Rome Jan., 1865. Drach received his early education from his father, who was a rabbi. After spending some time in various Talmudic schools, he became a teacher at Rappoltswiller, though only sixteen years of age. The love of the secular sciences brought him to Paris, where he was welcomed by his coreligionists, and became tutor in a wealthy Jewish family. His reputation as a teacher brought him Christian pupils; and this may have had some influence on his subsequent conversion; in fact, he had always manifested some leaning toward Christianity.

Drach had already begun the study of Greek and Latin so as to become acquainted with the Christian doctrines in their original sources. Struck by the accusation of some of the Fathers that the Jews had corrupted the Hebrew text, he began a comparative study of the Hebrew and the Septuagint, which study he continued in spite of the remonstrances of the president of the Central Consistory. Drach was received into the Catholic faith in 1823, together with his two daughters and his son **Paul**, who afterward became a priest and a distinguished Biblical scholar.

In 1827 Drach accepted the position of librarian of the Propaganda in Rome, which position he held until the year of his death.

Drach's principal works are the following: An edition of the "Bible de Venice," 27 vols., with copious and learned notes, Paris, 1827-33; "Relation de la Conversion de M. Hyacinthe (Simon) Deutz, Baptisé à Rome, le 3 Février 1826, Précédée de Quelques Considérations sur le Retour d'Israël dans l'Eglise de Dieu," Paris, 1828; "Du Divorce dans la Synagogue," Rome, 1840; "Notice Concernant l'Origine et les Progrès de l'Hospice Apostolique de St. Michel," Rome, 1842; "De l'Harmonie Entre l'Eglise et la Synagogue, ou Perpétuité de la Foi de la Religion Chrétienne," 2 vols., Paris, 1844; "Lexicon Catholicum Hebraicum et Chaldaicum in V. T. Libros, hoc est, Gulielmi Gesenii Lexicon Manuale Hebræo-Latinum Ordine Alphabetico Digestum," Paris, 1848; "Le Pieux Hébraïsant," a work containing the principal Christian prayers and a summary of the Catholic catechism in Hebrew and Latin, Paris, 1853; "Documents Nouveaux sur les Restes des Anciens Samaritains" (from "Annales de Philosophie Chrétienne," Nov., 1853), Paris, 1854.

DRACHMA. See NUMISMATICS and WEIGHTS.

DRACHMAN, BERNARD: American educator and rabbi; born in New York city June 27, 1861. He is a descendant of a rabbinical family, and was educated at the High School, Jersey City, N. J.;

the Hebrew Preparatory School, and Columbia College, New York, whence he graduated in 1882. Continuing his studies in Europe, he entered the Breslau seminary, and matriculated at the University of that place, taking the degree of Ph.D. at Heidelberg (*multa cum laude*) in 1884. Drachman received his rabbinical diploma from Manuel Joel, rabbi at Breslau (1885). Returning to America, he first officiated as rabbi to the Oheb Sholom congregation in Newark, N. J. (1885-87). Next he accepted the office of rabbi to the Congregation Beth Israel Bikkur Cholim, New York city (1887-89), and later to that of the congregation Zichron Ephraim, of which he is still (1903) the incumbent. Drachman assisted Dr. Sabato Morais in founding the Jewish Theological Seminary (1886), and was appointed preceptor in Biblical exegesis, Hebrew grammar, and Jewish philosophy. In 1889 he was elected dean of the faculty, which position he held until the founding of the Jewish Theological Seminary of America in New York in 1902, when Drachman accepted the office of instructor in Bible and Hebrew grammar and the appointment of acting reader in codes in that institution. To him was due the inception of the Jewish Endeavor Society.

Among his writings may be mentioned: "Die Stellung und Bedeutung des Jehudah Hajjug in der Geschichte der Hebräischen Grammatik" (Breslau, 1885), and "Neo-Hebraic Literature in America" (in the Seventh Biennial Report of the Jewish Theological Seminary Association, New York, 1900). Also he translated from the German "The Nineteen Letters of Ben Uziel" by Samson Raphael Hirsch (New York, 1899).

M. FR.

DRAGON (δράκων): The usual translation of the Septuagint for תַּנִּין, dangerous monster whose bite is poisonous ("dragons' poison") (Deut. xxxii. 33; Ps. xci. 13). Nowhere distinctly described, they must be imagined as of composite form, resembling, according to some passages, the snake. Thus in Ex. vii. 9 (Hebr.) the staff of Moses is turned into a "dragon"; according to Ex. iv. 3 (Hebr.), into a "snake." Their home is in the water; they are mentioned together with the waves of the sea (Ps. cxlviii. 7), and were created by God with the fishes (Gen. i. 21). Originally they are mythological personifications of the floods (תַּהֲמוֹת). In the vicinity of Jerusalem a "dragon's spring" was located, in which, according to ancient belief, a dragon lived as the spirit of the well (Neh. ii. 13). Especially interesting are the passages that speak of a single dragon: the "dragon that is in the sea" (Isa. xxvii. 1); "the great dragon that lieth in the midst of his rivers" (Ezek. xxix. 3); or simply "dragon" (Job vii. 12 [Hebr.]; Jer. li. 34; Ps. xlv. 19, read תַּנִּין). Such a dragon is also referred to as "Rahab" (Isa. li. 9 *et seq.*). LEVIATHAN (לִיָּאָן) probably also means a dragon of this kind (compare Isa. xxvii. 1).

Sometimes considerable information is given of

these monsters. "In the beginning of things YHWH overpowered them in creating the world." It is clear that this story, which is found only in fragments in the O. T., was originally a myth, representing God's victory over the seas (תהום; Isa. li. 9 *et seq.*), or the hemming in of the Nile (Ezek. xxix. 3). The Babylonian story of Marduk's victory over the dragon of the sea, Tiamat, is analogous; but other traditions, especially those of Egypt, may also have influenced the story. The Hebrew poets and Prophets were fond of using this old myth to symbolize the destruction of Israel's enemies.

In post-canonical times also similar traditions are often referred to. Psalms of Solomon (ii.) describe, under the image of a dragon, Pompey's greatness and fall; Apocr. Esther (i. 4 *et seq.*) describes the conflict between Haman and Mordecai as a battle between two dragons; the legend of Bel and the Dragon, a reproduction of the old Marduk monster, in the Septuagint version of Daniel, narrates how the prophet made cakes of pitch and put them in the dragon's mouth, with the result that the "dragon burst in sunder." Especially important is the mystical story of the persecution of the divine child and its heavenly mother by the great red dragon (Test. Job xii.). In its present form the story is explained as referring to the attacks of the devil on the Messiah, but it is based on an old Oriental myth of the enmity of the dragon for the child of the sun.

DRAGUIGNAN (Hebrew, דרגניאן): Capital of the department of Var, France. There was a Jewish community here in the thirteenth century. The poet Isaac Gorni, who visited it in the beginning of the fourteenth century, complained bitterly of the rich Jews of Draguignan, who did not know enough to appreciate his talent. He called the place כקום חנין ("dragon's lair"). In 1350-1400 two Jews, Cresquet and Crescas, who had come from "Draguinham," lived at Tarascon. About the same time Crégut Hayyim, a Jew from Draguignan, lived at Hyères, France. In 1427 the Jews of Draguignan were persecuted, and compelled to wear a badge in the shape of a wheel, on pain of being fined twenty-five silver marks. In 1475, however, they were authorized to maintain a synagogue on condition of paying four pounds of wax annually to the Bishop of Fréjus.

DRAMA: City of European Turkey in the vilayet of Salonica, 25 miles from Serrès. It is the ancient Drabescus. Its small Jewish community, which was founded in 1860 by immigrants from Serrès and Monastir, possesses a synagogue, and a boys' school with fifty pupils. Aside from several well-to-do families, the greater part of the Jews live by peddling in the neighboring villages. There are sixty-two Jewish families in a total population of 9,000.

M. FR.

DRAMA, HEBREW: The origin of the Hebrew drama may be traced back to a very early

period. The ancient Hebrews, like other nations of antiquity, were wont to express their emotions in the form of dialogue interspersed with songs. Miriam, with a drum in her hand, singing the deliverance of Israel, while the other women answer her in chorus, suggests vividly the strophes and antistrophes of the later Greek. The song of Moses is of the same nature. The Song of Solomon, according to many scholars, is a regular drama, the heroine of which is the Shulamite, and in which the other dramatis personæ are: Solomon; a shepherd; chorus; watchmen, etc. (see Renan's translation of the Song of Solomon). To the foregoing may be added the Book of Job, which, if not so elaborate in dramatic form as the Canticles, yet represents several persons as acting, namely: Job; his wife; the messengers; Eliphaz, Bildad, and Zophar (Job's three friends); Elihu; and God. These few crude dramas of the Biblical epoch had no immediate successors. Till the seventeenth century c. e. not a single drama in Hebrew is known. It is true that in the second century b. c. Ezekiel the Alexandrian, inspired by Euripides, wrote a drama in Greek, "The Exodus"; but other Jews did not imitate him. With the fall of pagan Rome a new era of culture began, in which the Jews actively participated, producing a considerable quantity of dramatic literature, though written in secular languages (Kayserling, "Sephardim; Romanische Poesien der Juden in Spanien").

It was the city of Amsterdam, where the Jews found freedom from persecution, and where Jewish libraries and literary societies existed, that gave birth to the modern Hebrew drama.

The subject may be divided into: (1) dramas written in Hebrew; and (2) those translated or adapted into Hebrew from other languages. Of the former the earliest were written about the middle of the seventeenth century, and the production of their successors continued with some interruption for about two hundred years. Translations began to be made at the end of the eighteenth century, but reached their highest excellence at the end of the nineteenth century. The translation into Hebrew of dramas written in other languages is still carried on with great activity.

I. Of the dramas written in Hebrew the oldest is יסוד עולם ("The Eternal Foundation"), written by Moses Zacuto at Amsterdam about 1642 (Franz Delitzsch, "Gesch. der Jüdischen Poesie," p. 75). The subject is the legend that Abraham destroyed the idols of his father, leaving only the large one.

On being brought by his father before Nimrod, he is sentenced to be thrown with his brother Haran into a fiery furnace. Haran perishes in the flames, but Abraham is rescued by an angel. The style is very fluent and agreeable. Sometimes the author gives to Hebrew roots forms which are not found in the Bible. The long pieces have one and the same rime, a system common in Arabic poetry. In the short pieces, as in the Persian "mesnevi," the two hemistichs usually rime together. The drama was published by Berliner, with an introduction, at Breslau, 1872, and by David J. Maroni at Lehigh in the same year.

The First Hebrew Drama.

אסירי התקוה ("The Prisoners of Hope"), by Joseph b. Isaac Penso, 1667, was printed at Amsterdam in 1673. The argument is as follows: A king who takes a serious view of his responsibilities is led astray, now by his own impulses ("yezer"), now by his wife ("ishshah"), and now by Satan. Finally his own understanding ("sekel"), Providence ("hash-gahah"), and an angel endeavor to lead him in the right way.

The author was only seventeen years old when he composed the work, which was somewhat beyond his powers, although several poets have praised in verse the talent of the young dramatist.

The aim of both Penzo and Zacuto was to direct the attention of the Maranos to the Hebrew language and to draw them away from profane literature, to which they had exclusively devoted themselves.

During the seventy years which followed no Hebrew drama appeared. Some insignificant farces were written in Judæo-Spanish and afterward burned, but it was not till the first half of the eighteenth century that a revival of the Hebrew drama took place.

שמעון ופלישתים ("Samson and the Philistines"), by Moses Hayyim Luzzatto, was published at the end of his "Leshon Limmudim" (Sudzilkov, 1836).

מגדל עז ("Tower of Strength"), is an epithalamium written by the same author to celebrate the wedding of his uncle Israel Basan. This is an allegorical drama in four acts, and was composed when the author was young and full of poetic ardor. He was chiefly inspired by Guarini's "Pastor Fido"; but, as he says in his preface, he took the topic from the Midrash, where the Torah is compared to the young daughter of a king hidden in a stronghold, who shows herself only to her lover. The moral is the same as that of the "La-Yesharim Tehillah" (see below); namely, the triumph of truth over falsehood. The play was edited 100 years later by Franz Delitzsch, with notes by S. D. Luzzatto and M. Letteris (Leipsic, 1837).

לישרים תהלה ("Praise to the Righteous"), also an epithalamium by Moses Hayyim Luzzatto, was written on the occasion of the wedding of his friend and pupil Jacob di Gavis (Amsterdam, 1743). The title is a play on the word "Tehillah," which is the name of the heroine. The drama is an allegory in three acts, in which the chief actors are *Yosher* ("Rectitude"), *Tehillah* ("Praise"), and *Rahab* ("Pride"). The last, assisted by his friend *Turmit* ("Falschhood"), tries to win for himself *Tehillah*, who has been promised to *Yosher*. He is frustrated in his design, and *Tehillah* is wedded to *Yosher*. This was Luzzatto's third drama, and though perhaps inferior in elegance to its predecessors, it evidences a much riper genius. It is more philosophical, and the tone throughout is Biblical. Luzzatto's language, as Franz Delitzsch says (*l.c.* p. 92), is not a mere mosaic of Biblical sentences, but an enamel of the finest and rarest Biblical elegancies.

ילדות ובהירות ("Childhood and Boyhood"), by Mendel Bresselau (Berlin, 1786), is a didactic poem in the form of a dialogue. The author imitated Luzzatto, whom he approached very closely.

הקולות יחדלון ("The Voices Cease"), by Samuel Romanelli of Mantua (Berlin, 1791), is an allegorical

melodrama which he wrote in celebration of the marriage of a friend. He borrowed the mechanism of this work from classical mythology (Delitzsch, *l.c.* p. 92), and followed Luzzatto even more closely than did Bresselau.

אביגיל ("Abigail"), by R. Joshua, son-in-law of R. Isaiah Berlin (has never been published). The author died in 1806.

אסתר ("Esther"), by Joseph Haltern, 1795 (published in Heinemann's "Archiv," 1841), is an imitation of Racine's drama.

מלכות שאול ("The Reign of Saul"), by Joseph Efrati, is a Biblical drama in six parts, the hero of which is King Saul (published for the first time at Vienna, 1794).

מלחמה בשלום ("War in Peace"), by Hayyim Abraham b. Aryeh, is a play divided into two parts. The first, "Token 'Alilot" (The Weighing of Actions), describes the sale of Joseph by his brethren and the journey of the latter into Egypt to buy grain. The second part, "Tokahat Megullah" (An Open Warning), deals with the discussions between Jacob's sons and the Egyptian magicians, and describes how Joseph was recognized by his brothers. This work was published the first time at Sklow, Russia, in 1795. It was translated into Polish, and produced at Warsaw before Prince Paskevich. The women present were so much affected that several of them fainted, and the government forbade further performance of the drama.

בית רבי ("The House of Rabbi"), by Moses Konitz (Vienna, 1805), is a dramatized life of R. Judah ha-Nasi, the compiler of the Mish-Nineteenth century. Included in the play is all that is told about Rabbi in the Babylonian and Jerusalem Talmuds.

בת יפתח ("The Daughter of Jephthah"), by Moses Neumann (Vienna, 1806), is a Biblical drama.

נבות היזרעאלי ("Naboth of Jezreel"), by Shalom ha-Kohen, was printed with his "Maṭṭa'e Kedem" (Rödelheim, 1807).

עמל ותירצה ("Amal and Tirzah") is an allegorical drama in three acts, by the same author (Rödelheim, 1812). It is a sequel to Luzzatto's "La-Yesharim Tehillah," employing the same dramatis personæ. The author was induced to complete Luzzatto's work, which presented only the triumph of the good, and omitted the punishment of the wicked. The play was recited by M. Letteris, Warsaw, 1862.

The remaining dramas are:

צפורה ("Zipporah"), by Gabriel Berger, in "Neuer Sammler" (Königsberg, 1806); Biblical drama.

אמנון ותמר ("Amnon and Tamar"), by Eliezer Raschkow (Breslau, 1812 [?]); Biblical drama.

יוסף ואסנת ("Joseph and Asenath"), by Süßkind Raschkow (*ib.* 1817); Biblical drama in five acts.

ההרוץ והעצל ("The Industrious and the Idle"), by David Samosez (*ib.* 1817).

פליגש בגבעה ("The Concubine at Gibeah"), by the same author; Biblical drama, the heroine of which is the Levite's concubine who caused the war between the tribes of Israel and that of Benjamin (*ib.* 1818).

גורל הצדיקים, or, according to Zeitlin, **גורל הצדיקים** ("The Lot of the Just"), by Kalman Kohen Bistriz (Vienna, 1821); Biblical drama in three acts, the hero and heroine being Mordecai and Esther.

שארית יהודה ("The Remnant of Judah"), by Solomon Judah Rapoport; a free adaptation of Racine's "Esther," in four acts, with an introduction (published in the "Bikkure ha-'Ittim," 1827).

חנניה מישאל ואזריה ("Hananiah, Mishaël, and Azariah"),

by Samuel David Luzzatto (published in the "Bikkure ha-Itim," 1875).

און בן פיל ("On, Son of Pelet"), by the same author (*ib.*).

היסטוריה של משה ("The History of Moses"), by Isaac b. Saul Kandia (Warsaw, 1829); drama in two acts.

גדולת יוסף ("The Greatness of Joseph"), by Nathan R. Kalkar, in his "Nif'e Sha'ashu'im" (Copenhagen, 1834); Biblical drama.

בועז ורות ("Boaz and Ruth"), by Israel Jehoiada Cohen (Breslau, 1834).

אפיק נהרים ("The Torrent of Rivers"), by Aaron David Gordon (Wilna, 1836); an allegorical drama in three parts. It is a satire upon the conditions of the time, in which the author flays those who indulge in drinking on the anniversary of a parent's death. He was afterward persecuted by the class at which he aimed his shafts.

גזע ישי ("The Trunk of Jesse"), by M. Letteris (Vienna, 1836); a tragedy in five acts, the heroine of which is Athalia.

כפלת סיסרא ("The Fall of Sisera"), by Nahman Isaac Fishmann (Lemberg, 1841); Biblical drama in two acts.

שלום אסתר ("The Peace of Esther"), by M. Letteris (Prague, 1843); tragedy in three acts.

על חומות ירושלים ("On the Walls of Jerusalem"), by Phinehas Kraemer (Vienna, 1865); a tragedy dealing with an episode of the destruction of the Second Temple by the Romans.

אשה חיה ("A Virtuous Woman"), by Elias Levin (Wilna, 1866); Biblical drama in one act, the principal characters being David and Abigail.

הפארת לבני בינה ("Glory to the Intelligent"), by A. B. Gottlob (Jitomir, 1867); an imitation of Luzzatto's "La-Yesharim Tehillah."

כשל ופליצה ("Fable and Satire"), by Meir Löb Malbin (Paris, 1867, and Warsaw, 1877); allegorical drama in four parts.

הבוסה אבשלום ("The Fall of Absalom"), by Joshua Bank (Odessa, 1868 and 1878); Biblical tragedy.

אמת ואמונה ("Truth and Belief"), by Ab. B. Lebensohn (Adam ha-Kohen) (Wilna, 1867 and 1870); an allegory in three acts and twelve scenes, attacking superstition.

אלישע בן אבייה ("Elishah, Son of Abuyah"), the teacher of R. Meir, who was baptized (Vienna, 1868); an adaptation of Goethe's "Faust."

פחד בלילות ("Terror of the Nights"), a Talmudic tragedy, the heroes and heroine of which are King Solomon, Asmodeus, and the Queen of Sheba. The subject is the Talmudic legend of the dethronement of Solomon by Asmodeus. This work has not been published (see "Orient," x. 635).

קשר שכנא ("The Conspiracy of Shebna"), by N. Fishmann (Lemberg, 1870); Biblical drama in five acts.

נבל הצדיק ("Nabal the Righteous"), by A. D. Wechsler (Lemberg, 1874); comedy in five acts, denouncing the hypocrisy of the day. It is an adaptation from Molière's "Tartuffe."

הדסה ("Hadasa or Esther"), by G. Gitelevicz (Warsaw, 1875); Biblical drama in twelve scenes.

סמל האהבה והקנאה ("The Emblem of Love and of Jealousy"), by Aron Margolis (Vienna, 1877); Biblical tragedy, the hero and heroine of which are Amnon and Tamar.

כשרון החכמה ("The Advantage of Wisdom"), by S. Apfel (Czernowitz, 1882); drama in four parts.

הגרדף מארץ רוסיה ("The Russian Emigrant"), by Osiat Atlas (Przemysl, 1883); tragedy in three acts.

בר כוכבא ("Bar Kokba"), by L. Landau (Lemberg, 1884); tragedy in five acts, the hero of which is Bar Kokba, leader of the revolt against Hadrian.

אמונה והשכלה ("Belief and Enlightening" [Rationalism]), by D. M. Andermann (Drohobycz, 1887); an allegory in five acts; the author imitates Luzzatto.

Several other dramas written by Russian Jews have not yet been published.

II. Berliner in his (Preface to "Yesod 'Olam," p. xix.) makes the statement that Letteris was the first translator of dramas into Hebrew. But if the adaptations of Letteris are considered to be translations merely, the priority must be given to David Franco-Mendes, of the end of the eighteenth century, who wrote "Gemul 'Atalyah" (The Punishment of Athalia), a Biblical drama in three acts adapted from Racine and Metastasio (Amsterdam, 1770). It was in the nineteenth century, and especially in

its second half, that Hebrew literature was enriched by numerous translations of dramas. Meir Letteris was certainly the first translator or adapter in the nineteenth century. His translations, or rather his adaptations, are mentioned above, namely: (1) Racine's "Esther" into Hebrew under the title "Shelom Ester"; (2) "Athalia," of the same author, under the title "Geza' Yishai"; (3) "Ben Abuyah," an adaptation of Goethe's "Faust." Racine's "Esther" was also translated by Joseph Haltern and by Solomon J. Rapoport (see above) in four acts (Vienna, 1827). Two other translated dramas have to be added to those of the first half of the nineteenth century: Metastasio's "Isacco," translated by Elijah Bardach under the title "Akedat Yizhak" (The Sacrifice of Isaac; Vienna, 1833); and Kotzebue's "Der Schatz," translated by David Rosenhand under the title of "Ha-Ozar," or "Le-Yishre Leb Simhah" (Joy to the Righteous), in two acts (Warsaw, 1845).

During the second half of the nineteenth century very many translations were made. The favorite author was Schiller, seven of whose dramas have been translated into Hebrew: (1) "Die Braut von Messina," under the title "Medanin ben Ahim" (Quarrels Between Brothers), by Jacob Levin (Brody, 1868); (2) "Die Räuber," under the title "Ha-Shode-dim," by Moses Schulbaum (Lemberg, 1871); (3) "Wilhelm Tell," in prose, by David Radner (Wilna, 1878); (4) "Don Carlos," in prose, by the same (*ib.* 1879); (5) "Marie Stuart," by Solomon Kovner (*ib.* 1879); (6) "Turandot," under the title "Tirzah," by Osiat Atlas (Przemysl, 1879); (7) "Fiesco, oder die Verschwörung zu Genua," under the title "Keshet Fiesko," by Samuel Apfel (Drohobycz, 1889). Five of Lessing's dramas have been translated: (1) "Nathan der Weise," under the title "Natan he-Hakam," by S. Bacher (Vienna, 1866); also by A. B. Gottlob, who versified the Hebrew in the same meter as the original (*ib.* 1874); "Philotas," under the title "Abinadab," by J. Falkovich (Odessa, 1868); (3) "Die Juden," under the title "Ha-Yehudim," in prose, by Jacob Kohn (Warsaw, 1875), also in verse by Hirsch Teller (Vienna, 1881); (4) "Der Freigeist," under the title "Honen we-Noten," by D. Kohn (Przemysl, 1886); (5) "Miss Sara Sampson," under the title "Sarah bat Shimshon," by Isr. Frenkel (Warsaw, 1887).

Of other translations the following may be mentioned:

Gutzkow's "Uriel Acosta," by Sol. Rubin (Vienna, 1856).

Ludwig Philippson's "Jochin," a tragedy in four acts, by S. Bacher (Vienna, 1859).

Shakespeare's "Othello," by Isaac E. Salkinson, under the title "Itiel" (Vienna, 1874).

The same author's "Romeo and Juliet," by Isaac E. Salkinson, under the title "Ram we-Ya'el" (Vienna, 1878).

Rich. Cumberland's "The Jew," drama in five acts, by Joseph Brill, under the title "Ish Yehudah" (Wilna, 1878).

Mosenthal's "Dehora," by David Radner (*ib.* 1880).

Shakespeare's "Macbeth," by Isaac Rabb (Drohobycz, 1883).

Kotzebue's "Der Arme Poet," by Isidor Brüstiger, under the title "Ha-Meshorer he-'Ani" (Lemberg, 1884).

Scribe's "La Juive," by Zusmann Marik, under the title "Rahel ha-Yehudiyah" (Wilna, 1886).

Kozlovski's "Esterka," Polish drama in five acts, by Israel Frenkel, under the title "Massa' Ester" (Warsaw, 1889).

Finally, the following two poems arranged in dialogue form may be added: Dante's "Divina Commedia," under the title "Mar'ot Elohim" (Appari-

tions of God), translated by Saul Farmiggini (Triest, 1869); and Milton's "Paradise Lost," under the title "Wa-Yegaresh et ha-Adam" (And He Drove Adam Out), by Isaac E. Salkinson (Vienna, 1871). The two Warsaw literary societies, "Abiasaf" and "Tushiyah," are continuing the publication of dramas translated into Hebrew.

M. SEL.

DRAMA, THE JEW IN MODERN: The modern drama, which may be said to date from Christopher Marlowe and Shakespeare, has made liberal use of the Jew as a stage character. From the time of these authors until the present, dramatists have utilized the Jew, either libeling him as a human atrocity, with all the vices of a materialized devil, or, going to the other extreme, making him a perfect man. Few have struck the happy medium and shown the Jew as an ordinary human being.

The abusers of the Jew have been responsible, to a great extent, for the popular conception of Jewish character; for they have depicted him as hideous as his bitterest enemy could wish. Avarice, hatred, venality, murder, bigotry—in fact, all of the worse passions have been attributed to the stage Jew. In England, in Germany, in France, in Austria, on all stages, the Jew, probably because of his strong personality, has been a favorite theme with the dramatists. Shakespeare, in England, conceived a Shylock; Stephanie, in Austria, a *Pinkus*, Shylock's opposite; Dugué, in France, *Bambaccia*, a thief; Iffland, in Hamburg, *Baruch*, a good angel. Every dramatist had his own idea of the Jew and his character, and represented him accordingly.

In England the first of the modern plays to utilize the Jew was Marlowe's "The Rich Jew of Malta" (see *BARABAS*), which was not attrib-

In English Plays. but of one Jew in particular; namely, Queen Elizabeth's physician, Rodrigo LOPEZ, who was hanged in 1593 for treason. Lopez was undoubtedly the inspiration for several plays with Jewish villains, which appeared shortly after his trial and death. In 1594 Philip Henslow, the most enterprising theatrical manager of that day, produced two such dramas.

"The Merchant of Venice" followed in 1596—a dramatization of the tales of Ser Giovanni, "Il Pecorone," written in 1378 and published in Milan in 1558. The next play was Fletcher's "Women Pleased," the Jew being Lopez, a curious coincidence when Dr. Lopez is recalled. Beaumont and Fletcher's "Custom of the Country" followed in 1628. *Zabulon*, a male pander, is the Jew in this instance; and a more repulsive creation it would be difficult to imagine. *Rutilio*, a Christian, is, however, just as disgusting; yet, when *Zabulon* offers money to *Rutilio* to debase himself, he refuses the proffered

gold with: "Because you are a Jew, sir, and courtesies come sooner from the devil than any of your nation." Before this (1610) Ben Jonson's "Alchemist" had been acted by the king's servants; but the part of the Jew, *Abel Drugger*, is so innocuous when compared with *Barabas* and *Zabulon* that it calls for no special comment.

After "Custom of the Country" came a steady stream of plays containing Jewish characters. Gosson's "School of Abuse" (1579) mentions a play, "The Jew Shewn at the an Dramas. Bull"; but no copy of the work is extant. "The Jewish Gentleman" was played in 1640; Dekker's "Jew of Venice," in 1653; William Henninge's "The Jew's Tragedy," in 1662; Lord Lansdowne's "The Jew of Venice," in 1701; "The Jew Decoy'd," a ballad opera, founded on "The Harlot's Progress," in 1773; "Jewish Education," in 1784; "The Israelite," in 1785; "Jewish Courtship," in 1787; "The Wandering Jew," in 1797; Dibdin's "The Jew and the Doctor," in 1798; "The Jew of Magadore," in 1808; Penley's version of "The Rich Jew of Malta," in 1818; "The Jew of Lubeck," in 1819; "The Hebrew," in 1820; a version of "Ivanhoe," with Edmund Kean as the *Jew of York*, in the same year; another version, "The Maid of Judah," in 1829; C. Z. Barnett's "The Rise of the Rothschilds, or the Honest Jew of Frankfort," and "The Ways of Our Tribe, or the Rich Man of Frankfort," in 1830; and Sheridan Knowles' "The Maid of Mariendorpt," in 1839.

In addition there were numerous dramatic compositions, each containing a Jewish character. In Robert Greene's "The First Part of the Tragical Raigne of Selimus, Emperour of the Turks," the Jew *Abraham* poisons *Bajazet* at the instigation of *Selimus*, and then kills himself. *Signor Rogero*, in John Marston's "Insatiate Countess," is accused of being a Jew; while in Webster's "The Devil's Law Case," a Christian merchant disguises himself as a Jew in order to carry out his nefarious schemes. John O'Keefe, in "The Little Hunchback," shows *Zebede* and his nephew *Absalom* converted; while Leman Rede exhibits still another type in "The Skeleton Witness," in which *Simon Levi* is duped by the Christians. Then, too, there are *Ichabod* and *Isaac*, in Douglas Jer-

Later Plays. rold's "The Painter of Ghent"; *Beau Mordecai*, in Macklin's "Marriage à la Mode"; *Ephraim*, in Dibdin's "School for Prejudice"; *Isaac Mendoza*, in the comic opera "The Duenna"; *Shilric*, in Macfarren's comic opera "Malorina"; *Leri Lyons*, in "Will Watch"; *Abanazor*, in "The Jewess"; *Abraham Mendez*, in "Jack Sheppard"; *Boaz*, in Jerrold's "Prisoner of War"; *Bokes*, in Shirley Brooks's "The Creole"; and *Melter Moss*, in "The Ticket-of-Leave Man."

More modern English dramatists have more or less neglected the Jew. Potter's dramatization of "Trilby" shows the exaggerated type in *Srengali*, a Jewish Cagliostro, charlatan, and scoundrel in one. Henry Arthur Jones produced a strong contrast to *Srengali* in his *Judah Llewellyn*, the half-Jewish hero of his "Judah"—a passionate, honorable dreamer-preacher. Zangwill, with his "Children of the Ghetto," also went to the extreme, in that he

exposed the ghetto-dwellers to the light of day with a fidelity which at times is absolutely unpleasant. The other ghetto play, Fernald's "The Ghetto," goes a step further; and its gloom is even more oppressively realistic.

France, until the anti-Semitic outbreaks of the last ten years, had treated the Jew more gently than had any other Continental nation. One

In French Literature. of its first stage Jews was *Shylock*, in "Le Juif de Venise"—a translation of "The Merchant of Venice" by M. Dugué. Next came Théophile Gautier's "La Juive de Constantine." Perhaps the strangest play of this character ever concocted was Merville and Mail-lau's "Juif Errant," produced at the Ambigu, Paris, July 31, 1834. In this play the principal characters are *Isaac Ahasvérus*, *Satan*, *Simon*, *The Archangel Michael*, *Barabas*, *Louis XV.*, *Jean du Barry*, *Puck*, *Ariel*, *Napoleon*, *Franklin*, *Marcus Aurelius*, *Esther*, *Rachel*, *Mme. du Barry*, *Mme. de Pompadour*, *Lilith*, *Death*, and *The Seven Deadly Sins*. It is scarcely necessary to say that it was not successful.

Other French plays on Jewish subjects were Anicet Bourgeois' "L'Impératrice et la Juive"; Catulle Mendes' "Les Mères Ennemies" (introducing a *rabbi*); Désaugier's "Juif" (produced at the Porte-Saint-Martin May 14, 1823); Dumas' "Femme de Claude" (*Daniel* and his daughter *Rebecca*); Dugué's "Salvator Rosa"; Erckmann-Chatrian's "L'Ami Fritz" (the *rabbi*); and Daudet's "Roi en Exil," dramatized as "La Juive," in which the *Leemans* of the novel is metamorphosed into an old-clothes man, and his daughter *Sarah* into *Dona Florinde*, who plays havoc with the feelings of *Don John* of Austria. "Le Juif Polonais," by Erckmann-Chatrian ("The Bells," in English), contains a Jewish character who is not seen, being killed behind the scenes by *Mat-thieu*.

Germany has been the most prolific of all the nations in stage Jews. The first play to introduce them was the celebrated "Das Ender Judenspiel," produced in the public square of Emden in Baden April 21, 1616. It relates the history of a family of Christians who are murdered by *Rabbi Elias* and his companions. Eight years later their

Early Ger-man Plays. bodies are found, and the murderers are stoned and burned. Next came Gryphius' "Horribilicribrifax," which shows the Jew *Issachar* as a great boaster. Lessing treated the Jew more kindly in his "Die Juden" (1755), although the *Traveler* conceals his race to the last. Stephanie's "Der Neue Weiberfeind und die Schöne Jüdin" (1773) holds up to view the pretty Jewess *Esther*, whom the hitherto woman-bating count loves, but deserts on discovering her race. The same author's "Die Abgedankten Offiziere" (1770), a comedy in imitation of Lessing's "Minna von Barnhelm," deals with *Pinkus*, a good-natured Shylock. Following this, in 1774, came Pauerbach's dramatization of "The Rural Probity" (published in "The London Magazine," Aug., 1773), entitled "Der Redliche Bauer und der Grossmütige Jude," in which *Moses* is resplendent as a good angel. This was succeeded by Booger's "Post" (with *Moses*, a coward). Then came H. L. Wagner's "Reue Nach der That" (1775), in which a Christian

causes his dog to bite a Jew, and regrets it later; Plümike's "Volontär" (1775), with a Jew as a jolly soldier; "Der Adelige Tagelöhner" (1776), where, in *Isaac* helps the poor hero to frustrate the villain, *Von Malverse*.

Müller created an utter coward in *Mauschel*, the Jew, in his version of "Faust" (1778); but the stage Jew was fully redeemed a year later, when Lessing's "Nathan der Weise" (see NATHAN THE WISE) saw the light. Next followed Bischoff's "Der Judenfeind" (1780), in which *Rachel* is killed by her father, *Salomo*, for the sake of 200 thalers. The year 1781 saw "Albertine," in which *Abraham* is pictured as a swindler; and the year following, Pfranger's "Der Mönch von Libanon," a refutation and continuation of "Nathan der Weise"; the monk who confounds *Nathan* being *Saladin's* supposedly dead brother, *Assad*. Lerchenheim's "Der Jude, oder Betrug für Betrug" (with *Simon*, a cheat), and Törring-Seefeld's "Der Teure Ring" (with *Abraham*), were produced in 1783. In the following year Heinrich Reinicke, in his "Nathan der Deutsche," shows *Nathan* to be a benevolent type of Jew; and J. K. Latich acknowledged the authorship of "Wer War Wohl Mehr Jude," a plagiarism of "Nathan der Weise," in which *Carl Reichert*, the banker's son, loves *Marie*, the adopted daughter of the Jew *Wolf*.

In the next three years German authors produced: "Menschen und Menschen-Situationen" (Karl Steinberg), which also copies "Nathan der Weise," in which *Recha*, the Christian, is the adopted daughter of *Isaac Mendel*; "Liebe und Philosophie" (Leipziger); and "Die Luderlichen," in which *Schmül*, the money-lender, plays a prominent part.

In 1792 Hensler's "Das Judenmädchen von Prag" created a stir, for it portrayed the Jew *Isaak* paying the debts of a Christian. The same year saw the creation of *Ephraim*, a comedy rôle in "Weltklugheit und Herzensgüte." Iffland's "Dienstpflicht" (1795) pictures *Baruch* as the guardian angel of the poor hero.

The first few years of the nineteenth century witnessed the productions of Bischoff's "Dina, das Judenmädchen aus Franken" (1802), which was written to combat the anti-Semitism of the **Nineteenth Century.** day, and which exploits the love of *Albert*, a Christian, for *Dina*, the Jewess, the latter meeting death at the hands of *Albert's* cousin, *Bianca*; "Der Wuchernde Jude am Pranger" (1804), in which usurer and Jew are painted as synonymous; and *Aristo's* (Burchardi's) "Soldaten" (1804), wherein *Moses* declares that when dealing with honest Christians he is an honest Jew.

Similar plays of that period are Ziegelhauser's "Die Juden" (1807), which extols Jewish charity during a flood near Vienna; Sessa's "Unser Verkehr" (1815), a caricature of Jewish life, with *Jakob Nirsch*, who imagines himself to be a poet, as the hero; Voss's "Euer Verkehr," an answer to the last-named play, in which *Herr Levin* stops the production of "Unser Verkehr," and foils an attempt to blackmail the Jews; "Der Weisenknabe" (1825), in which a Jewish lottery-ticket seller unites two poor lovers; Schröder's "Die Heirat Durch ein Wochenblatt" (based on Boursault's "Comédie Sans Titre");

"Sie Fehlen Alle" (with *Moses*, the money-lender); "Spielerglück," in which the son of a Jew and of a French milliner poses as the *Marquis de Richesourcee*; and many farces by Richard Voss.

Of the newer German productions the best known is Gutzkow's "Uriel Acosta" (1847), based on the

same author's "Der Sadducäer von

Present Amsterdam" (1833), which is a play of

Plays. great power. "Leah, the Forsaken,"

is another drama dealing with Jewish character. In still more recent times "Heine's Junge Leiden" by A. Mels, which is entirely Jewish—for every character in it is that of a Jew—made its great success because of the sympathetic conception of the youthful poet and the humorous character of *Hirsch*, the wandering chiropodist and lottery-ticket agent. This play was one of the first, if not the first, to show the Jew of to-day as he really is. Max Nordau's "Dr. Kohn," with its pedantic hero and its priggish villains, while possibly true to life in such German society as is portrayed in the play, is an unfair conception of the Jew. Dr. Herzl's "New Ghetto" is perhaps a too realistic depiction of the objectionable type of Jew.

As for the melodramas and the comic operas of the day, there is scarcely one that does not contain at least one Hebrew. The Jew is a stock character with the lower grade of dramatists, whose lack of originality and inventiveness prevents them from creating a conception barely different from the usurer, the hook-nosed race-track tout, and the bediamonded lady with a dubious past, whose sole ambition is to lead some innocent Christian maiden from the path of virtue.

The conceptions of the Jew by the mummerys are as varied as the characters created by the playwrights' fancies. Until 1741 the stage Jew was a buffoon or low comedian. In that year Macklin defied tradition and played *Shylock* as a vindictive, revengeful being, contending: "This was the Jew that Shakespeare drew." Before Macklin, Alleyne had played *Barabas* with a huge nose. Kean made his *Shylock* a somewhat sympathetic character. Other actors run the entire gamut of conception, from wildest farce to deepest tragedy.

DRAMA, YIDDISH: The dramatic part of Yiddish literature has had a less independent development than any other of its parts, and is consequently poorer, both in quality and in quantity. There are probably less than fifty printed Yiddish dramas, and the entire number of written dramas of which there is any record hardly exceeds five hundred. Of these at least nine-tenths are translations or adaptations. The earliest Yiddish dramas originated in Germany. Schudt, in his "Jüd. Merck-

würdigkeiten," vi., ch. 35, tells of a troupe of Judæo-German performers in Frankfort-on-the-Main at the beginning of the eighteenth century, of which the director and "regisseur" was Baerman Limburg, author of the drama "Mekirat Yosef" (Sale of Joseph), which was played under his supervision. That drama was published in the above-mentioned city in 1711 (see "Ozar ha-Sefarim," p. 326), and forms the beginning of the Yiddish drama. Numerous other dramatizations of the story of Joseph, of the Exodus, and of Esther and Ahasuerus were

Earliest written in the succeeding two centuries; but, with the exception of the

Examples. Esther plays by Goldfaden and Shaikevich, are of interest to bibliographers only. Saphir's farce, "Der Falsche Kaschtan" (1820), may be mentioned here because it was written to criticize Jewish communal affairs, while M. Miller's "Esther, oder die Belohnte Tugend" (Vienna, 1849), which is also written in German, but with Hebrew characters, may be cited as one of the latest productions not intended for the Yiddish-speaking masses.

A certain Schertspierer of Vienna wrote a drama, "Moses," which was played in the newly established Jewish theater in Warsaw in 1838 ("Allg. Zeit. des Jud. 1838, No. 155). Of a later pre-Goldfaden Jewish theater, the one temporarily existing in Odessa in 1864, it is known only that the dramas "Esther" and "Athalia" were performed there ("Israelite," Cincinnati, vol. ii., No. 3). Aksenfeld's dramas mark the beginning of the Russian Yiddish drama, the main purpose of which is the glorification of the "Haskalah" or progressive movement. Gottlober's "Decktuch" (Warsaw, 1876) and Ettinger's "Serkele" (Johannesberg, 1861; Warsaw, 1875), which were written between 1830 and 1840, belong to the same class, to which also may be added I. B. Falkovich's "Reb Chainele der Kozin" (Odessa, 1866) and "Rochel die Singerin" (Jitomir, 1868). Abramowitz, in his masterpiece "Die Takse" (*ib.* 1869), like the true artist, spares neither friend nor foe; but this work, like Zunser's extremely long "Mekirat Yosef" (Wilna, 1893), was not intended for the stage, and the dramatic form is only secondary.

The real Yiddish drama begins with Goldfaden, who has not yet been surpassed. When he first established a permanent Yiddish theater, about 1875, he composed about fifteen farce comedies, some entirely original and some adapted from the German, but all containing actual Jewish characters and excellent caricatures. "Die Rekruten,"

The "Die Babe mit dem Enikel," "Shmendrik," "Die Kishufmacherin," and

Modern "Die Zwei Kunc-Lemels" are the best

Phase. known of these. Of his later and more serious works, "Shulamit" and "Bar Kochba" are probably the best two plays in the entire Yiddish dramatic literature; they have been reprinted many times and translated into several European languages. His "Dr. Almasada" (adapted from the German), his "König Ahasuerus," and several dramas which he wrote while in New York, are still favorites with both actors and public.

Next to Goldfaden in point of time, and to some extent also in excellence, stands N. M. Shaikevich (Shomer), who began to write for the Yiddish stage

soon after it was established. His "Jüdischer Poritz," "Der Revizor" (a parody of Gogol's work of that name), "Der Lebendiger Todter," and "Die Kokete Damen," written about 1879-80, possess considerable merit, and his "Spanische Inquisition" was translated into Spanish and played in Argentina. Another of the earliest writers for the Yiddish stage is Ossip M. Lerner, who, among other translations, has furnished a very good one of Gutzkow's "Uriel Acosta." L. Lewinsohn's "Weibersche Knüplach," which gives a droll description of the scare caused among the Jewish women of a certain community by the prospective repeal of "the ban of R. Gershom" which enjoins monogamy, went through at least three editions (Warsaw, 1877; Wilna, 1881). Epstein's "Geschmissener Apikores" (Warsaw, 1879) and Ulrich Kalmus' "Geschichte fun a Seltene Berit un a Genarte Chasune" (Warsaw, 1882) are crude, but possess some merit and originality. Katzenellenbogen's "Rashi," Lillienblum's "Discontist," and Mrs. H. E. Abramowich's translation of Lessing's "Die Juden" also belong to this period.

The Yiddish theater in London never attained much importance, and like similar theaters in Galicia or in some towns of the United States outside of New York, it depended almost entirely on dramatic productions composed in Russia and, later, on those composed in New York. Jacobs, the author or translator of the "Leichtsinnige" and of "Rahel and Leah," both about 1888, and Rakov, author of a "Dreyfus" play, are the only London Yiddish dramatists of whom we have information. The real productivity began in New York, where **New York.** every well-established Yiddish theater has its own playwright to provide new plays at short intervals. Joseph Lateiner, one of the earliest Yiddish dramatists of this generation, was the first to arrive here with a troupe (1883), and is considered the best of his kind. He began his career in Europe; his first productions here were "Esther and Haman" and "Joseph and His Brethren" (1884). He has since then written more than fifty plays, including comedies, tragedies, historical operas, melodramas, etc., most of which are a compound of several dramatic forms, and in which the staging is of more importance than the literary character.

M. Hurwitz, who arrived three years after Lateiner, has written about as many and as various pieces. Titles like "Tisza Eslar," "Shelome ha-Melek," "Shabbethai Zebi," "Capital und Arbeit," "Mabul fun Johnstown," "Cuba," "Der Rambam," "Jonah ha-Nabi," "Mary Berberi," show the scope and the variety of his dramatic works. Goldfaden while in New York also composed several plays, which, however, did not approach his former masterpieces. Shaikovich has also been active in New York for several years, and some of his comedies, e.g. "Die Emigranten" (1902), enjoy much popularity.

Jacob Gordin, who has written for the New York stage since 1891, is somewhat above the average of Yiddish playwrights. His adaptation, "Der Jüdischer König Lear," and its counterpart, "Mirele Efrot," and some other of his twenty odd pieces,

have produced a strong, though hardly a lasting, impression. M. Seifert is the author of about fifteen or twenty pieces, of which an excellent short farce comedy, "Die Gele Redactie" (The Editorial Room of a "Yellow" Journal, 1902), deserves to be mentioned. Rubens Weissman, author of "Sarah," "Don Yizhak Abravanel," and a few other pieces, possesses considerable talent. John Paley is the author of the "Nihilisten"; Morris Rosenfeld, the poet, of "Der Letzter Kohen Godol"; and Jacob Ter, among others, has written a considerable number of dramatic works. Another Yiddish poet, A. M. Sharganski, is the author of the historical dramas "Kol Nidre" and "Unetane Tokef." L. Kobrin and B. Gorin have written several dramatic works which are not devoid of literary merit, while D. M. Hermalin represents the ultrarealistic school on the Yiddish stage.

Several actors, like Thomashefski and Feinman, have also written plays, but none has succeeded so well as Rudolph Marks, author of "Hayyim in America," "Der Bowery Tramp," etc., who has given to the Yiddish stage some of the cleverest adaptations of American character-plays. Life in America is, next to Biblical subjects, the most popular theme with authors and audiences, and plays which portray the humorous side of it are among the most popular of contemporary Yiddish dramas.

DRAWER OF WATER: A proverbial expression always found in connection with "hewer of wood" (Deut. xxix. 11; Josh. ix. 21, 23, 27). When the fraud practised by the Gibeonites was discovered, the Israelites, since they had taken an oath to defend them, and therefore could not put them to death (see COVENANT), made the Gibeonites perform the menial work of drawing the water and cutting and gathering the wood for the Tabernacle and later for the Temple service. The water was drawn from the well, put into goatskins, and so carried. If the man had a donkey, two goatskins could be carried at one time, slung across the animal's back. The drawer of water is still a familiar figure in the Orient. See GIBEON; NETHINIM.

G. B. L.

DREAMS.—**Biblical Data:** Dreams have at all times and among all peoples received much attention. In the youth of a nation, as in the youth of an individual, dreams are so vivid that they appear to be hardly distinguishable from reality. "In the primitive stages of human development, when all insight into the laws of nature and of the human mind was lacking, dream-images were taken to be actual realities" (Lehmann. "Aberglaube und Zauberei," p. 414, Stuttgart, 1898). Dreams were not explained physiologically or psychologically, but were ascribed to intercourse with spirits or taken to be inspirations of the gods. As spirits and gods were supposed to be conversant with the things

that are hidden, yet unborn, dreams were looked upon as their whisperings, having the value of divinations and predictions. Since the language of spirits and gods, however, is not like the speech of men, it became necessary that dreams should be interpreted, which was possible only to the "wise man" who had intercourse with spirits and gods. In this way the "science" of dreams and dream-interpretation came into existence.

It is sufficient for the comprehension of the Biblical and Talmudical stories summarized below to compare them with the oneiromancy and oneirocriticism of the ancient world, which are amply treated in Lehmann's book, as well as in the various dictionaries of antiquities, such as Daremberg and Saglio's "Dictionnaire des Antiquités Grecques et Romaines" (ii. 306-308) and Ennemoser's "Gesch. der Magie" (pp. 132-141, Leipsic, 1844). Tylor, in "Primitive Culture" (i. 122, 303, 439; ii. 411), discusses the question from the ethnographic point of view.

The Bible attaches importance to dreams, as is shown by well-known instances in Genesis. But in conformity with its strict monotheism, it is always God who speaks through dreams, either to make known His will or to announce future events. It must be noted, furthermore, that the dreams recorded in the Bible are, almost without exception, intended for the benefit of the race in general and not for that of single individuals (Gen. xx. 3; xxviii. 12; xxxi. 10, 24; xxxvii. 5, 9; xl. xli.; Judges vii. 13; I Kings iii. 5, 15; Dan. ii. and iv.). The two interpreters of dreams mentioned by name, Joseph and Daniel, expressly refer to the inspiration of God in their interpretations (Gen. xli. 16, 25; Dan. ii. 19). Daniel even has dreams and interpretations in a "vision of the night." Dreams were also taken as divine revelations even if they referred only to the dreamer himself (compare Job xxxiii. 14 *et seq.*).

Job looks upon the disquieting dreams and the dreadful visions of sleep as terrors sent by God (vii. 14). The prophet also received his

Dreams prophecies during sleep: in some cases
and God spoke with him; in others, God
Prophecy. caused him to behold a vision (Dan. i. 17). Only Moses spoke with God face to face, without the intervention of dreams, visions, or riddles (Num. xii. 5 *et seq.*).

Prophets and dreamers are mentioned together because of the connection between prophecy and dreams (I Sam. xxviii. 6, 15; Deut. xiii. 2, 4; Jer. xxiii. 25-32, xxvii. 9, xxix. 8). "I will pour out my spirit upon all flesh; and your sons and your daughters shall prophesy, your old men shall dream dreams, and your young men shall see visions" (Joel ii. 28). There is nothing to indicate how the dreams of the true prophets were distinguished from those of the false ones. The higher kind of prophet, however, beheld the vision while awake, either by day or by night (Zech. i. 8, iv. 1; Gen. xv. 12; I Sam. iii. 3, 4; II Sam. vii. 4 *et seq.*; Dillmann, "Handbuch der Alttestamentlichen Theologie," pp. 476 *et seq.*, Leipsic, 1895).

The interpretations of dreams in the Bible are not dependent upon astrology nor upon any other occult

science, but are simple and ingenuous. The dreams are interpreted symbolically. Seven fat kine mean seven fat years, etc. The recurrence

Interpreta- of the dream means that it will surely
tion come to pass within a short time (Gen.
of Dreams. xli. 32). The dreams of Nebuchadnezzar (Dan. ii. and iv.) are huger and more fantastic, and their interpretation, especially that of the second one, may be termed allegorical. Judges vii. 13 is also interpreted symbolically.

E. G. H.

—**In Rabbinical Literature:** Jewish tradition furnishes abundant material relating to dreams, the Babylonian Talmud—which originated (200-500) in the home of the Chaldeans, the magicians of the ancient world—being especially rich in them. Berakot (55-58) is a veritable storehouse of dream-interpretations. The following selections will present the views of Palestinian and Babylonian Jews during the first five centuries of the common era.

The fact that the most famous teachers frequently discuss dreams and enunciate doctrines regarding them, shows the strong hold dreams had upon the minds even of the intellectual leaders of Judaism. Belief in dreams was the rule; doubt concerning them, the exception.

Johanan ben Zakkai dreamed that his sister's sons would lose 700 denarii in that year. He therefore pressed them to give alms frequently, so that they might lose that sum gradually in a noble way (B. B. 10a). A man felt some compunction regarding the money left him by his father, which he suspected to be tithe-money. The dispenser of dreams (בעל החלום) appeared to him, and named the place, the sum, and the uses to which the money was to be put. The scholars held that in such cases dreams could not be taken seriously, and declared the money to be secular (Tosef., Ma'aser Sheni, v. 9; Sanh. 30a). In a similar story it was the father instead of the dispenser of dreams who appeared to the son (Yer. Ma'aser Sheni 55b). Although God had turned His face from Israel, He yet spoke in dreams to individuals (Hag. 5b). In conformity with this view, dreams have been regarded as suggestions from Heaven. The patriarch Gamaliel II.'s qualms of conscience were allayed in a dream (Ber. 28a). In the same way the opposing scholars were enjoined to make their peace with the patriarch Simon ben Gamaliel (Hor. 13b).

Meir had no confidence in a certain innkeeper with an ill-omened name; but two of his colleagues made light of his suspicions; whereupon Meir was warned against the man in a dream (Yoma 83b). Hints through Biblical passages were given in dreams (Yeb. 93b; Sotah 31a; etc.). Hanina had a dream in which Rab was hanged on a tree; he interpreted this to mean that Rab would be his successor, and therefore treated him as an implacable enemy (Yoma 87b). When R. Nahma spoke irreverently of Saul, terrifying angels appeared to him in a dream (ib. 22b). For a similar reason King Manasseh appeared to R. Ashi in a dream (Sanh. 102b). When Raba forced rain to come, his father appeared in a dream and scolded him (Ta'an. 24b). One whom R. Judah had honored in death came to thank him in a dream (Shab. 152b). Even an idol

appeared in a dream, at a time when there was drought ('Ab. Zarah 55b). Raba prayed that he might receive in a dream the answer to a difficult question (Men. 67a). This actually happened in the case of R. Johanan (Men. 84b, *passim*). Many teachers of the Law desired to see famous authorities of past ages in their dreams, and had their wishes granted (Eccl. R. ix. 10). If any one was put under ban in a dream, ten persons had to absolve him (Ned. 8a); but if a pagan wished to embrace Judaism because he had been advised in a dream to do so, he was not accepted (Yeb. 24b).

A distinction was made between good and evil dreams. He who goes to bed in a cheerful frame of mind "is shown" a good dream (Shab. 30b), which may come to pass within twenty-two years (Ber. 55b). Good persons do not have good dreams, nor have bad ones evil dreams (*ib.*). As evil dreams naturally caused anxiety, people prayed not to be disturbed by them (Ber. 60b). The most common and efficient preventive of evil dreams was fasting (תענית חלום), still practised by many persons (Shab. 11a). It is not always clear what constitutes a good or an evil dream.

A skilful interpretation consisted in an ingenious answer, that often explained two similar dreams in entirely opposite ways. A man came to R. Jose ben Halaftha, saying: "I was told in a dream to go to Kapudkia [Cappadocia], where I should find the money of my deceased father." Jose explained the dream as follows: "Count ten beams in your house, and in the tenth you will find the treasure, for 'Kapudkia' means קפא [= "beam"] and דקוריא [= "decuria," "ten"]" (for a similar analysis of the same name see Krauss, "Lehnwörter," ii. 459a). The same famous teacher of the Law interpreted a dream of an olive-wreath to mean that the dreamer would advance in the world; while he said to another man who had had a like dream, that he would be beaten. When the latter asked him why his interpretations differed, Jose replied: "The other man saw the olives growing, whereas you saw them after they had been picked", the latter idea being expressed in Hebrew by the words meaning "to beat down" (Yer. Ma'aser Sheni 55b). Such interpretations are generally based on folk-etymology, a striking example of which is given in Blau's "Altjüdisches Zauberwesen" (p. 166). The personality of the dreamer was also considered, so that the same dream (for instance, of drinking wine) might mean success in the case of a scholar, and misfortune in the case of an unlettered person (*ib.*).

The dreamer as a rule was unable to interpret his own dream (Yoma 28b). Hence the need of interpreters, who were numerous, and asked payment for their skill. The good-will of the interpreter was sought by presents, for

**In-
terpreters
of Dreams.** it was believed that all dreams came true according to the interpretation (Yer. Ma'aser Sheni 57c; compare Bacher in "Rev. Et. Juives," xxvii. 141). Even teachers of the Law demanded a fee for interpreting a dream. They were consulted also by pagans, just as Jews consulted pagan "Chaldeans." Raba and Abaye, two Babylonian leaders of schools in the

first half of the fourth century, laid their dreams before a Chaldean of the name of Bar Hedia, whose avarice and lying were denounced. "Whoever gave him a fee got a favorable answer, and whoever gave no fee got an unfavorable one" (Ber. 56a). He was held up to ridicule, and yet in spite of it was taken seriously.

Hisda, a Babylonian of the third century, laid down the following rules: Every dream, excepting those which occur during fasting, means something. A dream not interpreted is like a letter unread. Neither good nor evil dreams come true entirely. An evil dream is better than a good one, since it leads to repentance; the former is annulled by the pain it causes, and the latter by the joy (Ber. 55a). Similar views are expressed by other Babylonian amoraim. An evil dream can be turned away, according to R. Johanan, by saying to three persons: "I have had a good dream"; they replying: "Yes, it is good; let it be good; may God change it to good," etc. The evil dream can also be annulled by means of certain Bible verses. The prayer for good dreams, which the congregation still pronounces after the first and second blessings of the priest, is recommended as early as the Talmud (Ber. 55b). In addition to learned interpretations—for instance, on the meanings of Biblical passages occurring in dreams—there are also those of a folk-lore character; *e.g.*, a red horse is an ill omen and a white horse a good omen (Sanh. 93a). A ט, the initial letter of טוב ("good"), is a good omen (B. K.). The diversity of dreams made the profession of interpreter remunerative. The fee paid for an interpretation was generally one denarius. There were twenty-four interpreters in Jerusalem, each one of whom would, of course, interpret a dream differently from the others.

Belief in dreams was criticized as early as Ecclesiastes, in which it is declared to be vanity (ch. v.). In view of the general and implicit belief in dreams obtaining in the ancient world, Sirach's disbelief in them is proof of his advanced thought. He expresses his views as follows (xxxi. [xxxiv.] 1-8, R. V.):

Vain and false hopes are for a man void of understanding; and dreams give wings to fools.

As one that catcheth at a shadow, and followeth after the wind, so is he that setteth his mind on dreams.

The vision of dreams is as this thing against that, the likeness of a face over against a face.

Of an unclean thing what shall be cleansed? And of that which is false what shall be true?

Divinations and soothsayings and dreams are vain; and the heart fancieth, as a woman's in travail.

If they be not sent from the Most High in thy visitation, give not thy heart unto them.

For dreams have led many astray; and they have failed by putting their hope in them.

Without lying shall the Law be accomplished; and wisdom is perfection to a faithful mouth.

The criticism of R. Simon ben Yoḥai (c. 150), however, shows a certain belief in the meaning of dreams; he says: "As there is no grain without chaff, so there is no dream without vain things." But his contemporary R. Meir says, "Dreams do not help nor harm" (Hor. 13b). It is noteworthy that Philo wrote five books on dreams (Schürer, "Gesch." 3d ed., iii. 510, note 61). In view of these facts the psycho-

logic interpretations of dreams by the wise rabbi Joshua ben Hananya (c. 100) are worthy of note. As Nebuchadnezzar once asked the Chaldeans, so a Roman emperor (probably Hadrian) asked Joshua what he (Hadrian) was going to dream. Joshua answered: "You shall dream that the Persians will vanquish and ill-treat you." Reflecting on this the whole day, the emperor dreamed accordingly (Ber. 56a). Samuel (d. 257) gave a similar and equally effective answer to the Persian king. Notwithstanding these exceptions, it may be said that the Jews of antiquity held almost the same views regarding dreams as did other ancient peoples.

—**In Jewish Folk-Lore:** Uncultured Jews share with, and in most cases derive from, their neighbors most of their superstitions relating to dreams. The general principle seems to be that dreams go by contraries. Thus, if you dream of death, it is a sign that you will live. This belief is common to English, Dutch, and Russian Jews. On the other hand, there is a saying that a sixtieth part of every dream is true, since a dream is that part of prophecy (Ber. 57b). But not all dreams follow the rule of contraries; thus, if a Russian Jew dreams that a dog attempts to bite him, it is regarded as a sign that his enemies wish to harm him. It is generally thought that the dead pay visits to the living in dreams; this is current among the German peasantry (Grimm, list of superstitions at the end of "Teutonic Mythology," No. 633). To dream that a dead person brings fruit with him is regarded as a sign that he is in paradise. It would also appear that Jewish popular thought regards the dream-world as in direct communication with heaven, for the familiar dream-experience of a sudden fall is regarded as a sign that the soul has been suddenly ejected from heaven. On the other hand, it is considered unlucky to accept in a dream a present from one dead. This is found as early as the thirteenth century in the "Zawwa'ah" of Judah Hasid, § 13. If an unpropitious or in other ways "bad" dream occurs to a pious Jew, he will fast the next day. It is therefore considered an evil omen to have a bad dream on Yom Kippur, when fasting is obligatory, and the dreamer can not ward off the ill effects of his dream by a special fast for that purpose. Hence the curious recipe for preventing bad dreams found among the Jews of Minsk, who say, "Got is a har, Der holem is a nar; Wos vet mir zich haintige nacht holemen. Wel ich morgen nit fasten" (God is master, The dream is a fool; Whatever I may dream to-night, I will not fast to-morrow). The assumption is that the ruler of dreams, finding that he can not force the dreamer to fast, will not take the trouble to send him a bad dream. Dreams are supposed to result in the way they are interpreted, and accordingly it is unwise to tell your dream to a fool; he might interpret it in an unfavorable way.

The Jews of eastern Europe have still their special dream-book, a Yiddish translation of Almoli's "Pitron Halomot," an edition of which was published as late as 1902 in Brooklyn, New York. This

classifies dreams in accordance with their subjects—as animals, plants, angels, or the dead; or milk, cheese, butter, etc. A few examples

Dream-Book. will suffice to indicate the character of the work. If you dream that an ox gores you, you will live long; that

you see demons, you will earn a great deal of money; that you drink milk, you will fall ill, but rapidly recover. These puerilities are probably derived from medieval dream books of the Mohammedans, since Solomon ben Jacob ALMOLI lived in Constantinople.

J.

DREIFUS, MARKUS G.: Swiss teacher and editor; born at Endingen, canton Aargau, Switzerland, 1812; died at Zurich May 30, 1877. After attending the Talmud school and the seminary at Karlsruhe, and studying for a few terms at the University of Basel, he became in 1835 a teacher in the Hebrew parochial school of Endingen; holding that position, with temporary interruptions, until 1870. For a few years he was a teacher at Geneva, and for a short time editor of a political paper, "Der Landbote," at Winterthur. The last years of his life he spent as teacher of religion at Zurich, where he died. Dreifus, who was a grandson of R. Abraham Ris, was courageously and incessantly active in behalf of the civic and social betterment of his Swiss co-religionists; he and his friend M. Bernheim, teacher in Lengnau, being enthusiastic pioneers of religious reform. He endeavored to further the emancipation of the Swiss Jews by several small works and many articles in various Swiss journals. He published "Zur Würdigung des Judenthums Unter Seinen Nichtbekennern," Winterthur, 1860; 2d ed., with preface by M. Kayserling, *ib.* 1862.

S.

M. K.

DREIFUS, MENAHEM BEN ABRAHAM: German rabbi and writer; he belonged to the widely related Treves family and signed himself מרייט. For many decades he was rabbi in Sulzburg, Baden, where he died in 1880. He is the author of a code giving the individual duties incumbent on an Israelite, published under the title "Orah Mesharim," Mülhausen, 1858; 2d ed., Mayence, 1878. A Hebrew eulogy on the author by his brother-in-law Raphael Wormser, rabbi in Soultz, Alsace, forms a prelude to the work.

DRESCHFELD, LEOPOLD: Physician and communal worker; born in Bamberg, Bavaria, 1824; died at Manchester, England, Oct. 21, 1897. He studied medicine and dental surgery in Germany, fought in the Revolution of 1848, and subsequently settled down in Manchester, where he became one of the leading dental practitioners. Dreschfeld identified himself with all educational movements for the advancement of his profession; was one of the founders of the Victoria Dental Hospital; was elected president of the Odontological Society (1888); and wrote a treatise on "Dentistry Among the Ancients." He was also elected president of the Students' Society; was on the committee of Owens College; was consulting surgeon to the Victoria Hospital, and a life member of the Odontological Society.

Dreschfeld was one of the original founders of the Park Place Synagogue; was associated with the Reform movement from its inception, and for over thirty years was one of the committee of the Jewish board of guardians. He was likewise one of the founders of several social institutions, including the Schiller-Anstalt and the Liedertafel.

G. L.

DRESDEN: Capital of the kingdom of Saxony; situated on both banks of the Elbe. The presence of Jews in the city or in its vicinity as early as the beginning of the eleventh century is evidenced by the proceedings against Margrave Gunzelin (1010), who, among others, was accused of selling Christian slaves to Jewish merchants. The first official document, however, directly concerning the Jews of Dresden, as well as those of the other cities of Meissen, is dated 1265. In that year Henry the Illustrious regulated the differences between Christians and Jews. From these regulations it may be inferred that the main occupation of the Dresden Jews was money-lending.

According to an old chronicle, a great auto da fé of the Dresden Jews took place on Shrove Tuesday, 1349 ("Chron. Parvum Dresdense," in Menken's "Script. Rer. Germ." ii. 332). It is possible that this was connected with the Black Death, although Dresden was but slightly attacked by the plague.

The Dresden Jews figure again in official documents in 1368, with regard to special taxes imposed upon them, amounting to 1,000 gulden every other year. In 1425 Duke Frederick reduced these to 875 gulden, with the stipulation that the sum should be paid in gold of good quality and of a certain weight. Accused, in 1430 or 1432, of favoring the Hussites, the Jews were banished from Dresden, and their synagogue, situated in the place which still bears the name "Judenhof," was

Jews

Banished. transformed into a distillery. The banishment, however, seems not to have been general, as exceptions were made in favor of those Jews whose services to the city were recognized. Thus in 1448 the princes Ernst and Albrecht granted to a Jewish physician named Waroch (probably Baruk), with his two sons Meir and Moses, the privilege of settling in Dresden on the condition that Waroch should attend all the patients committed to his care by the princes. For this service he was to receive yearly thirty bushels of corn, one cask of wine, and a cow.

In 1700 the court factors of August II., Berends Lehman and Jonas Meyer, who had hitherto lived at Hamburg, settled in Dresden. They were soon followed by many other Jews, whom they took under their protection. During the following twenty-five years the number of Jews living at Dresden must have greatly increased; for in 1725 the government, which endeavored to enforce the decree of banishment, thought it necessary to issue an order forbidding to those Jews who did not belong to the households of the court factors the right to sojourn in Dresden, except while fairs were being held. Ten years later the Christian merchants of Dresden lodged with the government a complaint against Jewish competition.

In 1746 new regulations were issued, rendering residence in the city unbearable to those Jews who by special permission had settled there. They were not allowed to build a synagogue, but had to meet privately and to preserve the strictest silence. A heavy poll-tax was imposed, which was further increased in 1749. Still the community gradually increased, and at length the absence of a Jewish cemetery was keenly felt. After many negotiations the Jews obtained from the government a plot of ground in Neustadt for the sum of 1,000 thalers, paying 5 thalers for each interment. The first to be buried in the cemetery was the widow of Isaac Meyer, bullion contractor to the mint.

The government continued to hamper the development of the community. New laws were enacted in 1772, restricting still further the right of settlement in Dresden. No Jew was allowed to reside in the city without special permission. In order that no unprivileged Jew might be clandestinely harbored, each Jewish family was subjected to a monthly police visitation. The poll-tax was increased; every adult male being assessed 70 thalers annually, in addition to a tax upon his wife and children. The price of a permit for a Jewish marriage was 40 thalers. Every means of gaining a livelihood was barred to the Jews, with the exception of money-lending and of rag-dealing in the Judenhof. Many were thus unable to pay their taxes, and in 1777 several hundreds would have been banished but for the intervention of Moses Mendelssohn.

Still, in spite of all these restrictions, at the end of the eighteenth century there were about 900 Jews in Dresden. In 1803 the community organized, and nominated as rabbi David Wolf Landau of Lissa, who filled the office for fifteen years.

Successive Rabbis. He was assisted by the leaders, Mendel Schie, Samuel Kaim, and Hirsh Beer.

From 1820 to 1861 Dr. Bernhard Beer was very active in promoting both the spiritual and material welfare of the community. Landau was succeeded in the rabbinate by Abraham Levy, who in 1835 was followed by Zacharias Fränkel. Owing to the great abilities and zeal of the latter, the community obtained in 1837 permission to build a synagogue, which was inaugurated in 1840.

The political situation of the Dresden Jews remained precarious. Some trades and handicrafts were opened to them by the decree of 1838; but their disabilities were still very numerous, and the repeated petitions of the community and the intervention on their behalf of some Christian notables, as the philosopher Krug, were of little avail. The government of Saxony remained deaf to all solicitations, despite examples of more favorable treatment of the Jews shown by neighboring countries. It was not till 1868 that the Dresden Jews, after a long and persistent struggle, secured all the rights of citizenship.

On the removal of Fränkel to Breslau in 1854, Dr. Wolf Landau succeeded him and in 1886 the present rabbi, Dr. Jacob Winter, was elected. In 1901 the Jewish population of Dresden aggregated 2,547. The community has ten charitable institutions, most of which date from the end of the eight-

eenth century; it also has a large number of private foundations.

DREUX (Hebr. דְּרוּז or דְּרוֹז): Chief town of the arrondissement of the department of Eure-et-Loire, France. From the twelfth century, Jews were living in this locality, where they were considered the property of the Countess of Dreux. In accordance with a convention concluded between King Louis and the barons at Melun in 1230, the Jews could be brought back to their old homes by force in case they had emigrated. This happened in 1234, when Louis ordered Thibaud, Count of Champagne, to restore to the Countess of Dreux the Jews that he held unlawfully, and the ownership of whom would be for her a source of revenue.

Abraham ibn Ezra was in Dreux from 1155 to 1157. Scholars of Dreux attended the synod of Troyes in 1160. In the thirteenth century it was the residence of many eminent rabbis, including Solomon, surnamed "the Saint," chief of the academy, and esteemed as a Tosafist; Joseph ben Solomon; Perez ben Menahem; Menahem Vardimas, a contemporary of Sire Léon and of Jehiel of Paris; and Cresbia or Cresbito, who is by some identified with Berechiah ha-Nakdan (see *JEW. ENCYC.* iii. 53 et seq.).

S. K.

DREYFUS, ABRAHAM: French journalist and dramatist; born at Paris June 21, 1847. His first literary efforts took the form of two poetic fantasies (1870). To these were added the following plays, mostly comedies: "Un Monsieur en Habit Noir" (1872), in one act and with only one personage, brought out at the Vaudeville; "Mariages Riches" (Vaudeville, 1876); "Chez Elle" (with Charles Narry, Vaudeville, 1877); "Un Crâne sous une Tempête" (Gaité, 1878); "Pour Sauver une Jeune Femme du Monde," "La Victime," and "La Gifle" (Palais Royal, 1878-80); "Le Klephte" (Odéon, 1881); "L'Institution Sainte-Catherine" (Odéon, 1881); "Battez Philidor" (Opéra Comique, 1882); and "Une Rupture" (Théâtre Français, 1885); "Les Amis" (Théâtre Antoine, 1898); "De 1 Heures à 3 Heures," a comedy.

Some of these pieces have been collected by the author in three volumes entitled "Jouons la Comédie" (1887), "Scènes de la Vie de Théâtre" (Paris, 1879), and "L'Incendie des Folies Plastiques" (1886). He has published two volumes of notes on the theatrical world, and other articles have appeared in "La Vie Parisienne," "Le XIX^e Siècle," "L'Illustration," "Gil Blas," "Le Temps," and "Revue Littéraire et Politique." In this last journal, under the nom de plume "Monsieur Yosse," Dreyfus wrote a series of humorous reflections on the city and the theater. Mention may also be made of two lectures

given by Dreyfus, one at Brussels—"Comment se Fait une Pièce de Théâtre," and the other before the Société des Etudes Juives—"Le Juif au Théâtre."

Dreyfus is a man of heart as well as of brains, as he has proved during the anti-Semitic agitations and in the celebrated Dreyfus case. He has not hesitated to use his pen in the service of his coreligionists, and his polemic waged in "L'Aurore" was marked by acuteness as well as by a frank expression of opinion; other articles by him on the Jewish question have appeared in the "Siècle" and "Le Soir."

V. E.

DREYFUS, FERDINAND - CAMILLE: French politician; born in Paris Aug. 19, 1851. After a classical and commercial education he prepared himself for the Ecole Polytechnique, but on the outbreak of the Franco-Prussian war left his studies to serve as a volunteer. In 1873 he became editor of "L'Avenir de la Sarthe," and served five months in prison for opposing the dictatorship of MacMahon. He afterward controlled "Le Libéral de la Vendée." In 1879 he became chief of the bureau of the financial under-secretary, and later represented the government at the Brussels Exhibition.

Becoming editor of "La Lanterne" in 1882, he founded two years later "Le Matin." In Dec., 1882, he was chosen to represent the Gros-Cailion quarter in the Paris Municipal Council, and was reelected in 1884. Dreyfus in this position showed a remarkable aptitude for finance. In Oct., 1885, he was elected deputy by the department of the Seine, and was reelected, for the Twelfth District, in 1889, in opposition to a Boulangist candidate. A radical, with wide schemes of reform, Dreyfus sat with the Extreme Left. He was appointed a member of the army commission, and also on that of espionage. He has fought many duels, one with the late Marquis de Morès, the anti-Semite. His publications include: "Une Dictature" (Le Mans, 1874); "Giboyer à Saint-Pélagie" (Paris, 1875); "L'Evolution des Mondes et des Sociétés" (Paris, 1888); "Les Traités de Commerce" (Tours, 1879); "Le Tunnel du Simplon et les Intérêts Français" (Paris, 1879); "L'Angleterre, son Gouvernement, ses Institutions" (Paris, 1881); "La Guerre Nécessaire. Réponse d'un Français à M. de Bismarck" (Paris, 1890). Dreyfus is also secretary and part founder of "La Grande Encyclopédie." He is a member of the Legion of Honor.

DREYFUS, SAMUEL: Rabbi of Mülhausen, Alsace; died June, 1870. He was one of the earliest pupils of the rabbinical school of Metz, having been among the first matriculates. An excellent Hebraist and preacher, he was ambitious to become a chief rabbi. He did not succeed, however, and felt his disappointment keenly. He published several works, contributed to "L'Univers Israélite," and

fate of ministries, and even of presidents of the French republic, it deserves full treatment in these pages, as the Jewish aspects of the case were from first to last its leading feature.

I. The virulence of the passions aroused by the case was indirectly the result of the spread of ANTI-SEMITISM in France, due partly to the failure of the Union Générale—a Catholic banking establishment

THE BORDEREAU, UPON WHICH DREYFUS WAS CONVICTED (Continued on following page).

founded a monthly, "Le Lien," which was not successful, and was soon discontinued.

DREYFUS CASE ("L'Affaire Dreyfus"): Memorable trials of Capt. Alfred Dreyfus, officer in the French army, in 1894 and 1899, involving political complications and convulsions of the highest importance, rending France into two sections, and attracting the attention of the whole civilized world for nearly two years. As probably the best-known "cause célèbre" of modern times, which involved the

which aimed at superseding Jewish finance—in 1885, and partly to the publication of Drumont's book "La France Juive" in 1886. But the case itself was more immediately the outcome of the con-

Origin of the Case. tinuous attack made upon the presence of the Jews as officers in the French army by Drumont and others in the journal "La Libre Parole," founded with the help of the Jesuits in 1892.

The articles of the "Libre Parole," which denounced the Jewish officers as intriguers and future traitors, led a Jewish captain of dragoons, CRÉMIEU

duelist, held Captain Mayer, chief second of Crémieu-Foa, responsible for the inadvertence. Though totally innocent of any part in the matter, Mayer accepted a challenge from the mar-

paign against the Jewish officers until further orders. But the desired result had been obtained; anti-Semitism had received its baptism of blood.

II. Among the military services reorganized after the war of 1870 was that of the Intelligence Department (the secret service), which had as one of its principal occupations to watch the German embassy. The ambassador, Count Münster, owing to an affair involving the German military attaché, had promised on his word of honor that for the future his attachés should abstain from bribing the French officers or officials. But it was known at the Intelligence

Office that the new attaché, Colonel Schwarzkoppen, probably without the knowledge of the ambassador, continued to entertain paid spies, being in direct correspondence with the War Office in Berlin. According to indications furnished by a former Spanish military attaché, Señor Val Carlos, Schwarzkoppen and the Italian military representative, Colonel Panizzardi, had come to an agreement to exchange the results of whatever discoveries they might make; and to keep an eye on this plotting the Intelligence Office succeeded in securing the help of a charwoman employed at the German embassy, a Madame Bastian, who collected carefully all the scraps of paper, torn up or half-burnt, which she found in the waste-paper baskets or in the fireplace of Schwarzkoppen's office, put them all in a paper bag, and once or twice a month took them or had them taken to the "section de statistique." There the pieces were carefully fitted together and gummed.

By this means it was ascertained that since 1892 certain secret information concerning the national defenses had leaked out. Some large plans of the fortress at Nice had been given up by an individual who was alluded to in one of Schwarzkoppen's notes as "that scoundrel D—" (*ce canaille de D—*). The fragments of another memorandum of Schwarzkoppen conveyed the idea that the German attaché had found an informant who pretended to bring him the documents just as issued from the War Office. There was therefore a wolf in the fold; Val Carlos was certain of it.

During the summer of 1894 there arrived at the Intelligence Office a document which was far more alarming than any which had preceded it, and which was credited to the German embassy. This was the anonymous letter which has since become celebrated under the name of the "bordereau."

The Bordereau. "papier pelure" (thin foreign note-paper), ruled in squares and almost transparent, was torn from top to bottom in two places, but was otherwise intact. The writing was upon the two sides of the first page. According to the official version, which was long believed to be the true one, the paper had arrived by the usual means, through Madame Bastian; but the appearance of the document, which was hardly torn, makes this story unlikely. It would appear from other disclosures that the letter was taken intact from the letter-box of Colonel Schwarzkoppen in the porter's lodge at the embassy, and brought to the office by an agent named Brucker, who had formerly acted as a go-between for Madame Bastian and the Intelligence Office. The documents which the letter announced as being sent off did not reach the War Office; and the envelope of the letter has never been produced. Here is the text of this famous document:

"Being without information as to whether you desire to see me, I send you nevertheless, monsieur, some interesting information, viz.:

"1. A note concerning the hydraulic brake of the 120, and the way this gun has worked.

[The reference is to the hydropneumatic brake of the gun

called "120 court." It was a heavy field-piece, recently brought into use; the mechanism of the brake which overcame the recoil of the gun was a profound secret.]

"2. A note upon the 'troupes de couverture' (some modifications will be carried out, according to the new plan).

[The troops called to the frontier at the commencement of mobilization are referred to. They were destined to "cover" the concentration of the rest of the army; hence their name. The "new plan" is the plan No. xiii. adopted in 1895.]

"3. A note concerning a modification in the formations of artillery.

[Most likely the "formations de manœuvre," which were just about to be altered by the new regulations.]

"4. A note relative to Madagascar.

[The War Office was preparing an expedition destined to conquer that island.]

"5. The proposed 'manuel de tir' of field-artillery (March 14, 1894).

"This document is exceedingly difficult to get hold of, and I can only have it at my disposal for a very few days. The minister of war has distributed a certain number of copies among the troops, and the corps are held responsible for them.

"Each officer holding a copy is required to return it after the maneuvers.

"Therefore if you will glean from it whatever interests you, and let me have it again as soon as possible, I will manage to obtain possession of it. Unless you would prefer that I have it copied in extenso, and send you the copy.

"I am just starting for the maneuvers."

This communication was clearly written during the month of August, 1894, at the latest. For the "manuel de tir" for field-artillery is the résumé of the methods designed to regulate the actual firing of ordnance on the battle-field; this actual shooting, of

course, never takes place during the grand maneuvers in September, but only during the "écoles à feu," which begin in May and finish in August. It is these "écoles à feu" that the writer incorrectly designates as "maneuvers," and it is probable that the word has the same meaning in the last sentence of the letter.

It seems evident that the bordereau was handed over to Major Henry, who, with Major Cordier, was then assisting Colonel Sandherr, the head of the Intelligence Office. According to General Mercier, the letter in question arrived at the office with other documents whose dates ranged from Aug. 21 to Sept. 2; it is probable that Henry kept it in his possession a considerable time, which makes it the more surprising that he did not recognize the writing—in no way disguised—of one of his former fellow soldiers, Major Esterhazy. It was not until Sept. 24 that he spoke concerning the document to his fellow workers and to his chief, Colonel Sandherr, who immediately apprised the head of the staff, General de Boisdeffre, and the secretary of war, General Mercier. The feeling was intense. The informant of the German military attaché was a French officer; still further, they concluded from the tone of the letter that he was a staff-officer. Nothing justified this last supposition. On the contrary, the wording of the bordereau, technically and grammatically incorrect; the difficulty which the author had in procuring the "manuel de tir" (which was distributed freely among the staff); the small importance which his correspondent appeared to attach to his disclosures, often leaving him for a considerable time "without information"—everything would have shown to unprejudiced minds how unreasonable it was to attribute the bordereau to a staff-officer. Nevertheless, this fixed idea, this "first falsehood," suggested perhaps by the previous warnings of Val Carlos, was

accepted without discussion; so that from the very commencement the investigations were started on a false scent. At first no result was obtained from an examination of handwritings in the bureaux of the department. But on Oct. 6 Lieutenant-Colonel d'Aboville suggested to

The Search for the Handwriting. his chief, Colonel Fabre, the idea that the bordereau, dealing as it did with questions which were under the jurisdiction of different departments, must

be the work of one of the officers going through their "stage" (*i.e.*, staff-schooling), they being the only men who passed successively through the various branches to complete their military education; moreover, as, out of the five documents mentioned, three had reference to artillery, it was probable that the officer belonged to this branch of the army. The circle thus limited, it only remained to consult the list of the "stage" officers on the staff who had come from the artillery. While looking through it, the two colonels came to a halt before the name of a Jewish officer, Captain Dreyfus. Colonel Fabre, in whose office he had been during the second quarter of 1893, remembered having given him a bad record on the report of Lieutenant-Colonel Roget and Major Bertin-Mouroi; Dreyfus had given these gentlemen the impression (upon the most superficial grounds) of being presuming and overbearing, of neglecting the routine of service to go into matters which were kept secret. Fabre and D'Aboville immediately began to search for papers bearing the writing of Dreyfus; by a strange fatality it showed a likeness to the writing of the bordereau; these officers, inexperienced and prejudiced, mistook a vague resemblance for real identity.

III. Alfred Dreyfus, born at Mülhausen in Alsace on Oct. 10, 1859, was the third son of a manufacturer, Raphael Dreyfus (native of

Alfred Dreyfus. Rixheim in the Haut-Rhin), who managed an important spinning-factory at Mülhausen. He had three brothers

(James, Matthew, and Léon) and three sisters. When France lost Alsace by the treaty of Frankfurt, the Dreyfus family, like many others at the same period, divided into two parts. The eldest son, James, remained alone at Mülhausen to manage the factory; the others chose to take up their abode in France, and soon settled in Paris. Alfred entered the Polytechnic School, the training-school of French officers, in 1878. He left there a student-officer of engineers, then passed through the Ecole d'Application at Fontainebleau, and afterward through the garrisons of Le Mans and of Paris, where his reports showed him to be the best lieutenant of his section of field-artillery. Promoted captain (second in command) in 1889, he remained for some months at the School of Pyrotechnics at Bourges; the following year he married Lucy Hadamard, daughter of a wealthy diamond-merchant, and passed with success the difficult examination for the Ecole Supérieure de Guerre, which he entered with the number 67. There he felt his ambition awakened, worked with tremendous ardor, and gained a considerable number of ranks. At the examination on leaving the school (1892) his friends expected to see him rank among the very first, and, consequently, be at-

tached to the general staff. However, one of the members of the jury, General Bonnefond, under the pretext that "Jews were not desired" on the staff, lowered the total of his marks by making a very bad report; he did the same thing for another Jewish candidate, Lieut. E. Picard. Informed of this injustice, the two officers lodged a protest with the director of the school, Gen. Lebelin de Dionne, who expressed his regret for what had occurred, but was powerless to take any steps in the matter. Notwithstanding all drawbacks, Dreyfus graduated ninth, a fact which opened the doors of the general staff to him.

From the end of 1892 to September, 1894, Dreyfus went through his "stage" in the Staff Office, receiving excellent reports on all hands, except from Colonel Fabre. From Oct. 1, 1894, he went through a "stage" in a body of troops, the Thirty-ninth Regiment of the line, in Paris. His personal characteristics, little fitting him

Appearance and Character. to command, and his slightly foreign accent, combined to prejudice people against him; he had also a rather

haughty demeanor, associated little with his military companions, and appeared rather too self-confident. But his comrades and superiors, without being much attached to him, recognized his keen intelligence, his retentive memory, his remarkable capacity for work; he was known as a well-informed officer, a daring and vigorous horseman, with decided opinions, which he knew how to set forth skilfully and to uphold under discussion. In short, he was a brilliant and correct soldier, and seemed marked out for a glorious future. Added to all this, he possessed a comfortable private fortune (which brought him an income of \$5,000 or \$6,000 a year) soundly invested in his brothers' business; he was without any expensive vices, if not without failings, and was leading a settled life. It is difficult to imagine what motive could possibly have incited him to the vile traffic of which he was destined to be suspected.

His patriotic sentiments were those of a soldier and an Alsatian emigrant—that is to say, fervent almost to Jingoism. He had also come under the influence of the Boulangist movement, which, for many of his equals, meant revenge on Germany.

Only the most rabid anti-Semitism could have originated the idea that this Alsatian Jingo was a traitor. Even the wording of the bordereau, if read calmly, should have shown the absurdity of this supposition; for no artilleryman could have committed such gross blunders in expression. And how could Dreyfus in August or September, 1894, possibly have written, "I am just starting for the maneuvers," since that year none of the "stage" officers went to the maneuvers, having been officially advised by a circular on May 17 not to do so?

Without pausing to consider these conclusive objections, Fabre and D'Aboville hastened to communicate their "discovery" to General Gonse, deputy-chief of the staff, and to Colonel Sandherr, an anti-Semite of long standing, who exclaimed, "I ought to have suspected it!" General de Boisdeffre, informed in his turn, told the story to the secretary of war. General Mercier had held this office since December, 1893. Brought face to face with the bordereau, his

main idea was that whatever there was to be done must be done quickly, because, if the affair came to be known before he had taken any

Action steps in the matter, he would be re-
of Mercier. proached for having shielded a traitor.

This fear, and also the unavowed hope of being able to pose, by the capture of the new "Judas," as the savior of his country, decided his plan of action: once started there was no turning back—he was forced to go on to the bitter end. For the sake of appearances, however, he sought the opinion (Oct. 11) of a small council formed of the president of the cabinet (Charles Dupuy), the minister of foreign affairs (Hanotaux), the keeper of the seals (Guérin), and himself. The council only authorized him to proceed to a careful inquiry; he ordered an examination by an expert in hand-writing. The matter was entrusted to Gobert, an

expert of the Bank of France, who had been recommended to him some days
The previously by the keeper of the seals.
Experts in
Hand- With great conscientiousness Gobert
writing. pointed out the striking differences between the writing of the bordereau

and that of the documents which were given to him for comparison, the "personal folio" of Dreyfus, from which his name had been erased but the dates left, so that it was easy to identify him from the army list; there were some letters which struck the experienced eye at once, such as the open *g* (made like a *y*) and the double *s* made in the form */s*, features which were to be found only in the bordereau. Gobert concluded (Oct. 13) "that the anonymous letter might be from a person other than the one suspected." This opinion, too discreetly worded, was pronounced "neutral"; a second inquiry was called for, and this time a functionary was chosen whose qualifications for the task were doubtful—Alphonse Bertillon, head of the "service de l'identité judiciaire" at the Prefecture of Police, whom Gobert had already entrusted with certain photographic enlargements of the bordereau. This improvised graphologist, to whom the guilt of the suspected man was spoken of as certain, as established by other irrefutable signs, sent in his report the same day. His inference was as follows: "If we set aside the idea of a document forged with the greatest care, it is manifestly evident that the same person has written all the papers given for examination, including the incriminating document." Sheltered by this opinion, Mercier no longer hesitated to order the arrest of Dreyfus, of whose guilt he had been persuaded from the first. The arrest was conducted in a melodramatic fashion, according to the plans of Major Du Paty de Clam, who, as an amateur graphologist, had been initiated from the very beginning in all the details of the affair.

Dreyfus was ordered to appear before the minister of war on the morning of Oct. 15, in civil clothes, under pretense of an "inspection of the 'stage' officers." He went without suspicion in answer to this summons. Introduced into the bureau
The Arrest. of the head of the staff, he found himself in the presence of Du Paty and of three persons, also in civil dress, whom he did not know at all; they were Gribelin (the archivist of the

Intelligence Office), the "chef de la sûreté," Cochefert, and the latter's secretary. While awaiting the general, Du Paty, pretending that he had hurt his finger, asked Dreyfus to write from his dictation a letter which he wished to present for signature. The wording of it was most extraordinary; it was addressed to an unknown person, and asked him to send back the documents which had been lent to him by the writer before "starting for the maneuvers"; then followed the enumeration of these documents, taken word for word from the bordereau. Du Paty had flattered himself that the culprit—and he had no doubt that Dreyfus *was* the culprit—on hearing this list, which put, so to speak, his crime before his eyes, would burst out with an overwhelming confession; a loaded revolver lay on a table to allow him to execute justice upon himself.

Things did not turn out quite as Du Paty had expected. Dreyfus, strange as the missive was, wrote tranquilly on under the major's dictation. There was a moment, however, when Du Paty, who was closely watching him, fancied he saw his hand tremble, and remarked sharply upon it to Dreyfus, who replied, "My fingers are cold." The facsimile of the letter which has since been published shows not the least sign of disturbance of any kind in the writing, hardly even a slight deviation of one line. After having dictated a few more lines, during which, he himself owns, "Dreyfus entirely regained his composure," he ceased the experiment, and placing his hand heavily on the captain's shoulder, he cried with a voice of thunder: "In the name of the law I arrest you; you are accused of the crime of high treason!" Dreyfus, in his stupefaction, hardly found articulate words to protest his innocence. He pushed away indignantly the revolver offered to him. He allowed himself to be searched without resistance, saying: "Take my keys, examine everything in my house; I am innocent." Du Paty and his associates then held a summary examination; without showing him a single document, they were content with assuring him that a "long inquiry"

made against him had resulted in "in-
Assevera- contestable proofs" which would be
tions of communicated to him later on. Then
Innocence. he was given into the hands of Major Henry, who had heard all that had taken place from the next room, and whose mission it was to deliver him over to the military prison of Cherche-Midi. In the cab that took them there, Dreyfus renewed his protestations of innocence, and asserted that he had not even been told what were the documents in question, or to whom he was accused of having given them.

At Cherche-Midi Dreyfus was turned over to the governor of the prison, Major Forzinetti, who had received orders to keep his incarceration a profound secret, even from his chief, General Saussier—an unheard-of measure. Apparently, the minister had still some doubts as to the guilt of Dreyfus, and did not wish to publish his arrest until the inquiry should have furnished some decisive proofs.

IV. The conduct of the inquiry was entrusted to Major Du Paty de Clam. Immediately after the arrest he went to the house of Madame Dreyfus, told

her of it, and ordered her, under the most terrible threats, to keep the matter secret, even from her brothers-in-law. He then devoted himself to a minute search of the rooms, **The Search for Proofs.** which furnished no incriminating evidence whatever: no suspicious document, not a shred of "papier pelure" (foreign note-paper) was found—nothing but accounts regularly kept and testifying to a mode of life in accordance with the resources of the household. A similar search made in the house of M. Hadamard (Dreyfus' father-in-law) ended in the same failure.

Du Paty repeatedly visited Dreyfus in prison. He made him write standing up, seated, lying down, in gloves—all without obtaining any characteristics identical with those of the bordereau. He showed him loose fragments of a photograph of that document, mixed up with fragments and photographs of Dreyfus' own handwriting. The accused distinguished them with very little trouble. Du Paty questioned him without obtaining any other result than protestations of innocence broken by cries of despair. The suddenness of the catastrophe, and the uncertainty in which he was left as to its cause, reduced the wretched man to such a terrible state of mind that his reason was threatened. For several days he refused to take any food; his nights passed like a frightful nightmare. The governor of the prison, Forzinetti, warned the minister of the alarming state of his prisoner, and declared to General de Boisdeffre that he firmly believed he was innocent.

Not until Oct. 29 did Du Paty show the entire text of the bordereau to Dreyfus, and then he made him copy it.

The prisoner protested more forcibly than ever that it was *not* his writing, and regaining all the clearness of his intellect when faced by a definite accusation, tried to prove to his interlocutor that out of five documents mentioned in the bordereau, three were absolutely unknown to him.

He asked to see the minister: consent was given only on condition that "he start on the road to a confession!" In the mean time writing-experts had proceeded with further examinations. Bertillon, to whom the name of the prisoner had now been revealed, set to work again. To explain at the same time the resemblances and the differences between the writing of Dreyfus and that of the bordereau, he supposed a most intricate system: Dreyfus, he thought, must have imitated or traced his own handwriting, leaving in it enough of its natural character for his correspondent to recognize it, but introducing into it, for greater safety, alterations borrowed from the hands of his brother Matthew and his sister-in-law Alice, in one of whose letters they had discovered the double *s* made as in the bordereau! This is the hypothesis of "autoforgery,"

which he complicated later on by a supposed mechanism of "key-words," of "gabarits," of measurements by the "kutsch," of turns and twists.

Renewed Examination by Experts. Bertillon's provisional report, submitted on Oct. 20, inferred "without any reservation whatever" that Dreyfus was guilty. Mercier, ill-satisfied with this lucubration, had the

prefect of police appoint three new experts, Charavay, Pelletier, and Teyssonnières; Bertillon was put at their disposal to furnish them with photographic enlargements.

Pelletier simply studied the bordereau and the documents given for comparison, and concluded that the writing of the bordereau was in no way disguised, and that it was *not* that of the prisoner.

The two others, influenced by Bertillon, declared themselves, on the contrary, in favor of the theory of identity. Teyssonnières, an expert of no great repute, spoke of feigned writing. Charavay, a distinguished paleographer, judged the prisoner guilty, unless it was a case of "sosie en écritures"—a most extraordinary resemblance of handwriting. He also spoke of simulation to explain away the palpable differences. On Oct. 31 Du Paty finished his inquiry, and handed in his report, which, while bringing charges against Dreyfus, left it to the minister to decide what further steps should be taken in the matter.

But at this moment General Mercier was no longer free to decide; the press had come upon the scene. On

Oct. 28 Papillaud, a contributor to the "Libre Parole," received a note signed "Henry"—under which pseudonym he recognized without hesitation the major of that name; "Henry" revealed to him the name and address of the arrested officer, adding falsely, "All Israel is astir."

The very next day the "Libre Parole" narrated in carefully veiled words the secret arrest of an individual suspected of espionage. Other newspapers were more precise; on Nov. 1 Drumont's special edition announced in huge type the arrest of "the Jewish officer A. Dreyfus"; there was, it declared, "absolute proof that he had sold our secrets to Germany"; and what was more, he had "made full confession." All this was very awkward for General Mercier; he was in a corner. If ever he had had the idea of dropping the case, it was too late now; he would have hazarded his position as a minister by doing so. He summoned a council of the ministers, and, without revealing any other charge than that concerning the bordereau, declared that the documents mentioned in the memorandum *could* only have been procured by Dreyfus. The ministers, most of whom now heard the story for the first time, unanimously decided to institute proceedings. The papers were at once made over to the governor of Paris, who gave the order to investigate (Nov. 3).

No sooner had the name of Dreyfus been pronounced than the military attachés of Germany and Italy—to whom it was new—began to wonder if by chance he had been in direct correspondence with the War Office of either country. They made inquiries at Berlin and at Rome, and received answers in the negative. In his impatience, Panizzardi had telegraphed in cipher on Nov. 2: "If Captain Dreyfus has had no intercourse with you, it would be to the purpose to let the ambassador publish an official denial, in order to forestall comments by the press." This telegram, written in cipher, and of course copied at the post-office, was sent to the Foreign Office to be deciphered. The first attempt left the last words uncertain; they were thus translated: "our secret

agent is warned." This version, communicated to Colonel Sandherr, seemed to him a new proof against Dreyfus. But a few days later the real interpretation was discovered, of which Sandherr himself established the accuracy by a decisive verification. From that time it became morally impossible to bring home to Captain Dreyfus any document which would infer that the traitor was in communication with Panizzardi.

The judicial inquiry had been entrusted to Major Bexon d'Ormescheville, judge-advocate of the first court martial of the department of the Seine. He failed to discover a single new fact. The comrades of Dreyfus, feeling that things were going against him, remembered, or thought they remembered, that in his past conduct he had shown certain signs of immoderate curiosity, of "strange action." One officer was sure that he had lent him the "manuel de tir" for several days, but that was

Judicial Inquiry. in July, whereas the *bordercau* was now believed to have been written in April! An agent named Guénée, charged by Major Henry with the task of inquiring into the question of his morals, picked up in different bars and cafés a collection of tales which represented Dreyfus as a gambler and a libertine, whose family had been obliged several times to pay his debts. But another inquiry by the Prefecture of Police showed the inanity of these allegations: Dreyfus was unknown in gambling-houses, and Guénée's informants had confused him with one of his numerous Parisian namesakes! The alleged treason was without support; without any visible motive; without precedent of any kind; without psychological or moral probability; the accusation rested solely on a scrap of paper which two experts out of five had refused to recognize as having been written by Dreyfus.

But public opinion had already condemned him. The press, misinformed, magnified the crime; notwithstanding the semi-official notes that reduced it to an unimportant communication of inoffensive documents, it was understood that Dreyfus had delivered up the secret of mobilization,

Public Opinion. and thereby exposed the system of national defense. All the treachery that had remained untraced, all the arrests of French agents abroad, were laid at his door. People were indignant that the penalty of death for political crimes (and treason was considered as such) had been abolished by the constitution of 1848; even death seemed too light a punishment for such a wretch. The only excuse that they found for him was but a further insult: it was his race which had predisposed him to commit an act of treason, the "fatalité du type."

The yellow press, which let loose its fury against Dreyfus, in the beginning did not spare the minister of war. It was looked upon as a crime that during a fortnight the arrest had been kept a secret, doubtless in the hope of being able to hush up the affair; he had been in league with "the Jews," he was still negotiating with them! Mercier was not the man to brave these attacks. In the same manner as the arraignment had been imposed upon him by "La Libre Parole," he understood now that the condemnation of Dreyfus was for him simply a question of polit-

ical life or death; convinced or not, he determined to establish the man's guilt at any cost. On Nov. 28, in defiance of the most elementary usages, he declared in an interview with the "Figaro" that Dreyfus' guilt was "absolutely certain." Then, aware of the defects of D'Ormescheville's "proofs," he ordered that a secret dossier should be prepared by collecting from the drawers of the Intelligence Department whatever documents concerning spies could more or less be ascribed to Dreyfus. This dossier, revised and put into a sealed envelope by Mercier himself, with the cooperation of Boisdeffre and of Sandherr, was to be communicated only to the judges in the room where they held their deliberations, without either the accused or his counsel having been able to take cognizance of it or to inquire into the allegations—a procedure worthy of the Inquisition.

As soon as it had become known that Mercier had decided to go to the bitter end, there was a change in the language of the demagogues regarding him. "He has certainly done something for his country," they said. "One must be for Mercier or for Dreyfus," proclaimed General Riu. And Cassagnac, who, as a personal friend of Dreyfus' lawyer, maintained some doubts as to his guilt, summed up the situation in these words: "If Dreyfus is acquitted, no punishment would be too severe for Mercier!"

Thus stated, the question went beyond the intelligence and the courage of the military judges; there could be no doubt about the issue. The report of Major d'Ormescheville, handed in on Dec. 3, was prejudiced and illogical; out of a heap of "possibilities" and numberless insinuations, he vainly tried to deduce a proof of some sort. Edgar Demange, whom the Dreyfus family had chosen as their lawyer, accepted this task only on the condition that the perusal of the papers should convince him of the emptiness of the accusation; he was convinced. His absorbing idea was to obtain a public hearing; he promised on his honor not to raise, in that case, any delicate questions which might lead to a diplomatic contest. The brothers of Dreyfus and certain statesmen made urgent application in the same direction. All was in vain. The private hearing having been decided on in the

The Trial. minister's own mind, as being required by "state policy," he announced this conviction to the president of the court martial; such an announcement was equivalent to an order.

The case began on Dec. 19 at Cherche-Midi, and lasted four days. Seven judges, not one of them an artilleryman, composed the court; the president was Colonel Maurel. From the start the commissary of the government, Major Brisset, demanded a secret trial. The protests of Demange, who endeavored at least to make it known that the accusation was based on a single document, were overruled by the president, and a secret trial was unanimously agreed to. In the court-room there remained, besides the judges, only the accused and his attorney, the prefect of police Lépine, and Major Picquart, entrusted with the duty of giving an account of the proceedings to the head of the staff and to the minister. The case dragged along with hardly any incident worthy of remark. The "colorless" voice of Dreyfus, his unsympathetic appearance, his military

correctness bordering on stiffness, weakened the effect of his persistent denials. On the other hand, the "moral proofs" would not bear discussion. Du Paty got entangled in his description of the scene of the dictation; Bertillon brought forward a revised and much enlarged edition of his report, the *supposed* defense of Dreyfus being represented in the form of a strange fortress, of which each bastion was an argument on handwriting! The only testimony which produced any impression was that of Major Henry. After his first statement he asked to be recalled. Then, in a loud voice, he declared that long before the arrival of the bordereau an honorable person (meaning Val Carlos) had warned the Intelligence Department that an officer of the ministry, an officer of the second bureau, was betraying his country. "And that traitor, there he is!" With his finger he pointed out Dreyfus. And when the president asked him if the "honorable person" had named Dreyfus, Henry, not drawing back even from a false oath, stretched out his hand toward the crucifix and declared, "I swear it!"

The last hearing (Dec. 22) was devoted to the public prosecutor's address and to the pleading of Demange, who strove for three hours to prove that the very contents of the bordereau showed that it could not be the work of Dreyfus. In his reply, Brisset, abandoning the moral proofs, was satisfied with asking the judges to take their "magnifying-glasses." A calm listener, Major Picquart, imagined then that the result was very doubtful unless help came from the secret dossier. This dossier was given up, still sealed, by Major Du Paty (who was ignorant of the exact contents) to Colonel Maurel, and the latter immediately entered the room where the judges were deliberating on the case, and communicated it to his colleagues. The recollections of the military judges being rather vague on the subject, it has not been possible to reconstitute with certainty the substance of the portfolio. It is known, however, that it included at least the document "canaille de D . . ." (a commonplace initial which it was absurd, after Panizzardi's telegram, to attribute to Dreyfus), and a sort of military biography of Dreyfus, based on, but not identical with, a memorandum from Du Paty, who had been told to make the various documents of the secret dossier coincide with one another. This biography represented Dreyfus as a traitor by birth, having commenced his abominable calling on his first entry into the service; at the school at Bourges it would appear that he had delivered up to the Germans the secret of the melinite shell!

Among the other papers of the secret dossier may be mentioned the fragments of Schwarzkoppen's note alluding to an informant who pretended to take his knowledge from the ministry, and, according to Commander Freystaetter, the *first and false interpretation* of Panizzardi's despatch! After judgment had been pronounced the dossier was given back to Mercier, who had it pulled to pieces, and later on destroyed the biographical notice. But, contrary to instructions, Major Henry reconstituted the secret dossier, added to it Du Paty's explanatory note (which last was destroyed by Mercier in 1897), and locked it in the iron chest where Picquart

afterward found it. Allusion has been made several times (since 1894) to a second dossier, "ultra-secret," which was composed of photographs of papers stolen from, and then given up to, the German embassy; namely, seven letters from Dreyfus, and one said to be from the Emperor of Germany to Count Münster, naming Dreyfus. If such a dossier was ever in existence, it certainly contained nothing but a mass of ridiculous forgeries.

The conviction of the judges, already more than half decided by the experts and by Henry, could not withstand this new assault. Dreyfus was unanimously pronounced guilty; the sentence was transportation for life to a fortress, preceded by military degradation. Upon hearing this decision, which was communicated to him by the clerk of the court, the unhappy man, who firmly believed that he would be acquitted, stood as if struck by a thunderbolt. Taken back to prison, he was seized with a fit of despair, and begged for a revolver. Forzinetti, who had not lost faith in his innocence, succeeded with great difficulty in calming him. More than that, the heroic and touching letters from his wife made him accept life as a duty he owed to his own family.

V. The appeal of Dreyfus to the military court of revision—a simple formality—was rejected on Dec. 31. The same day the condemned man received a visit from Du Paty de Clam, who had been sent by the minister of war with the mission to declare to Dreyfus that if he would only begin to make a confession, and reveal exactly the nature of his indiscretions, he might obtain a mitigation of his sentence. Dreyfus answered that he had nothing to confess, nothing to reproach himself with, not even the smallest attempt at holding out a bait; he only asked that the investigations might be continued so as to discover the real criminal. Du Paty, somewhat moved, said to him on going out: "If you are innocent, you are the greatest martyr of all time." Dreyfus wrote an account of this interview to the minister; he finished with these words: "Once I am gone, let them go on searching; it is the only favor I ask."

The military degradation took place on the Champ de Mars on Jan. 5. Dreyfus drank the cup of bitterness to its very dregs. During the

The Degradation. parade of "execution" he preserved an attitude wholly military which shocked some of the onlookers. But when General Darras had pronounced

the accustomed formula, he cried out in a loud voice: "You are degrading an innocent man! Long live France! Long live the army!" He repeated this cry while the adjutant on duty was tearing off his stripes and breaking his sword, and again while passing before the crowd, which was shrieking that he should be put to death, and before the journalists, who yelled at the new Judas.

If the unanimous verdict of seven judges dissipated the doubts that might have existed among a portion of the public, the reiterated protestations of the condemned man were of a nature to make them spring to life again. The report was then spread about that he had made a confession. While waiting for the parade, locked up with Lebrun Renault, the captain of gendarmerie on service, he was supposed

to have said: "The minister knows that I am innocent; and that, *if I have given up any documents to Germany*, it was only to get more important ones in return; before three years are over the truth will be known." This tale had its origin in the obscure or unintelligent account which Lebrun Renault had rendered of his conversation with Dreyfus; in reality, the latter had merely related his interview with Du Paty and once more protested his innocence. Lebrun Renault himself, in an interview which he granted to some one at a bail at the Moulin Rouge, related, in the words of Dreyfus, the origin of the bordereau, but of confession not a word. However that may be, this idle talk, changing as it passed from lip to lip, greedily welcomed by the newspapers, made the staff uneasy, because it brought into the case the German embassy, which just at this time was showing signs of indignation. In short, General Gonse called on Lebrun Renault and took him successively to General Mercier and to the president of the republic, Casimir-Perier, who severely reprimanded him, and imposed upon him absolute silence for the future.

In the mean time serious complications with Germany were expected. The German government, once assured by Schwarzkoppen and by the War Office at Berlin that Dreyfus was utterly unknown to them, had thought it a matter of honor to protest publicly against the statements in the newspapers which persisted in bringing Germany into the case.

Several times after the arrest of Dreyfus semi-official notes of protest had been inserted in the different organs of the press; Count Münster, the German ambassador, denied to Hanotaux that Germany had taken any part in the affair. These

declarations, politely received, left the French government absolutely skeptical, for it knew from a positive source the origin of the bordereau.

A note from the Havas Agency (Nov. 30) put the foreign embassies out of the case; but the press continued to incriminate Germany, whereupon, at the beginning of December, Münster, by the express order of the German emperor, invited Hanotaux to call at the embassy and repeated his protestations. The report was spread abroad that Germany had demanded and obtained the restoration of the documents which established the traitor's guilt! Provoked by the persistence of these attacks, the German embassy inserted in the "Figaro" of Dec. 26 a fresh notice denying formally that it had had with Dreyfus "the least intercourse, either direct or indirect." And as this notice also seemed to have little or no effect, the emperor telegraphed to Münster on Jan. 5 to go personally to Casimir-Perier and say, "If it be proved that the German embassy has never been implicated in the Dreyfus case, I hope the government will not hesitate to declare the fact." Otherwise, it was given to be understood that the ambassador would leave Paris. This despatch, communicated by Münster to Dupuy, who was then temporarily engaged at the Foreign Office, had the appearance of an ultimatum. The president of the republic up to this time had known very little of the details of the case, and had been kept by Hanotaux in complete ignorance of Münster's

Count Münster, Dreyfus.
(From the statuette by Caccia.)

previous communications; but now he had the contents of the legal documents shown to him. After having read them, he granted to Münster the audience which had been requested. Then, considering honesty to be the best policy, he asserted very frankly that the criminal letter had been taken

from the German embassy, but that it was not an important document and that nothing proved that it had been "solicited."

After having referred the matter to Berlin, Münster consented to the drawing up of a note by the Havas Agency which once more put all the embassies out of the case, and terminated the incident (Jan. 9, 1895). Mercier did not long enjoy his triumph. On Jan. 15, under pretext of a ministerial crisis, in which his friends abandoned him, Casimir-

Resigna- Perier handed in his resignation as
tion president of the republic; the mys-
of Casimir- teries and the unpleasantnesses of the
Perier. Dreyfus affair had not a little to do
with hastening this determination. At

the congress called together to elect a new president, printed ballots were passed about in favor of General Mercier; one handbill even set him down as the savior of the republic for having had the traitor Dreyfus condemned in spite of all difficulties. He obtained three votes! Ribot, entrusted by the new president (Félix Faure) with forming a cabinet, did not appeal to an assistant so compromising as Mercier; the office of minister of war was given to General Zurlinden.

Two days later, during the night of Jan. 17, in bitterly cold weather, Dreyfus, dragged from the prison of La Santé, was transferred by rail to La Rochelle, thence to the island of Ré, into a military reformatory. The populace, recognizing him, followed him thirsting for his blood; an officer struck him; stoical, he forgave his tormentors, whose indignation against such a traitor as he was supposed to be he understood and shared.

At Ré, as at La Santé, he was authorized to receive a few visits from his wife, but the authorities managed, by the most minute precautions, to make them as short and as painful as possible.

A law passed ad hoc had just instituted as the place of transportation for political crimes the Iles du Salut off French Guiana, instead of the peninsula of Ducos (New Caledonia), where, it was said, supervision was difficult; it has been suggested that in reality vengeance was being taken upon Dreyfus for his obstinate refusal to confess his crime. The notice drawn up by the War Office for the use of his guardians denounced him as "a hardened malefactor, quite unworthy of pity." This word to the wise was to be only too well understood and carried out. On the evening of Feb. 21 the unhappy man, taken hurriedly from his cell, was embarked on the "Ville de St. Nazaire," which was to carry him across the Atlantic to a place of exile.

VI. The Iles du Salut, where Dreyfus was landed on March 15, compose a small archipelago situated twenty-seven miles off Cayenne, opposite the mouth of the River Kuru. Notwithstanding its name

Devil's ("salus," health) it is a most unhealthy
Island. region. Incessant heat, continuous rain for five months of the year, the effluvia arising from the marshy land are sufficient to undermine the strongest constitution. The smallest island of the group, Devil's Island, which had until Dreyfus' arrival been occupied by a leper hospital, was destined to be his abode. On the summit of a desolate rock, far from the few

palm-trees on the shore, a small hut of four cubic yards was built for him; night and day an inspector stood guard at the door, with strict orders not to address a word to him. In the daytime the prisoner was permitted to exercise until sunset in a small rectangular space of about two hundred yards, near his hut.

Madame Dreyfus had asked permission to follow her husband to his place of exile; the wording of the law seemed to point to it as her right; nevertheless, the ministry refused her even this favor, alleging that the rules to which the condemned man was subject were incompatible with it. Dreyfus had therefore no company except that of his jailers. The governor of the islands, although distrustful, showed at least some humanity; but the head warder Lebars, who had received instructions from the minister to enforce harsh measures, went even beyond his orders. Badly fed, especially at the beginning of his term of exile, obliged to do all sorts of dirty work, living by day among vermin and filth, and by night in a state of perpetual hallucination, Dreyfus, as was to be expected, soon fell a prey to fever. The doctor interfered and obtained an amelioration of the rules. Dreyfus himself, clearly convinced that it was his duty to live, fought energetically against the lethargy which forced itself upon him. To keep up his physical strength he compelled himself to take regular exercise; to prevent his intellect from getting dulled he had books sent to him which he read and reread, wrote out résumés, learned English, took up his mathematical studies again; to employ the long hours of leisure that still remained he kept a diary. He could correspond with only his own family, and even to them might refer only to domestic matters. His letters, examined by the administration, were one long cry for justice. Sometimes he begged his wife to go, leading her children by the hand, to entreat for justice from the president of the republic. He wrote himself to the president, to Du Paty, to General Boisdeffre, without receiving any replies. Little by little the horrible climate did its work. Fever consumed him; from never employing it he almost lost the power of speech; even his brain wasted away. On May 5, 1896, he wrote in his diary: "I have no longer anything to say; everything is alike in its horrible cruelty." His gentleness, his resignation, his exact observance of all rules had not been without making an impression on his jailers; several of them believed him innocent; no punishment for rebellion against discipline was inflicted on him. Early in Sept., 1896, the false report of his escape was set afloat by an English paper. This rumor was really circulated by Matthew Dreyfus in the hope of shaking up the sluggishness of public opinion and to prepare the way for the pamphlet of Bernard Lazare demanding a fresh hearing of the case of 1894. Although contradicted at once, the rumor roused public opinion. Rochefort and Drumont proclaimed the existence of a syndicate to

free him, published some false information about the rules that the condemned man had to obey, affirmed that with a little money it was the easiest thing imaginable to accomplish his rescue. The colonial secretary, André Lebon, took fright. It

did not matter that these tales were absolutely without foundation, that the prisoner was of irreproachable conduct; to make assurance doubly sure, he cabled instructions to the governor of Guiana to surround the outer boundary of Dreyfus' exercising-ground with a solid fence, and in addition to the sentinel at the door to post one outside. Until this work was finished, the prisoner was to be secured day and night in his hut, and at night, until further orders, he was to be subjected to the penalty of the "double buckle": gyves in which the prisoner's feet were shackled, and which were then firmly fixed to his bedstead, so that he was condemned either to absolute immobility or to dreadful torture. This order, barbarous and, moreover, illegal, was strictly carried out, to the equal astonishment of Dreyfus and of his warders. For twenty-four sultry nights the wretched man was upon the rack; for two months he was not allowed to stir out of his disgusting and suffocating hovel. When the cabin was opened once again it was encircled by a wall which hid even the sky; behind this wall his exercising-ground, hemmed in by a wooden fence over six feet high, was no more than a sort of narrow passage from which he could no longer see the sea.

The poor victim was now utterly depressed. On Sept. 10, 1896, he stopped keeping his diary, writing that he could not foresee on what day his brain would burst! His family was no longer allowed to send him books. The letters of his wife were forwarded to him no longer in the original hand, but in copies only. On June 6, 1897, a sail having been sighted during the night, alarm-guns were fired, and Dreyfus, startled in his sleep, saw his keepers with loaded rifles ready to shoot him down if he made one suspicious movement. In August the authorities ascertained that the heat and moisture in his stifling hut were really unbearable, and had the man transferred to a new cabin, larger than the first, but quite as dismal. A signal-tower was erected close by mounted with a Hotchkiss gun. Happily for Dreyfus his moral fortitude, after a temporary eclipse, had recovered its strength; and from Jan., 1898, the letters of his wife, although containing no particulars, roused his hopes by a tone of confidence which could not be mistaken. Eventful incidents had taken place during those three awful years.

VII. The family of Dreyfus, faithful to the charge he had left them when he went away, had not ceased their efforts to discover the real culprit. Matthew Dreyfus undertook the direction of these researches; he worked with an untiring devotion, an affecting zeal, and a fruitful imagination that was not always seconded by sound judgment. The primary elements of a thorough inquiry were lacking; the Staff Office, far from seconding his efforts, had him jealously watched; intriguers set

Matthew Dreyfus. traps for him; he felt that he was spied upon; at his first false step the new law of espionage—a very strict and extremely elastic one—would find an excuse for getting him out of the way. As for the politicians whom he tried to interest in his cause, the greater part refused to enter into the question, or, intimidated by the minister of war, gave up the search after the very first investigation. The only threads

he had to guide him were some of his brother's notes and a copy of the indictment that had been deposited abroad. He knew, further, from Dr. Gibert of Havre, to whom Félix Faure had confided the matter, that Dreyfus had been condemned on the evidence of a secret document, which had not been shown to the counsel for the defense. This information was corroborated by some remarks made by certain of the judges of 1894. One of them spoke of the case to an old lawyer named Salles, who repeated the conversation (on Oct. 29, 1896) to Demange. Before that Hanotaux had confided to Trarieux, and Trarieux to Demange, that the conclusive document contained the initial of Dreyfus' name (meaning the paper "canaille de D . . ."). Matthew Dreyfus started with the idea, plausible but false, that this document really had reference to the author of the bordereau, and that the initial was not fictitious; and from that idea arose his persistent search for an officer the initial letter of whose name was "D." He followed up several clues, none of which bore any result. The light was to come from an altogether different quarter.

Not long after the condemnation of Dreyfus the Intelligence Office had changed its chief. Sandherr, incapacitated by general paralysis, had resigned his post simultaneously with his assistant, Cordier (July 1, 1895); Major Henry, who aspired to the position although he did not speak a single foreign language, was not appointed Sandherr's successor; but in his stead Major Picquart, who had been ordered to report the debates in the Dreyfus case in order to send an account of the proceedings to the minister and to the chief of the staff, received the appointment. He was a young and brilliant officer, of Alsatian origin, hard-working, well-informed, with a clear intellect, a ready speech, and who, moreover, appeared to share all the prejudices of his surroundings; he was promoted to the rank of lieutenant-colonel on April 6, 1896, and was the youngest officer of that grade in the army. Immediately upon his arrival at the office he reorganized the service, which the prolonged illness of Sandherr had caused

Colonel Picquart. to be neglected. He required in particular that the paper bags in which

Madame Bastian continued to collect the waste papers from the German embassy, and which she brought to Major Henry, should pass through his hands before being confided to Captain Lauth, whose work it was to piece and paste them together. These bags, however, never brought anything of importance to light, though they showed that the leakage of secret information had not ceased since the condemnation of Dreyfus.

The chief of the staff, Boisdeffre, on transferring the service into Picquart's hands, had declared to him that in his opinion the Dreyfus affair was not definitely settled. They must be on the lookout for a counter-attack from the Jews. In 1894 they had not been able to discover a motive for the treason; there was therefore every reason for continuing the researches to "strengthen the dossier."

In the month of March, 1896, Henry, much occupied by the state of his mother's health and by different matters he had to attend to in the country, made only short and infrequent visits to Paris.

One day he sent Madame Bastian's paper bag—particularly bulky on this occasion—to Picquart without even having had time to glance at it. Picquart, likewise without inspecting it, passed it on to Lauth. Some hours afterward the latter came back much affected, bringing to his chief a pneumatic-tube telegram (commonly known as a "petit bleu"), the fragments of which he had found in the bag; pasted together, they contained the following words:

To Major Esterhazy, 27 Rue de la Bienfaisance,

Paris.

Sir: I am awaiting first of all a more detailed explanation [than] that which you gave me the other day on the subject in question. Consequently I beg you to send it to me in writing that I may judge whether I can continue my relations with the firm R. or not. C.

The writing of this note was disguised, but the place it came from left no room for doubting that it emanated from Colonel Schwarzkoppen; the office possessed another document, known to have been written by him, and signed with the same initial "C." The "petit bleu" had not been sent by mail; apparently, after having written or dictated it, Schwarzkoppen reconsidered his determination and had thrown the note into the waste-paper basket, taking care to tear it up into very small pieces—there were more than fifty of them; he had foreseen neither the tricks of Madame Bastian nor the patient industry of the Intelligence Department.

"It is fearful," said Captain Lauth on delivering it. "Can there possibly be another one?"—meaning another traitor among the officers. Picquart could share only the same impression; but determined upon avoiding the indiscretions and the blunders which had been committed in 1894, he resolved to undertake personally a secret inquiry before spreading abroad the news of his discovery. He put the "petit bleu" away in his strong-box, and shortly afterward had photographs of it taken by Lauth, in which he strove to remove the traces of the rents.

The object of this precaution, which was afterward laid to Picquart's charge as a crime, was both to render the reading of the photograph more easy and to prevent the officers (necessarily numerous) who would handle these photographs later on, from guessing immediately the origin of the document.

VIII. Picquart began by getting information about the personality of Major Esterhazy, to whom the "petit bleu" was addressed. To

Major Esterhazy. Curé, one of Esterhazy's fellow soldiers. The details he gathered through this source were not creditable to Esterhazy.

Ferdinand Walsin Esterhazy, born in Paris on Dec. 16, 1847, belonged to an illustrious Hungarian family, a branch of which had established itself in France at the end of the seventeenth century, and the head of which had organized there a regiment of hussars. His great-grandmother had an illegitimate son, who was brought up under the name of Walsin, but who, after she had acknowledged him during the Revolution, took the name of Esterhazy and settled as a merchant at Nîmes. Two of the sons of this man followed a military career with distinction, and both became generals of division during the

Crimean war. One of these two (Ferdinand) was the father of Major Esterhazy. Left an orphan at an early age, after some schooling at the Lycée Bonaparte in Paris, Ferdinand Esterhazy disappeared in 1865. In 1869 he was found engaged in the Roman legion, in the service of the pope; in 1870, in the foreign legion, which his uncle's influence enabled him to enter with the rank of ensign; he then assumed the title of count, to which it is claimed he was not entitled. At this time came the war with Germany. There being a dearth of officers after the catastrophe of Sedan, Esterhazy was able to pass muster as a French lieutenant, then as a captain, and went through the campaigns of the Loire and of the Jura. Though set back after peace was declared, he still remained in the army. In 1876 he was employed to translate German at the Intelligence Office; then, under various pretexts, at the War Office. He never appeared in his regiment at Beauvais, and for about five years led a life of dissipation in Paris, as a result of which his small fortune was soon squandered. In 1881 he was attached to the expedition sent to Tunis, and did nothing whatever to distinguish himself in it; employed later in the Intelligence Department, then in the native affairs of the regency, on his own authority he inserted in the official records a citation of his "exploits in war," the falseness of which was recognized later. Returning to France in 1885, he remained in garrison at Marseilles for a long time. Having come to the end of his resources, he married in 1886; but he soon spent his wife's dowry, and in 1888 she was forced to demand a separation. In 1892, through the influence of General Saussier, Esterhazy succeeded in getting a nomination as garrison-major in the Seventy-fourth Regiment of the line at Rouen. Being thus in the neighborhood of Paris, he plunged afresh into a life of speculation and excess, which soon completed his ruin.

His inheritance squandered, Esterhazy had tried to retrieve his fortune in gambling-houses and on the stock-exchange; hard pressed by his creditors, he had recourse to the most desperate measures. Having seconded Crémieu-Foa in his duel with Drumont in 1892, he pretended that this chivalrous rôle had made his family, as well as his chiefs, quarrel with him; he produced false letters to support his words, threatened to kill both himself and his children, and

thus obtained, through the medium of **His Career.** Zadoc Kahn, chief rabbi of France, assistance from the Rothschilds (June, 1894); this did not prevent him from being on the best of terms with the editors of "La Libre Parole," even to the extent of supplying them with information.

For an officer who had come from the ranks Esterhazy's military advancement had been unusually rapid: lieutenant in 1874, captain in 1880, decorated in 1882, major in 1892, his reports were generally excellent. Nevertheless, he considered himself wronged. In his letters he continually launched into recrimination and abuse against his chiefs; he went still further, bespattering with mud the whole French army, and even France herself, for which he predicted and hoped that new disasters were in store. Such a man, a regular landsknecht

of yore, without a single spark of patriotism, was destined to become the prey of treason. Fate decreed that he should sink to the degradation of a paid spy; he sank. In Tunis he was judged to have become too intimate with the German military attaché; in 1892 he was the object of an accusation made to the head of the staff, General Brault; in 1893 he entered Schwarzkoppen's service.

According to later disclosures he received from the German attaché a monthly pension of 2,000 marks (\$480). He furnished him in the first place with some interesting information about the artillery; he pretended that he got his information from Major Henry, who had been his comrade in the Intelligence Office in 1876. But Henry, limited to a very special branch of the service, was hardly in a position to furnish details on technical questions; Esterhazy must have had other informants, who were not necessarily his accomplices—for example, his intimate friend Maurice Weil, district orderly officer to General Saussier, and a distinguished military writer and a regular news-hunter. The information furnished by Esterhazy soon became of so little importance that Panizzardi (to whom Schwarzkoppen communicated it without divulging the name of his informant) began to doubt his qualifications as an officer; to convince the attaché it was necessary for Esterhazy to show himself one day in uniform, galloping behind a well-known general! The garrison-major, being entrusted with the duties of mobilization, is always well informed in regard to the details of this subject; but as far as the artillery is concerned (the improvements in which department especially interested the German officials), the difficulties which Esterhazy experienced in getting information were very apparent in the text of the bordereau, and in the attempt which he made (in Aug., 1894) to borrow the "manuel de tir" from Lieutenant Bernheim (of Le Mans), whose acquaintance he had made by chance.

Picquart did not at once fathom all the details of Esterhazy's relations with the German attaché, of which the "petit bleu" had given him but a glimpse. Picquart did know, however, all the corruptions and scandals of Esterhazy's private life, the suspicions of malversation (in Tunis) and of espionage which had tainted his character; he learned further—a characteristic detail—that Major Esterhazy, a neglectful officer, constantly absent from his garrison, showed himself, nevertheless, extremely fond of getting information on confidential military questions, particularly those concerning mobilization and artillery. He diligently frequented artillery tests, and when he could not succeed in being ordered to attend the "écoles à feu," went there at his own expense. This is what he had done notably in 1894, the year of the bordereau. He also borrowed books and documents, and had them copied by his secretaries.

IX. At first Picquart did not establish any connection in his own mind between the "petit bleu" and the bordereau; he simply thought he was on the track of a fresh traitor, and hoped to catch him in the act. Different circumstances prevented him from pursuing his investigations. Besides, Esterhazy had been warned, and not only was it im-

possible to surprise him in any compromising visit, but he showed himself openly at the German embassy, to which he went to ask for a passport for his colonel. He even carried his audacity to the point of insisting that he be allowed to return to the War Office, in preference to the Intelligence Department, and was able to urge his request through the highest parliamentary and military influence. However, a fresh incident occurred to strengthen Picquart's suspicions. The French military attaché at Berlin, Foucault, informed him of a curious conversation he had had with one Richard Cuers, a spy who wavered between France and Germany. Cuers told Foucault that Germany had never employed Dreyfus—that the only French officer who was in Germany's pay was a major of infantry who had furnished some sheets from lectures held at the "école de tir" at Châlons.

Picquart acquainted General de Boisdeffre with his discovery, and upon the order of the general and of the minister of war, General Billot, he was directed to continue his inquiry as quietly as possible; still, Boisdeffre seemed from that time little disposed to recommend judicial proceedings. If Esterhazy were really a traitor, he would be dismissed from the army quietly; another Dreyfus affair was to be avoided. Picquart now set to work in earnest to get samples of Esterhazy's handwriting, and he succeeded in obtaining two letters which the major had written to the chiefs of Billot's cabinet. On looking at them Picquart was startled; the writing was identical with that of the bordereau attributed to Dreyfus. He wished to make sure of his impression, so he showed some photographs of these letters (from which he had removed the proper names) to Du Paty and Bertillon. Du Paty declared: "They are from Matthew Dreyfus"; Bertillon said: "It is the writing of the bordereau." And when Picquart assured him that these letters were of recent date, he declared: "The Jews have, for the past year, been training some one to imitate the writing; he has succeeded in making a perfect reproduction." The connection between the letters and the bordereau flashed across the mind of the colonel in all its terrible certainty. If Esterhazy, as the handwriting seemed to indicate, were the author of the latter, Dreyfus must be the victim of a judicial error. For a moment he clung to the idea that he must have further proofs of Esterhazy's guilt; where could they be if not in the secret dossier, communicated to the judges in 1894, and in which he had also placed blind confidence, without the least knowledge of its contents? This dossier, notwithstanding Mercier's orders, had not been destroyed; it was still in Henry's safe.

During the latter's absence Picquart had the dossier brought to him by **The Secret Dossier.** Gribelin, the keeper of the records; he turned it over in feverish haste, but this masterpiece of the "bureau" contained absolutely nothing that applied, or could be made to apply, to Dreyfus. Of the only two papers that were of any importance, one, the document "cannille de D . . .," did not in any way concern any officer, but only a poor scribbler who had assumed the name of Dubois, while the other, the memoran-

dum of Schwarzkoppen, almost certainly pointed to Esterhazy. As to Du Paty's commentary, this was a mass of wild suppositions. Later this commentary was claimed by General Mercier as his **private property** and quietly destroyed by him.

Much concerned, but still confident of the honesty of his chiefs, Picquart immediately drew up a report and brought it to Boisdeffre, who ordered Picquart to go and relate his story to the deputy-chief of the staff, General Gonse. The general received the colonel, listened without flinching to his revelations, and concluded that they must "separate the two affairs," that of Dreyfus and that of Esterhazy. These instructions, confirmed by Boisdeffre, seemed absurd to Picquart, since the *bordercau* established an indissoluble bond between the two cases; he should have understood from that moment that his superiors had determined not to permit at any cost the reopening of the Dreyfus affair.

Boisdeffre had for spiritual adviser Father Du Lac, an influential Jesuit, who appears to have played an important though secret part in all this story. Perhaps the officers would not admit even among themselves that under their pompous formulas was hidden, above everything, the fear of seeing their positions in the military world melt

Father Du Lac. away if they publicly confessed the part they had taken in the error and illegal act of 1894; for the innocence

of Dreyfus once established, the communication of the secret dossier would appear to everybody what it was in reality—an odious crime. As to General Billot, to whom Picquart, following Boisdeffre's orders, made a complete report of the case, he appeared deeply moved. He had not the same reasons as his companions to defend the judgment of 1894 at any cost, for he had had nothing to do with it, and learned for the first time the story of the secret dossier. But this soldier-politician lived in terror of his surroundings; he did not dare to see the affair clearly, and took for his motto the words of the comedy: "Je suis leur chef; il faut que je les suive" (I am their leader; I am bound to follow them).

Against the young chief of the Intelligence Office there was from this time forward on the part of his superiors secret strife which was bound to end in rupture, but of which Picquart was for a long time unconscious. He did not perceive that in his own office he was jealously spied upon, opposed, and deceived by his fellow workers, Henry, Lauth, and Gribelin. One of them, Henry, had some mysterious motives besides the desire to please his superiors. Since 1876, when they had served together at the Intelligence Office, he had been the comrade, the friend, and even the debtor of Esterhazy, although he pretended to know very little about him. Between these two men there existed a bond the exact nature of which has remained unknown, but which must have been very powerful to involve Henry in the falsehood, deceit, and forgeries which were unveiled later. If it is not certain that Henry was Esterhazy's accomplice, it seems very probable that from the end of 1894 he knew him to be the author of the *bordercau*, and knew also that the traitor had him in his power.

X. In Sept., 1896, the rumor of the prisoner's escape brought the case abruptly back to public notice.

The anti-Jewish press inveighed against the accomplices, the protectors of the traitor; a member of the Chamber, Castelin, announced that

The Castelin Interpellation. at the opening of the next session he would interpellate the ministry on this subject. Moreover, it was known at the Staff Office that the Dreyfus family was pursuing an inquiry and was

getting ready to publish a pamphlet demanding the revision of the case.

Picquart, now that his eyes had been opened, was much preoccupied with all these plots. He believed Castelin to be working for the Dreyfus family. He had also been affected by a strange forgery, quite inexplicable to him, which had come into his hands early in September: a letter in a feigned handwriting, and in the style of a German, pretending to be addressed to Dreyfus by a friend, Weiss or Weill, and referring to imaginary "interesting documents" written in sympathetic ink, easily legible to expert eyes. This was probably the beginning of the plot to discredit Picquart, who insisted to Gonse that the initiative should come from the Staff Office. Gonse answered by vaguely advising him to act with prudence, and was opposed to the "expertises" in handwriting that the colonel demanded. In the mean time the bombshell burst. On Sept. 14 "L'Eclair" published under the title "The Traitor" a retrospective article which pretended to bring to light the real motives for the judgment of 1894. The article revealed for the first time the fact of the communication to the judges of a secret document, but this document—the letter "canaille de D . . ."—now became a "letter in cipher" in which the following phrase was found: "This creature Dreyfus is becoming decidedly too exacting." This article had been brought to "L'Eclair" by a contributor to the "Petit Journal," where Henry had some acquaintances; nothing further is known concerning it. Picquart attributed it to the Dreyfus family, and desired to take proceedings, which his chiefs would not authorize. This only caused him to insist more firmly that immediate steps should be taken. Then took place between General Gonse and Picquart this memorable dialogue:

"What can it matter to you," said the general, "whether this Jew remains at Devil's Island or not?"

"But he is innocent."

"That is an affair that can not be reopened; General Mercier and General Saussier are involved in it."

"Still, what would be our position if the family ever found out the real culprit?"

"If you say nothing, nobody will ever know it."

"What you have just said is abominable, general. I do not know yet what course I shall take, but in any case I will not carry this secret with me to the grave." ["Le Procès Dreyfus Devant le Conseil de Guerre de Rennes," I. 440, 441, Paris, 1900.]

From that day Picquart's removal was decided. He was authorized for the sake of appearances to continue his investigations concerning Esterhazy, but he was forbidden to take any decisive step, or, above all, to have the man arrested. With an adversary so cunning, ordinary measures—secret searches in his rooms, opening of his correspondence, examination of his desks—were of no avail, and never would be. For Esterhazy had been warned. He went to Drumont some time before the appearance of Lazare's

pamphlet, and said that they desired to reopen the Dreyfus affair, and to involve him in it in order to retard his promotion ("La Libre Parole," Dec. 3, 1902).

Meanwhile, Henry insinuated to General Gonse that it would be well to put the secret dossier (of the Dreyfus case) out of the way, for indiscretions might arise—perhaps had already arisen—because of it (an allusion to the article in "L'Eclair,"

Henry's which he wished to be attributed to **Confirma-** Picquart). Gonse did not need to be **tory Letter.** told twice, and removed the dossier (Oct. 30). A very few days later Henry triumphantly brought him a letter from Panizzardi, in blue pencil, which, he said, he had just found among some scraps in Madame Bastian's paper bag (Oct. 31). It was thus worded:

My dear friend: I have read that a deputy is going to ask several questions on the Dreyfus affair. If they request any new explanations at Rome, I shall say that I never had any dealings with this Jew. That is understood. If they question you make the same reply, for nobody must ever know what has happened to him.
Alexandrine.

The writing was apparently Panizzardi's, and in order to compare it Henry produced an earlier letter, supposed to have been taken from the waste of the secret dossier, written with the same pencil, on the same sort of paper ruled in squares, and containing the same signature. In reality, the letter brought for comparison contained fraudulent additions hinting at a Jewish traitor, while the new document was a forgery from beginning to end, executed by one of Henry's customary forgers, probably Leeman, called Lemercier-Picard, who later admitted to Count Torielli that he had written it. Gonse and Boisdeffre believed or pretended to believe in its authenticity, and likewise convinced General Billot thereof. When Colonel Picquart expressed his doubts to Gonse the latter answered: "When a minister tells me anything I always believe it."

On Nov. 6 the memoir which had been prepared by the Dreyfus family, and which had been written by Bernard LAZARE, appeared at Brussels. He laid bare the inconclusive character of the incriminating document (without, however, publishing it), confirmed the communication of the secret document, but affirmed, in opposition to "L'Eclair," that it bore only the initial "D" and not the name of "Dreyfus" in full. The pamphlet, distributed to the members of the Chamber, received from the press a cold welcome. But a few days later (Nov. 10) "Le Matin" published the facsimile of the famous bordereau attributed to Dreyfus. It became known later that it had been obtained from the expert Teyssonnières, who alone had kept the photograph of the bordereau confided to all the writing-experts in 1894. The publicity given to this facsimile would allow writing-experts all the world over to prove the differences that existed between the writing of the bordereau and that of Dreyfus; it might also meet the eyes of people who would recognize the writing of the true culprit, and that is exactly what happened. Esterhazy's handwriting was recognized particularly by Schwarzkoppen (who only then understood the drama of 1894), by Maurice Weil, and by a solicitor's clerk, the son of the chief rabbi Zadoc Kahn. The confusion at the Staff Office was now great; it grew

worse confounded when Maurice Weil, one of Esterhazy's intimate friends, sent to the minister of war an anonymous letter which he had just received and which warned him that Castelin intended to denounce Esterhazy and Weil as accomplices of Dreyfus. The Staff Office pretended to recognize Picquart's hand in all these incidents, or at any rate to regard them as the result of his alleged indiscretions. His immediate departure was resolved upon. He had already been told that he would be sent to inspect the intelligence service in the east of France. Boisdeffre went with him to the minister, who rebuked Picquart soundly for having let information leak out and for having seized Esterhazy's correspondence without authorization. In recognition of his services in the past, he was not disgraced, but was ordered to set out immediately, and to resign his position to General Gonse. He did not protest, but started on Nov. 16. Two days later Castelin's interpellation, which had become a decided bugbear to the Staff Office, was made, but it failed of its purpose. Castelin demanded that proceedings should be instituted against the accomplices of the traitor, among whom he named Dreyfus' father-in-law Hadamard, the naval officer Emile Weyl, and Bernard Lazare. General Billot, who had addressed the Chamber before Castelin, affirmed the perfect regularity of the action of 1894, and made an appeal to the patriotism of the assembly to terminate a "dangerous debate." After a short and confused argument the Chamber voted an "ordre du jour" of confidence, inviting the government to inquire into the matter and to take proceedings if there were cause. A petition from Madame Dreyfus, invoking, with the support of the article in "L'Eclair," the communication of the secret document, was put aside by the judicial committee for want of sufficient proof.

XI. Meanwhile, under a pretext, Picquart was hurried off from Nancy to Marseilles, and later on to Tunis; and, to avoid notice, he was attached to the Fourth Regiment of sharpshooters in garrison at Susa. During the whole time General

Machi- Gonse wrote to him upon the question
nations of money, as if to suggest purchasing
Against his silence. Picquart recorded in a
Picquart. codicil to his will the history of his discovery, which he intended for the president of the republic; in this way he was sure "not to take his secret with him to the grave."

Henry, though under the nominal direction of Gonse, had become the real head of the Intelligence Office, where he quietly prepared a whole series of forgeries, designed, when the opportunity presented itself, to crush Picquart if he ever attempted to cause trouble. After having put at rest the mistrust of his former chief by pretended protestations of devotion, in June, 1897, he suddenly flung off his mask. Picquart, irritated at continually receiving missives from the agents of his former service, wrote a rather hasty note to Henry, in which he denounced "the lies and the mysteries" with which his pretended mission had been surrounded during the past six months. Henry, after having consulted his superiors, answered, declaring that as far as "mysteries" were concerned he knew only that the following facts had been established against Picquart

by an "inquiry": (1) The opening of correspondence unconnected with the service. (2) A proposal to two officers to testify, should such action be necessary, that a paper, registered as belonging to the service, and emanating from a well-known person, had been seized in the mails—a reference to a remark made by Lauth to Picquart, that the "petit bleu" addressed to Esterhazy was deficient of the regular stamp of the post-office. (3) The opening of a secret dossier, followed by disclosures. This letter, to which Picquart replied by a brief protest, opened his eyes; he understood the plot that was being hatched against him, the dangers which threatened him for having been too discerning. He asked for leave, went to Paris, and disclosed his affair to his old friend and comrade Leblois, a lawyer. Without revealing to Leblois any secret document, even the "petit bleu," he told him that he had discovered Esterhazy's crime and the innocence of Dreyfus; he authorized him, in case of necessity, to inform the government, but absolutely forbade him to apprise either the brother or the lawyer of Dreyfus. Leblois did not long remain the only recipient of the secret. A few days later chance brought him in contact with one of the few statesmen who had shown any sympathy with the researches of Matthew Dreyfus—the Alsatian Scheurer-Kestner, former member of the Chamber of Deputies for Alsace and coworker with Gambetta, and now vice-president of the Senate and one of the most justly esteemed men of the Republican party. Since 1895

Scheurer-Kestner, induced by the deputy Ranc and by Matthew Dreyfus, had made some inquiries. In 1897 the friends of Dreyfus returned to the charge. Scheurer-Kestner was surprised to find that all the so-called moral proofs, the tales that were brought forward to explain the crime of Dreyfus, did not bear investigation. The expert Teyssonières, sent to him by his friend and colleague Trarieux, former minister of justice, did not succeed in convincing him that the bordereau was in the writing of Dreyfus. In great distress, he went to tell his old comrade Billot of his suspicions; the general reassured him: a secret document discovered since the condemnation, at the moment of Castelin's interpellation, had removed all doubts; Billot related the substance of it to him without letting him see it. This "crushing blow," which he kept in reserve for the partisans of Dreyfus, was Major Henry's forgery.

Scheurer-Kestner was at this point of his inquiry when Leblois, who had met him at dinner one evening, conceived the idea of having recourse to him as the medium by which to save Dreyfus and, through Dreyfus, Picquart. Going to Scheurer-Kestner's house, Leblois told all he knew, and showed him Gonse's letters. Scheurer-Kestner was finally convinced, and swore to devote himself to the defense of the innocent (July 13, 1897). But he was much puzzled as to what course to pursue. Leblois had forbidden him to mention Picquart's name, and Picquart had forbidden that the Dreyfus family should be told. In this perplexity, born of the initial mistake of Picquart, Scheurer-Kestner pursued the most unlucky tactics imaginable; instead of quietly

gathering together all his documents and uniting his forces with those of Matthew Dreyfus, he allowed the rumor of his convictions to be spread abroad, and thus put the Staff Office on the alert, gave them time to prepare themselves, and allowed the hostile press to bring discredit upon him and to weaken beforehand by premature and mutilated revelations the force of his arguments.

Billot soon began to feel uneasy; he conjured his "old friend" to do nothing without having seen him; that is to say, until the end of the parliamentary recess. Scheurer-Kestner, without suspecting anything, gave him his word, leaving a clear field to Esterhazy's protectors. In the mean while this personage had been quietly dismissed from active service. Billot, who it is claimed looked upon him as "a scoundrel, a vagabond," perhaps even as the accomplice of Dreyfus, had indignantly opposed his readmission into the War Office. On Aug. 17 Esterhazy was put on the retired list "for temporary infirmities"; but, that done, there remained the prevention of his being "substituted" for Dreyfus. That it was Scheurer-Kestner's plan to demand this substitution, the Staff Office did not doubt for a moment, for Henry's secret police had followed Picquart to Leblois' house, and then Leblois to Scheurer-Kestner's. It was even fancied that Scheurer-Kestner was much more fully informed than was really the case. Toward the middle of October a meeting was held at the War Office, in anticipation of Scheurer-Kestner's impending campaign. Gonse, Henry, Lauth, Du Paty de Clam, were all present; the last, although having nothing to do with the Intelligence Office, had been summoned to it as the principal worker in the condemnation of Dreyfus, and as interested therefore more than any one

in maintaining it. Gonse set forth the plot "of the Jews" to substitute for the Staff Office. Dreyfus Esterhazy, an officer of doubtful character, but whom a minute inquiry had cleared of all suspicion of treachery: who was, however, a nervous man, and who, under the blow of a sudden denunciation, might lose his head and take flight or even kill himself; and that would mean catastrophe, war, and disaster. Esterhazy must then be warned, to prevent him from going quite mad. But how was it to be done? It was decided to send him an anonymous letter in order that he might take courage. Billot objected to this proceeding; it seems, however, that somebody disregarded the objection, for Esterhazy received (or pretended to have received) a letter signed *Espérance*, warning him that the *Dreyfus* family, informed by a certain Colonel *Picart*, intended to accuse him of treason. One fact is certain—that he settled in Paris, went to see Schwarzkoppen, and told him that all was lost if he (Schwarzkoppen) did not go and declare to Madame Dreyfus that her husband was guilty; on the indignant refusal of Schwarzkoppen he threatened to blow his brains out. At the Staff Office Henry and Du Paty, understanding at once the wishes of Boisdeffre and of Gonse, resolved to join forces with Esterhazy. The keeper of the records, Gribelin, went in disguise to take a letter to Esterhazy fixing a rendezvous in the park of Montsouris. There, while Henry (fearing, as he said,

recognition by his former comrade) kept watch, Du Paty, who was also disguised, told Esterhazy that he was known to be innocent, and that he would be defended on condition that he conformed rigorously to the instructions that would be given to him. After this interview Esterhazy went to Schwarzkoppen quite cheered up, and told him that the staff was entering into a campaign for his defense. A week later Schwarzkoppen had himself recalled to Berlin; it was the discreet but significant avowal that "his man was taken." Meanwhile Esterhazy, as agreed upon, was receiving his daily instructions from the Staff Office. Every evening from this time on Gribelin brought to him at the Military Club the program for the next day; Du Paty and Henry, whose connection with the affair Esterhazy soon knew, saw him several times, sometimes at the Montmartre cemetery, sometimes on the Pont d'Alexandre III. Later on, when these meetings were considered too dangerous, they corresponded with him through the medium of his mistress, of his lawyer, or of his cousin Christian.

Following instructions, Esterhazy wrote to Billot, ending his letter with the threat that if he were not defended he would apply to the German emperor. He wrote in the same strain to the president of the republic, claiming that a lady—afterward mysteriously referred to as the "veiled lady"—had given him a photograph of a very important document which Picquart had acquired from an embassy and which seriously compromised persons of high diplomatic rank. This braggadocio was taken so seriously that General Leclerc received an order at Tunis to question Picquart on having given to an outsider—the "veiled lady"—the "document of deliverance." Receiving no answer, Esterhazy, in his third letter (Nov. 5), virtually held the knife at the president's throat: the stolen document proved the rascality of Dreyfus; if he should publish it, it would be war or humiliation for France. This time they made up their minds to listen to him. General Sausier was charged with interrogating Esterhazy in regard to the "document of deliverance"; he obtained no details from him, but made him promise to send back the document to the minister. On Nov. 15 (the day when Matthew Dreyfus wrote his denunciation) it was "restored" to Sausier in a triple envelope, sealed with Esterhazy's arms: the "document of deliverance," as Esterhazy called it, was a photograph of the document "canaille de D. . . ." There is nothing to prove that Esterhazy had ever had it in his hands. Billot acknowledged the receipt by the hand of his "chef de cabinet," General Torcy. By these barefaced stratagems Esterhazy and his defenders on the staff made certain of the complicity of the minister and of the president of the republic, while they compromised Picquart more deeply.

With the latter they proceeded to further measures. At the end of October Boisdeffre had ordered General Leclerc, commanding the corps of occupation in Tunis, to send Picquart to reconnoiter on the frontier of Tripoli, from which quarter pretended gatherings of the local tribes were reported. It was a dangerous region, where Morès had met his death; General Leclerc was astonished at the order, and, having heard from Picquart the cause of his disgrace,

forbade him to go farther than Gabes. Some days later Picquart had to clear himself of the accusation of allowing a woman to purloin the "document of deliverance" of Esterhazy. Then, on Nov. 11 and 12, he received one after the other two telegrams worded: (1) "Arrest the demigod; all the 'Speranza' and Speranza." (2) "It has been proved 'Blanche' that the 'bleu' was forged by Georges. Telegrams. Blanche." The obscure allusions and the names in these forgeries were derived from Picquart's private correspondence, which had been looked through, and were intended to produce the impression that Picquart was in some plot to release Dreyfus; the "demigod," it was pretended, referred to Scheurer-Kestner. The two telegrams, copied before they left Paris, had convinced the *Sûreté Générale* that Picquart was the moving spirit in the plot. On receiving them, and afterward an anonymous letter in the same style, Picquart sent a complaint to General Billot, and asked that inquiries be made regarding the author of these forgeries.

During this time Scheurer-Kestner was being deceived by his "old friend" Billot. On Oct. 30 he had a long conference with Billot, at which he accused Esterhazy. Billot declared that in spite of persistent investigations nobody had been able to find any proofs against Esterhazy, but that there were positive proofs against Dreyfus. Scheurer-Kestner implored him to distrust suspicious documents, and finally gave him a fortnight in which to make an honest and thorough investigation, promising that he himself would not speak during that time.

He kept his word; Billot did not. During the fortnight not only was the collusion between the staff and the traitor fully organized, but the press, furnished with more or less news by the War Office, spoke openly of Scheurer-Kestner's futile visit to Billot and launched a veritable tempest against the "Jewish syndicate," which had bought a "man of straw" as a substitute for Dreyfus in order to dishonor the army. Scheurer-Kestner, patient but much distressed by the tempest, persisted in his fixed idea of acting only through the government. He saw Méline, the president of the council, several times, but Méline would have nothing to do with his dossier, and advised him to address to the minister of justice a direct petition for revision. This was not bad advice. According to the new law of 1895, a petition for revision founded on a new fact (discovered after the sentence) could only be submitted to the Court of Cassation by the keeper of the seals, after the latter had taken the advice of a special commission. The disposition of the minister (Darlan) was not unfavorable to the adoption of this course; and it is worthy of note that the new facts which were allowed later by the court were at that moment easy to establish; namely, the resemblance between Esterhazy's writing and that of the *bordereau* and the communication of the secret dossier to the judges.

The pursuit of such a course would also have had the advantage of taking the matter out of the hands of military justice and of placing it in those of the civil judges, who were less prejudiced. However,

Scheurer-Kestner did not dare to pursue this course; he thought his documents not sufficiently complete. Official notes from the ministry (Nov. 6 and 9) stated the attitude which the government was resolved to take—it determined to respect the “chose jugée” (the matter adjudicated). As for the legal proceedings to secure revision, the notice added that Captain Dreyfus had been “regularly and justly” condemned—a formula which soon became the burden of General Billot’s song. Matters might still have dragged on had it not been for chance. At the in-

stance of the Dreyfus family, Bernard Lazare had prepared a second and more detailed pamphlet, in which had been gathered the opinions of a large number of French and foreign experts upon the writing of the bordereau as compared with that of Dreyfus. The unanimous conclusion of these experts was that the handwritings were not

identical; but while some of them maintained that the writing of the bordereau was natural, others saw in it a forgery. At the same time that this brochure was published, Matthew Dreyfus ordered handbills reproducing in facsimile the bordereau and a letter of his brother’s, which were offered for sale. One of these handbills fell into the hands of a stockbroker, Castro, who had had business relations with Esterhazy; he immediately recognized the bordereau as the writing of his former client, and informed Matthew Dreyfus of the fact. The latter hastened to Scheurer-Kestner and asked him: “Is that the same name?” “Yes,” the latter replied (Nov. 11).

For four days they hesitated as to the course to pursue, Scheurer-Kestner still persisting in keeping the fortnight’s silence promised to Billot on Oct. 31. In the interim, by means of the press the public mind had been influenced by indications as to the real traitor and by counter-declarations by Esterhazy in “La Libre Parole” concerning the conspiracy of the Jews and of “X. Y.” (Picquart).

On the night of Nov. 15, in a letter to the minister of war which was published at once, Matthew Dreyfus denounced “Count” Walsin Esterhazy as the writer of the bordereau and as the author of the treason for which his brother had been condemned.

XII. The hasty denunciation of Esterhazy by Matthew Dreyfus was a tactical though perhaps an unavoidable blunder. To accuse Esterhazy formally of the *treason* imputed to Dreyfus—

Trial of and not simply of having written the **Esterhazy.** bordereau (perhaps as a hoax or a swindle)—was to subject the revision

of the case of 1894 to the preliminary condemnation of Esterhazy. With the staff and the War Office fully enlisted against Dreyfus, the court martial which Esterhazy himself at once demanded was of necessity a veritable comedy. Not only was the accused allowed his liberty until the last day but one, not only did his protectors in the Staff Office continue to communicate indirectly with him and to dictate the answers he should make, but the general entrusted with the preliminary as well as with the judicial inquiry, M. de Pellieux, showed him an unchanging friendliness and accepted without examination all his inventions.

Convinced of the guilt of Dreyfus through the assurances of the staff, and before long by Henry’s forged documents, Pellieux refused at the outset to examine the bordereau, on the subject of which there was “chose jugée.” Even after the formal order to prosecute, an interpellation of Scheurer-Kestner to the Senate (Dec. 7) was necessary to induce General Billot to promise that all the documents, including the famous bordereau, should be produced for examination. On this occasion also, as he had done some days before in the Chamber of Deputies (Dec. 4), the minister did not fail to proclaim on his soul and conscience the guilt of Dreyfus, thus bringing to bear the whole weight of his high office on the verdict of the future judges of Esterhazy. Premier Méline, on his part, gained applause for declaring “that there was no Dreyfus affair,” and the Chamber in its “ordre du jour” stigmatized “the ringleaders of the odious campaign which troubled the public conscience.”

Against this “odious campaign” was set in motion a whole band of newspapers connected with the Staff Office, and which received from it either subsidies or communications. Among the

Attitude of most violent are to be noted “La Libre the Press. Parole” (Drumont), “L’Intransigeant” (Rochefort), “L’Echo de Paris” (Le-

pelletier), “Le Jour” (Vervoot), “La Patrie” (Millevoe), “Le Petit Journal” (Judet), “L’Eclair” (Alphonse Humbert). Two Jews, Arthur Meyer in “Le Gaulois” and G. Pollonnais in “Le Soir,” also took part in this concert. Boisdoffre’s orderly officer, Pauffin de St. Morel, was even caught one day bearing the “staff gospel” to Henry Rochefort (Nov. 16); nobody was deceived by the punishment for breach of discipline which he had to undergo for the sake of appearances.

An extraordinary piece of information—which was immediately contradicted—was printed by “L’Intransigeant” (Dec. 12-14); it was attributed to the confidences of Pauffin, and it dealt with the “ultra-secret” dossier (the photographs of letters from and to Emperor William about Dreyfus).

The Revisionist press, reduced to a small number of organs which were accused of being in the service of a syndicate, did not remain inactive. It consisted of “Le Siècle” (Yves Guyot, Joseph Reinach), “L’Aurore” (Vaughan, Clémenceau, Pressensé), and “Le Rappel,” to which were joined later “La Petite République” (Jaurès) and “Les Droits de l’Homme” (Ajalbert). The “Figaro,” losing most of its subscribers, changed its politics on Dec. 18, but became once more “Dreyfusard” after the discovery of Henry’s forgery. “L’Autorité” (Cassagnac) and “Le Soleil” (Hervé de Kerobant) were the only newspapers among the reactionary press which were more or less in favor of revision. Some of the revisionists, falling into the trap laid for them, widened the scope of the debate and gave it the character of an insulting campaign against the chiefs of the army, which hurt the feelings of many sincere patriots and drove them over to the other side. Public opinion was deeply moved by two publications: one, that of the indictment of Dreyfus (in “Le Siècle,” Jan. 6, 1898), which was absolutely remarkable for its lack of proof; the other (“Figaro,”

Nov. 28, 1897), that of letters written twelve years before by Esterhazy to his mistress, Madame de Boulancy, in which he launched furious invectives against his "cowardly and ignorant" chiefs, against "the fine army of France," against the entire French nation. One of these letters especially, which soon became famous under the name of the "lettre du Hulan" (Uhlán), surpassed in its unpatriotic violence anything that can be imagined.

"If some one came to me this evening," it ran, "and told me that I should be killed to-morrow as captain of Uhlans, while hewing down Frenchmen, I should be perfectly happy. . . . What a sad figure these people would make under a blood-red sun over the battle-field, Paris taken by storm and given up to the pillage of a hundred thousand drunken soldiers! That is the fête that I long for!"

Esterhazy hastened to deny the authorship of the letter, which was submitted to examination by experts. While silence was imposed on the officers of Esterhazy's regiment, suspicions were thrown on the defenders of Dreyfus. The director of the prison of Cherche-Midi, Forzinetti, who persisted in proclaiming his prisoner's innocence, was dismissed. But, above all, the Staff Office struggled to bring Picquart into disrepute. Scheurer-Kestner insisted on having his evidence; they were forced to bring him back from Tunis. The day before his arrival a search was instituted among his belongings, which was as fruitless as it was unusual; an officer escorted him from Marseilles to Paris (Nov. 25). General de Pellieux, who had been made to believe by a series of forgeries that Picquart had for some time been the moving spirit of the "syndicate," treated him more as the accused than as a witness; it was understood that he would soon be behind bolts and bars.

The general entrusted with the investigation concluded that there was no evidence against Esterhazy. However, Esterhazy was instructed to write a letter asking as a favor to be brought up for trial, the rough copy of which was corrected by Pellieux himself. Accordingly General Saussier, governor of Paris, instituted a regular inquiry (Dec. 4). But the officer empowered to conduct it, Major Ravary, did so in the same spirit as Pellieux.

Ravary's Report. Esterhazy's system of defense was a mixture of audacious avowals and ridiculous inventions. He acknowledged his relations with Schwarzkoppen, but gave to them a purely social character. The "petit bleu" was, according to him, an absurd forgery, highly improbable, and most likely the work of Picquart himself. He did not deny the striking resemblance between his writing and that of the bordereau, but explained it by alleging that Dreyfus must have fraudulently obtained one of his letters to imitate his handwriting and so incriminate him. As for the documents enumerated in the bordereau, Esterhazy denied that he could possibly have known them, especially at the time to which they now had agreed to assign the bordereau (April, 1894). He certainly had borrowed the "manuel de tir" from Lieutenant Bernheim of Le Mans, whom he had met at Rouen, but in the month of September; later on, he retracted and said, in agreement with Bernheim, that it was not the real manual, but a similar regulation already available in the bookstores.

This mass of deceptions, to which was added the romance of the "veiled lady"—supposed to be a mistress of Picquart—was taken seriously by Ravary. Three experts were found (Couard, Belhomme, Vari-nard) who swore that the bordereau was not in Esterhazy's hand, though apparently traced in part over his writing (Dec. 26). These men had to be coached by the staff. Du Paty writes to Esterhazy: "The experts have been appointed. You will have their names to-morrow. They shall be spoken to; be quiet!" Thereupon Ravary wrote out, or signed, a long report in which, after having given an exact summary of the charges set forth against Esterhazy, he concluded by saying that, while the private life of the major was not a model to be recommended "to our young officers," there was nothing to prove that he was guilty of treason. The bordereau was not in his writing; the "petit bleu" was not genuine. He stigmatized Picquart as the instigator of the whole campaign, and denounced his subterfuges and indiscretions to his superiors.

Ravary concluded that the case should be dismissed at once (Jan. 1). However, Saussier ordered the affair to be thoroughly cleared up before a court

The Esterhazy Court Martial. martial presided over by General Luxer. The hearing took place at the Cherche-Midi on Jan. 10 and 11, 1898. From the commencement the Dreyfus family, who had appointed two lawyers (Fernand Labori and Demange), were refused the right of being represented in court. The reading of the indictment, the superficial examination of Esterhazy (who contradicted himself several times), the testimony of the civil witnesses (Matthew Dreyfus, Scheurer-Kestner, etc.), were conducted in public; then a hearing behind closed doors was ordered, doubtless to stifle Colonel Picquart's evidence. The public knew nothing of Picquart's deposition, or of that of the other military witnesses, of Leblois, or of the experts, and nothing of the Revisionists' case in general. General de Pellieux, seated behind the judges, interfered more than once in the debates, and whispered to the president. Picquart was so harshly treated that one judge exclaimed: "I see that the real accused is Colonel Picquart!"

Finally, as everybody knew beforehand would be the case, Esterhazy was acquitted unanimously and acclaimed with frenzy by the "patriots" outside. Pellieux wrote to the "dear major" to stigmatize the "abominable campaign" of which he had been the victim, and to authorize him to prosecute those who dared to attribute the "Uhlán" letter to him. As to Picquart, he was, to begin with, punished with sixty days' imprisonment, being confined on Mont Valérien; it was understood that he would be arraigned before a council of inquiry (Jan. 13).

XIII. Esterhazy's acquittal closed the door on revision for the time being; but the Revisionists did not consider themselves defeated.

Emile Zola's "J'Accuse." For two months their ranks had been increased by a large number of literary men, professors, and scholars who had been convinced by the evidence given; it was one of these "intellectuels," the novelist Emile Zola, who took up the gauntlet. Al-

most from the first he had enlisted among the advocates of revision. He had written in the "Figaro" brilliant articles against the anti-Semites and in favor of Scheurer-Kestner, whom he termed "a soul of crystal." "Truth is afoot," he said; "nothing will stop her." On Jan. 13 he published in "L'Aurore," under the title "J'Accuse," an open letter to the president of the republic, an eloquent philippic against the enemies "of truth and justice." Gathering together with the prophetic imagination of the novelist all the details of a story of which up to then the outlines had hardly been discerned, he threw into relief, not without a good deal of exaggeration, the "diabolical rôle" of Colonel Du Paty. He charged the generals with a "crime of high treason against humanity," Pellieux and Ravary with "villainous inquiry," the experts with "lying and fraudulent reports." The acquittal of Esterhazy was "a supreme blow [soufflet] to all truth, to all justice"; the court of justice which had pronounced it was "necessarily criminal"; and he finished the long recital of his accusations with these words:

"I accuse the first court martial of having violated the law in condemning the accused upon the evidence of a document which remained secret. And I accuse the second court martial of having screened this illegality by order, committing in its turn the judicial crime of wilfully and knowingly acquitting a guilty person."

Zola's audacious action created a tremendous stir. It was, he owned himself, a revolutionary deed destined to provoke proceedings which would hasten "an outburst of truth and justice," and in that respect he was not deceived. His philippic raised such an outcry in the press and in the Chamber of Deputies that the War Office was forced to enter upon proceedings. A complaint was lodged against the defamatory phrases with regard to the court martial which had acquitted Esterhazy. The case was tried before the jury of the Seine, and lasted from Feb. 7 to 23, 1898.

The "patriots" in the cafés, the "camelots" selling songs and broadsides, the professional anti-Semites who were masters of the streets under the friendly eye of the police, threatened and booted

First Zola all the "enemies of the army," applauded the generals and even the most insignificant officers in uniform, not excepting Major Esterhazy, to whom Prince Henry of Orleans asked to be presented. Scuffles took place between the anti-Revisionists and the handful of "Dreyfusards" who served as a body-guard to Zola. Even in the audience-chamber, "arranged" with care by the staff and its friends at the bar, officers in civil dress caused a stir and gave vent to noisy manifestations. There was fighting in the lobbies. Cries of "Death to the Jews!" were uttered on all sides.

Zola's lawyers, Fernand Labori and Albert Clémenceau, had summoned a large number of witnesses. The greater number of the military witnesses declined at first to reply to the summons, but the court did not admit their power to refuse, and they were obliged to submit. However, in order that the "chose jugée" should receive due respect, the court decided not to allow any document, any evidence which bore upon facts foreign to the accusation, to be produced.

The president, Delegorgue, in applying this principle, observed a subtle, almost absurd, distinction; he admitted all that could prove Esterhazy's guilt but not Dreyfus' innocence or the irregularity of his condemnation; his formula, "The question will not be admitted," soon became proverbial. In reality, it was exceedingly difficult to trace a dividing-line between the two classes of facts; and the line was constantly overstepped, now under the pretext of establishing the "good faith" of the accused, now to justify the incriminating phrase that the second court martial had covered by order the *illegality* committed by the first. It was thus that Demange was able to bring out, in a rapid sentence, the fact of the communication of the secret document, which fact he learned from his fellow advocate, Salles.

Concerning the Dreyfus affair, the most important testimony was that of Colonel Picquart, who appeared for the first time in public, and gained numerous sympathizers by his calm, dignified, and reserved attitude. Without letting himself be either intimidated or flattered, he related clearly and sincerely, but avoiding all unnecessary disclosures, the story of his discovery. His adversaries, Gonse,

Henry, Lauth, Gribelin, did not leave Picquart's a stone unturned to weaken the force of his evidence and to assert that from the very commencement he had been

haunted by the idea of substituting Esterhazy for Dreyfus. There was a long dispute over his supposed plan of having the "petit bleu" stamped during the suspicious visits that Leblois had paid him at the ministry. Gribelin pretended that he had seen them seated at a table with two secret dossiers in front of them, one concerning carrier-pigeons, the other concerning the Dreyfus affair. Henry (appointed lieutenant-colonel for the occasion) declared that he had seen, in the presence of Leblois, the document "canaille de D . . ." taken from its envelope. Picquart denied the truth of this statement, which the dates contradicted; Henry thereupon replied: "Colonel Picquart has told a lie." Picquart kept his temper, but at the end of the trial sent his seconds to Henry, and fought a duel with him, in which Henry was slightly wounded. As to Esterhazy, who also tried to pick a quarrel with him, Picquart refused to grant him the honor of a meeting. "That man," said he, "belongs to the justice of his country." In this trial the important part played by Henry began to appear; till then he had purposely kept in the background, and concealed a deep cunning beneath the blunt appearance of a peasant-soldier. One day (Feb. 13), as if to warn his chiefs that he had the upper hand of them, he revealed the formation of the secret dossier; he also spoke, but vaguely, of a supposed ultra-secret dossier, two letters which (he pretended) had been shown him by Colonel Sandherr. These were apparently two of the forged letters attributed to the German emperor, which were whispered about sub rosa in order to convince refractory opinions.

Among the civil witnesses, the experts in handwriting occupied the longest time before the court. Besides the professional experts, savants such as Paul Meyer, A. Giry, Louis Havet, and Auguste Molinier, affirmed and proved that the writing and the

style of the bordereau were those of Esterhazy. Their adversaries refused to admit this evidence on the ground of the supposed difference between the original and the published facsimiles, of which many, according to Pellieux, resembled forgeries. The lawyers then asked that the original bordereau might be produced, but the court refused to give the order.

General de Pellieux had established himself counsel for the Staff Office. An elegant officer, gifted with an easy and biting eloquence, he addressed the court at almost every hearing, sometimes congratulating himself with having contributed to Esterhazy's acquittal, sometimes warning the jurymen that if they overthrew the confidence of the country in the chiefs of the army, their sons would be brought "to butchery." Like Henry, but with less mental reservation, he ended one day by divulging a secret. On Feb. 17 he had had a prolonged discussion with Picquart as to whether Esterhazy could possibly have been acquainted with the documents of the bordereau, the real date of which was now acknowledged (Aug. or Sept. and not April, 1894). Suddenly, as if unnerved, he declared that, setting the bordereau aside, there was a proof, subsequent in date but positive, of the guilt

**The
"Thunder-
bolt"
Quoted.**

of Dreyfus, and this proof he had had before his eyes; it was a paper in which the attaché "A" wrote to the attaché "B": "Never mention the dealings we have had with this Jew." General Gonse immediately confirmed this sensational evidence. This was the first time that the document forged by Henry—the "thunderbolt" of Billot—had been publicly produced. The impression this admission created was intense. Labori protested against this garbled quotation, and demanded that the document should either be brought before the court or should not be used at all. Then Pellieux, turning toward an orderly officer, cried: "Take a cab, and go and fetch General de Boisdeffre." While waiting for the head of the staff the hearing was adjourned; it was arranged not to resume it that day, for in the interval the government, informed of the incident, had opposed the production of a document which brought the foreign embassies into the case, and of which Hanotaux, the minister for foreign affairs, warned by the Italian ambassador, Torielli, suspected the genuineness. At the next day's hearing Boisdeffre was content with confirming the deposition of Pellieux on every point as "accurate and authentic," and boldly put the question of confidence to the jury. The president declared the incident closed. In vain did Picquart, questioned by the lawyers, declare that he considered the document a forgery. Pellieux was content with styling him scornfully "a gentleman who *still* bore the uniform of the French army and who dared charge three generals with a forgery!" From that moment the debates were curtailed. The jury, deliberating under fear of physical violence, declared the defendants guilty without extenuating circumstances. In consequence Zola was condemned to the maximum punishment—one year's imprisonment and a fine of 3,000 francs. The publisher of "L'Aurore"—defended by George Clémenceau—was sentenced to four months' imprisonment and a similar fine (Feb. 23, 1898). The pris-

oners appealed to the Court of Cassation for annulment of the judgment. Contrary to their expectation and to that of the public the Criminal Court admitted the plea on the formal ground that the complaint should have been lodged by the court martial which had been slandered, and not by the minister of war. The sentence was therefore annulled (April 2). Chambaraud, the judge-advocate, as well as Manau, the attorney-general, let it be understood that it would be better not to resume proceedings, at the same time allowing a discreet sympathy for the cause of revision to appear. But the War Office, urged on by the deputies, had gone too far to draw back. The court martial, immediately assembled, decided to lodge a civil complaint. This time only three lines from the article were retained as count of the indictment, and the case was deferred to the Court of Assizes of Seine and Oise at Versailles. Zola protested against the competence of this court, but the Court of Cassation overruled him. The case was not called until July 18, under a new ministry. At the last moment Zola declared he would not appear, and fled to England to avoid hearing the sentence, which would then become final. The court condemned him without debate to the maximum punishment, the same as had already been pronounced by the jury of the Seine. His name was also struck from the list of the Legion of Honor. The experts, on their part, slandered by him, brought an action against him which ended in his being condemned to pay 30,000 francs (\$6,000) damages.

XIV. The excitement which accompanied the Zola case had been echoed in the Chamber of Deputies. The different parties began to make the most of the "affaire" for their political ends. A very small phalanx of Socialists grouped round Jaurès, whose generous nature proved more clear-sighted than the shrewdness of his colleagues, and accused the government of delivering the republic up to the generals. A more numerous group of Radicals with "Nationalist" tendencies reproached them, on the contrary, with not having done what was necessary to defend the honor of the army and to nip in the bud a dangerous agitation. The chief spokesman of this group was the "austere intriguer" Godfrey Cavaignac, descended from a former candidate for the presidency of the republic, and himself suspected of a similar ambition. Between these two shoals the premier Méline steered his course, holding fast to the principle of "respect for the judgment pronounced." Prudently refusing to enter into the discussion of the proofs of Dreyfus' guilt, he gave satisfaction to the anti-Revisionists by energetically denouncing the Revisionists. Thus it was that on Jan. 15 and 22, Cavaignac having called upon the government to publish a document "both decisive and without danger"—the alleged report of Gonse upon the supposed avowals of Dreyfus to Lebrun-Renault—Méline flatly declined to follow this track, which he called "la revision à la tribune." After a stormy debate, during which blows were exchanged on the platform, the Chamber decided in Méline's favor (Jan. 24). Again, on Feb. 12, in re-

sponse to a question concerning "his dealings with the Dreyfus family," General Billot declared that if the revision took place he would not remain a moment longer at the War Office.

On Feb. 24 the ministry were challenged as to the attitude which certain generals had assumed during the Zola trial. Méline, without approving of the errors of speech, explained them as the natural result of the exasperation caused by such an incessant campaign of invective and outrage. But this campaign was about to end: "It must absolutely cease!" he cried, with the applause of the Chamber, and he gave it to be understood that the mad obstinacy of the "intellectuels"—as the advocates of revision were contemptuously called—would only end in bringing about a religious persecution. At the same time he made known a whole series of disciplinary measures demanded by circumstances. By the end of January a council of inquiry had declared for Colonel Picquart's retirement on account of his professional indiscretions in connection with Leblois. The ministerial decision had been left in suspense—it is easy to understand in whose interest—during the Zola trial; now it was put into execution, and Picquart's name was struck off the army list. His "accomplice" Leblois was dismissed from his duties as "maire adjoint," and suspended for six months from the practice of his profession as a lawyer.

During the four months which followed the first verdict against Zola the cause of the Revisionists was at the lowest ebb. The only effect that their campaign seemed to have had was to divide French society. On the one side were the army, nearly all the leading classes, and the "social forces," without considering the rabble; on the other, a handful of intellectual men and of Socialists. Nationalism, another form of Boulangism, resumed its sway, associated with anti-Semitism, whose exploits resulted in filling the streets of Algiers with blood. The battle continued in the press, and the League of the Rights of Man (president, Senator Trarieux) concentrated the partisans of revision. But from a judicial point of view all the avenues seemed henceforward barred. Apart from the epilogue of the Zola trial only two cases, which received scant notice, maintained a feeble spark of hope despite the darkness. On the one hand, Colonel Pic-

Two quart, after having vainly knocked at **Favorable** all the doors of military justice, had **Symptoms.** decided to lay a complaint before a civil court against the unknown authors of the forged "Speranza" letter and of the forged telegrams which he had received in Tunis. On the other hand, a cousin of Major Esterhazy, Christian Esterhazy, lodged a complaint against his relative, who, under pretense of investing their money "with his friend Rothschild," had swindled Christian and his mother out of a considerable part of their small fortune. The same examining magistrate, Bertulus, was entrusted with the two cases; each one threw light upon the other. Christian had been one of the intermediate agents in the collusion between Esterhazy and his protectors in the Staff Office, and he divulged some edifying details on this subject.

In the month of May the elections took place.

The new Chamber was as mixed in its representation as had been its predecessor, with the addition of a few more Nationalists and anti-Semites. It did not include a single open Dreyfusard: some (Jaurès, J. Reinach) had not been returned; others had not even faced the struggle. Besides, during the electoral period the recognized attitude of all parties had been to keep silent on the "affaire" and to exaggerate the formulas of enthusiasm for the army; later on, a few provincial councils called for strong measures against the agitators.

At its first meeting with the Chamber Méline's ministry was put in the minority, and a Radical cabinet was formed (June 30). It had for president Henry Brisson, who had just failed as candidate for the presidency of the Chamber. Brisson had remained, and persisted in remaining, completely unacquainted with the "affaire"; but he took as minister of war Godfrey Cavaignac, who would be of use to him as a security with regard to the Nationalists, and leave him full power on this delicate question.

The leader of the Patriots' League, Déroulède, congratulated Brisson on having taken in partnership a man "who would know how to make the honor of the army respected." Indeed, Cavaignac,

true to his promises as a deputy, announced his intention of "muzzling" **Second** the impenitent Dreyfusards. But first **Castelin** of all he meant to be sure that he had **Interpella-** the cooperation of the Chamber. On **tion.** July 7 he was challenged by the

deputy Castelin, who demanded fresh proceedings against Picquart, Zola, and the "syndicate." Cavaignac addressed the Chamber. His speech, very different from Méline's prudent reserve and Billot's empty formulas, constituted, as he thought, a demonstration in due form of the guilt of Dreyfus, founded principally on the new proofs which had been revealed since his condemnation. Of course, Cavaignac laid stress upon the "confessions" of Dreyfus, established by Gonse's report—antedated—and by a loose leaf (sic!) from Lebrun-Renault's note-book, afterward destroyed by him—a very suspicious act. Cavaignac laid before the Chamber a whole dossier of secret papers: (1) The document "caille de D . . .". (2) A document of March, 1894, in which one of the military attachés wrote "D. has brought me several interesting things." (It was discovered later that the letter "D" covered something which had been erased, and one could see the traces of one or several different letters.) (3) The document which had fallen from the skies in 1896, and which Pellieux had referred to in the discussion at Zola's trial. Cavaignac, whom Hanotaux and Méline had not thought fit to acquaint with Count Tornielli's protest, gave the entire text of this document for the first time, all except one sentence which he omitted on the ground of diplomatic propriety. He maintained that he had weighed its "material and moral authenticity." Cavaignac's demonstration, apparently mathematically exact, and made with angry conviction, reassured and won over the Chamber, which voted unanimously that his speech should be posted up in every commune throughout France. It was remarked that Méline was among

the few who did not vote. The "Figaro" proclaimed the Dreyfus case a "buried matter." But the next day Picquart threw cold water on all this enthusiasm. He wrote a public letter to Brisson, offering

to prove before any competent jurisdiction that the documents of 1894, **Picquart's** quoted by Cavaignac, did not apply **Reply to** to Dreyfus, and that the document of **Cavaignac.** 1896 "had every appearance of being

a forgery." The answer to this audacious manifestation was not long in coming. In the Chamber Cavaignac treated with contempt a man who dared to argue that "a document which he had never seen" could be a forgery. At the same time he wrote to the keeper of the seals to lodge a complaint against Picquart and Leblois, by virtue of the law on espionage (July 12). This was the accusation against Picquart already brought by Henry, Lauth, and Gribelin during Zola's trial, for having (1) examined with Leblois the dossier of a spy named Beulot, and a secret dossier respecting carrier-pigeons, and (2) communicated to Leblois the secret dossiers of the actions against Dreyfus and Esterhazy. Picquart denied that he had shown Leblois any document either secret or concerning the national defense. Moreover, some of these "facts" had been denounced at the council of inquiry which had ordered his dismissal from the army. Therefore the principle "Non bis in idem" should have made fresh proceedings impossible; but the minister, bitterly resenting the doubt cast on his sincerity, did not stop to take these considerations into account. Picquart was arrested and incarcerated in the civil prison of La Santé (July 13). The inquiry, entrusted to the judge Albert Fabre, soon took a turn favorable to the prisoner, whose adversaries became confused by perpetually contradicting facts and dates. On the same day as this arrest the examining magistrate Bertulus, disregarding the threats and entreaties of which he had been the object, on his own initiative (as an official note put it) sent Major Esterhazy and his mistress, Marguerite Pays, to prison, accused of the crime of forgery and of using forgeries; he had in fact become convinced that the "Speranza" telegram was the work of

Trial of anza" telegram was the work of **Esterhazy** Madame Pays, and that they were not **for** altogether innocent of the sending of **Forgery.** the "Blanche" telegram. Then, when

Bertulus had decided to send Esterhazy and his mistress before the Assize Court, the Chambre des Mises en Accusation interfered and gave them the benefit of insufficient evidence (Aug. 12), and also declared the complicity of Du Paty insufficiently proved.

After the decision pronounced in his favor, Esterhazy had been set at liberty; but he did not come out of this troublesome adventure unscathed. Already, in his speech of July 7, Cavaignac had announced that this officer would be "smitten with the disciplinary punishments that he had deserved," and he gave him into the hands of a council of inquiry. Before this council, presided over by General de St. Germain, Esterhazy, to avenge himself, made revelations which were most compromising for himself as well as for his protectors. He told of his collusion with the staff, and of his threatening letters to the

president of the republic. Nevertheless, the council declined to find him guilty of having failed either in discipline or in matters of honor; they sustained only (and by a majority of one) the charge of "habitual misconduct." Notwithstanding a letter from General Zurlinden, military governor of Paris, recommending indulgent measures, Esterhazy's name was struck off the army lists by the minister of war (Aug. 31).

But just at this time an incident of far greater importance occurred to change the aspect of affairs. Cavaignac, in spite of his assurance, had none the

less been agitated by the doubts expressed on all sides as to the authenticity of certain documents in his dossier. In order to ease his mind he ordered a general revision and a reclassification of the secret dossier. In the course of

this operation Major Cuignet, working by lamplight, noticed an alarming peculiarity in the "document Henry": the lines of the paper—which was ruled in squares—were not of the same color at the top and at the bottom as they were in the middle. When he looked at the document produced by Henry himself for comparison—an invitation to dinner (falsified) dating from 1894—he ascertained, by comparing the ruled squares, that the heading and the lower part of the latter document belonged in reality to the "document Henry," and vice versa. If the two papers had been contemporary, this inversion might have been attributed to a pardonable error in gumming them together; but such was not the case: one was supposed to have been put together in 1894, the other in 1896; therefore the documents had evidently been tampered with at this latter date. Much concerned by his discovery, Cuignet apprised the chief of the cabinet (General Roget) and the minister, who recognized the accuracy of it. Their conviction, which the nonsense and the improbability of the "Vercingétorix document"—as Esterhazy had called it—had not been able to shake, gave way before the divergence of the squares ruled on the paper. Cavaignac, for motives still unknown, kept the matter secret for a fortnight. Then, as Henry was passing through Paris, he summoned him to the War Office, and questioned him in the presence of Generals de Boisdeffre, Gonse, and Roget. Henry commenced by swearing that the document was authentic, then got entangled in confused explanations, then admitted that he had completed certain parts of it "from oral information" he had received; in the end, conquered by the evidence against him, he owned that he had invented the whole thing. But they knew well why and for whom; and he threw an anxious glance on Generals Boisdeffre and Gonse, who in 1896 had accepted this timely forgery without question; these generals kept frigid silence. Abandoned by the chiefs who had tacitly driven him to the crime, Henry gave way entirely. By order of the minister he was immediately put under arrest and confined in Mont Valérien. The next day he cut his throat

with a razor left in his possession, **Suicide** taking with him to the grave his secret and that of a great part of the **of Henry.** "affaire" (Aug. 31, 1898). On the same day Esterhazy prudently disappeared from Paris; it was

known that he had taken refuge in Brussels, and then in London. Colonel Henry's avowal gravely affected General Boisdeffre's position, for he had publicly proclaimed and affirmed to the minister the authenticity of the document. He immediately tendered his resignation as head of the staff, and, despite Cavaignac's entreaties, insisted on its acceptance.

This double "coup de théâtre," at once made public, created a tremendous sensation at first. The enemies of revision were overwhelmed; it was several days before they had sufficiently recovered to rally round the theory of the "patriotic forgery" imagined by a contributor to the "Gazette de France," Charles Maurras. According to him, Henry had forged this document as a sort of résumé for the public, because the "real proofs" could not be revealed without danger. This absurd theory (for if ever a document were intended exclusively for "internal use," as Pressensé put it, it was that one!) was generally accepted by the Nationalists.

But public opinion had changed considerably, or was at least shaken. The revision of the Dreyfus case thenceforward seemed inevitable; the council of ministers investigated the matter. It was evident that if Colonel Henry had been obliged to forge a false proof of the guilt of Dreyfus in 1896, the dossier did not contain a single one that could be considered as decisive. Cavaignac refused to draw this inference—too honest to hush up Henry's forgery, he was too obstinate to retract his speech of July 7. He declared that he was more convinced than ever of Dreyfus' guilt, and tendered his resignation, led to this decision by Brisson's firmly expressed determination to take steps toward revision (Sept. 4).

General Zurlinden, governor of Paris, accepted the vacant post in the War Office at the personal request of the president of the republic.

Zurlinden lic. He was an honest soldier, but **Succeeds** narrow-minded; the press of the staff **Cavaignac** loaded him with insults, which did not fail to affect him. The revision

founded upon the discovery of a "new fact" could only be demanded by the keeper of the seals. As early as Sept. 3 Madame Dreyfus had laid before him a request to take this initiative. She alleged two "new facts": (1) the expert's examination of the bordereau, which she was informed had not given the same results as in 1894; (2) the confession of Henry's crime, which consequently annulled his all-important evidence in the action against her husband. As a result of this claim the keeper of the seals, Sarrien, demanded that the secretary of war should communicate the Dreyfus dossier. To the general surprise, Zurlinden sent it to him with a long notice unfavorable to revision. However, after a prolonged discussion, the ministry decided to proceed and to lay the matter before the judicial commission, which they were bound to consult in

Ministerial such a case. Thereupon Zurlinden **Changes** tendered his resignation, and was followed in his retirement by the minister of public works, Tillaye (Sept. 17).

Zurlinden was reinstated as governor of Paris; General Chanoine inherited his position in the War Office, as well as the insults of the anti-Revisionist press. During his short term of office Zurlinden, with an impartial-

ity that showed more uprightness than discretion, had smitten two of the principal actors of the drama. It resulted from Esterhazy's declarations before his council of discipline, and from an inquiry opened in consequence, that Colonel Du Paty de Clam had sided with Esterhazy before and during his action. Du Paty took upon himself all the responsibility for his conduct, and asserted that he had acted without reference to his chiefs; this was chivalrous, but only half true. However that may be, the assistance thus given to Esterhazy was judged "reprehensible from a military point of view": Du Paty was retired and put on half-pay for punishment (Sept. 12). After Du Paty came Picquart. Zurlinden, having become acquainted with his dossier, proposed to the council of ministers to arraign Picquart before a court martial on the charge, already drawn up by Esterhazy, of having fabricated the "petit bleu." The only possible basis for such an accusation consisted in certain signs of erasure in the document which had not existed in the photographs taken of it in 1896. The council appeared little in favor of these proceedings, but Zurlinden, acting as governor of Paris, almost immediately after tendering his resignation, presented to his successor a warrant of inquiry, which the latter signed without paying much attention to it. The reason of this haste was that the keeper of seals had asked Picquart for a "mémoire" on the fitness of revision; the military party was therefore eager to discredit his testimony by a charge of forgery. On Sept. 21, the day on which the case of Picquart and Leblois was brought before the "tribunal correctionnel," the government attorney demanded the adjournment of the affair, first, on account of the Dreyfus revision, which might modify the aspect of the deeds with which Picquart was charged; and secondly, on account of the new and serious accusation which had been brought against the latter. Picquart then rose and warned his judges and the public, saying: "To-night perhaps I shall go to the Cherche-Midi, and this is probably the last time that I will be able to speak in public. I would have the world know that if there be found in my cell the rope of Lemer cier-Picard or the razor of Henry, I shall have been assassinated. No man like myself can for a moment think of suicide." Lemer cier-Picard was one of Henry's agents, whose real name was Leeman, and who had probably been concerned in the forgery of 1896; he had afterward hanged himself under mysterious circumstances from the window-fastening of a furnished house. The next day Picquart was taken from the civil prison of La Santé and enrolled on the register at the Cherche-Midi, where he was put into the strictest solitary confinement.

Some days after, the vote of the commission charged with giving a preliminary opinion upon the demand for a revision was made known: opinion was equally divided. This division legally inferred rejection; but the minister of war was not bound to accept the opinion of the commission. He wished, however, to shield himself behind a vote of the council of ministers. After four hours of deliberation it was decided, at the instance of Brisson, seconded by Bourgeois, that the keeper of the seals should lay the affair before the Court of Cassation.

Thus the proceedings for revision were definitely inaugurated (Sept. 27).

XV. Now that, thanks to the manly resolution of Brisson, the obstinate defenders of the work of 1894 had been deprived of support, their only remaining hope lay in the revolutionary action of the army, of the people, or of the Chamber of Deputies. It will be seen how they used successively each of these three means. They found help, on the one hand, in the thoughtless violence of certain apostles of revision who persisted in including the whole army in the fault committed by some of its chiefs. The most extreme of these was Urbain Gohier, who was prosecuted (under Dupuy's ministry) for his collection of articles, "The Army Against the Nation," and acquitted by a jury of the Seine. On the other hand, the anti-Revisionists were encouraged by the strange inactivity of the president of the republic. The day before the reopening of the Chamber of Deputies, sudden and suspicious strikes, noisy public meetings, struggles in the streets,

**Resigna-
tion of
Brisson's
Ministry.** reports of a military conspiracy, all contributed to overexcite the temper of the public. The very day of the reopening of the Chamber of Deputies (Oct. 25) Brisson's ministry was defeated on a motion which virtually accused the government of permitting the attacks upon the army, and it resigned forthwith.

It was replaced on Nov. 3 by a cabinet of "republican union" presided over by Charles Dupuy, with Freycinet at the War Office and Lebret keeper of the seals. The Criminal Chamber of the Court of Cassation, having the demand for a revision laid before it, held public audience on Oct. 27 and 28 to express its opinion upon the admissibility of the demand. The attorney-general Manau and the counselor Bard, the latter in a very remarkable report, both pronounced themselves in favor of the claim. They adopted the two motives for the request presented by Madame Dreyfus. The avowed forgery of Colonel Henry covered his evidence of 1894, and even the origin of the bordereau which had been through his hands, with justifiable suspicion; the report of the experts of 1897, the purport of which was revealed on this occasion, tended to establish the belief that the bordereau was not in Dreyfus' handwriting, as had been claimed in 1894, but was "a tracing of the writing of Esterhazy." The attorney-general, an old republican, was in favor of immediately annulling the sentence of 1894 and suspending the punishment of Dreyfus; the counselor Bard, taking into consideration the resistance of military authority, whose motives were enumerated in Zurlinden's letter, proposed simply that the Criminal Chamber should declare the claim "formally admissible" and should proceed to an inquiry which would throw further light on the matter and set people's minds at rest. It was this last expedient that commended itself to the Criminal Chamber (Oct. 29); and it was further decided (Nov. 3) that instead of appointing a special commission, the court as a whole should hold this supplementary examination. They began at once and heard, in greatest secrecy, a long series of witnesses, not excepting Esterhazy, who, having been threatened with an action for swindling his cousin Christian,

obtained a safe-conduct to come to Paris without fear of being arrested. On Nov. 15 the Criminal Chamber decided that Dreyfus

**Trial
Before the
Court of
Cassation.** should be informed of the commencement of proceedings for the revision, and invited to present his means of defense. This was the first news that the unhappy man had heard of the campaign begun in his behalf.

Before the Court of Cassation, as in the actions against both Esterhazy and Zola, the principal witness for the revision was to be Colonel Picquart. To weaken the importance of his evidence and to retaliate for the revision, the military party wished to force the colonel's condemnation beforehand. The inquiry into his case, entrusted to Captain Tavernier, was quickly ended. On Nov. 24 General Zurlinden, governor of Paris, signed the order demanding his trial before the court martial; he was charged with forging the "petit bleu," with using other forgeries, and with communicating secret documents concerning national defense. Numerous petitions from "intellectuels" protested against these hasty measures, and demanded that the judgment of Picquart should be delayed until the result of the inquiry in the Court of Cassation should have put in its true light the part he had played in all this affair. The same opinion was expressed in the Chamber of Deputies by the deputies Bos, Millerand, and Poincaré, one of the ministers of 1894, who took advantage of this opportunity to "unburden his conscience."

Freycinet and Dupuy refused to postpone the court martial, but were willing to hamper it by allowing the Court of Cassation to claim the Picquart dossier. Finally, after a fruitless attempt by Waldeck-Rousseau to pass a law allowing the Supreme Court to suspend the case of Picquart, the colonel, who was awaiting trial before both the "tribunal correctionnel" and the court martial, applied to the Court of Cassation to rule the case. The court ordered that the two dossiers should be communicated to it, thus indefinitely postponing the meeting of the court martial. (After the close of the inquiry, on March 3, 1899, the court decided that the Civil Court alone was concerned with the chief accusations against Picquart, and he was transferred from the military prison at Cherche-Midi to the civil prison of La Santé.)

After having almost terminated the hearing of the witnesses, the Criminal Chamber insisted upon having the secret dossier, withheld by military authority, communicated to it. This request met with strenuous opposition: the matter was even taken before the Chamber of Deputies (Dec. 19). The government, however, before deciding, required guaranties of such a nature as to insure it from indiscreet publication; these guaranties, accepted by the Court of Cassation (Dec. 27), consisted in an officer of the War Office being charged to carry the dossier every day to the court and to bring it back to the War Office in the evening.

While the Criminal Court was proceeding with its inquiry, notwithstanding the secrecy with which all its movements were surrounded, the report was spread abroad that the decision would be favorable to the claim for revision. To avoid this catastro-

phat any price, the enemies of revision commenced a violent campaign in the newspapers, defaming the magistrates of the Criminal Chamber, who were represented as having been required to sell themselves to the cause of Dreyfus. The Ligue de la Patrie Française, founded in Jan., 1899, under the auspices of the academicians François Coppée and Jules Lemaitre, energetically seconded this campaign and demanded that these "disqualified" judges should be discharged from the cognizance of the case. The president of the Civil Chamber of the court, Quesnay de Beaurepaire, was found ready to lend the support of his high dignity to these calumnies; he tendered his resignation as a judge (Jan. 8, 1899), and began in "L'Echo de Paris" a series of articles against his colleagues. His most serious charge was that President Loew, at the end of a long and tiring sitting, had sent Picquart a glass of hot grog.

The astonishment of the public was intensified when on Jan. 30 the government presented a bill demanding that the affair should be judged by the united sections of the whole Court of Cassation! Dupuy asserted that the bill was a measure of pacification; it was necessary that the decision—and why did the Revisionists fear that the whole Court of Cassation would disavow the Criminal Chamber?—should have such force that nobody but "fools or rebels" would be found to contest it. These arguments, and above all the fear of provoking a ministerial crisis, triumphed over the resistance of a part of the republicans. The "loi de dessaisissement" was passed by the Chamber of Deputies (Feb. 10), and a little later by the Senate (Feb. 28).

In the interval between the taking of these two votes an important event had occurred—the sudden death of the president, Félix Faure (Feb. 16). The congress which immediately assembled set aside the candidatureship of all those who had been to a greater or less degree involved in the Dreyfus affair (Méline, Brisson, Dupuy), and fixed its choice on the president of the Senate, Emile Loubet, who had preserved up to that time, and who continued to preserve, a consistently neutral attitude. Nevertheless, as he was the choice of the Senate and of

The Death of Félix Faure. the Revisionists in the Chamber, his nomination awakened the fury of the Nationalists, anti-Semites, and reactionists. On different sides conspirators tried to take advantage of the general disorder and attempted a decisive stroke. The Orleanist pretender advanced closer to the frontier. At Félix Faure's funeral (Feb. 23) the leaders of the League of Patriots, Déroulède and Marcel Habert, tried to induce General Roget's brigade to proceed to the Elysée. The two agitators were arrested, brought before the jury of the Seine for "misdemeanor in the press," and acquitted (May 31).

The Criminal Chamber had terminated its inquiry on Feb. 9; immediately after the vote for the "loi de dessaisissement" the whole proceeding was turned over to the Court of Cassation. This latter accepted without question the results obtained, heard several new witnesses, and had the secret dossiers, both military and diplomatic, laid before it. It was

still engaged in studying them when the "Figaro" succeeded in obtaining, and published, beginning with March 31, the complete reports of the proceedings of the inquiry which had been put in print for the private use of the councilors. The effect of this publication was wide-spread. For the first time the general public had all the factors of the case before its eyes and could reason out an opinion for itself. The characteristic result of the inquiry was the melting away of all the pretended proofs of the guilt of Dreyfus, inferred from the secret dossier: not a single one had withstood an impartial examination, and in the course of the inquiry many documents had been recognized as false or as having been tampered with.

The spokesmen of the Staff Office, General Roget, Major Cuignet, and Cavaignac, now returned to the bordereau, and struggled to show that the documents enumerated therein could have been betrayed only by Dreyfus. But the attributing of the bordereau to Dreyfus clashed with the declaration of the new experts appointed by the Criminal Chamber (Paul Meyer, Giry, Molinier), who were unanimous in attributing it to Esterhazy. Charavay, one of the experts of 1894 who had decided against Dreyfus, retracted his previous decision when Esterhazy's writing was put before him. Lastly, a search, made as early as the month of November, put the court in possession of two letters acknowledged by Esterhazy, written on the same "pelure" paper (foreign note-paper) as the bordereau; a search had been made in vain for samples of this paper in Dreyfus' house, and in 1897 Esterhazy had denied that he had ever used it.

Before the united courts the most remarkable incident was that of the Panizzardi telegram of Nov. 2, 1894. Instead of the true interpretation of this telegram, which quite exonerated Dreyfus, the secret military dossier communicated to

The Panizzardi Telegram. the Court of Cassation contained only a false version of it, put together from memory in 1898 by Colonel Henry. In

the course of his deposition Major Cuignet tried to justify this false version, and accused the Foreign Office of want of faith. A somewhat animated correspondence took place between the two ministries on this subject. However, the delegate of the Foreign Office, Paléologue, had no trouble in confounding his opponent, and on April 27 Cuignet and General Chamoin, in the name of the War Office, signed a warrant recognizing the accuracy of the official interpretation. This incident had a parliamentary echo. On May 5 De Freycinet tendered his resignation from the War Office rather abruptly. He was replaced by Krantz, until then minister of public works.

Notwithstanding the remarkable prejudices of a considerable number of the councilors who were charged with the examination of the case, the inquiry of the united courts only confirmed in a striking manner the results of the inquiry of the Criminal Chamber. The president of the Civil Chamber, Ballot-Beaupré, was entrusted with the report, which he read in the open court on May 29. Visibly affected, he declared that the bordereau was the work of Esterhazy: this fact being proved, even if it did not

allow of Esterhazy's acquittal being overthrown, was sufficient to demonstrate Dreyfus' innocence; and this was, according to Ballot-Beaupré, the new fact required by the law. Manau, the attorney-general, in his address to the court brought forward a second "new fact"—Henry's forgery. After a masterly speech by Mornard, acting on behalf of the Dreyfus family, the Court of Cassation retired for deliberation. In their decision, rendered June 3, they set aside the "fins de non recevoir" (refusal to admitance) inferred either from the secret dossier or from the pretended confessions of Dreyfus, which they judged not proved and improbable. They retained two "new facts": one, recognized by all, the fresh attribution of the bordereau; the other, the secret communication made to the judges of Dreyfus, of the document "canaille de D . . .," now considered by every one as inapplicable to the prisoner. Accordingly, the Court of Cassation annulled the sentence of 1894, and ordered that Dreyfus be tried again before a court martial at Rennes.

The very day before this memorable decree Esterhazy declared to a reporter of "Le Matin" that he was indeed the author of the bordereau; but he asserted that he had written it "by order," to furnish his friend, Colonel Sandherr (whose secret agent he pretended to have been), with a material proof against the traitor Dreyfus.

XVI. The presumptions that had been admitted by the Court of Cassation in favor of the innocence of Dreyfus, were so powerful that, according to general opinion, the judgment of the court martial at Rennes could be nothing but a

The Court mere formality, destined to procure
Martial for Dreyfus the supreme satisfaction
at Rennes. of being rehabilitated by his peers.

But after the lies, the hatred, the insults which had accumulated during the last two years, after the work of demoralization accomplished by the press of both parties, the overexcited army had now reached the point of identifying its own honor with the shame of Dreyfus. Its suspicions having been successfully roused against civil justice, it refused to bow down before the work of the latter, although it was so straightforward; and, as Renault Morlière had foretold, the only effect that the "loi de dessaisissement" had was to direct upon the whole Court of Cassation the suspicions and the invectives reserved up to this time for the Criminal Chamber alone.

The first victim of this fresh outburst of passion was the Dupuy ministry. This "ministère de bascule" (trimming ministry), after having done everything in its power to retard the work of justice, now seemed to accept it without any reserve, and to be ready to draw any inference from it. The cruiser "Sfax," stationed at La Martinique, had been ordered to bring Dreyfus back to France. Du Paty de Clam was arrested on the charge of having taken part in the Henry forgery, an accusation rashly made by Major Cuignet, and which was bound to be rejected for lack of evidence.

General Pellieux was brought before a council of inquiry for collusion with Esterhazy; Esterhazy himself was prosecuted for the affair of the "liberating document." The cabinet felt itself threatened

by the indignation of all sections of the Republican party, and made fresh advances to the "Dreyfusards." On June 5 the Chamber of Deputies voted the public placarding of the decision of the Court of Cassation—a necessary step in view of similar action taken in the case of Cavaignac's speech. Still further, the cabinet proposed to the Chamber to bring before the Senate an action against General Mercier, on the ground of the secret communication made to the judges of 1894.

But the Chamber, which had acclaimed Cavaignac and overthrown Brisson, hesitated to start upon the course of retaliation into which Dupuy was urging it. It found a deputy (Ribot) to declare that the ministry was encroaching upon its prerogatives, and another (Pourquerey de Boisserin) to propose the postponement of any decision until the court martial of Rennes had rendered its decree. This last proposition rallied the majority; nobody observed that, in thus connecting Mercier's safety with a fresh condemnation of Dreyfus, a false character was being given in advance to the trial at Rennes: out of a simple legal debate was being formed a duel between a captain and a general.

Dupuy's cabinet was finally overthrown (June 12), and the groups on the Left, in presence of the danger of a military pronouncement that threatened them, decided to uphold nothing but a ministry of "Republican defense." On June 22 Waldeck-Rousseau succeeded in forming a cabinet, in which General the Marquis de Galliffet was minister of war.

The cruiser "Sfax" landed Dreyfus on July 1 at Port Houliguen, near Quiberon. Hurriedly disembarked on a stormy night, he was immediately transferred to the military prison of Rennes. After five years of physical and moral torture, which he had survived only by a miracle of will-power, the unhappy man had been reduced to a pitiable state of bodily and mental exhaustion. For five weeks the attorneys chosen by his family, Demange and Labori, were busy in acquainting him as far as was possible with the remarkable events that had occurred during his absence; his attitude while the trial was progressing proved the difficulty he had in realizing the situation.

His trial began on Aug. 7, in one of the rooms of the lycée at Rennes. The court martial was composed entirely of artillery officers, except the president, Colonel Jouaust, who belonged to the corps of engineers. The public prosecutor was Major Carrière, a retired gendarme, who at the age of sixty had begun to study law. In accordance with legal requirements, the indictment was in substance the same as at the previous trial; but the only question put to the court was whether Dreyfus had delivered up the documents enumerated in the bordereau. It appeared, therefore, that only witnesses who could give evidence on this point would be heard, and such, in fact, were the instructions given by the War Office to the government commissary; but these directions were not respected by him nor by the defense. Hence the Rennes trial was but a repetition of the interminable string of witnesses who had already been heard at Zola's trial and in the Court of

Cassation, the greater part of whom only brought forward opinions, suppositions, or tales absolutely foreign to the question. The generals, forming a compact group which this time worked under Mercier's personal direction, delivered regular harangues and interfered in the debate continually: the president, overawed by his superior officers, exhibited as much deference to them as he showed harshness and sharpness to Dreyfus. From beginning to end of the trial he made no pretense of keeping account of the facts duly established by the Court of Cassation. Esterhazy's avowals, intermixed, it is true, with lies, were held as being null and void. The voluminous correspondence which he addressed to Jouaust and to Carrière was thrown into the waste-paper basket. The questions asked by one of the judges indicated that some one had spoken to him of the pretended "original bordereau," said to have been annotated by the Emperor William, and of which the bordereau was simply a copy by Esterhazy.

The examination of Dreyfus himself was without interest; he confined himself to denials, and preserved an entirely military attitude, the exaggerated correctness of which did not arouse any sympathy. Several hearings with closed doors were devoted to the examination of the military and diplomatic secret dossiers. General Chamoin, delegate of the War Office, had (as explained by him later, through inadvertence) incorporated in them again the false rendering of the Panizzardi telegram, together with a commentary from Du Paty.

General Mercier's evidence (Aug. 12), which had been announced with much parade and bustle, was put forward in a clever speech, but brought out nothing new, unless it were a note from the Austrian military attaché, Schneider, which Mercier had procured by unavowed means. In this note the Austrian diplomat declared that he persisted in "believing" in the guilt of Dreyfus. The note was of the year 1895 or 1896; but a false date had been written on the copy, "Nov. 30, 1897"—a date later than the discovery of Esterhazy's handwriting, and at which, as a matter of fact, Schneider had completely changed his opinion! Called upon to explain the part he played in 1894, Mercier admitted, this time without hesitation, the communication of the secret dossier, took the credit of it to himself, and declared that if necessary he was ready to do it again.

On Aug. 14 an unknown person, who succeeded in escaping, fired a revolver at Labori and wounded him severely in the back. For more than a week the intrepid advocate was prevented from attending the hearing.

One can not enter into the endless details of all the evidence, which continued for nearly a month longer at the rate of two sittings a day. The most notable witnesses were Casimir-Perier, Commander Freystaetter (one of the judges of 1894)—both in violent opposition to Mercier—Charavay, who, though seriously ill, came loyally forward to acknowledge his error of 1894, and Bertillon, who repeated his claims as to the "autoforgery" of the bordereau, together with fresh complications. At the last moment Colonel Jouaust, using his discretionary power, heard with closed doors, and without putting him

on his oath, a Servian named Czernucki, formerly an Austrian officer. This man, who was generally considered to be half-mad, related in an obscure way that a civil official and an officer of the staff "of a power of central Europe" had certified to him that Dreyfus was a spy. Although this story was of no value, Labori took advantage of it to demand in turn that the evidence of Schwarzkoppen and Panizzardi should be received. This was refused. However, the German government inserted a notice in the official newspaper of Berlin (Sept. 8), repeating in formal terms the declaration made by the chancellor Von Bülow on Jan. 24, 1898 before a commission of the Reichstag, and proclaiming that the government had never had any dealings whatever with Dreyfus.

Major Carrière's address to the court assumed that Dreyfus was guilty. He affirmed that at the beginning of the trial he had hoped to be able to demonstrate his innocence, but "this mass of witnesses who have come to give us information and personal opinions" had destroyed that hope. Of Dreyfus' two attorneys only Demange addressed the court. His speech was long, well reasoned, and touching, but he weakened it by making it too polite and by speaking too gently of all the officers, not excepting the late Colonel Henry.

In his rejoinder Carrière asked the judges to group the witnesses into two divisions and to weigh them. Demange begged them not to raise to the dignity of proof such "possibilities of presumptions" as had been brought to them. Finally, Dreyfus uttered these simple words:

"I am absolutely sure. I affirm before my country and before the army, that I am innocent. It is with the sole aim of saving the honor of my name, and of the name that my children bear, that for five years I have undergone the most frightful tortures. I am convinced that I shall attain this aim to-day, thanks to your honesty and to your sense of justice."

An hour later he heard the verdict that ruined all his hopes and those of justice: by five votes to two the court martial declared him guilty. It was asserted that the two votes were those of Colonel Jouaust (who throughout the trial had carefully concealed his opinion) and of Lieutenant-Colonel de Bréon, a fervent Catholic, the brother of a Paris curate. As if, however, to acknowledge its doubts, the court admitted that there were "extenuating circumstances"—a thing unheard of in military law—and incomprehensible in a matter of treason. The sentence pronounced was detention for ten years: it was known that the judges had recommended the condemned man to the indulgence of the War Office (Sept. 9, 1899).

XVII. The whole of the civilized world was amazed and indignant on the announcement of the sentence. In France itself nobody was satisfied, except General Mercier, who was delivered by this halting pronouncement from all fear of punishment. For several days the ministry hesitated as to what course to pursue. Finally, the idea of immediately pardoning Dreyfus, started by some of the prisoner's friends, who were alarmed at his state of health, prevailed in the government councils. They had some trouble in inducing the president of the republic to grant the pardon, and Dreyfus to accept it; for in order to avail himself of it the prisoner was

forced to withdraw the appeal he had laid before the council of revision. On Sept. 19, the very day on which Scheurer-Kestner died, appeared the presidential decree remitting the whole of the punishment of Dreyfus, including the military degradation. The decree was preceded by a report from the minister of war, reciting various reasons for clemency. Then by an "ordre du jour," which he did not communicate even to the president of the council, General Galliffet announced that the incident was closed.

On Sept. 20 Dreyfus was set at liberty. He immediately wrote to the president of the republic a letter in which he declared anew his innocence, together with his resolve to know no rest or peace until his honor was restored. He retired with his family to Carpentras, then to Geneva, and finally went back to settle in Paris, without causing the slightest public demonstration. Thus ended in a paradoxical result this long struggle for right. Dreyfus, liberated and restored to his family, innocent in the eyes of the world, remained excluded from the army and legally dishonored. In the senatorial elections of 1900 all the notable "Dreyfusards" (Ranc, Siegfried, Thévenet) remained unelected; but at the legislative elections of 1902 some of the champions of revision (Pressensé, Jaurès, Buisson) were returned to the Chamber of Deputies.

The sentence of Rennes left unsettled several actions which were more or less connected with the Dreyfus case: proceedings against Picquart for infraction of the law against espionage;

Pardon and an action for libel by Henry's widow

Amnesty. against Joseph Reinach; an action against Zola (whose condemnation by

default was not definitive); eventual proceedings against General Mercier, etc. Waldeck-Rousseau's ministry considered that the people were tired of an "affaire" that had paralyzed the business of the country, and had brought it to the brink of a civil war; for it had become known that if Dreyfus had been acquitted the leaders of the anti-Revisionists—Déroulède, Marcel Habert, Jules Guérin—had determined on a "coup." To prevent this they had been arrested (Aug. 12) for conspiracy against the state, and condemned to banishment or prison. The ministry reported a bill which declared that all actions for matters connected with the Dreyfus affair, excepting those for the crimes of murder and treason, were canceled. It was the "policy of the sponge" praised by the journalist Cornély. It met with keen opposition from the convinced adherents of Dreyfus; they saw in it an immoral stifling of justice, and they succeeded in protracting the discussion of the bill. In the mean time all the actions remained unsettled. But events convinced Waldeck-Rousseau still further of the necessity for the pacific measure. In the month of May, 1900, the mere insinuation of a revival of the "affaire" had favored the success of the Nationalist candidates in the municipal elections of Paris. The resignation of General Galliffet, May 30, 1900, on a side issue of the "affaire," and the almost unanimous vote by

the Chamber of an "ordre du jour" against the re-opening of the case, encouraged the government to insist on the voting for the bill. After long debate it was definitely adopted on Dec. 24, 1900.

In the course of the discussion Waldeck-Rousseau had stigmatized General Mercier's conduct in 1894, and consoled the defenders of Dreyfus by making appeal to the justice of history. Of the three most notable champions of revision, Scheurer-Kestner had already gone to the grave; Zola returned to France, where he died from an accident Sept. 29, 1902; as to Colonel Picquart, indignant at the law of amnesty, he abandoned the appeal that he had lodged against the decision—very much open to criticism—of the council of inquiry which had struck him from the lists, and definitely left the army by way of protestation. In 1906 he was reinstated with the rank of brigadier-general to date from 1903, was subsequently promoted to general of division and made minister of war in M. Clemenceau's cabinet (1906).

On July 12, 1906, the Supreme Court of France decided that there was no incriminating evidence against Dreyfus and ordered his immediate reinstatement in the army. As soon as this order was carried into effect, Dreyfus was promoted to the rank of major and created a knight of the Legion of Honor; at the same time legal action was begun against those who had tried to ruin his career.

As short epitomes may be mentioned: Pierre More, *Exposé impartial de l'Affaire Dreyfus* (1898); Sir Godfrey Lushington, *The Conspiracy Against Captain Dreyfus* (*National Review*, June, 1899).
